Adjournment of Congress.

[H. OF R.]

relief: not merely to pass a law or two to relieve the Treasury by raising money from the people, and then go home. The idea, he said, appeared to be very general that there must be a recess. But he could not see the necessity or adequate reason of adjourning. But if it were settled that this is to be so short a session, and that measures so important are to take their final decision, at any rate, before it closes, why then, Mr. A. observed, it were better the session were shortened as much as possible. It were better, in fact, to adjourn at once—to-morrow. We have done mischief enough, he remarked, already, for the sake of relieving the Treasury. It would not be difficult, however, to lay the country under a yet further burden than that already imposed upon it—by the passage, meantime, of the bill which gives Government ten or twelve millions of dollars more. It would be easy to do this in one day by the aid of the previous question. And then, why not go home?

Mr. A. remarked that he had heard no arguments for adjournment which had been based upon considerations of public interests, but only on those of mere private accommodation; just, said he, as we get all the gold and silver, while the people get nothing but rags.

But there was one other money bill the House might, by the aid of the previous question, also get through within the limits prescribed by the Senate for the duration of the session. Besides the ten or twelve millions of dollars for the Treasury, there was a bill on the table appropriating two or three millions of dollars more "for the suppression of Indian hostilities." Being one of that highly favored class of appropriation bills which he had before designated as "scalping-knife and tomahawk bills," it would be most easy to pass it by the previous question at any moment.

Mr. A. gave as a reason why he would not vote for that bill, if it should come up, that no such appropriation as it makes was called for by the Executive. It was not mentioned in the message. There had been no intimation from any quarter, that should be taken as authority by the House in matters so important, that \$2,000,000 more of the people's money was wanted in addition to the large sums already appropriated for the same object. But, said Mr. A., it seems to be the object of this session of Congress, rejecting all consideration of the claims and memorials of the people, to do only what in England is significantly denominated "the King's business," and then to go home as fast as possible!

The SPEAKER here suggested that the bill making appropriations for the suppression of Indian hostilities was not then before the House.

Mr. ADAMS, with great deference to the Speaker, would suggest that he was in order while giving as a reason why Congress should not adjourn next Monday, that important bills were yet to be acted on by the House, and to strengthen his argument by showing their importance.

The SPEAKER conceded that right, but denied to the gentleman the power of going into the merits of those measures, or either of them, under the rules of the House.

Mr. ADAMS. Those measures cannot be discussed without taking more time than will be allowed us if this resolution passes. Nor would it be consistent with the proper discussion of matters so important to adjourn before the commencement of the ordinary session. And, therefore, not, however, hoping that he should be successful in his appeal, he suggested to gentlemen the expediency of making the slight sacrifice of their personal conveniences to the public good. These inconveniences had mostly been already incurred; and, let gentlemen say what they will, the imputation, already alluded to by the gentleman from Maryland, [Mr. JOHNSON,] will be in the mouth of every man, woman, and child in the country,—“you went home to get double mileage!”

Mr. A. was going on to allude to the course which had

been adopted in the House in regard to the resolution of inquiry into the causes of delay in prosecuting and terminating the Florida war, and which (said Mr. A.) seems to have been sent to “the paradise of fools,”—when he was interrupted by Mr. CAMBRELENG, who called him to order.

The SPEAKER said that Mr. A. should confine himself to the question immediately before the House, instead of referring to so many distinct subjects.

Mr. ADAMS said he would endeavor to hiege himself within limits as closely as possible; and if he did chance to transgress the bounds of debate, even though it be ever so little, the chairman of the Committee of Ways and Means, who knows his absolute power in this House, will, no doubt, check him and bring him back.

Mr. A. said he had referred to two or three of the measures before the House for consideration. He would merely allude to two other great financial measures, which also awaited their action: the innumerable sub-treasures on one side, and on the other a return to deposit banks. So much is to be said on both sides, and so much is to be said against both sides, of this question, there certainly could not be much time to spare, if they were to be discussed as they should be, prior to the 9th or the 16th inst., unless, to be sure, the previous question should be invoked to settle the matter; and if that is to be used, it may as well be resorted to immediately upon the second reading of the bill as at any other time. The chairman of the Committee of Ways and Means holds in his hands the debates of this House, and whenever a question has been debated as long as he thinks proper or convenient, all he has to do is to put down his foot, and the gag is at once upon us. Besides, there would be some reason for the passage of these bills, if, being done in a hurry, they will afterwards find the apology for their passage, which, were they to be adopted after deliberation, they could never obtain.

It is the opinion of some gentlemen that the sub-Treasury system was not intended to be discussed in that House. It had been called a bold measure in the President of the United States, who had given up his usual “non-committal” policy in recommending it. Perhaps, said Mr. A., it was the more “bold” from this very consideration, that it was not to be discussed, and was not intended to be passed. On this he would give no opinion; he would leave the solution of the problem to “that great teacher, Time.” At all events, it could not, if it was intended, be discussed and passed in so short a space as was proposed. It was a great measure of revenue, calling much profound finance, much deep philosophy, and, more than all to be considered here, much warm party spirit, into action upon it. It could not so soon be settled, except by the intervention of the previous question, and, if that were intended, he would say, let us come to the question at once, even this very day.

Besides these most important matters, there was one other, to which he would briefly allude, but with regard to the merits of which Mr. A. said he should express no opinion then. He had allusion to the Mississippi contested election. Here we have two members, deciding on all important questions—for, in these days, said Mr. A., we find a majority of two upon important questions in this House—while a large portion of the House entertain the opinion that they have no right here at all! Besides, it was an important constitutional question, and involving, too, a question of deep interest to the State of Mississippi, and there certainly was not time to do justice to it, before the day proposed for adjournment. Mr. A., however, would take the occasion to remark, that, whatever may be the result of this question, he was glad those gentlemen (Messrs. CRAIBORNE and GROLSON) had been in the House during this session. They had, at all events, the voice of the people of Mississippi in favor of their being here thus long; and it is better that they should be here without a perfect

H. OF R.]

Adjournment of Congress.

[Oct. 2, 1837.]

title, than that the people of their State should be unrepresented on this floor. The expression of this opinion may be a political heresy, but such was his view of the constitution.

Mr. A. concluded by expressing the wish that his dissent to the principle of making the present an extra session merely, be entered upon the journal. This, he said, had been the main object he had in view, in making the remarks he had done to the House.

Mr. PATTON could not vote for the last amendment, for it was entirely too early to fix the adjournment of the general session; especially as they had lost all the time of the present session in the general public and private business of the country, by the adoption of the order to take up and consider nothing but what was contained in, or recommended by, the President's message. He contended, however, that the time proposed in the amendment of the gentleman from Georgia was too short for the deliberation of a measure of such importance as the one adverted to. The Senate, consisting of only fifty members, had been discussing this very bill, the sub-Treasury scheme, for about three weeks, while a single fortnight only was to be allowed for the discussion, not only of that measure, but of the resolution on the subject of a national bank, the Mississippi election, the State bank project, and all, in a body of nearly two hundred members, consisting of the direct representatives from the people.

Mr. P. moved to postpone the further consideration of the whole subject till Monday next.

Mr. THOMPSON agreed with his colleague [Mr. PICKENS] as to the importance of the change of policy proposed. A change from a paper system to a hard money system, so fatal and disastrous to the country, he would not suffer to be made without some deliberation. He wished to go home and consult with his constituents upon this subject. We were now in a state of separation from the banks; and, therefore, as we were now in the full fruition of its advantages, he did not see that any thing was to be lost by the postponement of the divorce bill till the next session. All that sustained the little confidence that still lingered in the country was the hope that something would be done for its relief. His colleague need not, therefore, be afraid that the banks would resume during the recess. He feared there was little hope of it.

Mr. BOON moved the previous question, which was not seconded by a majority of the House: Yeas 72, nays 102.

Mr. CAMBRELENG moved to suspend the rules so as to take the question on each amendment successively.

The SPEAKER declared such a motion to be out of order.

Mr. WISE did not believe it was the intention of the administration to take up the sub-Treasury scheme at all. He inquired of the Chairman of the Committee of Ways and Means, and begged he would answer him candidly and fairly, if such was their intention, whether the day of adjournment was fixed at the 9th or the 16th instant?

Mr. CAMBRELENG would answer the gentleman. He could assure him that he would take the earliest opportunity to call-up what the gentleman was disposed to call the sub-Treasury bill; and, so far from fearing to meet that question, I apprehend (said Mr. C.) that gentlemen will find no flinching here upon that subject; and we will see whether the gentleman from Massachusetts, according to a celebrated letter, will "toe the mark." Let us see what the gentleman will do. Let us have no non-committalism.

In conclusion, he assured the gentleman, that whether they sat there for one week or two weeks, or even for six months, he should take the earliest opportunity of bringing that measure forward, after having disposed of the different measures of relief proposed for the country.

Mr. WISE. Just the answer I expected, Mr. Speaker. I feel now, more than ever, assured that the "opportunity"

thus defined by the chairman will not very soon occur. The idea of a metallic currency, as a measure to be carried out, was farthest from the thoughts of the administration party in that House. He concurred with Mr. ADAMS, that, if this were so, Congress had better adjourn at once. The administration can adjourn us just when they please, and will do so. For himself, he said he came there to administer relief to the people; and, with the gentleman from Massachusetts, was ready to remain there not only till the first Monday in April next, but for twelve months, if necessary. He said that every movement made there convinced him that the administration had no intention of carrying out that plan. He hoped that the opposition, conservative and all, would unite in remaining there until it was fairly demonstrated that it was the friends of the administration who adjourned without giving relief to the country.

Many measures, as had truly been said, were here for our discussion and settlement, (continued Mr. WISE;) among them was the plan of some of a national bank; another, that of the conservatives, of continuing the State banks as depositories of the public money; and a third, that of the sub-Treasury system—a system which was the very embodiment of that recommended in the President's message, and which recommendation every one could now see was insincere. His friend from South Carolina, [Mr. PICKENS,] who had come so warmly into the support, in advance, of this notable scheme, will discover his mistake ere long, and will find himself left in the lurch by the pretended advocates of his favorite measure of divorce. He will be left in the lurch.

Mr. W. here adverted to the change in the relative position of the two branches of Congress, which had recently been brought about. A large majority in the Senate, and a majority of two in the House, the latter not even originating its own revenue bills, while these bills, in both branches, are precisely the same, prepared, *totidem verbis*, exactly like each other, and sent on their way through the two Houses, *pari passu*!

Mr. CAMBRELENG here remarked that the bills presented several points of difference.

Mr. WISE replied that, in effect, they were precisely identical, and that such changes as had been made in them originated with the Senate.

Six or seven important bills were on the calendar to be acted on. None of these were to be taken up before the sub-Treasury bill, it appeared by the order in which they stood there. Mr. WISE said he understood the game to be played. The deposit banks are to be put in the power of the Government. The bills were ingeniously prepared; the order in which they were arranged was also politic, and such as was obviously designed to secure the passage of each, and the entire omission or defeat of the sub-Treasury bill. Then, what is to be hereafter said to the country in excuse for doing nothing for the relief of the people—the grand object of assembling here at this time? Why, "the House refused to pass the great measure of the session—the system of divorcing banks from State, and hence the failure to produce relief." Again would he say to his friends who had committed themselves in favor of this project, that they had better taken bond and security of the projectors to carry it out, before they gave in their adhesion to its support. The President had made, what had been claimed for him—a bold committal, but it was without the slightest idea that the measure he recommended would ever be adopted, even by his own friends. He was glad that the President had done this, and that, like Samson of old, he had become shorn of his strength by this the first act of committal in all his life. His administration had actually died before it had fairly commenced.

Mr. WISE hoped the House would vote to stay where they were, and hold the administration to their own plans, and see whether this proposition be not a gull—a snare—a

Adjournment of Congress.

[H. OF R.]

trap. He hoped that all true conservatives, and all in opposition, will not consent to adjourn till all that has been proposed by the administration to be done has had a fair chance of being tried. Let us act, and let us talk, too. Enough has not been said in elucidation of the true position of our affairs. We have yet to travel a long road before adjournment should be thought of.

Mr. GLASCOCK contended that the bills proposed to be passed at this session did propose to afford substantial relief to the country. He alluded to the symptoms now becoming more and more apparent, of growing prosperity in the country, and to the measures now before Congress for the amelioration of public affairs. In doing this, he made some allusion to the vote of Mr. WISE, in 1834, in favor of introducing a bill establishing substantially the same sub-Treasury system which he now deprecates.

Mr. WISE explained. He had voted for the introduction of the bill in question, as a matter of courtesy and comity towards a friend and colleague, who invoked his aid to bring the measure before the House, with the perfect understanding that he [Mr. WISE] would vote against it. He had always been, as now, opposed to the measure.

Mr. GLASCOCK resumed, and declared that he was satisfied with the explanation. He then expressed himself in favor of the 12th as the time of adjournment; and if that did not prevail, he should prefer adjourning on the 9th. He hoped, however, the motion to postpone would be rejected.

Mr. HAMER said that, from indications which had been already afforded by the action of the House, he had come to the conclusion that a large majority of the House had determined to adjourn some time before the first Monday of December next; but the question was, how long before that day? If it had taken the House four weeks to pass one bill, how long would it require to pass some half dozen which had been reported? This seemed like a plain sum in the rule of three; but he hoped the issue would not so turn out. He then went on to argue that, as the minds of the House were made up on nearly if not all of these bills, it would not take long to pass upon them; and this might as well be done by the 9th as by the 16th of the month. Two weeks certainly afforded ample time. As soon as a day was fixed, discussion would be restrained.

After some remarks of Mr. BRIGGS, who called him to order, as wandering from the point,

The question was put on Mr. PATTON's motion to postpone the subject, and it was negatived without a count.

The question then recurring on striking out the 9th and inserting the 16th instant,

Mr. F. O. J. SMITH demanded the yeas and nays, which were ordered by the House; and, being taken, stood as follows:

YEAS—Messrs. Alexander, Heman Allen, Anderson, Andrews, Atherton, Beatty, Bell, Bicknell, Biddle, Birdsall, Bond, Brodhead, Bronson, Bynum, Cambreleng, J. Campbell, W. B. Carter, Chaney, Cheatham, Cilley, Cleveland, Clowney, Coles, Connor, Crary, Crockett, Cushman, DeGraff, Dromgoole, Duncan, Edwards, Ewing, Farrington, Foster, Fry, Gallup, Gholson, James Graham, Grantland, Grant, Graves, Gray, Griffin, Hamer, Harlan, Harrison, Hawes, Haynes, Herod, Hoffman, Holsey, Holt, Hopkins, Howard, Hubley, R. M. T. Hunter, Thomas B. Jackson, Jabez Jackson, Joseph Johnson, Wm. Cost Johnson, Nathaniel Jones, John W. Jones, Kemble, Lawler, Legare, Leadbetter, Arphaxed Loomis, James M. Mason, Maury, McKay, Robert McClellan, McClure, McKim, Menefee, Mercer, Miller, Montgomery, Morgan, Samuel W. Morris, Muhlenberg, Noble, Ogle, Owens, Palmer, Parker, Parmenter, Patton, Paynter, Pennybacker, Petrikin, Phelps, Pickens, Pope, Potts, Pratt, Prentiss, Ridgway, Rives, Robertson, Sheffer, Slade, Southgate, Spencer, Stewart, Taliaferro, Taylor, Titus, Toland, Tou-

cey, Turney, Vail, Webster, Weeks, Albert S. White, Thomas T. Whittlesey, Wise—115.

NAYS—Messrs. Adams, J. W. Allen, Ayerigg, Beirne, Bond, Boon, Borden, Briggs, Buchanan, William B. Calhoun, J. Calhoun, William B. Campbell, Casey, Chambers, Chapman, Childs, Corwin, Craig, Cranston, Curtis, Darlington, Dawson, Davies, Deberry, Dennis, Dunn, Elmore, Evans, Everett, Fairfield, R. Fletcher, Fillmore, Rice Garland, Glascock, Goode, William Graham, Haley, Hall, Halsted, Hammond, Hastings, Hawkins, Henry, Ingham, Jenifer, Henry Johnson, Kilgore, Klingensmith, Lincoln, Logan, Andrew W. Loomis, Lyon, Marvin, S. Mason, Martin, May, Maxwell, A. McClellan, McKennan, Milligan, Mathias Morris, Calvary Morris, Murray, Naylor, Noyes, Patterson, Pearce, Peck, Phillips, Plumer, Potter, Rariden, Randolph, Reed, Reily, Rencher, Richardson, Rumsey, Russell, Russell, Augustine H. Shepperd, Charles Shepard, Shields, Sheplor, Sibley, Smith, Snyder, Stanly, Stratton, Thompson, Tillinghast, Towns, Underwood, Vanderveer, Wagener, John White, Elisha Whittlesey, Lewis Williams, Sherrod Williams, Jared W. Williams, Joseph L. Williams, C. H. Williams, Yell, Yorke—103.

And the amendment was agreed to.

Mr. MERCER moved to postpone the further consideration of the resolution till the first Monday in April next, and asked for the yeas and nays, but the House refused to order them, and rejected the motion without a division.

Mr. SHERROD WILLIAMS, wishing, as he said, to see who would take the responsibility of voting to go home without doing any thing to relieve the country, asked the yeas and nays on the resolution as amended. They were ordered and taken, and resulted as follows:

YEAS—Messrs. Alexander, Anderson, Andrews, Atherton, Beatty, Beirne, Bicknell, Biddle, Birdsall, Boon, Borden, Briggs, Brodhead, Bronson, Bruyn, Buchanan, Cambreleng, J. Campbell, T. J. Carter, Casey, Chambers, Chaney, Chapman, Cilley, Cleveland, Clowney, Coles, Connor, Corwin, Craig, Crary, Curtis, Cushman, Darlington, Dawson, Davee, Davies, Deberry, DeGraff, Dromgoole, Duncan, Dunn, Edwards, Evans, Ewing, Farrington, Fairfield, Isaac Fletcher, Foster, Fry, Gallup, Glascock, James Graham, W. Graham, Grantland, Grant, Gray, Grennell, Haley, Hall, Halsted, Hammond, Hamer, Harlan, Harrison, Hawkins, Haynes, Henry, Herod, Holsey, Holt, Hopkins, Howard, Hubley, W. H. Hunter, Ingham, T. B. Jackson, Jabez Jackson, N. Jones, J. W. Jones, Kemble, Kilgore, Klingensmith, Lawler, Legare, Leadbetter, Lincoln, Logan, A. Loomis, A. W. Loomis, Lyon, J. M. Mason, Martin, Maxwell, McKay, R. McClellan, A. McClellan, McClure, McKim, McKennan, Miller, Montgomery, Moore, Morgan, S. W. Morris, Muhlenberg, Noble, Noyes, Ogle, Owens, Palmer, Parker, Parmenter, Paynter, Pennybacker, Petrikin, Phelps, Pickens, Plumer, Potts, Potter, Pratt, Prentiss, Rariden, Randolph, Reed, Reily, Rencher, Richardson, Ridgway, Rives, Russell, Sheffer, A. H. Shepperd, Sheplor, Slade, Spencer, Stewart, Stratton, Taylor, Titus, Toland, Toucey, Towns, Turney, Vail, Vanderveer, Wagener, Weeks, A. S. White, J. White, Thomas T. Whittlesey, J. W. Williams—153.

NAYS—Messrs. Adams, H. Allen, J. W. Allen, Bell, Bond, W. B. Calhoun, J. Calhoun, W. B. Campbell, W. B. Carter, Cheatham, Childs, Cranston, Crockett, Elmore, Everett, Richard Fletcher, Fillmore, Rice Garland, Goode, Graves, Griffin, Hastings, Hawes, Robert M. T. Hunter, Jonifer, H. Johnson, J. Johnson, W. C. Johnson, Lewis, Marvin, Samson Mason, Maury, May, Menefee, Mercer, Milligan, M. Morris, C. Morris, Murray, Naylor, Patterson, Patton, Pearce, Peck, Phillips, Pope, Robertson, Rumsey, C. Shepard, Shields, Sibley, Snyder, Southgate, Stanly, Taliaferro, Tillinghast, Underwood, Webster, E. Whittlesey, L. Williams, S. Williams, J. L. Williams, C. H. Williams, Yell, Yorke—65.

H. or R.]

Mississippi Election.

[Oct. 2, 1837.]

So the House adopted the joint resolution of the Senate, with an amendment, fixing the 16th of October as the day for the adjournment of the present session of Congress; and it was sent to the Senate for their concurrence with the House in the amendment. [The Senate concurred accordingly.]

MISSISSIPPI ELECTION.

The House then proceeded to the consideration of the business of the morning hour, being the report of the Committee of Elections, which was accompanied by the following resolution:

Resolved, That Samuel J. Gholson and John F. H. Claiborne are duly elected members of the twenty-fifth Congress, and as such are entitled to take their seats.

The question pending was the motion of Mr. MAURY to strike out all after the word "resolved," and insert, "that Samuel J. Gholson and John F. H. Claiborne, not being duly elected members of the House of Representatives of the twenty-fifth Congress of the United States, are not entitled to seats on this floor as such."

Mr. BUCHANAN addressed the House as follows:

Mr. Speaker, after the very lucid argument of my colleague on the Committee of Elections, [Mr. PENNYBAKER,] fortified as it was by the views of my other colleague on the committee, [Mr. BRONSON,] I certainly should have considered it wholly unnecessary for me to advance a single word in support of the report of the committee, had it not been for some objections and arguments advanced by gentlemen opposed to the report, which have not been answered as fully as, in my opinion, they might be. The objections made to the credentials of the members elect, seems now to be waved by the gentleman from Tennessee, [Mr. MAURY;] but as the objection was made, and the foundation of it stated to the House, I may be indulged in stating my reasons why it should not prevail. It was stated, and truly stated, that the act of the Mississippi Legislature required the Governor to deliver to the persons elected, proper credentials under his hand and the great seal of the State. This requisition the Governor has not strictly complied with; the credentials produced are under the great seal of State, and signed by the secretary. Now the question arises, if the Governor neglects or refuses to perform his duty, by non-compliance with the law, is that to prevent the gentlemen from taking their seats? Will they not be entitled to their seats on production of other sufficient testimony to show they were duly elected? Unquestionably they would. Is it not the common practice for the Committee of Elections to look beyond the credentials produced, and inquire into the regularity of the election in all its parts. If they had the certificate exactly in accordance with the act of Mississippi, it would only be *prima facie* evidence of their right to seats in the House; it would not be conclusive, neither is a want of it conclusive against them. The gentlemen from Mississippi stand on the same footing in this respect as all other members; they appear and take their seats, and it is presumed they have sufficient credentials, unless their right is by some person contested. This is the course pursued towards every member of the House. No person has attempted to contest the sufficiency of the credentials of the gentlemen from Mississippi. They were not contested in committee, and ought not to be now. But supposing the House chooses to go voluntarily into that matter, it appears to me the objection to the credentials must fail; the certificate, to be sure, is not signed by the Governor, but it is under the great seal of State, and signed by the Secretary, and as this is nothing more than a mere ministerial act, it may be performed by the Secretary, by command of the Governor. But supposing the certificate bad, in this respect, because it is not actually signed by the Governor, yet it may be received as evidence, not under the act of Assembly, but as the act of a high and responsible officer to whom the re-

turns of election are entrusted, and whose duty it is to preserve them. From what source could more satisfactory testimony be received? It must be conclusive as to the result of the election, in the absence of all evidence to the contrary.

The great argument which is advanced and strongly relied on by gentlemen in opposition to the report of the committee is, that many of the States, by law, hold their elections for members of Congress subsequent to the 3d of March, at which time the term of office of their predecessors expired; and, consequently, if this makes such a vacancy as, by the constitution, was intended to be filled by authority of the Governor, as the words of the constitution are imperative, he is not at liberty to wait for the operation of the general election laws for filling the vacancy, but must proceed at once after the 3d of March to issue his writs of election. Thus would the Governor be bound, by the constitution, the paramount law, to nullify the election laws of his State in those cases. Hence gentlemen argue that this is not the kind of vacancy intended by the constitution to be filled by a special election held under the authority of the Governor. This argument is more specious than solid. In order to give it any weight, it must be assumed that there was some real necessity for holding the elections at so late a period as to permit a vacancy in the office to exist. If gentlemen can satisfy me that there is any provision in the constitution of the United States which renders it necessary that a vacancy of this kind should happen, then I would admit the argument to have great weight; but so far from any provision of that kind being found in the constitution, according to my view of it, the very reverse is intended; I have no doubt the intention of the framers of that institution was, that no vacancy of the kind now under discussion should ever exist. This view of the subject is fortified by the practice of a large proportion of the States. I take it, then, the argument is unsound which would draw the conclusion of unconstitutionality in the Mississippi election, from acts which (if not inconsistent with the constitution themselves) are by no means authorized, or by it rendered necessary for any legal purpose whatever.

The only questions presented to the committee were as to the legality of the Governor's writ, and whether or not a vacancy had happened, within the meaning of the constitution, to authorize the holding of a special election to fill it. With respect to the first, I cannot believe any difficulty exists in any quarter. That part of the writ which would seem to restrict the services of the gentlemen to be elected to the extra session, was beyond the power of the Governor, and, the writ being perfect without it, the election is good for the whole constitutional term of the 25th Congress. Such seems to be the understanding of every member who has spoken on the subject, and of course it requires no remarks of mine. The only question then is, what is the meaning of the word "happen," as expressed in the constitution? Had a vacancy in the representation of the State of Mississippi happened? The word "happen" is a generic term, one species of which, to be sure, means chance; but is that its only meaning? Certainly not; it embraces in its meaning any thing which occurs or comes to pass. The word, then, is broad enough to embrace the case in question. A vacancy in the representation existed, brought about by the expiration of the term for which the members in the preceding Congress were elected. The same evil, a want of representation of the State in the Congress of the United States, would exist in this case as well as in that produced by death or resignation. Why, then, not apply the remedy prescribed by the constitution? One gentleman contends the Governor ought to have convened the Legislature and let them provide the remedy by a special act; but, independent of the trouble and expense of such a proceeding, it is evident that, in many cases, it would not or could not afford an adequate remedy.

Oct. 2, 1837.]

Mississippi Election.

[H. OF R.]

Under circumstances which may frequently exist, the notice for convening Congress may necessarily be so short as to preclude all possibility of electing members under a special act to be passed by a Legislature not in session; indeed, I doubt very much whether there was time in this case. After the President's proclamation reached Mississippi, and the Governor gave reasonable notice for convening the Legislature, I think there would have been no time left to advertise an election as required by the law of Mississippi. Besides, you must take into the account the time necessarily spent in travelling 2,000 miles, the distance from that State to the seat of Government. Certain I am, there would not have been time enough, if the Legislature of that State should be as tedious in its operations as we are. Every reason seems to concur in favor of the validity of the election as it has been held under the authority of the Governor of Mississippi.

The gentlemen opposed to the report seem to me as unfortunate on the score of precedent as that of reason; two cases have been cited, Kinsey Johns of Delaware, and Mr. Lanman of Connecticut, and those cases turned on principles entirely different from that before the House; both of them happened in the Senate. The case from Delaware was an appointment by the Governor to fill a vacancy, where a session of the Legislature had intervened before the appointment was made. The case from Connecticut was an appointment made in February, to fill a vacancy which would not happen until the 4th of March, thus making the appointment to fill a vacancy before the vacancy had happened. The bare statement of these cases shows at once they can have no bearing on the case before the House; they do not apply. So far from precedents being in favor of the position of gentlemen in opposition to the report, they are the other way, so far as they can have any application, and in favor of the ground taken in the report. So sensible was the gentleman from Virginia [Mr. ROBERTSON] of this fact, that he had to resort to the observation, that in cases of contested elections, precedents should have but little weight; and in this I agree with him. Mr. Speaker, I have thus given the views which operated on my mind, and nothing that I have yet heard can bring me to entertain a single doubt with respect to the correctness of the resolution attached to the report of the committee.

The hour of half past two having arrived, the House took the usual recess until four o'clock.

EVENING SESSION.

The House resumed the consideration of the report of the Committee of Elections, on the subject of the election in the State of Mississippi.

The question being on the adoption of the resolution declaring Messrs Gholson and Claiborne entitled to their seats for the 25th Congress, and the immediately pending one being on the amendment of Mr. MAURY, declaring those gentlemen not duly elected—

Mr. LEGARE, who was entitled to the floor, began by saying that he regretted very much that, owing to various avocations, and to incessant and fatiguing attendance in that hall, it had not been in his power to look as fully into the subject, especially with a view to precedent and authority, as he should otherwise have felt it incumbent upon him to do. He had, however, thought much of it, and would now submit the result of his reflections to the candid consideration of the House.

The case, he said, presented two questions: first, whether there had occurred, in the representation of the State of Mississippi, such a vacancy as its Executive authority was required by the constitution of the United States to order an election to fill; and, secondly, supposing that question decided in the affirmative, then, whether the limitation (to the extra session) attempted to be imposed by that functionary upon the *tenure* by which the mem-

bers elected were to hold their seats, was of any legal effect. The former of these two questions, he added, was by far the more difficult, and, indeed, the only difficult one; for he took it to be too clear for controversy, that if those gentlemen were entitled to sit there a single moment, they did and must hold their seats for the whole Congressional term, by an authority paramount not only to that of the Executive, but to the laws and the constitution of the State.

And in the outset, Mr. L. said, he should assume (for he understood it to be so conceded on all hands) that this election—supposing the Governor to have had the constitutional authority to order it—had been in every particular precisely conformable to the law of the State of Mississippi in relation to the filling up of vacancies in the House; that the writ had issued in due season; that it had been carefully published and proclaimed in every part of the State; that the polls were held by the persons, at the places, in the manner required by the statute; that every man entitled to vote knew, or may be fairly, and must be legally, presumed to have known, that he was called to choose those who were to represent him here, and when it was and why it was, he was called to do so; that the attention of the whole people being thus awakened to the high and important matter they were summoned to pass upon, they did in fact come forth in very great strength, and gave to the sitting members a clear majority of several thousand votes over their competitors; that this result had been acquiesced in by all parties there, no protest having been made, nor so much as a whisper of dissatisfaction having reached the Chair; and, finally, that it was only at the request of the gentlemen themselves, who had been thus authorized to demand for the people of Mississippi a voice in the public councils at that interesting juncture, that a formal inquiry into the right of that people to participate in the legislation by which they were to be bound, had been instituted at all. And then, said Mr. L., the question was whether an election thus ordered, thus conducted, thus concluded—an election unexceptionable in every detail, complete in all its parts, decisive beyond the possibility of doubt in its results—an election expressing the sense of the voters of two Congressional districts, in the most authentic and the most unquestionable manner—without which, it is admitted, they would have been without a representative here on one of the most momentous occasions—to them, as appeared from the last week's debate, most especially so—that had ever occurred in the political history of the country; whether such an election, he said, should be treated as a mere nullity, and the members returned under it be sent back to their constituents, then the certain consequence must be that those districts would be, for a time, utterly disfranchised; the voice of a State (and if of one, why not of twenty?) stifled, while her interests were disposed of by others, the integrity of the Legislature violated by the absence of one of its essential parts, a *quasi* interregnum created in the Government itself—and why? Because, forsooth, a vacancy in the whole representation of a State, when it is called for here, is no vacancy at all!—or because the same high functionary, who is expressly charged by the constitution with seeing that every casual vacancy, in the most ordinary times, should be immediately filled up by the constituency interested in it, did, with a view to prevent a total failure of all representation at a most extraordinary juncture, call the electors of a State together, (for that is the whole extent of this mighty usurpation,) to discharge the most solemn and most indispensable of all their duties under the constitution of the United States, and to exercise their most undoubted, essential, and inalienable rights as a free people, according to the very letter of the statute in such case made and provided.

He said that, thus stated in the abstract, the proposition wore to him the air of a paradox. Every body must per-

H. OF R.]

Mississippi Election.

[Oct. 2, 1837.]

ceive at once that it supposed some strange defect or irregularity in the institutions of the country, of which, *a priori*, he would be most unwilling to admit the existence. Whatever the rights of the people of Mississippi, considered by themselves—whatever good faith towards their co-States in the use of powers conferred upon them for the common good of the Confederacy—whatever the peace, order, and safety of the whole country—whatever substantial justice, public convenience, a practical compliance, in spirit and in truth, with the laws and the obligations of society, could do to give validity and sanctity to a popular election, was to be found in that submitted to the judgment of the House. Nothing had been, nothing could be, objected to it but what was quite formal—mere subtle ties of the *summum jus*. He did not mean to affirm that where provisions of the constitution or the laws, however arbitrary or however stern, were clear and imperative, the House was at liberty to depart from them, even to prevent great public inconvenience. But he did insist upon it that, in such a question as this, he that would sacrifice substance to form, the end to the means, a manifest equity to strict law, must make out a clear case. The burden of proof was upon him. Every presumption of law and reason was against the idea that any people had voluntarily ordained an anomaly so strange, a defect so dangerous, in their fundamental laws. It would not do to surmise the people out of that House. The great right of representation and the sacred duty of maintaining the Government of the Confederacy, were not to be superseded by distant inference and loose conjecture. He called upon gentlemen on the other side for proof—for the ocular proof—and should feel himself bound to give to the people of Mississippi the benefit of every doubt that might arise as to the exercise of a right so infinitely precious to themselves, and which, far from coming into collision with the rights of others, was, on the contrary, imperatively demanded by the very obligations implied and imposed by these.

That the rule of construction, in respect of this fundamental right of representation, was in all cases to aim at giving effect, as far as possible, consistently with higher principles, to a fair exercise of it, appeals to the experience of every one at all versed in the history of parliamentary bodies. The House, as the judge, in the last resort, of its own privileges and those of its members, habitually decided such questions in reference to their real merits, and the substantial justice of each particular case. The law of Parliament on this point had been expressed with such admirable precision and elegance by a gentleman of great professional reputation, lately a member of that House, that he should make no apology for substituting the language of Mr. Binney, in the case of the Kentucky election, for his own.

Extract from Mr. Binney's speech.

"What, then, ought to be the interpretation applied by the House to a law of Kentucky prescribing the manner of holding elections for Representatives in Congress? The law does not give the right of voting; it is not intended to restrain or abridge it; its great object is to promote and secure a fair and free exercise of it. Gentlemen who argue, as some who have argued on this floor, that, being a conventional, and not a natural right, it does not exist unless it is exercised in the precise manner in all respects as the State law prescribes, build their argument upon a distinction which is of no value, and confound things which are essentially different. Whether the right of suffrage be natural or conventional is of no importance. It is a fundamental right. Government itself, or rather a particular form of Government, is conventional; and if the right of suffrage is as good as the Government, it need not be better. Being a fundamental right, secured by the constitution of Kentucky, it ought not to be, and cannot legitimately be, confounded with those provisions of law which are designed to secure its exercise. That all the provisions of an election law are parts of the qualification of an elector, and to be scrutinized and enforced with the same strictness as qualification itself, is a position that is not warranted by any analogy in the law. Doubtless, the provisions of every statute are entitled to respect and general observance. It is the duty of those who execute the laws to respect and enforce them all. But when the argument assumes for them such an influence, as that the omission to observe any one of them becomes a defect of qualification in the voter, and obliges this House to reject as illegal the votes received while the irregularity prevailed, the construction becomes

an enormous evil. The position is radically opposed to the right of suffrage, as it also is to well-established rules for the interpretation of statutes of this description; and it will make the right the victim of accident, ignorance, inattention, and even of fraud, in the execution of an election law, and consequently of those very precautions which were intended to secure its exercise. On the contrary, sir, neither accident, ignorance, inattention, nor even fraud in the officers of election, in omitting to comply with the prescription of the law ought, in all cases, necessarily to disappoint the right of suffrage. If the authority of the officers was tolerably or apparently good; if the defects in form were such as did not disturb the fairness of the election, nor prevent its fundamental nature, by making it a *visa voce* election instead of an election by ballot; or, on the contrary, if, in spite of irregularities, this House can see that, according to the spirit of the law, the will of the people in the exercise of their right of suffrage has been fairly expressed, and if the State law does not expressly declare the irregularity to be fatal, then, in my apprehension, the authority of the House to judge of the election leaves it free to disregard those irregularities, and to give full effect to the will of the majority of qualified voters. It is free to disregard them, in deference to the policy and spirit of the law; and is not bound by a servile attention to forms to defeat them both.

That (continued Mr. L.) was, beyond all doubt, the true canon of interpretation in matters of election law. The great cardinal object was to fulfil, as far as possible, the will of the people, to take care of their rights, to see that he who claimed a seat there were really their chosen representative, and that he who was clearly ascertained to be their chosen representative should not be excluded on any merely technical or formal grounds.

Nor was this liberality of construction in regard to the execution of such powers—supposing them of course to be clearly ascertained, and not in any degree to affect the rights of third parties—confined to the law of Parliament. It was a distinction known to the old common law as long as any record exists of its principles, that where a power was granted for *private* purposes, for example, to three persons, and one of them died, the other two could not execute it; but if they were commissioners for any *public* business, a single survivor might do whatever the whole college were authorized to do. Even the crabbed and impracticable spirit of English black-letter law yielded so far to the overruling necessities of society. That departure from the rigor of mere technical principles, from the stiffness and pedantry of forms, in favor of public convenience—carried out, by the uniform practice of all legislative bodies, to the length of regarding many provisions of election laws as rather directory to the officers charged with the fulfilment of them than essential to the validity of the acts done under them—disclosed and confirmed the rule which he had just laid down as to what ought to be the leaning of the House on that occasion.

Mr. L. then proceeded to say, that although, if the view he took of that rule were just, he might, under the circumstances already stated of the election in Mississippi, almost rest the case there, or at least fairly call upon gentlemen to establish positively, and to establish clearly, that the people of that State could not be represented here; he would venture, however, to go further. He would undertake to show, negatively, that they could establish no such proposition. He could see nothing in the constitution which was so plain, express, and imperative, as to authorize the House to deny to the people of a State their fundamental right to a voice in their own legislation. Gentlemen, better versed than he could pretend to be in the application of legal principles to practice, might see the subject in a different light, and be able to point out with precision wherein his opinion was erroneous. But, until they did so, he should feel himself bound to repeat, as he then did, that there was, in his opinion, nothing in the constitution of the United States which required at their hands such an extraordinary sacrifice of popular right, social duty, and public convenience, as would be the consequence of setting aside the election before them.

He then called the attention of the House to the clauses of the constitution relating to the subject.

The first was from the second section of the first article.

"The House of Representatives shall be composed of

OCT. 2, 1837.]

Mississippi Election.

[H. OF R.]

members chosen every second year by the people of the several States," &c.

Then, after assigning to each State, until the first census should be taken, an arbitrary number of representatives, it proceeds thus:

"When vacancies happen in the representation from any State, the Executive authority thereof shall issue writs of election to fill such vacancies."

The next (3d) section is as follows.

"The Senate of the United States shall be composed of two Senators from each State, chosen by the Legislature thereof for six years," &c.

It then proceeds to divide the Senators to be chosen into three classes, and to ordain that

"The seats of the Senators of the first class shall be vacated at the expiration of the second year; of the second, at the expiration of the fourth; and of the third, at the expiration of the sixth year, so that one-third may be chosen every second year; and if vacancies happen, by resignation or otherwise, during the recess of the Legislature of any State, the Executive thereof may make temporary appointments until the next meeting of the Legislature, which shall then fill such vacancies."

Now, said Mr. LEGARE, what was the object and effect of the second and third sections? It was to constitute the Legislature—to declare its tenure—to insure its existence. One of the Houses is to be a perpetual body, in the proper sense of that word. I was never to be wholly vacant; new members were always to be in so decided a minority that no sudden change of opinion or policy should happen from that cause alone. The Senate should guaranty, to a certain extent, stability and consistency in the course of the Government: it should keep up fixed habits, and hand down traditional opinion; it should have an *esprit de corps*, and the other attributes of permanent bodies. The House, on the contrary, was to be wholly renewed at shorter, but not too short intervals; for the convention dealt in no extremes of any kind. The tenure of a seat in it was to be for two years—beginning, by a resolve of the convention, on the 4th March—and for neither more nor less than two years. All its members were to come in together; they were all to go out together, and sink again into the mass of the community. If gentlemen would look into the papers of the Federalist touching this subject, they would find that nothing was more insisted on as indispensably necessary than uniformity in the tenure of that House. The celebrated author of that part of the commentary then alluded to, used language of extraordinary emphasis and positiveness in regard to it. He declares he should greatly prefer a prolongation of the term to three or four years, to any irregularity in the periods at which the delegations of the different States should enter the House. Right or wrong, this view had been adopted by the convention, and it was now, beyond all shadow of doubt, the law of that branch of the Legislature, settled in conformity with the soundest theory, by constant and invariable practice, that the term of service of every member of that House began on the 4th of March, and expired on the 4th March two years afterwards. No State could, either by its ordinances or its constitution, through its Legislature or its Executive, by omission or by commission, directly or indirectly, alter this great fundamental principle. It was the corner-stone of the whole fabric; we had solemnly covenanted with one another that there should be a supreme legislative body, composed of two integral parts—the one of them, perpetually existing, the other perpetually renewed—each correcting the other in whatever exaggeration of its principle it might otherwise be exposed to, but neither capable of acting (legislatively) without the other, and the existence of the one supposing the co-ordinate, subsidiary, or, if he might so express it, supplementary existence of the other. It is a wild idea, without the semblance of support from any

sound doctrine, inconsistent with the whole scheme of the Government, to suppose that the tenure of the representative authority, thus precisely and solemnly designated by the whole people of the United States in their fundamental law, can be changed, any part of them, at their good will and pleasure. The States, and the people of the States, are bound to conform in good faith to that principle by the most sacred of all obligations, as well as by the most manifest consideration of policy.

Looking, then, at these two sections together, every one must see that the object was, as he had said, to constitute the Legislature, and insure its existence and its duration. Looking at the former alone, it provides, 1st, that the House of Representatives shall be elected for two years; 2d, that whenever any vacancy shall occur in the representation from any State, the Executive authority thereof shall see to its being filled up by the people.

He could not resist the conviction that they who adopted this section thought they had provided for that perpetual renewal of the House, which is necessarily presupposed by the perpetual existence of the other branch of the Legislature. The idea of a mutilated Congress is a monstrosity—it could not have occurred. He was sure it had never occurred to any one of the wise men who laid the foundation of this Government in so much good faith and singleness of purpose. Were not the words of the clause comprehensive enough? Was there any exception or reserve in them? Could there have been less? They ordained elections for two years: and they further ordained that, whenever "vacancies should happen in the representation from any State," be they what they might, they should be filled up by the people. Was not that right and proper? And that the people might surely be called, in a regular and certain way, to exercise that right, they imposed it as a high and solemn duty upon the heads of the State Governments themselves to all time, to see that they were so called. What limitation, he asked again, could be pretended to be imposed upon the large and comprehensive generality of these terms? Would it be said that this was no vacancy? No vacancy, when this Congress assembles under the constitution, and two districts are not represented? It was like the argument of the old philosopher against the existence of motion, to be answered by the fact itself—no other answer was needed—none could be given by a plain man.

There was stress laid on the verb "to happen." Mr. Wirt's excellent opinion, which had been printed for the use of the House, had settled the legal philology of that unfortunate word forever. But, if it had not, could any one seriously pretend to speak English and deny that to have *happened* which actually *was*? Was it not a fact that, unless Messrs. Claiborne and Gholson were admitted to their seats, a vacancy had happened in the House? And could it happen in the House without happening in the representation of any State? To him it appeared very clear, that the word "representation," as used in the constitution, meant the abstract idea of the share of each State in the legislative power. South Carolina should have 9 Representatives out of 242. If he were asked by a foreigner what her representation was, he should apprehend him clearly, and answer, without difficulty, it was nine members—not A, B, C, or D. It was the correlative of "direct taxation"—an *ens rationis*—a being existing in contemplation of law, and in the scheme of the constitution; and this interpretation reconciled, as good interpretation always did, the most exact principles of a philosophical theory with the common sense and common language of mankind.

This construction seemed to be agreeable to all the admitted canons of interpretation, and to fulfil every one of their cardinal objects. 1st. It was the most simple and literal, and that is always to be adhered to if possible. 2d.

H. OF R.]

Mississippi Election.

[Oct. 2, 1837.]

It was in furtherance of popular right, considering the people of Mississippi in their immediate relation to that House. 3d. It was equally to be favored as enforcing a high duty of the same people considered as a part of a confederacy—the duty of maintaining the Government in its integrity. 4th. It prevented immense public inconvenience; never, indeed, could the argument *ab inconvenienti* be stronger.

He begged the House to consider the subject in this point of view. More than one difficulty presented itself in relation to it.

In the first place, he would ask, was it consistent with the constitution that, in the compulsory inevitable absence of the representation of one or more States here, the others should meet and transact business? He did not mean an absence from casualty—for, of course, they cannot, consistently with the exigencies of human affairs, be taken into the account—but absence under a legal disability, and that disability approved, according to the argument, and almost imposed in the constitution itself. Had such a case ever been contemplated? Will any one pretend that any provision has been made for such a case? Why not, if it be in the purview of the constitution? But what was the House to do in such a contingency now, in the opinion of some gentlemen, actually arisen? Could it go on? Ay or no? They might take either branch of the alternative. If yes, then where should the line be drawn? If the absence of one State, under such a disability, were no legal obstacle to the proceedings of this House, why should that of ten be so—nay, of twenty, provided the other six could send a quorum? And the matter of fact was that it required actually not many more than six to compose a majority here: New York, Pennsylvania, Ohio, Virginia, North Carolina, Kentucky, Tennessee, would do it. You have then, on this supposition, a Legislature which is complete in the absence, under an invincible legal disability, of nineteen out of twenty-six of the sovereignties of whose delegates it is composed; that legal disability being considered, like that of infancy, as a high privilege, and as guaranteed by the very constitution which, at the same time, enabled others thus to take advantage of it!

But if the answer were in the negative, then here was a country deliberately exposing itself to all the dangers of a complete irremediable interregnum of its whole legislative power for, it might be, nine months in every Congressional term! Did any body think that a construction lightly to be adopted which led to such consequences as these? See what the very men who formed the constitution thought of that state of things which was now claimed as a privilege, while an attempt to prevent its immense and obvious inconveniences, by the usual exercise of popular sovereignty under the same constitution, was denounced, with a gravity almost comic, as downright usurpation and tyranny. Look into the Declaration of Independence, said Mr. L.; you will there find that among the grounds and motives of that ever-memorable step, among the facts submitted to a candid world as fully justifying revolution and civil war, is the very right claimed, it should seem, and exercised at the expense of the people of this country by the British crown. In the same catalogue with the burning of our towns, the ravaging our coasts, the destroying the lives of our countrymen, the transporting us beyond sea for trial, the bringing hither of large armies of mercenaries to complete the works of death, desolation, and tyranny, under circumstances unprecedented in history, and unworthy of the head of a civilized country, it is expressly charged that he had repeatedly dissolved legislative bodies, refusing to call them together again, whereby their powers had returned to the people for their exercise, the State remaining exposed in the meantime to all the dangers of invasion from abroad and insurrections within. That was their simple way of considering the subject; and he ventured to say that, had some public exigency still more mo-

mentous and awakening occurred in the earlier part of this year, when so many States were without Representatives elect, requiring at the hands of the Executive the convening of Congress—had a sudden invasion, had a fearful servile war, had some great and alarming revolt against the laws, such as we have already seen in the history of the country, or worse, occurred, there would scarcely have been found a man to doubt but that elections held under writs issued by the Executives of those States were valid, and that the Executives were empowered to issue such writs precisely to protect society against the terrible consequences of omissions like these.

On the whole, therefore, Mr. L. said he was sure the House would agree with him that he had so far made out an exceedingly strong case, and that if the election in Mississippi were to be impeached, it would not be for any thing to be found in the second and third sections of the constitution.

He would next proceed to inquire how far his previous conclusions were affected by the 4th section, on which so much stress had been laid. It was as follows:

“The times, places, and manner of holding elections for Senators and Representatives, shall be prescribed in each State by the Legislature thereof; but the Congress may at any time by law make or alter such regulations, except as to the place of choosing Senators.”

“The Congress shall assemble at least once in every year, and such meeting shall be on the first Monday in December, unless they shall by law appoint a different day.”

To which may be added the clause in the 3d section of the 2d article empowering the President “on extraordinary occasions to convene both Houses.”

The question was whether the power thus granted to the States, to regulate the time, place, and manner of holding elections of representatives, was meant to be absolute and unqualified, as gentlemen seemed to imagine, or was, like all other powers, granted for accomplishing the great cardinal objects of the constitution, subject to the tacit condition of being exercised conformably to the scheme and purposes of that constitution.

Every one who had weighed well the views he had already submitted to the House would, he thought, agree that it was necessarily qualified and conditional; and that the execution of it might be vicious either by excess or by defect, either by doing too much, or by doing too little. The case before the House was one, he thought, of an imperfect execution of the power.

In the first place, the House would remark, that, in a strict theory, the whole subject of its own elections ought to have been absolutely within the control of the federal Government, for the same reason that any other part of its essential action—its Executive administration, for instance—had been rendered independent of the States. The relation between the members of that body and its constituents was immediate—the Government was in this respect national, and not federal. It must be regarded, therefore, as a great concession to the States to allow them even this modified right to regulate the circumstances of elections, of which the periods and the character had been unalterably determined by the second section. This, let it be remarked, was none of the reserved rights of the States; it was merely the creature and the incident of the federal constitution itself. But cogent reasons of public convenience and established usage in different States, made them naturally tenacious of the power of regulating their elections in their own way.

It was matter of local detail, with which their Legislatures would be of course best acquainted. Some of them voted by ballot, others *viva voce*—some of them preferred what is called a general ticket, others the district system; these, and many other similar circumstances, would make the adoption of any inflexible universal rule, unless experience should prove it to be quite indispensable, very difficult, and its

Oct. 2, 1837.]

Mississippi Election.

[H. OF R.]

operation if adopted unequal and inconvenient. It is by no means to be wondered at, therefore, that we find the States insisting strenuously upon having the power to regulate the circumstances—the time, place, and manner—of elections, in the way which their Legislatures should judge most agreeable to their immediate constituents. But how did it follow that because, through a departure from the rigor of theoretical principles in favor of public convenience, they have a right to render the performance of their duty under the second section of the constitution as little irksome or annoying as possible to themselves, therefore they were left at perfect liberty to perform it or not, at their pleasure? that because they may regulate the circumstances of an election, they have therefore an unqualified control over its existence, and over the tenure of the office created under it? because, in short, they had a power under the 4th section, of which the exercise in good faith is perfectly consistent with the duties imposed in the 2d, therefore the duty is swallowed up by the power given for its fulfilment, and the great cardinal provision of the law, by one that was merely subsidiary and instrumental to it!

If an unqualified control over the whole subject of elections for Congress had been intended to be vested in the States, why impose this duty of issuing writs to fill up vacancies—all vacancies—as an article of the fundamental law of the Union, upon their Executive authorities forever? If the general election was to be so completely in their power, that it should be claimed and proclaimed as their undoubted right to order or to omit it, why not leave it to their legislation also to take care of a few casual vacancies? Why mention vacancies at all? There appeared to him but one possible conclusion, and that was, that in all cases whatsoever of vacancy in the representation from any State, when it was called for there, the executive authority should see to their being filled up by the people—because such a case as a State so arranging its election laws as purposely to create a vacancy, was not contemplated, and could not be contemplated, by those who framed the Government, on the principles he had already explained.

Therefore, as he read the constitution, all elections being intended and supposed to be held before the 4th of March, all vacancies were, of course, such as every one admitted to be properly filled by writs from the Executive. This simple, natural, and fair construction reconciled or precluded all conflicts and contradictions whatever; whereas, the doctrine contended for by gentlemen was the source of those very perplexities and incongruities on which, as the House had seen, such immense stress had been laid to disprove his reading, and to which he should presently speak more particularly.

The same conclusion was supported by the clauses which relate to the meeting of Congress. This is to take place at least once a year—in the absence of all legislation on the subject, on the first Monday in December; but any other day may be fixed by Congress, and the President may, by his proclamation, anticipate, whenever the public good may require it, the regular term under the law or the constitution. Now, a meeting of this House, thus called by the Executive, would be as constitutional, and, since it would generally be called under the pressure of some great exigency, at least as important as any other.

Then, did any one pretend that a State would have a right to elect for only one of the two sessions of a Congress? And if a State did so, what should this House decide as to the vacancy thus created? That was the very question it had now to decide. For that session was as legitimate, as constitutional, as the regular session in December: and if a State had a right to contrive its laws so as to defeat or prevent the one, it had the same right in regard to the other.

As a matter of right—of moral competency, at least—nobody, he was sure, for reasons already assigned, would

be extravagant enough to contend for any such arbitrary and anti-social power in the Legislatures of the States. At any rate, the wilful exercise of it was not lightly to be presumed: the fair conclusion was, in such cases as that before the House, that it was a mere omission, an oversight—an accident, in short, by which a literal interpretation of the State law would be rendered inconsistent with the paramount objects of the constitution. The vacancy must be supposed to have happened, in the ordinary sense of the term—that is, to have occurred involuntarily and casually; and, he repeated, it was the very object of that clause in the constitution to prevent the evil consequences of such omissions and accidents. What if the election law of a State had been wholly forgotten in the hurry and bustle of a session of its Legislature? What if, by some casualty, the great seal of the State had not been affixed to it, or some other necessary formality had been forgotten?

But, said gentlemen, all those inconveniences were foreseen and provided against by the same clause of the constitution which vests this power in the States; for it goes on to give the ultimate control over its exercise to Congress, which had only to pass a uniform law upon the subject: and it was asked, Should this extraordinary means of a Governor's writ be resorted to, when another as effectual was at hand?

To this he answered, in the first place, that no ordinary means could preclude all casualties. Mistake, omission, and other accidents just alluded to, would occur in spite of every precaution; and why adopt a construction by which, even under the most pressing imaginable exigencies of society, they could not be obviated, when nothing whatever rendered such a construction necessary, and no inconveniences could possibly result from the opposite and more simple construction? But, in the next place, he proceeded to deny that the reservation to Congress of the power to alter the State laws, in this particular, had the same object as the power conferred upon their Executive authorities to issue a writ for the filling up of vacancies. He admitted that stress was laid, in the discussions that took place while that constitution was under consideration, upon the necessity of reserving the ultimate control to Congress, because, otherwise, it would be competent for the States, by refusing to pass any election laws at all, to create an interregnum in the Government. But he insisted—besides that nothing is more unsafe than to construe a law, not according to its natural import, but by reference to the reported, or even the ascertained, declarations of some of its advocates at the time—that such expressions in the writing and speeches of '88 might be reconciled, without any violence, to his reading of the constitution.

Certainly, in every well-constituted State, there must be election laws—laws regulating the time, place, and manner of exercising the great fundamental right of suffrage—although, as has been shown, that right exists independently of all such laws, and has often, in the history of all free Governments, been exercised without them. Care must be taken that these circumstances be well ascertained, and notified to the electors, in order that there should be no mistake or surprise, and that the result of the election might be in fact, as it was in conclusion of law, a fair expression of the sense of the people. If an election be regularly held in conformity to law, those who vote decide for all. It goes on a necessary presumption, where proof is impossible. But if there be any ground to allege mistake or misunderstanding, or want of notice or information, it vitiates a popular election, and that presumption cannot apply. Hence, the most precise speaker or writer might very well say that to give the States an absolute control over the whole subject of the election laws, was to make Congress dependent for its existence upon their will and pleasure; for it was not necessary here to contend (as it was thought he did) that the executive authority had

H. or R.]

Mississippi Election.

[Oct. 2, 1837.]

any constitutional right to appoint the time, place, and manner of elections, but only to issue a writ to fill up a vacancy, where time, place, and manner were already fixed by law, as he should presently have occasion to explain more fully. It was, then, in reference to the necessity of some legislation upon the subject, which every body would admit was (as a general rule) indispensable, that so much importance had been attached to this clause in the constitution, and such sweeping terms used in regard to it, in the discussions of the day.

But it was further to be remarked that the powers thus reserved to Congress went much beyond that claimed for the State Executive, which was only that of preventing vacancies occasioned by imperfect or perverse legislation of the States. It controlled absolutely the whole subject of congressional elections, with the single exception of the place of electing Senators. That body might, as he had already said, pass uniform laws requiring all elections to be by ballot or *viva voce*—all to be by general ticket or by district—all to be at the same season of the year, &c. It might not only restrain and rectify an unconstitutional exercise of the power of the States in this particular—it might not only supply deficiencies or retrench excesses in it—but might supersede and annul the (otherwise) constitutional exercise of it. It was, therefore, quite natural that it should have been the object of jealous and vehement discussion in a country of such various character and condition, and that, in that discussion, the great prominent objects of the respective provisions should have absorbed the attention of minds engaged in the discussion. Besides, the States demanded the right to regulate time, place, and manner: did they claim that of creating an interregnum in the Government? Among the most extravagant champions of their independence, was one to be found who considered that as a high privilege, an incommunicable attribute of sovereignty? It was, therefore, easy to explain the fact thus relied on by gentlemen, consistently with the view which he had presented; and he again reminded the House of the cardinal principle of interpretation which required them to lean in favor of admitting every part of the people to its share in the legislative power of the country.

But conceding that, had there been no election law in Mississippi, there would have been a failure of representation, how did that affect the case of an election held under a law, as he had already observed, in exact conformity with it? Had that statute, which actually provides for elections to fill up vacancies, gone on to authorize the Executive to issue his writ in the event of an extraordinary session, it would not have been disputed but that the election had been legal. It has done every thing but that, and yet the omission of such an authority can be supposed to vitiate it. But, in fact, that authorization, had it been expressly given, would have been, according to his previous reasoning, merely superfluous—*expressio coram que tacite insunt*—for the Executive derives his power to issue a writ in such a case from the constitution of the United States, and that power could neither be increased nor diminished by any act of the State. Admitting, then, for the sake of the argument, that it could not have been exercised in the absence of all State legislation on the subject,* yet here the State legislation being complete, his power wanted nothing to give it full effect. He issued his writ, and it was executed under the statute. So the President and Senate may make a treaty without consulting the House of Representatives, but should an appropriation be necessary to its fulfilment, the House has the constitutional power of withholding it. Yet the treaty-making power was a substantive, and, except in the case mentioned, an independent one; and, had the supply been voted in advance, it is plain that the House

would have no sort of control over its exercise. The distinction is between sharing in a power, and disposing of the means necessary to its effectual operation. The parallel appeared to him to be exact.

As to the precedents cited from the Senate, he contended that they did not apply. First, because there is a remarkable difference in the words of the constitution in regard to the filling up of vacancies in the two bodies. Secondly, because the mischiefs arising from a vacancy were far greater in a fluctuating body than a permanent one, as he had already had occasion to observe; and, lastly and principally, because there was a still more important distinction between the two cases—a distinction, indeed, so important that, even if the words were precisely the same in the two clauses, different rules of interpretation might fairly be applied to them. When a vacancy occurs in the Senate, the Executive of the State is authorized to make a temporary appointment, until the next meeting of the Legislature—to make an appointment, he repeated, not to summon the Legislature to exercise their right of choice. This was a privilege vested in the Executive, in derogation of the common law of the subject—of the otherwise unalterable right of the Legislatures of the States in this particular. It was, therefore, according to well-established principles, to be rigidly construed. On the contrary, where a vacancy occurred in the House, all that the State Executive was authorized to do was to issue his writ to call together the people to fill it up. This was a provision in furtherance of the common rights of the constituency, making no change whatever in the relation between them and their representative, but simply preventing their being without one. Even, therefore, were the words the same, different constructions might be put upon them, agreeably to well-settled principles of legal interpretation. But how much stronger was the case when they came to collate the two clauses, and to find that the one which, on general principles, ought to be rigidly construed, was conceived in the most precise terms, leaving no doubt whatever of the extent of the power thus conveyed, while the other was just as general and comprehensive as it ought to be, if intended to protect the people completely against all possible chance of an interregnum in the Government.

He then proceeded to notice two objections which had been very much insisted on in the debate.

It was said that, if this view of the constitution were just, every election held after the 4th of March ought to be held under a writ of the Executive, or it was utterly void; and then cases were put of elections required to be held at a certain time by a State law, which should be ordered at another by such special writ.

His answer was, in the first place, that all these difficulties arose, as he had already observed, not out of his reading of the constitution, but out of that adopted by gentlemen, and served very strikingly to expose its unsoundness. If the States so arranged their election laws as to preclude all possibility of an interregnum, no such conflicts could ever arise. But he was willing to go further; he denied that elections held under a law admitting of a vacancy, should an extraordinary session be called, were necessarily void, if no such call were made. To be sure, in the strict technical way of considering these things, in matters of mere *meum* and *tuum*, it might be true that such a law would be pronounced utterly null and void by a court of justice—though there was a decision of a respectable judge* declaring a law good to one intent though void as to another. But this whole subject of elections was, as he had shown, a strictly practical one, over which the House exercised its exclusive jurisdiction, with an enlightened equity and in the spirit of indulgence and accommodation. Were that House a school of sophisters or a chamber of special plead-

* In Hodge's case, the Governor of Pennsylvania fixed the time of the election, and the House ruled that it was competent for him to do so; the statute containing no provision on the subject.

* Washington, J.

Oct. 2, 1837.]

Mississippi Election.

[H. OF R.]

ers, these objections of a mere metaphysical exactness might have some weight with it; but he could see no substantial difficulty whatever in acquiescing in election laws of the States, however imperfect, so long as no practical inconvenience arose out of them. The abuse was become inveterate, and *valeant quantum valere possunt*. An extraordinary session was a thing of very rare occurrence; and he was willing to tolerate this irregularity in the legislation of some of the States, provided, in case of such a session, their executive authorities were enabled to issue a writ to prevent a vacancy in the House, and an interregnum in the Government. Indeed, this seems to him strongly to recommend the construction contended for; it reconciled the right of the States with those of the nation, and sacrificed to the convenience of the former every thing but their obligations to the latter—whereas a uniform law passed by Congress to regulate elections would, as he had shown, be liable to many objections.

Lastly, he opposed to the authority of so many laws passed by the new States, and the opinion of their constitutionality that had lately prevailed, the still weightier authority of contemporaneous construction. All the States which formed the constitution, he believed, without a single exception, originally ordered their elections to be held before the 4th of March. The great majority of them still did so; a very few of them had subsequently altered their laws, doubtless because, extraordinary sessions being very rarely called, they had lost sight of the principles involved in the question, and the weighty inconveniences to which he had alluded. This discussion would awaken attention to them, and he was mistaken if the decision of the House in favor of the sitting members would not be universally acquiesced in as the most safe and reasonable practical construction of two apparently conflicting clauses of the constitution.

As to the second part, viz: how far the limitation attempted to be imposed upon the tenure of the sitting members, by the restriction of it to the extra session, in the proclamation of the Governor of Mississippi, was of any legal effect, he thought it resulted inevitably from his previous reasonings that it was of none whatever.

The authority of the State Executive was defined by the constitution from which it was derived. It was to issue a writ to fill a vacancy, without any limitation or condition; not, as in the case of the Senate, to fill a vacancy which should be until a fixed period. Why this express difference, in positive provision, if there was to be none in practice?

Had the Legislature itself of Mississippi ordained that the election of members of Congress in that State should take place generally in November, &c., but should the President convene the two Houses at any earlier period after the 4th of March, limiting the term of service there—that in that case writs should issue for the extra session alone, and another set of members be chosen afterwards for the remainder of the term; every body would agree that such a law was unconstitutional; that the last words either vitiated it entirely, or must themselves be rejected as repugnant and void.

No one, at all versed in such matters, could hesitate which branch of the alternative to choose.

It was a conflict between the general interest and a particular interest, where they could not possibly be reconciled; and the latter must, of course, give way to the former. The people of Mississippi could, in such a case, have expressed their wish to be represented, if possible, on certain terms; but, at all events, to be represented. The House would have to choose between rejecting their members altogether, or admitting them on the conditions prescribed by the constitution. He thought there could be no doubt which it should do, and that every analogy of law, every presumption of common sense, required that the constitu-

tional limitation should be rejected, and not the constitutional act. He compared it to a gift of land to a man and his heirs, with a proviso that it should not be subject to his debts or disposal; a proviso simply void.

He had put the case as strongly as possible for the opposite side. He supposed the people themselves, through their Legislature, to have attempted to impose this unconstitutional limitation upon the tenure of members of Congress—and we there had shown that it was of no effect whatever. He concluded by showing that the objection applied *a mullo fortiori* to a proclamation or writ of the Executive of the State. In that case, the people must be presumed to have acted on their own knowledge of the constitution, (which, also, they are presumed, as every body is presumed, to know,) and not on the mistaken views, or arbitrary behests of the Governor.

This point, he repeated, appeared to him perfectly clear. He had no doubt whatever, that if the vacancy were properly filled under a writ from the Executive, it was filled both by the letter and the spirit of the constitution, for the whole term, which no State has any color of right either to divide or to prolong. He might be the more confident in this opinion, because it had been repeatedly established by the highest tribunal in South Carolina, in analogous cases. In those cases, officers whose term of service was defined in the constitution of the States, but who have been commissioned for a different term, had uniformly been remitted to their constitutional tenure.

On the whole, Mr. L. concluded that the sitting members were duly elected for the whole 25th Congress; and, after adding a few words, touching the part which Mr. Claiborne had taken in the North Carolina election as entitling his case to the candid examination of the House, without distinction of parties, resumed his seat.

Mr. UNDERWOOD said that, in reference to this particular election, he could suggest a plausible reason why the present members should retain their seats—a reason which had not as yet been urged, and to which he confessed he should be puzzled to find an objection. It was this: the House of Representatives was composed of members chosen every second year; and the constitution said that the States should regulate the manner and time of choosing them, unless Congress should interfere. The State of Mississippi had acted in accordance with this provision, and had elected her Representatives to serve for the ensuing two years. The time of their election had not yet expired, and if they had been permitted to retain their seats to this period, in that view of the case he would confess that if the objection were urged, he should be puzzled to set it aside. Under the letter of the constitution there was nothing to prohibit it.

Mr. MASON, of Ohio, thought that, if the Governor of the State of Mississippi, with all his legal knowledge, both of the State law and that of the constitution, was of opinion that the terms of election would expire with the present session, (and that was his opinion, he having inserted a clause in the writ to that effect,) then it would be a fair inference to suppose that the people of the State of Mississippi had a similar impression.

Mr. GHOLSON hoped the gentleman would allow him to state that, at the time of his and his colleague's election, there was not the slightest doubt among the people of Mississippi but that, whoever were elected, were elected for the whole term of the twenty-fifth Congress.

Mr. MASON disclaimed any disrespect to the gentleman from that State, but had merely stated what, in his opinion, was a fair inference, without knowing any thing about facts. He then went on to give his reasons why he could not vote for the resolution reported by the committee. After which,

On motion of Mr. HAYNES,
The House adjourned.

H. OF R.]

Mississippi Election.

[OCT. 3, 1837.]

TUESDAY, OCTOBER 3.

MISSISSIPPI ELECTION.

After the presentation of memorials, the House resumed the consideration of the report of the Committee of Elections, in the case of Messrs. GHOLSON and CLAIBORNE, of Mississippi.

Mr. HAYNES said that, until particular circumstances had called his attention to the subject of discussion yesterday, he had not intended to participate in it.

In proceeding to examine the claim of the sitting members from the State of Mississippi to seats in this House, two points were presented for consideration. The first and most important is, did such a vacancy exist in the representation as to authorize the Governor to issue his writ of election for filling it? And the second is, admitting such vacancy to have existed, how far is the validity of the election affected by its being limited to the present extra session of Congress by the proclamation of the Governor?

In considering the first question—the question of vacancy—and in the various definitions which honorable gentlemen had given of that term, he thought they had confined themselves to too nice and rigid a technicality. In the clause of the constitution which confers upon the Governor of a State the right, and which imposes on him the duty, to order an election to fill a vacancy in this House, no term of limitation is used restricting that right and that duty to any particular set of circumstances whatsoever. The words of the constitution are: “When vacancies happen in the representation of a State, the Executive authority thereof shall issue writs of election to fill such vacancies.” Could language be more broad than that employed by the federal convention in empowering the Governor of a State to fill vacancies in this House? It certainly could not. But, in arriving at a conclusion upon the subject of vacancy or no vacancy, it appeared to him that gentlemen had carried to the consideration of the causes which might produce such vacancy, the same narrow and erroneous notions which had governed their interpretation of the term vacancy itself. They had confined those causes exclusively to the act of the individual incumbent, or the providence of God acting upon him, when it should have been equally applied to those whose duty it should be to see that no vacancy should be suffered to exist without having it immediately filled.

To enable us to arrive at a just conclusion of what was meant by the federal convention in conferring upon the Governor of a State the power of causing vacancies in this House to be filled, it is necessary to inquire into the motive of that body in organizing the Congress of the United States. And what was that motive? In announcing that motive, he would place himself upon ground which he was very sure no gentleman would controvert: that, in creating the House of Representatives, as well as the Senate, it was the purpose of the convention, in each case, to create a perpetual office. That this was the office, is the necessary consequence of their high purpose to create a perpetual Government. They gave to the Senators the term of six, and to the Representatives the term of two years. But as a consequence, too obvious and inevitable to be contested, of creating a perpetual office to carry on a perpetual Government, the succession must also be perpetual. In proof of such intention, various considerations, of a character too irresistible to be denied, may be presented to the consideration of the House. In setting the new system in motion, its operation commenced on the 4th of March, 1789; thus fixing the time from which the constitutional term of the members of the Senate and House of Representatives should be computed. All the elections to Congress were completed in anticipation of it; and, on that day, if he was not greatly mistaken, was the first ses-

sion of the first Congress commenced, thus fixing the starting point for calculating the commencement of every successive term of service in this House.

In ascertaining the intention of the parties to contract, whether public or private, we might derive instruction from a reference to their practice under it. There were thirteen States concerned in forming the federal constitution, seven of which, together with two others since formed of portions of them, Maine, Massachusetts, Vermont, New York, New Jersey, Pennsylvania, Delaware, South Carolina, and Georgia, now keep up a perpetual succession in this House, sending here one hundred and eighteen out of the one hundred and seventy members who represent the old thirteen States. The intention to preserve the perpetual succession already adverted to, is as plainly indicated in the power conferred upon the Governor of a State to fill vacancies, and that reserved to Congress to legislate in default of State legislation, as it well could have been, so far from there being such repugnance between them as gentlemen have contended for.

The language of the constitution is, “the times, places, and manner of holding elections of Senators and Representatives, shall be prescribed in each State by the Legislature thereof; but the Congress may at any time, by law, make or alter such regulations, except as to the places of choosing Senators.” For what purpose could the power be reserved to Congress over time and manner of choosing Senators, and time, manner, and place of choosing Representatives, and the power to fill vacancies conferred on the Governors of the States, unless it was for the purpose of keeping those offices constantly filled? It would seem to be impossible to forego the conclusion that this was the purpose of the convention, and no other. In considering this point, gentlemen seemed to him to have erred in taking it for granted that Congress and the States had done every thing required of them by the constitution, when there had, according to his view of the subject, been a glaring omission by both, in all cases in which the election of Representatives in Congress has been postponed beyond the day on which the constitutional term commences biennially, counting from the 4th day of March, 1789. He therefore came to the conclusion, which he did not believe a proper examination of the subject could resist, that a perpetual office having been created, perpetual succession must follow as an inevitable consequence; and whenever such perpetual succession is broken, either by the act of the incumbent or the constituent body entitled to fill it, a vacancy existed in the contemplation of the constitution, which it is the right, and not only the right, but the duty, of the Governor to cause to be filled, by issuing his writ of election.

But to show the mischievous consequences of the opposite doctrine, it would be sufficient to state that there was an actual House of Representatives in existence, on the 4th of March last, by the previous election of more than one hundred and forty members, making a constitutional quorum for the transaction of business. Suppose some great national contingency had then made it the duty of the President to convene Congress at the earliest practicable period. There was a constitutional quorum for the transaction of business in existence; and no one can deny the constitutional power of the Executive, under the contingency supposed, to call them together. But although a quorum might have been so convened, and might constitutionally have proceeded to transact the public business, a majority of the States would have remained unrepresented for months, unless their respective Governors had issued writs of election, according to the plain intent and meaning of the clause of the constitution requiring them to issue writs of election for filling vacancies in this body.

But there is another view of the subject which bears upon this question. It has been contended that, as the

Oct. 3, 1837.]

Mississippi Election.

[H. OF R.]

States are only required to elect Representatives once in two years, the time of election is, with them, wholly a matter of discretion. But this is certainly an erroneous view of the subject, as that discretion was plainly intended to be limited by the necessity of the case; the necessity of keeping a perpetual succession unbroken and entire. By the constitution, no day was fixed for commencing the operations of the new Government. That was settled by an ordinance of the Congress which ceased to exist the moment the federal constitution went into operation; and the 4th day of March, 1789, was the day appointed by them. As the constitution fixed the representative term at two years, and as that term was to date its commencement at the 4th of March, the elections in the several States were intended to conform to it. If this principle should not govern, and a majority of the States postpone, as they now postpone, their elections beyond the day on which the term commences, their Representatives are not elected for the term prescribed by the constitution; and hence we arrive at the result, that in all such cases there is a vacancy, and such a vacancy as is contemplated by the constitution in the clause empowering and requiring their Governors to fill vacancies. If, then, by the negligence of those States and of Congress, the perpetuity of the succession has been broken, how can that deprive a Governor of his constitutional right, or excuse him from his high constitutional obligation to see that the vacancy shall be filled? There is certainly no conflict between the rights of the States or of Congress on the one hand, and the Governor on the other, under this view of the subject. It was made the duty of the Legislatures of the States, and in default of them of Congress, to keep up a perpetual succession in the representative body; and in the failure of either to do so, the right and the duty of the Governor of a State require of him to supply the omission. Nor is this view derogatory to the rights of the people, but in support and affirmance of them. In the case already supposed, or a convention of Congress at the commencement of the constitutional term, according to the doctrine advanced by those who oppose the regularity of the Mississippi election on the ground that there was no vacancy, a majority of the States, under their present election laws, might remain unrepresented for months, and their constituency unheard in this body. But, according to the view presented by him, every State in the Union would be represented with no more delay than might be necessary for their Governor to convene the electors by his proclamation. The conclusion of his argument was, that as the representative office is perpetual, and as that carries with it perpetual succession, if the State Legislature shall so leave it that on the 4th of March, corresponding with the biennial commencement of the representative term in this House, any State shall be unrepresented, a vacancy has happened, on which arises the power and the obligation of the Governor to cause it to be filled. He said he was aware that this might be considered a novel doctrine; but it was the legitimate consequence of his original proposition, the perpetuity of the representative office, and its necessary result of a perpetual succession; and he had already shown that the people were deeply interested in the establishment of the doctrine. If, then, his premises and conclusion were legitimate, there was a vacancy in the representation of the State of Mississippi, requiring of the Governor to issue his writ of election for filling it; that such writ had been issued; the people had assembled at the places, and held the election in the manner required, and, as a consequence, the honorable gentlemen claiming seats in this House as Representatives from that State, are as clearly entitled to them as any members belonging to it. In regard to the second point in the case, the limitation attempted to be imposed by the Governor upon the term for which members were to be elected, it seemed to him to

be waste of words to discuss it. There was a vacancy, and a vacancy running to the close of the Congressional term. The Governor was not only authorized, but required, to issue his writ of election to fill it. He did issue that writ, and because of the attempt to limit the term to the present session, will any one seriously urge that the whole proceeding is vitiated by it?

For whose benefit was that election ordered to take place? For the people of Mississippi. By whom was it conducted? By the people who were interested in it. And, so far as we are informed, the whole canvass was conducted with a perfect understanding, that the election would cover the remainder of the term of the twenty-fifth Congress. And, more, the canvass was animated, the election was full, and decided by a large majority. Who then will have the hardihood to say, because the Governor, in performing his constitutional duty of ordering an election to fill a vacancy, attempted to limit and control the duration of that vacancy, that the full and free expression of the public will of the State of Mississippi shall pass unregarded in this House? For his own part, in every question involving the rights of the people, he should always be found in support of those rights to the best of his ability.

Mr. SLADE contended that neither the resolution nor the amendment took the true ground. He did not believe that the members elected were entitled to hold their seats during the entire continuance of the 25th Congress, and he did believe they were entitled to seats at the extra session; and if any gentleman would bring forward a proposition to this effect, he would vote for it. He was not in favor of the amendment, but if he was compelled to decide between it and the original resolution, he would be compelled to vote for it. From the most careful examination which he could give the subject, he had come to the conclusion that such a vacancy had happened as was contemplated by the constitution. He contended that the Governor had the power to fill up this vacancy, by issuing his writ of election to fill the vacancy until the time of the regular election under the constitution of the State, and went into a lengthy argument in support of this view of the case.

Mr. TILLINGHAST thought it perfectly manifest that the people of Mississippi intended to have Representatives in Congress at the present extra session, and he was glad that by the rules of the House the gentlemen were permitted to take seats at the present session of Congress, because he was always willing to take into account the will of the constituency. It was assumed, however, that the people believed, at the time of the election, that they were electing Representatives for the twenty-fifth Congress; but this he took to be an improper assumption; because the people were only authorized by the Governor to vote for members to the extra session of Congress, and therefore it was but fair to presume that the people were not generally of opinion that they were electing members for the whole of the twenty-fifth Congress. They were led to believe, by the proclamation of the Governor, that the term of those they were voting for would expire at the time when the existing law of the State provides that the election for members of Congress should take place. He contended that it was not in the power of the Governor to authorize an election for the whole of the 25th Congress; because, if the Governor was clothed with this power, he could set aside the laws of the State entirely. He contended that the real difficulty in relation to the Mississippi election was defective legislation; because the Legislature had not provided for the exigency which might arise in case of a call of an extra session of Congress immediately after the fourth of March. It appeared to him that the proper course would have been for the Governor to call the Legislature to provide the means of filling up the vacancy which had occurred, and cited the late election in Rhode Island as an illus-

H. of R.]

Mississippi Election.

[Oct. 3, 1837.]

tration of his idea. There the Legislature provided for the case of an earlier election of Representatives to Congress, and no one dreamed that this difficulty would be remedied by the Governor issuing his writ of election to supply the vacancy.

Mr. HOWARD addressed the Chair as follows:

I am not disposed, sir, (said Mr. H.,) to repeat arguments which have been already urged with great effect by those who have preceded me in this debate. The points involved in the case have been fully stated, and, indeed, the speech of the honorable gentleman from Virginia, [Mr. PENNYBACKER,] a member of the Committee of Elections, left but little original matter to be urged by those who might be inclined to follow him upon the same side of the question. The fairness with which he stated the case, and the logical comments which he made as he passed its different branches under review, almost exhausted the argument, and only a little gleaning can be found, here and there, lying upon the field which he traversed. He has reversed the example of the benevolent Jew in scripture, and instead of purposely leaving an occasional handful to be picked up by the humble and industrious gleaner, as a reward for patient toil, he has scarcely left enough to make, when collected, a single sheaf. Unwilling to seize upon the produce of another man's labor, by appropriating to my own use an entire shock, as is too often done in this House, I should have remained a silent spectator of the scene, if it were not that I have been induced to explore for myself a corner which has hitherto escaped observation, the result of which inquiry I will bring particularly to your notice, after some general observations upon the subject.

The facts in the case are few and admitted. The Legislature of Mississippi omitted to provide by law for holding an election for members of Congress, in case a special session of that body might be convened by the President before November, and the Governor ordered an election to be held, directing that the persons chosen should retain their seats until the recurrence of the regular election, in November, and two members are now in their seats in this body under that proceeding. Are they members of the entire twenty-fifth Congress, or for a part of it, or is the whole election void? These are the questions which we must consider, and reply to one or other of them in the affirmative. There is no other choice. We must select out of the three positions any one that we prefer, upon which our judgment can rest with the greatest degree of satisfaction. But, although we are presented with three opinions, (not concurring in the propriety of the phrase, three alternatives, I will not use it,) yet it is remarkable that, when we come to vote, we must discard one, and choose between the remaining two. A majority of the Committee of Elections have reported a resolution declaring that the election is valid, and that the members chosen under it must hold their seats for the entire term of the twenty-fifth Congress; and a minority have reported a resolution declaring the election to have been totally void. No one has proposed to amend either one, so as to obtain a vote upon the proposition that the sitting members are entitled to their seats until November, and no longer; and until some one shall offer such an amendment, there is no basis upon which those who hold such an opinion can express it by their vote, and the House, therefore, must select, according to its best judgment, one of the only two propositions before it. The gentleman from Vermont, [Mr. STARR,] who has just addressed the Chair, showed a desire to rest his vote upon this theory, but abstained from drawing it forth from the shadowy obscurity in which it now lies, by presenting it in the form of a distinct proposition. It is not difficult to account for his reluctance to adopt the report of the minority. The high authority of one of the most distinguished jurists that our country has ever produced, and who was known to be a favorite poli-

tician with that gentleman, is directly in his path; and I am not at all surprised that his respect for the character and attainments of the late William Wirt was too strong to permit him to run counter to the recorded opinion of that distinguished man. I shall have occasion hereafter to refer particularly to that opinion, and only allude to it now to show its power in driving from a concurrence with the report of the minority all those who attach any value to his construction of the constitution, even although they take refuge in a theory so unsubstantial that no one will call upon the House for a vote upon it. It is not worth while to consume time by attacking a hypothesis in which its own friends do not appear to have the slightest confidence; but I must be permitted to remark, that the doctrines which would break up the constitutional term of service of the members of this House into any number of long or short periods, according to the humor or policy of every State, seems to be as new as it is visionary. For wise purposes, which it is easy to see, the framers of the constitution directed that we should perform the duties appertaining to our stations here for two years, and we have taken upon ourselves the high responsibility of executing these important trusts in the face of the nation, anxiously watching every step that we take. The obligation rests upon every State in the Union to be represented here, and it cannot fulfil it by instalments, by portioning out the debt which it owes to its sister States, and discharging a little at a time. The whole House has a right—the whole nation has a right—to the benefit which the experience of even some months may confer upon the members of this body. The measures which may be proposed and discussed, must be decided upon by the same individuals who have assisted in proposing and discussing them. We come in together and must go out together. We resemble, in this respect, the changes of horses in a stage coach; and the idea that a part of us can serve but for a portion of our legislative journey, then to be superseded by fresh comers, is as unfounded as it would be ridiculous to stop a coach at every mile to change a single horse in the team. But, as I have already remarked, whilst members upon this floor are using this theory in debate, no one has sufficient reliance upon its correctness to call for a vote of the House upon it. I will therefore dismiss it from further consideration.

Whilst listening to the arguments by which the friends of the two propositions before us sustained their respective opinions, there was one reflection which pressed itself upon me. It was this. Both sides agree, as they ought to do, in attaching primary importance to the wishes of the people of Mississippi, and profess themselves desirous to carry that will into effect, if they can only find out what it is. One expression of their wish is admitted on all hands. All agree that the people of that State intended to be represented here at this extra session, and made every effort in their power to be so. Those who advocate the report of the minority, and are willing to declare the election totally void, of course intend to shut the doors of this hall upon the sitting members from the moment that the resolution passes. If we adopt it to-day, they cannot come among us to-morrow, and Mississippi would have no Representatives here. So far, then, as the people of that State have expressed a clear desire, about which there is not, and cannot be, any controversy, to have a share in the important decisions of this extra session, just so far must we allow that expression to have controlling influence in the vote which we may give, provided that vote be regulated solely by a regard to their wishes. What then is the attitude of the two parts of the House? Let us see how they stand as to the observance of the will of the people of Mississippi. Two gentlemen present themselves here on the first day of the session, having filed their credentials with the clerk, and offer to be sworn in, as usual. No opposing claimant appears. No petition is presented from a single man in

Oct. 3, 1837.]

Mississippi Election.

[H. OF R.]

Mississippi, contesting their seats. The day upon which Congress was to meet was notorious, known probably to every voter in the State; and yet no voice is heard from that quarter, casting a suspicion upon the integrity of the election. A member of this House, actuated apparently by a greater zeal for the preservation of the elective franchise and laws of Mississippi than was felt by any citizen of that State, rises and interposes an objection to those two gentlemen taking their seats; and that, too, before the facts in the case were known, or could be ascertained by any impartial tribunal, owing to the imperfect organization of the House. The people of Mississippi were supposed to be so indifferent to their own rights, or so incapable of asserting them, that it became necessary to assume a guardianship over them to protect their injured innocence. The House, however, rejected this monstrous interference, and wisely reserved the consideration of all questions that might grow out of the election, until the facts could be settled by a committee. The business of the session went on. Still no competitors for the seats appeared. No petition was presented contesting the election. The people whom these two gentlemen claimed to represent, seemed to be satisfied, as far as silence can be construed into acquiescence; and, in these days of freedom of speech, men are not apt to remain silent where they think there is cause of complaint. At the request of these members themselves, the Committee of Elections were directed to look into the matter, and up to this moment of discussing the two reports which they have given us, not even a half-stifled hum has been heard in Mississippi expressive of discontent with the election: and yet this spontaneous guardianship continues to be exercised for the protection of the rights of those people, and we are urged, out of great tenderness towards them, to declare an election void which they have made, lest, forsooth, we may violate their will by confirming it. Do the gentlemen who thus argue feel with Bassanio, when he is addressing Portia, that they are inclined

"To do a great right, do a little wrong,
And curb this cruel devil of his will?"

Are they dissatisfied with the manner in which the election has resulted, and would gladly seize upon any reason for trying it over again? I will not suppose it; but it is a singular coincidence that every member of this House who has addressed it upon this subject, who is of different politics from the two members returned from Mississippi, is in favor of setting aside their election. I can readily understand how there should be a difference of opinion upon the constitutional point involved in the case, upon which I mean to touch presently, but I cannot consent that they should place the vindication of their course upon a desire to carry out the popular will. Suppose, sir, that we adopt the resolution of the minority of the committee and declare the election void; and suppose that the people of Mississippi could interrogate us why we had done so. If we answered that we had paid respect to their will, they would reply that their will was to be represented at this important extra session, and that we knew it; for we do know it, and all admit it. If they pressed the inquiry still further, and asked why we had destroyed the political existence of those to whom they had shown themselves wedded, would it do to reply as Richard does to Lady Anne, when she upbraids him with destroying her spouse, that he "did it to help her to a better husband?" Are gentlemen such devoted friends and lovers of the people of Mississippi, that they would put out of the way the object of their choice, in order to give them a chance of making a better selection? I think that they would not be as placable as was the lady. They would be apt to reject the doubtful friendship of their self-appointed guardians, who, from a nervous apprehension lest those people may be injured in their rights, at once disfranchise them; and, from a morbid sensitiveness lest their free suffrage may be endangered, turn the ac-

knowledgeed members of their choice out of this hall for the remainder of this extra session. Whether we may remain here for a longer or shorter period of time, makes no difference in the argument. It is certain that we shall have to decide some important questions which will be closely contested, and the absence of two members may decide the fate of measures to which the whole country is looking with deep anxiety; and, besides, the question of time can have no bearing upon the point which I am now considering. I am endeavoring to show that, inasmuch as it is admitted, upon all hands, that the people of Mississippi have clearly shown their wish to be represented here during this extra session, and those who sustain the report of the minority, which sets the election aside, are, of course, for ejecting the sitting members forthwith, it will not do for them to rest the justification of their proceeding upon the ground that they are anxious to carry into effect the will of that State. They are committing the very act which they profess to be anxious to avoid. Whilst they are urging upon us their extreme care to follow the popular will, they are forcibly divorcing the people (as the use of this word finds its way into every subject at this session) from the object of their choice; and, as gentle dissuaves will not succeed, they apply the figurative wedge and sledgehammer violently to separate those who are living voluntarily in close alliance. Sir, let the supporters of the minority report rest their arguments upon a refined and technical construction of the constitution, but let them not assume the untenable position that they are acting in conformity with the will of the people of Mississippi.

But it is said that although it is admitted that an election was held for the present extra session, yet there is no evidence that there was any intention on the part of the people that the term of service of the sitting members should continue any longer than that time. I grant that it is not easy to ascertain how this is; but still there is enough from which to draw a satisfactory conclusion. One of the sitting members has publicly declared, in his place, upon his responsibility as a member of the House, that, during the canvass, no other opinion was expressed from any quarter than that the election was for members of the 25th Congress; that the candidates and voters universally so considered it. We know, also, that the presses upon both sides spoke of it in the same way; and we have a still stronger evidence of what the public opinion was, and is, in the fact that at this moment there is only a single candidate in the field for the November election; and his is rather a continuance of the former canvass than the institution of a fresh one. If the general belief was that the sitting members would hold their seats only until November, it is impossible that such a degree of languor should now prevail. On the contrary, the parties who fought so fiercely in August would have already buckled on their armor for another battle in November, more particularly when the victors were enjoying, not their spoils, but their well earned honors, at this distance from the theatre of action, and when their absence must necessarily paralyze, in some degree, the efforts of their political friends. I rely upon these evidences, slight as they may be regarded, with the more confidence, as no evidence at all is offered to maintain the opposite position, except the mere proclamation of the Governor, the effect of which upon the formation of public opinion is nothing but conjecture. In all cases of contested election, this House has very properly endeavored to ascertain what the intentions of the people were, and has disregarded technical objections as to mere forms. If the two questions of "what did the people mean to do," and "what have they done," can be satisfactorily answered, the decisions of the House have invariably corresponded with those intentions and acts. In this case, therefore, we may sum up the points thus: if we adopt the report of the majority, we place the sitting members in

H. OF R.]

Mississippi Election.

[Oct. 3, 1837.]

their seats for the extra session, which the people of Mississippi clearly intended, and confirm them in their seats for the residue of the Congress, about which some doubt may exist as to the intentions of the people, and, of course, it becomes a question of evidence. If, on the other hand, we adopt the report of the minority, we eject these members from their seats forthwith, which the people of Mississippi clearly and admittedly did not intend, and put those people to the trouble of another election, respecting their desire for which great doubt must also exist, as it too is a question of evidence. In the former course we are perfectly certain of conforming to their will as to a part of our decision, and in the latter we are equally certain that we violate it. If, therefore, we are guided solely by a regard for their will, can we hesitate which to adopt?

But I concede that there is something more in this case than the single point which I have been considering. My object hitherto has been to show that the ground assumed by the friends of the minority resolution will not bear them out as far as that point is concerned. Let us see whether any other position is stronger.

The Legislature of Mississippi, by some unaccountable oversight, omitted to vest the Governor with the power which all other Governors possess under the laws of their respective States, of ordering an election for members of Congress, where a special session may be called for a day anterior to that designated in the law of the State, as the one on which the regular election is to be biennially held. The Governor thought that he found an authority for so doing in the constitution of the United States, but thought also that his power under that instrument only extended to filling up the vacancy until the recurrence of the election at the usual time, and issued his proclamation and writ accordingly. As all the arguments of the friends of the minority resolution deny the existence of any power in the Governor, whether he had issued his writs for the entire 25th Congress or only a portion of it, I shall not consume time in examining the precise effect of the writ which he actually did issue; because, by contesting his authority to order an election at all, the opposite side appear to attach no importance to the mode in which he exercised his power, and therefore seem to acquiesce in the conclusion to which the majority of the committee come in their report, of rejecting a part of his writ as surplusage. The question is, then, whether the Governor had any authority to order an election.

In the second section of the first article of the constitution of the United States is found the clause which is the fruitful theme of this prolonged debate:

"When vacancies happen in the representation from any State, the Executive authority thereof shall issue writs of election to fill such vacancies."

It is agreed on all hands that this clause is not a dead letter, but that it confers some power of some kind upon the Governors of States; but it is argued that the power extends only to issuing writs of election to fill vacancies which "happen," and much subtle refinement is resorted to in order to draw the line of distinction between those which do and those which do not "happen." And it is further said that the term "vacancy" is not applicable to the condition of the representation from a State when the period of service of former members has expired, and before the election of their successors. With regard to the first position, I will not repeat the conclusive lexicography of the gentleman from Virginia, [Mr. PENNYBAKER,] but content myself with saying that it certainly has not been, or I believe attempted to be, answered. If the meaning of words is to be judged of by authority, the books which he has produced conclusively show that the word "happen" expresses a genus of which "chance" is only a species. No matter what may be the cause of the vacancy, whether it has occurred by "chance" or "design," or the expiration

of a term of service, the generic word equally includes it; and those who framed the constitution could not, by the most assiduous study, have discovered a word more comprehensive in its signification than the precise one which they adopted. I leave this branch of the argument where that honorable gentleman placed it, deeming it impossible either to make it more clear or refute it.

But, it is said, also, that there was no "vacancy" in the representation from Mississippi; that a vacancy can take place only when a member elect dies, or resigns, or removes, and that it cannot be created by the expiration of a term of service. For this limitation of the meaning of the word, no grammatical authority is adduced; but it rests upon the arbitrary assertion of those who so construe it. I should rather define "vacancy" to mean the absence of something which ought to be there. The limited meaning which is given to it is contrary to common sense; and indeed, no grammatical definition of it has been attempted to be given. All that is said is, that the case is not included within it. Let us suppose that the resolution of the minority should be passed to-day, and that, on to-morrow, when no person was in the occupancy of the chairs which are now so worthily filled by the two gentlemen from Mississippi, an inquirer should ask of the gentleman from Ohio, for example, where was the delegation from Mississippi; he would be bound to reply, as he has said in his argument, there is no "vacancy" in the representation from that State. But the incredulous interrogator would proceed; there is nobody in those chairs, and they are appropriated to the use of that delegation. Still my learned friend would be obliged to insist upon it, that there was no vacancy in that representation. It is true, he would say, that Mississippi has no members upon this floor in those chairs, or any where else; but I tell you there is no vacancy, because she elected members to the last Congress, and has not elected any to this; therefore, there is no vacancy. Do you not perceive, sir, that this is the inevitable result of the argument upon the opposite side? Because, if there was no vacancy when the Governor issued his proclamation, there is none now; and yet, see how impossible it is to convince the eyes of the truth of the argument addressed to the ears. I say, therefore, that this construction of the constitution is contrary to common sense, however strongly it may be supported by technicalities, and I am no advocate for adopting refined and scholastic subtleties, as the proper means of interpreting an instrument which was intended to be understood by plain men in regulating the business of life.

I wish, however, to refer you to the journal of the convention which framed the constitution, in order to show that the meaning which we now give to the clause which I have quoted, is the one which they attached to it, when it received the assent of that distinguished body. But before I do this, let me refer very briefly to the opinions of two gentlemen of acknowledged talents who have, at different periods, filled the office of Attorney General, as there is an entire harmony between the conclusions which they have drawn from a cautious inspection of the constitution as it is written, and the design, of those who made it, as manifested by the history of their proceedings. I propose to touch very summarily upon these opinions, because other gentlemen have examined them more fully, and I desire to avoid the repetition of what has been already, and no doubt better, said. In October, 1823, and July, 1832, cases occurred in the administration of the Executive authority, which drew from those who occupied, at those times, the situation of Attorney General of the United States, elaborate opinions upon the construction of that part of the constitution which empowers the President "to fill up all vacancies that may happen during the recess of the Senate." It will at once be perceived that there is a strong analogy, although not a perfect identity, between the meaning of

Oct. 3, 1837.]

Mississippi Election.

[H. OF R.]

this word "happen," in this clause of the constitution, and the one which we are considering; because, under both, the argument is, that a case where there is no incumbent in office, owing to the expiration of a term, is not included within either clause. But Mr. Wirt says, "The substantial purpose of the constitution was to keep these offices filled, and powers adequate to this purpose were intended to be conveyed. But if the President (and the remark is equally applicable to the Governor of a State) shall not have the power to fill a vacancy thus circumstanced, the powers are inadequate to the purpose, and the substance of the constitution will be sacrificed to a dubious construction of its letter."

He comes to the conclusion, that if the vacancy is found to exist, the constitutional power of providing for its being filled is immediately applicable, and adds:

"This seems to me the only construction of the constitution which is compatible with its spirit, reason, and purpose, while, at the same time, it offers no violence to its language; and these, I think, are the governing points to which all sound construction looks."

Mr. Taney, in 1832, concurred in opinion with his predecessor, without knowing, however, that Mr. Wirt had expressed it, because it was not until he had prepared his own, that an examination into the files of the office resulted in the discovery that Mr. Wirt had been called upon by the then President for an opinion in a similar case.

Mr. Taney says:

"The words used in the constitution do not, I think, by any fair construction, require a distinction to be taken. It was intended to provide for those vacancies which might arise from accident, and the contingencies to which human affairs must always be liable. And if it falls out that, from death, inadvertence, or mistake, an office required by law to be filled, is, in the recess, found to be vacant, then a vacancy has happened in the recess, and the President may fill it. This appears to be the common sense and natural import of the words used. They mean the same thing as if the constitution had said 'if there happen to be any vacancies during the recess.'"

I propose now to show that the framers of the constitution intended to attach this meaning to the kindred clause which is to govern our decision in the case before us, and this intention is to be drawn from the proceedings of the convention, which I examined for the satisfaction of my own judgment. If it had not been for the purpose of bringing this point before the House, I should not have interfered in the debate, as I stated in the outset of my remarks; but, having once taken the field, I must go through the campaign, skirmishing with all those adversaries whom I may "happen to encounter."

The convention which framed the constitution pursued the following judicious mode of proceeding. They first settled general principles in Committee of the Whole, and then appointed five of their body to revise the style of the articles agreed upon, but without alteration of the meaning, and to arrange them under proper heads. This was the extent of their duty. The committee consisted of Mr. Johnston, Mr. Hamilton, Mr. G. Morris, Mr. Madison, and Mr. King, who reported the revised draught on the 12th of September, 1787, which contained the clause in the first article, word for word, as we now find it in the constitution, viz:

"When vacancies happen in the representation from any State, the Executive authority thereof shall issue writs of election to fill such vacancies."

The argument of the friends of the minority report of the Committee of Elections is, that this is a conditional grant of power or imposition of duty upon the Executive authority of a State, taking effect only when vacancies "happen," and not applying to a case where a vacancy is created by the expiration of a term of service, as it cannot then

be said to "happen," it not being the work of chance or accident. I find, on looking over the journal, that when the convention was employed in settling the principle which they meant to establish, on the 6th of August, they expressed it in these words:

"Vacancies in the House of Representatives shall be supplied by writs of election from the Executive authority of the States in the representation from which they shall happen."—*Elliot's Debates on Federal Constitution*, vol. 1, page 256.

Every one must see at once that the only difference between these two sentences is, that the latter excludes the construction which the friends of the minority report wish to apply to the former, and that this vexed article is made to express the very idea which Mr. Wirt and Mr. Taney contended should be applied to another clause upon the same subject, coinciding precisely with the interpretation which those who think with me allege should be placed upon it. Without resorting to a strict grammatical analysis, every unprejudiced mind would agree at once, as it seems to me, that the original draught meant to provide for the filling up of all vacancies, no matter from what cause, or when they might occur; and this inference is impreguably fortified by a closer examination. The word "when," which is considered as drawing after it a limitation of power, by admitting only a certain class of cases, and excluding others, is not found in the first draught; and the word "happen" is detached from the important noun "vacancies," whose comprehensive meaning it is said to control, and made to assume an humble and merely an explanatory duty. I repeat that the idea intended to be advanced by the framers of the constitution is found in the original draught: for I find that the committee of five were appointed "to revise the style of, and arrange, the articles agreed to by the House;" and I cannot find that, in a single instance, they departed from this secondary duty. No fault appears to have been found with them on account of any aberration from the principles which the convention had previously adopted; and, in fact, they had only to paint and furnish the House which had been built, without interfering with the order of its architecture. I hold that, as statesmen, we are not only at liberty, but bound, to follow the intentions of those who prepared the constitution, and think that they are sufficiently manifest from the authority which I have adduced.

Whilst upon the subject of authority, I beg leave to refer to one quoted by the honorable gentleman from Ohio, [Mr. Mason,] who has read an extract from Judge Story's *Commentaries on the Constitution*. The part upon which he relied was the following:

"By 'vacancies' they understood to be meant vacancies occurring from death, resignation, promotion, or removal. The word 'happen' had relation to some casualty not provided for by law."—*Story's Commentaries*, vol. 3, page 411, book 3, section 1, 553.

I have too much respect for the learned judge whose opinion is thus brought before us, to pass it over without notice. But the honorable gentleman made only an extract from an entire passage, which, when considered as a whole, will be found not to bear upon the question before us. He violently tore off a limb from the body; and I beg leave to replace and bandage it up, binding the bleeding fracture as well as my poor surgery will permit, in order to present to view the un mutilated subject in a perfect form. The entire passage is this:

"The language of the clause is, that the President shall have power to fill up 'vacancies' that may happen during the recess of the Senate. In 1813, President Madison appointed and commissioned ministers to negotiate the treaty of peace of Ghent during the recess of the Senate; and a question was made whether he had a constitutional authority so to do, there being no 'vacancy' of any existing of-

H. of R.]

Mississippi Election.

[Oct. 3, 1837.]

fice, but this being the creation of a new office. The Senate, at their next session, are said to have entered a protest against such an exercise of power by the Executive. On a subsequent occasion, (April 20, 1822,) the Senate seem distinctly to have held that the President could not create the office of minister, and make appointments to such an office during the recess, without the consent of the Senate. By 'vacancies,' they understood to be meant vacancies occurring from death, resignation, promotion, or removal. The word 'happen' had relation to some casualty not provided for by law. If the Senate are in session when offices are created by law, which have not as yet been filled, and nominations are not then made to them by the President, he cannot appoint to such offices during the recess of the Senate. In many instances, where offices are created by law, special power is, on this very account, given to the President to fill them during the recess; and it was then said that in no other instances had the President filled such vacant offices without the special authority of law."

It will be observed that Judge Story referred to what he supposed to be the opinion of the Senate upon the point whether the President could appoint to an office then created for the first time—a question very wide of that now before us. The office of a Representative from Mississippi was not to be created when the Governor issued his proclamation for an election. It had been created some years before, when that State was admitted into the Union, and had been often filled. The point which the judge was discussing, therefore, had no analogy at all to that before the House.

[Mr. Mason, of Ohio, had read, in the course of his argument from Judge Story's Commentaries on the Constitution of the United States, the following paragraph:

"The language of the clause is, that the President shall have power to fill up vacancies that may happen during the recess of the Senate. In 1813, President Madison appointed and commissioned ministers to negotiate the treaty of peace of Ghent, during the recess of the Senate; and a question was made, whether he had a constitutional authority so to do, there being no vacancy of any existing office, but this being the creation of a new office. The Senate, at their next session, are said to have entered a protest against such an exercise of power by the Executive."

Mr. Adams now rose, and said that he had not intended to take any part in this debate, but that the reference of both the gentlemen to a question in which he had been personally concerned, and to an erroneous statement in the commentaries of the learned and highly respectable judge, made it his duty to apprise them and the House there was in this statement an error, not of the judge, but of his informant, whoever he may have been. The language of the book is "the Senate are said to have entered a protest;" by whom said, the book does not state. But, by whomsoever said, it was a mistake. No such protest was, in that case, ever entered by the Senate.

The facts of the case were these: Immediately after the declaration of war between the United States and Great Britain, in 1812, was known at St. Petersburg, the Emperor Alexander offered his mediation, for the negotiation of a peace between them. This proposal was made by his minister, Mr. Daschkoff, to the Secretary of State, Mr. Monroe, on the 8th of March, 1813, four days after the close of the session of Congress. Perhaps imagination could not invent an occurrence better suited to illustrate the importance of that provision of the constitution which gives to the President of the United States the temporary appointment to executive offices during the recess of the Senate. Here was an opportunity providentially presented for putting an end to a formidable and calamitous war. The mediation of the Emperor was immediately accepted. The appointment of a minister or ministers for conducting the negotiation was indispensable. If the President had no power to make that appointment during the recess of

the Senate, two months at least must have been lost before that body could be convened, for the single purpose of giving their advice and consent to the appointment. The nation, then, would have been two months suffering all the horrors and desolations of a cruel war for want of an organized power to make peace. For in this, as in every question of constructive powers, we should never lose sight of the consideration that the denial of an organized power competent for efficient action, is a denial of the power not only of the functionary to exercise it, but of the nation for whose benefit the power is to be exercised. In that case, the impotence of President Madison to appoint ministers till the Senate could be convened, would have been, during the same term of time, the impotence of the nation, in the midst of war, to make peace. Impotence, not by the weakness of the nation—not by the refusal of the enemy to negotiate—but by the neglect of the nation to organize her own institutions with powers essential to her safety, and perhaps even to her existence.

On the 24th of May, little more than two months after the offer and acceptance of the Russian mediation, Congress assembled, and on the 29th of May, President Madison sent a message to the Senate announcing that commissions had been granted during the recess of the Senate to Albert Gallatin, John Quincy Adams, and James A. Bayard, to be, jointly and severally, Envoys Extraordinary and Ministers Plenipotentiary to negotiate and sign a treaty of peace with Great Britain, under the mediation of the Emperor of Russia; to negotiate and sign a treaty of commerce with Great Britain; and the said John Quincy Adams, Albert Gallatin, and James A. Bayard, to be, jointly and severally, Envoys Extraordinary and Ministers Plenipotentiary to negotiate and sign a treaty of commerce with Russia, and that he nominated them to the Senate for those respective offices.

On the 19th of July, 1813, the Senate rejected the nomination of Albert Gallatin, on the ground that he held the office of Secretary of the Treasury, and of their opinion that the two offices ought not to be held by one person at the same time. They advised and consented by nearly unanimous votes to the two other nominations.

On the 29th of July thereafter, Mr. Gore, a member of the Senate, in opposition to the then executive administration, presented to the consideration of the Senate five resolutions, the first of which was in the following words:

"The President of the United States having, by the constitution, 'power to fill up all vacancies that may happen during the recess of the Senate, by granting commissions which shall expire at the end of their next session'—

"Resolved, That, in the opinion of the Senate, no such vacancy can happen in any office not before full."

The subsequent resolutions proceed to censure the commissioning of the three negotiators to treat for peace, declaring that their offices had not been before filled; that they were unconstitutional without the advice and consent of the Senate. That the Senate reluctantly protested against them, and that they should be communicated, by a committee of the Senate, to the President of the United States. The resolutions were laid on the table without debate, and were no further acted upon at that session, which closed on the second of August of that year.

At the next ensuing session of Congress, on the 28th of February, 1814, Mr. Gore again presented to the consideration of the Senate, in session upon executive business, the same series of resolutions.

They were then ordered to be printed, to be discussed with open doors, and made the order of the day for the ensuing Monday, the 7th of March. They were accordingly then taken up, and, after sundry postponements, and full debate, the further consideration of them was, without call for the yeas and nays, postponed till the first Monday of December then next. They were never after resumed.

OCT. 3, 1837.]

Mississippi Election.

[H. OF R.]

There was, no doubt, on that occasion, a thorough and searching discussion, by the Senate, of the extent of the rightful power of the President to fill vacancies *happening* during the recess of the Senate. The question was stated with great address in the first resolution of Mr. Gore, assuming that no vacancy could *happen* in an office not *before* filled. But the fallacy was in that assumption. It was a *petitio principii*, or begging of the question. It is not necessary to constitute a vacancy in an office, that it should have been *before* filled. It would be more correct to say that the office is always vacant when it is not filled.

There was, then, no protest entered by the Senate against the appointment during the recess of the negotiators of peace in 1813: never was an occasion, when the reason for the exercise of that power of temporary appointment was more forcible, and the appointment itself more indispensably necessary. Far from entering a protest, the Senate, after long, ample, and repeated deliberation, discarded the proposal for it by postponement to the first day of another session.

There is no doubt that the word *happens*, like multitudes of others, we might almost say all the words of every language, has various meanings and modifications of meaning. It is sometimes used to denote *incident*, and sometimes *accident*. It sometimes, perhaps generally in colloquial usage, imports some indefinite agency of chance, something fortuitous; but men who entertain a serious conviction of religious truth believe that chance has no agency in the affairs of this world, that there is nothing fortuitous, and that whatever *happens* is but the orderly disposal of events by an overruling Providence. The common scriptural expression synonymous with *happens* is, "it came to pass;" and perhaps the English translators of the Bible used those words instead of "it happened," for the express purpose of excluding the possibility of an inference, from the shade of casualty usually included in the meaning attached to this word, that there is any thing like chance in the government of the universe. A vacancy therefore *happens*, when it comes to pass; and whether caused by the resignation or death of an incumbent, by the expiration of the official term, or by his removal at the pleasure of him from whom the appointment was received, from whatever cause the vacancy proceeded, whenever it exists, it *happens*.

It is said in the passage quoted from the Commentaries of Judge Story, that the reason for the question made in the Senate, whether the President had the constitutional right in 1813, to appoint, during the recess of that body, ministers to negotiate a treaty of peace, was, that there was no vacancy of an existing office; but that this was the creation of a new office. This again was a mistake. The offices of public ministers of all denominations are created, not by the constitution or statute laws of the United States, but by the laws of nations. They are recognised as existing offices, and the mode of appointing them is prescribed by the constitution. The particular Government to which a minister is accredited, or the particular negotiation with which he may be charged, forms no part of the creation of the office. The office always exists. It belongs to the intercourse of peace and war between sovereign communities. But it is an office of occasional and voluntary recourse; vacant whenever, in the judgment of the competent authority, there is no adequate motive requiring that it should be filled, and forming a vacancy to be filled whenever the occasion arises for filling it. With this view, the vacancy in the office of ministers to negotiate for peace in 1813 happened at the moment when the proffered mediation of the Emperor Alexander was accepted, and that was during the recess of the Senate. Nor was this the only occasion upon which, in the discharge of public duties, I have been called to act upon this understanding of that constitutional provision. This is the

sense in which I have always understood it, and it has been so understood by every President of the United States, from Washington down.

It is, indeed, stated in Marshall's Life of Washington, that on one occasion, when he inclined to depute an envoy extraordinary to France, for a particular purpose, who should be united with the actual minister, (Mr. Monroe,) this objection was suggested, that during the recess of the Senate the President can only fill up vacancies, and the appointment of a minister when no vacancy existed might be supposed to transcend his powers. From respect to this construction of the constitution, therefore, he recalled Mr. Monroe to make a vacancy, and then appointed General Charles Cotesworth Pinckney to fill it.

Sir, it was the most unfortunate measure of his administration. The suggestion was not of his own mind. That was, to have joined Mr. Monroe in the negotiations with General Pinckney, which would, in all probability, have saved us from a quasi war with France, and would have been kind and generous to Mr. Monroe. The substituted expedient was not so. A stronger illustration of the incorrectness of that construction could scarcely be given. President Washington did not respect it in other cases when it was not suggested to him as an objection. He made several original appointments in the recess of the Senate to offices existing by the laws of nations.]

Mr. HOWARD resumed. I am glad, sir, that my remarks have drawn out this opinion from the honorable gentleman from Massachusetts, since his opinion on the subject of vacancies coincides with my own. Perhaps this interpolation may be considered by some as the best part of my speech. But the honorable gentleman has also, by showing that Judge Story was mistaken as to the fact upon which he built his argument, totally demolished the fabric upon which the gentleman from Ohio [Mr. MASON] reposed in fancied security. It was swept away.

[Mr. MASON explained, and contended that the remarks of the gentleman from Massachusetts had not affected the argument he had used, or the authority he had referred to.]

Mr. HOWARD proceeded. It seems to me that if Judge Story placed dependence upon an opinion of the Senate, without even expressing his own, and if it now appears that the Senate had given no such opinion, there was very little left of the authority which the gentleman quoted with such emphasis. This is a matter for the House to decide upon. I dismiss the subject.

It appears strange, at first view, that this question has never arisen before; and that now, for the first time, a power was claimed on behalf of a Governor of a State under the federal constitution. The reason why the case has never happened before, is precisely that which most readily reconciles me to the acknowledgment of the power now. It is, that all State Legislatures have, of their own accord, conferred upon their Governors this very same power, except in the single instance of Mississippi, arising in this case, no doubt, from inadvertence and precipitate legislation. There is surely no ground to fear any unpleasant result, when our decision is in exact conformity with the laws of the States for forty years; when we are manifesting a beautiful harmony between the constitution of the United States and the feelings of the people of the States, as shown in their laws. If indeed we were about to curtail the power which the Governor claimed under the constitution or laws of his own State, we might well pause. But our decision in this case will only place Mississippi precisely where the other States have voluntarily placed themselves, by conferring upon their Governors the power which we are about to admit.

The gentleman from Rhode Island, who has just taken his seat, [Mr. TILLINGHAST,] has touched upon the only point which has caused any embarrassment to my mind. He has said that if a Governor of a State derives the power of

H. or R.]

Mississippi Election.

[Oct. 3, 1837.]

ordering an election in a case like this from the constitution of the United States, which is the supreme law of the land, and of course paramount to all State laws, he can fix upon whatever time he chooses for the election to be held; and therefore, in every State where members of Congress have not been chosen upon the 4th of March, whether an extra session may be called or not, he can disregard the day which the statute may have designated, and thus overrule the laws. I state the objection as it has occurred to my mind, without recollecting whether I give it the exact shape which he did. I feel and acknowledge its force, and admit that it is difficult to escape from the conclusion; for, if this power is held by the Governor under the constitution of the United States, no State legislation can take it away. But there are two reflections which disarm this argument of much, if not all, of its force. The first is, that the conclusion will not be found, upon examination, to be as unpleasant as it appears to be upon a cursory view; for it is not to be supposed that the chief agent of a State Government will, without any cause or motive, overthrow the laws of the people over whom he presides. Such an evil is not, in the natural order of things, to be feared; and, besides, these very laws have, in all the States except Mississippi, confided to this very officer the duty of selecting a day for the election in case of necessity. If the constitution reposes this discretion in him, too, the mere anticipation of a flagrant abuse of the power cannot be received as an insurmountable objection to the fair construction of that instrument. The second reflection is, that the constitution intended to provide, in all cases where it was possible to do so, for its own perpetuation. The federal Government was meant to be kept up, and so far as it springs from the people instead of the States, power was given to it to preserve its own existence. This House, as a vital part of that Government, was not intended to become lapsed from a want of power to secure its continuance. I find in the constitution, therefore, that, although the States are permitted to regulate the elections for members of this body, at their own will and pleasure, yet provision is instantly made for a defective execution of this power in the legislative branches, by throwing upon the Governors the clear and high responsibility of seeing that the members of this House are duly chosen, in the very clause which is the subject of all this debate; and, lastly, by way of meeting every conceivable emergency, if the legislative and executive branches of a State should both fail to discharge their duty, an ultimate power is reserved to Congress to regulate for itself the elections to this House. Taking these different parts, and deducing the spirit which emanates from them all conjointly, I am led to believe that no vacancy in this body was intended to be long tolerated. In the physical world there is no vacuum. Nature is said to abhor it. Just so in our political system; those who created this artificial state of being equally abhorred a vacancy in this House, and they therefore imposed a pressure upon every point where that pressure could tend to fill it up. This consideration leads us to the very structure of the Federal Government, whether it was meant to be a loose and disjointed fabric, or one firmly knit together, so as to be lasting. This House is bound to the people of the United States by an indissoluble tie. If any one State chooses to loosen the knot, Congress can fasten it again. This is the way in which I read the constitution, and I shall not be deterred from coming to a conclusion corresponding with this interpretation, by a misplaced fear that Governors of States will rush madly from their spheres for no other purpose than to introduce confusion and disorder. I shall, therefore, vote to sustain the report of the majority of the Committee of Elections.

Mr. CUSHMAN now moved the previous question and a call of the House, [which was very thin, owing, as was supposed, to an interesting debate in another part of the Capitol;] but his motion not seeming to meet the wishes of his friends, he withdrew it.

Mr. LINCOLN next took the floor, and made an argumentative speech in opposition to the report of the committee.

Mr. HASTINGS followed in opposition to the report of the committee.

Mr. PARMENTER rose merely to respond to an appeal by his colleague, [Mr. LINCOLN,] on the matter of fact stated by him, that it had been the usage of the Legislature of Massachusetts to reject votes for any incorrectness of form. It is true, that, formerly, it had been the custom to reject votes for informalities of almost every description; but, more recently, the decisions had been different. Several instances of informal returns and other variations from the provisions of law had occurred within a year or two in Massachusetts; but after a very full discussion, notwithstanding the incorrectness of form, the members, whose seats were contested, were allowed to retain them. The decisions were the more striking, as the question had an important bearing on the relative strength of parties, and political feelings were to some extent enlisted, yet the candidates of the minority were sustained.

In the instance quoted by my colleague, that returns of votes were never counted unless received within the time prescribed by law, he is correct. But there were several variations from the statutes, which were considered matters of form, and, although important, were not sufficiently so to destroy the substantial part of the proceedings of the towns in voting. The principle sustained was this: that when the will of the people was clearly shown, the irregularities should be very great to affect their expressed wishes.

Mr. LOOMIS, of New York, addressed the Speaker, and said that, viewing this question as involving directly an important construction of the constitution, no apology was necessary by one who was called to sit in judgment upon it, for assigning briefly the reasons of his opinions.

In his estimation, the conclusion to which the House should arrive on this question, however important to the individuals concerned, and to their State and constituents, was still more so as a solemn adjudication upon the very important feature of the constitution involved in it, and it was matter of deep and abiding interest that this the first decision upon it should be correct in principle.

The constitution of these United States was doubtless intended, by those who formed and adopted it, to embrace within itself all the elements of an original Government, and of security against dissolution from external causes.

One of the provisions of that constitution is, that there shall be a House of Representatives with certain prescribed powers. To secure the existence of this chief repository of legislative powers, under all circumstances, and under every contingency, was one of the wise designs of that instrument.

The constitution provides that "the House of Representatives shall be composed of members chosen every second year." The time of commencement of the term, or its termination, is no otherwise fixed in that instrument. The first term of service of the Representatives, and that of the Executive and other officers under it, commenced necessarily on the day of the organization of the Government which was founded by it, and which was on the fourth day of March; and from that day to this, the fourth of March, in every second year, has been justly considered as the commencement of the term of subsequent Representatives.

All parties here, I understand, concur in this construction; all also agree that the Representatives in the 24th Congress from Mississippi went out of office on the third day of March last. From that day the office of Representative must be considered vacant, unless it had been filled by a previous election, of which there is no pretence, until an election should be held under the constitution to fill it.

By a law of the State of Mississippi, the election of Re-

Oct. 3, 1837.]

Mississippi Election.

[H. OF R.]

representatives in Congress is to be held "once in every two years, to be computed from the first Monday in November, 1833." The Legislature of that State had not the power to change the constitutional term of representation in Congress, nor is there any good reason to suppose it had any such design. It is a part of the policy of many of the States not to have their Representatives elected until after the expiration of the last session of each Congress. There are many good reasons for this mode, as well as some against it. It is often very desirable to exhibit to the people the entire political course through a whole Congress of a member who is a candidate for re-election.

The regular sessions of Congress have commenced on the day named in the constitution, no law naming a different day having been adopted since the first organization of the Government, and this affords ample time for canvassing the merits of the candidates between the expiration of their terms on the 3d of March, and the election in November. The instances in which extraordinary sessions of Congress have been called by the President have been rare, not exceeding two or three since the adoption of the constitution; and no such instance has, before this session, occurred since the admission of Mississippi into the Union as a State. The time appointed by the President for the meeting of this extraordinary session was before the November election provided for by the law of that State; and, unless a special election could be held, that State would not be represented at a session of Congress called for an extraordinary occasion, and to which public attention was turned with unusual interest and anxiety.

The Governor of the State of Mississippi, under these circumstances, issued his writ of election, reciting the call of the special session, and that a vacancy had occurred by the expiration of the term of the late members, and requiring a special election to be held in July, "to fill said vacancy," "until superseded by the members to be elected at the next regular session" in November. At this special election the now sitting members were elected; the question is now, at their request, presented to the House to determine what is their situation—are they lawfully members of this House? If they are, do their terms expire with this session or at the general election in November, or are they members of the entire twenty-fifth Congress? There are two sections of the constitution having a bearing upon this matter. Section 4 reads thus: "The times, places, and manner of holding elections for Senators and Representatives shall be prescribed in each State by the Legislature thereof; but the Congress may at any time, by law, make or alter such regulations, except as to the places of choosing Senators." Some of those who oppose the resolution reported by the committee insist that the Legislature of the State of Mississippi has exercised this power by appointing the election to be held in November, and that to permit the present election to be held valid would be to give to the Governor of a State the power to repeal and set at a valid act of the State Legislature.

It is provided in the second section of the constitution, that "when vacancies happen in the representation from any State, the Executive authority thereof shall issue writs of election to fill such vacancies."

It is also said by some of the opponents of the resolution that the vacancy in question was not such a one as is mentioned in this clause of the constitution; that it did not "happen;" that the word "happen" implies some death, accident, or casualty, and does not cover the case of an omission by the Legislature to provide by law for an occasion like the present. Mr. Speaker, I differ from those honorable gentlemen on both these positions. The Governor's power and that of the Legislature were alike derived directly from the constitution of the United States. Neither was paramount to the other; neither could control the other, or in any manner exercise its functions, except

in the case defined for each in the constitution. That instrument declared that Representatives should be elected; it authorized the Legislature to fix the time and place of the election; it also authorized the Governor to act, to cause an election to be held in case a vacancy happened. It is a sound and well-established rule, that every law and every instrument must be so construed, if practicable, as to make all its parts effectual and operative. It would render that part of the constitution, which gives power to the Governor inefficient and inoperative, if he could not order an election, in case of a vacancy, at another time than the general election provided by law; no special election could even be held by his order if that construction were to prevail; if a vacancy by death should happen, it could not be filled, if this view be right, until the time prescribed by the State law should arrive, because the Legislature alone is authorized to fix the time and place.

It will be perceived at once that this construction cannot be sustained; it would render absolutely nugatory the part which gives power to the Governor to cause a vacancy to be filled. That clause is equally valid with the other, and both must be construed so as to give effect to each. It is said this construction gives to the Governor of that State the right to order an election immediately after the expiration of the term on 3d of March in every case, whether it be made necessary by a call of a special session of Congress or not. Be it so. I admit, nay, I maintain, that the Governor might do this as a matter of abstract constitutional right; but, at the same time, I say it would be very indiscreet, and even an abuse of power in him, to put the people of the State to the trouble and expense of a special election, which was wholly unnecessary. Doubtless there are many unwise things which a State Executive might constitutionally do; but there is no danger of such palpable and useless abuses; the people and the Legislature, in appointing the time for election to be held in November, chose, for the good reasons I have before mentioned, to entrust to the Executive the duty to appoint the time and place of special elections when rendered necessary, and they justly concluded that no individual of sufficient character to attain that station would ever be guilty of the folly, though he might have the power to order a special election, when the general election appointed by law would arrive before the officers to be elected could act.

A new position was taken by the gentleman from Vermont, [Mr. SLADE.] He conceded that, by the fair construction of the language, a vacancy had happened, but that it was a limited vacancy, which expired at the time appointed by law for holding the election. That the vacancy being so limited, the election was to fill the vacancy only, and, consequently, that members of that State were properly entitled to seats until November, and then their office expired. This would directly violate the constitution; it would be limiting the term of members on this floor to a shorter period than that prescribed by the constitution; it would give us two sets of members for the twenty-fifth Congress. If it was competent for the State authorities, either unitedly or separately, to cause two sets of Representatives to hold seats successively in the twenty-fifth Congress, there was nothing to prevent them from making the office annual, or having a new set at each session.

The only reasonable inference is, that the Legislature of that State designed to have members of Congress elected under the Governor's writ of election, instead of at their general election, whenever the exigency demanded such a course.

But, sir, the strong ground relied on by most of those who oppose this resolution is involved in the use of the word "happen" in this clause of the constitution. I deny that this word is limited to the sense to which those gentlemen would confine it. Sir, the word "happen" is used

H. OF R.]

Mississippi Election.

[Oct. 3, 1837.]

upon the concurrence of two events—whether those events are casual, or caused each by volition, or by natural laws. Thus: this special session happened to be called between the time of the expiration of the last Congress and the time appointed by law for a new election, and hence a vacancy happened. But I will not go into the matter of the philological meaning of this expression, for the reason that it has been very fully and ably discussed.

The gentleman from Maryland [Mr. HOWARD] has referred the House to the proceedings of the convention at which the constitution was formed; it was there used precisely as if it had been when there shall be a vacancy. As this clause was originally adopted, it was in a form somewhat more diffuse, and the words “in which such vacancy shall happen” were used at the last end of the sentence, to express the idea conveyed in the first part of the same sentence by the word “vacancy,” without the conjunction of the word “happen.” After the constitution had been adopted in detail, a committee was appointed to revise the language and arrangement of it, and report it, to convey the same ideas as intended by the draught. That committee abridged this clause by changing the phraseology so as to use the word vacancy but once in it; and, in that way, the word happen came by transposition from the last part of the sentence, and was placed by the side of the word vacancy, in the first part, evidently without intending to change the sense. Is not this conclusive as to the fair construction of those words? But, sir, we have, in addition to this, the testimony of the distinguished gentleman from Massachusetts, [Mr. ADAMS,] showing what has always been the construction given to this word in similar cases by the executive branch of the Government. It is, that whenever a vacancy exists, a vacancy happens.

Mr. Speaker, all party views on this question should be entirely discarded. It should rest exclusively on its own merits; and in that spirit I have endeavored to view it. In my mind there remains not a doubt upon the subject; and to me it appears most clearly that those gentlemen are duly elected members of the 25th Congress, and that their term, as such members, cannot expire before the constitutional limit. I cannot but anticipate that I am on this subject with a large majority of this House of both political parties.

[The hour of recess arriving, the House separated until 4 P. M. without taking any question.]

EVENING SESSION.

MISSISSIPPI ELECTION.

The House resumed the consideration of the report of the Committee of Elections.

Mr. LOOMIS resumed and concluded his remarks, as given entire above.

Mr. ADAMS then rose and addressed the Chair substantially as follows:

Mr. Speaker: Differing essentially in opinion as I do from that of the gentleman who has just taken his seat, and from the report of the majority of the Committee of Elections, with regard to the limitation in the writ of election, I am constrained again, though very unwillingly, to address the House on this question. Not on the question whether a vacancy had happened in the representation of the people of Mississippi in this House, because upon that point you have understood, from the observations which I submitted to the House this morning, my opinions concur with those contained in the report of the committee. But the question affecting the right of the members from Mississippi to seats on this floor, is not whether a vacancy in the representation of the State had happened, but what the vacancy was, and how that vacancy was to be filled.

Now the vacancy was of two seats in this House of members from the State of Mississippi for the twenty-fifth Congress of the United States, which twenty-fifth Congress

commenced on the 4th of March last, and is to continue till the 4th of March, 1839. That is the 25th Congress of the United States, and that was the vacancy in the representation of the people of the State of Mississippi; and so it is understood by the majority of the Committee of Elections who have reported the resolution, that Messrs. CLAIRBORNE and GHOLSON have been duly elected members of the 25th Congress.

But have they been so elected? The constitution of the United States provides that “the House of Representatives shall be composed of members chosen every second year by the people of the several States.” The term for which they are chosen is two years.

The constitution further provides, that the times, places, and manner of holding elections for Senators and Representatives shall be prescribed in each State by the Legislature thereof; but the Congress may, at any time, by law, make or alter such regulations, except as to the places of choosing Senators.

And the constitution further provides, that when vacancies happen in the representation from any State, the Executive authority thereof shall issue writs of election to fill such vacancies.

The Legislature of the State of Mississippi had, by an act of the 2d of March, 1833, (so much of which as relates to the subject before the House is inserted in the report of the Committee of Elections,) prescribed that the elections for members of Congress, as well as of the Governor, members of the Legislature, and others, should be held biennially, and particularly that the Representatives to Congress from that State should be elected once in every two years, to be computed from the first Monday in November, in the year 1833. Such is the standing law of the State, and in enacting it the Legislature appear not to have been aware that it left the State wholly without representation in this Hall, from the commencement of every Congress on the 4th of March, till late in November of every first Congressional year; and the consequence is, and must be, that whenever Congress shall meet, whether by virtue of a law of the United States, or by special call from the President of the United States, in the interval between the 4th of March, the day when the Congress commences, and the first Monday in December thereafter, the State of Mississippi cannot lawfully be represented in the House of Representatives of the United States.

The vacancy is created, not as the writ of election issued by Governor Lynch avers, by the expiration of the term of service of the members of a former Congress, but by the law of the State deferring the elections of members to a Congress commencing on the 4th of March till the subsequent November.

The vacancy thus created by the law of the State is a vacancy which the Executive of a State cannot supply. It is not within the purview of the authority given him to supply vacancies, for the following reasons: First, because it is inconsistent with the law of the State itself, which prescribes that the election shall be held once in every two years, in November, and consequently prohibiting its being held more than once in that term. Secondly, because it is inconsistent with the provision of the constitution of the United States that the members of the House of Representatives shall be chosen by the people every second year. And, thirdly, because it would change the tenure of the term of office, prescribed by the constitution to be for two years, into a tenure of two sets of members from the same State; one for a single session or part of a session, and the other for the remainder of the term of two years.

But if the Governor of the State cannot supply the vacancy, thus created by the law of the State, for the interval of time between the 4th of March and the first Monday in November, still less can he, directly in the face of the law of the State, supply a vacancy for a whole term of two

Oct. 3, 1837.]

Mississippi Election.

[H. OF R.]

years. The gentleman from New York thinks he could, and that his writ of election, instead of authorizing it to be held for a choice of members to sit until superseded by members to be chosen at the regular election in November, should have directed it to be held for members of the twenty-fifth Congress. The report of the Committee of Elections avows the opinion that the Governor, by introducing into his writ of election the restriction upon the terms of service of the members to be chosen, transcended his powers. The report says that the opinion of the committee was almost unanimous that the writ was perfect in itself without the restricting clause; that its being there does not invalidate the election held under it, but that it may fairly be rejected as surplusage. They, accordingly, reject it as surplusage, and present to the House a resolution that Messrs. CLAIRBORNE and GHOLSON have been duly elected members of the twenty-fifth Congress.

Mr. Speaker, I have never been a tenacious adherent to the disorganizing doctrine of State rights. But conversant as I have been with the constitution of the United States from its origin; familiar as I have been with all the controversies which attended its progress from the 17th of September, 1787, when it was presented by the convention at Philadelphia to the people of the Union, till its final adoption by the people of the whole thirteen primitive States of the Confederacy—equally familiar with all the subsequent controversies and collisions of power between the General and State Governments, as well as between the several departments of this Government—sworn as I have repeatedly been to support both the constitution of the United States and that of my native Commonwealth of Massachusetts, and profoundly responsible as I hold, and ever have held, myself to a tribunal far beyond this visible diurnal sphere, for the faithful observance of those oaths, I have invariably considered the Government of this our common country as consisting of two distinct, separate, independent, but interwoven authorities, both limited—each sovereign within its appropriate sphere—each lawfully powerless to encroach upon the appropriate functions of the other; and of all the errors which half a century of national existence has brought forth to kindle the torch of discord in our country, the doctrine of nullification is, in my judgment, the greatest and the most pernicious. And next to that is the doctrine of nullification, by the Executive, of the acts of the legislative power—I do not mean by the veto, before a legislative act becomes a law—I do not mean by the constitutional control given to Congress over certain acts of State legislation—but I mean the annulment, by a State law, of an act of Congress, or the annulment of a State law by an Executive proclamation, or by any department of the General Government, except as authorized by the constitution.

Now, sir, it appears to me that both these errors are involved in the opinion expressed by the gentleman near me from New York, [Mr. LOOMIS,] in the report of the Committee of Elections, and in the resolution with which it closes, that Messrs. CLAIRBORNE and GHOLSON have been duly elected members of the 25th Congress. The gentleman from New York thinks the Governor of the State of Mississippi reprehensible for limiting in his writ the election of the members to a term to be superseded by members to be chosen at the general election in November, prescribed by the law of the State. The report of the Committee of Elections considers the Governor as having, by inserting the restriction, transcended his powers. They reject the restriction as surplusage!

Sir, it was the standing law of the State. The law of the State surplusage! The Governor of the State, by conforming his writ to the law of the State, transcended his powers! Why, what would he have done if he had omitted the restriction from his writ? He would have annulled the law of the State by proclamation. That would

have been a transcending of his powers with a vengeance! Sir, there has been a time, in the land of our fathers, when the pretension of power in a kingly crowned head to annul the laws of the land by proclamation conducted the royal nullifier to the block. As a democrat, as a republican, I should hardly expect that the gentleman from New York would be ready to invest the Governor of a State with a dispensing power to annul the laws of the State by proclamation. As devoted and ardent supporters of State rights, I should hardly have expected from the majority of the Committee of Elections a charge against the Governor of the State of Mississippi, of transcending his powers by strict conformity to the law of the State; and still less can I think that this House will adopt a resolution equivalent to the appointment by this House of members to represent the people of the State of Mississippi from the close of the present session to the end of the 25th Congress. For this, and nothing less than this, will be the effect of adopting the resolution reported by the majority of the Committee of Elections.

Upon the face of the credentials of these gentlemen, as stated by themselves, they were elected to represent the people of the State of Mississippi in this House, until superseded by members to be chosen at the regular State election in November. Yet the resolution, reported by the committee, declares that they shall represent the people of that State during the whole of the 25th Congress. The people of the State elected them to serve for one session. The resolution of the House is to constitute them Representatives of the people of Mississippi from the close of this session till the 4th of March, 1839.

Sir, it is my very deliberate opinion that the election of the two members from the State of Mississippi, for a term, to be superseded by others to be elected next November, was unconstitutional; that no such election could be held, because it is in direct collision with that provision of the constitution of the United States which prescribes that the members of this House shall be chosen every other year. But the time, place, and manner of holding the election, being entrusted by the constitution to the State Legislature, and the Legislature having provided only for an election to be held once in two years, and that in the month of November, *after* the commencement of the term of the Congress for which they are elected, there was no authority in the State competent to ordain an election for a single session of Congress, or for a term short of two years, from the 4th of March, 1837. The election was, therefore, null and void. It was not an election for a single session, or until November, because the constitution of the United States admits of no such election. It was not an election for the whole Congress, because the law of the State required that another election for that purpose should be held in November, and the writ of election issued by the Governor, in exact conformity to the law of the State, expressly restricted the term of service to the interval till the regular election in November. If he had no power to insert the restriction in the writ, he had none to issue the writ itself. If the election was to be held for the whole Congress, the law of the State had prescribed that it should be held in November, and it could be held at no other time.

The error of all this was in the law of the State, fixing the time for the election of the State's members in this House nine months after the commencement of the Congress itself. The power of the Governor was not competent either to repeal this law or to supply its defect. He assumed authority to supply its defect; and the report of the Committee of Elections, while charging him with transcending his powers in this assumption, concedes to him the power which he did not assume, of annulling the law of the State, assumes that he has annulled it, and stretches the election, avowedly authorized by him for a term of three months, into an election for the whole Congress.

H. of R.]

Mississippi Election.

[Oct. 3, 1837.]

If the House should adopt the resolution reported by the Committee of Elections, we are yet to see how it will be taken by the people of the State of Mississippi. Their law requires that the election of members to represent them in this House for the present Congress should be held next November. That law this House cannot set aside. The election must and will be held, and it is to be presumed that the same members will be again returned. Although I hold that the election by which they now occupy their seats was irregular, null, and void, I have been content that they should hold the seats, and wish they may continue to hold them till the close of the session; because, however irregular the election may have been, they were actually chosen by large majorities of the people, and there is no comparison in point of magnitude between the mere inconvenience of an informal election, and the great evil of depriving the people of a whole State of their representation in this House, when they have actually signified their pleasure by whom they choose to be represented. I would, therefore, postpone to the last hour of the session the decision of the question; but I should then vote for the resolution as proposed by the gentleman from Tennessee. The regular election would then be held according to the law of the State of Mississippi; and as there is no reason for expecting that the people of the State of Mississippi have, since last August, transferred their preferences to other persons, there can be no doubt that the same members will be chosen again.

But it is devoutly to be wished that the Legislature of the State of Mississippi will, by a suitable modification of their election law, provide against the recurrence of this defect in their representation in this House, which must otherwise return whenever a session intervenes between the fourth of March and the first Monday in December of every alternate year. Other States are in the same situation. Eight or ten have been obliged to hold their elections since the special call for the present session by the President of the United States. The constitution no doubt authorizes Congress by law to alter the time of holding the election, as regulated by the law of the State; but there never yet has arisen a necessity for exercising this power by Congress; nor should it, without necessity, be exercised. It is a still more exceptionable remedy for the evil which is now proposed; an assumption of illegal power by the Governor of a State, and the nullification of a State law by a resolution of this House.

Mr. CAMBRELENG asked that there might be a call of the House. This was agreed to, and the roll was called; when 105 members answered to their names.

Mr. CAMBRELENG moved that all further proceedings in the call be dispensed with; and, with a view of affording the absent members time to resume their seats, asked for the yeas and nays on his motion; which being ordered, resulted: Yeas 137, nays 61. So all further proceedings in the call were dispensed with.

Mr. WHITTLESEY, of Ohio, said that, as there was a doubt as to whether the gentlemen from Mississippi had been elected for the present session only, or the whole Congress, he thought it would be the better plan to lay the whole subject on the table, and thus afford time for them to return and be re-elected. With that view, he moved that the report of the Committee of Elections, with the amendment thereto, be laid on the table, and, on that question he asked for the yeas and nays.

Mr. WHITTLESEY withdrew his motion at the request of Mr. FILLMORE, who hoped the subject would not be thus disposed of, as it would leave the people of Mississippi in doubt.

Mr. WHITTLESEY then renewed his motion, and the yeas and nays being ordered, resulted: Yeas 70, nays 145, as follows:

YEAS—Messrs. Adams, Alexander, John W. Allen,

Aycrigg, Bell, Bond, John Calhoun, Wm. B. Campbell, Wm. B. Carter, Chambers, Cheatham, Childs, Corwin, Cranston, Crockett, Curtis, Darlington, Dawson, Davies, Deberry, Dennis, Dunn, Elmore, Evans, Everett, Ewing, Goode, Wm. Graham, Graves, Grennell, Hall, Halsted, Harlan, Harper, Hastings, Hawes, Henry, Herod, Henry Johnson, Lawler, Lewis, Lyon, Mallory, Samson Mason, Maury, Maxwell, McKennan, Milligan, Calvary Morris, Ogle, Pope, Potts, Rariden, Randolph, Reed, Rencher, Ridgway, Russell, Sawyer, Sergeant, Slade, Southgate, Stanly, Thompson, Tillinghast, Toland, Elisha Whittlesey, Lewis Williams, Wise, Yorke—70.

NAYS—Messrs. H. Allen, Anderson, Andrews, Atherton, Beatty, Beirne, Bicknell, Birdsall, Boon, Borden, Bouldin, Briggs, Brodhead, Bronson, Bruyn, Buchanan, Bynum, Wm. B. Calhoun, Cambreleng, John Campbell, T. J. Carter, Casey, Chaney, Chapman, Ciley, Clark, Cleveland, Clowney, Coles, Connor, Crary, Cushman, Davee, DeGraff, Dromgoole, Duncan, Edwards, Farrington, Fairfield, R. Fletcher, I. Fletcher, Foster, Fry, Gallup, Rice Garland, Glascock, J. Graham, Grant, Gray, Griffin, Haley, Hammond, Hamer, Harrison, Hawkins, Haynes, Holsey, Holt, Hopkins, Howard, Hubley, Robert M. T. Hunter, Ingham, T. B. Jackson, Jabez Jackson, Joseph Johnson, N. Jones, J. W. Jones, Kilgore, Klingensmith, Leadbetter, Lincoln, Logan, Arphaxed Loomis, Andrew W. Loomis, Marvin, J. M. Mason, Martin, May, McKay, R. McClellan, A. McClellan, McClure, McKim, Menefee, Mercer, Miller, Montgomery, Morgan, S. W. Morris, Muhlenberg, Murray, Noyes, Palmer, Parker, Parmenter, Patterson, Patton, Paynter, Pearce, Peck, Pennybacker, Petrikin, Phelps, Phillips, Plumer, Potter, Pratt, Prentiss, Reily, Rhett, Richardson, Rives, Robertson, Rumsey, Sheffer, Charles Shepard, Shields, Sheplor, Smith, Snyder, Spencer, Stewart, Stratton, Taliaferro, Taylor, Thomas, Titus, Toucey, Towns, Turney, Underwood, Vail, Vanderveer, Wagener, Weeks, A. S. White, John White, Thomas T. Whittlesey, S. Williams, J. W. Williams, J. L. Williams, C. H. Williams, Worthington, Yell—145.

So the motion to lay on the table was decided in the negative.

Mr. HAYNES then moved the previous question, which was seconded: Yeas 105, nays 81; and the main question was ordered without a division.

Mr. BRIGGS called for the yeas and nays on the main question, which was the adoption of the resolution reported by the Committee of Elections, that Messrs. Claiborne and Gholson were entitled to their seats; which were ordered, and were: Yeas 118, nays 101, as follows:

YEAS—Messrs. Anderson, Andrews, Atherton, Beatty, Bierne, Bicknell, Birdsall, Boon, Bouldin, Brodhead, Bronson, Bruyn, Buchanan, Bynum, Cambreleng, John Campbell, T. J. Carter, Casey, Chaney, Chapman, Ciley, Clark, Cleveland, Coles, Connor, Crary, Cushman, Davee, DeGraff, Dromgoole, Duncan, Edwards, Elmore, Farrington, Fairfield, Isaac Fletcher, Foster, Fry, Gallup, Glascock, William Graham, Grant, Gray, Haley, Hammond, Hamer, Harrison, Hawkins, Haynes, Herod, Holsey, Holt, Howard, Hubley, Ingham, T. B. Jackson, J. Jackson, Joseph Johnson, N. Jones, J. W. Jones, Kemble, Kilgore, Klingensmith, Legare, Leadbetter, Lewis, Logan, Arphaxed Loomis, J. M. Mason, Martin, May, R. McClellan, A. McClellan, McClure, McKim, Miller, Montgomery, Moore, Morgan, S. W. Morris, Muhlenberg, Murray, Noble, Palmer, Parker, Parmenter, Paynter, Pennybacker, Petrikin, Phelps, Plumer, Potter, Pratt, Prentiss, Reily, Rhett, Richardson, Rives, Sheffer, Sheplor, Smith, Snyder, Spencer, Stewart, Taylor, Thomas, Titus, Toucey, Turney, Vail, Vanderveer, Wagener, Webster, Weeks, A. S. White, T. T. Whittlesey, Jared W. Williams, Worthington—118.

OCT. 4, 1837.]

National Bank.

[H. OF R.]

NAYS—Messrs. Adams, Alexander, H. Allen, John W. Allen, Aycrigg, Bell, Bond, Borden, Briggs, W. B. Calhoun, John Calhoun, Wm. B. Campbell, Wm. B. Carter, Chambers, Cheatham, Childs, Clowney, Corwin, Cranston, Crockett, Curtis, Cushing, Darlington, Dawson, Davies, Deberry, Dennis, Dunn, Evans, Everett, Ewing, R. Fletcher, Fillmore, Rice Garland, Goode, Graves, Grennell, Griffin, Hall, Halsted, Harlan, Harper, Hastings, Hawes, Henry, R. M. T. Hunter, Henry Johnson, Lawler, Lincoln, A. W. Loomis, Lyon, Mallory, Marvin, Samson Mason, Maury, Maxwell, McKennan, Menefee, Mercer, Milligan, Calvary Morris, Noyes, Ogle, Patterson, Patton, Pearce, Peck, Phillips, Pope, Potts, Randolph, Reed, Rencher, Ridgway, Robertson, Rumsey, Russell, Sawyer, Sergeant, A. H. Shepperd, C. Shepard, Shields, Sibley, Slade, Southgate, Stanly, Stratton, Taliaferro, Thompson, Tillinghast, Toland, Towns, Underwood, J. White, E. Whittlesey, L. Williams, S. Williams, J. L. Williams, C. H. Williams, Wise, Yorke—101.

So Messrs. Gholson and Claiborne were declared to have been duly elected members of the twenty-fifth Congress from the State of Mississippi, and, as such, entitled to their seats on this floor.

The House then adjourned.

WEDNESDAY, OCTOBER 4.

NATIONAL BANK.

After transacting some preliminary business, the House proceeded to the consideration of the following resolution, reported from the Committee of Ways and Means on the 25th instant, it being the business next in order:

Resolved, That it is inexpedient to charter a national bank.

The question pending was the motion of Mr. WISE to amend the resolution, by adding thereto, "at this time. And be it further resolved, that it will be expedient to establish a national bank whenever there is a clear manifestation of public sentiment in favor of such a measure."

Mr. SERGEANT, who was entitled to the floor, proceeded with his remarks for a few minutes, when he moved to refer the resolution to a Committee of the Whole on the state of the Union.

Mr. CAMBRELENG said he was very sorry this motion was submitted by the gentleman from Pennsylvania. He must be sensible that if the motion he now made prevailed, it would have the effect to make a final disposition of the question now before the House. The Committee of Ways and Means felt bound to present this question before the House, in the form they did, in consequence of the memorials referred to them by the House, praying for the establishment of a national bank. In presenting it, however, they did not anticipate a lengthy discussion. It was supposed by the Committee of Ways and Means, that the nation desired to know what course this House and the other branch of Congress intended pursuing on this question; and they had submitted this resolution in order that gentlemen might be brought to a direct vote, and either adopt or reject the resolution. It was introduced because the subject had been referred to the Committee of Ways and Means, and they considered it proper that the nation should understand what course they intended to pursue on this all-important question. He hoped that the motion to commit would not prevail, as there was not time to discuss it at the present session of Congress.

Mr. ADAMS asked the chairman of the Committee of Ways and Means if there had not been referred to that committee several petitions and memorials from various sections of the country, praying for the establishment of a national bank?

Mr. CAMBRELENG said that there had been many such memorials. The resolution now before the House had been framed with reference to them.

Mr. ADAMS would further ask if those memorials had been read in committee?

Mr. CAMBRELENG replied that there had been thirty or forty of those memorials referred to that committee, and ordered to be printed—and it would be strange if some of them had not been read by members of the committee.

Mr. ADAMS said he understood, from the ambiguous reply of the gentleman from New York, that the memorials in question had not been read in the committee to which they had been referred.

[After a short pause, and no reply to this suggestion following from the chairman of the Committee of Ways and Means,]

Mr. ADAMS resumed. What state of facts, he would ask, is here disclosed? Numerous petitions come up to this House, from the people of the United States; by this House referred to the Committee of Ways and Means, and they are not even read by that committee! But a resolution is returned to us, that it is inexpedient to establish a national bank! Mr. A. would signalize this as another strong instance of the treatment received by the people of the country, at the hands of this House. What right, he would demand, what pretence, had the Committee of Ways and Means, to tell this House, until they had read and carefully considered these petitions, that it was inexpedient to grant their prayer? Here is a resolution, presented to us, predetermined on, without hearing the people, without condescending to read their petitions, even in committee. Why is it that the time of the House is to be wasted at this special session, called for extraordinary and peculiar purposes, to the consideration, exclusively, of which the House, by solemn vote, have restricted themselves, in the discussion of a question of mere expediency? Why did not the Committee of Ways and Means as well report against the expediency of continuing the war in Florida, when already the blood of our countrymen has been poured out like water, in the vain pursuit of a few wretched savages, who could not be found? Why did not that committee report that it was inexpedient, at this time, to make a debt of millions, with a full Treasury? And there are many other matters, legislation upon which may be said to be equally "inexpedient." Why not make these the subjects of a report?

Sir, said Mr. A., whether the establishment of a national bank is expedient or inexpedient, is now a very idle question, in the agitation of which to occupy the time of this House. Had the report of the Committee of Ways and Means, upon these memorials, been, simply, that this House, or a majority of it, and that committee, had pre-decided that the granting of their prayer was inexpedient, and that it should not be granted, the report would have been more consonant with reason and the facts. Why, sir, said Mr. A., what reason is given by the committee for their report? Why is the establishment of a national bank less expedient now than at any other time? Why did they not bring in a resolution declaring it to be inexpedient even to pass a law establishing such an institution to the end of all time? Why not bring forward such a proposition as well as this, and equally insist on members "toeing the mark," as the chairman of Ways and Means took occasion to request me to do? Sir, this would be as reasonable a proposition as the other. Does that gentleman [Mr. CAMBRELENG] imagine that his power in this House is to last forever? Sir, I acknowledge his power here is very great, at present—but when he calls upon me to "toe the mark," I may be excused for refusing to do so, as his "mark" is not a straight one; it is too much like what we Yankees call a Virginia fence. I do not like his "mark," sir, it is too crooked; and he cannot expect me to "toe" it until he has learned to draw it straight! This is not the time for those who are friendly to a national

H. or R.]

National Bank.

[Oct. 4, 1837.]

bank, sir, to bring forward a proposition to that effect, and they will not probably permit such an issue to be prematurely made up for them on this floor.

Sir, continued Mr. ADAMS, I complain of the gentleman from New York. I complain to the country, sir, that he is wasting the time of this House (which, when it suits his pleasure, he is in the habit of detaining here till after midnight) in the discussion of the most frivolous resolution ever presented in any legislative body. If we are here to discuss what is inexpedient, every body here may bring forward a resolution of the kind, and, instead of adjourning on the 16th instant, we may remain here, discussing *what we will not do*, until the Christmas of next year. Now, sir, the people who sent us here want to know, not what we will not, but what we *will* do; and this last, I am afraid, they will know far too soon for their interests.

Mr. ADAMS then expressed his concurrence in the views of his friend from Pennsylvania, [Mr. SERGEANT,] who had moved to refer the resolution under consideration to the Committee of the Whole. If it is to be debated, that is undoubtedly the proper course for it to take. If the gentleman from New York [Mr. CAMBRELENG] would bethink himself of it, this is not a question on which there is not something to be said on both sides. Mr. ADAMS concluded by saying, however, that he preferred that the discussion should not be continued, at this session, by reason of the entire absence of all necessity that any legislation of the kind should now be had; and he moved to lay the resolution on the table.

Mr. CAMBRELENG hoped the gentleman would not make this motion, which cut off all reply, after making such an attack upon him as he had made.

Mr. ADAMS. I will withdraw the motion if the gentleman will renew it when he has done.

Mr. CAMBRELENG certainly could not do this.

Mr. ADAMS. Well, then, I will withdraw the motion unconditionally, so the gentleman may have the opportunity of replying.

Mr. CAMBRELENG said the gentleman from Massachusetts, [Mr. ADAMS,] with his accustomed courtesy, had been kind enough to speak of his (Mr. C's) "zig-zag" course. He little expected the gentleman to make that charge. Mr. C. thought he (Mr. A.) would not have alluded to a point which was so very tender to some gentlemen, perhaps on both sides. The gentleman, continued Mr. C., has alluded to my "zig-zag" course, and said that I did not walk in a straight line. Sir, I have been a member of this House for seventeen years, and before I was a member I was an advocate of the broadest doctrines of free trade, and of those doctrines set forth at large in the message of the President; doctrines which the South have uniformly sustained and supported. I have been obliged, sir, from necessity, to make this brief allusion to my own course, in consequence of the extraordinary attack of the gentleman from Massachusetts.

Sir, it is perfectly well known, at least to some members, that, upon this bank question—upon the tariff question—and upon the interference of this Federal Government, or State Legislatures, with the affairs of trade and money, I have been uniform and consistent, and, after seventeen years, I have the pleasure to find myself surrounded by gentlemen from every part of the Union advocating the same doctrines I advocated before I was a member of this House.

Sir, in alluding to the gentleman from Massachusetts the other day, I did it in a pleasant manner, and not for the purpose of provoking an attack upon me. The gentleman had alluded to the proposition now submitted to the nation and to Congress—I mean the proposition to separate the affairs of this Government and our Treasury from all connexion with banks. In alluding to that proposition, he had reference to the published opinion of the gen-

tleman, who doubted whether the President had the courage to propose it; and if he had the courage to do so, the gentleman left us in some doubt whether he would help him out of the difficulty.

Now I had hoped the gentleman would have given us his aid on that bill—and why? Because I do not think the gentleman would vote for a proposition to incorporate an association of counterfeiters; because I could not suppose it possible that the gentleman could denounce all the presidents, cashiers, and directors of all the banks, and afterwards come here and vote for an association of counterfeiters. The gentleman told us in that letter that he doubted, as well he might, the expediency of employing any bank of discount as an agent of the Government. Now, there is no Government upon earth which employs a bank of discount. Even the Bank of England is not a bank of discount, according to its practice or its organization; not a bank of commercial discount upon the plan of banks in this country. The public moneys are not permitted to be employed in commercial discounts, to be suddenly withdrawn. Sir, I rose merely to remind the gentleman that on these questions I wished him to remove all doubt—to toe the mark on the resolution against chartering a national bank.

Mr. GLASCOCK was somewhat astonished that the gentleman from Pennsylvania, [Mr. SERGEANT,] after occupying the time of the House on three different mornings during the morning hour, should move to commit the resolution to the Committee of the Whole on the state of the Union. If he could believe for a moment that any good could result from it, he would not interpose the objection he now made; but, so far as this question was concerned, it appeared to him that every gentleman had a full and fair opportunity offered him of making known his views to the House and to his constituents, in relation to the establishment of a national bank, in Committee of the Whole, on the bills before that committee. This being the case, he was surprised that the gentleman should have made the motion after he had finished his own remarks. It was also, he thought, very extraordinary that the gentleman from Massachusetts should have made the motion to lay the resolution on the table, after a similar motion had been rejected by a large majority of the House. He hoped the motion to commit might not prevail, because we had but some eight or ten days to determine on all the great questions before the House; and the morning hour, he took it, was as much time as could be set apart specially for the discussion of this resolution. Gentlemen could discuss this question during the morning hour, and those who desired to give their views on the subject of a bank at any other time, could do so on the bills under discussion in the Committee of the Whole.

Mr. CLARK, of New York, animadverted with some particularity on the charge adduced by Mr. ADAMS, that the numerous petitions referred to the Committee of Ways and Means on the subject of the establishment of a United States bank had not been read in committee. There was no reason why they should have been read. Their contents were well known. The country was nauseated with them. The contents of them were familiar to the nation "as household words." He hoped the Committee of Ways and Means had not wasted their valuable time in reading them. The people were well enough aware of the trouble already caused to the country by the United States Bank, and did not intend it should again be established. General Jackson had had the good fortune to harpoon the monster, and—

The SPEAKER here interposed, and observed that the question must not now be discussed on its merits.

Mr. CLARK regretted that he should have transgressed the strict rules of order, and would refrain from doing so. He hoped that the motion to refer would not prevail, but

OCT. 4, 1837.]

Treasury Notes.

[H. OF R.]

that the gentleman from Pennsylvania [Mr. SERGEANT] would be permitted to go on, as he had commenced, and finish his remarks during the morning hour, and that other gentlemen might have the same opportunity of going on with the discussion.

Mr. ROBERTSON, of Va., said that the chairman of the Committee of Ways and Means had brought forward one of the most important questions that could possibly have been submitted to the consideration of Congress. Nine days were yet left of the session, and it was proposed to confine the debate on that question to a single hour in the morning of each of those days. Now, did the gentleman [Mr. CAMBRELENG] intend that it should be debated, or that a vote should be taken on it without debate? If the former, then he hoped that gentleman would comply with the motion of Mr. SERGEANT to refer it to the Committee of the Whole, or consent to lay it on the table, or to postpone it until the next session of Congress.

Mr. WISE concurred with his colleague, [Mr. ROBERTSON.] What, asked he, were we called here to do? To consider and digest some plan for ordering a system of finance for the country. There were three conflicting plans before the country and the House for this purpose, proceeding from three distinct parties. The first was that of the administration, to establish a sub-Treasury system; and this measure is brought forward in positive terms, and is referred to the Committee of the Whole for consideration. The other branch of the administration party, (called the conservatives,) to which, he had been told, on his first coming here, the gentleman from New York, [Mr. CLARK,] who had just spoken, belonged, had also presented their scheme, by the hands of one of their number, [Mr. J. GARLAND,] his colleague. This, too, was presented in a positive form, and had also been referred to the Committee of the Whole. And now, Mr. W. would ask, why, in like manner, the system of the third party there, not by any means the most inconsiderable in point either of numbers or intelligence, (larger in fact than either of the others, taken severally,) why their plan alone was brought forward by its opponents in a negative shape, and reported against as "inexpedient?" Not only now, but forever "inexpedient?" Why, he would ask, was that plan alone confined to the morning hour? Why were not all the plans taken together, reported together, or discussed together in the Committee of the Whole, as presenting each a part of the grand question upon finance now before the country? The friends of a national bank were waiting for "the moving of the waters;" they were not ready to bring forward their plans in a positive form; they had no notion of standing up for the purpose of being knocked down.

The House has been entertained with the old story of harpooning the monster; and the monster, like Lazarus in his grave, "not dead, but sleeping," was again to be brought to life, for the purpose of once more being killed. He had already been so often killed, that the trick is at last too stale for repetition. This Mr. WISE described as an attempt to raise a fallen issue.

Mr. CAMBRELENG called the gentleman to order. He wished to know if the gentleman from Virginia was to enjoy the exclusive privilege of speaking upon what subjects he pleased, under the motion before the House.

The SPEAKER remarked that the gentleman from Virginia had perhaps been on the verge of transgressing the rules of order; when he should do so in reality, he should certainly be checked by the Chair.

Mr. WISE resumed the floor. The gentleman from Pennsylvania, who had opposed this resolution, [Mr. SERGEANT,] would certainly not have brought forward a positive proposition in favor of the establishment of a United States bank at this session of Congress. It had been brought forward in a negative form by the committee. It

was a conflicting interest, and should be examined like the rest; not an hour a day in the morning exclusively. What, he would ask, was the object of making such a disposition of the subject? It was, to keep it within the power of the party there, to be disposed of as they should at any moment think fit, and in the most summary mode of execution. To hold up to the country that there was no hope to the friends of a United States bank.

The SPEAKER here reminded the gentleman from Virginia that he was not strictly in order.

Mr. WISE suggested that it was perfectly in order to discuss the objects for which the chairman of the Committee of Ways and Means wished to keep the question in the House without a reference to the Committee of the Whole.

The CHAIR assented to this proposition, and Mr. WISE proceeded. The object of the chairman of the committee is to strangle the issue, to make the pretence that the friends of the establishment of a bank of the United States were struggling to attain that object now, and that they had been overpowered in their attempt by a majority here. It was an instance of the manner in which the Bank of the United States had always been treated. Here, in the House, the resolution cannot be discussed; in Committee of the Whole it certainly can, in all its bearings. There it could be debated before the country, and there it could be shown whether the Bank of the United States could possibly compare, in monstrosity, with the project now presented by the administration. There is a large and intelligent interest in this country (whether larger than its opposers or not, it matters not) in favor of the establishment of a national bank, and they had an equal right to be heard, candidly, and with the same circumstances of deliberation as the rest—an equal right to fair play. If the sub-Treasury plan, and the conservative scheme, have a free discussion by a Committee of the Whole, that of this large and respectable interest has certainly an equal right to such discussion, and he trusted it would have it.

Mr. BYNUM rose to address the House, when

Mr. CAMBRELENG moved for the orders of the day, which were taken up, the House resolving itself into Committee of the Whole, (Mr. CONNOR in the chair.)

TREASURY NOTES.

The House went into Committee of the Whole on the state of the Union, (Mr. CONNOR in the chair,) and resumed the consideration of the bill "to authorize the issuing of Treasury notes."

The question pending was on the substitute of Mr. RRETT.

Mr. BIDDLE rose and said, that he felt his position at this moment to be one requiring a word of explanation. When, on Saturday, it was supposed the debate on this bill would be urged forward, gentlemen, whose standing in the House gave them an undoubted priority of claim to the floor, felt unwilling to proceed, at the close of an exhausting week, and with no opportunity for that arrangement which lends additional force to the strongest arguments. He had, therefore, agreed, at the moment, to present the remarks he had to offer, not deeming them of sufficient importance to be held over for a similar purpose. A motion to adjourn had prevailed; but he now found himself, by the courtesy of those gentlemen, still in the front rank, to which he had assuredly no claim, and which, without this apology, it might well be deemed presumptuous on his part to occupy.

Had he proceeded on Saturday, the impulse of the moment (Mr. B. said) would probably have led him to animadvert, at considerable length, on the singular circumstances under which the present bill had been introduced. The bill first taken up was denounced as a measure of rev-

H. OF R.]

Treasury Notes.

[Oct. 4, 1837.]

enue, originating in the Senate, and, of course, an invasion of the constitutional privileges of this House. Instead of discussing a question of such deep interest to the people, it had received the go-by; and the chairman of the Committee of Ways and Means, on the spur of the moment, had hastily got up a new bill as a substitute. The constitutional objection was treated with levity. Mr. John Randolph, of Virginia, had remarked that the time was rapidly approaching when members on this floor would be called to order for quoting the constitution. If that period had not actually arrived, we seemed near it, when reliance on the constitution was treated as a "technical" objection, and as a teasing obstruction in the way of the majority. All the mischief against which the constitution intended to guard had already been done by this premature action of the Senate. To withdraw, then, the bill, with a view to cut off discussion, was only to snatch from the immediate representatives of the people an opportunity of formally protesting against an encroachment upon their province. Perhaps, however, as much good would be effected by the spectacle of that hasty withdrawal as by the most extended discussion. The people would not fail to mark and resent it.

Entering (Mr. B. said) on his duties as a member of this House, he had done so with a fixed determination to be drawn into no merely factious opposition to those who administered the Government. But it was undeniable, in the high state of credit which this country enjoyed, at home and abroad, that any method of pledging that credit in constitutional form will effect the desired object with equal certainty and promptitude. If, then, the administration has resorted to a method which is most liable to exception; which, in its example, is most dangerous; which would, in all probability, be the least productive and the most burdensome; which would tend to disguise from the people their real condition and liabilities, then he felt not merely at liberty, but bound to resist it, and to turn the Government round to a method direct, advantageous, and unexceptionable.

He would make a preliminary remark. The late President, General Jackson, had proclaimed to the whole world that the bill before us is unconstitutional, and, if passed, will not bind the faith of the nation. In his letter to the editor of the *Globe*, dated Hermitage, 23d of July, 1837, he says:

"I hope no Treasury notes will be issued. The Treasury drafts upon actual deposits are constitutional, and do not partake of paper credits as Treasury notes, which are subject to depreciation by the merchants, and banks, and shavers, and brokers; and will be, if issued; and the Government cannot avoid it. Different must it be with Treasury drafts drawn upon actual deposits; and, from the conduct of the banks and the merchants, they deserve no favors from the Government, which they have attempted to disgrace, and to destroy its credit both at home and abroad."

Now, sir, does this bill profess to authorize drafts on actual deposits in the Treasury, or notes to be discounted by merchants, banks, shavers, and brokers? The title is "A bill to authorize the issuing of Treasury notes," and the President and Secretary are empowered to make the best bargain they can with these merchants, banks, shavers, and brokers, provided not more than six per cent. be allowed. Does any one pretend to deny that they encounter the full denunciation of General Jackson as unconstitutional? He holds, distinctly, that the power to borrow money does not embrace the issue of this kind of paper.

Mr. Chairman, you will readily believe that I am not one of those who push to an extreme my faith in the accuracy of General Jackson's opinions on constitutional points. That is not the question. Is it not undeniable that such opinions are held by many, and will exercise a wide influence? The chairman of the Committee of Ways

and Means tells us that these notes are to find their resting-place in London; in other words, this is a new form of loan to the United States from the detested Barings. They ought, then, to have a clear and indisputable credit amongst those who have been soured and alarmed at being so long held up as persons whom it is meritorious to cheat, because they happen to live on the other side of the Atlantic. Let it be remembered, too, that, in discussing the probabilities of the Supreme Court declaring a certain charter unconstitutional, great reliance was placed on the fact that a large majority of the present judges had been appointed by General Jackson. If those judges should adopt his opinions in the present case, what a fraud is to be practised on the purchasers of this paper! These are matters which cannot remain unknown in that great mart of the world, where rival stocks are perpetually struggling for precedence. Nay, sir, is it not possible that the agent for the Smithsonian bequest, in one of those fluctuations of mood to which he seems subject, may republish, with a preface, the letter of General Jackson to Mr. Blair, as he did a certain other letter, with a view to shake public confidence in an American stock?

Mr. Chairman, I have other objections to this bill.

No one can shut his eyes to the fact, that this is the commencement of a new national debt. But it wears a mask to conceal its hideous countenance. With what rapturous joy did the people hail their escape from the former load! Abundant gratitude was claimed, on that occasion, for General Jackson; though it was the result of measures matured long before, and retarded, rather than advanced, by the increased expenditures of his administration. There is plainly now a trembling timidity—a morbid fear—after so much false boasting, to lay bare the fact that the first step of the present administration is to create a national debt. Is it right, sir, that the representatives of the people should co-operate in an effort to mislead the people? How many of our constituents are aware of the true character and operation of this bill? Is it not proper that they should be instantly aroused, so that, at the polls, they may begin at once to exercise their right of claiming from candidates a pledge of rigid economy? How is this debt to be paid off? Does any body suppose that the present emission of paper will render more available the notes of broken banks which constitute our present resource? On the contrary, it will only cause their still further depreciation. You will not be able to force them even upon the revolutionary pensioners and the laborers in your service. They will prove a total loss to the holders, as was the case when the paper tickets of irresponsible individuals were superseded by the paper tickets of corporations. Sir, this thing must end in direct taxes. The necessity may be shuffled off by new emissions, but will come at last with all its accumulation. Disguise the matter as you may, these ten millions will eventually have to be paid out of the soil. Unless the people are aroused, and take the matter into their own hands, the time will speedily come when every farmer, in preparing for his crop, must run one furrow for himself and the next for the tax-gatherer. Viewing the matter even on party grounds, how is it that an administration, pledged to follow in the footsteps of General Jackson, begins its career by creating a debt of ten millions, in a mode which General Jackson has denounced as dangerous and unconstitutional?

Mr. Chairman, it has ever been a subject of regret and astonishment that our mode of raising money is one that invites prodigality and extravagance, and tends, most speedily, to exhaust our credit. Our wisest statesmen have warned us, over and over again, of the fatal impolicy of ever incurring a debt, without, at the same time, providing a specific fund for its redemption.

Even during the late war, when there was a disposition to put every thing at risk, in sustaining the country, with-

Oct. 4, 1837.]

Treasury Notes.

[H. OF R.]

out looking to consequences, you will find that the voice of sagacious men was raised in protest against this improvidence. Thus, in the debate of the 9th of April, 1814, on the subject of Treasury notes, a patriotic member of the House of Representatives, Mr. McKim, used this language:

"Mr. McKim said he should be sorry to deny to the gentleman the courtesy of having his resolution referred, were it not for one consideration. If the gentleman would add to his motion a proposition for such further tax as should be necessary to redeem the notes when they became due, he should concur in his motion. But he asked of the House to take a deliberate view of this subject before they referred the resolution. If there was any one point on which Government should be cautious, it should be its credit; and a regard for the credit of the Government would not justify the issuing of these notes without providing for their redemption."

Nay, sir, the Secretary of the Treasury himself, in his recent report, admits the importance of such a provision:

"In connexion with the issue of any Treasury notes, it is believed to be wise to make ample provision for their early and final redemption."

Why has this been neglected? Why is it that Congress shall grant money with reckless precipitation, omitting the precautions against abuse which even an executive officer has pointed out?

Mr. B. said he could not forbear to press upon the House the warning of the first Secretary of the Treasury, as to the emission of paper money by this Government:

"The emitting of paper money by the authority of the Government is wisely prohibited to the individual States by the national constitution, and the spirit of that prohibition ought not to be disregarded by the Government of the United States. Though paper emissions, under a general authority, might have some advantages not applicable, and be free from some disadvantages which are applicable, to the like emission by the States separately, yet they are of a nature so liable to abuse, and, it may even be affirmed, so certain of being abused, that the wisdom of Government will be shown in never trusting itself with the use of so seducing and dangerous an expedient." "The stamping of paper is an operation so much easier than the laying of taxes, that a Government in the practice of paper emissions would rarely fail, in any such emergency, to indulge itself too far in the employment of that resource, to avoid as much as possible one less auspicious to present popularity."

Here, sir, you find plainly disclosed to us the real motive for a resort to Government paper. It is "less auspicious to present popularity to adopt a course which would compel the people to pause and to reflect upon the folly and imposture that have brought us to our present condition."

Are we, sir, prepared to run over again a career of improvidence, without the shadow of a pretext, and against all the lessons of wisdom and experience? Sir, the present times afford little scope for ambition, or reward for the toils of office. But this administration has put aside, from narrow, temporary, and selfish considerations, an opportunity of earning the lasting gratitude of posterity, and achieving a great civil triumph, by placing this matter on its true basis.

What, I repeat, is now the fund mainly looked to, for the redemption of these Treasury notes? Why, sir, the claims which we hold on broken banks, and the vague hope that they will grow better during the next year, in which we are going to wage a war of extermination against these institutions. No, sir! There is not the least hope or expectation of aid from that quarter. It is perfectly well known that the only claim to credit which these notes possess, is the fact, that they constitute a *lien* on every inch of real estate in the country, and must be discharged out of the hard labor of the country. But the administration dares not acknowledge this to the people. It does not

feel strong enough to do so. Concealment is necessary. For this very reason, sir, I resist the project. I say to the administration, come out fairly and openly, so that the people may see what is before them; do this, and I will cheerfully co-operate with you.

In continuing his remarks, Mr. B. said it had been the understanding of the House, that each of the measures, proposed by the administration, brought under review all the topics connected with the present state of the country. Whilst calling for the previous question on the postponement bill, the chairman of the Committee of Ways and Means [Mr. CAMBRELENG] had justified that harsh measure, by remarking that the discussion thus arrested could be renewed upon any other bill. He would take this occasion to advert to some remarks which had been made, or rather assertions hazarded, towards the close of that debate, as to the past condition of our currency; a reply to which had, at the time, been cut off.

He was desirous, at the outset, (Mr. B. said,) of guarding what he had to say, from a claim to either more or less of consideration than was its due. He had never exchanged a line, or a syllable, with any one connected with the administration of the late or present Bank of the United States, on the subject of either institution, or any financial question. His opinions were drawn from materials common to all, but to the course and connexion of which he had naturally been led to give a careful and steady attention. This explanation was proper, because he had been assailed, in the official paper of the Government, as the representative on this floor of a moneyed corporation. With regard to that institution, and the method of its administration, they were topics within the scope of the debate, on which each member must judge of the extent of his own obligations to decency and truth. But he would suffer no responsible person to insinuate the infamous calumny that he represented here aught but the interests of his constituents, and what he deemed to be the best interests of the country.

It would be readily believed, by those who personally knew him, that it was not of choice he took part in this discussion. But the station he now held forbade him to indulge a repugnance that in private life was permissible. He was here not to consult his own sensibilities, but to struggle for the rights of others. The prosperity—nay the daily bread—of thousands of his constituents turned, as he believed, on a right understanding of this momentous subject. Whilst, therefore, a sense of what was due to the House, as well as to himself, would guard against the intrusion of personal feeling, he would not, on the other hand, be restrained, by misplaced delicacy, from that perfect freedom which befitted the sole representative of a community once prosperous and happy, to an almost unexampled extent, but now suffering severely under the calamity that had overspread the land.

Mr. Chairman, many homilies have been read to us on the necessity of conciliation and forbearance. I, sir, am one of those to whom this language is always acceptable. We are not here to wage a war of sarcasms. All reminiscences that illustrate nothing, and terminate only in exasperation, may well be discarded. But, sir, rely upon it, that no good can result from shutting our eyes to the past. It is easy to say that "by-gones are by-gones." The infamous Colonel Chartres, we are told, so consoled himself on his death-bed, when reminded by the priest of his enormities. But seriously, sir, if we are ever to rise above the level of the brutes—if man be truly described as a being looking before and after—if the lessons of experience are not always to be written in water—it is only from a calm and resolute survey of the causes which have led to our present embarrassments, that we can draw the hope of extrication, or be secure from a recurrence of the calamity.

There is one great topic, however, threatening in former

H. of R.]

Treasury Notes.

[Oct. 4, 1837.]

times to be illimitable, which the supporters of the administration, and the President himself, now despatch in a very summary way. I allude, of course, to the exclusive metallic currency. The struggle now is, who shall most effectually clear his skirts of that doctrine—who shall most strenuously deny his master. No one now aspires to play the part of Midas. That personage, we are told, was for some time successful in concealing his long ears. They were at length, however, detected, and rendered him the object of derision.

Mr. Chairman, I will not soil my own mind, or disgust the House, by hunting up proof, from a thousand polluted sources, that this is the cry with which the country has so long rung from side to side. Sir, the task would be as nauseating as it is superfluous. However the attempt may be made by alarmed politicians to veil and qualify their projects, the people—the people, always honest, but sometimes led astray—have not forgotten the process of delusion. They well know that this cry was the Marseilles hymn of the promised revolution. Sir, the people are not so stupid as is thought by those who calculate on an inexhaustible fund of gullibility. They see not only that their pockets have been picked, but their understandings outraged. Sir, I draw the happiest augury for the future, from the shame and indignation of many who have been the farthest misled—shame at their own folly; indignation at the desertion of their leaders. No class of men is now better prepared to follow where patriotism may lead than those who have been thus turned upon and rebuked for the very phrases so recently put into their mouths, and blazoned upon their banners.

Yes, sir! All eyes are now opened to the mingled wickedness and folly which would attempt to abolish credit, and to denounce all those who trade upon it, or in any shape take advantage of it. What but this talismanic word has carried forward our young nation, with unparalleled rapidity, in the career of greatness? What else has enabled those whose sole possessions were stout limbs, steadiness, sobriety, a fair moral character, to mortgage all these in the struggle to advance themselves, and to swell thereby the general prosperity?

Sir, it is not a little curious to those familiar with our colonial history, to revert to the early warfare upon that system.

Whilst we were in subjection to Great Britain, it was the settled policy of the manufacturers and merchants of that country to repress the adventurous spirit of America, and to render our labor strictly subordinate to their immediate and narrow purposes. Let me, at the hazard of proving tedious, illustrate what I mean by a few references. As early as 1717, you will find on the journals of the House of Commons the following entry:

“A petition of ironmasters, ironmongers, cutlers, freeholders, nailors, smiths, and artificers, in the iron manufacture, living in the town of Birmingham, in the county of Warwick, was presented to the House and read, setting forth that, should there be encouragement given to the making and manufacture of iron in any plantation belonging to his Majesty's dominions, it will certainly tend to the ruin of the iron trade of this kingdom, which employs great numbers of people. The greatest consumption of our iron manufactures is now sent abroad to the plantations, which, if they have encouragement, will have no occasion for our assistance; and the iron works of the nation must be totally ruined for want of employment for the poor.”

Again, in the year 1736, is the following entry:

“A petition of sundry ironmasters and ironmongers, in behalf of themselves and many others, trading to his Majesty's plantations in America, was presented to the House and read, setting forth that the inhabitants of New England have, within these four years, erected several forges and slitting mills, and do annually make a great deal of bar

iron, and manufacture the said iron into axes, nails, and sundry other species; and do now not only supply themselves with great part of their nails and iron ware, but export great quantities to many other of his Majesty's plantations, to the great decay and prejudice of the iron trade in this kingdom, which at this time employs more people, especially of the poor laborious sort, than any other trade, that of the woollen manufacture only excepted; and that, unless their slitting mills are destroyed, and also some stop put to their manufacturing, our trade must soon be utterly ruined; and great numbers of people employed in the making and manufacturing of iron will be unavoidably deprived of the means of their subsistence.”

In the same year is another petition:

“A petition of sundry ironmasters and ironmongers, concerned in the iron manufactory, of the county of Worcester, in behalf of themselves and others, was presented to the House and read, setting forth that, in that and other adjacent counties, there has long been established the greatest manufactory of iron in this kingdom; and that their manufactory owes its origin as well to the several forges erected in the neighborhood, for making bar iron suitable to particular purposes, as to the great plenty of pit coal, and the convenience of the Severn for exportation; and that their trade has always increased and flourished till lately in proportion to the American plantations, but now greatly declines for want of its usual demands; and they can ascribe this to nothing but the making of iron and iron ware in that part of the world; and that many of their artificers and workmen have of late gone off, and have removed themselves thither, as it is to be feared.”

And mark, sir, how the British Parliament seconded this policy. I take instances at random. In the year 1732 an act was passed with the following preamble: “Whereas the art and mystery of making hats in Great Britain hath arrived to great perfection, and considerable quantities of hats manufactured in this kingdom have heretofore been exported to his Majesty's plantations or colonies in America, who have been wholly supplied with hats from Great Britain; and whereas great quantities of hats have of late years been made, and the said manufacture is daily increasing the British plantations in America, and is from thence exported to foreign markets, which were heretofore supplied from Great Britain.” It then proceeds to enact that, after the 29th of September, 1736, no hat, dyed or undyed, finished or unfinished, shall be put on board any vessel or wagon, with a view of its being exported out of the province, on penalty of forfeiture, and of a fine of £500. No hat maker in the provinces shall have more than two apprentices at a time, nor shall he employ a journeyman who had not served an apprenticeship of seven years.

Another act of Parliament, of 1750, provides: that “no mill or other engine, for slitting or rolling of iron, or any plating forge to work with a tilt-hammer, or any furnace for making steel, shall be erected or continued; and every such mill, engine, forge, or furnace, shall be deemed a common nuisance, to be abated by the Governor or the commander-in-chief of the forces, within thirty days after information given.”

The colonies were compelled to maintain expensive agencies in London to guard against unceasing efforts to strike at their advancing prosperity, by insisting on an exclusive metallic currency. Take an example from the journal of the House of Commons of 1751.

“A petition of Robert Charles, Esq., agent for his Majesty's colony of New York in America, was presented to the House and read, setting forth that the said colony, and several others of his Majesty's colonies in the continent in America, have enjoyed for many years past, and do now enjoy, the benefit of a paper credit rendered absolutely necessary from the want of gold and silver sufficient for the trade and circumstances of such colonies.”

Oct. 4, 1837.]

Treasury Notes.

[H. OF R.]

The petition states that this paper credit has "excited industry, has proved a necessary and useful medium of trade, and has enabled the said colonies to provide for the defence of widely extended frontiers." It adds: "that the said bill depending in the House, should the same pass into a law, will essentially alter the nature and quality of the paper credit of America, to the grievous hurt of individuals, the disappointment of the public service, and confusion in all manner of dealings."

Thus, sir, you see that eighty-six years ago a prayer was wafted across the Atlantic from that city, whose memorial to a like effect has just been laid upon your table by the honorable gentleman on my right, [Mr. HOFFMAN.] The supplication *then* was addressed to a foreign Legislature sitting at Westminster. It was successful in averting the threatened calamity. The same entreaties addressed to an American Congress at Washington seem to be received with coldness, perhaps with derision.

The exertions of Doctor Franklin, in the same cause, whilst agent for Pennsylvania, are sufficiently disclosed in the well-known remonstrance which he prepared and published at London in the year 1764. He remarks: "In Pennsylvania, paper money was first made in 1723, which gave new life to business, promoted greatly the settlement of new lands, whereby the province has so greatly increased in inhabitants," &c. Alluding to the argument that New England had been restrained by act of Parliament, and that no dissatisfaction existed thereat, he gives this explanation: "In New England there are four distinct Governments; but, having much mutual intercourse of dealings, the money of each used to pass current in all; but the whole of this common currency, not being under one common direction, was not so easily kept within due bounds; the prudent reserve of one colony, in its emissions, being rendered useless by excess in another."

Mr. Chairman, from this retrospect two things are apparent—

First. That to denounce credit, and insist on an exclusive metallic currency, is not an ingenious novelty of the present day, but a servile attempt to follow in the footsteps of those who, from the earliest settlement, have watched, with jealous alarm, the expansive tendencies of an ingenious, energetic, and indefatigable people. The wreath of glory belongs not to any living brow. You must seek the great original amidst the ancient tombs of Birmingham or Worcester.

A second, and not less striking fact, is disclosed to us, that the sagacious mind of Doctor Franklin, seventy-three years ago, discerned the necessity, wherever intimate commercial relations existed between the colonies, of some central controlling power, as a check upon extravagant issues of paper. Since he wrote, how have the relations of the States been multiplied! And how painfully has the truth been forced upon us, that, in this condition of things, it is vain for one State to attempt to guard against the improvidence of others!

Sir, the convictions of Dr. Franklin, in 1764, are those which come to us in 1837, from the East, the West, the North, and the South; not from the counting-house and the factory only, but from the plough and the mattock—from every form of industry, now cheated out of its honest earnings by a spurious and depreciated currency.

These convictions, Mr. Chairman, may, I know, be baffled and eluded. There are at work, amongst the politicians of our wide-spread country, motives the most powerful that can actuate the human bosom to stifle or decry the plainest lessons of experience. The love of place—the pride of opinion—the maintenance of party ascendancy—the hate of political rivals—all these will insure a desperate war to the knife, in preference to the admission of error. You cannot supply with foreign missions one out of a thousand of those who believe that they must either mystify and con-

fuse the people—make up false issues—astound and bewilder by the very audacity of party tactics—or disappear from public life.

I am not sanguine, then, that the time has yet arrived for the complete triumph of the truth. But I believe in the final good sense, as well as in the sovereignty of the people; and to that good sense I look for the achievement, in the end, of a thorough reformation.

In the attempt, Mr. Chairman, to ascertain the state of the country, and of the currency before the outbreak of the seven years war upon the bank, I avail myself of the testimony of a witness to whom exception will hardly be taken by the friends of the administration. I allude to the gentleman who was recently a candidate for Congress in the county of Philadelphia, and in whose behalf we saw officers of the General Government arrayed, in a manner that Mr. Jefferson and General Jackson have denounced as so indecent, as well as perilous to our free institutions. In September, 1828, two months before the election of General Jackson, I find Mr. Charles J. Ingersoll on a committee, appointed by the stockholders of the Bank of the United States, to examine into the state of its affairs. The report of the committee, bearing Mr. Ingersoll's signature, is dated 2d September, 1828. It met my eye, for the first time, in Europe, where its exhibit was a matter of congratulation to Americans and the friends of America. I have since turned to it, as preserved in Hazard's Register.

After alluding to the difficulty, supposed to arise from the universal receivability of the notes in payment of duties, which it was feared would compel the bank to provide funds in many places to pay the same note, Mr. Ingersoll thus proceeds:

"But the second measure alluded to by the committee, which wrought the most important change in the situation of the bank—that which may be considered as decisive of its usefulness and prosperity—relates to the nature and extent of the circulation of its notes. The board of directors adopted a course, the success of which has, in the view of this committee, laid the foundation of the present prosperity of the institution. It would lead the committee beyond the proper limits of a report to state in detail the reason of this course; but the principle on which it was founded was briefly this: that the universal receivability of the notes of the bank was of no disadvantage, if the local currency of the place where the notes were issued was sound; and it was the duty of the Bank of the United States, and within its power, to make it sound. Accordingly they pursued the system of issuing freely and exclusively their own notes; of receiving, generally, the notes of solvent State banks, and making frequent settlements with them; thus improving the currency, by introducing the notes of the Bank of the United States, and by preventing the over-issues of the State banks. By a gradual and judicious execution of this plan, the effect followed, that, without private or general suffering, without causing the failure of any bank or any individual, and without inconvenience to the Bank of the United States, the banking operations of the country have been brought under an efficient control, and a large amount of the notes of the Bank of the United States have been gradually substituted for the depreciated or doubtful currency which was so injurious to the Southern and Western States. This signal triumph over the greatest of all the difficulties of the bank, for the achievement of which a debt of lasting gratitude is due to the able officer who presides over the institution, has dissipated all the doubts entertained of its power to supply the necessary amount of notes, and has permanently fixed the basis of a wide extended and profitable usefulness. The means thus derived from the increase of notes, and the sale of stock, were devoted to discounts and loans, particularly to that class of loans which are at once the safest and the most useful—the discount of bills of exchange. With these

H. of R.]

Treasury Notes.

[Oct. 4, 1837.]

means the bank has been enabled to extend its operations, in both foreign and domestic exchange, in such a manner as greatly to enhance the profits of its business, at the same time that it has afforded facility and security to the commercial transactions of the country."

The report proceeds to exhibit the operations of the bank, and winds up as follows:

"This exhibition is calculated to show that the stockholders of the bank are deriving important advantages from the successful prosecution of a system of measures which not only produces profit to the stockholders, but furnishes to the community a convenient, sound, and highly useful currency. And the committee, at the same time that they approve the system which has been practically shown to be wise, feel it to be proper to notice and commend the activity and energy which have been exercised by the officers of the bank to preserve the purity of this currency, and to save the community from the evils of its being counterfeited.

"The committee deem themselves justified in stating, as the general result of their examination, that the affairs of the institution are in a highly prosperous condition; conducted upon proper banking principles, in the general scheme of its administration, and in the details of its management."

Such, Mr. Chairman, was the deliberate representation made on the eve of General Jackson's administration. But the message of the President, in 1829, declared that the bank had failed to provide a sound and uniform currency, and suggested the project of an exchequer bank. A committee of the Senate, having at its head the venerable General Smith of Maryland, a warm political friend of General Jackson, was appointed to take the whole subject into consideration. The report of that committee, going into details, the accuracy and force of which have never been questioned, is familiar to all. It is there said:

"As every bank which desires to maintain its character, must be ready to make settlements with the Bank of the United States, as the agent of the Government, or be immediately discredited, and must therefore keep its notes equal to gold or silver, there can be little danger to the community, while the issues of the banks are restrained from running to excess, by the salutary control of the Bank of the United States, whose own circulation is extremely moderate, compared with the amount of its capital. Accordingly, the fact is, that the general credit of the banks is good, and that their paper is always convertible into gold or silver, and for all local purposes forms a local currency equivalent to gold and silver. There is, however, superadded to this currency, a general currency, more known, more trusted, and more valuable than the local currency, which is employed in the exchanges between different parts of the country. These are the notes of the national bank. These notes are receivable for the Government, by the 2,000 receivers, scattered throughout every part of the country. They are, in fact, in the course of business, paid in gold or silver, though they are not legally or necessarily so paid, by the branches of the bank, in every section of the Union. In all commercial places they are received, in all transactions, without any reduction in value; and never, under any circumstances, does the paper, from the remotest branches, vary beyond a quarter of one per cent. in its actual exchange for silver. Here, then, is a currency as safe as silver; more convenient, and more valuable than silver; which, through the whole western and southern, and interior parts of the Union, is eagerly sought in exchange for silver; which, in those sections, often bears a premium paid in silver; which is, throughout the Union, equal to silver in payment to the Government and payments to individuals in business; and with which, whenever silver is needed, in any part of the country, will command it, without the

charge of the slightest fraction of a per centage. By means of this currency, funds are transmitted at an expense less than in any other country. In no other country can a merchant do what every citizen of the United States can do—deposit, for instance, his silver at St. Louis, or Nashville, or New Orleans, and receive notes, which he can carry with him 1,000 or 1,500 miles, to the Atlantic cities, and there receive for them an equivalent amount of silver, without any expense whatever; and in no possible event, an expense beyond a quarter of one per cent. If, however, a citizen does not wish to incur the anxiety of carrying these notes with him, or to run the hazard of the mail, he may, instead of them, receive a draft, payable to himself or his agent alone, so as to insure the receipt of an equal amount, at an expense of not one-half, and often not one-fourth, of the actual cost of carrying the silver. The owner of funds, for instance, at St. Louis or Nashville, can transfer them to Philadelphia for one-half per cent.; from New Orleans, generally, without any charge at all—at most, one-half per cent.; from Mobile, from par to one-half per cent.; from Savannah, at one-half per cent.; and from Charleston, at from par to one-quarter per cent.

"This seems to present a state of currency approaching as near to perfection as could be desired: for here is a currency issued at twenty-four different parts of the Union, obtainable by any citizen who has money or credit. When in his possession, it is equivalent to silver in all his dealings with all the 9,000 agents of the Government, throughout the Union. In all his dealings with the interior, it is better than silver; in all his dealings with the commercial cities, equal to silver; and if, for any purpose, he desires the silver with which he bought it, it is at his disposal, almost universally, without any diminution, and never more than a diminution of one-quarter per cent. It is not easy to imagine, it is scarcely necessary to desire, any currency better than this.

"It is not among its least advantages, that it bears a proper relation to the real business and exchanges of the country, being issued only to those whose credit entitles them to it, increasing with the wants of the active operations of society, and diminishing, as these subside, into comparative inactivity; while it is the radical vice of all Government paper to be issued without regard to the business of the community, and to be governed wholly by considerations of convenience to the Government."

I will trouble the House further only with the closing paragraph:

"On the whole, the committee are of opinion, that the present state of the currency is safe for the community, and eminently useful to the Government; that, for some years past, it has been improving, by the infusion into the circulating medium of a larger portion of coin, and the substitution of the paper of more solvent banks, in lieu of those of inferior credit; and that, if left to the progress of existing laws and institutions, the partial inconveniences which still remain of the paper currency of the last war, will be wholly and insensibly remedied. Under these circumstances, they deem it prudent to abstain from all legislation, to abide by the practical good which the country enjoys, and to put nothing to hazard by doubtful experiments."

Such was the currency when the Bank of the United States was responsible for its soundness and uniformity. What is it now, when the responsibility has been assumed by others? Alas! sir, it is as superfluous as it would be painful, to depict what is forced every hour upon our attention.

At the end of seven years, we are summoned here to be told that the "experiments" upon which the Government decided to precipitate itself are no longer "doubtful." They are admitted to be utter failures. But we are, at the same time, informed that it is not open to the country

OCT. 4, 1837.]

Treasury Notes.

[H. OF R.]

to profit by the lessons of experience. There is an insuperable obstacle in the way. The President is trammelled by a letter he wrote to Mr. Sherrod Williams, and by another addressed to a Cincinnati dinner-party!

Will the people be satisfied with this answer? I think not. Let politicians who have attained notoriety by clamor on this subject, struggle as they may to repress the roused spirit of the nation—to disguise from the people their own strength—to induce despair as to the possibility of attaining the only practicable remedy—their triumph will, I believe, be short-lived.

Gentlemen tauntingly call upon us for our plans—to exhibit the schemes from which we purpose to make a choice; as if novelty were an indispensable ingredient to any proposition for relief; and as if a successful experience of forty years were an insuperable argument against a recurrence to the wisdom of former days. Sir, what my constituents ask is, that you will give back to them the state of things which existed in 1829. They ask of patriotism to restore what party has snatched from them. They ask that this Government may not be known and felt only as an engine of mischief—as a thing to be execrated.

I had occasion, Mr. Chairman, in considering another bill of the present series, to review the manner in which the first experiment was carried into effect through the agency of Mr. Kendall. I will not repeat what was then said, but I will advert to another fact, which is now placed beyond dispute, and which displays the reckless and unprincipled spirit of this warfare. It is now conceded that the employment of State banks was with a full knowledge that they would prove incompetent to the purpose, and that the attempt would break them down. They were enlisted into the service of the United States, to be crushed in their hour of exhaustion. The same policy is here visible as led to overtures to the western Indians to take part in the Florida war. Sir, we are not left, on this point, to presumptive evidence, or even to the testimony of Judge White. We have a direct revelation. The *Globe* of 31st July last has an elaborate essay, evidently drawn up by one who had been admitted behind the scenes, if not himself a principal actor. It appears in a journal, too, whose editor could not but know whether the statement made was true or false. Congress, at its session previous to the removal, had declared the deposits safe in the United States Bank. That body would reassemble in a few weeks. It was resolved, therefore, to strike an immediate blow, for the reasons thus set forth by the correspondent of the official paper, not two months ago.

“It was deemed essential to force the bank into the field prematurely, and cripple her in anticipation. This could be done only by a removal of the deposits early in General Jackson’s second term. It was believed that, if she submitted to the measure in peace, she would be quietly stripped of her power; a new system would be in full and successful operation before the expiration of her charter, and she would glide out of existence almost unobserved. If she resisted, it was not doubted that she would be vanquished by the ever-victorious chieftain.”

In reference to a complaint by some, that General Jackson had not disclosed, at the outset, his purpose of putting down all banks, but, on the contrary, had insidiously affected to foster them, and to enlist their co-operation, this writer says:

“Let those who now inveigh against the employment of State banks at that time, look back, and ask themselves whether it was possible for General Jackson to accomplish his object by any other means. If he had proposed a separation from all banks, he would have found all the State banks and their friends in full and effective alliance with the Bank of the United States—a league which it was not desirable to encounter. Neither the public mind nor the opinions of members of Congress were then prepared,” &c.

Mr. Chairman, is not all this most humiliating to our national pride? Does it not almost sicken us with the forms of popular Government? How often have we listened to professions of unbounded faith in the intelligence and virtue of the people? And yet it is undeniable that the dear people—the cherished people—the profound and infallible people—so far from having had their judgment consulted on great public measures, have been anxiously kept in profound ignorance of what was meditated. They could not be trusted with the secret. They have been seated, like children at a circus, gazing with bewilderment at adroit equestrians, as they cast off into the ring successive trappings of disguise!

Yes, sir! It is now avowed that all the movements we have witnessed were only preliminary—mere feints—a series of masterly stratagems upon the people! We are almost forced to believe that the plan of operations devised for the war upon the Seminoles was, in the rapid shiftings of the Department, adopted, perhaps by mistake, for the war upon the currency.

Mr. Chairman, there is a paragraph in the President’s message, to which I could not listen without pain at the light in which it must place the Chief Magistrate of the country before all those who have watched the course of events. I allude to the passage in which he adverts to a prophecy that, under a State charter, the Pennsylvania Bank of the United States would prove stronger than ever. Sir, I think that such anticipations were justifiable. It might well be supposed that, on escaping from the constitutional scruples which clogged her former existence, and from the party contests which perpetually sought to involve her in their vortex, there would be no longer a motive for persecution. It was, doubtless, believed that many even of the politicians who had joined in a cry against the bank, in order to keep abreast of a supposed popular current, would gladly atone to their own consciences by, at least, an amnesty. Was it not rational to presume that the States would cordially welcome the advantages to be derived from its career of quiet usefulness? And, when the State of Pennsylvania had thrown round it her ægis, was it to be apprehended that those, at least, who had been so long indulging in sentimental regrets over “the lost rights of the States,” would be the first to trample upon such as are unquestionable? And yet, sir, how was it? You well know the subsequent history. The topic was too precious for demagogues to be abandoned. Party fires had begun to wane and languish for want of the accustomed blast and aliment. The war assumed a character of unprecedented fierceness. Before the wax of the charter was cold, you saw the great State of Ohio, under the influence of party excitement, passing a law to inflict the heaviest penalties upon any one of her citizens or corporations who should dare to act as the agent of that bank. We of Pittsburgh well know that the result of this single blow was to paralyze, in a great measure, the western business of the bank. There was denied even a right of way, and it became almost perilous to open in Ohio a letter connected with her affairs. You saw, also, under the same impulses, the branch expelled, on a few days’ notice, from Missouri. And in other quarters, so far from being permitted to take the position of a regulator, she has been compelled to pass an obscure and uneasy existence, constantly assailed by party clamor, and with the Government and its minions ready and eager, at any moment, to second a blow at her interests.

And who, sir, took the lead in that crusade? The writer of this very message. You saw him, with astonishment, arraigning the sovereign State of Pennsylvania for a high misdemeanor, before a Cincinnati dinner-table. You saw him addressing to that dinner-party an inflammatory letter, urging them, amidst their orgies, to lift high the wine-cup in pledge of eternal hostility to our Pennsyl-

H. or R.]

Treasury Notes.

[Oct. 4, 1837.]

vania institution. And yet, sir, he who has successfully employed the influence of his high station as Vice President in efforts to cripple that institution—to baffle all her exertions to be diffusively useful—now sneers in this high state paper at the sanguine hopes with which she entered on her new career!

It has been a subject of complaint here that, amidst the falling to pieces of the system of over-banking, to which your policy gave unrestricted scope, the Pennsylvania institution did not continue to pay specie. From whom is this heard? From those who had destroyed her national character, and with it all accountability to the nation; from those who had broken down the only barrier against over-issues of paper, which then, “like to an entered tide,” had rushed by and flooded the country; from those who had compelled her to wind up and to dispose of her resources at a long credit; from those who, in 1833, declared that she was “a reptile beneath the feet of the Secretary of the Treasury,” and that she had been “brought to her knees at the first blow of the State banks!” Surely, it is of the essence of modesty and consistency that such complaints should proceed from such a quarter. But, forsooth, she might, as she asserts, have continued specie payments. Be it so. The fact cannot well be questioned by those who ring in our ears her tremendous power and resources. But would such a course, if practicable, have relieved the country? Every candid man must admit that exactly the reverse would have been the case. If she continued to pay out specie, she must resort to measures to compel a similar course on the part of others. And who does not see the wide-spread ruin that must have ensued? Look at the bill upon your table for the adjustment of claims upon the deposit banks. Before a resort to suit, you provide for the offer to receive payment in protracted instalments. This is already pronounced, by gentlemen from the quarters in which they are located, to be oppressive and ruinous. Yet you reproach the Pennsylvania bank for not having taken the position which would have compelled a far sharper and more peremptory action on her part. It seems to be the misfortune of gentlemen, otherwise amiable and just, to catch the spirit which prevails here, and to suppose that a capacity for mischief necessarily implies the exercise of it. No, sir! If the whole force of the Government could not sustain a league of banks, the Pennsylvania institution might well decline to become an instrument for gratifying the blind and ungovernable rage with which the Executive was disposed to turn upon those who had been so long the objects of eulogy and favoritism. She did wisely, I think, not to exhaust herself in an effort to destroy them, but to reserve whatever strength she possessed to co-operate with them in an effort to relieve the country from the evils into which misgovernment had plunged it.

Sir, after destroying the best currency with which any country was ever blest, the friends of the administration tell us that they have constitutional scruples about meddling further with the subject; it is no concern of theirs; they doubt their right to cure the mischief they have inflicted. Suppose, sir, one of your naval commanders should insist on taking under convoy a fleet of American merchantmen. He declares that he has the only accurate charts; that he is familiar with every shoal of the channel, and every indentation of the coast. But, in the midst of difficulty and danger—with breakers around and signals of distress every where flying—he is seen refusing the aid of a single boat or anchor, and abandoning to their fate the victims of his ignorance and presumption. Would it be sufficient for such an officer to say, as has been argued here, “mine was a national ship intended to meet the public enemy; had I rendered assistance on that occasion, the next request would be to throw overboard my guns for the more convenient transportation of merchandise?” If such arguments would be met by universal scorn and execration,

must not the country regard with similar feelings the course of the dominant party!

But, sir, (said Mr. B.,) it is contended that the nation will cheerfully sacrifice itself for a metaphor. The word *divorce* is to reconcile us to every evil. This seemed to him a singular notion, with regard to a people supposed to cherish, in an especial manner, all the endearing ties and sympathies of domestic life. The word has been supposed to bring up the most melancholy images; it speaks of violated faith—of ungovernable passions—of a desolated fireside. The most remarkable case on record is that of Henry VIII; on which rests the yet unmitigated execration of mankind. There, too, the talk was of State policy; and even religion was pressed into service as the handmaid of lust. The purest statesman of the age was led to the block for his opinions about the divorce. Sir, what has been the past career, and what is the present state, of the party in this matter? You have long since madly broken away from a legal connexion, sanctified by a happy and serene cohabitation of forty years. In your downward course from respectability, you next took to your pets, to the infinite shame and mortification of all decent persons who looked on. And now you are wearied of them, and wish to go upon the town at large! This craving for novelty—this change of doxies—you dignify with the name of a *divorce*, which shall console us in the midst of our calamities. The man whom you have deprived of the chance of earning a dinner for his wife, is to go home and comfort her with talk about the divorce!

Mr. B. said there was one topic to which, in conclusion, he could not forbear to advert, as, in his view, fixing more conclusively than any thing else the character of the message. He alluded to the subject of a bankrupt law, to which thousands had been looking with intense anxiety. In order to render himself intelligible, it would be necessary to recur to opinions which the present Executive had heretofore expressed.

The most serious recent struggle for the establishment of a bankrupt law was in 1827. On the 23d of January of that year, the debate in the Senate was on a motion to strike out the 93d section of the bill, which extended its provisions, under certain circumstances, to other classes of citizens than mere traders. Mr. Van Buren strenuously supported the motion to strike out, declaring that no one but a trader could, under the constitution, be the object of such a law. He reasoned thus:

“When I say I am in favor of a bankrupt system, I mean to be understood as speaking of a bankrupt system in the language of the constitution, and such as was in contemplation by the framers of that instrument. He objected to the constitutional power of Congress to pass the section referred to. In his judgment, the provision contained in the 93d section was not within the reasons which induced the framers of the constitution to vest this power of establishing uniform laws on the subject of bankruptcies in Congress. That it was a power which never ought to be, or to have been, vested in Congress.”

Speaking of the dangers of passing the true line, he remarks, that the power to Congress being exclusive, any extension of it would trespass on the rights of the States. He adds:

“If it was put to him to decide between being a party in such surrender, or the loss of the bankrupt law, he could not, as he viewed the subject, without being false to his trust, hesitate in preferring the latter.”

The present Secretary of the Treasury (Mr. Woodbury) took the same ground. He said:

“This grant was not to legislate on the subject of contracts generally—of descents—of suits at law; but on the subject of bankruptcy. To bankruptcies, and to bankruptcies alone, then, was the power confined. And the word ‘bankruptcies,’ as used in the constitution, was

OCT. 4, 1837.]

Treasury Notes.

[H. OF R.]

never, in his apprehension, intended to extend beyond embarrassments and failures amongst mercantile men. Grant that some persons, not strictly traders, may, at times, have been included in the provisions of some laws on the subject of bankruptcies; yet this was where the power of legislation was unlimited—where all legislation, as to all creditors and debtors, was invested in one body. It has but seldom occurred anywhere, and existed nowhere at the time of this grant of power to Congress.” “He was opposed to this feature of the act, because to pass it would be to bring subjects and citizens within the scope of the General Government, never contemplated by our fathers; would be sweeping all classes into this Norwegian whirlpool—this vortex of disaster and difficulty to State rights and State independence, from which he could see no means of extrication.”

Mr. Woodbury, on a subsequent day, (27th January, 1827,) said:

“Under a special grant of power to us, in 1789, to pass ‘uniform laws on the subject of bankruptcies,’ how could we then extend those laws to persons who, at that time, were not within the letter or spirit of the bankrupt system, any more than we could extend them to distinct subjects of land titles, or forms of legal process? It need hardly be argued that, if we, as the agents of the several States, with explicit powers, undertake to construe the language of those powers broader than what we know the language was then understood to mean, it is as much a violation of the constitution as it would be to usurp powers entirely new.”

We may now advert to the application of these principles to another clause proposed to be inserted in the bill. On the 6th of February, 1827, Mr. Branch, of North Carolina, introduced an amendment extending the act to banking corporations. He said:

“The country is inundated with paper money; and if the merchants of the country were to be made bankrupt when they cease to pay their debts promptly, why should not incorporated companies, placed in the same circumstances, be subjected to the same consequences? The banks of the South had given circulation to a paper currency which had, in many instances, become depreciated, to the great loss of the people; and while the banks are unable or unwilling to pay their honest obligations, no measures were pointed out by which a just disposition of their effects could be enforced for the benefit of the numerous creditors. To place some barrier to the operation of such a state of things, was his object in proposing this amendment. There was no subject, he believed, upon which greater unanimity of sentiment existed, than upon the evils arising from the present banking system. The evils arising out of a paper currency, when not placed under restrictions sufficiently severe to restrain those engaged in bank companies from profligate or careless conduct, were universally admitted. He, therefore, wished to apply the pains and penalties of the bankrupt system to these evils.”

Let us see what stand the present Executive took on this subject. I read from the Congressional Debates:

“Mr. Van Buren said it could not be denied that the clause interfered with the regulation which State Governments might have adopted for the Government of their State institutions, which was an odious exercise of power not granted by the constitution. The amendment has this extent: it directs the States as to the manner in which they shall exercise their sovereignty in this particular, and points out what penalty shall be inflicted, in case the charters granted by the States are violated. In fact, it points out what the privileges granted to the incorporations shall be, by dictating the forfeiture and directing what the companies may, and what they may not do. All this has hitherto been done by the States. They have assumed the direction of these matters as a right, which they doubtless

have. And in including this subject of corporations in the bill now before the Senate, it will be taken entirely from the States and subjected to the power of the bankrupt system. This was never done, and never attempted, in any country on the face of the globe. In England, such a provision was never dreamed of; nor did he believe that, when the constitution was framed, such an attribute was imagined by those who authorized the establishment of a bankrupt system.” “The duties of banking institutions must necessarily be discharged by agents. Their essential responsibility is intangible by such a law. If the clause were to be inserted, and banks permitted to be made bankrupts, upon whom, upon what human being, could the penalty of the law be made to rest? Would you apply the rigor of the system to those agents, who are so far from being principals in the delinquency of the institutions to which they are attached, that they are only the hired servants of these banks? This could not be. It would be the height of injustice to implicate, in a penal manner, these agents, and not for fraud, but merely for the inability of the corporations to pay their debts. The individuals employed to carry on these establishments surely should be exempt from the penalties of bankruptcy: they are persons without whom they cannot be carried on; they are the agents of all those who hold stock in their banks; they act for the various classes of individuals whose means are confided to banking companies, and among whom are to be found the widow and the orphan, who are deeply interested in having capable and honest men to fill these agencies. But how could such men be induced to occupy those situations, if they were to be made individually responsible, not only for their own acts, but for the misfortunes and losses of their corporations. On the other hand, would you render the stockholders liable for the disasters of the institution? In cases of misconduct by the officers employed by them, or a majority of them, would you make them answerable for an act of bankruptcy? Could they, in justice, be liable for the malversation of agents employed by them to transact a business of which they were, all of them, probably ignorant? He thought that no great expenditure of reasoning need be made to show the true answers to these inquiries; and the very questions, he conceived, illustrated the difficulties of the case. His idea of a bankrupt system was, that it could not be applied to any but individuals or principals, and that it was not capable of being made to operate on associations, or on the subordinate agents, either of individuals or corporations. He therefore objected to this amendment. He did not wish the bill to be defaced by any inappropriate provisions.”

The clause was rejected; Mr. Van Buren and Mr. Woodbury voting *against* it.

Here, then, is the doctrine distinctly, and without qualification, announced and acted on—that to extend to corporations, in any way, the provisions of a bankrupt law, would violate the constitution; and that, even if no constitutional obstacle existed, it would be an outrage upon the dignity and sovereignty of the States.

What then must be thought of the sincerity of the President, when we find in the message recently addressed to us the following paragraph:

“In the mean time, it is our duty to provide all the remedies against a depreciated paper currency which the constitution enables us to afford. The Treasury Department, on several former occasions, has suggested the propriety and importance of a uniform law concerning bankruptcies of corporations and other bankers. Through the instrumentality of such a law, a salutary check may, doubtless, be imposed on the issues of paper money, and an effectual remedy given to the citizen in a way at once equal in all parts of the Union, and fully authorized by the constitution.”

Thus, sir, we see that the only measure of relief for the people which the President suggests, is one that he and the

H. of R.]

Treasury Notes.

[Oct. 4, 1837.]

Secretary have united in denouncing and defeating. Did the President suppose it would pass? Was he not aware that, if passed, he would be bound to veto it?

It would be remarked, as a singular feature in the case, that in the message there was an implied reproach upon the Congress of other days for slighting the suggestions of former Secretaries on this subject; when, in truth, that very result was brought about by his own vehement resistance.

We have been informed by the Judiciary Committee that they do not intend to bring forward, at the special session, any bill on a subject which the President suggests as the only remedy that has occurred to him to relieve the country from a depreciated currency. Doubtless we shall never hear a word more on the subject.

Mr. B. said he was not disposed to apply harsh epithets to the conduct on which he had thus animadverted. He was willing to leave the matter to the people. It would be for them to say whether there had been manifested a genuine sympathy for their condition, and an anxiety for their relief, or whether their sufferings had been mocked and their understandings insulted.

Mr. ROBERTSON said he was opposed to the bill, whether designed to raise revenue or to create a circulating medium. As a revenue measure he believed it unnecessary, and, under that impression, he was unwilling, at this time of general pressure, to incur a new debt or levy upon the people additional burdens. The Secretary of the Treasury anticipates a deficit of five or six millions of dollars only. He proposes to withhold the fourth instalment set apart for the States, or to resort to some other resource for a sum equal to ten millions of dollars; which he gives us to understand will meet all necessary expenses, and leave a surplus of one million for the mint, and three or four millions for sudden and contingent calls. The same view is presented still more distinctly by the President in his message. He tells us:

"The sum necessary for the service of the year, beyond the probable receipts and the amount it was intended should be left in the Treasury at the commencement of the year, will be about six millions."

He makes this estimate on the supposition that indulgence will be extended on the merchants' bonds. Adverting to the means of supply, he says:

"It is not proposed to procure the amount required by loans or increased taxation. There are now in the Treasury \$9,367,214, directed by the act of 23d June, 1836, to be deposited with the States in October next."

He then recommends the use of this sum, as the whole or the greater part will be wanted to defray existing appropriations. Well, sir, we have granted the sum required, in the very mode recommended by the Executive, by violating our engagement solemnly made with the States; and now, before we have determined whether any or what indulgence shall be extended to the merchants or the banks, we are called upon to authorize an issue of ten millions in Treasury notes, making (exclusive of the sum withheld from the States) about forty-six millions for the current year. It is true the President proposes this issue, not in addition to the funds withheld from the States, but temporarily, and only until the amount can be collected from the banks. But there is no pretence that the banks are insolvent; nor is there any proof that the whole or some part at least of what they owe may not speedily be collected or made available. We well know that hitherto drafts upon them, whether paid or not, have served the purposes of the Government; indeed, that, even when protested, these drafts have readily sold in the market at a premium of six or seven per cent. If six millions only of the sum wrested from the States can be commanded, they will suffice, as the President himself informs us, for the service of the present year. Yet we are to issue ten millions in Treasury notes, redeemable at the expiration of twelve months; six mil-

lions to supply what, there is every reason to believe, we may obtain from the banks indebted to us, or make available by drafts upon them; and the residue, avowedly, to provide or keep up a surplus for the mint, and for unforeseen contingencies. I question much, sir, the propriety of this annual appropriation for the mint. There is reason to fear that we are making money there at a heavy expense, and, if so, the sooner we get rid of a losing concern the better. As for the surplus for sudden emergencies, the very contingency has occurred for using whatever portion of it may remain; and I would sooner expend every dollar of it than issue a Treasury note, or impose a burden of any kind upon the country. This is not the time to create or retain an idle surplus of three or four millions in the Treasury.

But funds, it is said, are wanting to carry on what is called the Florida war. If that be so, profoundly ignorant as we are still kept of the true cause of that war, discreditable as its conduct has been to the administration, I am ready to vote adequate supplies for the protection and security of our frontier settlements. But has the Executive called for a further appropriation for that object? If there be in the message the most distant allusion to such an appropriation, it has escaped my notice. The President sums up in a single paragraph the objects to which he invites our immediate attention:

"To regulate, by law, the safe-keeping, transfer, and disbursement of the public moneys; to designate the funds to be received and paid by the Government; to enable the Treasury to meet promptly every demand upon it; to prescribe the terms of indulgence and the mode of settlement to be adopted as well in collecting from individuals the revenue that has accrued, as in withdrawing it from former depositories; and to devise and adopt such further measures, within the constitutional competency of Congress, as will be best calculated to revive the enterprise and to promote the prosperity of the country."

These are the reasons assigned for the present inconvenient and unseasonable convocation of Congress. Yet my colleague [Mr. WISE] may have been right in suggesting that the true motive is to be found in the necessity of providing further means to carry on the war in Florida. For, of the various objects supposed to require immediate legislation, there is not one which the Executive, in the plenitude of its authority, had not already provided for, or which might not have been deferred without much detriment to the public interests, till the regular period of our annual session.

Why are we told, sir, of the necessity of regulating the safe-keeping and disbursement of the public moneys? The deposit act already provided for the case which has occurred; directing that, where the banks shall be discontinued as depositories, the public moneys shall be kept by the Treasurer, subject to be disbursed according to law. But without regard to this provision, or waiting for any new legislation, the Executive proceeded at once to organize a new system. Circulars were addressed, in May last, to the collectors and receivers of public money, requiring them to keep it in their own hands, subject to the directions of the Treasury Department. [Mr. R. here read extracts from the circulars referred to.] The Executive, as usual, made a law to suit its own views of the exigency of the case, and the system then adopted has continued ever since in full operation.

Again, Mr. Chairman, why speak of designating the funds to be received or paid by the Government? The resolution of April, 1816, was in full force. It is true the famous Treasury circular had been issued in defiance of that resolution; and that when Congress reasserted its authority, and passed an act virtually repealing it, and doing precisely what is now recommended—designating the funds to be received in public payments—that act was not regarded by President Jackson as meriting the honor of his notice. But the present incumbent, none can doubt, has at least

Oct. 4, 1837.]

Treasury Notes.

[H. of R.]

as good a right to rescind the unlawful edict as his predecessor had to issue it. The existing regulations prescribe, moreover, the very funds, which it is apparent, from the whole scope of the message, the President considers alone admissible. Why, then, call upon Congress again to designate those funds? What assurance have we that, bound as he is to follow the footsteps of his predecessor, another law upon the subject will not be treated like the first? Or of what avail is it for Congress to enact laws which the Executive habitually supersedes at its pleasure?

As to making provision to enable the Treasury to meet the demands upon it, I have already endeavored to show that under the practice prevailing at the Treasury of drawing upon the deposit banks, and the determination adopted by the Executive of withholding the fourth instalment due the States, there were abundant means to meet all necessary expenditures during the current year, or at least to enable the Treasury to hold out until the first Monday in December.

Nor was there, sir, the least occasion for an extra session to grant indulgence to public debtors, or prescribe terms of settlement with them. The same authority which the Executive has exercised in relation to those subjects, up to the present moment, might just as lawfully have been exerted for two months longer.

There remains, then, but a single ground upon which the President has placed the justification of this extra session: the propriety of devising and adopting measures, within the constitutional competency of Congress, to revive the enterprise and promote the prosperity of the country. The importance of these objects none will contest. But what measures, calculated to effect them, does the President recommend? Not one. That most generally and urgently demanded by the commercial community—the establishment of a national bank—he unhesitatingly rejects, as not within our constitutional competency. Believing, as I do, such an institution both unconstitutional and inexpedient, I am gratified to find that he speaks in reference to it in no equivocal language. More, sir, I must frankly declare that I concur most fully in the doctrine of the message, that it is not the province of this Government to legislate in favor of particular pursuits. The public credit, the public treasure collected from all, are the common right of all, and cannot justly be appropriated to the exclusive or apical use of a favored class. Government owes equal protection to the industry of all: pecuniary assistance to none: to those engaged in commercial pursuits not more than to the farmer or mechanic. Its revenues and credit cannot be legitimately applied to such purposes; and with no greater propriety indirectly, through the facilities of a national bank, than by a direct loan or grant.

There is one measure, Mr. Chairman, by which it seems to me some relief may be constitutionally extended to the country: not by establishing a national bank, nor by issuing Treasury notes. The measure to which I allude—I mention it with great diffidence, for it is not, I am confident, generally approved, and is expressly discountenanced by the President—is a relaxation of the law requiring payment of public dues in specie, or in notes of specie-paying banks. Let us temporarily dispense, in part at least, with this rigorous exaction. Let us receive a portion of the revenue in such notes as the people receive from each other: such as the State Governments accept in discharge of public dues; provided they be not so far depreciated as to justify an apprehension that they will not be ultimately redeemed. Let us pay all public creditors alike in the funds we receive, provided they consent to take them; and, if not, suffer their claims to remain a charge upon the Treasury, to be paid in gold and silver, as soon as it can be procured to satisfy them. Let us reduce our extravagant expenditures, and put additional guards upon collect-

ing and disbursing officers. Let us place the public money in the State banks, on special deposit, and not as a basis for loans: thus avoiding the danger of a connexion, either in political concerns or pecuniary interests, between the Government and the banking institutions of the country. By these means, while we provide for the safety of the public treasure, we may afford the people that relief which the times require: a substantial, constitutional relief. We shall not then be charged with permitting unjust discriminations among the public creditors: with providing one kind of currency for the people, and another for the Government: with extorting gold and silver at a grievous sacrifice from the many, to put in the pockets of the few: yes, sir, under the sanction of the Secretary of the Treasury, to divide among ourselves. The people have a right to complain of these things; and without imputing to the Secretary the dishonorable motive, in tendering gold and silver to members of Congress, of designing to conciliate their favor by a paltry bribe, I cannot but regret that the offer was ever made or accepted. It has subjected them to humiliating applications from brokers and money changers, to sell at a premium what has been wrung at a great loss from the people, and prevented them from feeling the inconvenience to which their constituents are subjected; of soiling their hands and their pockets with the wretched trash currently circulating through the country. If we can apply no remedy for the evil, we ought at least to bear our share of it.

But it does not become me, Mr. Chairman, at this time, nor perhaps at any time, to press upon those who administer the Government measures of the character of those to which I have alluded. We are given to understand in the message that the receipt into the Treasury of notes not redeemed in specie, on demand, ought not to be sanctioned. So far from relaxing, the President seems inclined to increase the rigor of the law, by withdrawing the privilege of paying in notes of specie-paying banks, and, during the present almost unexampled difficulty of procuring them, to exact gold and silver exclusively. With these views, why should he speak of designating the funds to be received, when the law already requires the only funds he approves? Why convene Congress to adopt measures for relieving the country, when he recommends none, and is opposed to all that promise any general or effectual relief? As to the particular measure before us, it is not designed to relieve the people, but to impose a new burden upon them, for the relief of the Government, and that in an unusual and odious form. I am constrained, sir, upon principle, to vote against it; and I would now move to strike out the first section of the bill, but that I am unwilling to deprive other gentlemen of the opportunity of presenting their amendments. There is no amendment, however, which can induce me to vote for it, so long as the feature remains authorizing the issue of Treasury notes. But if the administration will submit a proposition for the necessary supplies to be raised in the ordinary way, or any gentleman will propose plans of general relief, within the pale of the constitution, I pledge myself to give such measures my humble support, regardless of the quarter from whence they come.

Mr. THOMAS said he did not rise to participate in the discursive debate which had been invited by the speech of the gentleman from Pennsylvania, [Mr. BIDDLE.] His attention had been attracted by the closing remarks of that gentleman, and he would do now what he had desired to do a few days since, and submit to the House and to the country a brief explanation, due to the committee of which he had the honor to be the chairman.

When the gentleman from Pennsylvania heretofore called on the chairman of the Judiciary Committee to respond to certain inquiries, Mr. T. was about to give a full and detailed reply, but was warned by the Chair that such a

H. OF R.]

Treasury Notes.

[Oct. 4, 1837.]

proceeding would not be in order. Subsequently, a resolution declaring that it is inexpedient to report a bankrupt law at this special session of Congress was adopted in the committee, and it became his duty to present it to this House. After the resolution had been agreed to by the committee, he inquired of the members present whether he should state to the House the reasons by which they had been influenced, and was told that it would be most agreeable to all concerned to have the conclusion they had come to announced without comment. This was accordingly done.

The manner in which these proceedings have been adverted to by the gentleman calls for a few words in explanation, to guard against misapprehension.

There has been no purpose to disguise the opinions of the Judiciary Committee, or of any of its members, on the grave subject committed to their consideration. The members have been frank with each other in the committee room, and have nothing to conceal from this House, or from their constituents. It is to be hoped that no man supposes that they have sought to avoid a direct decision on any question that could be at this time, with propriety, disposed of. At their first meeting, no opinion could be formed as to the probable duration of the present session of Congress. If it was to be extended beyond the first Monday of December, ample time would be afforded to act upon the business to be reported by the Committee of Ways and Means, and also to establish a uniform system of bankruptcy. But if the session was to be closed before that period, and in time for members to go home and return again, all foresaw that the whole time of the House would be engrossed by the measures expected from the Committee of Ways and Means. Under these impressions, the committee determined not to act upon the matter referred to them, until they could be satisfied that the House would take that subject into serious consideration at the present session. After it had been ascertained that the present session would not be blended with the regular session of Congress, the committee again assembled, all the members being present but one, [Mr. HOFFMAN.] A motion was made that the committee be discharged from the consideration of the policy of establishing a uniform system of bankruptcy. The proposition was rejected—for it two, against it six votes. The resolution declaring it to be inexpedient to report a bankrupt bill at the present session was then adopted without opposition.

These particulars are given that the public may see that a decided majority of the committee are disposed to examine further at the next session, if that duty should be imposed upon them, into the propriety of exercising the powers conferred on Congress respecting bankruptcies.

The establishment of a uniform system on that subject is now a work of great difficulty and delicacy. The people of the several States have been long accustomed to insolvent systems differing essentially from each other. If an attempt is to be made to supersede them by a general law of the United States, it is certainly desirable that ample opportunity should be first afforded for a full development of public opinion on the subject. Since the message of the President and the report of the Secretary were referred, a very short time has elapsed. Notwithstanding this, if the committee had supposed that there existed any necessity whatever for speedy action, they would doubtless have proceeded with the lights already before them. But this is manifestly not the case. We have been invited by the President and the Secretary of the Treasury to explore the power granted to this Government concerning bankruptcies, to see whether we cannot, in a manner authorized by the constitution, impose some salutary check upon the issue of paper money, and guard against a recurrence of that great catastrophe which has inundated the whole country with a depreciated currency. The evil to be remedied grows out of the mismanagement of the banking cor-

porations created by the several States. Now, whether the operations of a bankrupt system are to be extended to banks already in existence, or only to such as may be hereafter created, there can be no necessity for hasty action. It is not probable that any State will, under existing circumstances, create any more institutions similar to those whose dark bodies now cloud the landscape of the whole Union, and whose misconduct and misfortunes have prompted a thorough examination into all the powers of this Government, to discover, if possible, some means to make them respect our fixed policy, and act in strict subordination hereafter to the laws of the land. Neither is it probable that Congress would be inclined to subject existing banks, without delay, to the operations of a bankrupt law. Time ought to be given to these institutions, on account of their numerous stockholders and debtors, to recover from the dilemma into which they had fallen. Before we undertake to enforce a new rule of morals, altering essentially the past policy of the country, all parties to be affected should have time to prepare for the change. In no event, then, can there be a necessity for acting on the recommendation of the President concerning banks at the present session. At the regular session it can be deliberately disposed of without injustice to any interest involved. Moreover, it will be perceived that neither the message of the President, nor the report of the Secretary, referred to the committee, contains any proposition to devise a general system of bankruptcy applicable to merchants and others; and the committee believed that they would not have met the expectations and requirements of the country, if they had reported a bill applicable to banking corporations alone. Between the close of this and the commencement of the next session, the public mind may be turned to this very important subject, and Congress will reassemble in December, with the advantage of much additional information.

How far these considerations, or any of them, have operated on other members of the Judiciary Committee, Mr. T. was not prepared to say. Suggestions similar to these were made when the resolution was assented to which has been handed to the House. But he was not authorized to say whether any one or all of the majority of the committee are ready to adopt or repudiate the measure recommended by the President. On that point he could speak for himself only. He had bestowed upon that measure a good deal of reflection, and had examined and listened to many of the arguments urged against it, and yet had not heard nor found any thing to bring to his mind the unwelcome conviction that there is no power in any of our Governments, State or federal, to check and control effectually the corporations of the country. He was reluctant to believe that a State can, by a grant of a charter, secure to a portion of its citizens an exemption from the obligations intended to be imposed on all the people of the United States by one of the most important articles in the federal constitution. That instrument denies to the States the power to impair the obligations of a contract. There is no distinction to be found there between the contracts of corporations and those of individual citizens. The obligations of all are to be held sacred and untouched by State legislation. Nearly all, if not all, the corporations that have secured banking privileges from the States, are required to pay specie on demand for their notes and other liabilities. In fact, nothing but specie can be made a legal tender by a State in payment of any contract into which they may enter. The notes containing such a promise are received by the community, and without that promise they would not be accepted. And he was unwilling to believe that Congress cannot interpose when these contracts are violated, and deny to any State the right to impair their obligations by attempting to legalize a suspension of specie payments. The position of the banking institutions of the country at this moment cannot but induce a strict search

Oct. 4, 1837.]

Treasury Notes.

[H. OF R.]

into all the powers of the General Government for a remedy co-extensive with the evil now afflicting the country.

For inviting attention to this subject, the President is entitled to the thanks of every patriot and philanthropist. The banks of the States ought to be indulged in the free exercise of all powers lawfully granted. But they must not be permitted to inundate the whole country with their promises to pay, and then, with impunity, depreciate the currency thus put afloat, and subject the people at large to the evil consequences of this mismanagement, while their stockholders are not only exempt from the losses incurred, but have an opportunity, in common with the whole community, to speculate in, and profit by, the fluctuating value of their own contracts. The directors of these institutions may be all honest and honorable men, but, assuredly, they often set on foot a system of shaving—he had almost said of plunder and robbery—by which the speculator snatches from the hand of industry half the bread it has earned.

The gentleman from Pennsylvania has read to the House a portion of a speech made by Mr. Van Buren in the Senate, in 1827, to show that the sentiments then entertained by that distinguished man differ widely from those contained in his late message to Congress. Supposing that he had established this inconsistency, the gentleman tells us that he will not indulge in harsh epithets. Be it so, sir. If, however, the gentleman should think proper to characterize harshly what he considers an inconsistency, Mr. T. presumed that, if the Chief Magistrate did not think proper to defend himself, some one of his friends could, without difficulty, satisfy the country that he had been unjustly assailed; but he flattered himself that this would not become necessary. When the gentleman has deliberately reviewed the speech and the message, and has taken into calm consideration the circumstances under which they have been severally uttered, he thought the gentleman would find that denunciations of their author would be misplaced.

The President, in his message, suggests “that it is our duty to provide all the remedies against a depreciated currency which the constitution enables us to afford. The Treasury Department, on several former occasions, has suggested the propriety and importance of a uniform law concerning bankruptcies of corporations, and other bankers. Through the instrumentality of such a law, a salutary check may, doubtless, be interposed on the issues of paper money, and an effectual remedy be given to the citizen, in a way at once equal in all parts of the Union, and fully authorized by the constitution.”

This language the gentleman from Pennsylvania supposes conflicts with the declarations made by Mr. Van Buren, in a speech delivered in the Senate, in 1827, against an amendment offered by Mr. Branch to the general bankrupt bill then and there under consideration. If this supposition was well-founded, there would be no just cause to apply “harsh language” to the President. He could have avoided, without censure, making the suggestions in the message which have exposed him to the charge of inconsistency. This will not be denied. If, then, he was not compelled to speak; if Mr. Van Buren could with propriety have been silent, let us inquire with what propriety any unworthy motive could be imputed to him? No one will maintain, Mr. T. imagined, that the Chief Magistrate has not a large share of sagacity and foresight. His enemies impute to him powers of mind almost magical. He must have known, then, that he has, by suggesting a bankrupt law as a remedy against depreciated currency, put in peril his popularity at home, where he must be most anxious to stand firm in the affections of the people. He has, too, by the same step, risked an addition to the number of the enemies of his administration throughout the country.

Whatever might be, therefore, thought of the wisdom of his opinions, surely no one ought to impute to him selfish or unmanly inducements, if, in fact, he had in the message contradicted the doctrines of the speech. But is this true? To test the correctness of the charge, it will be necessary to examine what would have been the effect, and look to the object of the motion which Mr. Van Buren resisted.

The bill before the Senate in 1827 was founded on the assumption that all who were to be subjected to its provisions were natural persons. For the enforcement of its requirements heavy personal penalties, including imprisonment, were to be resorted to. Mr. Branch proposed to amend this bill, by inserting in the first section the words “or other banking corporations.” This amendment was opposed by Mr. Van Buren, in the speech from which extracts have been read to the House. If the motion had been assented to without other material alterations in the bill, it would have been an anomaly in legislation.

Banking corporations are intangible, ideal beings, and could, of course, do nothing which, according to the bill, would have amounted to an act of bankruptcy. Seeing this, Mr. Van Buren supposed, if the amendment prevailed, that it would become necessary to new model the whole bill. He therefore proceeded to inquire, if the clause were to be inserted, upon whom the pains and penalties of the law could with propriety be made to rest. He insisted that the officers of the banks ought not to suffer in their persons or private property on account of the failures of the banks. They are but the employed agents of the stockholders, and must act in obedience to the directors of the institution; and it would be the grossest injustice to make them individually responsible, not only for their own acts, but for the misfortunes and losses of corporations which they had no power to control. He maintained, also, that the private property of stockholders in banks then existing ought not to be subject to seizure by commissioners of bankruptcy, to satisfy the debts of the corporation.

By the charters of these institutions, the stockholders were expressly exempted from all liability for the disasters of the corporation; and Mr. Van Buren contended that Congress could not by an *ex post facto* law inflict upon individuals serious personal penalties, and seize their private property, to enforce contracts entered into by their agents under an authority which exempted them from all liability whatever.

These opinions are not antagonistical to the suggestions contained in the President's message.

The constitution of the United States, without attempting to define the provisions or objects of a bankrupt law, clothes Congress with power to establish a uniform system of bankruptcy. The President has not pointed out any specific mode in which this power shall be exercised; but says that, through the instrumentality of that power, such regulations may be established as will impose a salutary check on the issues of paper money, and give to the citizen an effectual remedy, equal in all parts of the Union, against some of the evils of a depreciated currency. If this cannot be done without controlling the laws of the States, as proposed in 1837, then the suggestions of the message are inconsistent with the views of Mr. Van Buren, as expressed in the debate in the Senate, but not otherwise.

This is not a proper occasion to inquire whether it is competent for Congress to bring the general authority conferred upon it by the constitution over the indebtedness of bankers, whether individual or corporate, in aid of the State laws. But it will not be difficult when that effort shall be made, to show that it can be done conveniently and in strict accordance with the constitutional doctrines contended for in the speech of Mr. Van Buren.

If the bankrupt question should come, while he was a

H. of R.]

Treasury Notes.

[Oct. 4, 1837.]

member, fairly up for discussion in Congress, Mr. T. would undertake to examine how far the several States can limit and restrain the Government, in the exercise of an undoubted power, expressed clearly in the constitution, by grants of privileges and immunities to their citizens, incompatible with that which may be made the supreme law of the land. But, at present, it was not necessary to enter upon what is well known to be debatable ground. The suggestions of the message can be readily carried out without trenching upon the privileges secured to incorporated bankers by the laws of the several States. The condition of the country, at this moment, furnishes an opportunity for an apt illustration of this opinion. The charters of nearly all the banks of the country have been forfeited, by a suspension of specie payments. Until this occurred, the evils of our banking system, although known to be great, were not generally esteemed to be intolerable. Since that event, speculators and shavers are out like hawks upon the wing, preying without restraint upon the community, by buying and selling a depreciated and fluctuating paper currency. In many cases, those who are interested in fallen banks may, and probably will, amass fortunes, at the expense of the producing classes, by purchasing at a discount the liabilities of the institutions with which they are identified. It will be confessed that this state of things aggravates essentially the calamities incident to a suspension of specie payments. If the States do not, could not Congress effectually interpose to correct this revolting spectacle? Could not Congress, after a specified delay in the payment of their notes and other liabilities, which they are required by their charters to redeem in specie, provide, by a general law, that the creditors of such banks may apply to the courts of the United States for adequate process? It would not be requisite to inflict upon the contractors, or their agents, personal penalties; but commissioners might be appointed to take into custody their effects for the benefit of their creditors. Such a proceeding towards an insolvent corporation would produce measurable relief against some of the mischiefs often complained of. The acts and doings of such a commissioner would be public. All parties interested would have access to his papers, and thereby be able to estimate correctly the value of the liabilities of the corporation. At present, under the existing systems of many of the States, the managers of banks that have failed continue to direct secretly their operations. They, and they alone, know minutely their condition, and can ascertain clearly the value of their engagements. The directors may, too, give improper preferences to creditors, or transfer the whole funds of the banks to trustees, instead of making a fair and speedy distribution of them for the benefit of all concerned.

Would not all these mischiefs be prevented by a transfer of the papers and effects of a bankrupt corporation to a public officer, to whose proceedings all parties interested could have unrestrained access? And would not a measure of this character operate to restrain the issues and business of banks within reasonable bounds? If the stockholders were apprized that, on the happening of a certain event, the assets of the bank were to be disposed of for the benefit of all concerned, it is not unreasonable to believe that they would take care to guard against the occurrence of such a contingency, by precautions better than those which have been generally used. This being true, here is a simple mode in which the suggestions of the message can be responded to, not inconsistent with the constitution of the United States, which does not in the slightest degree encroach upon the authority of the States to grant bank charters, or interfere with the personal immunities intended to be secured by such grants; and it has none of the attributes of the measure proposed by Mr. Branch, and opposed by Mr. Van Buren, in 1827.

There are other modes in which the great object of the

message—a remedy against depreciated currency—could be furthered through the instrumentality of a bankrupt law, not inconsistent with the doctrines contended for in 1827. But it is unnecessary to dwell longer on the subject. Enough has been said to show that the President has not exposed himself to just censure or denunciation, and that the Committee on the Judiciary has discharged faithfully the duty imposed on it by the House.

Mr. T. had arisen to establish those two positions, and not to enter into the debate at large; and having said all that he thought needful for that purpose, he concluded.

[The hour of half past two having arrived, the House took its usual recess till four o'clock.]

EVENING SESSION.

TREASURY NOTE BILL.

The House met after the recess.

The bill authorizing an issue of Treasury notes being under consideration in Committee of the Whole,

Mr. DUNN, of Indiana, moved to amend the bill by adding a clause declaring, in substance, that the banks or merchants indebted to the Government might settle their respective balances in Treasury notes before they fell due.

But it was ruled not to be in order at this time.

The question was then put on the amendment offered by Mr. RHETT, of South Carolina, and decided in the negative.

Mr. WILLIAMS, of North Carolina, said he observed that, by the bill as it stood, the Secretary of the Treasury was vested with an unlimited power of employing as many clerks as he pleased, and at whatever salary he chose to fix; and he inquired of Mr. CAMBRELENG how many clerks were contemplated as necessary, and what was to be their compensation?

Mr. CAMBRELENG expressed great surprise that such a question should have been put by the father of the House, who had been in Congress all through the last war, and had voted for just such a bill to issue Treasury notes, with a similar discretion as to clerks.

Mr. WILLIAMS denied that he had voted for the bill alluded to.

Mr. CAMBRELENG said he was sorry to hear it. He then referred to a bill passed two years ago, respecting Virginia land warrants, where many clerks were necessary, and in which a similar discretion was entrusted with the Department. He thought the inquiry the most absurd that could be imagined.

Mr. WILLIAMS replied with some warmth to this remark, and a long conversation ensued, in which reference was had to the days of Mr. CRAWFORD, the history of the Bank of the United States, Mr. WILLIAMS's votes for President, and the general politics of the country, in the course of which there was some sharp retort. Mr. CAMBRELENG declining to answer Mr. WILLIAMS's query, he moved that the committee rise; but withdrew the motion at the request of

Mr. DAWSON, of Georgia, who offered an amendment, restricting the number of clerks to four, and the amount of the salary of each at the rate of \$1,200 per annum.

Mr. CAMBRELENG expressed his assent to this amendment; and after some remarks from Mr. HAYNES, not heard by our reporter, the amendment was agreed to.

Mr. RIVES, of Virginia, proposed to strike out the 2d section of the amendment moved by Mr. CAMBRELENG, the effect of which would be to provide for the issuing of Treasury notes without interest.

Mr. R. supported his amendment by a speech, in which he insisted that notes of the description he desired, while they met and relieved the wants of the Government, would equally meet the great want of the people, by giving them a uniform circulating medium. He contended that no ob-

Oct. 4, 1837.]

Treasury Notes.

[H. of R.]

jection could be urged to this measure, save by the advocates of the Bank of the United States, or by persons desirous of speculating on the necessities of the community; these notes would at once reduce the balance of exchange with England; and this would operate to prevent their depreciation. Treasury notes would circulate better without bearing an interest than with a low rate of interest; and were the amount \$40,000,000 instead of \$10,000,000, it would be a safe and salutary measure, and the very best thing Congress could do.

Mr. HAYNES suggested that it was of little consequence whether these notes should circulate, or should be hoarded; for, if they were hoarded, the effect would be to force out an equal amount into active circulation.

Mr. SNYDER said he would vote for the amendment of the chairman of the Committee of Ways and Means, if we were under the necessity of issuing ten millions of paper money; for one, he thought it important that the paper should be of equal value with specie; unless it is, the consequences will be that the issue of this paper will add to, in place of diminishing, the evil which at present exists; for, disguise this as you may, it is a debt which we are involving the nation in to the amount of ten millions of dollars. I have been in the habit of always legislating in a manner that my constituents could understand my acts; hence I would much prefer a loan of ten millions to the present proposed mode of issuing warrants to that amount, redeemable in one year; for, depend upon it, if we keep our faith with the States, we have ten millions to pay them in 1839. There is now a deficit in the Treasury of two millions and upwards; this, together with the ordinary expenditure of the Government, will consume all the contemplated revenue of the next year; and, at the end of that time, the money must be raised to redeem the warrants, and rest assured that the people will understand it when they are called upon to pay it. It is objected, too, that if these warrants bear interest, they will be anxiously sought for, and being more valuable than specie, they will be locked up, and withheld from circulation. Admit this, it will take ten millions of specie or its equivalent to withdraw from circulation the warrants, thus adding to the means of the banks to resume specie payment. Not only the wants of the people, but the character of our Government, imperiously demands that we should issue none other than a circulating medium which would relieve the deranged state of the currency, and have an equal value with specie. I repeat, sir, I would prefer a loan to the odium of issuing a paper currency, not based on a specie capital, and which the taxes of our constituents must in the end pay.

Mr. CAMBRELENG thought it desirable to get this bill into the House without delay; gentlemen need not dread the previous question, because, as the body of the bill was in the form of an amendment to the bill originally reported, the previous question could not be taken before the amendment was voted on. He explained the reason why, though at first in favor of Treasury notes without interest, he had since changed his opinion. When he proposed notes without interest, a large amount was expected to flow into the Treasury; this was now to be deferred; and it was safest to add an interest to guard against depreciation. Gentlemen ought to remember that one million of these notes bought up and sent abroad was equal, in its beneficial effects upon the state of the currency, to ten millions circulating at home.

Mr. CHAMBERS, of Kentucky, moved that the committee rise; but the motion did not prevail.

Mr. BELL suggested it would be best to pass at once upon the amendments that should be offered, then lay this bill aside, and take up the others, and go through with them in committee, and report the whole to the House without delay. He considered this as the most important

bill for the administration of all that had been reported. This was the money bill: pass this, and these ten millions could be converted by the Government into specie, and it had already thirteen or fourteen millions in the deposit banks which this bill would render permanently unavailable; so that they would be enabled to do all they desired, with or without the sub-Treasury bill. The Treasury could securely hoard up the avails of these notes, and then circulate its own drafts.

Mr. UNDERWOOD said he had an amendment which he was desirous to offer as a substitute for the present bill; the substance of which he stated to be, that the Secretary of the Treasury authorize the sale of the bonds due from the Bank of the United States, (other than those for the first instalment,) provided they should not sell below par, which would amount to about six millions and a half; and if that should be impracticable, then that he borrow, on those bonds, six and a half millions, at an interest not exceeding six per cent., payable at any time after two years. He made a few remarks to show the probability that these bonds could be sold at par. As to the question of the constitutionality of Treasury notes, he held that it depended on the fact whether any fund was provided in hand on which to found their payment; without this, he contended they were but mere paper money, and, as such, unconstitutional.

Mr. RIVES now modified his amendment, so as to insert the words "not bearing interest."

Mr. HOLSEY, of Georgia, opposed the amendment, and argued the danger, or at least the possibility, of such notes going below par, and dwelt on the mischievous consequences to the country and to the Government.

Mr. McKIM said he was in favor of Treasury notes bearing interest, though he considered the security of the United States better than any other in the world. He had seen them, at one period of the late war, at a discount of 11 per cent.; but he did not believe that such would be the case now. He preferred notes to a loan, as it would be but for a year, and nobody would want to invest their money in stock which had so short a time to run. He thought it not right to offer to pay the public creditors in paper not bearing interest, nor did he desire the Government to encounter the odium of issuing paper money.

Mr. PHILLIPS reminded the committee that they were to look at all these several bills as but different parts of one connected system, and that the entire system was, in like manner, connected with and involved in each bill.

The question was not put on Mr. RIVES's amendment, to add the words "not bearing interest," and negatived: Ayes 56, noes 91.

The question was then taken on the amendment of Mr. UNDERWOOD, which he now offered in the following words:

That the Secretary of the Treasury be authorized to sell and transfer to the purchaser or purchasers the bonds or evidences of debt executed by the president, directors, and company of the Bank of the United States of Pennsylvania, for and in consideration of the stock held by the United States in the late Bank of the United States, and to apply the money arising from such sale and transfer, in payment of any demands upon the Treasury: *Provided, however,* That no sale and transfer of said bonds or evidences of debt shall be made for a less sum than the nominal amount of said bonds or evidences of debt, exclusive of interest.

Sec. 2. *And be it further enacted,* That if it be impracticable to sell said bonds, or evidences of debt, in the manner provided in the first section of this act, it shall be lawful for the Secretary of the Treasury, and he is hereby authorized, to borrow six million five hundred thousand dollars, on the credit of the United States, at an interest not exceeding the rate of six per cent. per annum, and to

H. of R.]

Treasury Notes.

[Oct. 4, 1837.]

apply the money so borrowed in payment of any demands upon the Treasury; and all money borrowed under the provisions of this section shall and may be repaid at the pleasure of the Government of the United States at any time after the lapse of two years from the time it shall have been borrowed.

When it was negatived: Ayes 80, noes 91.

Mr. DUNN, of Indiana, offered now the amendment he had before proposed, as follows:

"Including all balances owing by the late deposit banks, and all sums owing on duty bonds, whether such balances on bonds or Treasury notes shall, at the time of any such offer to pay, be due or not."

Mr. CAMBRELENG opposed this amendment. The Government might as well allow a merchant now to anticipate his bonds, by buying up depreciated paper and taking them up before they fell due. Let the notes be received when the debt fell due, and not before. The other arrangement might embarrass the Treasury.

Mr. ROBERTSON, of Virginia, suggested that if this amendment should be adopted, the United States Bank of Pennsylvania might pay the whole amount of their bonds to Government in that way.

Mr. FILLMORE supported the amendment, contending that it was the right of the creditor to set off Treasury notes, if he could get them, against his debt to the Government. This would hold out a strong inducement to all creditors of Government to take these notes, and they would thus be sooner brought into circulation.

Mr. DUNN insisted that the terms of his amendment excluded the United States Bank from availing itself of it, as suggested by Mr. ROBERTSON. The effect of his amendment would be to prevent the depreciation of these notes.

Mr. CAMBRELENG said the merchants would be left just as they were now; they could buy those notes and hold them till the time their debts to Government fell due. It would leave both the banks and the merchants precisely where they were now.

Mr. CHAMBERS, of Kentucky, went into a speech of some length, in which he animadverted, with severity, on the financial measures proposed by the administration, and insisted that it was very manifest that the object was to place the banks at the mercy of the Secretary of the Treasury, and eventually to crush them. He did not wish the bill to leave the hands of the committee till some security was provided against such a result.

He therefore moved to lay this bill and amendment aside for the present, and take up the bill to provide for the final settlement of accounts with the late deposit banks.

A question of order was raised by Mr. CAMBRELENG, but the motion, after some discussion, was decided to be in order.

The motion, however, was negatived: Ayes 78, noes 96.

The question was then put on Mr. DUNN's amendment, and decided in the negative without a count.

The question then recurring on the amendment of Mr. CAMBRELENG, (in fact upon the whole bill,)

Mr. WISE said he wished to take a "woodpecker's tap" on this "hollow beech tree;" he accordingly moved the following amendments to the bill:

That the President of the United States is hereby authorized to cause Treasury notes for such sum or sums as [he may think expedient] the exigencies of the Government may require, but not exceeding, in the whole amount of notes issued, the sum of ten millions of dollars, and of denominations not less than one hundred dollars for any one note, to be prepared, signed, and issued, in the manner hereinafter provided.

Sec. 2. *And be it further enacted*, That the said Treasury notes, authorized to be issued by the first section of this act, shall be reimbursed and redeemed by the

United States, at the Treasury thereof, after the expiration of one year from the dates of the said notes respectively; [from which said dates, for the term of one year, and no longer, they shall bear such interest as shall be expressed upon the face of the said notes; which rate of interest, upon each several issue of the said notes, shall be fixed by the Secretary of the Treasury, by and with the advice and approbation of the President; but shall in no case exceed the rate of interest of six per centum per annum.] The reimbursement herein provided for shall be made at the Treasury of the United States to the holders of the said notes respectively, upon presentment, [and shall include the principal of each note, and the interest which may be due thereon at the time of payment.] For this reimbursement, at the time and times herein specified, the faith of the United States is hereby solemnly pledged.

Sec. 3. *And be it further enacted*, That the said Treasury notes shall be prepared under the direction of the Secretary of the Treasury, and shall be signed on behalf of the United States by the Treasurer thereof, and countersigned by the Register of the Treasury; and that those officers respectively shall, as checks upon each other, and to secure the public safety, keep separate, full, and accurate accounts of the number, date, denomination, and amount of all the notes signed and countersigned by them respectively; which said accounts shall be carefully preserved and placed on file in the Treasury Department; and, also, similar accounts, kept and preserved in the same manner, of all the said notes redeemed, as the same shall be returned and cancelled; and the Treasurer shall further account quarterly for all such notes delivered to him for signature or issue by the Register. The Treasurer and Register of the Treasury are hereby authorized, by and with the consent and approbation of the Secretary of the Treasury, to employ such additional temporary clerks as the duties enjoined upon them by this section may render necessary: the compensation of each clerk so employed to be fixed by the Secretary.

Sec. 4. *And be it further enacted*, That the Secretary of the Treasury is hereby authorized, with the approbation of the President of the United States, to cause to be issued such portion of the said Treasury notes as the President may think expedient, in payment of debts due by the United States, to such public creditors or other persons as may choose to receive such notes in payment, as aforesaid, [at par,] on the face. [And the Secretary of the Treasury is further authorized, with the approbation of the President of the United States, to borrow, from time to time, not under par, such sums as the President may think expedient, on the credit of such notes.] *Provided*, That it shall not be lawful for the Secretary of the Treasury, or any disbursing officer of the Government, to pay out or circulate any Treasury note or notes, so long as there remains in the hands of such disbursing officer, or the Treasurer of the United States, any specie or other available funds: And provided further, That the whole amount, or so much of the five millions of dollars as by law is to remain in the Treasury for contingencies, shall be kept on hand in Treasury notes, until the exigencies of the Government shall render their use or circulation necessary.

Sec. 5. *And be it further enacted*, That the said Treasury notes shall be transferable, by delivery and assignment endorsed thereon, by the person to whom the same shall, on the face thereof, have been made payable.

Sec. 6. *And be it further enacted*, That the said Treasury notes shall be received in payment of all duties and taxes laid by the authority of the United States; of all the public lands sold by the said authority, and of all debts due to the United States, of any character whatsoever. And on every such payment credit shall be given for the amount [of the principal and interest, which, on the day of such

Oct. 5, 1837.]

National Bank.

[H. OF R.]

payment, may be] due on the note or notes thus given in payment.

Sec. 7. *And be it further enacted*, That the Secretary of the Treasury be, and he is hereby, authorized and directed to cause to be reimbursed and paid [the principal and interest of] the Treasury notes which may be issued by virtue of this act, at the several time and times when the same, according to the provisions of this act, should be thus reimbursed and paid. [And the said Secretary is further authorized to make purchases of the said notes at par, for the amount of the principal and interest due at the time of purchase on such notes. And so much of any unappropriated moneys in the Treasury as may be necessary for that purpose, is hereby appropriated for paying the principal and interest of said notes.]

Sec. 8. *And be it further enacted*, That a sum not exceeding twenty thousand dollars, to be paid out of any unappropriated money in the Treasury, be, and the same is hereby, appropriated, for defraying the expense of preparing, printing, engraving, signing, and otherwise incident to the issuing of the Treasury notes authorized by this act.

Mr. WISE remarked with severity upon the bill, as being but the commencement of the system of a Treasury bank. The system was to be presented not at once, but piecemeal. The first, and the largest stride was to familiarize the minds of the people with Treasury issues. The plea urged for this was the necessities of the Government; but an honorable gentleman from South Carolina had come out boldly the other day, and avowed his opinion that the Government ought to have a permanent paper circulation. Mr. W. entered his protest against a new public debt, and a Treasury bank. He compared the conduct of the administration to that of the famous Fanny Wright, who, after denouncing matrimony in the most unmeasured terms, was next heard of as Mad. Darusmont. So this Government was for a divorce from all banks; but the next thing heard of would be its marriage to the worst bank on the face of God's earth—a Treasury bank.

Mr. W. concluded a short, but animated speech, by moving that the committee rise.

The motion was negatived: Ayes 82, noes 89.

The question was then put on his amendment, and it was rejected.

Mr. CAMBRELENG, with a view to prevent the Bank of the United States from availing itself of Treasury notes to purchase its bonds to the United States, (which it would, if possible, certainly do, as it would be a profitable operation,) modified his amendment by adding, after the word banks "due when said Treasury notes shall be offered in payment."

Mr. DUNN moved as an additional section to the bill, a provision that the power of the Secretary of the Treasury to issue Treasury notes do cease on the 1st Monday of May, 1838; but it was rejected without a count.

Mr. FILLMORE wished to amend the bill by striking out the clause which provides a penalty for having in a man's possession paper similar to that used for the Treasury notes, with intent to counterfeit; but his motion was negatived after a short discussion.

Mr. DUNN offered to amend the bill by adding the following proviso:

Provided, however, That the late deposit banks, and persons indebted for duties on extended bonds, may pay the same at any time in Treasury notes, whether said debts, or such Treasury notes, are due or not at the time of such offer to pay.

Mr. W. C. JOHNSON moved to insert a provision that the power to issue Treasury notes cease on the second Monday of June, 1839, and seconded the motion by a short speech urging the importance of testing the question whether the measure proposed in this bill was temporary

and remedial only, or was to be a fixed and permanent system.

Mr. DUNCAN complained of the many occasions on which the friends of the administration were compelled to sit and listen to the taunts of the opposition, who were continually charging them with being under Executive influence, and so forth. He would admit that they acted together, and what of that? The friends of the Government had come here for the very purpose of acting together, to relieve the country from its present distress. But the opposition were continually raising the panic note, and yet did nothing towards relief. They not only refuse to act themselves, but they endeavor to embarrass and prevent others from so doing. Was it not but the other day, that one who claims to be a leader of the other side, [Mr. WISE,] told them "that he would offer nothing, and he hoped that none of the opposition would offer any proposition for relief?" Mr. D. then referred to the various measures now proposed, and contended that they were all calculated to afford relief to the banks and country at large. He referred to the short period remaining of the session, and earnestly entreated the opposition, that if they would not act themselves, at least to permit others to act for the benefit of the people.

Mr. W. C. JOHNSON rejoined with animation; when the question was taken and his amendment rejected.

Mr. GRENELL moved to amend the penal section of the bill, by supplying a manifest omission of the case of a man's having in his possession counterfeit Treasury notes, with the intent to pass them; but (owing, as was believed, to a misapprehension of the vote) it was declared to be negatived.

The amendment of Mr. CAMBRELENG, as amended, was then agreed to, and the committee rose, and reported the bill to the House; whereupon

The House adjourned.

THURSDAY, OCTOBER 5.

NATIONAL BANK.

After transacting some other business, the House passed to the unfinished business of yesterday, which was the consideration of the resolution reported from the Committee of Ways and Means, declaring it to be inexpedient to charter a national bank; and the question being on Mr. SERGEANT's motion to refer the resolution to the Committee of the Whole on the state of the Union,

Mr. BYNUM, who was entitled to the floor, said he had not risen on yesterday, so much with the intention of making a speech, as to express his hearty concurrence in the sentiments expressed by the honorable gentleman from Georgia, [Mr. GLASCOCK,] and the honorable gentleman from New York, [Mr. CLARK,] and he exceedingly regretted that it became the duty of the Chair to interpose and arrest the remarks of those honorable gentlemen, knowing that they would have been able to place the subject in a clearer point of view than it was in his power to do. He also rose to express his astonishment at the extraordinary course pursued by the gentleman from Pennsylvania, [Mr. SERGEANT,] in moving to commit the resolution to a Committee of the Whole on the state of the Union, after having been indulged by the House for three or four days in succession, in lecturing the House and administration, and eulogizing—almost delivering a funeral sermon over the corpse of the dead monster—the bank. After all this, it appeared to him strange that the gentleman should conceive it to be his duty, to the prejudice of those who feel it to be their duty to oppose a recharter of the United States Bank, to move to commit the resolution to the Committee of the Whole, thereby depriving them of the opportunity of defending themselves, or replying to the arguments adduced by the gentleman, because it is well

H. OF R.]

National Bank.

[Oct. 5. 1837.]

known that the rules prevent a member in Committee of the Whole from replying to arguments made in the House. He hoped the House would not adopt the motion made by the gentleman from Pennsylvania, for this reason: that these gentlemen had raised the hue-and-cry about the distresses under which the country was laboring; when, in his opinion, if there was any distress in this country, it had sprung from the action of that profligate and monstrous institution, the Bank of the United States. He believed it was the Pandora's box which had been the cause of all the complaints, all the evils, and all the distresses, of which we have heard so much on this floor. He hoped the question might be taken at the present session of Congress, so that the country might be put at rest in relation to it. Let gentlemen come up to the question, and toe the mark. Let the question be decided in the House, and not sent to the Committee of the Whole, where no vote can be taken on it, and where discussion will only add to the distresses which already exist. In his humble opinion, there could be nothing which would afford more solid and substantial relief than a decision of this House, that will show to those who make complaints of distress, and ring the changes on the word panic, that their favorite project is hopeless; that a United States Bank cannot be chartered by the Congress of the United States; and that it was in vain for them to be indulging themselves with the hope that it can. The sooner this was done the better it will be for the people of the country. In his opinion, if we intend to act in good faith to the people, and do any thing for the relief of the people of the country, and the distresses of that people, the very first thing we should do would be to determine whether the establishment of a United States Bank was to be expected by any party in the country; to settle and fix the question finally, so that the people of the country and the capitalists of the country might know what to do. He had no doubt that there was a great deal of capital now held up which would be invested in other business, if this question was determined; and why not determine it at once, and put it at rest? Gentlemen, in support of their motion to refer this resolution to the Committee of the Whole, say they want a discussion of the subject. Why, do they not know that it has been discussed from year to year for the last six years, throughout the whole country, and in both branches of Congress? Do they not know that it has been discussed in both branches of Congress at the present session, on almost every subject which has been brought forward? Have we not heard the ditties which have been sung in this House by the gentlemen from Pennsylvania, in eulogy of their favorite institution? And do gentlemen not know that this subject has been discussed until a large majority of the people of the country turn away from it with loathing and disgust? It has been decided at the ballot box that a majority of the people of the country were opposed to the establishment of a national bank; and he wished to be permitted to tell gentlemen that they mistook the intelligence, virtue, and patriotism of the people of the country, if they expect, by this protracted discussion of the question, to drive them from their opposition to a bank of the United States. It was in vain for them to expect to rivet the chains which had sprung from that institution, on the necks of the people; and the sooner the matter was decided, the better for the country, as it will put at rest all agitation and turmoil. The President of the United States has been accused of taking an extraordinary course, and of endeavoring to forestall public opinion, by the very consistent gentlemen of the opposition. He has been denounced and declaimed against by those who deal in declamation, for the extraordinary and high-handed course he has pursued; and it will be recollected by every gentleman here, that those who now denounce him for throwing out his opinions in advance, denounced him two years ago because of his non-committal-

ism. These gentlemen then said that he was non-committal on every thing—that he would never toe the mark—that he would never go in advance of public opinion, but always followed after it. Now, however, they say the President has introduced both reckless and extraordinary measures, and they denounce him for endeavoring to forestall public opinion. All these arguments and denunciations should be fairly met, and he would ask the gentleman from Pennsylvania, whether the friends of the administration would have the opportunity of answering him in Committee of the Whole? because the gentleman well knows it is against the rule to reply to arguments made in the House. He wished to see a direct and early vote upon this subject. The people of the country require it. They want to know what prospects there are for the recharter of a national bank, so that they may know what to expect. He did not believe that there was any gentleman in this House, who was inimical to the establishment of a national bank, who desired to avoid the question by referring it to the Committee of the Whole. Every individual who was at heart hostile to a recharter of the bank, must be disposed to keep the subject in the House, and not permit it to go to the Committee of the Whole, where it may be discussed to the end of the session without coming to any conclusion thereon. Gentlemen have talked a great deal about skulking and dodging questions; but, he would ask, who ever saw such dodging as there had been on this question? Gentlemen desired not only to dodge the question, but to dodge behind the rules of the House to save themselves from having their arguments answered, and their denunciations exposed.

It was easy to make assertions, but it was not so easy to prove them; therefore, gentlemen endeavor to shield themselves by having the subject referred to the Committee of the Whole. Let the American people see what party support a national bank; let them see their strength, and what prospect there is for them to succeed, and they will be satisfied. The farming and mechanical interests are now satisfied. Who, then, are making all these complaints? It is the bankites, the rag-barons, and the stock jobbers. These are the men who are endeavoring to render the Government unpopular with the people, and make them discontented with their country. The rapid strides which the bank is making for almost universal dominion in America, warn us of the necessity of letting the country and the world know its fate as soon as possible. We have heard but recently of this institution sending an agent to Europe, perhaps to interfere with our commerce. Every day admonishes us of the danger of the bank; and shall we longer sit by and encourage agitation, and add to its power of doing injury to the country? He hoped that the democracy of this House would give it as their opinion to the democracy of the country, and to the agricultural, mechanical, and laboring interests of the country, that it was inexpedient to establish an institution which had declared war upon the country, and stood out against the sovereignty of the people themselves. Let them know this, let the world know it, and we will hear but little of this distress which has been so long sounded in our ears. If, however, this subject is kept in agitation before this House and the country, the cry of distress, and panic, and confusion, will be kept up, the President will be denounced, and a bank of the United States will be held up as the only panacea for the country. Gentlemen could not suppose we are ignorant of the game they are playing. They tell us the time has not arrived for introducing the subject of a national bank. But what do they mean by this? They mean that they do not want it condemned; they do not want the true voice of the people spoken on this subject, because they know it would be against them.

He hoped that no one who was opposed to the recharter of this institution would hesitate in voting to reject the

Oct. 5, 1837.]

Sub-Treasury Bill—Treasury Notes.

[H. OF R.]

proposition submitted by the gentleman from Pennsylvania, to refer this resolution to the Committee of the Whole on the state of the Union.

Mr. CUSHMAN said that, believing every gentleman to have made up his mind on the question in relation to the expediency of chartering a national bank, and that the state of the public business would not permit of its further discussion, he moved the previous question.

Mr. HAYNES moved a call of the House, which was ordered; and the roll having been called over, and 195 members answering to their names,

Mr. MORGAN moved to dispense with all further proceedings under the call; which was agreed to.

The previous question was then seconded—ayes 83, noes 80.

Mr. REED called for the yeas and nays on ordering the main question; which were ordered, and were: Yeas 101, nays 101, as follows:

YEAS—Messrs. Anderson, Andrews, Atherton, Beatty, Beirne, Bicknell, Birdsall, Bouldin, Bruyn, Buchanan, Bynum, Cambreleng, T. J. Carter, Chapman, Claiborne, Clark, Cleveland, Coles, Connor, Craig, Crary, Cushman, Davee, Dromgoole, Duncan, Edwards, Elmore, Fairfield, I. Fletcher, Fry, Gallup, Gholson, Glascock, Grantland, Gray, Haley, Hammond, Hamer, Harrison, Hawkins, Haynes, Holsey, Holt, Hopkins, Howard, Hubley, W. H. Hunter, Ingham, T. B. Jackson, Jabez Jackson, Joseph Johnson, N. Jones, J. W. Jones, Kilgore, Klingensmith, Leadbetter, Logan, Arphaxed Loomis, J. M. Mason, McKay, A. McClellan, McClure, McKim Miller, Montgomery, Moore, Morgan, S. W. Morris, Noble, Owens, Palmer, Parmenter, Paynter, Pennybacker, Petrikin, Phelps, Pickens, Plumer, Potter, Pratt, Prentiss, Reilly, Rhett, Rives, Robertson, Sheffer, Shields, Shepler, Smith, Snyder, Spencer, Stewart, Taylor, Thomas, Titus, Toucey, Turney, Vanderveer, Wagener, Webster, T. T. Whittlesey, Jared W. Williams, Worthington, Yell—123.

NAYS—Messrs. Adams, Heman Allen, John W. Allen, Ayerigg, Bell, Biddle, Bond, Borden, William B. Calhoun, J. Calhoun, William B. Campbell, Chambers, Cheatham, Childs, Corwin, Cranston, Crockett, Curtis, Cushing, Darlington, Davies, Deberry, Dennis, Dunn, Everett, Ewing, Richard Fletcher, Fillmore, Rice Garland, Goode, James Graham, William Graham, Graves, Grennell, Hall, Halsted, Harlan, Harper, Hawes, Henry, Herod, Jennifer, Henry Johnson, William Cost Johnson, Lawler, Lincoln, Andrew W. Loomis, Marvin, Samson Mason, Maury, May, Maxwell, McKennan, Menefee, Mercer, Milligan, Calvary Morris, Naylor, Patterson, Pearce, Peck, Phillips, Pope, Potts, Rariden, Randolph, Reed, Rencher, Ridgway, Rumsey, Russell, Sergeant, Augustine H. Shepperd, Charles Shepard, Sibley, Slade, Southgate, Stanly, Stratton, Tillinghast, Toland, Underwood, A. S. White, John White, Elisha Whittlesey, Lewis Williams, Sherrod Williams, Joseph L. Williams, Christopher H. Williams, Wise, Yorke—91.

The CHAIR voted in the affirmative, so that the main question was ordered to be now put.

Mr. CLARK inquired if it would now be in order to move to lay the subject over until to-morrow.

The CHAIR replied that it would not be in order, the main question being ordered to be now put.

The main question was then reported as follows:

Resolved, That it is inexpedient to charter a national bank.

Mr. WISE called for the yeas and nays on the main question, which were ordered, and were: Yeas 123, nays 91, as follows:

YEAS—Messrs. Anderson, Andrews, Atherton, Beatty, Biernie, Bicknell, Birdsall, Bouldin, Brodhead, Bruyn, Buchanan, Bynum, Cambreleng, T. J. Carter, Casey,

Chapman, Cilley, Claiborne, Clark, Cleveland, Clowney, Coles, Connor, Craig, Crary, Cushman, Dawson, Davee, Dromgoole, Duncan, Edwards, Elmore, Fairfield, Isaac Fletcher, Fry, Gallup, Gholson, Glascock, Grantland, Gray, Griffin, Haley, Hammond, Hamer, Harrison, Hawkins, Haynes, Holsey, Holt, Hopkins, Howard, Hubley, William H. Hunter, R. M. T. Hunter, Ingham, T. B. Jackson, J. Jackson, Joseph Johnson, N. Jones, J. W. Jones, Kilgore, Klingensmith, Legare, Leadbetter, Lewis, Logan, Arphaxed Loomis, Lyon, Mallory, J. M. Mason, Martin, McKay, A. McClellan, McClure, McKim, Miller, Montgomery, Moore, Morgan, M. Morris, S. W. Morris, Muhlenberg, Noble, Ogle, Owens, Palmer, Parmenter, Patton, Paynter, Pennybacker, Petrikin, Phelps, Pickens, Plumer, Potter, Pratt, Prentiss, Reilly, Rhett, Rives, Robertson, Sheffer, Shields, Shepler, Smith, Snyder, Spencer, Stewart, Taliaferro, Taylor, Thomas, Thompson, Titus, Toucey, Towns, Turney, Vanderveer, Wagener, Webster, T. T. Whittlesey, Jared W. Williams, Worthington, Yell—123.

NAYS—Messrs. Adams, Heman Allen, John W. Allen, Ayerigg, Bell, Biddle, Bond, Borden, William B. Calhoun, J. Calhoun, William B. Campbell, Chambers, Cheatham, Childs, Corwin, Cranston, Crockett, Curtis, Cushing, Darlington, Davies, Deberry, Dennis, Dunn, Everett, Ewing, Richard Fletcher, Fillmore, Rice Garland, Goode, James Graham, William Graham, Graves, Grennell, Hall, Halsted, Harlan, Harper, Hawes, Henry, Herod, Jennifer, Henry Johnson, William Cost Johnson, Lawler, Lincoln, Andrew W. Loomis, Marvin, Samson Mason, Maury, May, Maxwell, McKennan, Menefee, Mercer, Milligan, Calvary Morris, Naylor, Patterson, Pearce, Peck, Phillips, Pope, Potts, Rariden, Randolph, Reed, Rencher, Ridgway, Rumsey, Russell, Sergeant, Augustine H. Shepperd, Charles Shepard, Sibley, Slade, Southgate, Stanly, Stratton, Tillinghast, Toland, Underwood, A. S. White, John White, Elisha Whittlesey, Lewis Williams, Sherrod Williams, Joseph L. Williams, Christopher H. Williams, Wise, Yorke—91.

So the House resolved that it is inexpedient to charter a national bank.*

The House then proceeded to the orders of the day.

SUB-TREASURY BILL.

The bill from the Senate, entitled "An act imposing additional duties in certain cases on public officers," was taken up on its reference.

Mr. CAMBRELENG remarked that, as this bill corresponded in almost all its provisions with the House bill under the same title, reported by the Committee of Ways and Means, and referred to the Committee of the Whole on the state of the Union, in order, therefore, that there might be no delay upon the action of this bill, and as there was only one slight difference between them, he had been instructed, he said, by the Committee of Ways and Means to move that this bill be at once committed to the same Committee of the Whole as the other.

The motion was assented to, *nem. dis.*

TREASURY NOTE BILL.

The House then proceeded to the consideration of the "bill to authorize the issuing of Treasury notes."

The bill had been amended entirely in Committee of the

* The following note appeared in the papers of the day:

The undersigned, having been casually absent when the question was taken this morning on the resolution "that it is inexpedient to charter a national bank," would, if they had been present, have voted in the affirmative.

Robert McClellan,
Henry Vail,
Anassa J. Parker,
John I. DeGraff,
Joseph Weeks,
James Farrington,

John Chaney,
Henry A. Foster,
R. Boon,
A. P. Grant,
Isaac H. Bronson.

October 5, 1837.

H. OF R.]

Treasury Notes.

[Oct. 5, 1837.]

Whole, and a substitute submitted by Mr. CAMBRELENG adopted.

Mr. RHETT moved to amend the first section by inserting in the second line, after the word "notes," the following: "or bills receivable in payment of the public dues;" and supported his amendment at some length, and went somewhat into the subject generally.

Mr. FLETCHER, of Massachusetts, said it was his intention not to take any part in the present debate, but looking at the character of the bill before them, and considering the circumstances in which they were placed with regard to it, he was not able to content himself with giving a silent vote upon the measure.

I consider it due to my constituents and due to myself, (said he,) briefly to state the reasons which will influence my conduct upon the present occasion.

The real object of the bill is, to borrow ten millions of dollars upon the credit of the Government; and, if it passes, its real effect will be, to impose a debt upon the country to that amount. To justify me in voting for such a bill, two things must be clearly established: 1st. that the wants of Government are so pressing as to render it necessary to impose on the people a debt of ten millions of dollars; 2d. that the method in which it is proposed to accomplish this object is a proper and suitable method.

I presume no one will call in question the correctness of my first position, or deny that the necessity of running the nation in debt must be clearly proved before any such step can be properly taken. The people will not look with favorable eyes upon the recommencement of a national debt; they will not consider it a light matter; such a measure can only be justified by necessity. If the Government has any pre-existing means to meet its wants, those means must be resorted to in the first place; and till those means are exhausted there can be no occasion for imposing a debt upon the people, nor propriety in doing so. Upon this point, how stands the fact? In the statement read to us by the chairman of the Committee of Ways and Means, exhibiting the resources out of which, in the course of the ensuing year, the proposed Treasury notes are to be paid and redeemed, he includes six millions due to the Government from the Bank of the United States; that is, there is due from the bank six millions of dollars, payable in three successive years, with interest, at six per cent., the whole of which it is intended to convert into cash, in the course of the ensuing year, to provide the means wherewith to redeem and take up the proposed Treasury notes. With these bonds of the bank in the vaults of the Treasury, for six millions of dollars, it is proposed to issue Treasury notes, pledging the credit of the country, and to meet and redeem those notes these very bonds are to be sold and disposed of. Pray, sir, where is the necessity, the advantage, or the propriety of this double operation? Undoubtedly the money which is wanted may as well be raised by the sale of the bonds now, as by the issue of Treasury notes. It is proposed that the notes shall bear interest—though the amount is not fixed in the bill—and shall be payable in one year. The bonds are upon interest at six per cent., and have a longer time to run than the proposed notes. The bonds will serve much better than the notes for foreign remittance, and undoubtedly would command a premium in the market. The notes are payable too soon, and, in other respects, not well fitted for foreign remittance.

Now, sir, I should be glad to hear some satisfactory reason why these bonds should not be sold at once, and the proceeds applied to the wants of the Government. Would not this be a better course, a more direct, a more judicious course, than to borrow money and impose a debt upon the country? Why accumulate these different funds in the hands of the Government? Why resort to such an involved and round-about plan of raising money? Why not go into the market with the bonds of the bank? Why sub-

stitute for them your own notes? To sell the bonds is a very simple and common operation, such as approves itself to every man's experience and understanding. If there are any reasons for the extraordinary course which it is proposed in preference to pursue, they have not yet been explained to my comprehension.

In addition to the bank bonds, there are some fifteen or sixteen millions of dollars belonging to the Government, still in the deposit banks. Upon this fund the Secretary has been in the practice for some time past of making drafts, which, though not paid by the banks, have been received for dues to the Government, and have gone into circulation, and have formed a part of the currency of the country. The drafts, as the Secretary of the Treasury informs us, have been found convenient to the Government and to the people. They have served to pay the debts of the Government to individuals, and of individuals to the Government. Why should not this process, a tried and successful process, be continued so far as may be necessary? Here is an actual existing fund, upon which we may draw, and upon which we may rely for ultimate payment. We are assured that these banks are amply solvent, and will pay, if not immediately, yet gradually, and in the end fully. This fund the Government can control and use; it has been and will continue to be under their management; and to issue these proposed Treasury notes is only accumulating fund upon fund in the hands of the Executive. This is in accordance neither with public policy nor approved practice. Nothing beyond the real wants of the Government can be properly supplied. If there be already means on hand to meet the wants of the Government, to accumulate new funds in their hands would be an outrage upon the rights of the people; it would be dangerous in principle, oppressive and unjust in practice.

Sir, I do not mean to make light or unfounded objections. Show me that the wants of the Government demand a loan, and I will go for a loan, heartily and sincerely; I should feel myself bound in duty and in conscience to go for it; but, until the necessity for it appears, I feel myself bound in duty, bound in justice to the people, to oppose it. Now, the necessity of imposing upon the country a debt of ten millions has not been made apparent to my mind; so far from it, the contrary clearly and distinctly appears. But, suppose the administration to have made out the necessity of involving the country in a debt of ten millions, still the mode in which they propose to effect that object is subject to strong objections.

The bill before us is indirect and deceptive; calculated to conceal the real nature and object of the measure which is proposed. It is entitled a bill to authorize the issue of Treasury notes. Why not call it a bill to authorize the employment of additional clerks? Or, a bill to punish forgery in certain cases? Both of which are just as much provided for in the bill as is the issue of Treasury notes; and either of which would just as well express the real object of the bill as the title which it bears.

The bill bears a false title; it carries upon its front a false name; it imports what it is not; or rather it does not import what in fact it is; it is deceptive. Wherever else designing artifice may prevail, let it not corrupt our legislation. Let us deal frankly and openly with the people. When we take their money, let us tell them so; let it be taken openly and avowedly, not covertly and indirectly. Take their money and tell them so; but do not pick their pockets!

When the people are to be subjected to a liability of ten millions, they should be informed of the fact clearly and distinctly; there should be no concealment in word or thought. The bill before us is, in truth, a bill to authorize a loan of ten millions. What we want is a loan; and we ought in fairness and truth to say so. To call the bill by a name that does not fairly import its character; thus

Oct. 5, 1837.]

Treasury Notes.

[H. OF R.]

to treat it as something different from what it really is, does not comport with what ought to be the character of the Government.

We have already, sir, passed a bill entitled an act to postpone the fourth instalment of deposit with the States. I fear, sir, that bill raises expectations only to disappoint them. That payment, if it were really intended, might as well be made now as ever. I fear, sir, the States will expect it in vain. Postponement, in all probability, will turn out to mean repeal. The expectation of payment at a future time will prove, I apprehend, a delusive expectation. Sir, I protest against duplicity in any form, on the part of the Government. The relation which we sustain towards the people demands from us the strictest truth and sincerity. They have placed confidence in us; they have entrusted to us their rights and interests; and they have an undeniable claim to be informed fully and clearly, without disguise, as to every thing we do, and every thing we intend. The title and the form of this bill are calculated, in my opinion, to disguise from the people that we are borrowing money upon their credit; and, in that point of view, the bill is obnoxious to serious objections.

There is another objection, which must press with great weight upon those gentlemen who hold to a strict construction of the constitution, who hold that Congress has no powers except those expressly granted to it. Those gentlemen, who cannot find in the constitution any power to charter a national bank, where do they find the power to issue Treasury notes, or bills of credit; for Treasury notes, designed to circulate as currency, are neither more nor less than bills of credit? No such power is any where expressly granted.

The framers of the constitution had seen and felt the evils of Government paper money. The power to issue bills of credit was expressly withheld from the States; it was not expressly given to the General Government. How, then, does the General Government obtain it? It will be said that it is included under the power to borrow money. Let us see how that interpretation will answer.

No one will deny to the several States the power to borrow money—a power which they exercise every day without objection. But it is certain that the States cannot issue bills of credit. The power to borrow money, then, does not necessarily include the power to issue bills of credit; and, although the Government has undoubtedly the power to borrow money, that power to borrow does not, by any means, necessarily imply a power to issue bills of credit. I found this argument upon the views of those gentlemen who hold to a strict construction of the constitution, without intending to express any opinion of my own upon this constitutional point. The only exercise of this power by the General Government occurred during the late war with Great Britain. The Government, in the first place, endeavored to obtain a loan in the usual way. The attempt failed; the loan could not be obtained; and, as a matter of necessity, the Government resorted to a forced loan, by the issue of Treasury notes. An example at such a time, and under such circumstances, is rather to be avoided than to be followed.

There is still a further objection to this measure. The bill provides that the notes to be issued shall bear such interest as the Secretary of the Treasury shall determine. This omission, to fix the amount of interest leaves the character of the notes wholly indeterminate and uncertain. The interest which they may bear will determine the character and office of the notes. They may be of a character to be taken up as an investment by capitalists; they may be of a character to circulate as currency; and which of these characters they will assume, depends upon the interest they may bear. Before I can vote for the bill, this point must be determined. Before I can vote for the notes, I must know what the notes are to be. I cannot agree to

the passage of any bill the nature of which is not fixed and established by the bill itself. It would be to act blindly and inconsiderately, to vote for a measure in ignorance of what that measure is to be. Should the bill pass in the present form, and should I be inquired of what its effect upon the community was anticipated to be, I could give no answer. I could express no opinion on that point, because, in the present shape of this bill, it is impossible to form any opinion what character the notes will assume. I could only say, what I should be ashamed to say, that the Executive had been authorized to issue notes to suit the purposes of the Government, without any regard having been paid to the concern which the community at large might have in this matter. If we are to act with the slightest regard to the interest and convenience of the public, we should fix the interest which the notes are to bear. Why refer this to the Executive? Is not the House competent to form and exercise a judgment on this question? Is not the House as fit as the Executive to determine what rate of interest, what character to the notes, will best subserve the public interest? If it be best for the Executive to legislate upon this point, why not upon all others? Though the Executive, in fact, exercised such a power, it would hardly be necessary to make a public proclamation of it.

The earnestness with which the friends of the administration press this measure of issuing Treasury notes, in preference to the usual mode of supplying the wants of the Treasury by a simple loan, is well calculated to excite suspicions. I have no desire to throw any undeserved odium upon the administration. I wish them to merit, and, by meriting, to possess the confidence of the entire community. But this measure is little calculated to produce that effect. It is an unusual measure; it will be attended with extraordinary expense; it will add to the number of those in the employ of Government; it will increase Executive patronage; it opens a new door to Executive favoritism. In raising money upon these notes, the Executive may give a preference, and may consult the interests of favored individuals; whereas a loan would be open equally to all.

Besides, sir, there are those who see in this measure the commencement of a permanent and a most perilous system. It is more than surmised that the Government would be willing to have the whole currency of the country flow exclusively from itself; and is desirous to furnish not only the gold and silver coin, but the whole paper currency also, from its own exclusive mint; and that the measure now proposed is the first step in the march towards that object. The taking measures to render safe and convenient such currency as the people may elect to use, is the business and all the business of the Government in relation to this subject. It should be kept strictly within the limits of that duty, and should faithfully perform what belongs to it within those limits. They ought to follow public sentiment in this matter, not attempt to lead it.

But strange and dangerous doctrines have been put forth in relation to the currency of the country; and there is cause enough for alarm to render it the part of prudence to watch with care every measure bearing upon this subject. The issue of paper money is at all times a dangerous business for a Government to engage in, and a business peculiarly dangerous at the present crisis. Our time is now too short, our action too hurried, to justify us in adventuring upon a scheme of a novel character. At such a time, and under present circumstances, the only safe way is the old way—the common way. If the Government must have money, let it borrow the money in the usual mode. So doing, we shall know what we do. To the adoption of this course, I have heard no substantial objection, I can see no substantial objection; and, until I can obtain some new light, it is the only course to which I can give my assent.

A great change has come over our national affairs. At

H. OF R.]

Treasury Notes.

[Oct. 5, 1837.]

the commencement of this present year, there was in the hands of the Government a surplus of nearly twelve millions of dollars, exclusive of the whole amount to be deposited with the States. The fourth instalment of the deposit money (between nine and ten millions) has been withheld from the States; there is due to the Government from the late United States Bank six millions, exclusive of interest; and now ten additional millions are demanded, to meet the expenses of the current year; and this, too, besides all the ordinary revenues of the country—a country, whose whole annual expenses during the administration next preceding that of General Jackson were hardly twelve millions of dollars!

Under circumstances like these, does it not behoove the people to look to their public affairs?—to look to them at once?—to look to them now?—to look to them coolly and dispassionately, with minds free from the influence of party spirit, and with a sincere and honest desire to preserve in its purity and excellence our free constitution, and to promote the prosperity and happiness of the people as well as of the Government?

Mr. CUSHING said it would be idle for him to think of adding any thing to the force and clearness of the observations of his colleague, [Mr. FLETCHER;] but one of the remarks made by that gentleman had recalled to his recollection a curious fact, bearing upon the question at issue, which he begged leave to state to the House.

It would be remembered, that one of the main arguments of those gentlemen who deny the constitutionality of a national bank, is the consideration that the power to establish such a bank is not *expressly* given to Congress in the constitution; that it is what is called a constructive power; and that a proposition was made in the convention which framed the constitution to confer on Congress power to create corporations, and rejected.

Now (said Mr. C.) the analogy between this question of a national bank, and that of bills of credit, is perfect in all its parts. There is no express power in the constitution for Congress to issue bills of credit. It is a constructive power, just as much as the power to establish a national bank; and Mr. Pinckney, of South Carolina, proposed, as may be seen by the printed journal of the convention, that, in the enumeration of the powers of Congress, one clause should read thus: "To borrow money and emit bills of credit." This latter branch of the proposition the convention rejected: the actual provision as to loans being in these words: "To borrow money on the credit of the United States."

Mr. C. said that, without himself admitting the conclusiveness of the arguments adverse to the constitutionality of a national bank, he did not see how those who did entertain that view of the constitution could consistently support a law for the emission of bills of credit.

Mr. PARMENTER addressed the Chair as follows:

Mr. Speaker: I have listened with great interest to the observations of my honorable colleague who has just taken his seat, [Mr. FLETCHER;] as I always have elsewhere, when I have had an opportunity, from my great respect for his high moral worth and distinguished talents; but, entertaining somewhat different views from those presented by him and other gentlemen on the same side of the question, I will, with your leave, state the grounds upon which I dissent.

My colleague assumes two conditions which he considers as indispensable prerequisites to the propriety of supporting the bill under consideration, which are: first, that the Treasury is in need of the money; second, that the proposed mode is the best one for raising the money. On the importance of establishing these points, I agree with him, and shall endeavor to show why I consider the present bill necessary, and the best calculated for the convenience both of the Government and the people.

It has been remarked by several gentlemen during the debate, but not by my colleague, that they did not clearly comprehend the report of the Secretary of the Treasury, and they have avowed their inability to come to any definite conclusion as to the real state of the Treasury. This opinion was expressed and urged, immediately upon the report being laid upon our table, by members usually ardent in their political predilections and prejudices, quite as soon as it could be expected that so voluminous a document, embracing views of finance and public policy, as well as various statistics, could be examined.

Having long entertained the most favorable impressions of the superior talents of the Secretary of the Treasury, whose ability and assiduity in the duties of his high stations have been almost proverbial in the nation for many years, I read his report with great attention, and discovered, as I thought, a plain, lucid, and perspicuous view of the finances of the country. I put down, therefore, in my own mind the attacks upon him as the effusions of political opposition, without any more meaning than the general dissatisfaction of those who disagree with the present administration. I am the more confirmed in this impression, because, since the first few days of this session, after an opportunity of full examination, all this hostility to the report of the Secretary has ceased, and it appears to me to be generally considered a correct, able, and interesting exposition of the finances and financial concerns of the country. I find by this report that there will be, in all probability, at the end of the year 1837, if there should be no deductions from the outstanding appropriations, a deficit of about twenty-two millions of dollars; but if, as the Secretary of the Treasury supposes, fifteen millions of dollars of unexpended appropriations may pass over to the year 1838, then there would be an absolute deficit of seven millions of dollars, to meet which, and for contingencies, and for the purpose of having a balance in the Treasury on the first of January, 1838, this bill proposes an authority to the Treasury Department to issue ten millions of dollars of Treasury notes. This amount would have been nineteen or twenty millions of dollars, if the payment of the fourth instalment of the surplus revenue had not been postponed to January 1st, 1839; and it will be seen by the conditions of the postponement bill, that the Treasury is entirely cut off from getting back any of the twenty-seven millions distributed among the States, which by the original law the Secretary would have had a right to call for.

Now, sir, my respected colleague would appropriate the nine and a half millions in deposit banks, and four and a half millions standing to the credit of disbursing officers in said banks, or as much as may be necessary to meet the wants of the Treasury. If this could be done there would, of course, be no need of issuing Treasury notes. But have we not a bill now before us, giving the deposit banks from four to nine months for the payment to the Government of the balances due? Is it not agreed, on all hands, that the security of the debt, the welfare of the people of the States interested, require an accommodation? Has not one of the Representatives of a State in which two of the deposit banks, having a large balance, are located, said on this floor that it would be impossible for the banks to pay within the time proposed by the bill now before us, and that he should ask for more time? Is there the slightest doubt in this House that the bill from the other branch, now before us, must pass, or, if amended, by showing greater indulgence? This resource will then fail. As to the amount of four and a half millions in the hands of disbursing officers, there must always remain from three to five millions of dollars in their hands. All experience has shown such amount to be necessary. These sums are drawn to pay contracts actually fulfilled, and always belong to the creditors of the Government, and are, of course, entirely useless for a supply to the Treasury. Unless the operations of Government totally

Oct. 3, 1837.]

Treasury Notes.

[H. OF R.]

stop, it must be obvious that there always will be some few millions of dollars in the hands of the disbursing officers of the army, navy, Indian department, and other objects of expenditure, awaiting the call of creditors of the Government. He also thinks that it would be proper to sell the bonds of the United States Bank of Pennsylvania, which are held by the Treasury Department. It appears to me that there are to this proposition several objections. I am not certain that it would be exactly proper to put those bonds into market. It might, by possibility, have an injurious bearing upon the institution. If so, it ought not to be done, as an act of justice. It is not like an ordinary mercantile transaction. The directors of the bank undoubtedly had some object in view in fixing annual payments, and I hope the Government will never give a cause of complaint to this institution of the slightest character. Where will these bonds be sold? My own opinion is, that the bank would purchase its own bonds. It appears to me it would be unwilling to multiply and vary its obligations in the stock market. It has already post notes on the London Exchange; and, it appears to me, it would be unwilling to have these bonds there. If, then, these bonds should now go into the market, and the bank should think proper to purchase them, the debtors of the bank must necessarily be called upon, and thus distress the commercial and trading community to that amount. If sold in Europe, (London most probably,) it would, to the amount of six millions of dollars, afford facilities for again over-trading, instead of being employed to relieve our own country. I do not believe that at this time there is a very large unpaid amount of good debts from American to English merchants. The fall in exchange and specie shows that it is very much diminished, and, it appears to me, we ought to avoid any course which would tempt to excesses in our foreign importations in the slightest degree. But the objection of substituting the sale of these bonds for the Treasury notes is still greater in another view. It is an object to make this issue of Treasury notes incidentally beneficial to the community, by furnishing a means of remittance, and one of a very valuable character. The Treasury notes would flow from the disbursing points to the communities who may want them for remittances. The West and South would receive them in payment of debts, or for the sale of their cotton and other great products, as well as for lands held by individuals and companies. They would find their way back to the Atlantic cities, forming a highly valuable circulating medium perhaps until the time arrives, which cannot be very far distant, of a resumption by the local banks of specie payments.

It has been argued that it would be preferable to authorize a loan in the form of certificates of stock. This appears to be liable to as exceedingly strong objections as any which would apply to the sale of the bonds of the United States Bank. So far as it relates to the incidental benefit to the commercial community, it would be a sluggish operation. The stock would be all taken in the large cities, and the proceeds pass directly to the Treasury, where it would remain until called for by the Government creditors, and perform none of the offices of a means of remittance. But my colleague and other gentlemen say, you do not need Treasury notes, because you can continue to make Treasury drafts, and they will hereafter answer as they have heretofore. If these drafts were, in every particular, as beneficial as Treasury notes, they would be objectionable, inasmuch as they go to the world with the stamp of dishonor upon their face; they carry with them, as they pass from hand to hand, an indelible record of the discredit of the bank upon which they are made, and are therefore to be shunned and discarded as soon as possible, as offensive to the merchant, who has a just sense of the importance of credit and punctuality. They are, moreover, inconvenient in amount, and unsuited to the habits and usages of the people.

My colleague objects to the bill, because no rate of interest is specified; and he cannot give it his vote until he knows precisely what the obligations of the Government are to be. It appears to me that this is one of the most valuable provisions of the bill, because the rate of interest can be so fixed all the way from a very low rate to the maximum of six per cent. that the Secretary of the Treasury will put it at the most advantageous rate for the Government and for the community. And it appears to me the rule would be a very plain one, to place the rate so that they would not be hoarded by the capitalists, or fall below par in the market, however small the demand for Government dues. And although, as has been strongly urged, there is very small probability that, under almost any circumstances, they would be below par, yet it is better, in my judgment, to leave the whole matter to the discretion of the Secretary of the Treasury, who will understand best what the wants of the case may require.

It is objected, that the issue of Treasury notes is unconstitutional; that they are bills of credit, and prohibited by the constitution of the United States; that they were never issued in but one instance, and that during the war with Great Britain, when it was difficult or almost impossible to obtain a loan. If it were unconstitutional to issue Treasury notes, the fact that we were at war, and it was difficult to obtain a loan in any other manner, would not have made it constitutional. I come to the conclusion myself, that Treasury notes were issued at that time for the same reason as now, because they are the most convenient to the Government and the people.

I have not entertained the opinion, Mr. Speaker, that the present embarrassments of this nation have arisen from what may be properly called general distress. I believe, and think I shall be sustained in the opinion by the sentiments of many men of business in the commercial cities, that the stoppage of specie payments was owing to the alarm excited in the community, which caused a rush upon the banks for the precious metals, and thereby materially lessened their means, and by the imprudence and extended speculation into which the debtors of these institutions plunged. Had it not been for these circumstances, the suspension would not have taken place; and, but for them, before this time specie payments would have been resumed. It is true that the consternation was universal; the panic was overwhelming; but that the evil was not deep-rooted, and that there was not, in reality, a scarcity of the precious metals in the commercial world, is shown by various facts. Contrary to the expectation of most persons in this country, the Bank of England continued, and still continues, specie payments, and money is abundant, and there is no want of coin and bullion for all purposes. The speculations and investments in lands, amounting to many millions of dollars; engagements in novel manufacturing concerns; building of railroads in all parts of the country; and establishments of every variety which ingenuity could invent—a few of them useful and profitable, but many, very many, most sorrowfully ruinous in their results—all tended to produce the mischief. The ordinary means of the banks were probably equal to their liabilities; but the inability of their debtors, in consequence of their imprudent and indiscreet course, crippled these institutions, and brought on the calamity of a suspension of specie payments—an evil which, while it continues, will blight every effort of enterprise and industry.

The amount of specie within the control of the banks of the country was equal to their wants, greater than it has been in many instances and at many times; but unsafe and improvident men obtained access to their resources; not that I mean to censure the managers of the moneyed institutions more than I would individuals, and copartnerships, and corporations, for everybody was infected with the mania of speculation; the whole atmosphere of the

business world was filled with it. It drove people to the pine forests of Maine; to the town sites on the Gulf of Mexico; to every stream and river through the whole republic; to the new cities of the West; and to the engagements in manufactures, mechanic arts, and discoveries of all kinds, in most instances lamentably unsuccessful.

My colleague objects that the bill is deceptive; that, under the guise of authorizing an issue of Treasury notes, it effects a loan. It undoubtedly is a use of the credit of the country, to obtain means of extinguishing some of its liabilities, and in that sense is a loan. But there is no deception about it. Notes payable are never issued in money transactions, excepting for the purpose of substituting credit for money, or promising it, and therefore always, directly or indirectly, operate as a negotiation for a loan. What difference does it make as to the matter of borrowing, whether the money be obtained by one person of a third, and paid to a second one, or the note be given directly to the second person? In both cases it is obtaining means on loan; in one instance directly, in the other indirectly. Banks borrow continually, by their bills or notes, money of the community. Now, sir, as Treasury notes can be issued for no other purpose than to procure money or means on the credit of the United States, the bill cannot be deceptive, because, as it can have no other object, every body understands it.

I am in favor of the bill as it now stands, without any of the proposed amendments, particularly those which propose the sale of the bonds of the United States Bank of Pennsylvania, and to the striking out the provision authorizing the Secretary to pay interest when, in his opinion, the good of the country may require it. It certainly appears to me that there can be no possible objection to that provision. It will guard against the possibility, although I admit it is not a strong probability, that they will be at any considerable discount, under ordinary circumstances. But we all know the nice calculations of dealers in money; and I should be exceedingly sorry to hear the cry, which has so frequently sounded in our ears, of depreciated currency applied to any of the issues of the Government.

I have confined myself strictly to the consideration of the bill now before the House, which appears to me to be so absolutely necessary, that it is almost a matter of surprise that so much time should have been employed in discussing it. It is called for by the Government to enable them to comply with the requisitions of the public, and it is required by the people, as being the best mode by which their interests can be subserved.

The other bills before the House, for deferring the payment of the bonds due from merchants and granting additional credit, as well as giving a credit on cash duties, it is universally conceded will pass, and I trust with few dissenting voices. For one, I feel strongly disposed to afford every facility, and practise every forbearance, which the most liberal legislation will warrant; and it would seem that the administration, whose friends are so generally in favor of this forbearing course, and who are so willing to grant every indulgence to those who have the funds of the Government directly in their possession, or indirectly by want of punctuality in their own obligations and liabilities, should not be unnecessarily embarrassed in their measures, but should be met in a kind spirit by their opponents.

I have no fears in common with some gentlemen that the issue of a limited amount of Treasury notes, for the present relief of the immediate wants of the Treasury, involves any objectionable principle. No apprehension was felt when the issue to a very great amount was made during the war with England, and it appears to me that the imagination must be exceedingly active which can discover danger in this simple process of anticipating the future means of the Treasury by a convenient and beneficial financial operation.

Mr. CROCKETT addressed the Chair as follows:

Mr. Speaker: I hope, sir, the House will not think me impertinent or obtrusive when I ask their indulgence but for a few moments, to submit some few remarks in justification of the vote which I feel it to be my duty to give upon the bill now under consideration. After so much has been said upon this subject, either directly or indirectly, perhaps I may not hope, sir, to cast any new light upon it, or to place it in any point of view in which it has not already been considered. But when I consider the pledges I am under to my constituents, and the very extraordinary course of measures which has been recommended by the administration, I cannot permit this occasion to pass without, at least, making a general exposé of my views, in order that my constituents and the country may see upon which side of the "fence" I stand in relation to these great and important questions.

Sir, I was one of those who used all honorable means to prevent the election of the present Chief Magistrate of this nation to the distinguished and exalted station which he now occupies. But, sir, I do not entertain any bitterness of feeling towards the President; nor did I come here as a representative of the people determined to oppose his administration, right or wrong, or to throw obstacles in the way of its success. On the contrary, it was my firm purpose to divest myself of the shackles of prejudice, and sustain the administration in every measure which I might believe calculated to advance my country's prosperity, and fearlessly to condemn and resist whatever would, in my judgment, tend to produce a contrary result. And this is still my determination.

Sir, the Congress of the United States has been convened under extraordinary circumstances. We are assembled in obedience to the proclamation of the President, to take into consideration "great and weighty matters," which claim our attention. And we find ourselves surrounded by a state of things, in my humble opinion, unprecedented in the annals of this country. I must beg leave to differ most materially from the honorable gentleman from Massachusetts [Mr. PARMENTER] who has just resumed his seat. He tells us there is no general distress in the country; that it is confined to a few individuals, and the merchants in the large commercial cities. But, sir, it would seem to me that we have before our eyes the most incontestable evidence of the deepest pecuniary distress and embarrassment in every quarter of this Union. So far as I have heard, no section is exempt, save the district of the honorable gentleman from Ohio, [Mr. DUNCAN,] who declared on this floor, not many days since, that none had been felt or experienced there. And, sir, I apprehend this exception stands "solitary and alone." We find our currency most awfully deranged—every branch of industry and enterprise prostrate—public confidence withdrawn—commerce and trade suspended, and universal bankruptcy and ruin staring us full in the face. These things, sir, are acknowledged to exist, and are brought to our view, and their causes assigned, in the message of the President. Whether he has given the true causes, I will not here stop to inquire; but, be that as it may, the evil is upon us, and all eyes are turned upon Congress with the most intense interest and anxiety, to see what measures of relief will be adopted. And, sir, what relief are we about to extend? In the very first paragraph of the message, the most deranged and embarrassed state of the finances of the Government is brought to our notice; and, in the second, we are told that, owing to the increased embarrassments in the pecuniary affairs of the country, the public revenue would be so far diminished, that the accruing receipts into the Treasury would not, with the reserved five millions, be sufficient to defray the expenses of the Government until the usual period for the meeting of Congress. And, sir, although this increased state of embarrassment in the pecuniary affairs of the country is acknowledged to exist, yet

Oct. 5, 1837.]

Treasury Notes.

[H. of R.]

a system of measures has been recommended, and has been brought forward by the Committee of Ways and Means, all having in view but one single object—the relief of the Government.

With this view, sir, it is proposed by the bill now under consideration to clothe the President of the United States with authority to cause to be issued ten millions of dollars in Treasury notes, to meet the exigencies of the Treasury; and for the redemption of which the faith and credit of the United States are to be solemnly pledged. This, then, sir, is the “great and weighty matter” which we have been assembled to consider! It is a “great and weighty matter” that the Treasury should be replenished, so that the office-holders may get their pay. But the distress and embarrassment of the community seems to be a matter of minor importance, and of but little concern!

Sir, it has been urged by honorable gentlemen that this is a measure of relief to the country; that it will supply the country with a circulation and a medium of exchange; and I grant that it might offer some temporary relief; but, sir, I believe it would tend, ultimately, to aggravate the disease. So far from being a measure of permanent relief to the people, I believe it is the entering wedge to an institution almost as odious as the Spanish Inquisition. I mean, sir, a Treasury bank. In fact, if the amendment of the honorable gentleman from South Carolina [Mr. Rætt] be adopted, a Treasury bank of issue and deposit is at once established.

Sir, instead of showing any disposition to grant relief to the people, we are called upon to increase their burdens. We are about to heap upon them another national debt, (for, disguise it as you will, it is nothing less, and has been so admitted on all sides,) to the amount of ten millions of dollars, to relieve the Government; while the people are told, substantially, that they need not expect any relief; that it is the business of the Government to take care of itself; and that it has no power to intermeddle with the concerns of individuals! The Government, after having tampered with the currency until it is ruined and annihilated—after having prostrated every branch of industry and enterprise, the commerce and credit of the nation, by practising wild and visionary experiments—cuts loose from the people, and tells them it has no power to grant them relief, or interfere with their concerns! They are to be dismissed with a lecture on economy. Yes, sir; they are contemptuously told that they are to look to their own industry and frugality for relief, without the aid of the Government! Sir, this reminds me of the language of Job's comforters. We read in Holy Writ that on a certain occasion Satan was permitted by the Almighty to try an “experiment” upon the firmness and integrity of “Job, a perfect and an upright man, one that feared God and eschewed evil;” that when, by the power of this arch enemy of the peace and happiness of man, Job's fortunes, and his children, and every thing calculated to render him happy, had been driven to the four winds, and he was reduced to beggary and ruin; when, in addition to this, “he was smitten with sore boils from the crown of his head to the sole of his foot,” and was groaning under the bitterest agonies of human affliction; when, in short, by one calamity upon the heels of another, he had been reduced from the highest state of prosperity and happiness, to the lowest depths of degradation and misery, and was wont to roll himself in the ashes upon his hearth, there was but one resource left upon earth to which he could look for consolation and solace—and that was his wife. And when he cried out to her in the bitterness of his soul, what was her reply? She told him he had better “curse God and die!” And, sir, pretty much in keeping with this is the President's consolation to the people in their afflictions.

Sir, do you imagine the people expected to hear such language as this from those to whose interests they have

shown so much devotion? Did they expect their rulers to mock at their calamities, which they themselves had been instrumental in bringing upon them? No, sir; they looked to those whom they had placed in power to devise some means to relieve them from their calamities. The proclamation of the President was hailed with joy by thousands as a favorable omen. They hugged to their bosoms the delusive hope that their rulers had seen the folly of their course, and were about to retrace their steps. Sir, although the President was pledged to “tread generally in the footsteps of his illustrious predecessor,” yet, I imagine no one believed he designed to tread specially in his footsteps. And it was hoped that if he did tread in his footsteps at all, he would take his “back track,” (if I may be allowed to use a hunter's phrase,) at least in relation to the currency and the revenue. But in all this how sadly are we disappointed! So far from this, we find him disposed to plunge still deeper into new and untried experiments! Sir, what do we behold? The whole country involved in one wide-spread ruin, and the Government itself bankrupt; and we are yet to have another “experiment!” Yes, sir, the State bank experiment has failed, and the golden bubble has exploded, and left a wreck of ruin in their train; and now, sir, in obedience to the mandate from the Hermitage, we are to have the Government divorced from all existing banks, and wedded to a new and untried system of sub-treasuries, or, in plain language, a Treasury bank. Sir, we find that the ex-President is not content with having dictated to the people whom they should choose to be his successor, but seems now determined to dictate to that successor. I had hoped, Mr. Speaker, that, as the President had attained the summit of his wishes, he would kick from under him the ladder by which he had ascended, and take the dictates of his own judgment as the man of his counsel; but, sir, mortifying as it may be, we find the message the exact *fac simile* of certain letters not long since addressed to the editor of the Globe, and published in that print.

Mr. Speaker, I shall not now undertake to discuss the sub-Treasury system; but, sir, I will say that, unfortunate as has been the result of former experiments upon the currency, I am bound to believe that this new project must prove much more fatal, if adopted. It is not only calculated to heighten the pecuniary distress with which the country is now surrounded, by bringing discredit and ruin upon all local banks, and all who are interested in them, or indebted to them, but will add tremendously to the patronage of the Executive, which I think is already much too great. My friend from South Carolina [Mr. Pickens] told us a few days since, in his answer to this argument, that he treated all such charges with “the most sovereign contempt.” Sir, let me tell that honorable gentleman that it is easier to dispose of some matters by treating them with contempt than in any other way. In what, sir, does Executive patronage consist? I answer, in the power of appointment and removal from office, and the disbursement of public moneys. The President would have the right to appoint and remove every officer who would have any thing to do with either the collection or disbursement of the public moneys, and consequently it would place directly under his control every dollar of the public revenue, and thereby unite the sword and the purse of this great nation in the hands of a single individual. Sir, we have had a little experience upon this point, in the removal of the public deposits from the Bank of the United States; and with this accumulation of power the President might trample under foot the right of suffrage—the most sacred ever guaranteed to freemen—and designate his successor with impunity, if he chose to follow the precedent already established. Sir, the liberties of this country were too dearly bought to be committed to the keeping of any one man, no matter how pure and unsuspected he may be. “Gold is corrupting,”

H. OF R.]

Treasury Notes.

[Oct. 5, 1837.]

and power is tempting. It can never be done, sir, with my consent. And, besides, as I humbly conceive, the public moneys would be much less secure. The public revenue is to be taken from the custody of all banks, and committed to the keeping of some ten or eleven thousand individuals, scattered throughout the United States. And, sir, although we have recently heard much said about the unavailable funds of the Government, I venture to predict that, if this new experiment be adopted, we have not heard the last of it. We have had an item of this description, in the annual report of our Secretary of the Treasury, for many years; and I fear, sir, that under this new organization of that Department, it will not require a great while to add a much larger item to the account, from the failures and defalcations of sub-treasurers.

Mr. Speaker, in order to remedy the evils which now afflict this country, I am for commencing the work where they originated. Let us, sir, in all due charity, instead of charging the whole of these misfortunes to the account of the people, at least charge one-half of them to the maladministration of the Government; and, although it is not recommended by the President, let us commence economizing a little on the part of the Government, and set a praiseworthy example before the people. I have always heard it remarked that example was much more forcible than precept. Let us, sir, instead of creating a national debt, in order to keep up an extravagant and prodigal system of expenditures which has crept into the Government, commence the business of retrenchment and reform which was promised us a few years since, and adopt some measure of general and permanent relief to the community as well as to the Government; and then, sir, and not until then, may we hope to see better times, and cease to hear the complaints that are now continually saluting our ears from the tens of thousands of honest, industrious citizens who have been thrown out of employment and reduced to beggary and ruin during this age of experiments.

Sir, I deem it unnecessary to detain the House with any calculations to show the state of the Treasury, in order to prove that the passage of this bill is not required to supply a deficit in the Treasury, as contended for by the friends of the measure. It has already been shown to this House conclusively, to my mind at least, that, by withholding the fourth instalment of the surplus revenue from the States, and suspending certain appropriations for useless—nay, worse than useless—public works, exploring expeditions, &c., and thereby reducing the expenditures for the present year some fifteen millions of dollars, there would be ample means in the Treasury to meet all demands against it, without resorting to the expedient of issuing Treasury notes on the credit of the nation. And, sir, if this be true, would it not be an unpardonable outrage to heap upon the people another national debt, right upon the heels of the one just discharged? Sir, we have had theoretical reform long enough; I think it is time we should begin to carry it into practice. But, on the other hand, it is urged that, after withholding the fourth instalment of the deposits from the States, and suspending the fifteen millions of appropriations, there will still be, in any event, a deficit in the Treasury, which renders it indispensable that this bill should pass. And, sir, we are told that the Treasury is in actual want of those funds at this moment, and cannot perform its engagements for ten days without them. I cannot perceive, sir, how this can be; but if it be true, I, for one, say, so let it be. If the Government has actually brought itself to insolvency, and it be really necessary to borrow money to pay its expenses, let the truth come out, and let things be called by their right names. Sir, this bill is designed to practise a fraud upon the people, by borrowing money in such a form that they will not understand it, and thereby shield the Government from the odium of bringing itself from a surplus of forty-

five millions to bankruptcy in less than one year. If I were satisfied that there would really be a deficit in the Treasury, which would make it necessary to borrow money to enable the Government to perform its functions, I should certainly grant it; but, sir, I would prefer that it should be asked for in plain English in that form. I am opposed to laying burdens upon the people in disguise. If they are to be taxed, let them understand it, and have an opportunity to provide for it.

But I am told, sir, that we do not borrow money or create a debt by the passage of this bill; that we only anticipate funds that are now unavailable. And, sir, is it not possible that a large amount of these unavailable funds may forever remain so? Is not the Government attempting to divorce itself from the deposit banks, and thereby to discredit and destroy them? And, should it so turn out, most unquestionably it will prove a debt to the nation. But, sir, in my opinion, this is all a fiction. I concur most heartily with the honorable gentleman from Massachusetts [Mr. FLETCHER] in the opinion that there is not a dollar in the deposit banks, belonging to the General Government, that cannot be made available to the Treasury by another process, just as conveniently as by the measure now under consideration. Has not the Treasury, for months past, been making these funds available, by drawing drafts upon them, even when it was certain that they would be protested by the banks? And I would like to know the difference between a protested Treasury draft and a Treasury note bearing interest. The draft is good against the Treasury, with interest and charges of protest, and answers the holder every purpose that a note would. It enters immediately into circulation, and commands a premium on account of the exchange it affords. And, sir, while the Government has these unavailable funds in the banks, the Treasury may make them an inexhaustible source from which to create funds by means of drafts. The Treasury may draw upon the very same fund five hundred times, and the drafts may go the rounds, and come back upon the Treasury, and be paid out of the accruing receipts into the Treasury, and the fund still remain. Then, sir, where is the necessity of Treasury bills or notes? I can see none, and am, therefore, induced to believe this measure is proposed with no other object than to establish the precedent, and thereby make it the prelude to the great unfinished measure of the late administration—a Treasury bank; an institution, in my humble opinion, more dangerous to the liberties of the people than a combination of all the Powers of Europe. But, sir, I will not at this time enter into a discussion of this great question. I will only pray God that I may never give my sanction to any measure calculated, in the remotest degree, to establish such an institution.

Mr. Speaker, I fully concur with the honorable gentleman from South Carolina [Mr. RUTEN] in the opinion that the people expect, and have a right to demand at our hands, the adoption of some measure which will supply the country with a national currency, which will answer as a medium of exchange between the different sections of the Union; but I am unwilling that these exchequer bills shall constitute this national currency. I believe, sir, that it is as much the duty of the Government to foster and encourage commerce as agriculture, or any other branch of industry: the prosperity of the one depends upon that of the other; and, sir, when we view society in all its ramifications, we find the interests of all classes so intimately connected, that whatever affects one must inevitably affect all. The farmer, the planter, the manufacturer, and the mechanic, are as much dependent upon the merchant as the merchant is upon them. And, although the merchants have been denounced with the bitterest epithets, and charged with being the authors of all the evils that now afflict the country—a most base and disgraceful attempt to

Oct. 5, 1837.]

Treasury Notes.

[H. of R.]

array one class of the community against another—there is not one sentence of truth in it. Sir, if you destroy the merchants, what will become of all the surplus produce of the country? Every cent's worth over and above what every man can consume in his own family would prove a dead loss to him, and consequently every spring to industry and enterprise would be cut off and destroyed. And, sir, under such a state of things, we must inevitably relapse back, in a short time, to the most perfect savage barbarity. Indeed, sir, I look upon commerce as the main source and fountain from which all our prosperity and greatness flow. Where, sir, is an instance of a nation's attaining to any distinction or greatness, where commerce has not been encouraged? If there is one, it has escaped my observation. Why, then, should we not afford the facilities necessary to sustain this enterprising class of our citizens? It is a fact, universally conceded by all who know any thing of commercial operations, that the merchants do not bear the loss sustained for want of these facilities, and that it ultimately falls upon the laboring classes. It cannot be expected by any reasonable man that the merchants can buy and sell goods for nothing. They are compelled to make a moderate profit, and, consequently, all expenses incurred by them for want of proper commercial facilities, they must of necessity charge upon the goods, and ultimately the consumer pays it. So we discover that it is the laboring classes, "the democracy of numbers," so much talked of in this House, whose interest demands a sound and uniform currency throughout the United States.

The power of Congress to supply the country with some sort of national currency that is uniform throughout the Union, in order to assist the domestic exchanges of the country, I believe has been admitted, and even insisted upon, by every administration, from the foundation of the Government down to the last. The first charge which General Jackson ever preferred against the United States Bank was, that it had failed to fulfil the expectations of the people and the object of its creation, viz: to furnish the country with a sound and uniform currency; but in this I think he was mistaken. The present Chief Magistrate, however, "with the lights now before him," has determined that Congress has no such power. But, sir, I think he must have read through magic spectacles, and will have to read again. He surely will not be sustained by the representatives of the people in a position so unprecedented and absurd. Admitting, then, as it surely must be, that Congress not only has the power, but that it is our indispensable duty, to supply the country with a national currency and medium of exchange, the question naturally arises, how is this to be accomplished? Did any man ever seriously believe that the commerce and trade of this great nation could be carried on by an exclusive metallic currency? I answer, no; this question is too clear to admit of controversy. In the next place, sir, are the State banks able to furnish such a currency? Of this I shall leave every man to be his own judge; but, judging for myself, if there be any thing in past experience, I should say it is most clear and manifest they cannot. Then, sir, the great and important question comes up: What will accomplish this end? By one set of politicians, sir, a national bank is said to be the only institution capable of supplying this currency, and past experience is quoted as incontestable evidence in support of this position; while, on the other hand, it is most vehemently denounced as both unconstitutional and dangerous to liberty. These, sir, are grave and weighty objections, if well founded; and, if any other means can be devised to accomplish this end, which will be free from constitutional objections and less dangerous to liberty, I will most gladly embrace it. And, sir, I concur with the honorable gentleman from South Carolina, [Mr. RUTT,] that, unless the country be supplied with such a

currency by other means, it will not take the people long to remove all constitutional scruples out of the way of a national bank. As for myself, sir, I do not believe that either of the objections to a national bank is well founded. I have never doubted the power of Congress to charter such an institution. But, if I had, I should consider myself a most egregious bigot were I to set up my judgment against all the precedents on this point. Indeed, sir, I believe this is a question that cannot now be raised with any propriety. It has been twice determined, after the most deliberate investigation by every department of this Government, legislative, executive, and judicial. And I am one of those, sir, who believe that the constitution is as susceptible of being reduced to fixed and settled principles as any other law of the land. If it is forever to remain an unsettled text, and is to be one thing to-day, another to-morrow, and another again the next day, just to suit the whim and caprice of the powers that be, I think we had better surrender the instrument. We had better have no constitution, than to have it the mere creature of those in power, to administer as they may choose to understand it.

And as to the other objection, I think it is equally futile. Suppose we admit that the late Bank of the United States had been guilty of the greatest crime with which it was charged—that of intermeddling in elections, and using its means to acquire political power. Sir, does that furnish any argument why another should not be chartered, with such guards and restrictions thrown around it as to prevent a recurrence of those evils? Most certainly not. We might with as much propriety say that, because the late President of the United States interfered in the election of his successor, and brought the power and patronage of his office into conflict with the freedom of elections, we ought therefore to abolish the Executive Department of this Government. Such an argument is absurd and preposterous.

And, sir, I avail myself of this occasion to express my firm belief that a national bank, based upon correct principles, is the only institution capable of giving the country such a currency as is essential to its prosperity. And I am sustained in this opinion by this remarkable fact, that, during the space of about forty years, while such an institution was in operation in this country, there was never, at any time, a material derangement in the currency, or pecuniary distress; and that, during the two short periods, comprising only about eight years, in which the Government attempted to do without one, we had an entire suspension of specie payments by all the local banks, and the deepest distress and embarrassment in the pecuniary affairs of the country. And, sir, although we have recently had it from high authority, and from different sources too, that a large majority of the people of the United States are opposed to such an institution, with due deference, sir, I must take the liberty to dissent from that opinion. Upon the score of expediency, I am bound to believe there is an overwhelming majority in its favor. And, sooner or later, humiliating as it may be, the Government must return to it; and I hope the day is not far distant.

The community, sir, and especially the commercial community, who have been struggling against winds and tides, and Government experiments, to sustain their credit and reputation, have borne their misfortunes with much long-suffering and forbearance. But, sir, the time may come when forbearance will cease to be a virtue.

I am fully aware, however, that a national bank cannot now be established. We have had incontestable evidence of that fact this morning.* And, sir, even if there were a probability of its success, situated as I am, I would not presume to make the proposition. It is due to those who have more experience to take the lead in a measure of so

* Resolution adopted declaring it inexpedient to charter a national bank.

H. OF R.]

Treasury Notes.

[Oct. 5, 1837.]

much importance. But, sir, I am ready to act my part, whenever the subject may be presented. In conclusion, Mr. Speaker, I will only say that, for myself, I am perfectly satiated with new and untried experiments, and I hope and believe the country is so.

Mr. HAMER had thought last night that the debate on this bill was closed; but it seemed that they had taken a fresh start that morning. He himself did not rise to make a speech, but briefly to throw out a few suggestions in reply to some things that had been thrown out by gentlemen in the course of the discussion.

Some complaints had been made of the order in which the business of the House had been brought before it. Gentlemen had urged that this bill ought to have been laid aside, and that the bills to allow time to the deposit banks, and to postpone the payment of merchants' bonds, should have been first disposed of, before the final action was had upon the present bill. Now, there were two reasons why that was not the proper course.

The first was, that, so far as had been seen by the course, and gathered from the declarations of gentlemen in the opposition, they were opposed to all the measures brought forward; and hence it was but fair and reasonable that the friends of those measures should be allowed to select the order in which they should be brought before the House. That was one reason.

The other was, that the Government ought to act, in regard to this matter, precisely as an individual would in similar circumstances. Suppose that he owed a thousand dollars, and was unprepared to pay it when called upon, and asked time of his creditor; that creditor said he would give him time if he (the creditor) could raise it from any other source—must not that creditor ascertain first whether he could raise the amount of money before he could indulge him (Mr. H.) his debtor? That was precisely what they wanted to ascertain in the present case. They were first to ascertain whether they had the means of granting the indulgence proposed in the other two bills, before they could take upon themselves to do so. This was fair and reasonable, and was the only perfectly proper course.

Now, in regard to the arguments advanced that morning by the very able gentleman from Massachusetts, [Mr. FLETCHER.] That gentleman insisted that this bill was unnecessary, and assigned his reasons. He said they should sell the claim upon the Bank of the United States. Why, the Government was now out of money, and wanted funds immediately. Which, then, was the most reasonable: for the Government to go into the market and force a sale of that claim, and the paper she holds against the Bank of the United States, or to issue Treasury notes, and take time to render that debt available, or collect it at maturity? Was a forced sale advantageous, under any circumstances, either to an individual or to the Government? Certainly not. It is better, therefore, that the notes should be issued.

Again: There was a large amount in the deposit banks, said the gentleman. Now, they heard that repeatedly before, but did not every gentleman there know, that the amount in the deposit banks could not be commanded at that time? Nay, more: was it not insisted by gentlemen of the opposition, that that money should not be commanded under one, two, or three years.

What was another argument connected with this proposition? It was that they might issue Treasury drafts upon the banks, and suffer them to be protested, and circulated through the community, as now, instead of notes. Why, in the first place, they had heard from all quarters of the Union, that the Secretary of the Treasury had no right to issue drafts upon the banks, knowing they would be protested. But suppose he had the right, was there any difference between those drafts now circulating and the Treasury notes they proposed to issue? Where was the difference between drawing a draft upon a bank, which they knew

would not be paid, but would be protested and allowed to circulate through the community upon the credit of the Government, and a Treasury note, which was to circulate exclusively upon the credit of the Government, and with the belief that the amount it represents will be paid the moment the banks are in a condition to pay? Now, if any gentleman was so astute as to be able to point out any difference—not the metaphysical, but the practical, difference—he would be glad to hear it. Both were certainly circulated on the credit of the Government.

But it seemed that these notes, in the opinion of some gentlemen, were unconstitutional; and then, from all quarters, they were told it was a loan—a loan in disguise. Well, if it be a loan, did not the constitution expressly authorize the Government to borrow money for its needful wants? If it be a loan, as they admit it to be, and so Mr. H. admitted, in one sense, but not in the ordinary sense in which a loan was understood—but if it were, the constitution authorized them to borrow money whenever the necessities of the country required them to do it. How was it a loan? Why, it was just such a loan as he would make to an individual to whom he was indebted, and who called upon him for a settlement, and he could not pay him, but gave him his note promising to pay him in a year. In that sense, but in no other, was it a loan; but no one would so understand it. It was precisely that kind of transaction too. Those who had claims upon the Government called for their money; the Government had not got it, because the merchants and the banks could not pay her, and what does she do? Why, give her notes, and say she will pay up at the end of a year. This is a plain every day transaction between individuals.

Again, it was said this bill would be a burden upon the people. How a burden upon the people? He heard that complaint rung throughout the House, and he asked, how was it a burden upon the people? Did it propose any new tax upon them? Did it propose any levying of fresh burdens? Did it take any money out of their pocket? If they regarded the bill passed to withhold the fourth instalment of deposits with the States as furnishing the means to redeem these notes, in that way it was a burden. But nobody pretended that these notes were to be so redeemed, or to be redeemed at all, except when the deposit banks and the merchants paid up their debts.

Gentlemen talked, too, a good deal about the people not understanding this. Mr. H. had a higher respect for the intelligence of the people. They would understand it; they did understand it.

Mr. PHILLIPS then took the floor, and commenced an argument against the bill, but his remarks were cut off by the arrival of the hour (half past 2) for the House to take its daily recess till 4 o'clock.

EVENING SESSION.

The House then resumed the consideration of the "bill to authorize the issuing of Treasury notes," being the substitute reported from the Committee of the Whole on the state of the Union.

Mr. PHILLIPS resumed his remarks. He endeavored to prove that the most injurious effects had resulted from the late measure of the Secretary of the Treasury in allowing a large amount of deposits to remain in several isolated banks, while he withdrew nearly the whole sums deposited with the banks on the seaboard. It was his opinion that much of the distress now existing in the commercial cities was to be attributed to that measure. He referred to the prospects of the country for the ensuing year, and contended, that from the report of the Secretary, and the statements given in the House, if a balance were drawn, the amount of difference between the expenditure and receipts would not exceed two or three hundred thousand dollars. He would tell them frankly, that when he

Oct. 5, 1837.]

Treasury Notes.

[H. OF R.]

came here his impression was, that the only practicable relief was the creation of a Government loan, by which our account with Europe could be speedily closed, or to issue such kinds of Treasury notes as would be useful to the people; and he thought that the payment of the fourth instalment of the deposits would be the means of distributing these notes to the country. But that measure had failed, and with it a great portion of the ground for issuing these notes.

It was his opinion that specie payments would not be resumed for the present, if the measures now before the House were adopted; and he also wished it to be known that, in his opinion, the period of distress had not passed over. It still existed, and, under the present state of things, must increase. Some gentlemen had attributed the distress to over-trading; but, although he would admit that might have had some influence, yet the great evil which they were called on to remedy was that of obstruction to our credit, both at home and abroad, and to restore the currency to its former state, and the banks to that confidence they enjoyed before the suspension of specie payments. It was desirable that they should make the notes of the banks receivable for public dues; and, when they had done that, they would have done all that was expected from Government; for, when such notes were so receivable, confidence would be restored, and nothing more would be wanting. He could not vote for the bill to its present amount; and, if Treasury notes were issued at all, he would suggest the expediency of issuing them without, rather than with interest.

Mr. HOWARD said he would make a few remarks in reply to the gentleman from Massachusetts, [Mr. PHILLIPS,] upon the point which had been very zealously pressed upon the House by him. It was proposed to raise the money which the Treasury wanted, by a sale of the bonds of the Bank of the United States, instead of issuing Treasury notes. As a financial measure, Mr. H. said, his understanding was not convinced of its propriety, although he freely admitted that the gentleman from Massachusetts was much more conversant with such subjects than himself. It seemed to him that this plan of selling the bonds of the bank was urged upon the House with great pertinacity. During the discussion of the bill to postpone the fourth instalment, it was the policy of the opponents of that measure to show that the Treasury had ample resources at command, and the conversion of those bonds into cash was directly in the track of the argument. But that matter had been decided, and the question now was merely whether the Government should use its own credit, or that of the bank, in order to raise funds.

If the proposition to sell had been brought forward by the adversaries of the bank, and sustained upon the ground that it would be wise to part with the bonds for whatever they might bring, because the bank had not paid the first bond at maturity, it would have been an argument that he could understand. Mr. H. said he begged to inquire from the chairman of the Committee of Ways and Means whether the first bond, which was due on the first of October, had been paid?

[Mr. CAMBRELENG replied, that no notice of its payment had been received, and that the Secretary of the Treasury had been obliged to write to the president of the bank about it.]

Mr. H. said it was generally reported that the bank intended to set off certain Treasury warrants or drafts which had been issued, in payment of the third instalment, to some State under the deposit act, into the correctness of which step he would not now enter, as it would lead him out of his way.

The reason why he mentioned it at all was to show, that if the bank thought itself entitled to discharge the first bond in this way, it might think it just to pay the others by the

same set-off; because the assignee of a bond would take it subject to all the equity which attached to it in the hands of the obligee. What would these bonds sell for at the risk of being paid off in this manner? It was true that we might direct otherwise by law; but then it would be a harsh measure, deprive the bank of a privilege which belonged to every body else—that of paying its debts to the Government in such paper as was received from all other persons. If this course had been recommended by the Committee of Ways and Means, might it not have been deemed severe, and tending to embarrass the operations of the bank? But to consider it strictly as a financial measure, what did it amount to? When we had to choose between using the credit of the Government and the credit of the bank, why should we prefer the latter? He admitted that the credit of that institution stood high, both in our own country and Europe, and he had not the slightest wish to impair that credit. But it was not equal to that of the Government. Would the gentleman from Massachusetts contend for this? He apprehended not. But let us follow out the operation. Suppose the bonds put up for sale in New York. In what money would payment be required? In specie or notes of non-specie paying banks? The existing laws forbade the reception of the latter, and specie must therefore be required. Where would six millions of dollars in specie come from? It would be unwise to tempt the banks to bring it out of their vaults, in order to purchase these bonds, because the abstraction of such a quantity would retard a resumption of specie payments, which all agreed in wishing to hasten. Would the hoards of individuals be brought out, and vested in these bonds? Perhaps they might, but they might more reasonably be expected to be enticed from their hiding places by Government securities. Even if the bonds should be thus sold, the currency of the country would remain just as it now is, and no facility be afforded for domestic exchanges, which was one great object of the present bill. Treasury notes would be a valuable addition to the existing circulating medium, because they would enable remittances to be made from one part of the country to another. The plan of the gentleman from Massachusetts, on the contrary, just left things as they were without moving a single inch towards the relief of the mercantile community. But it had been said that these bonds might be sent to England and sold there, and the specie brought here. This might be true. He would pass over the delay which must be experienced in the remittance, sale, and importation of the specie, in order to call the attention of the gentleman from Massachusetts to the singular situation in which this proposal placed him. Gen. Jackson had been severely censured by the opposition with interrupting the course of commerce and forcing exchange, by causing large importations of specie; and here was a proposition to do the same thing, except as to amount. The only difference was, that Gen. Jackson imported thirty millions, and the gentleman proposed to import six. He was actually treading in the footsteps of General Jackson. But what would be the consequence of such an importation? The Bank of England had become alarmed before, when it found its bullion reduced from eight millions sterling to between three and four, and had taken vigorous measures to prevent further loss, by discountenancing American bills and lowering the price of cotton, the consequence of which was a necessity of shipping specie from the United States. It had now regained its usual amount, and the price of exchange was gradually falling. But the sudden abstraction of a million sterling from London could not do otherwise than reproduce the alarm which had now subsided, or was subsiding, and thus we should have fresh trouble. But the gentleman from Massachusetts had also said that the Secretary might draw bills of exchange upon the proceeds of these bonds, and thus bring down exchange. True, this could be done; and he would concur cheerfully with the gentleman in any

H. OF R.]

Treasury Notes.

[Oct. 5, 1837.]

measure which could restore the par of exchange, and at the same time relieve our people from their domestic difficulties. But when the bills were sold, the same question arose as about the bonds. In what was payment to be received? It must of course be in specie, and nothing would be added to the currency as a means of making remittances from one State to another. This was the great advantage which the present bill possessed over the amendment, and he should therefore adhere to the bill.

Mr. TOUCEY contended that the bill under consideration was well adapted to the wants of the country, and well calculated to afford relief to the Government and the people; and that, if we attempted to draw the money from the deposit banks while they owe the Government, it will force them to press their creditors, and add to the distress of the community. The country stood in the relation of creditor to the banks and the merchants, and it was its duty to deal with them in such manner as to afford the greatest relief to them. In relation to sending bonds abroad, he must say that he felt a great repugnance to sending them into a foreign market, to raise money upon them to carry on the operations of the Government; besides, if they were sent abroad, it would have the effect of increasing our foreign debt, which now presses so heavily upon us. He supported the bill at some length, and answered the arguments of the gentleman from Massachusetts in relation to the constitutionality of the measure.

Mr. BELL said he had some remarks to make upon the bill, but he would decline doing so, if gentlemen were disposed now to take the question on the amendments; he would not stand in the way of the question being taken. After that, however, he desired to have the opportunity of addressing the House on the merits of the bill, and would then move to strike out the enacting clause for that purpose.

Mr. CAMBRELENG suggested to the gentleman to allow the question to be taken on the amendment, and on the engrossment of the bill; and then he would have the opportunity of discussing the whole merits of the bill on its third reading.

After a few remarks by Mr. WISE, the question was taken on the amendment of Mr. RHEET, and it was rejected.

Mr. UNDERWOOD then moved to strike out all after the enacting clause, and insert:

"That the Secretary of the Treasury be authorized to sell and transfer to the purchaser or purchasers the bonds or evidences of debt executed by the president, directors, and company of the Bank of the United States of Pennsylvania, for and in consideration of the stock held by the United States, in the late Bank of the United States, and to apply the money arising from such sale and transfer in payment of any demands upon the Treasury: *Provided, however,* That no sale and transfer of said bonds or evidences of debt shall be made for a less sum than the nominal amount of said bonds or evidences of debt exclusive of interest."

Mr. WHITTLESEY, of Ohio, called for the yeas and nays on the adoption of this amendment; which were ordered.

Mr. PATTON then suggested an amendment to the gentleman from Kentucky, which he hoped the gentleman would accept as a modification, which was a provision directing the Secretary of the Treasury to draw drafts on the deposit banks, for the balances due the Government, in favor of public creditors; directing the Secretary also to receive such drafts in payment of all dues to the Government. He explained his object to be to prevent the issue of Treasury notes, except in cases of very great emergency. He thought this to be the proper course of proceeding, and took it to be extraordinary that the chairman of the Committee of Ways and Means should not have brought forward

a proposition of this kind, when, on a late occasion, at the time a war with France was expected, that gentleman had brought forward a proposition to sell the stock in the Bank of the United States. Now, however, the gentleman had left this proposition to be brought forward by a friend of the Bank of the United States. He went into an argument of some length in support of the proposition he had brought to the notice of the House.

Mr. UNDERWOOD accepted of the gentleman's amendment as a modification.

Mr. CAMBRELENG. The gentleman from Virginia [Mr. PATTON] had referred to a period some years since, when the country was upon the eve, or supposed by some of us to be on the eve, of a French war, when an amount of money was due from the Bank of the United States, and which money the Committee on Foreign Affairs at that time (the same being actually due, and not then converted into bonds) supposed might be applied to the public emergency.

The gentleman had expressed great surprise that a friend of that bank should make this proposition now, and that Mr. C. and others, who were so much opposed to the bank, should oppose it. Now he had attributed to that gentleman a little more sagacity. He did not suppose that any gentleman opposed to the Bank of the United States would wish to adopt a proposition which, if adopted, would compel them to alter the title of the bill under consideration, and make it read, "a bill for the benefit of the Bank of the United States."

What was the proposition but to sell the bonds of the bank, with the endorsement of the United States upon their back; thereby making them, in effect, the bonds of the United States? And that the gentleman called "a divorce and separation of this Government from the Bank of the United States!" They were to endorse the bonds of that bank, and then go into the market as merchants and sell them, with the endorsement of the United States upon them. We might with equal propriety dispose of the merchants' bonds in the same manner.

What, then, would be the next operation? Why, that the Bank of the United States would itself indirectly buy them. Where were six millions of dollars to be raised? Was there any capitalists in this country, or any association of capitalists, or any institution, except the Bank of the United States, that could, at the present crisis, purchase this stock? There was not. The bank would have no competitor, and would itself purchase her bonds, not directly, but by an agent, who would pay for them by drafts on some banker in London, aided, perhaps, by the Bank of England. They would be transmitted to London, and the bank would realize an immense profit by the operation. Mr. C. had no doubt that every friend of the bank upon that floor would vote for the proposition, since it would put at least \$100,000 (more, probably half a million) into the pockets of the stockholders of that institution. But how is it proposed to realize this amount? When is it to be paid—where, and in what description of money? In the mean time, where were the Government debtors to procure money to pay their debts to the Government? Or where was the Government itself to get the means of paying its current expenses in every quarter of the Union? Was any body to be benefited by such an operation? Nobody, but the Bank of the United States.

Mr. C. said there were two extremes to this proposition for supplying the Treasury with means. Before he would consent to put forth the bonds of the Bank of the United States with the endorsement of the Government upon them, and then send them through the agency of the bank itself to England for disposal, he would infinitely prefer at once an issue of Government stock. It would be degrading to this country to issue its credit in the form of an endorsement. Their credit was amply sufficient without any con-

Oct. 5, 1837.]

Treasury Notes.

[H. OF R.]

nexion with that of the Bank of the United States. The proposition for stock was the extreme on one side. It would suit very well the gentleman from Massachusetts, [Mr. FLETCHER.] It would suit very well the great capitalists of this country who wanted to make investments. To them it would give relief, very great relief, and profit too; but let him tell the gentleman from Massachusetts, that the merchants who owe their bonds to the custom-house, and others who have debts due them from other States, would not thank the gentleman. Neither would merchants in the West and Southwest, and in the interior, thank the gentleman for substituting a stock in place of supplying them with a medium of remittance to their creditors in the Atlantic cities. An issue of stock was one extreme of the proposition.

The other extreme was the proposition of the gentleman from South Carolina, [Mr. RHETT,] to issue Treasury notes without interest. Mr. C. spoke not then of the character of notes of that description; but in effect it was best for our internal circulation. We had, however, bills before us, which would undoubtedly pass, postponing almost all our Treasury receipts till the next year. There was danger, therefore, that such notes would become depreciated. As Mr. C. said, when up before, he did not wish this Government to issue Treasury notes of any description, in any form whatsoever, liable to depreciation. There was already an outcry throughout the country against depreciated paper. We had too much of it now; and the evil would be augmented, if the credit of the Government should become depreciated. He was anxious to guard against that event. For this reason, among others, he had therefore come to the conclusion that it was better, taking all interests into consideration, to adopt the issue of Treasury notes bearing a moderate rate of interest.

The beneficial effect of these notes would be felt from one end of the Union to the other. Take the southwestern country alone. They would be paid out for the expenses of the Florida war, and for other expenditures in the interior. This would enable the merchants, through them, to liquidate their debts in the Atlantic cities. When, in the form of remittances, they reached these points, they would be paid into the custom-houses, or remitted abroad. The amount issued in the northeast, either for expenditures or to raise means for the Treasury, would also be in part purchased for remittances abroad. But the two gentlemen from Massachusetts, [Messrs FLETCHER and PHILLIPS,] or at least one of them, tell us that they will not be sent abroad; and why? Because the certificates were not in duplicate! Why, sir, are certificates of bank and State stocks, of which millions are remitted to Europe, issued in duplicate? But these Treasury notes were payable in twelve months, and could not therefore be negotiated. Sir, what have we seen within a few months past? Have we not seen the twelve months' bonds of the United States Bank remitted to London and sold there? Nay, have we not even seen the bonds of the Morris Canal Company—an institution, by the way, not of the most unquestionable credit—have we not seen even the bonds of that company remitted and sold abroad? Yet, sir, gentlemen tell us that five per cent. Treasury notes, issued by the Government of the United States, cannot be remitted to discharge any portion of our foreign debt!

In conclusion, Mr. C. said he hoped the House would adopt such a measure as would go to maintain the credit of this Government, by authorizing the issue of Treasury notes with interest. The sale of the bonds might be very profitable to the Bank of the United States. The issue of a stock might be advantageous to our banks and capitalists. The Treasury notes without interest would relieve our internal trade from much embarrassment; but Treasury notes with interest would essentially afford relief to every part of the Union, and aid in equalizing our internal and external exchanges.

VOL. XIV.—80

Mr. THOMAS thought it extraordinary that gentlemen should bring forward proposition after proposition to authorize the Secretary of the Treasury to issue drafts on the banks, which would be bought up and thrown back on the hands of the Secretary immediately. It was well known that we must borrow money in some way or other, and this being the case, he took it that the better plan would be to have as many bidders as possible. The bank bonds could not be bought by any but large capitalists, while the Treasury notes could be taken up by every merchant; so that the simple question was, whether we should put those bonds in the market, which would command but few bidders, or whether we should put in the market the notes which every merchant in the country could take. He thought it perfectly plain that the notes would answer the best purpose.

Mr. BOULDIN rose and addressed the House as follows:

Mr. Speaker: I will not detain the House with apologies for doing that which is the duty of every member of this House, as well as his privilege—I mean, to express his opinions to the House and to his constituents. I would not, however, trouble the House with any remarks of mine, were it not for what the honorable gentleman from New York, the chairman of the Committee of Ways and Means, [Mr. CAMBRELENG,] had said in regard to those who might vote for this amendment. He said, sir, if I understood him, that any man who might vote for it, at the same time being a hearty opponent of the Bank of the United States, was wanting in sagacity. Sir, I mean to vote for the amendment of the gentleman from Kentucky, and also for the addition to that amendment offered by my colleague; and I thought I had sagacity enough to know that it will have no tendency to recharter that bank. If it has any such tendency, I would be glad to be informed how, and will go against it. The gentleman from New York has not shown how. He has shown that if any profit can be made, the Bank of the United States of Pennsylvania will make it. This I knew. If there be any profit to be made of consequence, that bank, or some bank, or some capitalist, or some association of capitalists, will make it. But that is not a recharter of the bank.

Sir, I am against a bank of the United States, from the heart outward. I am not one of those who would have the constitution altered to allow one. I am not one of those who, while they are against a bank of the United States, will ransack new and old—heaven and earth—to find reasons to show we cannot do without one. I am opposed to it on the ground of unconstitutionality, for reasons often urged, familiar, and not necessary to be repeated here. I am against it, because I am against privileged orders in this country. I am not willing to give any heartless corporation the right and the power to raise the price of property to what it pleases, and depress it to what it pleases, without the consent, or even the knowledge of the owner. This corporation, the Bank of the United States, certainly had this power, and as certainly exercised it, by expanding or contracting its issues. Issue a great deal, property sells high; contract a great deal, property sells for nothing, or next to nothing. Sir, I listened with the attention due to talent and character to the gentleman from Pennsylvania, [Mr. SERGEANT,] as I had opportunity for several days. I did so, with that pleasure that a display of talent always gives me. He spoke with great earnestness of the condition of his constituents, who, it seems, are mostly merchants, and it made me feel more sensibly for my own.

He spoke of their enterprise and perseverance, skill and success in trade, and I feel a pride in their character as citizens of my own country. Sir, I knew that they had taken to themselves wings and flown to the uttermost parts of the earth, and over the most dreary and dangerous re-

H. OF R.]

Treasury Notes.

[Oct. 5, 1837.]

gions of the sea. He said they were in great distress, and I was sorrowful to the heart that they should be so. I have inquired into the cause of that distress, and understand that, in a regular course of trade, they endeavored to purchase the produce of the farmer and planter—of my constituents, who are farmers and planters—at a price at which they could make a profit, and behold they made a loss, and were obliged to sell for half what they gave. If they had made a profit, as they anticipated, we should have heard nothing of their afflictions; they have made a hard bed for themselves, and their faithful and talented representative argues, as I understand the effect of his proposition, to have a United States bank, or, rather, the same one rechartered, to take his constituents off that hard bed and put mine on. Now, sir, I have regard for the merchants, as I have for all the citizens of the United States: but when the question is simply, whether his constituents shall lie on this hard bed of their own making, or mine shall; when the question is simply between his constituents and mine, which shall be in affliction, I prefer mine should not be.

Sir, I have listened to the various arguments coming from a certain large portion of this House, friends of a bank of the United States, and they appear to resolve themselves into this, "there is no other name given under heaven whereby a man might be saved," excepting only by and through a bank of the United States! Sir, if I believed that it would relieve the people, or even the merchants, and not hurt the other people, and was not unconstitutional, I should be greatly tempted to go for it; for it gives me pain to see any suffer. But, sir, I cannot believe it will relieve the people in general, or fail to ruin a vast proportion of them—whatever it may do with the merchants.

Its paper, truly, might enable the merchants to pay their debts in Europe. But how? By restoring specie payments. And how is this to be done when there is, proportionally to the engagements now due, or to become due shortly, from the banks and their customers, scarcely any specie in the country? Sir, it must be by substituting the paper of the United States Bank for that now in circulation. How can they pay specie without reducing the quantity of paper circulation? This might enable the merchants to pay their debts in bank notes of the Bank of the United States; and probably would, if they be prudent, without trouble. But what would become of my constituents? Sir, they would be put upon the hard bed, and those of the gentleman from Pennsylvania [Mr. SERGEANT] be taken off it. Mine would be sold out, instead of his, to raise this specie—to make a currency to pay debts abroad. To make a fit currency for a man to travel from one end of the world to the other without suffering discount, wearing their pockets out with specie, or be troubled with changing notes. Sir, my constituents owe no debts abroad beyond seas, and few of them travel beyond their own credit; much fewer beyond the credit of their own bank paper. Why, then, should they, or I for them, take steps that will reduce all their paper contracts to specie settlements, and thus sell themselves out? Sir, it was against the wish and will of the people that banks, such as we have them, were created. They were made by their agents, and they with their love of peace and order submitted, and submit to it.

The people were then compelled, by the laws of the United States, to make their contracts, in effect contrary to the constitution of the United States, and to that of every State, in paper. Sir, the contracts, whether cash or credit, are all in paper prices. If you have your gold, and I have my paper, and you bid and I bid, my paper fixes the price, unless the paper is above par with the gold. All contracts, executors' bonds, guardians' bonds, and all, are in paper valuation; and, while a man has money out on loan, and thinks himself safe, he may be sold out; his bed may be sold from under his wife, to pay off some security

debt in gold and silver, for a debt contracted as security for some prudent man possibly some twenty years since; and which debt, when contracted, was contracted in paper. Or it might possibly be, as security for some guardian of an infant, having the utmost confidence in the prudence of the guardian, as well as of his solvency and integrity, who might be himself a money lender, and who, with the consent of the security, had received the sales of produce on property, all at paper prices; and, however worthless and extravagant the ward might be, the guardian and security, both money lenders, both prudent men, might be sold out to raise specie, if suddenly called upon, to make a better currency, or, for other reasons, just as this ward came of age. A public creditor, in order to get his money in United States Bank notes, liable neither to discount nor overburden a man, to the amount of a thousand dollars, may and will find, in many instances, his bed sold from under him to pay some other contract, made perhaps years ago, either his own, or as security for some one, who, let things go on gradually, could pay. Many a man, to save five or ten per cent. discount on the transfer of a note from one distant State to another, would have me vote for a United States bank, when, were I to do it, and mine were the casting vote, it would, for other contracts made at paper prices and resolved into specie settlements, now when there is a great debt beyond the seas, sell the bread out of the mouths of his children. I think I know a case of this sort. Sir, I am against selling the people out in this way, either by the help of a bank of the United States, or without it, in order to make a better currency for merchants and travellers, or for the next generation.

As to banks, I never would have originated them, and would get rid of them all, if I could do so without ruining the people or greatly injuring them. They came on gradually. Let them go off gradually. If one lose five per cent., and another the like, until the bank note is lost, it does not press as hard as for one to lose all and be sold out. Let them go off by depreciation by degrees, as it came on by appreciation by degrees.

Sir, I view a bank of the United States, compared to a State bank, as a royal Asiatic tiger to a cat. The same in species, nature, and manner of doing mischief; differing only in the power. They have, generally, as far as I have looked into their charters, this other odious exclusive privilege. The property of the stockholders is exempt from execution by a creditor or a bank, while a co-partner of a mercantile company, or an individual, is liable in his property to the last cent, and his body liable to be incarcerated, put in prison. This, then, may happen: a stockholder in one of these banks may buy your whole estate, worth one hundred thousand dollars, and take possession of it and hold, and, together with his brethren who may have done the like with others, declare the bank broken, taking care to have no tangible property, and leave you with their notes. You cannot touch them or their property. Nay, worse, the one that bought your property and holds it in defiance of you, may, with one of the notes of this bank, have bought your bond for a thousand dollars, more or less, and put you in jail for it, and, sir, walk at large himself. Sir, they have, at this time, the hitch upon us: not we upon them. Much as I dislike such exclusive privileges and monopolies, and unjust advantages, I am not willing to sell the people's beds from under them for the benefit of one of them, to the exclusion of all the rest, or to spite them all by requiring settlements of paper contracts now in existence, at specie prices, now when there is none in the country, or next to none. Sir, I understand that, in a very short time past, forty millions have been laid out in land in the wilderness; that, clear of interest on the purchase money, will not yield forty cents profit to the present holders in forty years to come. That something like fifty millions are lost on the last crop of cotton, and pro-

Oct. 5, 1837.]

Treasury Notes.

[H. OF R.]

portionally in tobacco and rice, amounting, in the whole, to something like one hundred millions. This, of itself, has created a great debt abroad, and a consequent demand for specie at this time, and must put our banking institutions to much difficulty, in relation to specie, without any thing else. Authorized as they are to issue three or four, or more times as much in notes as they have specie in their vaults, it is obvious, if they do any profitable business, and are tried by their ability to pay debts on demand in specie, they are broken from the first. Their solvency, in that view, depends on the accidental circumstances of their creditors all coming at once. If too many do not call at an unlucky time they can pay in specie; otherwise not: so that our security depends wholly, in good times or bad times, upon the accidental circumstance of all their creditors, or even of less than a moiety of them, calling upon the banks all at once. When, then, there is such a demand for specie to pay this great debt abroad, and when there is one great corporation with such vast resources, still clinging to the name of Bank of the United States, endeavoring to convince us by all possible means—I will say all proper means—that she alone can keep on a good currency: and when there is a powerful party fully persuaded, and by all laudable means endeavoring to show that this administration has produced, and is producing, confusion and mischief in all our fiscal concerns, is it strange that so many should call at once that these banks cannot pay specie for their notes? Certainly it is not; and the people do not consider it strange. Their notes, in their respective districts, will buy more property than specie would have bought last year. This shows the people are not surprised or alarmed at the fact of their stopping payment of specie. Yet, we are told by gentlemen that there is great distress, and it is intimated that there is no relief but by a bank of the United States. Where is the distress? What is it? These land speculators and merchants have bought at high prices and sold at low prices. They have often bought at low prices and sold at high prices, and have stopped payment, and the banks stopped paying specie, but not making money by shaving the people. Travellers are pestered with shin-plasters; yet, the bulk of the people are yet unhurt, except by the dread that, by a bank of the United States being created, or in some other way, their paper contracts will be forced to be adjusted in specie, and thus sell their property for little or nothing, as was done in 1818, 1819, and 1820, and to make a nice currency. Sir, the Bank of the United States then made it, but how and at what expense? It was my hard fortune to taste some of the bitter fruits of relief then offered and now offered, by a bank of the United States. Having encouraged speculation in that day, as banks have done in this day, so much that the president was so disapproved of that he was dismissed and another one chosen, that bank began to make a good currency; such an one as is now offered us, having less specie than almost any other bank of any credit in her vaults; but, backed by the Congress of the United States, and the receipts of the revenue of the United States, to the amount of some twenty or more millions, she required all other banks, but herself, to pay specie, needing not to do it herself except nominally, because she had the receipt and disbursement of the revenue. Her stock stood at something like a hundred and fifty; and that of a bank, having more specie, and under better management, sunk to sixty. Then it was, sir, that, the State banks being called on to resume specie payments, which could be done in no way but by drawing in their own notes to give place for some few in proportion of the United States Bank, I tasted the full, no, sir, not the full, for others got greater benefits and relief than I did—then it was that I myself enjoyed a portion of the relief now offered by the Bank of the United States and its friends, having just before purchased property, land, at the previous paper prices. To make a good

currency for travellers and merchants, the relief I obtained was that I found infinite difficulty of getting either specie or paper to meet these engagements. Others of my friends, prudent but less fortunate, had their property sold out entirely to meet engagements which were as prudent and circumspect, but for this relief, as could well be. Then it was that a vast proportion of the land owners on the Roanoke, from the mountains to the ocean, were relieved of the further trouble of their estates which had been in the hands of them and their forefathers for ages before. Some had bought an advancement for a child; some owed a small store debt; some one small matter and some another, nothing unusual; when this relief came and they enjoyed the whole benefit of it by being, with their families, turned adrift upon the world, to make a good currency for others. Sir, a traveller is a good deal plagued to change his money, and it is very comfortable to have money that is not heavy and will pass any where if convenient. It is not so wonderful, considering the nature and frailty of man, that such men should be willing to give every thing up to the control of a bank of the United States for convenience. A man goes to a certain place hereafter, which from all accounts is not desirable for convenience, still he cannot deny himself the present gratification to avoid the distant but great evil before him. Interest never carried a man there; but what think you, sir, of a man who has no occasion to travel, no debts beyond the seas, nor out of his neighborhood, no debts at all; suffering all these privations and sacrifices, availing himself of this kind of relief, and begging his whole family and his neighbors? This may happen to a man out of debt. There are few who have not been guardian or executor, administrator or security, for some of them who may, though ever so prudent, be called on to suffer this kind of relief. I cannot speak for days, I leave statistics to periodicals, and details to those who may choose to indulge in them; but I submit to you, Mr. Speaker, whether the previous banks that have been chartered, and especially the Bank of the United States, have not taken the people rather by surprise? Whether the people have not, when they were informed that one was contemplated, generally refused to elect men who went for them? I will not assert that this is true in every case, but I believe it to be true generally.

To come more closely to the amendments now under immediate consideration. Having said enough, I hope, to satisfy any one that I have not only voted and spoken hitherto against a bank of the United States, but am against it, I have little veneration for our banking institutions of any sort. I will now come more closely to the consideration of the amendments immediately before us. Sir, I said, a few days ago, that I preferred to make sale of these bonds due for the stock of the Bank of the United States, as a means of raising money, but did not think there was any chance to get it through this House. I am for it still; I am for getting clear of all the money in the Treasury not necessary. I want as much there as is necessary and no more. I want the administration to have its constitutional patronage and no more.

Sometimes, it seems, we have millions on millions; then we have none; which is it, sir? If these bonds are of no value, let them go; do not tantalize us with them as means. If our deposits in the State banks are of no value, let us know it; if they are, let us use them. They are certainly considered as of value; for the bill to withhold the payment of the fourth instalment put every State in the Union, as it appears to me, in a state of duress but a few days ago. The money being, in any way, under the control of the Executive to such an amount is dangerous in the extreme. The mere supposition that it is there, should it not be really there, is capable of producing all this duress and confusion. Let us in some way get clear of it if we have it, and of the mischievous delusion if we have it not. If we sacrifice some

H. OF R.]

Treasury Notes.

[Oct. 5, 1837.]

of it, it is the people's own money, and they can better bear this sacrifice than the sale of their property, or taking more money out of their pockets.

I have said nothing, sir, in regard to the particular merits of the bill, but only of some of the amendments, and have availed myself of this opportunity to throw out some of my opinions generally in regard to the means of relief from the present difficulties. I will go a very little further, and trouble the House no longer. In my opinion, the whole difficulty arises from our having, or having had, or having supposed we had, and still supposing we have, too much money in the Treasury. Remove this, and all is simple and easy.

I agree perfectly with the President of the United States in believing we have nothing to do in providing a currency, further or other than as the constitution literally mentions. That instrument fixes a standard to be used when debtor and creditor come to points, and cannot agree as to what the debt shall be paid in. The debtor can get clear by offering, and the creditor can require, if he pleases to do so, the specie which is the standard. Congress cannot act to nor take from this privilege, in regard to either. Every law about money, without saying more, refers to specie only. Every judgment; every execution for money, without anything more said in relation as to that point, is for specie of course. The Treasurer and Secretary of the Treasury have by the constitution the control of the money belonging to the United States to a great extent. You may shelter them by authorizing them to place the money in this or in that bank. But you cannot make them more responsible.

I heard, sir, a great man, I admit him to be so, proving that somehow the notes of a bank which did not pay specie were paper money, but that the notes of a bank that paid specie at the pleasure of the holder, were not paper money. The notes of banks last year were not paper money! The notes of the same bank this year are paper money! Yet the same notes this year will buy more property than the specie they promised to pay, had it been got, would have bought. Paper money this year, then, is better than specie last year. Make a law directing the officer to place his money in a specie paying bank; it is grounded on distrust of the officer. If he be not honest, I say it shelters him; for he may take witnesses, and demand specie for perhaps a note of one hundred dollars, and get it, and then deposit five hundred thousand under the law, and he and the bank may divide it in specie, and stop specie payments.

There is no getting round it. Put the money in an iron chest, and who is to keep the key? Defend it with bayonets, and who is to keep the bayonets off it? There is no way to keep such vast sums safely out of the hands of the immediate owners.

But stick to the simplicity of the constitution. Collect money for the only legitimate object for which you have the right to collect it. Let the law call for money, and nothing more; and direct money to be paid, and nothing more—I mean, naming the amounts, to whom payable, &c.

If the public creditor demand specie, by the constitution he must have it. If he should not, the collecting officer being, as he should always when he can be, the disbursing officer, the thing is settled naturally and easily in the usual way, in any money that is current at the time. How simply and easily this thing is exemplified in the case of sheriffs, constables, and such like officers in the collection of private debts, and the revenue of some of the States. Very little money is lost in their hands. None are very jealous of their power and station. Ten times the amount of the proper revenue of the United States is thus collected of private claims and demands, with very little loss in the course of the year.

All these judgments and executions, &c., or scarcely with any exception, are for gold and silver, and yet they produce little or no difficulty or alarm. And why, sir? It is, that there is a creditor, or plaintiff, watching and ready to receive his debt in any current money, and specie is not either demanded, or expected to be demanded. So it always has been, and will be, with the Government, when it had no more money than it needed, and did not attempt, by bank or otherwise, to regulate the currency. If the Government have a little more than it can immediately pay out, and lose some by depreciation or otherwise, it will be but small in all probability, and they ought to lose it, as others are liable to do. As to large surpluses either here, or lodged about among the States, I would as soon undertake to administer medicine to the dead as to produce a cure for the evil effects while the fact remained.

These operations, sir, are simple and easy in my estimation; but let the sheriffs and constables, banks and the like, undertake to regulate the currency and demand specie, and insist upon it whether the creditor or debtor wanted either to receive or to pay it or not, you would have trouble enough. No man would venture to inflict this generally. Few men fail to adjust these things to the satisfaction of the people if possible. It is only in a roundabout way through a bank, as it was done in 1819-'20, and about that time, that this cruelty can be extensively inflicted.

To conclude, then, sir, I will vote for the sale of these bonds, or any other funds belonging to the United States, with a view of getting clear of all surpluses, real or supposed. I want to square off. The more we are entangled with or without money, the more likelihood there is that we may at last have to open the doors to this bank, which, with its old name and old propensities, is just at the threshold, waiting for a chance to enter. It has been often said that that bank makes no application here at this time, but waits for the proper time. And when is the proper time? Just, I suppose, when it has thrown so many difficulties, and obstacles, and arguments, and objections in the way of every thing we can propose or offer that we are willing to call on them. They do not bring in any bill truly, but they endeavor to drive out all bills until some one shall bring that in. It appears to me impossible that a man should not feel himself besieged here by that corporation from year to year. It has been the case ever since I came here. The stages were broken down, and wrapping paper reduced in price from four cents a pound to three, with melancholy and alarming representations of evils that never have happened. I have voted for measures, I expect again to vote for measures I do not altogether like, for fear that, at last, that institution should be rechartered, which I view as injurious to the whole Union, and particularly destructive to the prosperity of the South. Sir, why is it that New Orleans, exporting, as she does, an amount of produce far more than any one State in the Union, even than New York, should not be able to import directly any thing worth speaking of from abroad? It is not because she wants currency, either in paper or specie; she has that which is better than either—cotton, that will buy any thing in any market. I cannot but believe that it is owing to the concentration of moneyed capital produced in the North by the former Banks of the United States, trading upon that which is our own money, (for cotton, tobacco, and rice amount to eighty out of one hundred millions, and in that proportion of all the exports of the whole United States,) the profits from which must pay for all the imports, if they are ever paid for, into the United States in that same proportion; and these banks must have been the cause, in some degree, if not mainly, of that unnatural and apparently unaccountable fact.

After Mr. Bouldin had concluded, the House adjourned.

Oct. 6, 1837.]

Extension of certain acts of Congress—Florida War.

[H. OF R.]

FRIDAY, OCTOBER 6.

BILL TO EXTEND THE OPERATION OF CERTAIN ACTS OF CONGRESS.

Mr. THOMAS suggested the calling up of the bill reported by the Committee on the Judiciary as to continuing in operation certain laws until the end of the next session of Congress. This bill had been referred to a Committee of the Whole, and Mr. THOMAS moved to discharge that committee, and to take up the bill in the House. The motion prevailed.

The bill being before the House,

Mr. BRIGGS moved to recommend the bill to the Committee on the Judiciary, with instructions to enumerate in the act the titles of the different laws to which it had allusion. Motion lost.

The bill was then ordered to be engrossed and read a third time this day. At a subsequent hour, this bill was read a third time, passed, and ordered to be sent to the Senate for concurrence.

FLORIDA WAR.

The House then proceeded to the unfinished business of the morning hour, which was the consideration of the following resolution submitted by Mr. WISE on the 19th of September:

“Resolved, That a select committee be appointed by ballot to inquire into the cause of the Florida war, and into the causes of the delays and failures, and the expenditures which have attended the prosecution of that war, and into the manner of its conduct, and the facts of its history generally; that the said committee have power to send for persons and papers, and that it have power to sit in the recess, and that it make report to the next session of Congress.”

Mr. GLASCOCK had moved to amend the foregoing resolution, by striking out all after the word *“Resolved,”* and insert the following:

“That a select committee be appointed to inquire into the cause of the Florida war, and the causes of the extraordinary delays and failures, and the expenditures which have attended the prosecution of the same, and all the facts connected with its history generally; and that said committee have power to send for persons and papers.”

The question immediately pending was the motion of Mr. HOWARD to strike out the words *“that a select committee be appointed,”* and insert *“that the Committee on Military Affairs be instructed.”*

Mr. LOOMIS, of New York, who was occupying the floor when this subject was last up, and interrupted by the orders of the day, resumed his remarks, and said that, when this matter was last under consideration, he had commenced some observations in vindication of his predecessor, [Abijah Mann, jr.], from the censures cast upon him by the gentleman from Virginia. He had characterized the attack made upon his predecessor, six months after occurrences had transpired, and when the circumstances of the parties had entirely changed, as extraordinary, and, in his view, entirely unjustifiable; and he was about proceeding, when interrupted, to show that no censure could be imputed to his predecessor, even from the statement of the gentleman from Virginia himself. He was well aware that he might leave the character of his predecessor to its own vindication wherever it was known; and if he had not some observations which he wished to submit on another branch of the subject, and more directly pertaining to its merits, he should have contented himself to let this matter rest where it was, after so long a lapse of time; but he would show, in a few words, that no censure was imputable to the majority of that committee, or the individuals who had been designated. The gentleman from Virginia had prefaced his charges by a statement,

made with all the emphasis of manner which peculiarly distinguish his remarks, by announcing to the House that he was about to make a statement never before communicated to this House or to the country, and the substance of that communication was, the manner in which the reports of the majority and minority of that committee had been made up. And how was it? Why, sir, stripped of its coloring, and stated in brief space, it was, in sum and substance, that the members of the majority had furnished their chairman—the individual of their party first named on the committee—with their separate views, to be embodied into a report, and Mr. Mann had, in addition, furnished his notes of the proceedings and evidence before the committee; and this chairman of the majority, instead of performing the labor of embodying these views in the form of a report, had entrusted them to their clerk, to be arranged and reduced to form. Now this was the whole substance of the charge announced to the House with so much solemnity, and upon which the answer imputed by the gentleman was grounded. Was there any thing censurable or extraordinary in this? Was there any thing which should call down the indignation of this House, or of the community, as might be inferred from the remarks made by the gentleman from Virginia?

The offence particularly imputed to his predecessor was, that he had actually furnished the notes he had taken of the proceedings, as a member of the committee, to assist in making out the report of the committee.

[Mr. WISE interrupted Mr. L., and said that that was not the pith of the charge against the gentleman's predecessor. The charge was that he denied that he knew the contents of the report until it was read in the committee; and Mr. Pearce himself had said it was Mr. Mann who furnished the offensive matter for the report. The charge against the gentleman's predecessor was that he was guilty of falsehood.]

Mr. L. resumed, and said from the estimation in which the character of Mr. Pearce appeared to be held by the gentleman from Virginia, as exhibited in his former remarks, he should hardly suppose that he (Mr. W.) would introduce him (Mr. Pearce) as a witness against any one.

[Mr. WISE. Well, I do confess I would not place much reliance on Dutee J. Pearce.]

Mr. L. resumed. He did not understand the gentleman from Virginia, either formerly or now, to say that Mr. Pearce told him that Mr. Mann knew the contents of the majority report; but he understood it that the gentleman inferred that fact from the circumstance that Mr. Pearce told him that Mr. Mann furnished the notes from which the offensive matter was taken. If he was mistaken in this, he desired to be corrected and set right. The testimony did justify the inference, and he could see no impropriety whatever in that circumstance; he considered it the duty of every member of the committee to give his views to the member who drew up the report, and to furnish his notes of the proceedings also, if use could be made of them. It had appeared that the majority had not signed the report as drawn, but had amended it by striking out parts of it, to make it meet the concurring views of the six individuals who composed that majority. This was to have been expected, and the report of the minority shared no better fate. That was drawn by the gentleman from Virginia himself, and his colleagues had declined signing it, as he understood the gentleman to say; and, finally, the gentleman from Virginia alone, being the minority of the minority, and one out of the nine, had drawn up and signed his report alone. This report, the gentleman had informed the House, he wrote with his own hand, crossed the *l's* and dotted the *i's* himself, and he (Mr. L.) presumed that he agreed to it unaniously.

I have done with this branch of the subject, and have said more perhaps than was necessary to say upon it.

H. OF R.]

Florida War.

[Oct. 6, 1837.]

With respect to the resolution and the amendment before the House, there was one part of it which Mr. L. considered objectionable. It was that part which gave to the proposed committee power to send for persons and papers. This was a high power which this House possessed, and which, in his opinion, ought never to be entrusted to a committee, except in cases of clear necessity. No such necessity was shown in this case. It was a power very liable to abuse; and though it was not to be expected that a committee of the House would sanction any abuse, yet he thought that prudence dictated to the House to reserve to itself these extraordinary powers, unless a case of necessity was presented. It would be time enough to grant such a power when a committee should inform the House that they had sought information of some person who had refused to disclose it. Does any one doubt but that the Secretary of War would disclose any fact or circumstance within his knowledge, that a committee might require, without being called up as a witness and sworn? Or would any officer in the service refuse to answer any communication from a committee? The resolution before the House embraced a wide range. It would be almost matter of necessity under it to seek information from the officers now engaged in carrying on that war. The commanding general and all his officers would, by this resolution, be subject to be called here to testify before this committee.

This war had already undergone several partial investigations before courts martial and courts of inquiry. A great amount of evidence had been taken relating to it, and large sums expended—thousands upon thousands—in eliciting facts. There was now no charge of any concealment by any person; and he (Mr. L.) was averse to instituting a tribunal to try the comparative merits of the several officers who had been engaged in that service. The difficulties attending the prosecution of that war, and which had produced so much delay and expenditure, had been explained by several gentlemen in this very debate. We had been told of the great extent of wilderness, of the swamps and everglades, impenetrable to the whites, in which the savages concealed themselves. We had been told of the difficulty of transporting the necessities of war, and, above all, of the sickly and unwholesome climate.

These were, doubtless, the true causes; but he (Mr. L.) was not averse to an investigation, but he preferred it should be in the ordinary mode, and by the Military Committee, as moved by the gentleman from Maryland.

Mr. L. concluded by moving to strike out that part of the resolution which gives power to send for persons and papers.

The CHAIR said this amendment would not now be in order until the amendment pending was disposed of.

Mr. GLASCOCK then modified his amendment, by inserting the following: "except such as may be engaged at the time in the service."

Mr. WISE suggested to the gentleman that, as the House was to adjourn on Monday week, the committee should have power to sit during the recess, and not have the investigation confined to ten days.

Mr. GLASCOCK replied that it would be continued at the regular session of Congress.

Mr. WISE hoped that, as the session was now to close in about eight days, that gentleman would also consent to incorporate in his amendment the power to sit during the recess.

Mr. W. went at some length into the exposure of the indisposition of the majority in the House in relation to the proposed investigation. He saw very plainly that the same state of things existed now as ever before. The leopard would as soon change his spots (said Mr. W.) as this House will change its determination to do nothing towards exposing the corruption of this Government.

As to the old matter, with regard to the committee of investigation, so often alluded to, Mr. WISE said he should not touch upon it again; but he would remark that the gentleman from New York [Mr. LOOMIS] had given abundant evidence of his fitness to succeed Abijah Mann. To show, by a single fact, indisputably proved, that frauds and corruption have attended this Florida war, Mr. WISE produced and read the following papers:

"STEUBENVILLE, OHIO, October 1, 1837.

"DEAR SIR: The enclosed letters will sufficiently explain their object, without the addition of many remarks of my own.

"On my arrival at Wheeling, a few days ago, on duty, I was informed of a gross instance of peculation, said to have been committed in Florida by an agent in the employ of the United States, and I immediately addressed a letter to the gentleman who was said to have witnessed the fraud, a copy of which is herewith enclosed, marked A. You will perceive that (having implicit confidence in the integrity of the officers of the army) I expressed the opinion in advance that the fraud was 'committed by a citizen,' and not by 'an officer of the army.' It is with honest pride I mention the fact that I was not mistaken in my conjecture, as there is no individual in the army of the name of Skinner. I will now venture the further prediction that, whenever you ferret out the rats, you will find them to belong to the 'sovereign people,' and not to our much-abused little army.

"The individual (Skinner) above alluded to, I understand, was, at the time, a citizen of Irwinton, Alabama.

"In one particular, however, my information was incorrect, as it was stated to have occurred in Florida, and you will perceive by Mr. Smith's answer (marked B) that it took place at Fort Mitchell, Alabama. I do not start this new game with any expectation or wish of diverting you from the chase in Florida, but simply to show you that the late Creek war is equally worthy of notice.

"We, my dear sir, are no politicians. We obey the orders of our superior, and endeavor to do our duty, leaving the strife of party to those whose constitutional right it is to select our rulers. The only boon we ask is to have rigid justice meted out to us. If the army has not met the expectations of the country, and has failed in the Florida war, it should be borne in mind that fifteen thousand 'citizen soldiers' have failed also. If 'three major generals of the army' have been unsuccessful, it should not be forgotten that the Governor of Florida, having the public Treasury at his command, and a whole summer to make his preparations, was, likewise, unsuccessful. If the 'American arms have been disgraced,' as has been so often asserted on the floor of Congress and in the public papers, I thank my God that I did not (although I served in three campaigns) witness the humiliating spectacle. With but one exception, wherever the Indians were seen, they were charged and driven until they were lost in swamps and hammocks. If we could not pursue them further and catch them, it was because the God of our natures did not endow us with the fleetness of the savage, and the scenting faculties of the bloodhound. If the army is inefficient, there must be some reason for it, as every effect has a cause. But on this head I have not time to dwell, although many reflections are presented to my mind. One remark, however, I will make, and I do it with the freedom of an old acquaintance. If the country is dissatisfied with the army, in God's name let it be disbanded; for I would rather be an humble practitioner of the humblest hamlet than see the army insulted by the taunts and stale gibes of every newspaper witling.

"In conclusion, I must distinctly disavow any and every political motive in forwarding you this communication. My sole aim is to vindicate the character of the army, and to add my humble mite towards an investigation which, I

Oct. 6, 1837.]

Florida War.

[H. OF R.]

hope and confidently believe, will place it once more '*rectus in curia*.' If such be the aim of your resolution, (and that it is I shall be the last to doubt,) I say 'God speed you.' No man can be more anxious to see the abuses in the army ferreted out and the correction applied than myself. Further, you are at liberty to make whatever use of these papers you may think proper. I am, &c."

[Signed by an Assistant Surgeon of the Army.]

[A.]

"WHEELING, (Va.) Sept. 28, 1837.

"SIR: I have learned, since my arrival at this place, that you witnessed, on a recent occasion, in Florida, an instance of peculation on the part of a public agent, who had public funds in his possession, &c.

"The fraud, if perpetrated by an officer of the United States army, would form the basis of charges, which, if proven, would cause his name to be instantly stricken from the army roll, and consigned to merited infamy.

"If, however, it should turn out that it was committed by a citizen instead of an officer of the army, as I am induced to believe was the case, it is due to justice and to the army that the truth should be known; so that no part of the stain should attach to men who value their honor and reputation above all price; which they will neither compromise themselves, nor suffer any human being to trifle with. At any rate, let the truth be told, blast whom it may. I therefore respectfully request that you will furnish me with a full statement (accompanied by a deposition) of all the particulars of the transaction, the names of the parties, &c., the time and place where it occurred, and any other matter you may deem necessary for ferreting out the perpetrators, &c., to be used by me as I think may best subserve the ends of justice.

"Very respectfully, &c., your obedient servant.

[Signed as above.]

"MR. A. Y. SMITH, Triadelphia, Ohio county, Va."

[B.]

"WHEELING, Sept. 30, 1837.

"SIR: Your letter of the 28th instant came to hand this morning. In answer to your inquiries, I have to state, that the transactions to which you allude occurred at Fort Mitchell, Alabama, and not in Florida, as you were informed. The particulars were substantially the following:

"I arrived at Fort Mitchell on the steamer Anna Calhoun, from Appalachicola, the boat having on board freight for the United States army; the freight on which amounted to about one hundred dollars. When the amount of the charge was made known to Skinner, who was acting as Quartermaster for the United States, he (Skinner) told W. W. Crenshaw, clerk of said boat, to make the bill amount to five hundred dollars; upon which Crenshaw replied, that if he (Skinner) would give him one hundred dollars he would do so; to which Skinner immediately agreed, and Crenshaw made the bill amount to \$500; for which Skinner gave him one hundred dollars, and Crenshaw receipted the bill for \$500. This transaction occurred about the 1st of February, 1836, at Fort Mitchell, Alabama.—[See note.]

"This is a correct statement of the transaction, so far as observed by me, and as stated to me, after the transaction, by Crenshaw.

"I am, dear sir, your most humble servant,

A. Y. SMITH."

"OHIO COUNTY, VA., TO WIT:

"Personally appeared before me, a Justice of the Peace for the county aforesaid, A. Y. Smith, and accordingly took oath that the foregoing statement is correct and true to the best of my [his] knowledge and belief.

A. P. WOODS."

[NOTE, (by the writer of the two above letters.)—I apprehend that Mr. Smith has inadvertently made a mistake in the year, as it was probably 1837 instead of 1836.]

Mr. W. then adverted to the proposition to strike from his resolution the power to send for persons and papers. He would tell gentlemen that, without this power, it would be impossible to bring to light the frauds and corruptions of this Government. Even with such a power, it would be almost impossible. He alluded to what he had himself seen in investigating committee rooms, and to the fact that there were witnesses in this city who could have been adduced in proof of the misconduct of officers of the Government, had it not been actually dangerous to them to summon them. Their bread depended on their silence. Individuals who, he well knew, could have testified in these matters, had come to him, at his lodgings, with tears in their eyes, and begged him not to summon them. The proscription practised in the Government, as now administered, hermetically sealed the mouths of witnesses. And yet it is now said that it is dangerous to give a committee of this House power to send for persons and papers! Oh! most kind, indulgent, he would not say servile, representatives of the people!

Mr. HOWARD said that he would not have troubled the House with any further observations upon the amendment which he had submitted, if it had not been that he wished distinctly to say to the House and the nation that it was not his wish to smother investigation into either the causes or conduct of the Florida war. On the contrary, he thought that the members of any committee to which the inquiry might be sent would not do their duty to the House, the country, or themselves, unless they gave the freest scope to the examination, regardless of the persons upon whom the censure might fall, if any censure was due, and influenced solely by a spirit of strict justice and impartiality to all. Having said this, he had a right to expect, and did expect, from the gentleman from Virginia, [Mr. WISE,] that, upon whomsoever else he might cast the imputation of desiring to stifle inquiry, he would exempt him (Mr. H.) from being included in it.

When the resolution was under consideration some two weeks ago, the gentleman from Tennessee [Mr. BELL] had made some statements which appeared to be strong arguments in favor of sending the subject to the Military Committee. Perhaps the House had forgotten the debate which then took place, although they seldom forgot any thing which that gentleman said. The disappearance of resolutions from before the eye of the House, and sudden reappearance at a distant day, was a great practical inconvenience. According to his classic reminiscences, there was somewhere in Greece a river which plunged under ground and started up, to the surprise of those to whom it unexpectedly showed its current, far away from the place of its submersion. It was just so with some of our resolutions. The honorable gentleman from Tennessee had said that we had the skeleton of an army, but that it was not filled up.

Mr. BELL said that the fact which he stated was this: that when a lieutenant of a company fell in action, the command devolved upon a sergeant, and that there appeared to be a deficiency in the number of officers on duty there.

Mr. HOWARD said that he had so understood the gentleman, and would use that fact to show the propriety of referring this subject to the Military Committee, because that committee could, and doubtless would, urge upon the House a bill which had been reported every year since he had been in Congress, and the necessity for which was fully shown by the Florida war. He alluded to a bill establishing a corps of engineers, detached altogether from duty in the line. Every body knew that a general order had been issued last winter, recalling officers of the army from engineer duty, and directing them to repair to their

H. OF R.]

Florida War.

[Oct. 6, 1837.]

respective regiments. The services of those officers, acting as engineers, were very useful to the country, and the pressing demands for them from all quarters had caused their absence, on furlough, from their posts in line. The experience of the Florida war showed the absolute necessity of separating the two arms of service. Such a measure would, of itself, be of great service to the organization of the army. But there were probably other improvements which might be proposed, after a minute examination into the manner in which the war had been carried on. He desired to attain some practical good, instead of having merely a barren inquiry, and, therefore, was in favor of referring the matter to a committee which could report bills in the discharge of its regular duty, instead of stopping with a resolution either censuring or not censuring some officer of the Government.

Mr. GLASCOCK regretted that it became his duty again to address the House on this subject; but, as he had thought proper to move an amendment to the original resolution, and in consequence of remarks made to-day, he felt it his duty to do so. It seemed now, from the remarks of the gentleman from Virginia, [Mr. WISE,] that he evinces a great indifference from that heretofore evinced by him in relation to the disposition to be made of the resolution offered by him; and he seems to think that there is no disposition on the part of the majority of the House to go into the investigation proposed. Sir, (said Mr. G.,) that gentleman must see entirely different from himself, if he has recently discovered any thing like a disposition to evade this question. He had expressed himself on a former occasion in favor of this inquiry, and he was still desirous that it should be had. He felt it to be due to all the officers in the army who have been engaged in that unfortunate war—he felt it due to the Government, and he felt it due to the people of the country—and, whatever disposition the gentleman now feels disposed to make of this question, he hoped the majority of the House would maintain its original intention to carry out the investigation. His object in not wishing the committee to sit during the recess, was to save as much as possible the country from the expenses already incurred in the prosecution of that war, particularly when all the ends of all parties asking this investigation could be attained without it. It has been truly and justly remarked by the gentleman from Maryland, [Mr. HOWARD,] that there are weighty and important documents, which will occupy the attention of the members of the committee, which may be appointed at this time, during the recess, which will give them the opportunity of forming correct opinions in relation to the matter, and enable them to proceed promptly to the execution of their duty at the next session of Congress. But what astonished him most was, to find the gentleman from Virginia [Mr. WISE] reading letters and documents to the House for the purpose of forestalling public opinion in relation to this inquiry. Mr. G. confessed that this was pursuing a course which he had been taught from the commencement of his political life, in all transactions, studiously to avoid. He had been taught that, whenever an investigation was to be had where it was expected that all the testimony would be brought to bear upon every point, it was improper to forestall public opinion, and produce a prejudice in the public mind, by introducing evidence in advance, and sending it forth to the country.

Mr. WISE said this was very different ground from that taken by the gentleman's party last session, when it was insisted on that specific charges should be made against the Executive Departments before a committee should be asked for to investigate them.

Mr. GLASCOCK said this was not the first time that the party to which he belonged had been referred to. As for himself, he was only responsible for his own acts; and the gentleman would do him the justice to say that he was

among the first to advocate the investigation then asked for. He stood almost alone in the first instance in favor of the inquiry.

Mr. WISE would do the gentleman the justice to say that he did; but at that time he was not exactly recognised as one of the party.

Mr. GLASCOCK replied that, whether he was considered as one of the party or not, no man in his section of country ever doubted where he stood in relation to the prominent measures of General Jackson's administration. No man ever doubted that; even his political enemies never doubted it; or, if they did, no act of his life authorized it, and it was entirely gratuitous on their part. But to proceed to the question before the House: he confessed, so far as the resolution was concerned, the true and proper course, in his judgment, would be to adopt the amendment he had submitted. He differed from the gentleman from Maryland as to the manner in which this committee should be appointed, and as to what committee the matter should be referred to. In his opinion, the true course of policy was, that a select committee should be appointed by the Chair; and he again repeated that, if the committee was to effect any practical good, it should be so constituted as to have the confidence of the people of the country. The gentleman from Tennessee had opposed the appointment of political partisans on the committee, and had intimated that he (Mr. G.) had used some expressions of a similar nature. This, however, was not the proper inference to draw from his remarks. He was as much opposed to having political partisans on the committee as the gentleman himself, but he desired to have it so constituted as to embrace men of some weight of character, and to be composed of men who would do justice to all the interests concerned. He wished to see the rights of all the officers who were engaged in that service protected, and the investigation to be conducted in such manner as to be of some practical benefit; and with this view he had submitted the amendment now under consideration.

Sir, (said Mr. G.,) the situation in which I stand to the ex-President of the United States, will not permit me to pass over in silence the bitter denunciations which have been uttered against him on this floor by gentlemen of the opposition. My attachment for him was formed at an early period of my life, under peculiar circumstances, and the most trying scenes, and it gives me pleasure to say that there are but few acts of his whole life, either civil or military, which has not served to increase rather than to diminish that attachment. But to what source shall I trace this violent opposition to him; the bitter invectives which have been heaped upon him, emanating from the most bitter feelings? Sir, to his hostility to the Bank of the United States; to the veto which he stamped upon the bill rechartering that institution in 1832; because he had the moral courage to effect that which his friends in this House failed to effect; because he threw himself in the breach, and armed with the virtue and integrity of the people, and sustained by the constitution, grappled with the monster, and triumphantly overthrew it. This, sir, "is the head and front of all his offending," and to this cause alone may be traced the vindictive feeling of his adversaries. But, sir, we hail that act as the greatest in his political career; one that has covered him with glory, and one that will serve to perpetuate his name and his memory, even if unconnected with any other act of his life. Sir, the character of Andrew Jackson is the property of his country; his services are too well known to that country not to be appreciated; they have secured to him the affections of the people, and the combinations of his enemies can never deprive him of.

Permit me (said Mr. G.) here to state, that he was in hopes he would not have found it necessary to vindicate the character of one needing no vindication; but my feelings, under the circumstances, could not and cannot be

Oct. 6, 1837.]

Florida War.

[H. OF R.]

controlled. I listened with pain and regret to the uncalled for and unqualified abuse of him. "I heard much declamation without argument," and the foulest charges without proof, and especially by one from whom it was but little expected. I mean the gentleman from Massachusetts, [Mr. CUSHING,] who spoke in relation to the Florida war, and who pronounced that war as one of the damning sins of the Government, and a foul blot on the American character; this, too, before an investigation was had, thereby prejudging the case, and charging it home upon General Jackson. Better things were expected from that quarter. For my part, I have always listened to him with the greatest pleasure. His arguments have generally been respectful and able, and free from personal abuse; but, in the present case, he has wandered from his usual course, and I envy him not the position he occupied on that occasion. Many others have been lavish of their abuse of the ex-President and of his measures; but I shall not stop specially to reply to them. I feel no disposition to do so, as it will be an unnecessary consumption of the time of this House, but must invoke the pardon of the House for making a general fire at the whole flock, and tell them that the numerous squibs they have fired will have about as much effect upon the character of Andrew Jackson before the people of this nation, as the firing of pop-guns would have upon the rigging of the splendid Pennsylvania.

Sir, (said Mr. G.,) that venerable patriot never expected, and never asked, forgiveness at the hands of his enemies. He knew he had incurred their eternal displeasure. He never expected quarters from those whose pride and pleasure had been to embitter his declining years, whose objects were to thwart the views of his administration in every prominent measure, to triumph in the misfortunes of their Government, to rejoice in the distresses of the people, and to prevent, as far as possible, the relief of those distresses, with a view to the overthrow of the administration, and to ride themselves into power in the midst of those distresses. In conclusion, sir, and as the time advances when it is expected he will make his final exit "to that bourn from whence no traveller returns," and as the time approaches when we may expect to hear "that he has slept the sleep of death," and closed his earthly career, I wish to be permitted to say to those influenced by such feelings, and controlled by such motives, looking as he does to his country's good, he has never been inclined to hold communion with, or extend to them the hand of fellowship.

Mr. CAMBRELENG here called for the orders of the day.

Mr. ADAMS asked the gentleman from New York to postpone that call for the present, at the same time intimating his wish to speak on the resolution before the House. [Cries of "Go on! go on!" from all quarters.]

Mr. CAMBRELENG refused to withdraw the call for the orders of the day, as the morning hour had more than elapsed.

The call for the orders was not sustained, (the vote being 92 to 84,) and

Mr. ADAMS resumed the floor and said: I tender to the House my thanks for their indulgence in permitting me to address them, and I promise not to abuse their kindness by trespassing long upon their time.

Mr. Speaker, referring to the elegant classical allusion of the gentleman from Maryland, [Mr. HOWARD,] who proposes to refer this investigation to the Military Committee, I hail with joy this reappearance of the sweet fountain Arethusa. But I must say, with the Roman poet,

"Sic tibi, cum fluctus, subterlabere Sicanos

"Doris amara suam, non intermiscet undam."

Let not the bitter waters of the Doris be mingled with the mellifluous stream of Arethusa—and the Doris, in this case, I must frankly admit is—the *Military Committee*.

Sir, how is that committee constituted? The gentle-

man from Virginia, the mover of this resolution has told the House in one point of view there are on this committee eight friends of power—an honorable denomination which I take from the gentleman from Virginia, who told the House the other day that he first came to this House, himself one of that number—eight friends of power, and one friend to — what shall I say? friend to his country? No! That would imply that the others are not friends to their country, which I am bound not to believe; shall I say friend to liberty? No! for the same reason—I suppose them all friends to liberty—well, I will say, a friend of his country, who is not the friend of power. This, sir, is the objection of the gentleman from Virginia, in my judgment a very valid objection. But I have the same objection, in another point of view deeply interesting to my own immediate constituents. How is that committee constituted with reference to the different sections of the country? There are eight gentlemen upon that committee from regions south and west of the Potomac, and but one member alone from Maine to Virginia; eleven States; and that is my honorable friend [Mr. KEMBLE] from New York, who is as worthy as any individual gentleman can possibly be of such a position on that committee. He, alone, represents thereon his own "empire State," as well as all the New England States, and those of New Jersey, Pennsylvania, Delaware, and Maryland.

Why, Mr. ADAMS would ask, was the Military Committee thus constituted? Why are not the different sections of the country represented in that committee? Have they no interest in the subjects which are the peculiar topics of inquiry and action there? Upon what principle are committees of this House constituted? Mr. A. said his constituents had certainly a deep interest in those topics. A vast amount of their money had been expended on the recommendation of that committee. Now, the gentleman from Maryland [Mr. HOWARD] had urged the reference of this resolution to that committee, and he (Mr. A.) was giving his reasons why that reference should not be made.

And this was a good argument, too, he contended, against the use of the ordinary mode of appointing committees in this House, in the present case. He alluded to the observation of Mr. WISE, who had said that the Speaker of the House could not be impartial in appointing such committees. They must all have a preponderance of the "friends of power." He had some experience of the truth of this remark for some sessions past; and with reference, too, to these very matters. And he called the attention of the House to what had taken place there not quite two years ago. He showed from the journal that, on the 15th January, 1836, Mr. BELL, chairman of the Committee on Indian Affairs, moved for a similar inquiry with that proposed by the resolution under consideration, with power to the committee to send for persons and papers. The resolution was agreed to. It gave the committee power to investigate this very same subject, because the Florida campaigns were legitimate and proper matters of inquiry, in all their details, by the Committee on Indian Affairs. What followed? And here Mr. ADAMS read again from the journal, and showed that, on the 1st of July, 1836, Mr. BELL, from the Committee on Indian Affairs, reported a resolution to the effect that that committee have power to sit in the recess, for the purpose of completing the investigation. What were the proceedings of the House on this resolution? First, there was a motion to lay it on the table. This did not succeed. Then the previous question was moved, and not sustained. Afterwards that motion was renewed, and on the main question (upon the resolution) being put to the House, the vote was 87 to 87. The Speaker voted in the negative, and the resolution was sent to "the tomb of the Capulets!"

Then there was a memorial presented here by Mr. LEWIS, of Alabama, complaining of certain alleged abuses in the

H. OF R.]

Treasury Notes.

[Oct. 6, 1837.]

management of these wars. That gentleman proposed its reference to the Committee on Indian Affairs, with power to sit in the recess, and to authorize three or four of their number to act upon it. What then? A member from Louisiana, not now in his place, [MR. RIPLEY,] moved to refer the memorial to the President of the United States. No sooner said than done! And now, sir, asked Mr. A., has any gentleman of this House ever heard from the President of the United States, from that day to this, a single word in relation to the matter? a single word, as to the investigation of frauds, alleged by citizens of the United States, in a memorial to their representatives? frauds and abuses in the carrying on of campaigns costing so many millions of money? He paused for a reply. Had the chairman of the Committee of Ways and Means heard any thing from the quarter to which it had been referred, upon that subject? Had the Speaker of the House done so? Had there ever been a message from the Executive sent to this House on the subject? He heard no answer to these inquiries; and he was warranted in saying that there had been nothing, nothing whatever, done upon the matter. And with these examples before him, with the uniform course of action on the part of the Speaker, in similar cases, before him, how could he be in favor of the ordinary mode of appointing committees of that House? It was mockery to refer such subjects to such committees. He much preferred the election of the proposed committee by ballot, for these reasons.

Now, Mr. ADAMS admitted it is in the power of the majority of the House to put a majority of the "friends of power" upon a committee thus chosen. And it was possible that the majority would even fill the committee with nine "friends of power," instead of eight, and one who was not; while, if the Speaker were to appoint it, he might, at all events, place one, perhaps two; and, in an extreme and unusual moment of liberality, might even place three friends to the investigation on the committee. In making these allusions to the Speaker, Mr. A. said it was his intention to be perfectly respectful as a member of the House.

Mr. A. further contended that, in the appointment of committees of investigation, the same parliamentary rule which regulates the appointment of standing and ordinary committees does not apply. And he referred to the constant usage of the British Parliament, in which it was universally the practice to place on committees of inquiry a majority of members in favor of the proposed investigation. It was certainly a mockery of common sense that it should be otherwise.

Mr. ADAMS went into an examination of the reason why investigating committees hitherto appointed by this House had never discharged the duties assigned them. He referred to the liberal mode of proceeding in these committees. When any specific point was to be inquired into, the question was always forbidden to be put by the majority, and the investigation was smothered, upon the ground that there should be "specific charges," before the action of the committee should be proper! "Specific charges!" and here, this morning, a gentleman read to us letters from good authority containing such charges; and now what are we told? That that is prejudging the cases to be investigated! And this is the two-edged sword, of too much specification on the one side, and none at all on the other, which is wielded against the friends of investigation!

Mr. A. concluded by again hoping that the proposed committee would be appointed by ballot; and that that committee might not be the Committee on Military Affairs, the majority of whom the chairman of the Committee of Ways and Means is in the habit of calling on so successfully to "toe the mark!"

Mr. CAMBRELENG called for the orders of the day.

TREASURY NOTE BILL.

The House then resumed the consideration of the "bill to authorize the issuing of Treasury notes," as reported from the Committee of the Whole on the state of the Union.

The question pending was on agreeing to the amendment of Mr. UNDERWOOD, as modified by the amendment of Mr. PATTON.

Mr. BOND addressed the House in support of the amendment, and in opposition to the bill.

Mr. McKIM denied that the sale of the United States Bank bonds would bring an immediate supply of money into the Treasury; for, in the first place, there must, at least, be a delay of four or five months expended in the negotiation, at a probable loss too of from four to six per cent., and then the Government would be likely to get in return only bank notes. He was not unfriendly towards any banks; but it should be borne in mind that the Secretary of the Treasury could not pay out bank notes; they would be useless to the Treasury.

Another consideration was, that the bonds given by the bank were for two millions each, an amount that would be inconvenient to negotiate in London, and how did they know that the bank would consent to divide them up into bonds of a smaller size, say for a thousand dollars each? He apprehended that it would not only interfere with the arrangements of the bank, both here and in London, but that it would be found to be against their interest to do so.

Again, in point of economy, there would be saving by the issue of Treasury notes. How? Why, the United States Bank bonds bore an interest of six per cent., whereas the Treasury notes would not probably bear a higher rate than three or four, or, at the most, five per cent. The saving would be the difference between those two rates of interest on several millions of dollars—no slight consideration.

Again, there would be a probable loss on the sale of the bonds from their par value, of from five to six per cent.; for, by the latest advices from the English money market, United States Bank bonds were at 94 or 95 there. This, too, was independent of the exchange, whatever it might be, and the commission or expenses of negotiation.

Another objection he had to the amendment was, that it would be disreputable to the character and credit of the Government to be selling its securities in the market. The same objection would also apply on the part of the bank itself; for she, no more than merchants, would like to see her liabilities hawked for sale. Moreover, the United States would have to endorse the bonds before they could be negotiated at all; and he was indisposed to place the Government in so disreputable a position.

Now, what would be the effect of the Treasury notes? Why, they would be equal to so much gold and silver thrown out among the community, for they would, when out, be received by the Government, in payment of dues, as gold and silver, and the creditors of the Government would gladly take them as such, as they could readily pass them as such, because they would be sought after by the importing merchant to pay his bonds. Moreover, the Secretary of the Treasury would not attempt to issue more than were applied for. It was then, in effect, putting so much gold and silver into circulation the moment the bill passed.

Mr. BOND inquired if he was to understand the gentleman to say that paper could be made equal to gold and silver.

Mr. McKIM. Certainly not. He meant only to convey the idea that the Treasury notes would answer in the place of gold and silver, being receivable for the dues of the Government, and its claimants being glad to get hold of them. After a few further remarks of the same tenor, Mr. McK. concluded by hoping the House would pass the bill.

Oct. 6, 1837.]

Treasury Notes.

[H. OF R.]

in its original form as it came from the Committee of the Whole; for he considered the amendment would be destructive to the business of the Treasury, which was in immediate want of the means for carrying on the Government, and which it could not procure under the operation of the amendment.

Mr. CUSHING addressed the House at length in opposition to the bill; and after a few words from Mr. BELL and Mr. McKIM, the hour having arrived, the House took its usual recess till 4 o'clock.

EVENING SESSION.

The House resumed the consideration of the bill reported from the Committee of the Whole on the state of the Union, "to authorize the issuing of Treasury notes."

The question being on the following amendment, moved on Thursday by Mr. UNDERWOOD, viz:

"That the Secretary of the Treasury be authorized to sell and transfer to the purchaser or purchasers the bonds or evidences of debt executed by the president, directors, and company of the Bank of the United States of Pennsylvania, for and in consideration of the stock held by the United States in the late Bank of the United States, and to apply the money arising from such sale and transfer in payment of any demands upon the Treasury: *Provided, however,* That no sale and transfer of said bonds or evidences of debt shall be made for a less sum than the nominal amount of said bonds or evidences of debt, exclusive of interest."

Mr. CAMBRELENG stated that upon this amendment depended the fate of this bill; because, if it should be adopted, the Treasury of the United States would be in the power of the Bank of the United States. He should therefore ask for a full attendance of the House, and should move for a call, [the House was still thin,] unless some gentleman wished to address the House.

Mr. HOPKINS, for one, was inclined to vote for the amendment. He could not see how its adoption would place the Government in the power of the United States Bank. The object in selling them was to command an amount of gold and silver to meet the wants of the Treasury; and admitting the bank would become the purchaser, so much specie would be drawn from its vaults, and he did not see how Government could be injured by having a debt thus paid in advance.

Mr. CAMBRELENG wished to state that he had not said the United States Bank would be the direct purchaser, but that the bonds would be bought up by the agents of the bank.

Mr. HOPKINS then addressed the Chair as follows:

Mr. Speaker: I have not risen, sir, to take part in this already protracted debate, but to reply very briefly to the extraordinary declaration this moment uttered by the chairman of the Committee of Ways and Means, [Mr. CAMBRELENG.] He said, sir, "that upon this amendment depended the fate of the bill; because, if it should be adopted, the Treasury of the United States would be in the power of the Bank of the United States." For one, sir, I was favorably inclined to the amendment offered by the gentleman from Kentucky, [Mr. UNDERWOOD;] but if the chairman of the Committee of Ways and Means can convince me of the truth of his remark, I will most cheerfully relinquish my determination to support the amendment. But, Mr. Speaker, I must beg leave to say that such cannot in my judgment be the operation of the amendment under consideration. Nor do I believe that any unprejudiced mind in this Hall can come to such a conclusion. What does the bill propose, sir? To authorize the Secretary of the Treasury to issue Treasury notes to the amount of ten millions of dollars, for the redemption of which the faith of the United States is solemnly pledged. And why is this measure proposed, but to supply the Treasury with the means of meeting the various demands upon it? Well,

sir, what does the amendment which has thus been denounced propose? Nothing more than to authorize the Secretary of the Treasury to negotiate a sale of the bonds held by the Government upon the Pennsylvania Bank of the United States, provided they can be sold for the nominal amount of them, and apply the funds thus obtained to the uses of the Treasury. If, then, this object, the first contemplated by the amendment, can thus be attained by the use of means belonging to the Government, why, I ask, sir, shall we not adopt it? Why hold up these bonds, if we can convert them without loss into available funds? Sir, it will be difficult to furnish any one good reason against the adoption of the amendment, if in other respects it be free from the objections urged against it, and which I will now briefly notice. It is contended, sir, that the amounts of the bonds in question are so large as to exclude from competition individual or private capitalists; and hence they will be purchased in Chestnut or Wall street by the agents of the bank. I am willing, for the sake of argument, to admit that such may be the case, but still I deny the truth of the declaration that the Government will thereby be placed under the control of the "defunct monster," which so constantly haunts the imagination of the chairman of the Committee of Ways and Means. Nor can the Government lose a dollar by thus throwing into the market a fund unsuited to the investment of private capital, and which it cannot divide to suit the means and capacities of purchasers, because the same amendment contains another provision which puts this argument to rest, by expressly prohibiting the Secretary from selling the bonds for any thing less than the nominal amount of them. Let us, then, suppose that the bonds are purchased by the agents of the banks upon the terms proposed in the amendment, and what is the necessary and inevitable result? Why, sir, according to my understanding, so far from placing the Government under the control of the bank, we should realize in advance the payment of a debt due in one, two, and three years, and that, too, in the gold and silver of the frightful monster itself.

Mr. Speaker, I have always entertained great respect for the opinions of the chairman of the Committee of Ways and Means, [Mr. CAMBRELENG,] but upon this subject I must be permitted to think that he is under a strange and most palpable delusion. Sir, can it be that I mistake the true operation of this amendment? Can it be that the withdrawal of six millions and a half of specie from the vaults of the bank, and transferring it to the Treasury, will increase the dependence of the latter, or the power of the former? No, sir, the proposition is absurd in the extreme, and I cannot and will not assent to it.

But another objection has been made to the amendment, to which, whilst I am up, I will reply. It is apprehended that these bonds, with the endorsement of the Government, might find their way to Europe, and thus increase the foreign balance against us. I am willing, again, for the sake of the argument, to admit the truth of this objection; but I beg those who give to it any consideration, to bear in mind that, under the amendment, we must receive for the bonds their nominal amount in available funds, and whether we receive it from our own capitalists or those abroad, we shall be upon safe ground, so long as we receive in return the same amount in gold and silver. But gentlemen forget to remember that this objection applies with equal force to the bill, without the amendment, because your Treasury notes, issued by the authority and upon the faith of this Government, will be just as likely to cross the great waters, and increase the foreign balance against us, as the bonds which we propose to sell, with this difference in favor of the amendment, that the bill without it may increase that balance against the Government, whilst the amendment would only increase the balance against the "the monster."

H. OF R.]

Treasury Notes.

[Oct. 6, 1837.]

Mr. Speaker, I prefer the amendment for another reason. I regard these bonds as a legitimate fund belonging to the Government, and am willing to make them available if I can to the Treasury, rather than saddle the nation with another public debt, as we must do, by the passage of the bill upon your table. Much, however, as I deplore that evil, I would, if no other alternative was at hand, adopt it to save the Treasury of the nation from bankruptcy. But, by adopting the amendment, you supply the wants of your Government, and, at the same time, avoid the necessity of creating a debt, which must be paid under your unjust and unequal system of taxation. And why, Mr. Speaker, permit me to ask, should we reject the amendment, if the only object be to replenish an exhausted Treasury with a hard-money constitutional currency? Sir, I confess that the strong repugnance manifested from a certain quarter, for every proposition to replenish the Treasury save one, and the pertinacity with which that one is supported, has awakened my suspicion as to the true character and object of the measure. If we propose to sell our bank debt, it is objected to, although warmly recommended by General Jackson in 1834, in whose footsteps gentlemen were once wont to tread. If we propose to authorize the Secretary to borrow money upon the faith of the Government, the measure is objected to. If it is proposed to prohibit the Secretary of the Treasury, and subordinate disbursing officers of the Government, from circulating their notes in payment of public dues, whilst they have on hand and in their custody gold and silver sufficient for the purpose, that measure, too, is objected to. And I repeat, sir, with none other than feelings of profound regret, that the discussion which has taken place upon these several amendments has excited my suspicion, and I now declare it.

I have heard, sir, in the progress of this debate, sentiments advanced upon this floor, by some of my political friends, against which I must enter my most solemn protest. An honorable and esteemed colleague of mine upon my left [Mr. RIVES] took occasion yesterday to propose an amendment to this bill, the object of which seemed to be to facilitate the circulation of the Treasury notes as a paper currency. He is reported to have said that, "while they (Treasury notes) met and relieved the wants of the Government, they would equally meet the great wants of the people by giving them a uniform circulating medium." And again he is reported to have said that "these notes (Treasury) would at once reduce the balance of exchange with England; and this would operate to prevent their depreciation. Treasury notes, he says, would circulate better without bearing interest than with a low rate of interest, and were the amount \$40,000,000, instead of \$10,000,000, it would be a safe and salutary measure, and the very best thing Congress could do." Now, sir, these are sentiments which I was not prepared to expect, and to which I can never subscribe. Sir, at the time that these remarks were made by my colleague, in favor of his amendment, I was gratified to believe that the chairman of the Committee of Ways and Means dissented from them. But that gentleman has since assumed grounds in debate, which satisfies my mind that he too looks to and advocates this bill as something more than a means of furnishing an embarrassed Treasury with hard money to meet the demands upon it. Mr. Speaker, I pray gentlemen to pause, and review the sentiments they have avowed. I implore them to pause before they give their consent to a measure fraught with consequences so dangerous as the emission of a Treasury paper currency, based upon the public faith, and controlled by the will of one man, already clothed with extraordinary powers. Our present Executive may be honest and trustworthy. I hope and sincerely believe he is—but even to him, sir, I will not consent to surrender a power of such a fearful character. But, sir, it is not the part of prudence, or a wise forecast, to legislate in reference alone to the

present incumbent of the Executive chair; but we should look to the future with a jealous eye, and guard with care and circumspection the liberties of the people from the grasp of unhallowed ambition. I will not stop now to dilate upon the evils, or dwell upon the ruinous consequences, which must follow the establishment of a system which, once matured, will, in my humble judgment, be far more dangerous to the institutions of our country and to the liberties of the people, than that "defunct monster," whose ghost seems to be constantly flitting before the affrighted imaginations of gentlemen here who support this measure, which I fear is the precursor of a system of Government paper currency, which, in the list of "monsters," might well be called "legion."

The amendment, however, does not propose a sale of the bank bonds, as the only means of relief to the Treasury, but goes further, and in the event that this measure shall fail, then the Secretary of the Treasury is authorized to borrow an amount of money upon the faith of the Government equal to the nominal value of the bonds. And, sir, the honorable mover of the amendment has signified his willingness so to modify the second section of his amendment as to leave it to the House to say what sum may thus be borrowed for the use of the Treasury; and still it is objected to, not because it will not meet the emergencies of the Treasury, but because it supersedes the issue of ten millions of inconvertible Treasury paper currency, which the Government cannot, and will not, redeem upon presentation.

Mr. Speaker, I am in principle a hard-money man, and I have the satisfaction to believe that the patriotic people whom I have the distinguished honor to represent upon this floor prefer the constitutional currency of our fathers to any paper money, your Treasury notes included. But, whilst I say this, I desire that it shall be distinctly understood that I am not to be enlisted in the contemplated crusade against the existing institutions of Virginia and her sister States, to accomplish the narrow object of supplying the Government alone with the constitutional currency; and I now admonish gentlemen that, until they propose a measure broad and comprehensive enough to separate the great body of the people from the banks, I will not co-operate with them in giving effect to a partial restricted measure, which furnishes a hard-money currency only to them, who, in the better days of our republic, were regarded as the mere servants of the people, and considered amenable to them. Now, sir, I am not the man to advocate here, in my representative capacity, any measure which will provide gold and silver for myself, and other functionaries of the Government, whilst the people are left to endure all the evils of a depreciated paper money.

But I have another objection to the details of this measure, growing out of the palpable injustice which must result, from the denominations of these Treasury notes, to the poorer classes of the community. If, sir, as is now too obvious for the most incredulous to doubt, these notes are to circulate and perform all the functions of a paper currency, they cannot reach the pocket of the poor man, but must serve alone the purpose of the wealthy, who alone can command the benefit of a currency in denominations of one hundred dollars. Another effect of this measure, I fear, will be to cripple still more the State banks, now rapidly recovering from the shock by which the whole monetary system of the community has been so recently convulsed to its centre; and, whilst it may relieve the Government, may at the same time embarrass still more the great body of the people.

But, Mr. Speaker, in every aspect of this question, looking to it not as a party question, but one purely financial, my mind still inclines me to the amendment, as the most safe, wise, and salutary, and certainly most compatible with the constitution. Sir, there is another feature in the

OCT. 6, 1837.]

Treasury Notes.

[H. OF R.]

amendment which commands my approbation, and it is this: it proposes a plain, direct, and unequivocal mode of accomplishing the very object which gentlemen profess to have in view—the relief of the Treasury. And, for one, I prefer, sir, to plant myself upon that plain provision of the constitution which authorizes Congress “to borrow money upon the faith of the United States,” and thus to meet and provide for the exigencies of the Treasury, rather than adopt the measure proposed by the Committee of Ways and Means, which, if not of doubtful legality, is in every way exceptionable in policy. But, Mr. Speaker, I fear that this Treasury currency is relied upon to give life and vigor to the new scheme, now for the first time recommended, of separating the Government from the banks, whilst the people are left to struggle with all the evils of a paper currency. If so, sir, I, for one, shall hesitate, as one of the administration party, before I can take to my embrace a bantling which, I fear, is the mere precursor of a bank and a paper currency far more formidable and dangerous than any to be found in the history of this country. Sir, I am opposed to that indirect, ambiguous, and equivocal system of legislation which characterizes the measure under consideration, as calculated to destroy that check upon our conduct here which will ever result from an effective and practical responsibility to our constituents; and hence, in my poor judgment, we should always provide by an actual appropriation for every loan which we authorize, and which is not done in the bill upon your table. I know, sir, that in these times such sentiments are likely to be regarded as old fashioned or radical; but the time will come, must come, when they will be appreciated. That system of indirect legislation, which seeks to avoid a just and full responsibility to the people, may be submitted to for a time, but will in the end receive its merited condemnation by an abused and indignant community of intelligent freemen.

I am not, I hope, sir, mistaken or misunderstood upon this subject. I am willing to extend to the Treasury immediate and ample relief, by any means compatible with the constitution and my convictions of public duty; nor will I be drawn from this determination by any doubt which may be entertained as to the real amount necessary, nor by the asperities of party intolerance, the prominent bane of our deliberations and councils here. Yes, sir, I am willing, and stand ready, to vote any sum, in the bounds of reason, which the Secretary of the Treasury may consider necessary to meet the most liberal wants of the Government; and if he asks more than is necessary, I leave him to his just responsibility to the country.

Sir, I am opposed to this measure, not as one of financial relief, but one for the emission of ten millions of paper currency, obnoxious, as I conceive it to be, to all the objections of an executive bank, based not upon the means of immediate convertibility, but upon the plighted faith of the nation, which I maintain can be pledged only for a loan. In my humble judgment, sir, this project is fraught with mischief; and I look to it with the deepest distrust and alarm. Admonished as I am, by a short experience in the practical administration of this Government, that its tendency is to enlarge its powers by gradual and imperceptible innovations upon the rights of the States and of the people, I look to the future with all the forebodings of one fully impressed with the solemn conviction that, if not resisted, and successfully resisted, at the threshold, it will end in consolidation, and consolidation in the overthrow of our institutions and the downfall of our liberties.

Sir, it has been well remarked, in the progress of this debate, that money is power; than which none is more mercenary in its insinuations, or more difficult to resist. It connects itself with every class, and every interest, and addresses itself to every passion of human nature, and constitutes, in the hands of ambition, the most potent engine for mischief and oppression. Pardon me then, sir, in view

of the extraordinary powers already vested in the Executive, if I pause when asked to go another step—to arm that branch of the Federal Government with a power to convert the public faith into a banking capital for the emission of an inconvertible paper medium, subject to no other law than the uncontrolled will of one man!

In conclusion, Mr. Speaker, I beg leave to repeat my most perfect willingness and anxiety to replenish, by any lawful means, the national Treasury. I prefer first to apply the means already on hand, as contemplated in the amendment offered by the honorable gentleman from Kentucky, [Mr. UNDENWOOD.] If that proposition shall fail, then I shall prefer a direct loan, to be redeemed by the bank debt, when it shall be received by the Government; and I would set it apart by law for that specific purpose. If that proposition be also negatived, and the House determine to authorize the proposed emission of Treasury notes, then I shall be in favor of these notes bearing interest, under the hope that their circulation, as a currency, may in that way be prevented, and the Government compelled to convert them into money. If these several propositions be rejected, I shall find myself placed in a situation of extreme solicitude, anxious to extend relief to the Treasury by any and every mode sanctioned by the constitution and the long-established usage of the Government, but compelled to withhold relief, only because an unrelenting majority in this House will have no other measure of relief, than one which I am constrained to regard as dangerous to the stability of our free institutions, and subversive of the liberty and prosperity of the people.

Mr. Speaker, I will not detain the House longer by the expression of any apprehensions of my own, as to the objects of this measure, or the danger of its ripening into a permanent system. I feel as sensibly as any man can do, the magnitude of the consequences which such a system cannot fail to produce. I hope, sir, most devoutly, that my fears may never be realized; but I should be unfaithful to my constituents and my country, if I did not declare, fearlessly, that I look to the present measure as laying the foundation of a system which, if ever established, must end in revolution or despotism.

I will not detain the House either, sir, by inquiring into the causes of our pecuniary embarrassment. I am content to leave that to others, who deem it a fit subject for present discussion. I will act the humbler part in this emergency, of one who might chance to see the Treasury on fire, that would not stop to inquire into the cause or manner of the conflagration, but aid in the immediate extinguishment of the flame. I will say, however, that, great as the real distress may be, I am satisfied it has been greatly magnified; I am, nevertheless, ready and willing to afford any relief, within the power of Congress, to all classes and to every interest in our common country. I am one of those, sir, who look more to the energies of the people, and resources of the country, for permanent and substantial relief than to any measure which we can devise.

Excuse me, sir, for this day declaring in my place, that my sympathies do not incline me so much to minister to the insatiable appetites of federal officeholders, as to the amelioration of the condition of the great body of the people, upon whose honest contributions we all depend. And let me now say to my political associates, that no party considerations shall ever enlist my humble aid in the co-operation of a measure which looks only to the advancement of the few, to the injury and oppression of the many. There are, sir, occasions fit and proper, in my judgment, for the exercise of party preference and party feelings, but these occasions are always secondary, and ought to be made subordinate to the higher considerations of the country and the furtherance of sound political principles, which constitute the only ligament which ought to connect and unite us in our party associations.

H. OF R.]

Treasury Notes.

[Oct. 6, 1837.]

Mr. Speaker, I am deeply impressed with feelings of gratitude to the House for its kind indulgence, and still more for the patient attention with which my very desultory remarks upon this occasion have been heard. And whilst for this manifestation of the kindness of the House, I return the humble tribute of my most profound acknowledgement, I am not vain enough to take as a compliment to myself what I am sure has been alone due to the importance and magnitude of the subject under consideration.

Mr. WISE eulogized his colleague on the course he had just taken. He was glad to find displayed so honorable and independent an opposition to the bill. Mr. W. then read several extracts from President Jackson's messages of 1834 and 1835, to show that the sales of Government stock in the United States Bank had been recommended by the President at those periods.

Mr. UNDERWOOD said, in consequence of what had fallen from other members in the course of the debate upon his amendment, he desired to make a few explanatory remarks. The gentleman across the way [Mr. PATTON] expressed great surprise at the quarter in which the amendment originated; while the member to my left [Mr. CAMBRELENG] is astonished that the gentleman from Virginia should have felt any surprise, since the amendment had been proposed by a known friend of the bank. It may be inferred from these statements that I have been actuated by some sinister motive; that I have designed to promote the interest of the bank at the expense of that of the country. [Mr. CAMBRELENG disclaimed any intention to impute an unworthy motive to Mr. U., who continued.] I have never (said Mr. U.) been connected with the late Bank of the United States, or the present bank of that name, in any manner which could bias my judgment. I have never owned one dollar of stock in either. I have never borrowed one cent from either bank on my own account. I have been compelled to pay considerable sums to the late bank, as surety; and, with that exception, have had no transactions with these banks. At this time I am not the debtor of the bank in any way. I know, sir, that I am wholly uninfluenced in offering the amendment by partiality or hatred to the bank.

My amendment is based upon a very obvious principle. If I owe money and have it not, I am bound by law and morals to get it. If a neighbor owes me, or I have his bond not yet due, I may and ought to raise the money upon the debt thus owing to me, if I have no better means. If I can sell my neighbor's bond, without sacrifice, to pay my debts, who can or will blame me? I do not injure him, and I benefit myself. Now, sir, apply the case. The Government wants money; it holds bonds on the bank; it owes debts and must pay them; my amendment proposes to sell the bonds without sacrifice, and apply the proceeds in discharge of what the Government owes. I prefer this to the creation of a national debt, by issuing Treasury notes or by borrowing money; but, to guard against the possibility of failing to sell the bonds for their nominal amount, I provide, in case the bonds cannot be sold, that the Secretary may borrow six and a half millions. I consider it my duty to grant all the facilities necessary to maintain the credit of the Government, and to give vigor and health to its operations, and I never will be influenced by a spirit of factious opposition to any administration.

I have accepted the amendment proposed by the gentleman from Virginia, [Mr. PATTON,] because it can do no harm, and it may afford some additional facilities to the Secretary of the Treasury. He now draws checks or drafts on the deposit banks, knowing at the time they will not be paid. If the creditors of Government will accept such drafts hereafter, let them do it. Perhaps the banks may pay some, and if they will not, then let those drafts be received in payment for duties, taxes, or public land. This practice cannot make things worse. It may relieve, to

some extent; and I therefore accepted the gentleman's amendment as a modification of my own.

Some gentlemen have supposed that the limitation which my amendment contemplates, in regard to the amount to be borrowed, is objectionable. They apprehend that six and a half millions is too small a sum. I am satisfied that it is amply sufficient. But, out of deference to the opinion of others, I will defer offering that part of the amendment until the House has decided on the first part of my proposition. If the first part be accepted, I will then offer the second, leaving the amount blank, so that the House may fill it at its discretion.

In these amendments I have had no intention to embarrass the Government. I have been actuated by a sincere desire to support, instead of pulling down. And I cannot help wishing most ardently that the scheme I have presented may find favor with a majority of the House. I shall feel happy, very happy, if my offered substitute is accepted in lieu of the bill—a bill which lays the foundation for a Government bank and paper money, subject to the control of the President of the United States. Sir, if the day ever comes when the Executive of this nation shall control at his will and pleasure a Government bank, with millions of money, through such agents as he may choose to employ, removable at his pleasure, lending it out in such sums and to such persons as he pleases, that day will be signalized, in the annals of time, for the overthrow of American liberty!

I did not rise to make an argument or to go at large into the discussion. The whole subject has been ably debated by others, and by none more so than the gentleman to my right, [Mr. HOPKINS,] a son of the Old Dominion—a native of the same county where I drew my first breath; and whose speech and nativity combined have produced in my bosom very fraternal feelings towards him. I am anxious that my amendment may be tested by the vote of the House without further delay.

Mr. HAYNES replied to Mr. WISE that the sale of the bank stock severed all connexion of the Government with the bank as a partnership concern; but that was no reason Government ought not still to hold the bonds of that institution taken in payment for the stock.

Mr. WISE said that these bonds were a mere liquidation of the account of value of the stock; and, while the Government held them, the connexion still continued as though it held the stock.

Mr. McKAY would have no objection to the sale of these bonds, if it could be done fairly, for their full value; but this would take time, and the Treasury must have immediate relief. He denied that the bill was deceptive; every man, on reading it, must perceive it was a bill for a loan; what else was it?

Mr. ROBERTSON rose and said, if the administration had no other object in view than to raise a sufficiency of money to meet the real wants of the Treasury, he was at a loss to comprehend the cause of these persevering efforts to raise it by the issue of Treasury notes. The amendment of the gentleman from Kentucky, [Mr. UNDERWOOD,] as modified, proposed to give the right to dispose of the debt of about six millions due from the Bank of the United States; and that of his colleague, [Mr. PATTON,] if he understood it, to superadd the power of drawing upon the State banks, which held ten or twelve millions of public money. If these resources should prove insufficient, authority might be conferred to borrow whatever sum might be necessary to make up the deficiency. But none of these obvious and ordinary methods of replenishing the Treasury will now answer the purpose. Nothing will do but to resort to the extraordinary and dangerous resource of an issue of Treasury notes. In times of great difficulty, when engaged in war with one of the most powerful nations of Europe, we were compelled, from sheer

Oct. 6, 1837.]

Treasury Notes.

[H. or R.]

necessity, to adopt that method of raising supplies. During the Revolutionary war we had issued upwards of three hundred millions in bills of credit, and at its close these bills were so depreciated that they were funded at 100 for 1. Such were the evils attending the system, that the framers of the constitution, to guard against their recurrence, thought it necessary to interdict the States in express terms from emitting bills of credit. I will not, sir, (said Mr. R.,) at this time enter into the question whether the power thus prohibited to the States rightfully belongs to this Government. There is much force, all must admit, in the reference made by the gentleman from Massachusetts [Mr. Cushing] to the journal of the convention, showing that a proposition to clothe this Government with the power was expressly overruled. With those who rely on the same ground, not verified by the journal, but depending on the memory of members of the convention, as an argument against the power to establish a national bank, this reference ought to be conclusive. Certain it is, that the power was not expressly granted, as were those to lay taxes and borrow money; and the rule of interpretation, as given by the constitution itself, is, that the powers not delegated to the United States, nor prohibited to the States, are reserved to the States or to the people. It is obvious that its exercise by the General Government is equally dangerous; indeed, liable to much greater abuse. The States can effect none, to any considerable extent, except those within their respective limits; but we may inundate the Union with a spurious currency; and when the system shall be once commenced, no one can undertake to say where it is to stop. During the late war, immediately after it was declared, Congress again resorted to an issue of Treasury notes—at first upon a moderate scale, only five millions of dollars. But from time to time, other and larger issues were authorized, until, at the end of two or three years, twenty-five millions were authorized at a dash. So it may be again. We begin now, in a period of profound peace—for I will not dignify the Indian hunt in Florida with the name of war—with an issue of ten millions for the service of this remnant of the year. Those who urge the measure may mean in good faith to go no further. But who shall say, when we have once tasted the sweets of the poison, when we have indulged in the practice of raising money by this pernicious process, without incurring responsibility, to what extent it will be carried? What is now proposed as a temporary expedient may become the settled policy of the Government. Sir, I protest against it as a dangerous practice. *Obsta principiis.* Our only safety is in resisting it at the threshold.

Let us for a moment, Mr. Speaker, look to our actual position; and we cannot but be amazed at the point to which we have arrived. But a few months since, the late President congratulated the country on the success of his efforts to restore a sound, constitutional currency. But one short month since, the present President gave his recommendation in favor of a hard-money system, as the only one proper for the Government to tolerate. He seems disposed to reject convertible paper, even during the present difficulty of procuring the precious metals. And now it is gravely proposed to manufacture ten millions of paper money for circulation, not only without a specie basis, but without the pledge of any definite fund for its ultimate redemption. But, sir, strange as this may appear, the scheme is not altogether a novelty. A petition was, during the present session, referred to the committee of which I have the honor to be a member, (Judiciary,) from a Mr. Sargent, of South Carolina, for the establishment—not of a coin mint, for there is one, he says, already—but of what he calls a general print mint at Washington, for the emission of paper money to the amount, perhaps, of two hundred millions of dollars, as a currency for the United States. The money to be manufactured he proposes to

call "print," from the first syllable of the word "printing;" as the first syllable of the word "coining" gives the name of "coin." So that the thing may be readily understood. When you receive hard money, you are to say I was paid in coin; when you take paper, I was paid in print. His plan is given in detail, and, as you may suppose, sir, was the subject of merriment, of derision, in the committee room. The committee did not deign to give it a serious consideration. It served only to excite their risible muscles, and to create no very favorable impressions of the state of the petitioner's understanding. Well, sir, to my great surprise, here is the scheme before us—not corresponding in amount, but pretty much the same in principle—gravely proposed by the chairman of the Committee of Ways and Means; the establishment of a manufactory of paper money—a print mint here in Washington. We begin at length to understand what the exclusive friends of a hard-money Government mean by the term. They are to issue bits of stamped or printed paper, and call them—not "print," as Mr. Sargent honestly calls his—but gold and silver. Yes, sir, the gentleman from Maryland, [Mr. McKim], deeply versed in all moneyed concerns, and who has been so highly complimented for his financial talents, tells us, in so many words, these ten millions of Treasury notes are ten millions of gold and silver. When the gentleman made the remark, he forcibly reminded me of my Lord Peter, in the Tale of a Tub. The anecdote, no doubt, is familiar to all. Beef, it had been said, contained the quintessence of partridge, and quail, and venison, and wild duck; and so, my Lord Peter insisted, did his wheaten loaf. In this conceit, he invited his brethren to dine with him. The repast consisted alone of this wheaten loaf. He asked them if they would eat a bit of the mutton; and, when they assented, cut his loaf, and handed a slice to each. They supposed he was jesting; but, finding him in earnest, they remonstrated, and had the boldness to deny that bread was mutton. Lord Peter argued the point with them for some time; but finally cut the matter short with this unanswerable argument: He said he would affirm it to be as good mutton as any in Leadenhall market; and, if they did not believe it, they deserved to be eternally damned. So, sir, the gentleman from Maryland tells us his Treasury notes, his "print," is gold and silver—nothing less; and all who do not credit it are to be condemned outright as mere infidels and heretics. Sir, it is not gold and silver, nor their equivalent. The Government may as well issue the German silver cents recently coined by the man with the Dutch name, (Feuchtwanger,) and tell us each is a coin of pure gold, of the value of \$10,000, as to stamp worthless paper, and tell us it is gold and silver, or of equal value with them. It will depreciate, as it has always depreciated. Indeed, unless I am misinformed, it is destined to commence its circulation considerably below par.

[Mr. WISE here remarked that the fact was as his colleague had stated it. He held the document in his hand that proved it.]

Mr. ROBERTSON. Will my colleague oblige me by reading the proof to which he refers?

[Mr. WISE read from the document a letter to the Secretary of the Treasury from Ward, Prime, and King, relative to the value of Treasury notes in the market. Mr. CAMBRELENG observed, that was a letter from the gentleman's own friends.]

Mr. ROBERTSON resumed. The gentleman from New York says this offer is from our own friends; yet I am told it is the best that has been made. I have not the honor of being acquainted with these friends of ours, but I am happy to learn we have such, who will give more for the Government paper than the friends of the gentleman and of the administration. This, then, is the true state of the case: our paper is actually dishonored in ad-

H. or R.]

Treasury Notes.

[Oct. 6, 1837.]

vance; and gentlemen who will not lower the dignity of the Government, by selling the bonds due to us, or by borrowing money, are ready to throw our own paper into the market at a discount of six or eight per cent. Sir, I cannot agree to it. These Treasury notes, if really intended for the purpose of raising revenue, are unnecessary. There are other and ample resources at the command of the Government. If designed for circulation, they are both unnecessary and unconstitutional. Why should the Government discredit and reject the currency of the States—that which our State Governments accept in payment of taxes, and which our citizens receive from each other? It would be regarded as oppressive in the State Governments, dishonorable on the part of individuals at this time to exact gold and silver. Why should this paternal Government of the United States not receive what the State Governments receive—what, indeed, our people alone can procure? And what right, permit me to ask, has this Government to create a paper currency? They have a right to coin money, and regulate the value thereof, and of foreign coins; but they have no right to put a stamp upon paper, and call that coining money. The constitution nowhere warrants such a process.

In every aspect, Mr. Speaker, this scheme appears to me substantially the establishment of a Government bank. If the paper be designed as a circulating medium, the Treasury becomes a bank of issue and circulation merely. But the scheme goes further. It authorizes not only the payment of these notes to public creditors, but the borrowing of money upon their credit. What is this in effect, but a banking operation? You apply to the Secretary, who is thus authorized to borrow, and propose to lend him half a million or a million of dollars. He is not in immediate want of the money. You offer, for a given sum in Treasury notes, to supply him with one or two hundred thousand dollars monthly, in munitions of war, in rations, or in money, until an amount equal to the value of the notes in the market shall be furnished. There is nothing in the law to prevent such a negotiation.

But how does it differ in substance from a bank loan? In a negotiation with the bank, you give your note, and usually receive the notes of the bank as money. In that supposed with the Secretary of the Treasury, you give your note or agreement, and receive Treasury notes—the notes of the Government—which are to answer all the purposes of money. In form, you are the lender; in effect, the borrower. Call the plan by what name you will, it is a bank in its essential features, or destined, if persisted in, to become one. It is now but in the egg state; and I would crush it in the egg.

I am opposed to it, Mr. Speaker, in every form in which it can be presented; though I shall vote in favor of the amendment of the gentleman from Kentucky. It is not that I doubt the good faith of the Government, or its perfect ability to redeem ten times the amount authorized by the bill. It is because I believe the measure unnecessary, if not unconstitutional. It is because all experience has shown that the power of raising money in this form, evading a direct responsibility, is fraught with mischief. It will be abused, as it has always been abused. I will resort to any and every other usual method of supplying the necessary wants of the Government. I will vote for six millions, or ten millions, if really needed; to be raised by a sale of our claims upon our debtors; by way of loan, or by a tax; but I will vote for no issue of Treasury notes, for no indirect loan, nor for any sum whatever to create a surplus beyond the actual wants of the Treasury.

Mr. LEGARE rose and said: If the House will indulge me, sir, at this late hour, I will make a few remarks upon the subject before it.

I candidly confess I have been all along favorable to the issuing of these (Treasury) notes, without interest, or

bearing very small interest—two or three per cent. at the outside—because I thought they would answer, and answer very effectually, the double purpose of relieving the Government, and relieving, in almost an equal degree, the great body of the people. I have no dread at all of such an issue leading to a system of paper money, as has been said here and elsewhere. For one I go for no such system. I do not claim for the Government the right, under the constitution, of furnishing a circulating medium, as such, to the community. But there is no such power involved in the amendment on your table, or in that modification of it to which I have just alluded, and which I greatly prefer. It is one of the simplest and most usual forms of borrowing money, within the very letter of the constitution. That power is vested in Congress without any qualification or reserve whatever, as to the manner in which it shall be exercised. By what authority—with what color of plausibility, can gentlemen pretend to say to us, you may borrow thus, but not thus—this form of loan is legal, that an unheard of and flagrant usurpation? Can it be pretended that the founders of this Government, looking forward to the infinitely diversified exigencies of a society intended to be perpetual, spreading over a country vast, almost beyond description, in extent, exposed to all the vicissitudes of peace and war, of prosperity and distress, deliberately deprived it of a means of raising money, to which it has already been forced, on a memorable occasion, to resort, and which is perfectly familiar in the practice of every Government in the civilized world; and that, too, when the power is conveyed in terms as large and comprehensive as language can be? I say, sir, that this convenient form of loan, which consists chiefly in anticipating to meet casual exigencies, the current revenues of a country, is to be met with everywhere in Europe. Every body has heard of the distinction between floating and funded debt. In England there is always a large amount of exchequer bills in the market. The securities of the Bank of England consist almost exclusively of them, as combining safety and convenience in the highest possible degree. In the continental States, Treasury bonds are just as common. In short, if we were not the only people upon earth so happy as to know only by hearsay of the expedients to which, in the conduct of difficult affairs, States are everywhere compelled to resort, gentlemen would scarcely express such *naïve* astonishment and alarm at one of the most usual of them.

But I repeat it, sir, I am not committing myself to the doctrine that this Government has, under the constitution, an unlimited control over our currency, either in this or in any other form. You know, Mr. Speaker, what my opinions are upon that subject, from those generally entertained in the part of the country which I have the honor to represent. I have done too much in my humble way to fortify and to diffuse those opinions; I know too well their importance, in a Government constituted as this is, to the weaker part of the confederacy, and especially now that that weaker part seems threatened with serious aggression, to abandon them, nay, nor to bate one jot of their rigor and sternness, for the sake of a mere momentary relief and convenience. I admit that when this House is called upon by the Executive to issue Treasury notes, as in every other case of loan, it ought to see that the Government really wants money, and wants it too for *bona fide* federal (not national, as they are called, or notional) purposes. That is the restriction, sir. That is the sound practical rule from which I will never consent to depart; and if I did not think that it applied to our actual situation, I should oppose not only the bill on the table, but every other bill for raising supplies at the present moment. But the case presented, and, so far as I have been able to consider the matter, made out by the Executive, is that, without pressing with a most rigid and probably ruinous severity upon its

OCT. 6, 1837.]

Treasury Notes.

[H. OF R.]

debtors, the deposit banks and the merchants; without aggravating, beyond expression, the calamitous condition of the times, it must resort to you for temporary aid—for authority to anticipate the fruits of our returning prosperity, without formally laying the foundation of a new national debt, and to create a species of loans, which will not only furnish you with the means you want, but, incidentally, relieve the embarrassments of the community, and, especially, in the great and important interests of our domestic exchanges.

But, says the gentleman from Virginia before me, (Mr. WISE,) you are turning the Government into a bank—you are creating a great political corporation to trade in money, at the very moment that you decide it to be inexpedient to charter a commercial corporation for the same purpose. Why, sir, according to this very novel definition, every debtor is a banker—it is the borrower, not the lender, that belongs to that privileged class. (A laugh.) If this is true, we are a nation of bankers,—[“So you are,” from Mr. WISE]—“over-banked,” to use the common phrase, with a vengeance. But on what possible ground can such a proposition be advanced? The States, it is said, are forbidden to issue bills of credit. What are bills of credit? Mr. Madison, as appears from one of the documents laid upon our tables, in a letter to a gentleman of some distinction in Pennsylvania, affirms, without hesitation, and as a thing quite settled, that it is of the very essence of such paper—its distinctive characteristic, its specific difference, so to speak—that it be made a legal tender.

[Mr. ROBERTSON, of Virginia. It has been decided otherwise.]

Mr. LEGARE. Where, when, by whom?

Mr. ROBERTSON. By Judge Story.] (Cries of “go on, go on.”)

Mr. LEGARE continuing. Sir, I will examine the correctness of that opinion presently. In the mean time, I beg leave to state to the House that Mr. Madison only repeated, in the letter alluded to, the opinions which he had previously either expressly or implicitly advanced, not casually, loosely, or inconsiderately, but in the most deliberate manner, and on the most momentous occasions. In his first message to Congress in the session of 1815-’16, he goes even further than in that letter—further, as I have said, than, as at present advised, I am quite willing to follow him. He distinctly presents in that state paper, the alternative of a national bank or a Government currency. Now, sir, I feel that I owe it to the House and to truth, I owe it to my own station here and the candor which I ever feel myself obliged to practise in debate, to state that General Hamilton, in his celebrated report upon the bank in 1791, does seem to treat such Government issues as the very description of bills of credit, so notorious under the old order of things, and therefore interdicted forever to the legislation of the States. He admits, indeed, that the interdict does not apply to us, directly, but he very reasonably thinks that it at least hints a rule for the conduct of this Government, which it ought not lightly to neglect. To take up the matter on principle it might well be asked, what harm is done by the issue of paper which nobody is obliged to receive, and every body may profitably use, in payment of public dues? But even if you allow, as I will not undertake to deny, that a mere issue of currency, as such, comes within the prohibition—what do you mean by currency? Is it pretended, for example, that the States, with their vast residuum of political power and public duty, cannot borrow money, and give to their creditors the evidence of debt assignable or unassignable? And if these evidences or acknowledgments of debt pass—as pass in these times of active commerce they inevitably will—from hand to hand, do they become violations of the constitution for that? Sir, it is a false, wild, chimerical conceit that such a notion ever entered into the heads of the majority of

the convention in 1788, or that kindred idea, so often uttered of late, that all banking corporations in the different States, mere private partnerships chartered by the Legislatures, fall virtually within the prohibitory clause. It seems to me nothing short of monstrous to imagine that the States, charged as they are with all the high obligations of civil society—of defence and protection, of police, of education, of justice—with almost every thing that relates to the order and well-being of a community, could have thought, for a moment, of depriving themselves of a resource without which, in modern times, no free commonwealth can possibly manage its affairs without often falling into the most perplexing and even perilous embarrassments. And what is the argument by which it is attempted to lay them under such a disability? Why, that Congress, having the power to coin money and regulate the value thereof, was intended to have a complete control over the currency! Now what is currency, or rather, what, in these times, is not? Where will you draw any practical line between one acknowledgment of debt—one bill of credit, if you please—and another, when in all their effects, commercial and political, they are evidently the same? Sir, having bestowed much thought and research upon this most difficult and important of all the subjects that now challenge the attention of a public man, with opportunities perhaps more favorable to the discovery of truth, and to the forming of correct conclusions for the conduct of affairs, than it has fallen to the lot of most persons to enjoy, and finding, after so many nights and days of patient inquiry, the difficulties which surround this subject almost as many and (to me) as formidable as ever, I have been filled with wonder since I came here at the confident and dogmatical tone of many persons (on all sides) whose conclusions have cost them far less pains, and been adopted without any such loss of time. Among other things coolly taken for granted, is the meaning of this word “currency.” Now, sir, if gentlemen will be at the trouble of looking into the minutes of evidence taken before the committee of the House of Commons charged with the question of the renewal of the bank charter in 1832, they will find that, with the exception of small sums paid away in wages, the whole circulating medium of Lancashire, Warwickshire, the West Riding of Yorkshire, and other, if not all, of the great manufacturing districts of England, consisted at no remote period exclusively of bills of exchange.* The whole circulation, I say, in which the immense business of the most flourishing manufacturing and commercial empire in the world is transacted—and especially that part of its trade which has done so much to enrich both this country and England—is almost entirely composed of common mercantile paper, with which Government, according to the opinions of our people and the genius of our institutions, has, by the confession of all men, nothing whatever to do. Sir, I shall have, I trust, some future and better opportunity of going more at large into that subject, which has, for some time past, so deeply engaged, and I am sorry to have to add, agitated the minds of men in all parts of the United States—I mean the credit system, under which this nation has grown up to be what it is. But I could not but take this

* No. 4206. Mr. Dyer. “By circulation, I mean not merely local notes, but bills of exchange.”

No. 4274. The same. “To deny the Lancashire banks to be banks of issue, because they issue only post notes, is to make a distinction without a difference.”

It is stated in No. 4361, that the banks of Lancashire, at that time, did not issue notes, properly so called, but drafts, at different dates up to three months, upon their agents in London. In 1825, and other times of excitement, they were circulated to an immense amount, and did as much mischief by an enlarged currency of paper as was done in other parts of England by notes.

So No. 3329, *ibid.* “Bills of exchange form at present (1832) the great currency of Lancashire, and they formed almost the exclusive currency, with the exception of small notes paid for wages, till within these last seven years.”—[1825 to 1832.]

Then follows the statement that nine-tenths of all the business of the counties mentioned above are represented by small bills.

H. OF R.]

Treasury Notes.

[Oct. 6, 1837.]

occasion to remark how very loosely, with what a dangerous latitude both of phrase and opinion, we are in the habit of treating these matters, involving as they do all the fundamental interests of society, and of exemplifying the remark in the use of one of the most familiar terms that occur in our debates and declamations. We talk of bank paper as if all the harm done by expansions of currency were owing to it alone. Why, sir, bank notes, even in the times of the most extravagant issues, are but a part, and even a very small part, of the circulation set in motion by the operation of the credit system, at a period of great excitement, in communities advanced in civilization, and having all the facilities of an extended commerce. They are the efflorescence—so to express it—the flower, the blossom of the currency of such a country, essential, I admit, to its perfection and fruitfulness, but no more the whole body and frame of that mighty tree, than that eastern portico is to this capitol. But it is not my purpose to go, at this time, into the consideration of this subject in all its bearings and extent, and I have said already enough to awaken the House to the danger of those loose and sweeping generalities in which it is become so much the habit, in this country, to deal, even in the most important practical concerns.

As to the constitutional power of Congress, then, to issue these notes, under existing circumstances, I entertain no doubt at all, at least with reference to the objections mainly relied on in this discussion, and especially by the gentlemen over the way, [Messrs. FLETCHER, PHILLIPS, and CUSHING, of Massachusetts.] But to the issuing them without interest, or with a very small interest, for which I repeat my decided preference, another difficulty has been presented by my friend from Virginia near me, [Mr. ROBERTSON.] He maintained that as the constitution forbids any thing but gold and silver to be made a legal tender by the States, it implicitly requires that we should pay the debts of this Government only in specie or in what is equivalent to it. And yet, in almost the same breath, the gentleman proceeded to denounce the Executive for not being satisfied with the bank notes of the States, which he maintained are really not all depreciated. Sir, on this last head I agree with him entirely, at least so far as regards the state of our paper currency in the Southern States. I maintained when I first came here, what has been since demonstrated in a masterly argument in another part of this building,* and is strikingly corroborated by the recent fall in exchanges, that the price of bullion had been raised by an extraordinary foreign demand, and was no proof whatever of the redundancy of the circulation, which has been very much reduced within the last ten months, and is probably even inadequate to the necessary exchanges of the country, in the usual course of business. But if this is true, as I have no doubt it is, then the right of a creditor under the constitution to demand specie for his debt, becomes that *summum jus* which, all the world over, is *summa injuria*. And if this is the case as between individuals, why should a rule so very different be applied to the transactions of Government? Nay, the news brought us from New York this morning is that, while gold is only at 5 per cent. premium, Treasury drafts are at 4: for you must remark, sir, that the letter of Prime, Ward, & Co., received just now, is dated at least a fortnight ago, and since that time a most decided change has taken place in the specie market as well as in foreign bills. I think, then, I am perfectly safe in affirming that there is no danger whatever of the contemplated Treasury notes falling below what, by the confession of the gentleman himself, ought to satisfy any man not bent upon enforcing a contract according to the utmost rigor of the law, in a manner inconsistent with equity and good conscience. We shall pay our creditors in what is 4 per cent. above those bank notes which are there

acknowledged to be at their full value in reference to all other commodities but gold and silver.

[Here Mr. ROBERTSON said nothing was at par which was not equivalent to gold and silver, or something to that effect.]

Mr. LEGARE. Then why find so much fault with the Government for demanding gold and silver of its debtors? The gentleman is plainly in a dilemma, from which it is not easy for him to extricate himself.

[Mr. ROBERTSON said, with the permission of the gentleman from South Carolina, he would make a brief explanation. He had not at all discussed the question of depreciation. He could not admit, however, that paper money was not depreciated. On the contrary, he insisted that it must always be regarded, in a legal sense, as depreciated when below the legal standard—gold and silver, without regard to the causes, whether it be a foreign demand or any other, which may have occasioned the difference. Still he denied the policy or justice of exacting gold and silver at this time in payment of the public dues; when it could not be procured but at a high premium, and when, indeed, there was scarcely any currency at the command of the people than depreciated paper. He thought it was oppressive in this Government to exact this sacrifice—to reject that which the State Governments were content to receive; and what, in the ordinary transactions between man and man, it would be deemed immoral and dishonorable to refuse.]

Sir, I am charmed to hear the gentleman say so. Then why should the public creditor call upon the Government to do, for his benefit, an immoral and dishonorable thing; and why should he think himself wronged if we offer him what is at this moment four per cent. better than the paper which, according to the gentleman's own showing, ought to satisfy every equitable and conscientious man? But the truth is, I apprehend no difficulty at all from those to whom we shall have payments to make, and through whose hands these notes will, almost without exception, make their way into circulation. They will receive them cheerfully, and without hesitation; and although I perfectly appreciate the delicate and honorable scruples which some gentlemen seem to feel about offering, in satisfaction of the public dues, a paper ever so little inferior to the only legal tender recognised in the constitution, yet I cannot myself, in a matter left, after all, entirely to the free will of the party, consent to sacrifice substantial justice and the public good to what I must consider as a superstitious adherence to the mere letter of the law. Nobody, at all versed in these subjects, now regards the precious metals as any thing but an approximation, and often a very imperfect approximation, to a correct measure of value. They have been adopted from the necessity of the thing, as the two great "commodities of commerce" furnishing a ready medium of exchange for all others, and, on the whole, the best practical means of comparing them; but they are still, like the rest, mere commodities, subject to a very great fluctuation in value, according to the common principles which govern prices. The present state of things furnishes, in my opinion, a striking example of this important truth; and now, I ask, whether any really just man ought to complain of us if we offer him these notes, with the most perfect liberty to refuse them at his own discretion, and treat us as debtors on his unsettled account; if, in making that offer, we hold to him the frank, manly, and reasonable language dictated to us by the truth of the case, and the actual situation of the country—if we say to him "gold and silver, which is in strict law, though not in good conscience, your due, we have none! By an unforced and terrible revulsion, by contingencies beyond any human control, our debtors have been, and are still, unable to meet their engagements with us in the usual way. The country is in deep embarrassment and distress, and we cannot, even were we disposed

* By Mr. King, of Georgia.

Oct. 6, 1837.]

Treasury Notes.

[H. OF R.]

to do so, press them to a literal compliance with their contracts, without involving our whole people, more or less, in the fearful consequences of the bankruptcy that would probably ensue. We give you, however, an acknowledgment of your claims against us, which will be every where nearly as good, in some parts of the country probably better, than the precious metals—which, at all events, is at a premium, in reference to what you would not hesitate to receive from a private debtor; and we put it to your patriotism and your sense of justice, to decide whether we have not, to all substantial purposes, complied with our engagements." Sir, depend upon it, such an appeal to the good sense and the generosity of our fellow-citizens will not be made in vain.

The right of the Government, therefore, in every aspect of the case, being, as I conceive, fully established, the only remaining question is, in what form will these notes be most beneficial to the public? Whether it is better to issue them bearing an interest of not more than 6 per cent., or bearing either no interest at all, or a very small one, to be ascertained by the House? And this brings me to the differences between me and the chairman of the Committee of Ways and Means, or, to express it more accurately, perhaps, between the Senate and the committee of this House. Sir, I admit that these notes, at a higher rate of interest than I approve, would serve an excellent purpose as remittances to Europe; but exchanges, as we have seen, are already fallen nearly 50 per cent. within a very few days, and there is every reason to believe that as soon as the coming crop shall be brought to market, they will be down at par. But the prospect of an improvement in our domestic exchanges is unfortunately not so good. An immense debt is due from the West and the Southwest to the great commercial capitals on the Atlantic, to the payment of which, notes bearing a high rate of interest will contribute no aid whatever. They will, you may rely upon it, sir, be instantly bought up by capitalists for investment. They will disappear entirely, as gold and silver have disappeared. In consequence of the shock given to all credit by the late revulsion, there are immense deposits in all your banks waiting for some safe opportunity to lay them out on any reasonable terms. The answers made to the circular of the Secretary of the Treasury have no weight at all with me, not only because, as I said just now, a very material change has occurred in the price of bullion since that date, but for several other reasons which need not be dwelt upon here. These notes are not intended to go into the market at all. My idea of the proper use to be made of them is, that they shall be passed away, as I have said, to the functionaries and creditors of the Government. I repeat, that I have no doubt that they will be readily accepted by them, and that the extravagant rates of exchange between the different parts of the country will keep them up at a considerable premium in respect of the best bank paper, and nearly, if not quite, at a par with gold and silver.

Mr. PATTON said he desired to say a few words in reply to the gentleman from New York, [Mr. CAMBRELENG.] That gentleman had taken occasion, in answering the remarks which he (Mr. PATTON) made on yesterday, to express himself in a manner, to say the least, rude and uncourteous. He said, as I understand, that he had supposed I had more sagacity than not to perceive the design and effect of the amendment proposed by the gentleman from Kentucky. I am a man, Mr. Speaker, of very humble pretensions in point of sagacity, and surely will not undertake to rival the claims, in that regard, of so profound and sagacious a statesman and financier as the chairman of the Committee of Ways and Means: that is a comparison which it would be more becoming in him, as well as myself, to leave to the judgment of the House and others.

I think, by this time, said Mr. P., that the chairman of the Committee of Ways and Means has discovered that not

only myself, but many other members—whom I will not do the injustice even of comparing with him in point of wisdom and sagacity—have been unable to see the evil tendencies of the proposed amendment. Although they have had the benefit of the illumination shed upon the subject by the sagacious chairman, they regard the objections made by him as unsound and frivolous as I do; objections which, whatever estimate I may have put upon the wisdom of the gentleman from New York, prove that he does not possess one whit more sagacity than I supposed him to have.

What is it that the chairman of the Committee of Ways and Means tells us is the character and effect, and even, as he intimates, the object of this amendment? Why, that it will give the United States Bank of Pennsylvania a benefit of at least one hundred thousand dollars. How does he make out this? What plausible or even colorable proof of this assertion has he adduced? These bonds which he assumes that the Bank of the United States, and that bank alone, can or will purchase, are bonds bearing an interest of six per cent. payable in one, two, and three years. The Bank of the United States, as is notorious, so far from being desirous or interested in taking in such bonds, has been recently issuing new bonds, for the purpose of raising funds in England, in order to strengthen herself, and enabling her the better to live through the present calamitous condition of our commercial and moneyed affairs. But again: the amendment limits the sale of the bonds at par, with liberty to the Secretary to get as much more than par as he can. Are we to be told that these bonds will not sell at par?

[Mr. CAMBRELENG here said that he said no such thing.]

Mr. PATTON resumed. I did not say he said so. I put the question—are these bonds worth par or not? If not, then they will not be sold, for the amendment prohibits it; and the gentleman from Kentucky proposes to provide for that contingency, by authorizing the Secretary to raise six millions of dollars by direct loan. If they are worth par, or more than par, by what authority of fact or reason can it be assumed that nobody will purchase but the Pennsylvania Bank of the United States? Why, we have been constantly told during the last spring and summer, from a source of high authority with some gentlemen, (though of very little weight with me,) that this institution was upon the eve of bankruptcy; that the declaration of Mr. Biddle that his bank could have continued to pay specie was an empty and unfounded boast. We know that this bank has been engaged in large mercantile and financial operations, which have probably employed all her disposable means. Still, I think it may be possible that she might purchase these bonds; but it is manifest that she cannot do so unless at their full value. What possible injury can be done to the Government by getting its debt fully paid in advance? The amendment throws the bonds into market; it invites the competition of all capitalists here and in England, and thereby insures a sale upon the best possible terms. And I am warranted, upon the opinion of an eminent merchant, who is one of the most intelligent members of this House, [Mr. PHILLIPS,] in expressing the opinion that they will sell readily and at a premium. It is a matter of indifference to me who purchases them, even although it be the Bank of the United States of Pennsylvania. If she will give more for them than any other institution or individual, I have not the slightest objection; indeed, it is with me rather a recommendation; for then the separation and divorce of the Government from that bank would be final and complete. I am not to be deterred from advocating a measure by which the demands of the Treasury may be met out of our own funds without loan or taxation, by having the ghost of the United States Bank paraded before my eyes. It seems to be perpetually flitting before the apprehensions of some gentlemen, disturbing their composure, and disordering their minds. It is an "unreal mock-

H. OF R.]

Treasury Notes.

[Oct. 6, 1837.]

ery," I fear it not. I have borne my part in the war that has been waged against the Bank of the United States during the last four or five years. It is dead and buried, and we performed its funeral obsequies in solemn form only a day or two ago. This amendment proposes to sever the last link of connexion with this deceased institution.

But the gentleman from New York asks, are we going to place the Government in the degrading attitude of an endorser of the Bank of the United States? And why shall we not endorse our own bonds on which we want to raise money? What degradation is there in this? Does not every man who sells a bond endorse it? Who has ever been degraded by it? The whole effect of the endorsement or assignment is, that if the bank does not discharge its obligation when due, the Government will indemnify the purchasers. How will that continue the connexion with the bank more than now exists? The whole amount of it is, that if the bonds are sold, the Government insures them to the purchaser. If we hold them, we stand our own insurer. If the bank fails to pay them, the Government loses the amount in one case as well as the other. There is no new liability incurred, and in the worst event that can happen, the failure of the bank before the bonds became due—of which I have not the least apprehension—the Government will have had the use of the amount of the bonds to meet her pressing engagements, and in the end will only have to provide funds to reimburse the purchaser, precisely in the same way as you must provide funds to take up your Treasury notes, if you issue them.

But, if the gentleman from New York is right in assuming that the Bank of the United States will purchase the bonds, then what becomes of his objection to the Government being the endorser? If the bank purchases, or rather anticipates the payment of its bonds, there is an end of all liability on the part of the Government—there is no endorsement.

I expressed my surprise that the gentleman from New York, who had heretofore acted so conspicuous a part in urging a disconnection between the United States Bank and the Government, who had heretofore been so ready to sell the stock of the Government in that bank, did not at once and eagerly avail himself of the present opportunity. I referred to his recommendation as chairman of the Committee on Foreign Relations two or three years ago, that the stock should be sold to meet contingent expenses, in the event of difficulties with France. I understand his answer to this to be that the proposition was not to sell the stock, but to use funds of the Government then due from the bank. Why, sir, I read, and will read again, from the report made by Mr. CAMBRELENG, on the 27th of February, 1835, from the Committee on Foreign Relations, in connexion with our difficulties with France:

"It is a gratifying circumstance that our means are adequate to meet any exigency without recourse to loans or taxes. The bill now before the House, authorizing the sale of our stock in the Bank of the United States, would, if adopted, afford all the revenue necessary. The committee is of opinion that the whole or a part of the fund to be derived from that source should be appropriated for the purpose of arming our fortifications," &c.

The bill referred to in this extract, for selling the stock, had been reported in pursuance of the recommendation of President Jackson. And, as an additional support to the measure now recommended, I will read a passage from the message of General Jackson, of the session of 1834 and 1835. After speaking of the danger and impropriety of continuing any connexion between the Government and the bank, the President proceeds:

"I feel it to be my duty to recommend to you that a law be passed authorizing the sale of the public stock;" and "that all laws connecting the Government or its officers with the bank, directly or indirectly, be repealed; and that

the institution be left hereafter to its own resources and means."

The bill, which was the answer to this recommendation, was favored with the approbation of the gentleman from New York. Now, sir, is it wonderful that I should be surprised that any opponent of the Bank of the United States, or any friend of the administration, pledged to walk in the footsteps of General Jackson, should oppose the present proposition to sell the stock in the Bank of the United States, and thereby meet "the exigencies of the Government, without recourse to loans or taxes?"

The means recommended by the late President for disconnecting the Government with the bank; the means recommended by the chairman of the Committee on Foreign Relations [Mr. CAMBRELENG] for supplying the demands of the Government without resorting to loans or taxes, are now resisted by the chairman of the Committee of Ways and Means, [Mr. CAMBRELENG,] although the exigencies of the Government can be no otherwise met but by adopting it, or resorting to loans and taxes. I repeat that I am surprised that any real opponent of the Bank of the United States should oppose this amendment. If the proposition had come from the chairman of the Committee of Ways and Means, how many of those who opposed the Bank of the United States would have resisted it? I venture to say, very few, if one. Why should we not avail ourselves of our own resources, sell our own stocks, rather than create a new national debt; now when the shouts of gratulation for the extinguishment of the old debt are still ringing in our ears?

So much for that subject. I wish now to make some reply to the remarks of the gentleman from Maryland, [Mr. THOMAS,] upon the other branch of the amendment. It proposes to legalize the practice heretofore pursued by the Treasury, of issuing Treasury drafts upon the deposit banks, and to require and compel him to receive these drafts in payment of Government dues, when not paid by the banks in funds acceptable to the holder. This practice has been pursued since the suspension of specie payments without any difficulty so far as the Treasury is concerned, and to the entire satisfaction of the public creditor. It makes available those funds of the Treasury which are now pronounced to be unavailable. These drafts are now only one or one and a half per cent. below specie. Under this course the deposit banks have paid about fifteen millions of their debt to the Government, and if it be continued, I have great hopes that all the deposit banks will discharge the balances due from them, satisfactorily to the public creditors, and without embarrassment or inconvenience to themselves. Can any gentleman reasonably hope that Treasury notes will have a better credit than Treasury drafts? These Treasury drafts will answer, as they have done as a medium of circulation, as a means of supplying domestic exchange. Treasury notes, especially if they bear interest, will not circulate as currency; they will be taken up for investment, and go into the hands of moneyed capitalists, and "rag barons," as it is the fashion of one class of politicians to characterize men of wealth and moneyed institutions.

The gentleman from Maryland says that there have been decisive indications given by this House that the issuing of Treasury drafts, as has been heretofore done, should be discontinued, and expresses his astonishment that the proposition made by me, and accepted by the gentleman from Kentucky, should have been made, after these decisive indications. When, where, and how, have such indications been given by this House? No such evidence has been given, no such views have been developed, as the opinion of this House.

It is true, that we have had sent down to us from the Senate a bill which proposes to indulge the deposit banks, to give them indulgence to pay their debts to the Govern-

Treasury Notes.

[H. OF R.]

ment in three instalments, at 4, 6, and 9 months, and then to turn them over, if they do not pay, to the tender mercies of the Secretary of the Treasury, with all his gold and silver notions.

The proposition now before you holds out to the banks an indulgence indefinite and unlimited, at the same time that it affords relief to the Government and the people, by authorizing an issue of drafts drawn upon these funds in the banks, making them available to the Government, without distressing the banks. I make an appeal to the gentlemen representing the West and Southwest, whose banks owe the largest sums, and which I am told by a member from that region cannot probably resume specie payments in less than eighteen months or two years, and ask them how they can reconcile it to themselves to refuse this amendment? The measure I propose will give these banks an indefinite indulgence, and at the same time make their balances available to the Government without the cost of a dollar, and in a way entirely free from all constitutional difficulty, while the measures recommended by the Executive have a direct tendency (I speak of all the measures, including the sub-Treasury scheme) to increase the demand for specie—to make difficulties in the way of resuming specie payments. I ask the gentlemen from the West and Southwest, if they are ready to agree that their banks shall be treated as bankrupts, and to have them pounced on by the district attorneys of the United States under the pending law? The necessary effect of this would be, that those banks must sue their debtors, those indebted to the banks must sue their debtors, and thus all the people in those regions must be involved in one common ruin.

It is my decided opinion that the means of meeting the exigencies of the country, proposed by the amendment, are preferable to the issue of Treasury notes, with or without interest. I am not able to see how Treasury notes, without interest, issued only upon the faith of the Government, intended as a circulating medium, can be distinguished from bills of credit—strictly a Government paper money. As at present advised, I cannot vote for such a bill, because I can see no constitutional authority in this Government to issue bills of credit.

In conclusion, I beg leave to say, that I think the amendment of the gentleman, modified as it has been, on my motion, having the effect of supplying the requisite means of meeting the demands of the Treasury, without taxes or loans, ought to receive the favorable consideration of the House.*

Still, however, if the House reject this amendment, and no more acceptable and less questionable means of raising money can be suggested, I will vote for a loan of money, and the issue of certificates of loan in the form of Treasury notes bearing interest. In that form, I consider them substantially a loan, and therefore constitutional; though I would prefer a direct loan.

Mr. CUSHING followed, in reply to Mr. LEGARE. He quoted Judges Story, Marshall, and other authorities, to show that Treasury notes were bills of credit.

Mr. FOSTER replied, arguing that Treasury notes, to become bills of credit, must be issued as a circulating medium. He denied that a high or low rate of interest altered the case. He argued at length against the amendment.

Mr. MENELEE addressed the House at large, in an eloquent and earnest speech, against the bill.

Mr. CUSHMAN terminated the discussion by calling for the previous question.

The CHAIR stated that, if it should prevail, the main question would be on the House bill as at first reported from the Committee of Ways and Means. [Cutting off, of course, Mr. CAMBRELENG's amendment, which engrafted the Senate's bill on the enacting clause of the House bill.]

On the question of sustaining the call for the previous question there was a tie, the ayes being 88, and the noes 88. The CHAIR voting in the negative, it was not sustained.

Mr. CAMBRELENG now pressed for action on the bill, and referred to pledges given by gentlemen of the opposition that a vote should be had this night.

Mr. WISE replied, admitting that he had given such a pledge but for himself only. He did not undertake to command the House, or speak for it as at his bidding.

Mr. W. C. JOHNSON obtained the floor, and addressed the House in a speech of great animation till late in the evening.

Mr. PHILLIPS read to the House, from a document recently received, and not yet generally distributed, in reply to a call for the correspondence of the Treasury with various individuals, touching the terms of their reception of Treasury notes for specie; and in which many commercial capitalists declined altogether having any thing to do with such a transaction.

The question was at length obtained on the amendment moved by Mr. UNDERWOOD, and decided as follows:

YEAS—Messrs. Adams, Alexander, H. Allen, John W. Allen, Aycrigg, Bell, Biddle, Bond, Bouldin, Briggs, W. B. Calhoun, J. Calhoun, W. B. Campbell, J. Campbell, W. B. Carter, Chambers, Cheatham, Childs, Clowney, Corwin, Cranston, Crockett, Curtis, Cushing, Darlington, Dawson, Davies, Dennis, Dunn, Elmore, Everett, Ewing, R. Fletcher, Fillmore, R. Garland, Goode, J. Graham, W. Graham, Graves, Grennell, Griffin, Halsted, Harlan, Harper, Hastings, Hawes, Henry, Herod, Hoffman, Hopkins, R. M. T. Hunter, Jenifer, H. Johnson, W. C. Johnson, Lawler, Lincoln, A. W. Loomis, Mallory, Marvin, S. Mason, Maury, Maxwell, McKennan, Menefee, Mercer, Milligan, C. Morris, Naylor, Noyes, Ogle, Patterson, Patton, Peck, Phillips, Pope, Potts, Rariden, Reed, Rencher, Ridgway, Robertson, Rumsey, Russell, Sawyer, A. H. Shepperd, C. Shepard, Sibley, Slade, Southgate, Stanly, Stratton, Taliaferro, Thompson, Tillinghast, Underwood, A. S. White, J. White, E. Whittlesey, L. Williams, S. Williams, J. L. Williams, C. H. Williams, Wise, and Yorke—104.

NAYS—Messrs. Anderson, Andrews, Atherton, Beatty, Beirne, Bicknell, Birdsall, Boon, Brodhead, Bronson, Bruyn, Buchanan, Cambreleng, T. J. Carter, Casey, Chaney, Chapman, Cilley, Claiborne, Clark, Cleveland, Coles, Conner, Crary, Cushman, Davee, DeGraff, Dromgoole, Duncan, Edwards, Farrington, Fairfield, Foster, Fry, Gallup, Gholson, Glascock, Grantland, Grant, Gray, Haley, Hammond, Harrison, Hawkins, Haynes, Holsey, Holt, Howard, Hubley, Ingham, T. B. Jackson, J. Jackson, N. Jones, J. W. Jones, Kemble, Kilgore, Klingensmith, Legare, Leadbetter, Lewis, Logan, A. Loomis, Lyon, J. M. Mason, Martin, McKay, R. McClellan, A. McClellan, McClure, McKim, Miller, Montgomery, Morgan, S. W. Morris, Muhlenberg, Murray, Noble, Owens, Palmer, Parker, Parmenter, Paynter, Pennybacker, Petrikin, Phelps, Plumer, Potter, Pratt, Prentiss, Reily, Rhett, Richardson, Rives, Sheffer, Shepler, Snyder, Spencer, Stewart, Taylor, Thomas, Titus, Toucey, Towns, Turney, Vanderveer, Wagener, Webster, Weeks, T. T. Whittlesey, J. W. Williams, Worthington, and Yell—112.

So the amendment moved by Mr. UNDERWOOD was negatived.

Mr. RHETT then moved an amendment, the effect of which would be, if agreed to, to make the bills payable "upon presentation," after the expiration of one year from date, and to divest them of the character of interest-bearing notes.

The House then, on motion of Mr. WILLIAMS, of N. C., at about half past nine, adjourned.

H. OF R.]

Florida War.

[Oct. 7, 1837.]

SATURDAY, OCTOBER 7.

As soon as the journal was read, Mr. J. Q. ADAMS rose and asked leave to make an explanation; and, by general consent, was allowed to do so.

It would be recollected (he said) that he had, on the preceding day, referred to the fate of propositions made at former sessions, to investigate alleged abuses in our Indian affairs, out of which the Creek and Seminole wars had grown. With respect to one of these propositions, by the gentleman from Alabama, he had stated that, after that gentleman had moved to refer the inquiry to a select committee, a motion was made to refer it to the President of the United States, which motion prevailed: and he had then inquired whether any report or message, in consequence of that reference, had been sent by the President of the United States to this House. The question (Mr. A. said) he had asked, because he was ignorant whether such a report or message had been sent or not. He did not assert that such a report had not been made, but he had asked for information. To this inquiry he had received no answer; from which he inferred that no communication had been made to the House by the President upon the subject. Afterward, however, he had been informed that a message had been sent to the House on the subject just before the close of the last session of Congress, and had been laid on the table and ordered to be printed. Not having been printed before the close of the session, it had not come to his knowledge. It was printed afterwards, and constituted No. 154 of the Executive Documents. Since the adjournment last evening, he had seen it, and had read as much of it as it was possible for him to read between ten o'clock last night and the meeting of the House this morning; and, he must say, that a more heart-sickening document he had never read. It goes (said he) to prove to demonstration, if demonstration be required, the necessity of a full investigation into these abuses, by the order of Congress. There were disclosures enough, even in this document, to make the blood tingle in the veins of every man who read it.

Mr. A. said he had thought proper to make this explanation, because he was not willing that an impression should go abroad, from his statement, that the Executive had not done its duty in reference to the vote of this House upon the subject. The Executive had acted upon the subject, it appeared, promptly; had appointed two citizens, Mr. Crawford and Mr. Balch, commissioners for the purpose, and authorized them to make the required investigations. These commissioners, acting under instructions from the Executive, had collected a vast deal of information, contained in their report, which was, however, only a report in part, much remaining yet to be disclosed. As far as he could judge, the trust reposed by the resolution of this House had been faithfully performed, as well by the Executive as by the individuals who acted as commissioners by his appointment.

In justice to himself, as well as to the Executive of the United States, Mr. A. said he made this explanation.

FLORIDA WAR.

The House then proceeded to the unfinished business of the morning hour, which was the consideration of the following resolution, submitted by Mr. Wise on the 19th instant:

"Resolved, That a select committee be appointed by ballot to inquire into the cause of the Florida war, and into the causes of the delays and failures, and the expenditures which have attended the prosecution of that war, and into the manner of its conduct, and the facts of its history generally; that the said committee have power to send for persons and papers, and that it have power to sit in the recess, and that it make report to the next session of Congress."

Mr. GLASCOCK had moved to amend the foregoing resolution by striking out all after the word "resolved," and inserting the following:

"That a select committee be appointed to inquire into the cause of the Florida war, and the causes of the extraordinary delays and failures, and the expenditures which have attended the prosecution of the same, and all the facts connected with its history generally; and that said committee have power to send for persons and papers, except such persons as may be engaged at the time in the Florida war."

The question immediately pending was the motion of Mr. HOWARD to strike out the words "that a select committee be appointed," and insert "that the Committee on Military Affairs be instructed."

Mr. McKAY had not intended taking any part in this debate, and would not now have done so, had it not been for the remarks of the gentleman from Massachusetts, [Mr. ADAMS,] on yesterday, in relation to the composition of the Committee on Military Affairs. The gentleman from Maryland, [Mr. HOWARD,] who had made the proposition to refer this subject to the Committee on Military Affairs, would do him the justice to say that the amendment was moved without any consultation with him, and he presumed without any consultation with any member of the Military Committee. The gentleman from Massachusetts [Mr. ADAMS] had objected to sending the inquiry to the Committee on Military Affairs, because eight of its members were friends of power, as he chose to designate them. By this, however, he understood the gentleman as meaning nothing offensive, but merely that eight of its members were in favor of the administration, and but one opposed it. Now he (Mr. McK.) believed it was well understood that this committee has had no connexion with the politics of the country, as all that ever was required of it was, to look to the military affairs of the country, and all subjects connected therewith. He had taken the trouble to look into this matter, and see how this committee had been made up for some years back, and would call the attention of the House to the fact. Four years ago the Military Committee was organized precisely as it is now. When the distinguished gentleman from Virginia, who is now our Minister to England, occupied the Chair, this committee was made up in the same way, and it was precisely the same while the gentleman from Tennessee [Mr. BELL] was presiding officer of the House. This committee still stood, with reference to the administration, eight to one. During the second session of the twenty-third Congress, Mr. Vance, who is the present Governor of Ohio, was the only member on that committee opposed to the administration; and during the twenty-fourth Congress, Mr. Bunch, of Tennessee, if he might be considered an opponent of the administration, was the only member on that committee in the opposition. This he thought was a sufficient answer to the objections of the gentleman from Massachusetts on this point. Well, how was it with regard to other committees of this House? He took it, if gentlemen would take the trouble to examine, that they would find many of the committees with majorities opposed to the administration. The committee of which the gentleman from Massachusetts is chairman, (the Committee on Manufactures,) has a majority of its members opposed to the administration. It was the same case with the Committee of Claims. It was the same with all the principal committees on the expenditures of the Executive Departments. The committees on the expenditures of the War Department, the Navy Department, and the Post Office Department, had all majorities opposed to the administration. With regard to the Committee on Military Affairs being composed of eight friends of the administration, and one member of the opposition, he presumed it was altogether accidental. He observed it was in accordance

Oct. 7, 1837.]

Treasury Notes.

[H. OF R.]

with the previous practice of the House, as it was precisely in the same situation in which it had been in for the last four years, and he had never before heard any complaint in relation to it. But the gentleman from Massachusetts had urged another objection against this committee, and that objection was, that there were eight of its members taken from the Southern States, and only one left to take charge of the peculiar interests of the Northern States. Now, if the gentleman would look into the organization of the other committees, he would find the same objections to lie against them.

How is it with the Committee of Ways and Means? Out of the nine members of that committee, there was only one member, the gentleman from Ohio, [Mr. HAMER,] to take care of the interests of the whole valley of the Mississippi and Ohio. How is it with regard to the committee of which the gentleman from Massachusetts himself is chairman, the Committee on Manufactures—a committee whose measures affect all branches of industry in the country? Seven of its members live in the Northern States, and four of that seven in the New England States, while the whole of the Southern States had but one person on it to represent their interests. How is it with regard to the Committee on Naval Affairs and the Committee on Commerce? The Western States have not a single member on the Committee on Naval Affairs or the Committee on Commerce to represent their interests.

But, could not the gentleman from Massachusetts see the fallacy of these objections? There were only nine members on each committee, and there were twenty-six States in the Union; so that it was a natural consequence that at least seventeen States must be unrepresented on each committee. There was, therefore, nothing in the objection. He would next call the attention of the gentleman to the Committee on Roads and Canals—a committee so intimately connected with the great question of internal improvements. That committee stands seven to two, and only one of its number to take care of the interests of the ten States in the South and Southwest. That committee, too, stands, in regard to the administration, in precisely the same situation as the Committee on Military Affairs.

The gentleman from Massachusetts, on yesterday, said that, during the last long session of Congress, a resolution was adopted calling on the late President of the United States to lay before Congress a statement in relation to the late Creek war, and that no answer was returned by the President. On this morning, however, the gentleman had corrected this statement, but had again fallen into an error. The gentleman had said that the resolution was answered by the President within a day or two of the end of the session. Now, if the gentleman would consult the journal, he will find that this communication was sent in on the 14th day of February; that it was only a report in part; and that the commissioners appointed by the President to make the necessary examinations were engaged in the further prosecution of the inquiry; and Mr. McK. understood that they were now in this city preparing a report, to be laid before Congress at its next regular session.

The resolution offered by the gentleman from Virginia [Mr. WISE] proposes an inquiry into the causes of delay and expenditure in the prosecution of the Florida war. Now, that gentleman will recollect that, during a former Congress, he submitted a resolution calling for information from the departments relative to this identical subject. On the 22d of May, it would be found, by referring to the journals, that a resolution was adopted, on motion of the gentleman from Virginia, [Mr. WISE,] calling on the President to communicate to the House all measures taken to suppress Indian hostilities in Florida, and also to communicate the causes of such hostilities. It would also be found that on the 26th the President sent a report from

the Secretary of War on the subject; on the 27th, an additional report; and on the 3d of June, a supplemental report on the same subject; therefore, there were three reports made in answer to this resolution, giving all the information in relation to the causes of the war and the means taken to suppress Indian hostilities.

Mr. WISE said he knew that this report did not contain all the information in possession of the Department. He would not say by what authority he knew this; but the late Secretary of War himself knew by what authority he (Mr. WISE) knew that he did not communicate to this House all the information in his possession.

Mr. McKAY resumed. That did not affect what he was going to say. The gentleman says all the information was not communicated. That was extraordinary. He did not pretend to say that the gentleman had not good grounds for making the assertion; but let us look to the terms of the resolution. They were, that the President be requested to communicate all the measures taken for the suppression of Indian hostilities, and all the information relative to the causes of those hostilities. Now, if what was stated by the gentleman from Virginia was true, it would form a grave matter of inquiry for the House to take notice of, and it would be called upon to institute some inquiry into the conduct of the late Secretary of War in consequence of this dereliction of duty. But, would the House suppose that the Secretary was so very regardless of his official duty as not to comply with the order of the House, requiring him to communicate all the information in regard to the causes of this war?

Mr. WISE said he would now state by what authority he spoke. Sir, (said Mr. W.,) the Secretary of War, unless his messenger told a falsehood, did, before he answered that very call, send a gentleman to me with certain papers marked confidential. They were submitted to me, and I know it upon this information. I read them, and the question was put to me, "Do you want these papers?" My reply was, that I wanted all relating to the subject.

Mr. McKAY rose to resume; when,

On motion of Mr. CAMBRELENG, the House proceeded to the orders of the day.

TREASURY NOTE BILL.

The House then resumed the consideration of the "bill to authorize the issuing of Treasury notes," being the substitute reported from the Committee of the Whole.

The question being on an amendment to the amendment proposed by Mr. RHETT—

Mr. RHETT modified his amendment so as to declare that the faith of the United States was pledged for the payment of the notes, on presentation, at six months after their dates, respectively.

Mr. BELL rose and said: It had been his wish to submit his views upon this important subject while the bill was in committee, but he had been prevented by indisposition; he did now intend to extend his remarks as far as he had designed to do, if time had permitted. The objections to this measure, (said Mr. B.,) are in my mind great and insuperable. It may possibly be that I am misled by suspicions, and that I may mistake the object of the bill, and do gross injustice to the intentions of the administration in pressing it upon Congress, but I must say, in my own vindication, that if I should be mistaken, my suspicions are honestly and sincerely entertained. In ordinary times, and under ordinary circumstances, I could always find some clew to the real object of a measure; now no light comes from any quarter to direct my course. I might, and I did expect some light to spring up from the discussion of this question, but neither from the spirit nor matter of the past discussion can I gather any thing satisfactory. If I look to the votes of honorable members I am still left in the dark. It is well known that there is a re-

H. OF R.]

Treasury Notes.

[Oct. 7, 1837.]

spectable minority of the members in this House representing the party in power, which has been understood to be as widely separated as the polls of the earth from their political allies and the President himself in principle and doctrine upon the subject of the currency, and the new fiscal system recommended in the message; yet we find most of the gentlemen who compose this minority, the most thorough, prompt, and vigilant supporters not only of the administration generally, but of the measure under consideration in particular. How am I to reconcile this course of honorable gentlemen with the principles they profess? How can I come to any satisfactory conclusion as to what is the real intention of the Executive in asking this extraordinary supply of money, and in the extraordinary shape in which it is proposed to be granted, when I find those I would have supposed as most hostile in interest, the most decided and determined in its support? We all know, sir, the power and influence of the Executive upon every great measure of policy about which there is any difference in this House or in the country. It is not only the personal influence of station, but the great amount of patronage connected with it, which insures this influence. The constitution, no doubt, contemplated some degree of influence of this nature. I was struck with the justness and force of a sentiment expressed by the distinguished gentleman who sits before me, [Mr. ADAMS,] shortly after he took his seat upon this floor, and after the close of his administration of the Government. It was that, by the constitution, it was not only ordained and intended that there should be three co-ordinate departments of the Government, but that they should also be co-operative. The due degree of Executive influence designed by the constitution, I do not object to. I subscribe to the propriety of it; but, acting upon this principle, how are we—how ought we, in common candor, to regard the measure under consideration, and those connected with it, which found their way into this House under Executive sanction? How otherwise can we regard them, without disparagement to the Executive, but as the ways and means of carrying into execution, in the most active and effectual manner, the doctrines and policy laid down in the message? and so we must regard them, unless we are disposed to make a direct attack upon the President, and charge him with insincerity and double dealing. But it is not only the course of those gentlemen in this House, who are denominated conservatives, which perplexes me upon this point. In the semi-official organ of the administration, or rather of what is considered the orthodox and largest portion of the party in power, (the *Globe*,) published this morning, I find the extraordinary declaration and avowal which I will read to the House:

"We have been requested by our political friends in different parts of the country to give a place to accounts of democratic meetings approving the message and the Secretary's report on the finances in the warmest terms, and pledging vigorous support to the administration and its friends in carrying out the doctrines set forth in those admirable state papers."

In the same organ I saw, but a few days ago, the sentiment avowed, that the recent votes in the two Houses of Congress give strong indications that the "dynasty of banks, both great and small, approached its end." What, sir, are we to conclude from these annunciations, but more particularly when we connect with them the course of the conservatives of this House? What are those doctrines of the message and the report of the Secretary of the Treasury which are to receive the vigorous support of the alleged democracy of the country? The doctrines of the message propose the sub-Treasury scheme, and reject the idea of giving credit to banks and bank paper at any time. The report of the Secretary, among other things, gives us a detailed plan of a fiscal system, which is to all important ends

and purposes a Treasury bank. Now, sir, which of those two systems is to be supported by the party in power for the future, or, if neither finds favor by itself, how much of one is to be combined with the other, and carried out by this administration? Have we not a right to some explanations upon this subject? Have not the country a right to demand an explanation of these mysterious declarations? What are the real designs of the administration? Have the conservatives made terms with the President and those who sustained him in his message? Have they been promised that their banks and bank notes shall not be molested? that they shall be saved from the general wreck which has been threatened to the banking system in this country? From my personal knowledge of the character and principles of many of those gentlemen, I do not believe them capable of compromising the general interests of the country, and acting upon a compromise so narrow, selfish, or unworthy. But do they not owe it to this House and the country to avow the real principles of the compromise, if they have made one, and I must suppose they have? Have they agreed that they will give their support to any, and, if any, to what extent, to the issue of a paper circulation founded upon the credit and revenues of the Government, or, in other words, of a Government bank? and, if they have, what securities have they taken for the fulfillment of the engagement on the part of the administration, or of that portion of the party in power which has been understood to favor the doctrines of the message? Sir, I know I have no right to demand an answer to any of these questions; but I refer to the subject which gives rise to them because I am bewildered—I am amazed by what I see and hear of late connected with this subject, and I wish more light. At one time I am led to suppose that a fiat has gone forth for the utter annihilation and destruction of the whole banking system, as it has been practised for the last half a century; at another time, and looking to the course of the same party, I cannot resist the conclusion that State banks are to be suffered to exist upon the terms of permitting the establishment of a Government bank to supply a portion, at least, of the circulating medium of the country; and again, sir, I am not at all satisfied that one of the parties to the arrangement are not to be the victims of their confidence in their political friends, and will find that they are duped when it is too late to repair their steps.

Under all the circumstances of the case, the perplexity and mystery in which the whole subject is involved, I am constrained to act upon my own best judgment, with such lights only as chance and observation have thrown in my way. For myself, I regard this bill as one and by far the most important one of that series of measures which has been deliberately planned and brought forward, with a view to wage a war not only against banks and bank paper, but against the whole system of trade, credit, and finance, which has raised this country to its present elevated rank among nations; and I regard this as the bill of supply—the money bill to carry on the war. Pass this bill, and you will enable the Executive to carry out and put in practice whatever system of policy he pleases, whether it be the pure sub-Treasury scheme or a Treasury bank, or a combination of both. I have from the first regarded this as the most important, in every point of view, of all those measures upon which we are called upon to act. I care nothing, comparatively, for any other. It is the pivot upon which all the plans of the Executive, whatever they may be, turn. This bill, or rather the supplies anticipated from it, may be justly regarded as answering all the purposes of the party in power with equal effect to the *pou sto* desired by the famous Greek mathematician. Give the administration the aid which this bill proposes, and they will be able to move this House and this nation at will. It is, in every point of view, such a measure—one involving so many important results of a mischievous character—that

Oct. 7, 1837.]

Treasury Notes.

[H. OF R.]

the maxim *obsta principiis* applies with peculiar force. Here, then, I plant myself; here I take my stand, and I will maintain it until I am driven from it by the force of numbers. I earnestly invite and invoke all those who think it safest to meet danger on the threshold—all those who prefer old and established institutions to new and untried expedients—all who prefer a paper circulating medium to the evils of the proposed experiment of an exclusive gold and silver currency—all those who prefer a national incorporated bank to a bank connected with the Treasury, and founded upon the revenues of the Government—all those who prefer bank paper to bills of credit or a Government paper money, to come and do battle with me against this bill.

Mr. Speaker, has any one fully and duly considered, how many, how vast, and how overwhelming are the considerations connected with this question, and the consequences that may grow out of a measure of this nature at this particular juncture? I concur most heartily with the sentiments expressed by the gentleman from South Carolina, [Mr. PICKENS,] the other day, in speaking of the new Treasury schemes which have been recommended for our consideration. I do heartily and truly believe that the destiny of this country, for good or for evil, will depend greatly upon the decision of the questions which they present. The mind fails in an effort to grasp the whole of this important subject; no powers are adequate to do full justice to the great issues which are involved. The argument embraces in its range the fate of the federal constitution, of free Government itself! Of all the causes which in modern times have deeply excited, agitated, and convulsed a people, but few had a more certain, rapid, and fearful tendency to engender a spirit of opposition to the laws and to revolution, than a debased and disordered currency. I need not refer to the examples which past history affords of this nature. I will not even revert to the deep feeling, the intense excitement, which manifested themselves in our large cities, at a recent date, in connexion with this subject; but I will say, that such instances of popular excitement, upon such occasions, ought never to be lost sight of by the statesmen of this country, nor will they be either tauntingly referred to, or slightly regarded by any man who has any just claim to the rank and character of one. What I fear upon this subject is, that we have only arrived at the first stage of this disorder—that greater embarrassments, and yet wider spread mischiefs, await us in the progress of it; that the state of the currency is yet to become a subject of deeper and more permanent discontent; that the blindness of party prejudice, the obstinacy of party interest, and the infatuation of power, will defeat every prudent remedy, and bring on a crisis of open resistance to the laws, and leave the institutions of the country, both local and general, a prey to anarchy. This, sir, is my fear; and I regard this bill as one of the forerunners of a train of measures, on the part of the Government, which are well calculated to lead to this last and most fatal calamity which can befall a country. Mr. Speaker, I warn gentlemen that, if this administration shall be so infatuated as to persevere for any length of time in the policy of requiring the public revenue to be collected in gold and silver, and disbursed among the officeholders, contractors, and others, dependent upon the Government, while the only money in use among the people is bank paper, or any other paper of less value than gold and silver—if the distinction shall be attempted to be kept up much longer between the Government and the people—gold and silver for the Government and its trains of officials, and a depreciated paper for the people, resistance must and will come. It is not in the blood of the race of freemen which inhabit this free country to submit long and tamely to so unjust, exacting, and oppressive a course of policy. And let it be borne in mind by every member in this House, who shall

record his vote in favor of this bill, that he thereby sanctions this arbitrary and unjust policy of the administration, and draws the line between the Government and the people! Pass this bill, and the Government is put above and made independent of the people; those in power will have the means of carrying out their policy in defiance of the popular will, at least until the people shall again have the privilege of interposing through the elective right. I have seen it stated, that this objection, that any distinction is made by the present course of things between the Government and the people, has been refuted, if not in this House, in another place; but, sir, I have not seen or heard the argument by which it was done, nor do I believe it to be in the power of argument to do any such thing. Again, sir, whoever gives his support to this bill endorses and becomes responsible for the present course and future policy of this administration, in relation to the currency and every other interest connected with it. And let no one delude himself with the idea that there is nothing to be apprehended from the men in power, however mischievous or wicked their designs. Let us not underrate the genius and ability of those who possess the guiding influence over our public affairs at the present juncture. They are profoundly versed in the knowledge of men and of the motives to human action. They are also distinguished for great caution, secrecy, and skill in effecting their purposes. They possess another great advantage over most men who have attained their influence and station in Government and society. They are for the most part entirely reckless of all consequences, except such as relate to themselves, and affect their interests. Such persons—such advantages, are not to be slightly regarded by those who desire to restore the country to quiet and prosperity. Can we who sit here any longer doubt the skill of the administration in carrying their measures? Have the opposition yet succeeded—is there any probability that they will succeed, in effecting a single modification of any one measure of all those which were no doubt prepared before we sat out from our homes, which have been submitted to us merely, as it would seem, that we might confirm by our votes what long since had been resolved upon and fixed by the Executive Department of the Government? No facts, however stubborn or important—no reasoning, however conclusive and unanswerable—have the least effect; the measures must, and, it seems, will be carried. Although, sir, I am not in the habit of relying upon rumors which I hear out of doors, yet I have heard it stated from such respectable sources this morning, that the Secretary of the Treasury has had such entire confidence in the success of every measure proposed at the opening of the session, and, among others, the bill now under discussion, that the plates for printing the notes have already been engraved, and perhaps the notes actually struck off. If I do any injustice to the Secretary, I will openly acknowledge it the moment the statement shall be denied upon his authority. But, sir, if this be the fact, how idle, how absurd, are all our discussions here? Every thing is fixed and settled by an influence and power beyond our control. My honorable friend from Kentucky [Mr. UNDERWOOD] was not aware of the ground upon which he was treading last evening, in proposing his amendment, and in what a dilemma he would have placed the Secretary of the Treasury if he had carried it.

But, whatever may be the destiny of this bill, I will not forbear to show that it is founded upon a pretext which is utterly unfounded. Sir, there is no deficit in the Treasury which it has not been the policy of the administration to produce—which they have not designedly created, and which they cannot amply supply without the aid of this bill. I say, sir, that there is no evidence before us, or before the public, that there is, or is likely to be, any deficiency of means in the Treasury to meet all the demands upon it during the remaining quarter of the year, except

H. OF R.]

Treasury Notes.

[Oct. 7, 1837.]

this bill; by which it seems that ten millions of dollars are required by the administration for the public service. Every other circumstance in the conduct of the administration indicates an overflowing Treasury. At the very moment, and during the entire period, within which it might be supposed this alleged deficiency of means in the Treasury would be felt or apprehended, what has been the uniform course of the administration? One of uniform extravagance and profusion, as far as the expenditures of the public moneys are concerned. Need I refer to the evidence furnished by the report of the Chief of the Engineer Department, which has been laid upon our table, that special instructions had been issued last spring that the moneys appropriated should be expended as speedily as possible? Need I recapitulate the facts, that four millions of dollars asked at the last session for the support of the Florida war, are stated to have been already exhausted, and one million and a half more are demanded, and yet the campaign has not opened; that, judging from the accounts which we see in the public papers, and from rumor, seven or eight thousand troops are about being collected to oppose some fifteen hundred hostile Indians and negroes? Does this look like an exhausted Treasury? But we need not go so far for proofs of the true condition of the Treasury. Look around you, sir, and reflect upon the scenes that are passing before our eyes almost every day. How many delegations from far distant tribes of Indians have we seen during this short session, decked out in all the extravagant and fantastic trappings of savage pomp and vanity, come, sir, for the purpose, and according to a now well-established system of policy, of supplying the deficits which have lately been felt in the coffers of some favorite officeholders, jobbers, or agents of some kind, which swarm upon your northwestern frontier? We know, sir, that this has been regarded as a great abuse for the last ten years, yet we see it daily increasing. So imposing and pompous an exhibition of bands of savages from our Western frontier, I believe has never before been witnessed in this city, as during the present short session. We have regular and formal bulletins announcing their movements in all the daily papers of the city; and thousands of the resident and visiting population are frequently entertained by public councils held with them by the Secretary of War, in some of the public buildings in the Court end of the city. It is even left doubtful, whether the interest got up by these exhibitions has not surpassed, for the time, that inspired by the proceedings of Congress, weighty and important as the matters are which brought us together. Well, sir, what has been the result of all this parade and these inventions for popular entertainment? I can only answer, by referring to such sources of information as are within my reach. I observe a statement upon this subject in the *Globe* a few mornings ago. With permission I will read it for the edification of all true reformists, and all those, especially, who are disturbed at the idea that the Government will not have money enough to keep it together unless we vote this bill.

"The councils that have recently been held with the Sioux of the Mississippi, terminated in the conclusion of a treaty, by which it is at present only proper to say, their title to about five millions of acres of land was extinguished for a consideration of one million of dollars. The tract thus acquired lies east of the Mississippi river, and has been used as a hunting ground, the dwellings of the Indians being on the west side of the river. They still retain the privilege of hunting on the land they have ceded, so that there is but little reason for the sentimental lamentations that some writers on the subject have indulged in."

So it appears that we have given a million of dollars to the Sioux, who reside west of the Mississippi, for their occupant right to a tract of land lying east of that river, which they have heretofore hunted upon, and which, by

the terms of the treaty, they are still entitled to use in the same manner! Now, what are we to think of an administration which could sanction such a proceeding, at the very moment when its advocates in this House are putting their inventions to the rack, to prove that there is not money enough in the Treasury to carry on the Government during the remaining quarter of the year? And what are we to think of the sincerity of men, who say, that we are bound, in duty to the country, to vote this supply of ten millions? Sir, I have no personal acquaintance with the Secretary of War. I am informed that he is a gentleman of learning and ability, and far above any improper design, either in assembling the Indians here at the present juncture, or in making unnecessary and extravagant treaties with them; but from my knowledge of the condition of the Indian tribes on the upper Mississippi, and the policy recommended by the most prudent and able men in the public service in that quarter, I am bound to say that the honorable Secretary has been grossly abused and misled in this business, and that the true interests of the country are wholly overlooked by those under whose counsel and advice more than one-half these treaties are made.

So much for the practical evidences furnished by the administration of the exhausted condition of the Treasury. But I will show, in a still more conclusive manner, that the pretext for the passage of this bill is not well founded. The respectable and honorable member from Maryland, and who is also a member of the Committee of Ways and Means, [Mr. McKIM,] has told us with a manly candor, worthy of all praise, that there will be a surplus of means in the Treasury at the end of the year, after satisfying all the actual demands upon the Treasury up to that time, of four millions of dollars. [Mr. McKIM explained, and stated the surplus at three millions eight hundred thousand dollars.] Well, sir, let it be so reduced, and it is still quite large enough. But it is due to that gentleman to admit, that he further stated, that of the funds taken into his estimate, he supposed five millions would be unavailable; but why are there five millions supposed to be unavailable? Simply because that amount was due to the Government from the deposit banks in the Southwest. Sir, is it not in the power of the Government to pay its creditors in drafts upon these banks, in the same manner that it has heretofore done? Is not a protested Government draft upon a bank in Louisiana, Alabama or Mississippi, as saleable in the market, as one drawn upon Philadelphia or New York, or any of the Eastern banks? [Mr. McKIM said no one would take a draft upon the Southwest, if he could get any thing better from the Government, because it required some length of time to have it protested for payment at so great a distance, and he would have to lie out of the use of his funds in the mean time.] I am again indebted to my respected friend from Maryland for his candor. He has only stated what I knew before; but no gentleman who supports this bill has been brought to admit so much before. The facts are too plain for denial or cavil. These protested drafts, the gentleman from New York informed us yesterday, were within one per cent. of being at par with specie in New York. They are selling at a premium of four or four and a half per cent. in currency, and specie at only five. Now, what is it that constitutes the value of these drafts? Not, surely, that they are drawn upon one bank in preference to another. No matter upon what bank they may be drawn, it is known they will not be paid by the bank on demand. It is their being receivable for customs and for public lands which constitutes their true value. If they were drawn upon the man in the moon they would be equally valuable. It is equally plain that the only difference between a draft upon a bank in Mississippi or Alabama, and one upon a bank in one of the Eastern cities, is founded upon the difference of time required to present and protest in the one case and

OCT. 7, 1837.]

Treasury Notes.

[H. OF R.]

the other. Let the officers of the Government, then, only say to its creditors, if the truth be so, that they can no longer draw upon any bank, but some one in the Southwest, and the whole difficulty is solved; the Government will have ample means to pay all demands upon it, and upwards of three millions of a surplus! Why shall the Government not avail itself of these means to pay its debts? Why will it not? Simply because it is its policy at present, to have the power of throwing ten millions in Treasury drafts into circulation. As to the wants of Government, I repeat, it is an unfounded pretext.

But, sir, there is a much better way yet of supplying any possible deficiency of means in the Treasury, and at the same time of relieving the people as well as the Government. I have said there is no deficit in the Treasury but such a one as the administration, in the exercise of their discretion, and to further their schemes of future policy, had created. I have already shown that, by continuing the practice of drawing upon the deposit banks, as heretofore, the deficit vanishes; but, say the friends of the administration, we want to supply a medium of exchange; we wish to put into circulation a species of paper, in the shape of Treasury notes, which will be a relief to the country just at this time. My remedy for any real or pretended deficit in the Treasury, and the one which is certainly called for by the suffering condition of the country, is to compel the Government to recognise and accredit the only circulating medium which has any existence in the country, by receiving and disbursing the public revenue in it. And the most surprising feature in the history of the times, is that a whole people would so long submit without tumult and open violation of the order of the Executive requiring all dues to the Government to be collected in gold and silver. Gold and silver no longer circulates—they are only to be acquired by purchase and by paying a price regulated like any other article of property, by the proportion between the supply and the demand. They are articles bought and sold just like any other commodity of trade, and have, moreover, been rendered scarce and high by the great demand which has existed to pay foreign debts, and by being hoarded in banks and by individuals. An example of equal daring, on the part of the administration of a Government, does not exist on record. The most arbitrary and despotic monarch that ever sat upon a throne would not have dared to issue such an edict as went forth from the Executive of this Government after the deposit banks suspended specie payment; nor would the power of any such tyrant have been safe under such an experiment. It is only in a Government at least nominally free, and claiming to act in the name of the people, that such a measure could be sustained at all; and, but for the interests of party, which have for some years been paramount to every other in this country, even in this free Government the administration would have been compelled to have convoked Congress, or to have permitted the public taxes to be paid in the circulating medium of the country within one month from the commencement of a different experiment. The present bill proposes to sustain this gross outrage upon the people; the attempt to collect a revenue of twenty-five or thirty millions of dollars, not in the circulating medium of the country, which the Government rejects and spurns, but in an article of traffic, in a species of property which must be bought at any sacrifice, and when it is collected is to be poured into the laps of a favorite and preferred class. No other Government could stand under such an experiment sixty days. I call upon the House, by rejecting this bill, to compel the administration to abandon this unjust, and before unheard-of policy.

I have seen it stated in a beautifully written and specious essay upon this subject, that principle is on the side of the administration on this point. I deny the position. The eternal principles of equality and justice are on the other side.

It does seem to me, Mr. Speaker, that there is a great and prevalent error abroad upon this question. I mean that the acquiescence is too general in the opinion, that Government may be permitted to reject the circulating medium of the country in the collection of its taxes, and coerce a payment in a species of money which is not current. The reason for this forbearance and acquiescence is obvious. A set of men, desperate and daring, and claiming to act in the name of a great and dominant party, have pushed their ultra doctrines so boldly and confidently that the moderate men of their own party, as well as the opposition, have felt too happy at the prospect of closing with them upon terms quite short of their own wishes or views as to what the country requires, merely because they appear well and good when contrasted with the antagonist scheme. Even so much gained, or rather saved, from the reckless and mischievous control of those who are now at the head of affairs is looked upon as a victory! But of what worth is such a victory! What do the conservatives secure to themselves or to the country if they shall succeed in getting their amendments adopted upon the sub-Treasury bill reported in this House? Sir, I would not give one copper for all their amendments put together. What, if they shall get it enacted that the notes of specie-paying banks shall be received in payment of Government dues—what, though it shall be provided that the public moneys shall still be kept on special deposit in the banks—all their apparent guards will only enable the Executive, if he is so disposed, to execute his policy under safer disguises. Through a thousand channels, impenetrable to this House and the public eye, the numerous collectors and receivers of public moneys can be compelled and constrained in such a manner as to stop any bank the moment it opens its vaults. The policy of the administration may be to make its attacks upon the United States Bank of Pennsylvania, with a view to stifle its operations or destroy it altogether. If success shall attend that operation, all the others will follow in detail, if such be the policy or purpose of those in power. It may be, however, that the vast power which the Executive will possess through the sub-Treasury scheme will only be employed in making war upon such of the local banks as shall be disobedient, or under unsuitable influences, and in this way make the entire State bank interest subservient to the political views of the party in power. In no way can you escape the power of the Executive in carrying out his plans, whatever they may be, if you arm him with sufficient means, and among others the power of supplying a circulation from the Treasury, as it is proposed to do. Mr. Van Buren was never in more danger than he was at the commencement of the session. The danger was that some of his followers would separate from him before he had time to explain. They might suppose that he meant to act upon the doctrines avowed in his message, and before he had time to give the proper assurances in a safe manner, his party might be dissolved. But the gentlemen from New York were soon satisfied, or at least pacified with the assurances that their favorite safety fund association would not be injured. What other assurances they may have received I know not, but I warn them not to be too easily quieted, or to take it for granted that all will be well. I have been a looker on here too long not to gather something from the signs of the times. It is quite evident to me that the party, whatever may be its strength, which is sincerely disposed to destroy all banks, and provide a gold and silver currency, or a currency constituted of Government paper, or one compounded of the two, seeing that they are foiled for the present, and that they cannot succeed here, have determined not to press the question for the present. They want another trial before the people, and our good conservatives, when they least expect an onset, may feel themselves overwhelmed by what is denominated the democracy of numbers.

H. of R.]

Treasury Notes.

[Oct. 7, 1837.]

But to return to the question. What I contend for is, that the Government, at every point where its disbursements are to be made, shall pay in the currency or bank paper which is there current and receivable at par in the payment of debts; or for property and provisions at cash prices. If payments are to be made abroad, or to Indian tribes, which are placed upon the footing of foreign nations, let the gold and silver be bought for these disbursements, at the charge of the Treasury, as it is fit; it being much better that the people should pay this premium for specie in these instances than to be taxed and harassed tenfold by the policy now in operation. If the Government shall do this, there will be an end of all Treasury embarrassments. Well, why shall not the Government be compelled to this course? Is there any practical inconvenience in the plan proposed? We shall see.

Our greatest disbursements, at present, are in a quarter where, it is said, we have the largest amount of unavailable funds—in the vicinity of Louisiana, Alabama, and Mississippi—growing out of the Florida war, and to subsist the Indians west of the Mississippi. In that whole region, or upon the borders of it, the notes of the Georgia, Alabama, Louisiana, and Mississippi banks are current at par. The same state of things exists on the northwestern frontier. The notes of the banks of Illinois, Indiana, Ohio, and Missouri, are current throughout that region. If you want to disburse moneys upon the great rivers of the interior, or upon the great national road which is being constructed through the States of Ohio, Indiana, and Illinois, or upon the harbors of Lakes Michigan, Erie, and Ontario, the notes of the banks of Illinois, Indiana, Ohio, or New York, are current in every part of those districts. If disbursements are to be made at any point upon the Atlantic, at your navy yards, upon your fortifications, or in this city, at all these various points the local bank notes are current at par, in payment not only of old debts, but for property at reduced prices; for, the principal amount of debt in every section is owing to the banks, and the great demand is for bank notes, and not for specie. Thus it is demonstrated there can be no practical difficulty in the extension of the policy called for by the best interests of the country.

Will there be any injustice done the creditors of the Government by this course of policy? The very idea that there can be any injustice, under the circumstances, to the public creditors, is an absurdity. An officer or creditor, under existing circumstances, who receives specie from the Government, gets notoriously ten per cent. advance upon his just and equitable demand. Equal right and justice, in all such sudden changes in prices, produced by a curtailment of the circulating medium of the country, would require that all past contracts for the payment of moneys should be scaled and reduced according to the appreciation of money and the depreciation of property which has taken place since the date of the contract; and our laws do not require this, not because it would not be just, but because of the evils attending a fluctuating standard of money value. But the truth is, that bank notes are, at this day, worth more—they will buy more provisions or property of any kind, at cash prices, than an equal amount of gold and silver would have commanded at any time within the last three or four years. It is no injustice, then, to compel the public creditors to receive bank notes in payment of their demands upon the Government.

But it has been said that it would be unconstitutional and illegal for the Government to pay, or offer to pay, its officers and creditors in depreciated bank paper. Very well, sir; and suppose this to be true, does the Government of the United States stand upon any higher ground in this respect than the millions of freemen for whose benefit, and by whom the Government was established, and who are compelled by a moral necessity, both to receive and pay in

this same depreciated currency? And this they are forced to do, not by any default of their own, but by the gross blunders and mal-administration of that arrogant Government which now assumes the power to discriminate, and affects the right to be discriminated, in this respect, from the people. But are the obligations legal or constitutional resting upon this Government—the confederated Government of any higher or more sacred character than the obligations of the same nature which bind the twenty-six States of the Union, and the people in their individual capacities? I call upon gentlemen from every quarter, who are disposed to uphold the character and influence of the States—I call upon the gentlemen of the South; I call upon the gentlemen who represent that ancient and renowned Commonwealth, Virginia, to step forward and maintain the equal honor and respectability of that State—of the old thirteen especially, and to vindicate all the States and the whole people from this attempted disparagement—this gross slight of their just pretensions. Before the administration of the Government of the United States attempts to set an example of constitutional conformity, and of strict honesty in the payment of its debts, let it first restore to the States and to the people that sound condition of the circulating medium, and those ample facilities for effecting their exchanges, which enable them to keep their faith and maintain their integrity and punctuality, and which they enjoyed before the mischievous and baneful project was conceived of reforming the currency, by putting down banks and bank paper, and substituting gold and silver, or a Government paper circulation. Let them do this, and the administration may urge with some propriety the obligations of honor and good faith, to pay their debts in gold and silver; and, until they shall do this, whatever they may profess, the world will conclude, and justly too, that the whole benefit to be derived from this strict regard to legal obligation will accrue to the officeholders, and others who happen to be creditors and dependants upon the General Government. That favored class will receive ten per cent. in addition to their just demands upon the Government. Under the present state of things, the disbursement of thirty millions of dollars annually in gold and silver among the officeholders, contractors, and other creditors of the Government, will put into their pockets thirty-three millions of dollars, in a currency which will pay their debts at par, and enable them to acquire more property than an equal amount of gold and silver could have done during several years past. This will be the mighty result of this new born, puritanic spirit, which appears now to actuate the administration in complying with the obligations of the Government. Their policy will confer upon the officeholders and others, who compose the trained bands of the party in every part of the Union, a bounty of three millions of dollars; and by this measure their allegiance will be secured, and their energies duly stimulated, to sustain an administration so generous and munificent to them.

But does the Government pledge itself that, if this bill passes, no more bank or other paper of less value than gold and silver will be offered in payment of any of the creditors of the Government? I do not understand that the Government comes under any new obligations in this respect; and after we shall have passed this bill, we have no security that some of the public creditors, as heretofore, will not be compelled, at the discretion of the Treasury Department, to take depreciated paper, or get nothing, until it shall suit the convenience of the Treasury. Unless the administration shall come under some higher obligations of principle than they have heretofore recognised in practice, it does not appear but they may still pay one class of creditors in gold and silver, and another in bank paper, or other paper below par. This power of discrimination between different classes of creditors, I regard as one of the most dangerous extensions of Executive patronage in our power to sanction,

Oct. 7, 1837.]

Treasury Notes.

[H. OF R.]

and it will lead to the rankest corruption if it is permitted to continue.

It is said the credit of the Government will be affected if depreciated bank paper should be offered to the public creditors; and it is pretended that the passage of this bill is necessary to preserve the credit of the Government. What credit do gentlemen allude to? If it is pretended that the credit of the Government has not already been tarnished—if it is alleged that its credit is not every day stained by offering depreciated paper in discharge of public debts, it is notorious that the facts are against the argument. Bank and other depreciated paper has not only been offered, but in many cases it has actually been put off upon a portion of the public creditors, and some of them the most deserving. A portion of the volunteers of Tennessee were not only tendered, but actually paid in bank paper, depreciated fifteen per cent. below the par of specie, during the last summer, and when, at the same time, federal officeholders, residing just across the line between Tennessee, Alabama, and Mississippi, received their salaries in gold and silver, which commanded a premium of fifteen per cent. in Tennessee currency! After this, let no one say that there is no difference established, under the present order of things, between the governors and the governed—between the Government and the people; nor let it be pretended that this Government has maintained its credit untarnished by the contact of depreciated paper. But, sir, I affirm that the credit of the Government, in a financial point of view, has not been impaired by the payment of bank or other depreciated paper to its creditors. I mean to say, sir, that the credit of this Government, so far as that credit is the result of the public confidence in the resources of the country and the disposition of the Government to pay its debts, stands as high at this moment as at any time heretofore.

This Government can now borrow whatever money may be necessary to its wants at as low a rate of interest as at any time of its existence. [Mr. SERGEANT said lower.] The gentleman from Pennsylvania, who sits near me, says that the Government can now borrow money at a lower rate of interest than heretofore. Then it is clear that the Government has sustained no loss of credit by having paid out depreciated paper up to this time. Why not, then, continue the practice? Why not make it uniform? Why not at once raise all the paper of solvent banks to the same standard of value, and pay all the public creditors in the same medium? There is no reason why they should not, except the determination which exists with the administration to persevere in their fatal course of experiments.

What, Mr. Speaker, is this depreciation of bank paper, which, it is said, is an objection to the policy of receiving it in the collection of the public revenue? Suppose this administration were disposed to restore the currency of the country, and should resolve to receive in payment of all public dues the notes of all solvent banks upon such conditions and securities as shall make the Government perfectly safe, what would the depreciation amount to? By this act of the Government the demand for specie would cease in every part of the Union in a great measure; and, when the foreign debt shall be paid, the difference in value between bank paper and gold and silver would be more nominal than real in all the larger cities. The gentleman from New York [Mr. CAMBRELENG] has told us that in the city of New York, the great emporium of our trade, and the centre of exchange, bank paper is now only about four and a half or five per cent. below par. Let the Government, then, resolve to take it in payment of the customs, and from that moment it will assume nearly par value, and in less than sixty days all the Eastern banks can resume specie payments. The merchants then could pay their bonds; they would ask no more indulgence. Millions will immediately be poured into the Treasury. The Government would be able to indulge the banks in the

West, and particularly in the Southwest; and, if the administration should be well disposed, every solvent bank in the Union could resume specie payments in a few months. The demand for specie having ceased, the Government being no longer in the market bidding for it, every serious impediment to the resumption of specie payments will be removed. With the crops of the present year in the Southwest, and with proper indulgence and assistance from the Government, the banks in that quarter need not be long in the rear of the Eastern banks, if at all. Sir, I repeat that this Government, if it is so disposed, can promptly restore the present circulating medium of the country to as sound a condition as it was in before the late suspension. Many of the States would no doubt guarantee the safety of all the paper of the banks within their limits now in circulation. Every solvent bank would furnish satisfactory securities, and all would come under such conditions as would guaranty, both to the Government and the country, that no advantage would be taken of the credit thus given to their paper by adding to the amount already in circulation. Then, sir, we should no longer see in this free country the Government harassing and oppressing its citizens by collecting its taxes in gold and silver, to be distributed among those who have the good fortune to be engaged in the public service, while the great mass of the people have no other currency in use among them but bank paper; a state of things which, for the honor and character of free Government, ought not to be permitted a day longer than a remedy could possibly be applied.

Then, sir, as a measure of coercion against the administration—as a measure of compulsion—I would reject this bill. We know the administration is hostile to the present circulating medium of the country; that hostility is avowed distinctly in the message. In the newspaper organs of the party, and from a hundred different sources besides, we learn that it is the policy of a large party in the country to make banks and bank paper as odious as possible among the people, and finally to break them down. It is, then, the policy of this party to prevent the banks from resuming specie payments; it is their policy still further to cripple the operations of the banks. To compel the Government to take the course, therefore, which the public good requires, and that is to improve the condition of the present circulation of the country, I would withhold my vote from this bill, if there were no other reason in my mind to justify that course. Withhold the aid required by this bill, and all will be well in ninety days; the Government will be compelled to receive and pay out bank paper, and that is all that is necessary, under proper limitations and precautions, to bring about a general resumption of specie payments by the banks.

The chairman of the Committee of Ways and Means has informed us that one object to be accomplished by this bill will be to supply a medium of exchange, a species of paper which we will find very convenient, and a great relief at this time in the West. I can inform the gentleman that he will do a much greater service to the West by taking Eastern bank notes and disbursing them on our Western frontier. These notes would furnish a cheaper remittance than any Government paper that can be created, and they answer all the purposes we desire. But, sir, I know but too well the real grounds upon which this bill is urged through Congress. It is not because the Government cannot get along without it; it is not because there is any particular interest felt in relieving any particular section of the country. It is because, by this measure, and this measure alone, the administration can venture upon any new experiment upon the currency and finances of the country. This is a principal motive. Another one is, beyond all doubt, to furnish a medium of exchange between the different sections of the Union, so as to silence,

H. of R.]

Treasury Notes.

[Oct. 7, 1837.]

if possible, the clamors of those who are continually declaring that we must have a national bank. The first great measure of relief which the country requires, is to restore the existing paper currency to a sound condition. There can be no substantial relief until this is done. I need not tell gentlemen how this can be done. They know well enough how it could be done. As to the question in what manner and by what agency the exchanges of the country are to be regulated, and a suitable medium for this purpose supplied, it need not now be discussed. Upon the subject of a national bank, although I am prepared to give my support to the establishment of one whenever it shall be wise and expedient to make the attempt, yet I am by no means so sanguine as some of my friends upon this floor, that such an institution will be established, at least for a long time to come. Although I represent a section of the country which suffers great embarrassments for the want of an institution of that nature, yet I have felt it to be my duty to advise them that they were probably destined to suffer still greater embarrassments before their wishes could be realized in this respect. As for any relief of that nature from the present Congress, I informed them, before I set out for this place, that there was no hope. The state of parties—the various conflicting interests in the different sections forbid the expectation. My opinion of the remote prospect which exists of the establishment of a national bank, is strengthened by the circumstance that the States of Virginia, South Carolina, Georgia, and Alabama, have so united and combined their financial interests with their respective banks, as to create a general opposition to any institution which threatens to diminish the profits of local banking, and thereby curtail the local revenue. For these various reasons I have not relied upon a national bank as a means of relief at the present time. I am prepared to go all proper lengths in the support of such measures as in my judgment will bring present relief, without entailing upon the country permanent evil; of this last description I regard the measures proposed by the present administration—such I regard the bill under consideration to be. To attempt a relief by the issue of a Government paper, I believe will be a fundamental, a fatal error; not, sir, because the Government cannot supply a very good circulating medium for the present—not that the Government cannot administer present relief to any extent that may be desired, but because I feel the strongest conviction, that more intolerable mischiefs will grow out of this mode of relief ultimately than any we now suffer. Yes, sir, I believe this Government can supply a circulating medium, cheap, convenient, safe, and abundant. I say safe in a mercantile sense; the paper in the power of the Government to issue might answer all the purposes of currency and exchange, without the danger of pecuniary loss; at all events, until the power to issue paper money should be abused by exceeding the demand; but, sir, in every other sense that can occur to the imagination, such a currency would be utterly unsafe—unsafe to the purity and economy of this Government—unsafe to the rights of the States—unsafe to the constitution—unsafe to the liberties of ourselves and our posterity. But still the Government can give present relief. Yes, sir, it can supply a perfectly sound medium of exchange. It could, if the administration were desperate and wicked enough, and it should continue as heretofore to be sustained by a dead majority in both Houses of Congress—it could issue Government paper sufficient to supply the entire circulation of the country; and whether such a design be already formed or not, it is because I see in this bill, and its natural tendencies, enough to put us upon our guard; enough to awaken our suspicions that the administration are meditating such a policy, and that this bill is intended to be the precursor of others more objectionable, that I would set myself against it, whatever relief it may hold out for the present.

I must say a word or two to those gentlemen in this House who are understood to differ with the President in his views upon the subject of the sub-Treasury scheme, although they belong to the same political party; if they mean to be the protectors or conservators of any thing else but the contemptible and paltry interest of money and bank stock, they will not, upon this question, desert the interest of the great body of the people, and especially of the debtor or weaker class, and unite with the enemies of both. It is not certain if in their zeal to come to some compromise of the threatened seism of the party, and by agreeing to exclude all bank notes from this time forth, unless they are convertible into specie on demand, they have not already sacrificed the darling interest of bank stock and bank dividends. They certainly put it into the power of the avowed enemies of the banks, (I mean the gentlemen now at the head of affairs,) to manage and control the new fiscal system, with whatever modifications it may be adopted, so as to make it produce the result most favorable to their wishes; and, rely upon it, if they continue hostile to the banks and to bank paper, the new Treasury machinery, whatever it may be, will be so managed as to bring both into disrepute. Let gentlemen take warning of the fate of the deposit act of 1836. That act, unfortunately for the country, was committed to its enemies to execute, and the whole country has been made to suffer, that those who foretold evil therefrom might acquire credit for sagacity. Nothing can be more certain, in my judgment, than this proposition, that the banks cannot resume specie payments at all while the administration, or, which is the same thing now-a-days, while the Government continues hostile to them. It is my opinion that, without the active interposition of the Government—without actual aid from the Government, the banks cannot resume; but, sir, suppose a majority of Congress shall agree to pass the sub-Treasury scheme in such shape that the collectors and receivers of the public revenue shall be compelled to receive the notes of specie-paying banks at par, if it shall be the policy of the executive department of the Government still to carry on the war against banks and bank paper, and especially if it shall enter into the plans of the Executive to convert these sub-treasuries into branches of a great central office in this city, which is to supply a circulating medium founded upon the credit of the Government, can a doubt exist as to the perfect ease with which the banks may be managed or controlled either way? If it shall be thought best that they never shall resume the payment of specie, what power will exist in the country to counteract the secret orders of the Executive, acting upon and through his dependants and creatures in every collection district? and what bank would be able, in the face of such a powerful enemy, to resume the payment of their notes in specie? But it may become the policy of the foes of the State banks to favor the resumption of specie payments, that they may the more easily prostrate them; it may become necessary to the execution of their plans, that the banks should resume, that their vaults should be opened, that those of the sub-treasuries may be filled. If the banks should resume, and the Government should continue hostile to them, no support they could extend to each other—no combination of interests on their part, could prevent the Government from shutting up the vaults of one after another until all shall have failed. There is no escape from the designs of the Government, if it shall continue hostile to the present banking system, until the people shall change the administration, or unless you refuse to grant the supplies necessary to the war, or, in other words, unless you reject this bill and reduce the Government at once to the necessity of resorting to the use of the same currency which the people are obliged to put up with.

I desire it to be understood, that I stand here the supporter, not of the banks, but of the country, in making

Oct. 7, 1837.]

Treasury Notes.

[H. OF R.]

opposition to this bill. As for the bank stock interest, and those whose course is dictated by the grovelling policy of preserving the State banks, for the sake of themselves, or for the sake of individual interests, I know not whether I would most pity or despise them. If I were to consult my own personal feelings, I would not suffer an incorporated bank to exist; but, sir, it is the various interests with which these banks are connected; it is the general interest; it is the interest alike of merchant, farmer, and manufacturer; of the laborer as well as of the capitalist that they shall be protected against the hands which are now uplifted to destroy them.

I regard the proposition to issue Treasury notes, to supply any alleged deficit in the Treasury, and at the same time to supply the currency of the country, at this particular period, as one of the most mischievous and wicked projects that could be resorted to under any circumstances. The bad tendency of it cannot be doubted, and the bad results are almost as certain. In the first place, this is a resort which ought to be reserved and held sacred for those high emergencies which happen to all nations, at some period or other in their history; emergencies growing out of a state of war; such as threaten danger to the liberties and independence of the country. Then, and then only, should the Government exercise the power of making money, or availing itself, at once, of its power and its credit, by issuing its own notes. The example, in time of peace, is a bad, and may become a fatal one. The object now to be accomplished, and which need not again be pointed out, is sufficiently objectionable, but the consequences which may, and probably will follow from it, are appalling. If there is any member in this House, who considers that economy in the Government ought to be cherished and supported—if there be any who hold that there is any thing in the idea of reform but a mere name, a catch word, to mislead the people; if there are any who think there is any danger to be apprehended from the increase of Executive patronage, I call upon them to reject this bill. I appeal to the gentlemen of the South—I appeal especially to that portion of them who are the advocates of States' rights, and would maintain their due influence in the confederacy, to oppose this measure. I call, more especially, upon those who believe that the greatest danger which threatens our system, is a concentration of all power in the General Government, to unite with me in going against this bill. Has the idea of consolidation lost all its terrors? Have all fears of such a result subsided in this House? If there are any remains of that spirit yet left, which in former times filled this hall with remonstrances upon this subject, it is time it should arouse itself. This bill is prepared under the most artful disguises, and the avowed object is attractive and seductive; it is urged as a measure of relief to the people as well as to the Government; it is said that it will furnish a medium of exchange, which will tend greatly to relieve the interior and Southwest. For one, sir, was not taken by surprise in the introduction of this measure. I foresaw the probable attempt to establish a Treasury bank, and I warned my constituents, during the summer, that the administration might seek to repair the mischief their folly had done the country, by the establishment of a Government bank. I had the high gratification of addressing a large assembly of freemen of my district, not long since, when I took occasion to state to them, that, although no relief could be anticipated from the early establishment of a national bank, yet that the embarrassments which they labored under could all be removed by the administration, by the party in power, if they thought proper; but when I explained to them the means by which it might be attempted; that it would be by issuing a Government paper, and, in effect, by establishing a bank founded upon the credit of the Government; and when I appealed to

them in behalf of those higher and dearer interests which would be put in jeopardy by such a measure of relief, and called upon them to say whether they were not prepared to suffer still greater evils than those which now oppressed them—whether they were not ready to sacrifice half their estates and property, before they would accept present relief at so much risk to the constitution and public liberty, the general exclamation was: “we will sacrifice the whole first!” Of such materials are the farmers and mechanics, whom it is my pride—nay, sir, my glory, to represent upon this floor.

We hear the severest denunciations pronounced against a paper currency every day upon this floor, yet we are about to add to the stock of paper money now on hand in the country; and while the whole Union is filled with the clamor which has been artfully excited against all banks, the nation, in my opinion, is upon the eve of seeing established, under the disguise of sub-treasuries, at every important commercial point, branches of a great central bank, located in this city, founded upon the public revenues, and under the control of the Executive Department of the Government!

I happen to know, Mr. Speaker, from a source entitled to the highest confidence, and I presume you, sir, know quite as well as myself, that the war commenced upon the Bank of the United States in 1829, by the late President, was entered upon with a determination to establish a bank upon its ruins, founded upon the revenue and credit of the Government. I happen to know that the election of a highly distinguished gentleman of the State of Tennessee to the Senate of the United States was urged by a high public functionary, upon the ground that he would be highly useful to him in executing his plans in relation to a new bank. How long these original views of the late President continued to operate I cannot undertake to state. I had sufficient reason to hope that in 1832 the original design of the President was laid aside, or considerably modified. Judging from certain letters which appear to have emanated from the Hermitage, of a very late date, I would infer that the policy of establishing a Treasury bank had been wholly abandoned in that quarter; but, sir, even as late as last summer, there were some symptoms of an abiding determination to carry out the scheme which was commenced in 1829. The tone of one of the leading journals in that State, and more particularly the course of a gentleman long a member of this House, in his canvass during the summer, were striking facts, and they did not pass unobserved. The gentleman to whom I allude has been reputed to be in the confidence of the late and present administrations, and he openly avowed his intention to support a bank founded upon the credit and revenue of the Government. But, why should I refer to circumstances, to conjectures, when, by referring to the report of the Secretary of the Treasury, we shall find the idea of a Treasury bank fully developed and openly recommended, not in name, indeed, but under such feeble disguises that none can mistake the true object? I will quote, in confirmation of what I have said upon this point, a single paragraph from the report of the Secretary of the Treasury. After stating that it is in the power of Congress to furnish “some paper medium of a higher character and other than what now exists,” and which “can be readily secured without treading upon the debatable ground of either the power or the policy of chartering a national bank,” he proceeds to state that “certificates, not on interest, but payable in specie to bearer or order, as well as being receivable for all public dues, could be authorized to be given in payment to the public creditor, whenever preferred by him, and sufficient specie existed in the Treasury. This kind of paper would be very convenient in form, and would differ very little from the drafts now in use on banks, except being drawn on a known specie fund, and expressing on its face not only

H. OF R.]

Treasury Notes.

[Oct. 7, 1837.]

this, but its being receivable, in the first instance, for all public dues. It would possess the highest credit allowable in society."

Sir, after this development of the plans which have been considered at the Treasury, who will be found hardy enough hereafter to deny that a Treasury bank is not to be—will not be, supported by the party in power?

Regarding it thus as the settled policy of a large and powerful party to establish a bank connected with the public Treasury, and to supply a circulating medium of the country with paper issued directly by the Government, I shall consider the republic in danger until this crisis is past. If, sir, you do no more than pass this bill, you set an example of the most dangerous nature. Once establish the practice of supplying all real or alleged deficiencies in the Treasury by issuing Treasury notes, and it cuts off all hopes of retrenchment—of limitation or moderation in the public expenditures. When an appropriation of money shall hereafter be asked for some new and extravagant work of internal or other improvement, we shall have the objection no longer urged upon this floor that the state of the finances will not admit the expenditure; that there is no money in the Treasury. Every one will know that the fact is not so; that, for the cost of the plates and paper, the Government can make as much money as we desire for every purpose. The argument that we are in want of money will be clamored down. We shall be enabled forthwith to buy all the Indian lands between the Mississippi and the Rocky Mountains—to enrich all the agents, jobbers, traders, and other favorites upon the whole Western frontier. We can construct as many artificial harbors upon our lake and Atlantic borders as we desire. We shall be able to erect a chain of artificial fortifications upon our whole frontier boundary, on such a plan as to defy the approach of a foreign enemy. We shall be able to place all our public establishments upon a scale of magnificence and grandeur corresponding with our great name and boundless resources; for there will, for a long time, be no want of money in the Treasury. We shall, indeed, have a splendid Government, and be able to challenge the admiration of all the nations; but, whether our wisdom or our folly will most astonish mankind, I leave it for the advocates of this bill to determine. Whether we shall long remain a free people will soon cease to be a question. Sir, when we shall once have set the example of replenishing the Treasury, upon any alleged emergency in time of peace, by issuing Treasury notes, the practice will become permanent. In a Government like ours, we shall never be able to retrieve a false step like this; we shall never be able to correct a policy which will be entwined with so many interests, until a revulsion shall come, which shall shake, ay, prostrate the now seemingly solid columns which support the fabric of our liberty in the dust.

Mr. BELZ made some remarks upon the subject of the connexion between commerce and the banking system in this country, and showed how much of the prosperity of the country depended upon the credit system; and concluded by moving to strike out the enacting clause of the bill.

Mr. CAMBRELENG asked for the yeas and nays; which were ordered.

Mr. BRONSON said he felt unwilling that the question should be taken on the motion now pending, and that the bill should finally pass from this House, without giving his views upon the measure under consideration; and, from the peculiar character which this debate had now assumed, and particularly since the remarks of the honorable gentleman from Tennessee, Mr. BRONSON said he felt more strongly impelled to state some of the reasons which would influence his vote, and which rendered it clear to his mind that the bill under consideration should become a law. I have (said Mr. B.) regarded this measure as one particularly calculated to relieve the pecuniary distress of the country

generally, and to benefit the people, as well as to furnish immediate aid to the Treasury; as one which has been viewed in that light by all parties in and out of this House, and even till within the last forty-eight hours, I did not consider that there was any serious opposition to an issue of Treasury notes, or Government stock in some form. On my journey to this city, I frequently heard it suggested that such a measure would be eminently calculated to give relief, and one which Congress should adopt by all means, if practicable: and, what is worthy of remark, these suggestions, in almost all instances, came from the opposition—from the political friends of those who are now opposing this bill on this floor. After my arrival here, the project was frequently spoken of, and always with favor; in fact, a sentiment decidedly friendly to the measure prevailed here, so far as I heard any expression on the subject, (with one or two exceptions,) until about forty-eight hours ago, and after this bill had been some time under discussion, when suddenly it seemed that new light had broken in upon this matter. Yesterday morning, Mr. Speaker, we heard from New York that specie had fallen in that great commercial mart—that Treasury drafts were worth as much all to about 1 per cent. as specie—stocks rising and trade apparently reviving. There was also, Mr. Speaker, every reason for the public then to suppose, not only that this bill would pass, but that duty bonds would be extended, and further time given to the deposit banks to pay the balances due from them as provided by the bills on your table. Now, sir, it is a little singular that on the receipt of this news, and when it would seem that better times were dawning upon the country, when business appeared to be reviving, and when this and other measures recommended by the Executive, which it might be supposed would pass this House, appeared to have the effect to allay excitement and restore confidence—I say it is singular, sir, at such a moment, that a most vigorous effort is suddenly made to defeat this bill, and prevent the issue of Treasury notes, which, on all hands, so far as I have understood, has been viewed as a measure so well calculated for the relief of the country. We have heard much, sir, on the subject of the Government taking care of itself without any care for the people. The measures recommended by the administration have been denounced on this floor as having a single eye to that object, and it has been made a matter of complaint here that no measures of relief for the people were proposed. This, however, has been looked upon as a measure calculated to relieve the people as well as the Government; as a measure that would throw into circulation ten millions of dollars, which would be equal to so much addition to the specie capital of the country—furnishing great facilities, either as remittances or domestic exchanges, particularly to all classes of the commercial community. And yet, sir, the moment there is a prospect that this measure will be adopted, and carried too as an administration measure, the whole opposition party are arrayed against it; and unless I have entirely misunderstood the scope and tenor of this debate, their hostility to the measure, if it did not originate on reception of the news from New York above alluded to, it did, at least, then assume a more vigorous, obstinate, and powerful shape, so much so, as to impress upon my mind most strongly the belief that there was some connexion between the cause and effect.

Did gentlemen of the opposition suppose that if this bill passed it would immediately give relief, restore confidence, and redound to the credit of the administration? That such will be the effect, to a very great extent, I have no doubt; and I had hoped that this consideration might not be entirely overlooked by the opponents of this bill; or, if noted by them, that it would not add zeal to their opposition. I hope it has not.

Mr. Speaker, I have listened to the debates on this bill,

Oct. 7, 1837.]

Treasury Notes.

[H. OF R.]

and given them all due attention; and the various objections which have been raised in the progress of this discussion against an issue of Treasury notes, have received from me attentive consideration.

I was in favor of the project from the first, if the state of the Treasury was such as to warrant it, and I have heard nothing yet which to my mind is a sufficient objection against it. Let us look for a moment to the ground which we occupy in relation to this matter, and the point at which we have arrived in this discussion.

Is it not, sir, a conceded point that the Treasury is nearly or quite exhausted—that in a short time it will be necessary to raise money, either by loan or otherwise, unless the unavailable funds now in hand can be realized? I shall not here go into a review of the financial condition of the country, or the state of the Treasury, as exhibited by the Secretary's report, or the various explanations of that report, which have been made on this floor. I assume the position that there is no money in the Treasury, or that such will be the case very shortly—and that money is needed to carry on the operations of the Government. We are told so by the Secretary of the Treasury, and by the chairman of the Committee of Ways and Means. The whole of this debate has proceeded upon that supposition; and with the exception of the honorable gentleman from Tennessee, [Mr. BELL,] and perhaps one or two others, such has been allowed to be the true state of the Treasury by all who have addressed the House on this subject. There can be no question that such is the fact, and the point that is now presented is simply, in what manner shall we replenish the Treasury; I say merely *the* Treasury, and *not* an exhausted or bankrupt Treasury; for, sir, we have ample resources, as soon as they can be realized, without resorting to taxes or duties. It is only necessary to resort to some temporary expedient to enable the Government to go on and to furnish the Treasury with the necessary means, until the debts due to the Government, and the ample but at present unavailable means which we have, can be realized without unnecessary distress or pressure upon the people.

By the strong vote in this House last evening on the subject of selling the United States Bank bonds, it was unequivocally determined that we would not adopt that measure. We must then call upon the deposit banks for the immediate payment of all balances due from them, and also upon the merchants for the instant payment of the duty bonds, or a resort must be had to the issue of Treasury notes or Government stocks for a short time until those claims can be realized. Can gentlemen devise any other course?

You have now, sir, upon your table a bill postponing the payment of duty bonds nine months, and another allowing time to the deposit banks to pay the balances due from them, neither of which are yet acted upon in this House, but both of which, so far as any opinion has been elicited, meet with universal favor. In fact, sir, I doubt whether there is a member on this floor who is not prepared to support both of those measures; and gentlemen opposed to the administration and to this bill, are supposed to be particularly favorable to those. Can gentlemen of the opposition, then, fail to see the effect that the defeat of this bill must have upon those measures? Are they sincere in desiring a delay upon the duty bonds, and the allowance of further time to the deposit banks, and yet oppose this measure, which if defeated must necessarily result in the defeat of both those bills? Are they willing to assume the responsibility of denying any extension to the banks, or on the duty bonds, which must be the inevitable consequence of refusing to pass this bill? I apprehend, sir, that gentlemen have not duly weighed these considerations, and yet it would seem impossible that they can have overlooked the fact that, by exacting immediate payment of the duty bonds and bank balances, not only the security or safety of the debts might be endangered, but that increased pressure and

distress must be felt through all the ramifications of society; and yet, sir, how can that result be avoided if this bill is defeated?

But, sir, another and more weighty objection is now urged to this bill. After it had been debated nearly two days, it was suddenly discovered to be an enemy in disguise; a scheme fraught with all sorts of mischief to the country, and danger to our institutions; in short, an incipient step towards a Treasury bank, as an entering wedge towards a permanent national paper currency. The changes have been rung upon these words, in all forms and shapes, until the ear is weary of the repetition; and, like the old United States Bank, which the gentleman from Massachusetts insisted had become a kind of "stalking horse" in this House, sir, this idea of a "Treasury bank," a "Government paper currency," has become a kind of "stalking horse" to this bill, which is led in upon this floor by every speaker of the opposition, to frighten members out of their votes in favor of this measure. Now, sir, I am as much opposed to a Treasury bank as any of the gentlemen who oppose this bill; and I would go as far in opposing any measure which would be an incipient step towards such an institution, or towards the establishment of an irredeemable Government paper currency, as the most patriotic of them; but, after a very candid examination of the subject in all its bearings, and after a careful perusal of the bill, I cannot discover the lurking dangers with which other gentlemen seem to think it is fraught. I am not able to perceive any foundation for a Treasury bank or for a permanent Government paper currency lurking about the bill, or incident to it. It is, sir, a very plain, intelligible bill, just what it purports to be on the face of it, and meaning nothing more than is expressed; a mere temporary expedient, to enable the Treasury, by an issue of Treasury notes to a limited amount, to fulfil its obligations; thus anticipating the moneys due to the Government, and at the same time to do it without laying any taxes or new duties. The issue of Treasury notes is confined to ten millions, beyond which amount no issue can be made; and, to make assurance doubly sure, I will myself propose the amendment offered in Committee of the Whole, by the gentleman from Maryland, [Mr. JOHNSON,] limiting the time within which these notes shall be issued to the first of June, 1839, or some other shorter time, so as to throw around the bill all those safeguards necessary to render it, as it is intended to be, and as it purports to be on the face of it, a measure merely temporary. By the passage of this bill, we shall, sir, be able to extend all reasonable indulgence to the Government debtors, at a time when it is not only the interest but the duty of the Government to do so; we shall furnish a temporary circulation which may and will be used, not only as a remittance to Europe, but between the different parts of the Union; which will have a tendency to equalize exchanges, retain our specie from foreign exportation, restore commercial confidence, and in every way relieve the country, without injury to the Government or danger to our institutions. I say without danger to our institutions; for, really, sir, I cannot see the least shadow of foundation for the apprehensions of gentlemen on that point. This is a measure which has before been adopted by this Government, and without any objection as to its constitutionality. It is no new experiment, sir; no trifling with the supposed powers given us by the constitution; but the judicious exercise of those powers clearly granted, and an exercise sanctioned as well by authority of a former Congress, as by sound discretion and a just regard for a suffering country.

But, Mr. Speaker, before resuming my seat, I feel bound to notice more particularly some of the remarks of the honorable gentleman from Tennessee, [Mr. BELL.] That honorable gentleman, sir, addressed himself to vari-

H. OF R.]

Treasury Notes.

[Oct. 7, 1837.]

ous interests in this House—to the South and Southwest—and particularly to those members whom he denominated the conservatives on this floor, and invited them most earnestly to come and do battle with him on this field, against this measure. Whether he intended to include me among the members of this latter class, I cannot say; but, at all events, I beg leave most respectfully to decline his invitation altogether. I cannot do battle in any such cause, or in such ranks. But the honorable gentleman says he does not understand the course of the administration party in this House; that he is mystified as to the conduct of a certain portion of the party which he denominates the conservatives; that, on all subjects, they go with the administration, and are uniformly arrayed on this floor in favor of the measures of the administration; that he does not know what to make of it, and he inquires, very significantly, whether they have made peace, and what are the terms; and asks to see the bond of compromise, or to be told what is to be the future course of those whom he calls conservatives.

Now, sir, I shall not affect to misunderstand this, or doubt whether I was one of those members to whom these queries were addressed. I was one of those who voted for Thomas Allen as printer to this House, and neither then nor now, here or elsewhere, have attempted to conceal my vote on that occasion. My reasons for that vote, I am not now called upon to give; this is not the time or the occasion for that, sir; but the fact, perhaps, furnishes a sufficient reason of itself, why I may conclude that the honorable gentleman addresses himself, in part at least, to me. Neither, sir, will I affect to misunderstand the ultimate object of the gentleman's inquiries, and I beg to carry out those queries, and give them the point to which the whole seemed to tend—to arrive at once to the gist of the matter, which the delicacy of the gentleman, and perhaps his disposition to avoid bluntness, induced him to suppress—and which was no more or less than asking myself and others, "do you intend to act with the opposition? will you throw yourselves into the arms of the whigs?" I answer, no! and I thank the gentleman for the opportunity he has afforded me, of answering this question thus unequivocally and unreservedly in the negative. To my friends, no such answer was necessary; but if he, or any other member of the opposition, has supposed from that vote that any such expectation could be fairly entertained, I now take this occasion to put a final extinguisher upon any such supposition or expectation. I speak without authority as to others, and only for myself; but I feel persuaded that I do but speak the well-known sentiments of those members of the New York delegation, whom the honorable gentleman calls conservatives, or who voted for Mr. Allen, when I say that there are no truer friends of the present Executive on this floor than they are, and none less likely to abandon their principles or their party. They were elected as the friends of the present administration, and I have no doubt will sustain it in all honor and good faith. For myself, at least, I can say that I shall do so. And though I did differ, on the occasion above alluded to, in the choice of a printer, with some of my political friends, and may perhaps again have occasion to differ with some of them on unimportant or unessential points, or questions of expediency merely, not involving any political principle and not touching the fundamental principles of the democratic party, yet I feel confident that I am surrounded here by political friends, who are too magnanimous, and who have too high a respect for personal independence and freedom of opinion, to look upon every difference of opinion as a difference of principle; who do not consider that party faith means party servility; and who will respect honest differences of opinion, and not, as a test of party faith or political integrity, exact a blind and slavish obedience to every whim or project which any or every member

of the party may bring forward. I stand here, sir, as the representative of a free constituency, to act as becomes a freeman, and to represent my constituents faithfully, so far as I am able to do it. I was elected as a friend of the administration, and by its friends; and while I have the honor of a seat here, it will be no less my inclination than my duty, to give to this administration that honorable and hearty support, which, from these circumstances, may be justly expected of me, and which shall be alike consistent with patriotism and principle, and a conscientious discharge of duty.

But, sir, the honorable gentleman from Tennessee asks, what are the terms of compromise between the members of the democratic party on this floor? what is the bond of union?—as though some contract had been drawn up and entered into between the friends of the administration, by which they were enabled to act in concert and harmony in the House; and one could suppose that he expected to see some written instrument, perhaps, with the great seal of state appended to it. I can assure the gentleman that there is no such document in existence, to my knowledge; but should there be, he shall certainly be gratified with a perusal of it.

But there is a bond of union, sir, between the friends of the administration, much stronger and more powerful than any such written instrument; and that bond of union, sir, is the political principles which we hold in common; those principles which were characteristic of the last and present administration; which were promulgated by Thomas Jefferson; which from his day to this time have distinguished the democratic republicans from their opponents, of whatever name or description, and have been sanctioned by the voice of the people, and by the dictates of justice and reason. This is the bond of union between the friends of the administration; and this it is that enables them to act unitedly; and this, sir, is the reason why the honorable gentlemen see such a uniform array on the floor of this House in favor of the administration's measures; and why he will continue to see the same thing so long as those measures are in accordance with those principles, and while they tend (as they necessarily must, when in accordance with those principles) to the welfare of the country, and the permanency of the Union.

I trust the mystery is explained, and that the honorable gentleman will, hereafter, have no difficulty in comprehending the course of the friends of the administration, and the reason for their acting in concert.

I hope, Mr. Speaker, that the motion to strike out the enacting clause will not prevail; but that this bill, as well as the other one now before this House, which I have before alluded to, will pass; and that thereby the most essential and immediate relief will be afforded, (as I verily believe it will,) not only to an almost exhausted Treasury, but more especially to the people generally, whose patience, I fear, is as nearly exhausted as the public Treasury, and who are anxiously looking (and I trust not in vain) for such relief as it is in the power of Congress to afford, and such as we can consistently grant, and which the exigency of the times so imperiously demands.

Mr. HALSTED, of New Jersey, next rose, and had proceeded but a little time in reply to Mr. BRONSON, when the hour arrived for the recess.

EVENING SITTING.

The Treasury note bill still before the House, the depending question being as last stated—

Mr. HALSTED resumed his remarks, and entered into an argument to prove that Treasury notes were bills of credit, and therefore not warranted by the constitution. He quoted the message of General Jackson in 1836, Judge Marshall, and various decisions of the Supreme Court, in support of his position. He was, therefore, unwilling to

Oct. 7, 1837.]

Treasury Notes.

[H. OF R.]

give to the administration the power of issuing Treasury notes, as they evidently had no right so to do.

He contended that the language of the Secretary, and the bill itself, indicated that the notes were intended to form a constituent part of the currency, which of itself was a sufficient objection. He also opposed the bill on the ground that it provided no fund for the redemption of such notes, and quoted authorities to show that Government debts should never be incurred without some specific means being appropriated for their liquidation. It was likewise his opinion that the issue of Treasury notes would prevent the banks resuming specie payment. He could not vote for the bill, because it would lay the foundation of a Treasury bank, and add to the Executive power, so as to enable him to buy up the liberties of the people.

Mr. WHITTESEY hoped the gentleman from Tennessee [Mr. BELL] would withdraw his proposition, and that the question would be taken on the bill that night, at least some time before 12 o'clock.

Mr. BELL withdrew his proposed amendment.

Mr. RIVES would like the gentleman [Mr. RHETT] to amend further, by making the Treasury notes redeemable twelve months after date, instead of six, as proposed. For his part, he was not willing to pledge the credit of Government, unless it had funds to comply with its engagements. If the gentleman would modify his amendment as suggested, he would vote for it.

Mr. RHETT accepted the modification.

Mr. RIVES said that, when they came there, they were accused by the opposition with having involved the country in difficulty; and, on that account, the opposition had adopted the motto of "hands off," and would propose nothing themselves, nor co-operate with others in adopting measures of relief. One gentleman [Mr. BELL] had told them that morning that they ought not to do any thing. That gentleman was a "parliamentarian," well versed in the rules, and he was accustomed to make use of that skill in order to attain his objects. Indeed, if he had not been misinformed by his friend, had that gentleman (Mr. B.) succeeded in the morning with his amendment to strike out all after the enacting clause, the bill would have been lost; and, by that course, the gentleman would have prevented any relief to the banks or to the nation. It was thus evident that the object was to defeat the bill, without offering any substitute for it. Mr. R. said that, when he came to Congress, he came with the impression that the Government and country were embarrassed; and, divesting himself of all party feeling, he had not stopped to investigate the causes, but was bent on removing the evil. When a house was in flames, the inquiry was, not how it caught fire, but how the fire could be extinguished! So, in the present case, all debate as to the probable cause of the present distress was worse than useless. All little differences should be laid aside, and each member act for the public good. He then referred to a letter written by Mr. Jefferson, in 1813, to his son-in-law, then chairman of the Committee of Ways and Means, wherein he strongly recommended the issue of Treasury notes, and said they would be more useful if not bearing interest than otherwise; also to an act passed in 1815, and various other acts, authorizing the issue of such notes, without a dissentient voice. He thought, therefore, it was a fair inference that their predecessors had no doubt as to the right given by the constitution for the adoption of such measures, when required by the exigency of Government. He believed the passage of the present bill, whether amended or not, would enable the banks to resume specie payments, and afford relief to the merchants and country at large.

Mr. CALHOON, of Kentucky, would vote for the bill, but more willingly if the notes bore interest than otherwise.

The question was then taken on Mr. RHETT's amendment, which was rejected: Yeas 81, nays 137, as follows:

YEAS—Messrs. Bell, Bond, Boon, Brodhead, William B. Campbell, John Campbell, William B. Carter, Chapman, Childs, Claiborne, Cleveland, Clowney, Connor, Cray, Curtis, Dawson, Davee, Dennis, Duncan, Dunn, Elmore, Ewing, James Garland, Rice Garland, Gholson, Glascock, Jas. Graham, William Graham, Graves, Gray, Griffin, Hammond, Harlan, Harper, Hawes, Hawkins, Herod, Holt, Hubley, Ingham, Jenifer, Henry Johnson, William C. Johnson, Legare, Lewis, Lyon, Martin, McClure, Montgomery, M. Morris, C. Morris, Muhlenberg, Murray, Petrikin, Phillips, Pope, Potter, Rariden, Rhett, Richardson, Ridgway, Rives, Russell, Sheffer, Augustine H. Shepperd, Shields, Shepler, Sibley, Smith, Stone, Thompson, Towns, Wagener, Webster, A. S. White, John White, Elisha Whittlesey, Lewis Williams, Sherrod Williams, Wise, Yorke—81.

NAYS—Messrs. Adams, Alexander, Heman Allen, J. W. Allen, Anderson, Andrews, Atherton, Aycrigg, Beatty, Beirne, Bicknell, Biddle, Birdsall, Borden, Briggs, Bronson, Bruyn, Buchanan, Bynum, W. B. Calhoun, J. Calhoun, Cambreleng, T. J. Carter, Casey, Chambers, Chaney, Cheatham, Clark, Coles, Corwin, Craig, Cranstoun, Crockett, Cushing, Cushman, Darling, Davies, Deberry, DeGraff, Dromgoole, Edwards, Everett, Farrington, Richard Fletcher, Fillmore, Foster, Fry, Gallup, Goode, Grantland, Grinnell, Haley, Halsted, Harrison, Hastings, Haynes, Henry, Holsey, Hopkins, Howard, W. H. Hunter, R. M. T. Hunter, T. B. Jackson, Jabez Jackson, J. Johnson, John W. Jones, Kemble, Kilgore, Klingensmith, Leadbetter, Lincoln, Logan, A. Loomis, A. W. Loomis, Mallory, Marvin, J. M. Mason, Samson Mason, Maury, McKay, R. McClellan, A. McClellan, McKim, McKennan, Menefee, Mercer, Milligan, Miller, Morgan, S. W. Morris, Naylor, Noble, Noyes, Ogle, Owens, Palmer, Parker, Parmenter, Patterson, Patton, Paynens, Pearce, Peck, Pennybacker, Plumer, Potts, Prentiss, Reed, Reily, Rencher, Robertson, Rumsey, Sawyer, Sergeant, Slade, Snyder, Southgate, Spencer, Stanly, Stewart, Stratton, Taliaferro, Taylor, Thomas, Titus, Toucey, Turney, Underwood, Vail, Vanderveer, Weeks, Thomas T. Whittlesey, Jared W. Williams, Joseph L. Williams, Christopher H. Williams, Worthington, Yell—137.

Mr. WISE moved sundry amendments (heretofore indicated) to the bill, which he explained and sustained at length. He proposed to strike out the words "as the Secretary may deem expedient," and to insert instead thereof the words, "as the exigencies of the country may require," in reference to the amount of Treasury notes to be issued. He was also opposed to the issue of the proposed notes with interest. He was of opinion that there was no necessity to issue them at all.

Mr. WISE's first amendment, to strike out and insert as above, was agreed to.

That with regard to the interest proposed was rejected, as were two others immediately following.

Mr. WISE then proposed the following amendment:

Provided, That it shall not be lawful for the Secretary of the Treasury, or any disbursing officer of the Government, to pay out or circulate any Treasury note or notes, so long as there remains in the hands of such disbursing officer, or the Treasurer of the United States, any specie or other available funds: *And provided, further*, That the whole amount, or so much of the five millions of dollars as by law is to remain in the Treasury for contingencies, shall be kept on hand in Treasury notes, until the exigencies of the Government shall render their use or circulation necessary.

Upon which he demanded the yeas and nays. Ordered. Mr. MERCER briefly addressed the House, and sug-

H. OF R.]

Treasury Notes.

[Oct. 7, 1837.]

gested some modification to the amendment of his colleague, Mr. WISE.

Mr. WISE acceded to the proposal to modify his amendment, so that, as modified, it would make it the duty of disbursers to pay out specie first, and then Treasury notes.

Mr. CAMBRELENG opposed the amendment as being altogether impracticable.

Mr. WISE was willing to modify the amendment so as to make it conformable with the gentleman's notions of practicability; and he did so alter his proposition as to make it incumbent on the disbursing officers to pay specie or other available funds, to the amount called for, if they have it, before issuing the Treasury notes.

Mr. CAMBRELENG said his objection was not obviated by this additional clause.

Mr. WISE said it probably would not, alter it as he might; and was proceeding with his remarks, when

Mr. CAMBRELENG, sitting immediately behind him, cried out "question!"

Mr. WISE. "Is the gentleman uneasy? Is he suddenly sick?"

The SPEAKER interposed, and

Mr. WISE proceeded. He wished to be courteous to every gentleman in that House, and also claimed the same consideration. He then concluded his remarks in support of the pending amendment, calling on all those who were going, simply and singly, to supply the exigencies of the Government, to sustain it.

Mr. McKAY said a few words in opposition to the amendment, on the ground of its alleged impracticability.

Mr. WISE, on the suggestion of Mr. FILLMORE, modified his proposition still further, so as to except such sums from liability to being paid out by the disbursing officers, as shall be necessary for the supply of the mint.

Mr. HOWARD said he would make a remark or two upon this amendment. It proposed to take away all discretion from the Secretary of the Treasury, and compel him to pay specie until the last dollar was expended, before he could issue a single Treasury note. This discretion ought to exist. Specie was more imperatively required for some expenses than others. For example, if a vessel of war were about to sail to a foreign station, she must carry some specie with her. Take the case as of the exploring expedition, which, although it was about to go to what the sailors called the "star pole," yet must necessarily touch at civilized ports, and therefore would require no small amount of specie, in order to be prepared for contingencies. If the necessary sum was in the Treasury, there would be no power to reserve it for this purpose, but the first applicant for payment of a demand at the Treasury would sweep it away, and oblige the Secretary of the Navy to postpone the sailing until he could sell Treasury notes enough to supply the sum wanted. Many other cases of inconvenience might be stated. But further: there was probably no custom-house from Boston to New Orleans in which some specie had not been collected. This was placed to the credit of the Treasurer as soon as received, and was, of course, in the Treasury. Should the proposed amendment prevail, the Secretary would have to ascertain from every custom-house whether there was a dollar there, before he could issue a single Treasury note; and if any amount, however small, was in the hands of any collector, no matter however distant from the place where the expenditure had to be made, the hands of the Secretary would be tied up. The amendment would, in practice, entirely defeat the bill.

Mr. RHETT moved to reconsider the vote of the day before, whereby the amendment of Mr. UNDERWOOD, proposing to authorize the sale of the bonds due to the Government from the Bank of the United States, for the supply of the deficiency in the Treasury, as a substitute for the issue of Treasury notes, had been rejected; the mover

at the same time giving notice that, if that motion prevailed, he should move for the issue of four and a half millions of Treasury notes, in addition, to make up the amount required for the wants of the Treasury.

Some conversation ensuing here as to the strict order of such a motion, pending another, Mr. WISE withdrew his proposition for a time.

An unsuccessful motion was then made to adjourn.

Mr. CAMBRELENG asked for the yeas and nays on the question of reconsideration.

The question upon reconsideration of the vote on Mr. UNDERWOOD's motion to amend the bill, was then decided as follows:

YEAS—Messrs. Adams, Alexander, H. Allen, J. W. Allen, Ayer, Bell, Biddle, Bond, Bouldin, Briggs, W. B. Calhoun, J. Calhoun, W. B. Campbell, J. Campbell, W. B. Carter, Chambers, Cheatham, Clowney, Corwin, Cranston, Crockett, Curtis, Cushing, Darlington, Dawson, Davies, Deberry, Dennis, Dunn, Elmore, Everett, Ewing, R. Fletcher, Fillmore, J. Garland, R. Garland, Goode, J. Graham, Wm. Graham, Graves, Grinnell, Griffin, Halsted, Harlan, Harper, Hastings, Hawes, Henry, Herod, Hoffman, Hopkins, R. M. T. Hunter, Jenifer, H. Johnson, W. C. Johnson, Legare, Lewis, Lincoln, A. W. Loomis, Mallory, Marvin, S. Mason, Maury, McKennan, Menefee, Mercer, Milligan, C. Morris, Naylor, Noyes, Ogle, Patterson, Patton, Pearce, Peck, Phillips, Pope, Potts, Rariden, Reed, Rencher, Rhett, Richardson, Ridgway, Robertson, Rumsey, Russell, Sawyer, Sergeant, A. H. Shepperd, Shields, Sibley, Slade, Southgate, Stanly, Stone, Stratton, Taliaferro, Thompson, Underwood, Webster, A. S. White, J. White, E. Whittlesey, L. Williams, S. Williams, J. L. Williams, C. H. Williams, Wise, Yorke—110.

NAYS—Messrs. Anderson, Andrews, Atherton, Beatty, Beirne, Bicknell, Birdsall, Boon, Borden, Brodhead, Bronson, Bruyn, Buchanan, Bynum, Cambreleng, T. J. Carter, Casey, Chaney, Chapman, Cilley, Claiborne, Clark, Cleveland, Coles, Connor, Craig, Crary, Cushman, Dacey, DeGraff, Dromgoole, Duncan, Edwards, Farrington, Fairfield, Foster, Fry, Gallup, Gholson, Glascock, Grantland, Gray, Haley, Hammond, Harrison, Hawkins, Haynes, Holsey, Holt, Howard, Hubley, W. H. Hunter, Ingham, T. B. Jackson, J. Jackson, J. Johnson, N. Jones, J. W. Jones, Kemble, Kilgore, Klingensmith, Leadbetter, Logan, A. Loomis, Lyon, J. M. Mason, Martin, McKay, R. McClellan, Abra. McClellan, McClure, McKim, Miller, Montgomery, Morgan, S. W. Morris, Muhlenberg, Murray, Noble, Owens, Palmer, Parker, Parmenter, Paynter, Pennybacker, Petrikin, Phelps, Plumer, Potter, Pratt, Prentiss, Reily, Rives, Sheffer, Shepler, Smith, Snyder, Spencer, Stewart, Taylor, Thomas, Titus, Toucey, Towns, Turney, Vail, Vanderveer, Wagener, Weeks, T. T. Whittlesey, J. W. Williams, Worthington, Yell,—113.

So the House refused, by a majority of three votes, to reconsider its decision.

Mr. WISE then renewed his amendment, as modified, to except the superintendent of the mint.

Mr. W. called for the yeas and nays on this amendment; which were ordered.

Mr. THOMAS said the gentleman from Virginia [Mr. WISE] has appealed to all members who are not now for commencing a Treasury bank to vote for his amendment. Now, sir, I am of that class; I am for the Treasury note bill as a means to replenish the Treasury and provide for the execution of the money contracts of the Government. I shall vote in good faith for the bill, as a bill of supplies, and think that the Secretary would be guilty of a misdemeanor if he should execute the law as if it had been passed to furnish a paper circulation to the country. But I cannot vote for the amendment to guard against the construction which the gentleman fears will be given to this

OCT. 7, 1837.]

Treasury Notes.

[H. OF R.]

measure. He proposes to forbid the Secretary, the Treasurer, and all disbursing officers, to issue or circulate one of the Treasury notes while the Treasurer or the disbursing officer has either gold or silver on hand. A very few words, I think, are needed to make it manifest that such a provision in the law would make it impracticable for the officers of Government to accomplish the purposes for which it is designed.

Before the policy was adopted of leaving in the mint a large amount of money, to increase rapidly the gold coinage, it was considered prudent to keep in the Treasury at all times a surplus of at least two millions of dollars. Notwithstanding the earnest desire felt in Congress after the war to pay speedily the public debt, the commissioners of the sinking fund, authorized to purchase the evidences of the public debt, were required to leave at all times in the Treasury at least two millions of dollars. It was then supposed to be indispensable to have that amount of money always in the Treasury. In 1836, when the deposit law was passed, the authors of that measure directed the Secretary to retain five millions of dollars in the Treasury, supposing, obviously, that a less sum would not be sufficient to supply our numerous disbursing officers with small sums in anticipation of demands, and at the same time keep the mint in active operation. It is now proposed to abandon this uniform policy, and to prohibit the Treasurer from keeping on hand any surplus whatever, except the money needed by the mint. The Secretary, and all other officers, are to be forbidden to issue or circulate a Treasury note to raise supplies, until all the money in the Treasury has been expended. Let us see how such a rule, if prescribed for the government of those officers, would operate.

All the money in the various depositories is in the hands, in contemplation of law, of the Treasurer. Portions of it are in this city to pay officers of Government and laborers on the public works at this point. Other portions are in New York to fit out the expedition for the South Seas. There are, at the same time, considerable sums of public money in depositories near to the northwestern and southwestern frontier, to pay Indian annuities, or the several corps of our army stationed on that border of the Union. At these and other points throughout the Union the Secretary of the Treasury must take care to keep a constant supply to meet the demands that are to be made on officers employed to disburse the public money. If this amendment could prevail, what would be the condition of this high officer, charged to provide for the prompt fulfilment of almost innumerable contracts? He might, on the fifteenth of this month, learn that five hundred thousand dollars would be required in New York on the first of November next to complete the equipment of the South Sea expedition. On the same day he might receive information that one hundred thousand more would be required on the fifteenth of November at St. Louis, to pay the army in that vicinity, or the annuity to Indians from whom we have purchased vast tracts of rich and fertile lands. Well, sir, he refers to the books of the Department, and finds that the Treasurer has on hand, that is to his credit, fifty thousand dollars in the Bank of the Metropolis, intended to pay the laborers employed on the public buildings. He finds, perhaps, that there are also to the credit of the Treasurer small sums, at various other points, intended there to meet the engagements of the United States: what would, in such a state of things, if the amendment could be adopted, be the duty of the Secretary and of the Treasurer? Those officers would not, of course, request the disbursing officers at New York or St. Louis to wait until all the money standing to the credit of the Treasurer elsewhere had been expended. But it would be incumbent upon them to do an act not much more reasonable. They would have to draw from dispersed depositories moneys standing

to the credit of the Treasurer, to be sent to New York and St. Louis, and then issue Treasury notes to borrow money to be distributed amongst the depositories which had been exhausted. They would possibly have to encounter the expense and inconvenience of transmitting gold and silver from Richmond, Pittsburg, Washington, Baltimore, or elsewhere, to New York, and then, having exchanged the Treasury notes in the last named city for gold and silver, it would be sent back to the points first mentioned, so as to be conveniently disbursed.

These are some of the objections that have occurred to me on the instant to the motion of the gentleman from Virginia. They are to my mind conclusive against its adoption. The amendment appears to be founded upon the supposition that all the debts from and to the United States are to be paid at one point. Even if that was the case, the rule which it is intended to establish would be extremely inconvenient to the officers and to the creditors of the United States. But until the system which has been adopted for the convenience of all concerned, in the receipt and expenditure of the public revenue, shall be abandoned—and this I suppose no man proposes—it will be impossible to administer well the Treasury Department without a surplus of several millions of dollars. If large banking corporations have not always at command unemployed capital of two, three, and in some cases eight and ten millions of dollars, their directors are justly charged with a culpable carelessness about the credit of the institutions committed to their care. We are in part the managers of an immense body politic, having engagements to be executed in every quarter of the globe, and must not refuse to make ample provision to keep the public faith untarnished. The bill before the House has been conceived in a proper spirit. It places within the reach of the Executive all that may be needed, and nothing more. I do not apprehend that the power to be conferred on the President and the Secretary will be abused. Large sums of money will not be withdrawn from circulation to be locked up in the vaults of the public depositories. So believing, I shall vote against the amendment that distrusts, and for the bill which confides in, the capacity and patriotism of those to whose custody I have cheerfully assisted to commit the highest and most important powers of Government.

Mr. WISE then modified his amendment by inserting at the end thereof the words "at the place where the demand is made."

The question was then taken, and the amendment rejected: Yeas 96, nays 118, as follows:

YEAS—Messrs. Alexander, H. Allen, J. W. Allen, Ayer, Bell, Biddle, Bond, Briggs, W. B. Calhoun, J. Calhoun, W. B. Campbell, W. B. Carter, Chambers, Cheatham, Childs, Clowney, Corwin, Cranston, Crockett, Curtis, Darlington, Dawson, Davies, Dennis, Dunn, Elmore, Everett, Ewing, R. Fletcher, Fillmore, J. Garland, R. Garland, Goode, J. Graham, W. Graham, Graves, Grinnell, Griffin, Halsted, Harlan, Harper, Hastings, Hawes, Herod, Hoffman, Hopkins, Jenifer, H. Johnson, W. C. Johnson, Lewis, Lincoln, A. W. Loomis, Lyon, Mallory, Marvin, S. Mason, Maury, McKennan, Menefee, Mercer, Milligan, C. Morris, Naylor, Ogle, Patterson, Pearce, Peck, Phillips, Pope, Potts, Reed, Ridgway, Robertson, Rumsey, Russell, Sawyer, Sergeant, A. H. Shepherd, Sibley, Slade, Southgate, Stanly, Stone, Stratton, Taliaferro, Thompson, Underwood, A. S. White, J. White, C. Whittlesey, L. Williams, S. Williams, J. L. Williams, E. H. Williams, Wise, and Yorke—96.

NAYS—Messrs. Adams, Anderson, Andrews, Atherton, Beatty, Beirne, Bicknell, Birdsall, Borden, Broadhead, Bronson, Bruyn, Buchanan, Bynum, Cambreleng, T. J. Carter, Casey, Chaney, Chapman, Cilley, Claiborne, Clark, Cleveland, Coles, Connor, Craig, Crary, Cushman,

H. or R.]

Rules and Orders—United States, Mexico, and Texas.

[Oct. 9, 1837.]

Davee, Deberry, DeGraff, Dromgoole, Duncan, Edwards, Farrington, Fairfield, Foster, Gallup, Gholson, Glascock, Grantland, Gray, Haley, Harrison, Hawkins, Haynes, Holsey, Holt, Howard, Hubley, W. H. Hunter, R. M. T. Hunter, Ingham, T. B. Jackson, J. Jackson, J. Johnson, N. Jones, J. W. Jones, Kemble, Kilgore, Klingensmith, Leadbetter, Logan, A. Loomis, J. M. Mason, Martin, McKay, R. McClellan, A. McClellan, McClure, McKim, Miller, Montgomery, Morgan, S. W. Morris, Muhlenberg, Murray, Noble, Noyes, Owens, Palmer, Parker, Parmenter, Patton, Paynter, Pennybacker, Petrikin, Phelps, Plumer, Potter, Pratt, Prentiss, Rariden, Rely, Rencher, Richardson, Rives, Sheffer, Shields, Sheplor, Smith, Snyder, Spencer, Stuart, Taylor, Thomas, Titus, Toucey, Towns, Turney, Vail, Vanderveer, Webster, Weeks, T. T. Whittlesey, J. W. Williams, Worthington, and Yell—118.

Mr. WISE then said he should not now offer his other amendments.

Mr. McKAY moved to add a new section to the bill, the object of which was to prevent receivers of public money from charging the Government more interest on these notes than was actually due at the time they came into their hands; which was agreed to.

Mr. BRONSON moved an amendment that the time to which the issue of these notes should be extended should not be later than the 31st of December, 1838; which was agreed to.

Mr. UNDERWOOD proposed to amend the bill so as to defer the issue of the Treasury notes, except for the amount of \$3,500,000, until after the Government bonds, held by the Bank of the United States, shall have been sold: provided that, if those bonds are not sold at the expiration of three months, then the Treasury notes, to the amount of ten millions, are to be issued, as proposed by the bill.

Mr. BYNUM suggested that this proposition was out of order, under the rules, being in substance the same as the one already rejected.

Mr. UNDERWOOD showed that the present proposition differed from the other, inasmuch as it stands now by itself, while before it was blended with another, which might have affected the action of the House materially upon it.

The SPEAKER decided that that was the proper view of the question, and that the amendment of Mr. UNDERWOOD was in order.

Mr. LEWIS would inquire if Mr. UNDERWOOD's proposition included the requirement of interest on the notes?

Mr. UNDERWOOD did not mean to interfere at all with that question in his amendment; seeing the sense of the House to have been very clearly expressed on that point already.

Mr. LEWIS was opposed to the proposition. He wanted the notes issued to be notes for circulation, without interest. This was the only way to make them instrumental in the relief of the country so much demanded.

Mr. THOMPSON spoke in favor of the amendment.

At this point of the debate, a successful motion was made (10 o'clock, P. M.) to adjourn. Yeas 117, nays 80. So the House adjourned.

MONDAY, OCTOBER 9.

An unusually large number of petitions and remonstrances in relation to the annexation of Texas, and the abolition of slavery in the District of Columbia, were presented by gentlemen from different States.

RULES AND ORDERS.

Mr. MERCER, from the Select Committee on the Rules and Orders, presented a report from the Select Committee on the Rules, with additional rules: the first, providing that the hour at which every motion to adjourn is made

shall be entered on the journal of the House: the second, that after the motion to adjourn has been carried, no member shall leave his seat until the SPEAKER has left his.

Mr. DUNCAN, objecting to the latter rule, put the case that the Speaker might see fit to occupy his chair all night.

Mr. BYNUM thought the rule would reduce the House very much to the appearance of a country school. The first rule was not objectionable, but he did object to the second.

Mr. MERCER said that what the rule proposed was the custom in the Legislature of Virginia; that it prevented indecorum, &c.

Mr. BYNUM still objected. He thought the House had gone full far enough in banishing the sale of spirituous liquors from the Capitol, and making members sit uncovered. The time had gone by for such servile deference to the Speaker of the House as was proposed. Gentlemen were not responsible here, but at home, for their morals. The gentleman from Virginia had told him the committee intended to bring in a rule to prevent chewing tobacco, and spitting in the House.

Mr. MERCER said he had told the gentleman he would like to see this done, not that the committee were about to do it.

Mr. BYNUM said it was all the same. There was no knowing where this thing would stop. He moved a division of the question, so as to take it separately on each proposition reported by the committee.

Mr. HAYNES disagreed with Mr. BYNUM. He thought the question presented by the proposed amendment not of morals, but manners.

The 1st rule was adopted; and the question being upon agreeing to the second—

Mr. ADAMS did not see the use of the proposed rule, in relation to members keeping their seats after the adjournment had been declared. The disorderly time was before the declaration was made; when the motion was first started. And, besides, it would operate to keep members in their seats much of the time when they wished to be freely circulating through the hall. It would tend to abridge the privileges of influential gentlemen in directing votes, &c.

The question was then taken on agreeing to the second rule reported, and decided in the negative.

UNITED STATES, MEXICO, AND TEXAS.

Mr. ELMORE offered the following resolution:

Resolved, That, in addition to the 10,000 copies of the correspondence for the annexation of Texas to the United States, ordered to be printed, there be 10,000 more copies printed, to which shall be annexed, from the correspondence "concerning the boundary between the United States and the Mexican Republic, and a cession of territory belonging to the Mexican Confederation to the United States," communicated in the message of the President of the United States, of the 2d October instant, the following documents: Mr. Clay to Mr. Poinsett, 26th March, 1825; extract from instructions; Mr. Torrens to Mr. Adams, 15th February, 1824; Mr. Clay to Mr. Poinsett, 24th September, 1825, extracts; the same to the same, 15th March, 1827, extract; Mr. Van Buren to the same, 25th August, 1829; Mr. Livingston to Mr. Butler, 20th March, 1833, extract; Mr. McLane to the same, 13th January, 1834; Mr. Forsyth to the same, 2d July, 1835, extract; and same, 6th August, 1835, extract.

Mr. ADAMS said he should move an amendment of this resolution. Instead of *extracts*, he moved to print the *whole* of the correspondence and documents alluded to. He was opposed to sending garbled statements of matters so interesting before the people.

Mr. ELMORE said that, having offered the resolution, which he had supposed would have elicited no debate nor opposition, he felt bound to say a word in explanation.

OCT. 9, 1837.]

United States, Mexico, and Texas.

[H. OF R.]

This House had made two calls on the President for information upon subjects connected with Texas. The first was for the correspondence between the authorities of Texas and the United States, concerning the annexation of Texas. The second was for the correspondence with the authorities of Mexico, concerning the boundary line between the two countries, and the propositions for the purchase of any portion of the Mexican territory by the United States. Both calls had been responded to; and, in answer to the first, a communication from the Texian minister to this Government proposing the annexation of Texas; a reply from the Secretary of State; and a rejoinder from the Texian minister, had been laid before this House, and ten thousand copies were ordered to be printed. In reply to the second call, a voluminous correspondence between the proper agents of the Governments of the United States and Mexico had been communicated, and ten thousand copies of it ordered to be printed. Upon looking into the last documents, (said Mr. E.,) I find they are divided into two classes, the first class consisting of those named in the resolution now under consideration, and consisting mainly of instructions given by the different Presidents wielding the executive power of the United States, from 1824 to 1837, to our ministers resident in Mexico, directing them to propose for the purchase of Texas, and giving the reasons why such a purchase was desirable and important for the United States. These constituted but a small portion of the documents communicated under the second call; the rest, comprising nine-tenths, or probably nineteen-twentieths, of those sent by the President, relating almost entirely to a treaty of boundary which was negotiated at an early period of the negotiations between the two countries, and which recognised the boundary fixed for Mexico in 1819, in the treaty of Washington, between Spain and the United States; and in which the latter yielded Texas, and consented to make the Sabine and Red rivers the boundary. This treaty, recognising this line as the true one between Mexico and the United States, was three times negotiated and signed in almost the same terms, having twice failed in consequence of not being ratified by Mexico in the time prescribed by one of its articles. The various forms and shapes which these negotiations assumed, the several propositions to vary them, the causes which produced the failure to ratify—from frequent revolutions, changes in the executive departments charged with this subject, propositions to change the place of negotiation from Mexico to Washington—the formation of a commercial treaty between the countries, and tedious details of all its beginnings, interruptions, and progress; and the urgent requisitions of this Government for the appointment of commissioners to run the line of boundary as fixed in 1819, constitute a mass of diplomatic notes, correspondence, and instructions on these points, which have no bearing on the great subject, the annexation of Texas, which now engrosses the public attention. Ten thousand copies of these are already ordered to be printed; enough to diffuse all the information required. But, sir, it is not so as regards those mentioned in the resolution. They relate especially to the acquisition of Texas; they consist of instructions from the various Presidents who have been in power since 1824, showing, in the arguments and views they suggest to our ministers charged with these important negotiations, the reasons why it has always been deemed important to the welfare of the United States that they should possess Texas.

Sir, the House will remember that, some days ago, the gentleman from Massachusetts made the pregnant and startling declaration, that this was a question of union or disunion. He presented this issue to the people of the United States. Now, sir, I wish my constituents and the people of the South to have all the information on this subject concentrated in this document, which will show them the official action and opinions of this Government, from 1824

to the present day. I wish them to see, by the instructions given our ministers in every administration since 1824, that it has always been considered essential to the safety and interests of these States, and that the sound wisdom and prudence of the reasons assigned in these able papers may be submitted to their solemn deliberation, before they return their answer to the issue tendered by the gentleman from Massachusetts.

It may be, sir, as the gentleman from Massachusetts says, that these documents are "garbled," and only such extracts furnished the House as suit one side of the question. If garbled, it has been done by the President or his Secretary of State. I propose to publish them exactly as they have been furnished to the House. If these documents, and especially the opinions of the distinguished statesman who was President in 1825, shall place any gentleman on this floor in the position of having entertained opinions on this subject not exactly consistent, of having favored and urged the acquisition of Texas at one time, as an important national object, and of having opposed and denounced it at another, it is a matter he must settle as best he can with the country. I have no further concern in the affair than that I want the benefit of the arguments of the then President, contained in these instructions, to aid the people in forming a correct estimate of the importance of Texas to the United States. I do not now propose to argue the merits of this great question, but I desire to spread before the people the information contained in the arguments of far abler men, which I here find prepared to my hand.

But, sir, I apprehend the gentleman from Massachusetts is mistaken in the course he has proposed, if his object is to have all the correspondence relating to the annexation or purchase of Texas, printed on this occasion. He complains that the correspondence is garbled. Let him then call, by a resolution, on the President for that which he says is suppressed. He cannot, by his motion, if he succeed in carrying it, have that printed which is not furnished the House.

Mr. ADAMS observed that that would best appear by showing the House these documents. He wanted all or none. He was opposed to sending forth garbled extracts as the basis of opinions on a subject so momentous. The gentleman from South Carolina had proposed to print extracts from the documents favorable to his own peculiar views on the great question at issue, and not the entire documents. The President of the United States, in obedience to the call of the House, sends certain papers. The gentleman from South Carolina proposes to print a part of them. Mr. A. said his proposition was to print the whole. He had a right to argue that the gentleman proposed to print such extracts as favored one side of the question rather than the other. No conclusion could possibly be drawn from what had already been communicated, and the people had a right to all the light that could be shed upon the subject.

Sir, (said Mr. A.,) I say on *my authority* that, if such a proposition was ever made on the part of the United States to the Government of Mexico, it was received in such a manner as to show that it was offensive in the highest degree to that Government. If, as the gentleman from South Carolina intimates, some parts of those documents prove one thing, there may be other parts of them which go to prove directly the contrary. If any inference is to be drawn from the instructions referred to against the interests of my constituents, or against those of that gentleman's constituents, we ought to have also the answers to the propositions referred to, and not draw inferences from that which is communicated to us, which might be entirely refuted by that which has not been communicated. I repeat that, if there ever was such a proposition made to Mexico, it was received in such a manner that it never was repeated, and never ought to be repeated. I have very strong reason to believe, further, (said Mr. A.,) that at one time the late

H. OF R.]

Treasury Notes.

[Oct. 9, 1837.]

Executive of the United States was deluded into an expectation that the Mexican Government were ready to make a cession of territory to the United States; and, indeed, in one of the documents lately communicated to this House, the minister from Texas affirms to the Secretary of State, that the late Executive of the United States was so confident of the acquisition of Texas, that he offered to Mr. Hutchins G. Burton, of North Carolina, the commission of governor of that territory. [Mr. ADAMS was here reminded by the Speaker that he was transcending the proper limit of debate upon a mere question of printing papers.] Well, (Mr. A. said,) he must then fall back upon the ground of natural justice, which he said would sufficiently sustain his argument that all the papers, if any, ought to go together to the American people.

Mr. A. having demanded the yeas and nays on the motion to amend the resolution, and they having been ordered to be taken—

Mr. CAMBRELENG moved for the orders of the day.

TREASURY-NOTE BILL.

The House then resumed the consideration of the "bill to authorize the issuing of Treasury notes."

The question pending being the amendment of Mr. UNDERWOOD, to authorize the Secretary of the Treasury to issue only three millions and a half of Treasury notes, until the bonds of the Bank of the United States had been offered for sale for three months, exclusive of interest—

Mr. CAMBRELENG appealed to the members on all sides of the House to bring this measure to a conclusion. He did not suppose the gentleman from Kentucky [Mr. UNDERWOOD] really meant to embarrass the Treasury of the United States; but his amendment, if adopted, would be the most extraordinary proposition ever adopted by Congress. His proposition was to authorize the sale of three bonds, amounting each to about two millions of interest. Now there was not a capitalist on the face of the earth who would bid for them. Even the Bank of the United States, with all its capital, could not raise the means to do it, without the aid of the Bank of England, for the simple reason that the bonds could not be divided.

Now, what would be the effect of this proposition? Here was a bill before the House taking from the Secretary of the Treasury the power to draw drafts, which destroyed, in one single instant, the power to draw for one single dollar to pay the public creditors, who were now waiting for these Treasury notes. By the amendment, he had the right to issue only three millions and a half of notes in the last quarter of the year, thus tying up his hands for three months, except so far as his reliance upon these three millions and a half only for the expenses of the Government during that time, when, according to the estimates, at least ten millions will be required for the same period. This would, in effect, bankrupt the Treasury.

Mr. C. said he wished, too, to reach another bill of primary importance, the divorce bill, before they adjourned, for he was anxious not to leave the Treasury and the finances in their present unregulated condition. In a New York paper he was made to say that he never intended to bring that bill up. He must have been mistaken in what he said, since he argued quite the reverse.

Mr. UNDERWOOD, in support of his amendment, and in reply to the gentleman from New York, [Mr. CAMBRELENG,] said that that gentleman had done him but justice in saying that he (Mr. U.) did not wish to embarrass the operations of the Treasury. He begged leave to make one or two remarks, however, in defence of his amendment. That gentleman had said that the whole ten millions demanded would be wanted during the balance of the current year. This certainly did not appear to be the opinion of the Secretary of the Treasury himself, if there was any truth in his report.

Including \$16,000,000 appropriated last year, the whole charge on the Treasury amounts to	\$48,000,000
Of this there has been paid	\$24,000,000
Of this there has been suspended	15,000,000
	39,000,000

Which leaves the difference at - - - \$9,000,000 if there is any truth in figures. And now, what means, Mr. U. would ask, was there to meet this \$9,000,000? The proceeds of the public lands, and the cash duties accruing, would not fall short of \$6,000,000, which, with the three millions proposed by this amendment, would suffice for the balance of the year. These statements were too plain to be controverted.

Mr. U. also wanted the question taken speedily, and modified his amendment by striking out "exclusive of interest."

Mr. LEGARE proposed to insert an interest of two per centum. This proposition, he thought, would be a compromise which would obtain very generally.

Mr. SERGEANT also remarked, that the Secretary of the Treasury had taken a view of this bill not warranted either by the language of the bill or by the views of members of that House, so far as those views had been disclosed. That gentleman had written to brokers and others, all over the country, to inquire of them at what rate they would purchase those notes; whereas there was no authority in the bill to sell the notes at all.

The authority or power of the Secretary of the Treasury was confined to two points. In the first place, he could only issue them to creditors of the Government, in satisfaction of debts, on their nominal amount, with the interest that may then have accrued. The next power was the power to borrow upon the hypothecation of the notes.

On these points Mr. S. dwelt at some length. As to the constitutional power of the Government to issue these bills he had no doubt in the world. It had as much constitutional power to do that as to charter a national bank. With reference to the wants of the Treasury, he preferred that they should borrow money of that description, which would answer the purposes of the Treasury.

Mr. CAMBRELENG said a few words in reply to Mr. S., and gave notice of his intention to enter more at large on the subject of the gentleman's present and late speech in support of a national bank, when the divorce bill came up. The gentleman's argument about the people's money and the Government's money, was a merely *ad captandum* one, designed to produce an effect upon the elections in Pennsylvania.

Mr. C. agreed with the gentleman that the Secretary of the Treasury had not properly construed the act now under consideration; for, if he had construed it properly, there never could be any depreciation whatever of these notes. There was no power given in the bill to sell the notes, but to borrow money upon them.

Mr. PICKENS made an urgent appeal to the House, that, considering the lateness of the session, and the important measures behind, they would vote on all the propositions now before it on this bill. He declared his intention of voting against the bill himself if it embraced interest.

Mr. MERCER opposed the bill.

Mr. UNDERWOOD again modified his amendment, so as to authorize the Secretary of the Treasury to exchange the bonds with the Bank of the United States for smaller bonds.

Mr. GHOLSON replied principally to the remarks of Mr. BELL on Saturday last, and spoke in opposition to the establishment of a national bank, and in support of the bill, without the amendment under consideration. He insisted that the bill was opposed, and was intended, if possible, to be defeated, for the express purpose of promoting the object to charter a national bank.

Oct. 9, 1837.]

Treasury Notes.

[H. of R.]

Mr. BELL spoke briefly in reply.

Mr. REED animadverted upon what he termed the miserably erroneous estimates of the Secretary, and argued against the necessity of passing the original bill without the amendment, viz: to sell the bank bonds.

Mr. GHOLSON rejoined to Mr. BELL, but his remarks were cut off by the hour having arrived for taking a recess, when the House adjourned till 4 o'clock.

EVENING SESSION.

The House met after recess.

Mr. GHOLSON resumed and concluded his remarks in reply to Mr. BELL, the whole of which are given entire, as follows:

Mr. Speaker: If, by remaining in my seat, I believed the vote on the amendment proposed by the gentleman from Kentucky, [Mr. UNDERWOOD,] or on the bill itself, would be taken at an earlier period, I surely would content myself with giving a silent vote, however anxious I may be, or may have been, to express my views. I am in bad health, worn down with previous labor, and find myself but illy calculated for the effort of debate. The course of the whigs on this floor, ever since the commencement of the session, has assured me that their object is, and has been, that this House shall not act on any bill likely to relieve the embarrassments of the country.

Sir, I am justified in saying that the object of the whigs is, and has been, to keep up excitement in the country, and add embarrassment to the already embarrassed condition of the Government and the people. When this session first commenced, we were told by the gentleman from Tennessee [Mr. BELL] and the gentleman from Virginia, [Mr. WISE,] who are regarded by me and by the country as the oracles of the whig party, that they had no measures of their own to bring forward to relieve the Union. The gentleman from Virginia went further. He requested or directed his whig allies to bring forward no measure to relieve the country. He said that, for one, he would let the country groan on; that it was not the intention of the administration party here to carry out the recommendations of the President; and even went so far as to warn my friend from South Carolina [Mr. PICKENS] to be on his guard, lest he were arrested and shot down as a deserter. Being now hard pressed in this quarter, and this bill (which has been so bitterly denounced) being likely to be finally voted on before the close of the session, he calls in the aid of his ally from Tennessee, [Mr. BELL,] and solicits that gentleman to aid him in occupying the time of the House with fruitless discussion and vapid denunciation until the close of this extraordinary session; and thus prevent, what is so much dreaded by both gentlemen, that relief which the country so imperiously demands, and which, if we possess the power, we are bound to afford to it.

Well, sir, the gentleman from Tennessee has not been unmindful of the appeal of the gentleman from Virginia. He has promptly obeyed the mandate, and has gone to his aid; and, with the skill and management of a political grimalkin, he consumed the whole of Saturday in discussing a motion that he never intended should be voted on; and after a day and a part of the night had been consumed by descanting on that time-killing motion, the gentleman from Ohio [Mr. WHITTELEY] came forward, and asked the gentleman from Tennessee to withdraw his motion. The request was instantly complied with, thus conclusively proving, to my mind, that the whole design and object of the gentleman was, and is, confusion, excitement, embarrassment, not action or relief to the Government or the people.

Sir, we have now progressed on this legislative journey till we have reached the last week of the session. And what, Mr. Speaker, let me ask, have we, the administration party, been permitted to do? By our untiring exer-

tions we have got one little bill through the House! The suffering people have a right to know to whom this delay, this waste of time, of money, this trifling with their rights and interests, is to be ascribed. Sir, this remissness, this flagrant injustice, and wanton dereliction of duty, cannot, and must not, be charged to the administration party; for if the whigs, as they avow, have no projects or plans of relief of their own, why have they not permitted us to carry out those plans of the administration which we stand ready to execute? Is it because they fear the country will be relieved?

What, sir, said the gentleman from Tennessee, [Mr. BELL,] when he came forward, on Saturday, with his time-killing project? He said he had told the people, "the dear people," just before the election—at a time when he undoubtedly cherished a very warm and tender feeling of regard for the people—that it would be in the power of the administration to relieve the country in sixty days at furthest! Well, sir, why does not the gentleman bring forward the plan that he suggested to his constituents? Is he not bound to do so, if he believes what he has said in relation to the plans set forth in the President's message? Surely he is. When he undertakes to say that the schemes suggested in the President's message are wild and visionary, and impracticable, have we not a right to expect from him some plan that will, according to his own views, afford relief, practical relief—a plan that is in itself practicable and reasonable? What was the vast and wonderful scheme that the honorable gentleman suggested to the people of his district? He says that it was a scheme to force the Government to take up the \$100,000,000 of irredeemable bank paper now afloat in the country! Indeed, sir!

Mr. Speaker, common sense, the commonest reasoning, and the teachings of every day's experience and observation, all go to prove the utter impracticability of the proposition. I have too high a regard for the gentleman's intelligence, to believe, for a single moment, that he believes in the practicability of any such project. Those banks which have flooded the country with a redundant paper circulation, have failed, and their paper become worthless in the hands of the people, at the very time when they were sustained by all the resources of this mighty and munificent Government daily poured into their vaults. They failed, sir, when they were sustained, not only by the Government, but by the confidence of the whole American people, and by that still stronger power, public opinion. If they failed under the existence of such props and such patronage—if they could not exist as organic bodies, and perform the functions required of them by law and by their charters, under the existence of circumstances so favorable—and if their paper, as we all know to be the fact, has depreciated fifteen per cent. how much more signal and complete must be their failure, when they do not and cannot obtain the confidence of the people?

Sir, I defy the Government to give the people confidence in these banking institutions. They have already failed, and without the confidence of the people they cannot be resuscitated; they cannot sustain themselves.

Mr. Speaker, who, let me inquire, ever heard of a Government like ours, in a time of profound peace, dealing in paper known to be depreciated, and attempting to make that paper the circulating medium of the country? Do we not all know that this plan is wild, visionary, impracticable and unheard of? I know, sir, the gentleman from Tennessee does not believe it practicable; if he did, he would bring it forward in a tangible shape. I have too much confidence in his ability as a statesman, too much confidence in his intelligence as a financier, to do him the injustice of believing him at all in favor of the plan of which he has spoken.

The causes that have moved the gentleman from Ten-

H. of R.]

Treasury Notes.

[Oct. 9, 1837.]

nessee in this matter, are easily divined; nay, they cannot be misunderstood. He had said something on this subject to the people of his district, to his constituency if you please, and he wished to consume the time of this House, above all, he wished to aid the federal bank party in this House, and to attain his ends, he came out with the plans on which I have animadverted, and hoped to impose on the country. I say this, for this further reason, that the whole course of the opposition, with whom the gentleman from Tennessee is acting, has been directed to the single and sole purpose of preventing any thing being done by the administration to relieve the country. They are influenced in their course by the belief that, if they can keep up the present excitement in the country, they can force from the necessities of the people the recharter of the United States Bank, or a national bank subservient to their wishes. They know that this question has been again and again submitted to the people, and the people, after calm deliberation and reflection, have decided that they will not have a bank. But, not satisfied with the unqualified expression of the people's voice, they still cling with tenacity to the desperate hope that has been made to tell its "flattering tale," by the present unnatural excitement and derangement that now pervade every section of the country. They know that if the country is relieved and the present excitement can be quelled, their hopes of a national bank will be laid prostrate. And this is the reason, Mr. Speaker, this struggle has been so desperate; this, sir, is the reason that the cry of Executive bank, has been sounded through this hall; this is the reason that we have been so often boastfully told, that unless a national bank were incorporated, the country would be convulsed. This is the true and only reason that exists for the cry we have so often heard, that this bill will sap the liberties of the country; that by means of this Executive bank, the President would be enabled to place his foot on the necks of the people. This cry has been raised because gentlemen know that a bank is yet unpopular; and they hope to prejudice the country against this bill before it passes, by calling it an Executive bank bill. Sir, they seek to frighten us by telling us that when we give our assent to this bill we give our assent to a measure that is to convulse the country. For one, Mr. Speaker, let me tell gentlemen, that names have no terror for me. I have no fear that this bill will enable the President to place himself above the constitution and the people; I am not so timid that I can be alarmed by such bug-bear appeals to my courage.

But why, let me ask, have we this constant cry of bank, bank, from the known bank party on this floor? It has been said that this bill was intended to defeat a national bank. I am willing to place it on that issue before the American people; I will, and do, hereby declare my assent to this measure, humble as gentlemen say it is, and at the same time I avow my decided opposition to any national bank. And, sir, if convulsions, anarchy, and confusion are to be the consequences of our refusal to charter a national bank, let them come, and I shall be prepared to meet them. Sir, I have stated that names have no terror for me. I am in favor of this bill. I wish these Treasury notes to enter into the circulation of the country, and if they do get into circulation, depend upon it, sir, the one-half of your embarrassments will be removed at the instant they find their way from the hands of the Secretary. This bill has no similitude to a bank, Mr. Speaker, and if gentlemen attempt to distort it into any thing of the kind, they will get their labor for the pains. The Treasurer, under it, has no power to issue bills, except as the creditors of the Government may require them. The passage of the bill will not enable the Secretary of the Treasury to throw thousands and millions of paper into circulation in a day, by which the price of property, and of labor, and

of every thing else, will receive fictitious valuations, and then by suddenly withdrawing the circulation, depress the price of the same substances and properties far beneath their intrinsic value.

Mr. Speaker, I respectfully ask gentlemen to do me the favor of pointing out the resemblance that this bill bears to a bank; I ask them to particularly point out the characteristics by which they are enabled to determine that this is an Executive bank.

The next direct attack made upon this bill, is the one now pending in favor of that defunct monster, the late United States Bank, offered by the gentleman from Kentucky, [Mr. UNDERWOOD.] This amendment, has, I believe, been already twice rejected by this House, and is now properly out of order. But as I am no stickler for points of order, I will make no question of that sort. This amendment, like the late United States Bank, is no sooner defeated in one shape than it rises in another. By this amendment, it is proposed to offer in lieu of the bill, the bonds executed by the late United States Bank to this Government, in that institution. Then it is proposed to throw into the market in these times of general depression, \$6,000,000 of bank bonds due in the course of the next four years, payable by instalments of \$2,000,000, bearing interest from the date of their execution. Now, sir, who are to be the purchasers? We know in these times of general distress, no individual, and scarcely any incorporation, has the ability to make such a purchase. Then if these bonds are thus untimely thrown into the market, the Government must and will sustain an immense loss. The old bank may or may not be the bidder for these bonds. The course that that institution has heretofore, and is now pursuing, is this: A short time after the suspension of specie payments, that bank threw into the market \$5,000,000 of bank bonds, or post notes, payable at a future day in England. These bonds or notes were sold in the market for a premium of five per cent. The agents of the bank proceeded to the cotton-growing States, and with the notes of the Pennsylvania Bank of the United States bought cotton to meet these bonds. The notes of the institution commanded a premium, owing to the immense debt due from the South and West to the eastern and northern cities. The fund upon which these \$5,000,000 was first drawn having been exhausted, this is the game that is now being played off by Mr. Biddle on the South. He has his agents there, selling the notes of the old bank, which neither the United States Bank of Pennsylvania, nor any other institution, is bound to redeem. This paper, in these times of distrust and oppression, commands a premium over the local bank paper of the country. It first passes into the hands of our southern merchants, they paying a premium for it of about 15 per cent. above local bank paper. The merchants pay it over to the agents of the northern merchants, who are literally swarming like hungry locusts through the country; who, knowing its utter worthlessness, and that no one is bound to redeem it, immediately sell it for local bank paper at a premium. With this paper they buy cotton. In this way, one set of these irredeemable notes buys the cotton of the whole neighborhood at a discount of at least 15 per cent. Thus is the ghost of this institution enabled to plunder my constituents out of 15 per cent. of their labor.

This system of plundering the South, so long practised by the Northern capitalists, has enabled that section of the country, through the agency of the institution of which I speak, to play a game that must be suspended, and it is to an evil so monstrous that I am anxious to apply a remedy. This can be done effectually by the rejection of the amendment and the passage of the bill. In this way, this institution will be driven out of the market; for when the notes proposed to be issued by this bill enter, as they will, into the circulation of the country, the worthless paper of this

Oct. 9, 1837.]

Treasury Notes.

[H. OF R.]

insolvent institution referred to, will be banished from circulation.

Mr. Speaker, the gentleman from Tennessee [Mr. BELL] complains that I have no right to place the construction on his acts that I have so freely and fully expressed; and, sir, he has added that I have expressed opinions in reference to him that are not justifiable by facts. Sir, I must be allowed to tell that gentleman that the actions and conduct of public men in this hall are, and of right should be, public property. As such, I have a right to come to my own conclusions in relation to them. Having formed my opinions as to the moving cause for the conduct of that gentleman in the present instance, I have taken the liberty to express those opinions, and I claim the right of doing so. Sir, I should be sorry to do any gentleman an act of injustice. I have misstated no matter of fact; and, if I have otherwise done the gentleman injustice, I shall be found at all times ready to render him the most prompt and adequate satisfaction.

Mr. Speaker, the gentleman has taken occasion to say something in relation to the interest of my constituents. Now, sir, I will tell the gentleman that I am their representative, and that if I misrepresent them I am accountable to them for the act. Therefore, neither they nor we require any aid or advice from the gentleman from Tennessee.

I know, sir, that I represent a suffering people, a people who are immensely in debt; but, thank God! we have a climate, a soil, and a production, that, when added to the never-ceasing vigilance of our people, will enable us to pay, in a short time, a larger debt than can be extinguished by any other people of the globe.

Much, sir, has been said about the immense debt our banks owe the Government, and not a little has been said and insinuated about the alleged insolvency of those institutions. Sir, I ask gentlemen, before they make any more assertions on this subject, to examine into the true situation of our banks. I make the assertion, without fear of contradiction, that our banks, the banks of the State of Mississippi, have as large an amount of assets in their possession as any banks in this Union which have not a greater circulation afloat. I have no doubt they are as solvent, and will resume specie payments as soon as any banks in the Union having at the time of the suspension as large a circulation as they had.

But it is said the banks have asked for indulgence. I say it is untrue. If they have asked indulgence, I am not informed of it. I, on my own responsibility, asked indulgence for them in order that I might favor their debtors. Now, sir, if the gentleman from Tennessee, [Mr. BELL,] with his proclaimed charity for my constituents, will aid me in keeping the hands of this Government off of our banks for a short time, he will render us good service. Any attempt to force these banks to pay their debts unnaturally oppresses the debtor's interest. Whenever the Government presses the banks, it presses its own debtors, and thus the Government directly oppresses the people.

If the Government continues, according to the suggestions of the gentleman from Tennessee, who is so charitable, to draw on our banks, these drafts must, for some time to come, come back protested. This will keep down our money, and force us to pay the highest premium that we have heard so much talked of.

Sir, I care but little for those banks as mere corporations, but I have a great good feeling for the people who are in their power. You have relieved the balance of your Government debtors, and why not relieve them also? I am sure they are as meritorious as your Northern merchants. Now, sir, the passage of this bill, without the amendment, appears to me to be the only means by which the country can be relieved. It is the only hope I have for our banks soon resuming specie payments; for when

this bill shall have passed, the Government will be relieved. Ten millions will be liable to be gradually thrown into circulation. You can then give our banks reasonable time; and thus the whole will be accommodated.

Sir, the gentleman from Tennessee [Mr. BELL] said something about forcing the Government into terms. What terms does he mean? The terms of these irresponsible banks? If these are his terms; if a submission on the part of this administration to the dictations of these banks are the terms upon which we are to buy the peace of the country, it is such a peace as I do not want. If this is the way that quiet in this land is to be kept, let us have the confusion of which we have heard so much since the commencement of the session. I think the sooner it comes the better.

Sir, has it come to this, in this land of liberty and of law, that these banks can, and will, dictate to an American Congress? Are we to be no longer independent? Are we to be forced to ask these most soulless corporations what we shall do, and what we shall not do? Surely not yet. This is the direct policy of the bank party on this floor. I am prepared to record my vote; I am prepared to meet the crisis, and share my fate. I have no fears of the result.

Mr. Speaker, I had intended to have proceeded further in discussing these topics, but I find myself unable, from exhaustion and debility, to go on any further.

Mr. CURTIS addressed the House in a short speech, expressive of his regret that his colleague [Mr. CAMBRELENGE] had laid aside the bill originally reported by him from the Committee of Ways and Means, and had engraffed the Senate's bill upon its enacting clause as an amendment. He was in favor of the bill in its original shape, but opposed to an issue of Treasury notes bearing interest, and would prefer the amendment of the gentleman from Kentucky now under consideration, especially as recently modified. He explained how the bonds of the United States Bank might be rendered available, and sold in Europe.

Mr. UNDERWOOD having altered his motion to amend the bill so as to make it read as follows:

"But no Treasury notes shall be issued under the provisions of this act, except for the sum of three million five hundred thousand dollars, until after the Secretary of the Treasury shall have offered for sale the bonds executed by the president, directors, and company of the United States Bank of Pennsylvania, in consideration of the stock held by Government in the late Bank of the United States; and the Secretary of the Treasury is hereby authorized and directed to sell and transfer said bonds, or any one or more of them, to the purchaser or purchasers, and to apply the money arising from such sale and transfer in payment of any demands upon the Treasury: *Provided, however,* That no sale and transfer of said bonds shall be made for less than the nominal amount of said bonds respectively, with the interest which shall have accrued thereon up to the day of sale. But if said bonds cannot be sold as is herein provided, in three months from the passage of this act, then it shall be lawful to issue Treasury notes to the amount not exceeding in the whole ten millions of dollars.

"It shall, moreover, be lawful for the Secretary of the Treasury to surrender any one or more of said bonds to the bank, and to take in exchange smaller bonds for the amount, to facilitate the sales and transfers herein provided for."

The question being put on the amendment of Mr. UNDERWOOD, in this shape, it was decided as follows:

YEAS—Messrs. Adams, Alexander, H. Allen, J. W. Allen, Ayer, Bell, Biddle, Bond, Briggs, W. B. Calhoun, J. Calhoun, J. Campbell, W. B. Carter, Chambers, Cheatham, Childs, Clowney, Cranston, Crockett, Curtis, Cushing, Darlington, Davies, Deberry, Dennis, Dunn, Elmore, Everett, Ewing, R. Fletcher, Goode, J. Graham, Grennell, Griffin, Halsted, Harlan, Harper, Hastings, Hawes,

H. or R.]

Treasury Notes.

[Oct. 9, 1837.]

Henry, Herod, Hoffinan, Hopkins, R. M. T. Hunter, W. C. Johnson, Lawler, Lincoln, A. W. Loomis, Mallory, Marvin, Samson Mason, Maury, Maxwell, McKennan, Menefee, Mercer, Mathias Morris, Calvary Morris, Naylor, Noyes, Ogle, Patterson, Peck, Pickens, Pope, Potts, Rariden, Randolph, Reed, Rencher, Ridgway, Robertson, Rumsey, Russell, Sergeant, Augustine H. Shepperd, Charles Shepard, Shields, Sibley, Slade, Stratton, Taliaferro, Thompson, Underwood, A. S. White, John White, Elisha Whittlesey, Lewis Williams, Sherrod Williams, Joseph L. Williams, Christopher H. Williams, Wise, Yell, Yorke—94.

NAYS—Messrs. Anderson, Andrews, Atherton, Beatty, Beirne, Bicknell, Birdsall, Boon, Brodhead, Bronson, Bruyn, Buchanan, Bynum, Cambreleng, Casey, Chaney, Chapman, Cilley, Claiborne, Clark, Cleveland, Coles, Connor, Craig, Crary, Cushman, Davee, DeGraff, Dromgoole, Edwards, Farrington, Fairfield, Foster, Fry, Gallup, Gholson, Glascock, Grantland, Grant, Gray, Haley, Hammond, Harrison, Hawkins, Haynes, Holt, Hubley, W. H. Hunter, T. B. Jackson, J. Jackson, J. Johnson, N. Jones, J. W. Jones, Kemble, Kilgore, Klingensmith, Leadbetter, Lewis, Logan, Arphaxed Loomis, Martin, May, McKay, Robert McClellan, Abraham McClellan, McClure, McKim, Miller, Montgomery, Moore, Morgan, S. W. Morris, Muhlenberg, Murray, Noble, Owens, Palmer, Parker, Parmenter, Paynter, Pennybacker, Petrikim, Plumer, Potter, Pratt, Prentiss, Reily, Rhett, Richardson, Rives, Sawyer, Sheffer, Sheplor, Smith, Snyder, Spencer, Stuart, Taylor, Thomas, Titus, Toucey, Towns, Turney, Vail, Vanderveer, Webster, Weeks, Thomas T. Whittlesey, Jared W. Williams.—109.

So Mr. UNDERWOOD's amendment was negatived.

Mr. ROBERTSON moved to amend the bill by striking out the whole of it, after the enacting clause, and inserting, in lieu thereof, the following:

That the Secretary of the Treasury be, and he is hereby authorized, with the approbation of the President of the United States, to borrow on the credit of the United States, from time to time, such sum as the President may think expedient, not exceeding in the whole, \$7,000,000, to be reimbursed with interest not exceeding 6 per cent. per annum, at the expiration of twelve months from the date of the loan or loans respectively.

The question upon agreeing to this amendment was decided—Yeas 86, nays 131, as follows:

YEAS—Messrs. Adams, Alexander, H. Allen, J. W. Allen, Ayerigg, Bell, Biddle, Bond, Briggs, W. B. Calhoun, J. Calhoun, W. B. Carter, Chambers, Cheatham, Childs, Clowney, Coles, Corwin, Cranston, Crockett, Curtis, Cushing, Darlington, Dawson, Davies, Deberry, Dennis, Dunn, Elmore, R. Fletcher, Fillmore, Goode, Grennell, Griffin, Halsted, Harlan, Harper, Hastings, Hawes, Henry, Herod, Hopkins, R. M. T. Hunter, W. C. Johnson, Lawler, Lincoln, A. W. Loomis, Mallory, Marvin, S. Mason, Maury, Maxwell, McKennan, Mercer, Milligan, Calvary Morris, Naylor, Ogle, Patterson, Peck, Phillips, Pope, Potts, Rariden, Randolph, Reed, Rencher, Ridgway, Robertson, Rumsey, Russell, Sawyer, Sergeant, Slade, Southgate, Stanly, Stone, Stratton, Taliaferro, Thompson, Underwood, A. S. White, E. Whittlesey, C. H. Williams, Wise, Yorke—86.

NAYS—Messrs. Anderson, Andrews, Atherton, Beatty, Beirne, Bicknell, Birdsall, Boon, Borden, Bouldin, Brodhead, Bronson, Bruyn, Buchanan, Bynum, Cambreleng, J. Campbell, Casey, Chaney, Chapman, Cilley, Claiborne, Clark, Cleveland, Connor, Craig, Crary, Cushman, Davee, DeGraff, Dromgoole, Duncan, Edwards, Farrington, Fairfield, Foster, Fry, Gallup, J. Garland, Gholson, Glascock, J. Graham, Grantland, Grant, Gray, Haley, Hammond, Harrison, Hawkins, Haynes, Holsey, Holt, Howard, Hubley, W. H. Hunter, Ingham, T. B. Jackson, J. Jackson, J. Johnson, N. Jones, J. W. Jones, Kemble, Kilgore,

Klingensmith, Legare, Leadbetter, Lewis, Logan, A. Loomis, Lyon, Martin, May, McKay, R. McClellan, A. McClellan, McClure, McKim, Miller, Montgomery, Moore, Morgan, S. W. Morris, Muhlenberg, Murray, Noble, Noyes, Owens, Palmer, Parker, Parmenter, Paynter, Pennybacker, Petrikim, Phelps, Pickens, Plumer, Potter, Pratt, Prentiss, Reily, Rhett, Richardson, Rives, Sheffer, A. H. Shepperd, C. Shepard, Shields, Sheplor, Sibley, Smith, Spencer, Stuart, Taylor, Thomas, Titus, Toucey, Towns, Turney, Vail, Vanderveer, Wagener, Webster, Weeks, J. White, T. T. Whittlesey, L. Williams, S. Williams, J. W. Williams, J. L. Williams, Worthington, and Yell—131.

So the amendment was negatived.

Mr. ROBERTSON then further moved to amend the bill by adding the following:

Provided, however, That no notes shall be issued as aforesaid, so long as there shall remain in the Treasury available funds applicable to the prompt payment of said debts, after reserving one million of dollars.

This followed the course of those previously offered, being negatived by yeas and nays—Yeas 102, nays 120, as follows:

YEAS—Messrs. Adams, Alexander, H. Allen, John W. Allen, Ayerigg, Bell, Biddle, Bond, Bouldin, Briggs, W. B. Calhoun, J. Calhoun, J. Campbell, W. B. Carter, Chambers, Cheatham, Childs, Clowney, Corwin, Cranston, Crockett, Curtis, Cushing, Darlington, Dawson, Davies, Deberry, Dennis, Dunn, Everett, Ewing, R. Fletcher, Fillmore, J. Garland, Goode, J. Graham, W. Graham, Graves, Grennell, Griffin, Halsted, Harlan, Harper, Hastings, Hawes, Henry, Herod, Hoffman, Hopkins, H. Johnson, W. C. Johnson, Lawler, Lincoln, A. W. Loomis, Lyon, Mallory, Marvin, S. Mason, Maury, Maxwell, McKennan, Menefee, Mercer, Milligan, C. Morris, Naylor, Ogle, Patterson, Peck, Phillips, Pickens, Pope, Potts, Rariden, Reed, Rencher, Ridgway, Robertson, Rumsey, Russell, Sawyer, Sergeant, A. H. Shepperd, C. Shepard, Sibley, Slade, Southgate, Stanly, Stone, Stratton, Taliaferro, Thompson, Underwood, A. S. White, J. White, E. Whittlesey, L. Williams, S. Williams, J. L. Williams, C. H. Williams, Wise, Yorke—102.

NAYS—Messrs. Anderson, Andrews, Atherton, Beatty, Beirne, Bicknell, Birdsall, Boon, Borden, Brodhead, Bronson, Bruyn, Buchanan, Bynum, Cambreleng, Casey, Chaney, Chapman, Cilley, Claiborne, Clark, Cleveland, Coles, Connor, Craig, Crary, Cushman, Davee, DeGraff, Dromgoole, Duncan, Edwards, Farrington, Fairfield, I. Fletcher, Foster, Fry, Gallup, Gholson, Glascock, Grantland, Grant, Gray, Haley, Hammond, Harrison, Hawkins, Haynes, Holsey, Holt, Howard, Hubley, W. H. Hunter, Ingham, T. B. Jackson, J. Jackson, J. Johnson, N. Jones, J. W. Jones, Kemble, Kilgore, Klingensmith, Legare, Leadbetter, Lewis, Logan, A. Loomis, J. M. Mason, Martin, McKay, R. McClellan, A. McClellan, McClure, McKim, Miller, Montgomery, Moore, Morgan, S. W. Morris, Muhlenberg, Murray, Noble, Noyes, Owens, Palmer, Parker, Parmenter, Paynter, Pennybacker, Petrikim, Phelps, Plumer, Potter, Pratt, Prentiss, Reily, Rhett, Richardson, Rives, Sheffer, Sheplor, Smith, Snyder, Spencer, Stewart, Taylor, Thomas, Titus, Toucey, Towns, Turney, Vail, Vanderveer, Wagener, Webster, Weeks, T. T. Whittlesey, J. W. Williams, Worthington, Yell—120.

Mr. SOUTHGATE moved to amend the bill so as to make the lowest denomination of Treasury notes fifty dollars, instead of one hundred.

Mr. LEGARE hoped the gentleman would consent to modify his amendment by inserting \$25 instead of \$50. He stated a case of hardship which had occurred in Alabama, in support of the suggestion.

Mr. JONES, of Virginia, protested against the amendment, and demanded the yeas and nays.

Mr. WISE said that if we were to have a Government

Oct. 9, 1837.]

Treasury Notes.

[H. OF R.]

paper currency, he was for bringing down the denominations of the notes not only to \$50, but at once to \$5 and to \$1. Let the laborer have the benefit, if there was any, as well as the capitalist and the aristocrat; he hoped the democrats of the "democracy of numbers" would unite with him in giving the advantage of this new money to the "bone and sinew" of the country.

Mr. CAMBRELENG objected to making the denomination less than \$100. He protested against making the credit of the Government a currency.

Mr. WHITTLESEY adverted to the law which enabled a poor man to enter a tract of forty acres of land; the price of which was just \$50. He urged the hardship of depriving such a settler of the benefit of paying for his land in Government currency, and compelling him to pay down the gold and silver under the specie circular, while the wealthy speculator could pay in Treasury notes. If the gentleman from New York would come to the West and advance such a doctrine, he would soon have such convincing arguments applied to him as would quickly work a change of opinion in him on this point.

Mr. SOUTHGATE modified his amendment so as to insert \$25, instead of \$100, as the lowest amount of any Treasury note.

This amendment was rejected by yeas and nays: Yeas 88, nays 130, as follows:

YEAS—Messrs. Beirne, Bond, Boon, Briggs, Bynum, J. Calhoun, John Campbell, William B. Carter, Casey, Chambers, Chapman, Cheatham, Childs, Clark, Corwin, Craig, Crockett, Deberry, Dennis, Dunn, Elmore, Ewing, Isaac Fletcher, J. Garland, R. Garland, Gholson, Glascock, Goode, James Graham, Wm. Graham, Grantland, Graves, Halsted, Harper, Hawkins, Henry, Herod, R. M. T. Hunter, H. Johnson, J. Johnson, W. C. Johnson, Lawler, Legare, Lewis, Lincoln, A. W. Loomis, Lyon, Mallory, Martin, May, McKim, McKennan, Menefee, Montgomery, C. Morris, Murray, Ogle, Patterson, Peck, Pickens, Rencher, Rhett, Richardson, Ridgway, Rives, Robertson, Rumsey, Russell, A. H. Shepperd, C. Shepard, Shields, Sibley, Smith, Snyder, Southgate, Spencer, Stanly, Stone, Taliaferro, Underwood, A. S. White, John White, Elisha Whittlesey, Lewis Williams, Sherrod Williams, Joseph L. Williams, Wise, Yell—88.

NAYS—Messrs. Adams, Alexander, Heman Allen, J. W. Allen, Anderson, Andrews, Atherton, Ayerigg, Beatty, Bicknell, Biddle, Birdsall, Borden, Brodhead, Bronson, Buchanan, W. B. Calhoun, Cambreleng, Chaney, Cilley, Cleveland, Coles, Connor, Crary, Cranston, Curtis, Cushing, Cushman, Darlington, Dawson, Davee, Davies, DeGraff, Dromgoole, Duncan, Edwards, Everett, Farrington, Fairfield, R. Fletcher, Fillmore, Foster, Fry, Gallup, Grant, Gray, Haley, Hammond, Harrison, Hastings, Hawes, Haynes, Hoffman, Holsey, Holt, Hopkins, Howard, Hubley, W. H. Hunter, Ingham, T. B. Jackson, J. Jackson, N. Jones, John W. Jones, Kemble, Kilgore, Klingensmith, Leadbetter, Logan, A. Loomis, Marvin, J. M. Mason, S. Mason, Maury, Maxwell, McKay, R. McClellan, A. McClellan, McClure, Mercer, Milligan, Miller, Moore, Morgan, S. W. Morris, Muhlenberg, Naylor, Noble, Noyes, Owens, Palmer, Parker, Parmenter, Paynter, Pennybacker, Petrikin, Phelps, Phillips, Plumer, Potts, Potter, Pratt, Prentiss, Rariden, Randolph, Reed, Reily, Sawyer, Sergeant, Sheffer, Sheplor, Slade, Stewart, Stratton, Taylor, Thomas, Thompson, Titus, Toucey, Towns, Turney, Vail, Vanderveer, Wagener, Webster, Weeks, T. T. Whittlesey, J. W. Williams, C. H. Williams, Worthington, and Yorke—131.

Mr. SOUTHGATE then moved to insert \$50, in place of \$100, as the lowest amount.

The yeas and nays being taken upon this motion of Mr. S. stood as follows: Yeas 140, nays 81, viz:

YEAS—Messrs. Alexander, J. W. Allen, Anderson,

Andrews, Beirne, Bond, Boon, Bouldin, Briggs, Bronson, Bruyn, Bynum, John Calhoun, J. Campbell, W. B. Carter, Casey, Chambers, Chaney, Chapman, Cheatham, Childs, Claiborne, Clark, Cleveland, Clowney, Connor, Corwin, Craig, Crary, Crockett, Cushman, Davee, Deberry, DeGraff, Dennis, Dunn, Edwards, Elmore, Ewing, Fairfield, Isaac Fletcher, Fillmore, James Garland, Rice Garland, Gholson, Glascock, Goode, Jas. Graham, William Graham, Grantland, Grant, Graves, Gray, Grennell, Griffin, Haley, Halsted, Hammond, Harlan, Harrison, Harper, Hastings, Hawkins, Haynes, Henry, Herod, Hoffman, Holt, R. M. T. Hunter, Ingham, Jabez Jackson, Henry Johnson, Joseph Johnson, William C. Johnson, Kilgore, Lawler, Legare, Leadbetter, Lewis, Lincoln, A. W. Loomis, Lyon, Mallory, Marvin, S. Mason, Martin, Abra. McClellan, McKim, McKennan, Menefee, Miller, Montgomery, Morgan, C. Morris, Muhlenberg, Murray, Noyes, Ogle, Palmer, Parmenter, Patterson, Pickens, Pope, Potter, Pratt, Rariden, Reily, Rencher, Rhett, Richardson, Ridgway, Rives, Robertson, Rumsey, Russell, A. H. Shepperd, C. Shepard, Shields, Sheplor, Sibley, Slade, Smith, Southgate, Spencer, Stanly, Stone, Taliaferro, Titus, Towns, Underwood, Vail, Webster, A. S. White, John White, E. Whittlesey, L. Williams, S. Williams, Joseph L. Williams, Wise, Yell—140.

NAYS—Messrs. Adams, Heman Allen, Atherton, Ayerigg, Beatty, Bicknell, Biddle, Birdsall, Borden, Brodhead, Buchanan, W. B. Calhoun, Cambreleng, Cilley, Coles, Cranston, Curtis, Darlington, Dawson, Davies, Dromgoole, Duncan, Everett, Farrington, R. Fletcher, Foster, Fry, Gallup, Hawes, Holsey, Hopkins, Howard, Hubley, W. H. Hunter, Thomas B. Jackson, N. Jones, John W. Jones, Kemble, Klingensmith, Logan, A. Loomis, James M. Mason, Maury, Maxwell, McKay, R. McClellan, McClure, Mercer, Milligan, Moore, S. W. Morris, Naylor, Noble, Owens, Parker, Paynter, Pearce, Pennybacker, Petrikin, Phelps, Phillips, Plumer, Potts, Prentiss, Reed, Sawyer, Sergeant, Sheffer, Stewart, Stratton, Taylor, Thomas, Toucey, Turney, Vanderveer, Wagener, Weeks, Jared W. Williams, Christopher H. Williams, Worthington, Yorke—81.

So the amendment was agreed to.

Mr. MERCER moved to amend the amendment by striking out the word "ten," before "millions," and inserting "seven;" so as to make the issue of Treasury notes seven millions.

The motion was negatived by yeas and nays: Yeas 101, nays 120, as follows:

YEAS—Messrs. Adams, Alexander, Heman Allen, John W. Allen, Ayerigg, Bell, Biddle, Bond, Bouldin, Briggs, Wm. B. Calhoun, John Calhoun, Wm. B. Carter, Chambers, Cheatham, Childs, Corwin, Cranston, Crockett, Curtis, Cushing, Darlington, Dawson, Davies, Deberry, Dennis, Dunn, Elmore, Everett, Ewing, Fillmore, Richard Fletcher, Goode, James Graham, Wm. Whittlesey, Lewis Williams, Sherrod Williams, Joseph L. Williams, Wise, and Yell—99.

NAYS—Messrs. Adams, Alexander, Heman Allen, Anderson, Andrews, Atherton, Ayerigg, Beatty, Beirne, Bell, Bicknell, Biddle, Birdsall, Bond, Borden, Briggs, Brodhead, Bronson, Buchanan, Bynum, Wm. B. Calhoun, John Calhoun, Cambreleng, Casey, Chambers, Cheatham, Clark, Coles, Corwin, Cranston, Cushman, Darlington, Davies, Deberry, DeGraff, Dromgoole, Edwards, Everett, Farrington, Fairfield, Fillmore, Foster, Fry, Gallup, Grantland, Grant, Graves, Gray, Haley, Halsted, Harrison, Henry, Holsey, Holt, Hopkins, Howard, Wm. H. Hunter, Robert M. T. Hunter, Thomas B. Jackson, Jabez Jackson, John W. Jones, Kemble, Kilgore, Klingensmith, Lincoln, Logan, A. W. Loomis, Mallory, Marvin, James M. Mason, Samson Mason, Maury, Maxwell, McKay, Robert McClellan, Abraham McClellan, McClure, McKim, McKennan, Menefee, Mercer, Milligan, Miller, Moore, Morgan, Samuel W. Morris, Murray, Naylor, Noyes, Owens, Palmer, Parker, Parmenter, Paynter, Pearce, Pennybacker, Plumer, Potts, Potter, Pratt, Prentiss, Rariden, Reed, Reily, Rencher, Rumsey, Russell, Sergeant, Shields, Slade, Snyder, Southgate, Spencer, Stanly, Stratton, Taliaferro, Taylor, Thomas, Titus, Toucey, Vail, Vanderveer, Albert S. White, Jared W. Williams, C. H. Williams, Worthington, and Yorke—127.

Mr. RHETT offered an amendment combining one formerly offered by him, and rejected with another on which the House had not passed; but it was pronounced out of order.

Mr. R. thereupon moved to recommit the bill to the Committee of Ways and Means, with instructions to report a bill in conformity with the amendments he had proposed; but the motion was rejected without a count.

The question then recurring on agreeing with the Committee of the Whole on the state of the Union in the whole amendments to the bill as amended, (being a substitution of the House bill, as amended by Mr. Southgate's motion, for the Senate's bill,) it was decided by yeas and nays, as follows: Yeas 123, nays 99.

The question being then on ordering the bill to a third reading, it was decided by yeas and nays, as follows:

YEAS—Messrs. Anderson, Andrews, Atherton, Beatty, Beirne, Bicknell, Birdsall, Boon, Borden, Bouldin, Brodhead, Bronson, Bruyn, Buchanan, Bynum, John Calhoun, Cambreleng, John Campbell, Timothy J. Carter, Chaney, Chapman, Cilley, Claiborne, Clark, Cleveland, Coles, Connor, Craig, Crary, Cushman, Davee, De Graff, Dromgoole, Duncan, Edwards, Farrington, Fairfield, Foster, James Garland, Rice Garland, Gholson, Glascock, Grantland, Grant, Gray, Haley, Hammond, Harrison, Hawes, Hawkins, Haynes, Holsey, Holt, Howard, Hubley, William H. Hunter, Ingham, Thomas B. Jackson, Jabez Jackson, Henry Johnson, Joseph Johnson, Nathaniel Jones, John W. Jones, Kemble, Kilgore, Klingensmith, Lawler, Legare, Leadbetter, Logan, A. Loomis, Lyon, J. M. Mason, Martin, Maxwell, McKay, Robert McClellan, Abraham McClellan, McClure, McKim, Miller, Montgomery, Moore, S. W. Morris, Muhlenberg, Murray, Noble, Noyes, Owens, Palmer, Parker, Parmenter, Paynter, Pennybacker, Petrikin, Phelps, Plummer, Pope, Potter, Pratt, Prentiss, Rariden, Reily, Rhett, Richardson, Rives, Sheffer, Sheplor, Smith, Spencer, Stewart, Taylor, Thomas, Titus, Toucey, Towns, Turney, Vail, Vanderveer, Wagener, Webster, Weeks, T. T. Whittlesey, Jared W. Williams, Worthington, Yell—127.

NAYS—Messrs. Adams, Alexander, Heman Allen, J. W. Allen, Ayerigg, Bell, Biddle, Bond, Briggs, W. B. Calhoun, William B. Carter, Casey, Chambers, Cheatham, Childs, Corwin, Cranston, Crockett, Curtis, Cushing, Darlington, Dawson, Davies, Deberry, Dennis, Dunn, Elmore, Everett, Ewing, R. Fletcher, Fillmore, Fry, Goode, James Graham, W. Graham, Graves, Grennell, Griffin, Halsted, Harlan, Harper, Hastings, Henry, Herod, Hoffman, R. M. T. Hunter, Jenifer, W. C. Johnson, Lewis, Lincoln, A. W. Loomis, Mallory, Marvin, S. Mason, Maury, McKennan, Menefee, Mercer, Milligan, M. Morris, C. Morris, Naylor, Ogle, Patterson, Pearce, Peck, Phillips, Potts, Reed, Rencher, Ridgway, Robertson, Rumsey, Russell, Sawyer, Sergeant, A. H. Shepperd, C. Shepard, Shields, Sibley, Slade, Snyder, Southgate, Stanly, Stone, Stratton, Taliaferro, Thompson, Underwood, Albert S. White, J. White, E. Whittlesey, L. Williams, S. Williams, J. L. Williams, C. H. Williams, Wise, Yorke—98.

So the bill was ordered to a third reading.

The bill was thereupon read a third time and passed.

The House adjourned at half past 8 o'clock.

TUESDAY, OCT. 10.

MEXICO, TEXAS, &c.

After the presentation of sundry petitions (including several from Alabama) for the establishment of a national bank,

The House proceeded to the unfinished business of yesterday morning, which was the consideration of the resolution of Mr. ELMORE, of South Carolina, to print ten thousand extra copies of certain documents lately communicated to the House by the President of the United States, relating to negotiations with Mexico concerning a cession of territory, together with the amendment proposed by Mr.

OCT. 10, 1837.]

United States, Mexico, and Texas.

[H. OF R.]

ADAMS, which was to strike out the particularization, and leave the order general, so as to include the whole series of papers concerning our relations with Mexico.

Mr. WHITTLESEY inquired whether it would be in order to divide the question, so as to exclude the reprinting of what had been before printed?

After explanations by Mr. ADAMS and Mr. ELMORE, Mr. W. perceiving that he had misapprehended the effect of the proposition, withdrew his proposition for a division.

Mr. ELMORE said, that from the remarks of the gentleman from Ohio, [Mr. WHITTLESEY,] as well as those made yesterday by the gentleman from Massachusetts, he perceived that an impression had been made that the portion of the correspondence of which he desired an extra number to be printed had been selected by himself. Such was not the fact. The selections were made in the office of the Secretary of State, and all he asked was, that they should be printed precisely as they had been sent to the House. The House had received, and had ordered to be printed, two distinct sets of documents—one contained the correspondence of this Government with the minister of Texas, touching the annexation of Texas to this Union: 10,000 copies of this are ordered to be printed. The other was the correspondence of this Government with that of Mexico, touching the boundary line between Mexico and the United States; and also touching the purchase of Texas, then a part of the Mexican territory. Now Mr. E. did not desire the printing of an additional number of that portion of the correspondence which related to the true boundary line, fixed by treaty with Spain in 1819, and the treaties both in relation to running that line, and also respecting commerce between the two countries; which subjects were kept entirely distinct, both parties agreeing to consider them separately, and make them the subject of distinct negotiations. These constituted nine-tenths of the whole mass of documents, and had nothing whatever to do with the annexation of Texas to the Union. He had wished to exclude this portion of the correspondence from his motion, from no motive connected with the gentleman from Massachusetts, but because its reprint would be a useless expense, would make the document massive and less fit for circulation, and would occasion delay in the printing. If it was true that the South, the North, and the West were to look upon the Texian question as one which, in fact, and as declared by the gentleman from Massachusetts, involved the continuance of this Union, he was desirous that they should be furnished with all the necessary information in relation to the subject contained in the papers he had indicated in his motion, and that as speedily as practicable. If the gentleman from Massachusetts, however, thought the printing of the whole important, Mr. E. had no earthly objections to it, except those he had expressed from the first; but he would readily yield even those objections to the desire expressed by gentlemen to print the whole. He would only repeat, that all which bore on the question of annexation was contained in papers named in the resolution.

The gentleman from Massachusetts had said something of a part of the correspondence being suppressed. He (Mr. E.) can only say that the suppression has been made elsewhere, if the gentleman is right. And if the gentleman from Massachusetts desires or expects to have the suppressed portions spread before the public, he must get them into the possession of the House by another call, before this House can have them printed. An order to print what we have not is a nullity.

Mr. ADAMS said that the observations of the gentleman from South Carolina had not removed his objections to the printing of garbled extracts from the documents referred to. The gentleman said he had not himself made these selections; but as Mr. A. understood the matter, the gentleman, in his motion to print, excluded just so much of

the entire correspondence as suited his own purpose. Of these extracts he desired to send out to the country ten thousand extra copies, and to exclude the residue. The gentleman would have nothing published which related to the question of boundary, because this had nothing to do with the question of the annexation of Texas. But it had to do with it—much to do with it; so much, that the proposition for the purchase never could have been properly made to the Government of Mexico, had there been no open question of boundary between the two Governments. It was that very question which gave rise to the question of annexation, and which alone could authorize it. The question of boundary ran through all our intercourse with the Government of Mexico, from the moment in which it was first agitated until this day. It entered into our treaties with that Government. We were bound by treaty to appoint commissioners to run the line, (said Mr. A.) but we have not done it. Bills, indeed, had been introduced into Congress for that purpose, and had gone to their second reading, but there had arisen this agitation about the annexation of Texas, and the boundary after that could never be settled. This fact showed the close connexion between the correspondence touching our treaties about boundary, and that of the question of annexation.

One of the matters of reproach against us, on the part of the Mexican Government, was our violation of faith in regard to the boundary question. And why had we not complied with our solemn engagement to appoint commissioners to run the boundary line? What prevented? Nothing but that spirit which had taken possession of a certain portion of our population, that sudden and violent impulse, which drove them on to get possession of the whole territory, at any expense, *per fas aut nefas*, by treaty, by invasion, by any thing that would effect the purpose. [The SPEAKER here interposed, and reminded Mr. A. that his remarks were taking too wide a range. The question was simply on the printing.] Mr. ADAMS said that the gentleman from South Carolina [Mr. ELMORE] had taken a similar range in his remarks. [The CHAIR said that the remarks of the gentleman from South Carolina had had reference to the printing. There would be no end to the debate, if it were once suffered to extend to the merits of the Texian question and our relations with Mexico.] What, (said Mr. ADAMS,) am I not, then, to be permitted to show that the argument of the gentleman from South Carolina totally fails him? [The gentleman from Massachusetts (said the SPEAKER) cannot now discuss the propriety or impropriety of fixing the boundary between Mexico and the United States, or of the annexation of Texas.] Well, (continued Mr. ADAMS,) I say, then, that the gentleman is totally mistaken in supposing that the correspondence touching the boundary has nothing to do with that of annexation. It has just as much to do with it as the other portion of the correspondence. I hope, if there is to be any extra printing in the case at all, we shall print the whole. I care not how many copies you order. I am willing that a hundred thousand should be printed, or as many more as the gentleman desires; but let justice be done to all sides, by printing the whole.

The gentleman suggests a further call. I propose, sir, to make a further call. The call, thus far, has been imperfectly answered. I do propose a further call; for, as far as I know, the most important part of the correspondence may have been withheld—suppressed. The gentleman from South Carolina has the advantage of me; I have not seen these returns. The moment they came into the House, they were laid on the table, and immediately hurried off to the printers. I have not been to the printer's office to ransack them, and to see what portion will suit me. He states the contents of these documents. I certainly have entire confidence in any statement that gentleman may make; but still I had rather have the advantage

H. of R.]

United States, Mexico, and Texas.

[Oct. 10, 1837.]

of looking at the papers for myself, and forming my own judgment, especially when he has an interested object in making his statement. I trust the amendment will be adopted, and that we shall get the whole correspondence, and not partial extracts.

Mr. OWENS said it was very evident that the object of the gentleman from South Carolina was not to garble the correspondence, or to suppress any thing which had relation to the annexation of Texas to the Union. All he wished was to separate this from the voluminous matter in which it lay. To obviate all objections, he would propose to the gentleman to modify his call, by adding words to this effect: "Together with any other matter relating to the annexation of Texas which may be embraced in this correspondence."

Mr. ELMORE accepted this addition as a modification of his original motion.

Mr. HOWARD (chairman of the Committee on Foreign Relations) said that he should not have partaken in this debate, but with a view to the correction of an error, no doubt unintentional, on the part of the gentleman from Massachusetts, [Mr. ADAMS,] as every thing which fell from that gentleman, on the subject especially of foreign affairs, was of consequence. Mr. H. begged that gentleman to reflect, and see whether he had not forgotten a provision of law, when he asserted that no steps had been taken on the part of the United States towards running the Mexican boundary line. [Mr. ADAMS disclaimed having said that no steps had been taken.] Mr. H. said he only desired to state that commissioners had been appointed according to treaty, and that, if the line had not been run, the fault lay with Mexico, and not with this Government. As to the printing, he was a good deal at a loss; for he had not read the documents, and did not therefore know whether they embraced all that was desirable or not; or what it was that the gentleman from South Carolina desired to exclude. He was completely in the dark on that matter; but, being compelled to vote, he should, on the whole, rather vote to print the whole correspondence, as requested by the gentleman from Massachusetts.

He would, however, observe that this motion of the gentleman from South Carolina was not, in his opinion, calculated to subserve the interests of the cause to which that gentleman was attached. The object was stated to be to spread useful information before the people of the United States, in order that they might form their opinion on the Texian question, more especially within the next two months, previous to coming up at the regular session of Congress. The proposed publication was, in fact, intended as a virtual appeal to the people of the United States from the decision of the President. In that view he was not disposed to oppose it, though he thought the question was to be pressed prematurely—for he was satisfied there could be but one result from such an appeal, and that result would be of a character inauspicious to the gentleman's wishes. This House (said Mr. H.) is divided into three parts upon the Texian question. [Here the CHAIRMAN again interposed, the debate transcending the limit of the mere question of printing.] Mr. H. said that all those who were friends to the annexation of Texas should consider well before they carried the appeal now contemplated to the people. They should consider whether they would not, as he believed they would, thereby place the administration on impregnable ground. So viewing the matter himself, he thought this appeal to the people injudicious on the part of the mover, nor would it result in the way gentlemen hoped and expected. Mr. H. said he had made up as yet no definite opinion on the Texian question. Neither, he believed, had this House or the nation; and he should be sorry if the question should be presented prematurely to the people. As to the printing, however, he

should not oppose it: he would vote for the printing of a hundred thousand copies if gentlemen desired it.

Mr. BIDDLE said he had heard nothing to warrant a departure in this case from the obvious rules of justice and good faith. It would seem as if the object were to enable gentlemen to print and circulate, at the public expense, certain extracts from public documents to form an *argumentum ad hominem* against the gentleman from Massachusetts; at least with a view to shake his influence with the country on this question, by alleging that on some former occasion he may have adverted to the possibility of annexing Texas to this country.

Mr. B. was far from believing that the honorable gentleman from South Carolina had in view to misrepresent or to create a false impression. But he would not trust the opinion of any one whose feelings were plainly enlisted, to say, in presenting what favored his own views, that there remained nothing behind to explain or to qualify. It was impossible for any one safely to make such a general avowment. You must see the whole letter—its full scope and drift, in order to ascertain the circumstances under which it was written, and the purpose it had in view, perhaps to operate on the hopes and fears of a foreign Power. A very striking illustration of the facility with which a passage thus introduced for a special purpose may be taken from the context, and convey an impression the reverse of what was intended, may be found in the letter just laid on our tables from Mr. Hunt, the Texian minister, to Mr. Forsyth. I allude to the passage in which he hints broadly at the sympathy with which the "crowned heads" of England and France regarded the Texian revolution.

[The SPEAKER here interposed to say it was out of order, at this time, to discuss the merits of the question. Mr. B. said he had no such purpose. His object was merely to illustrate, by reference to a particular case, how easy it was, by taking up a particular passage, and viewing it apart from the context, to reverse the real purpose of the writer. The SPEAKER persisted in the call to order.]

Mr. B. contended that the matter was of no great moment, as it only enforced what must be admitted to be true. Every one brought from the courts an invincible repugnance to this taking up of detached passages, and it equally violated the popular sense of justice.

Mr. B. said it had been remarked that if the gentleman from Massachusetts felt aggrieved, he might hereafter move to print the entire documents. In other words, the accused was to be subjected to the very inconvenience from which the accuser sought to escape. What is the avowed object of circulating these papers in the proposed form? That they may be portable and pass rapidly over the country. They may be made the subjects of pungent newspaper paragraphs, and of placards which he who runs may read. And the accused is to come halting behind with a book to ask a patient hearing from those whose minds are preoccupied, and who have no relish for tedious explanations. It might as well be said that there was no harm in casting poison into a spring by the wayside, because there are tests in the chemist's shops by which its presence may be detected. There were so many modes in which partial, one-sided views of a subject could be circulated, that he was anxious, in the deliberate action of the House, to see even the forms of justice held in reverence.

Mr. PICKENS said he could not refuse his admiration to the generous sympathy manifested by the gentleman from Pennsylvania who had just taken his seat [Mr. BIDDLE] for his distinguished friend from Massachusetts, [Mr. ADAMS.] We were told from high authority that "charity covereth a multitude of sins;" but if the gentleman relied on this to cover all the inconsistencies, real or supposed, of the honorable gentleman from Massachusetts ** [Here the SPEAKER interposed.] Mr. PICKENS then said, his friend from South Carolina had not made these "ex-

Oct. 10, 1837.]

Express Mail Postage.

[H. OF R.]

tracts," he had taken them in the shape in which they came to the House from the State Department. He had made no interpolations or curtailments: all he wanted was that the information sought should go extensively into the possession of the American public. He had accepted the modification proposed by the gentleman from Georgia, [Mr. OWENS,] and thus met any reasonable objection which could be urged by the gentleman from Massachusetts. If there was any one question in regard to which the public were deeply interested, it was this. The argument of the gentleman from Pennsylvania was out of place. His colleague had no mean, narrow, miserable design of making an issue *ad hominem* before the public. No: he had higher, nobler objects in view. His call looked to those great and weighty questions which were agitating the whole country, and which must ultimately come before the House for decision. Was it wrong to desire that the people should be fully informed in regard to them? and that the deep sentiment entertained by freemen on such a subject should come back in all its power, and act on their representatives on that floor? These were the objects of his colleague; and it appeared to him that, in its amended form, there ought not to be the slightest objection to this resolution.

Mr. ADAMS said, the gentleman from South Carolina thinks the amendment moved by the gentleman from Georgia [Mr. OWENS] is identical with mine, and proposes to me to accept it. This circumstance furnishes such an example of the discriminative powers of the gentleman from South Carolina, that it is an additional warning to me to adhere to my own amendment. He imputes to me the amendment of the gentleman from Georgia. I must disclaim it.

Mr. SLADE said he was unable to discover any adequate, or at least any justifiable motive on the part of the gentleman from South Carolina in desiring to discriminate in this motion to print a particular part of this correspondence from the residue. The answer of the President corresponded to the call of the House. The House had already ordered the printing of 10,000 copies of the communication. What good motive could there now be in reprinting only a part of it? Why did gentlemen, after calling on the Executive for certain information, desire to withhold a part of it from the people? If there was a good reason for the call, why was not the whole answer to be published? Mr. S. was compelled to conclude that there must be some special reason for so extraordinary a course. It was said that the modification suggested by the gentleman from Georgia, and accepted by the mover, included all that related to the Texian question, and what more did gentlemen want? True; but who was to determine what portions of this correspondence did relate to the question? The Clerk of the House? Mr. S. would not trust that selection with him. Was a committee to be appointed to do it? That course would be very unusual. There must be some motive for the pertinacity manifested in this matter which did not meet the eye. It might be personal towards the gentleman from Massachusetts, [Mr. ADAMS;] if so, Mr. S. would stand by him and fight for him to the last. The whole correspondence, for what he could tell, might relate to the annexation question. He knew nothing about it. (This he knew: the whole correspondence, embracing the questions of boundary, of treaty, and of annexation, were all contemporaneous; and he could not tell how they might be interlocked together. He asked gentlemen to consider how the honorable gentleman from Massachusetts stood in relation to this matter; and to gratify his wishes by giving a view of the whole case. Were gentlemen desirous of sending to the people two distinct versions of the subject? Was this to be done for the pitiful saving of the money it would cost to print a few more pages? Was one of Mr. S's neighbors to get the whole correspondence, and

another to get only a part? If there was a good reason for printing the first 10,000 copies, there was equal reason for printing the second.

Mr. BRIGGS reminded the House that the gentleman from South Carolina [Mr. ELMORE] had said that he had no objection to the adoption of Mr. ADAMS's amendment; and, if so, why all this waste of discussion? He hoped the gentleman would accept it as a modification.

Mr. ELMORE accepted the amendment.

Mr. THOMPSON said he had risen to ask his colleague to accept the amendment of the gentleman from Massachusetts, and print all the papers. He had not read them himself. There was no man in whose judgment or fairness he would more confide to make the selection than his friend and colleague. But it was enough for him that the gentleman from Massachusetts, whose consistency and feelings were involved, desired the whole to be published. He would not, under such circumstances, refuse to print any thing which he (Mr. ADAMS) thought necessary to his defence, however voluminous the matter might be. Nay, more, he would not that the slightest suspicion of trick should attach to his colleague, nor any other friend of Texas. No: he would have more respect for the opinion of any one member of Congress, even although that one member should be the gentleman from Vermont, [Mr. SLADE,] and that is surely stating a strong case.

Mr. T. was not a little surprised to hear the gentleman from Maryland object that it was appealing from the President to the people. Mr. T. had seen so many strange things of late, as almost to have attained the *nil admirari*, in politics at least. But it did sound strangely in his ear to hear a leader of the great democratic republican party object to an appeal from the Executive upon a great question to the democracy itself. It was still more strange, coming from a friend of "the illustrious chief," who daily made such appeals from Congress to the people: one good turn deserves another. It was now our turn to appeal from the President to the people.

The question was then taken upon the resolution, and it was agreed to without a division.

EXPRESS MAIL POSTAGE.

The joint resolution from the Senate requiring postages to be paid in advance on all letters sent by the express mail, was read a first and second time.

Mr. ADAMS objected to the form in which the measure came to the House, contending that it ought, regularly, to be the subject of a bill, and not of a joint resolution. It was a matter of legislation, and laws were to be enacted in the form of bills and not of joint resolutions.

Mr. BIDDLE said he would like to hear a satisfactory reason for the passage of this joint resolution. There had been no report on the subject from the Postmaster General, who, on the contrary, had expressly stated, in his report to Congress, that there was no need of any legislation in his Department. There would be a great deal of inconvenience in carrying the resolution into effect; and it would be attended with very vexatious results. It would not be instantly known to be the law, and meantime great embarrassments would arise. And it would familiarize the post officers with the detention of letters and prying into them, in order to ascertain from whom they came. Unless there were good and satisfactory reasons given for the adoption of this resolution, he really hoped it would not be passed.

Mr. BRIGGS answered some of these objections. The letters, if dropped in, not paid, and marked express mail, would of course be forwarded by the common mail. There could be no such detention as had been alluded to. The resolution, if adopted, would save a great many dollars in the payment of letter postage by persons not at all interested in what they pay for. Members of Congress, particularly, suffered by the present state of things. Not many

H. OF R.]

Sub-Treasury Bill.

[Oct. 10, 1837.]

days ago a Senator had told him that his daily postage by express mail was often larger in amount than his *per diem* pay.

Mr. WILLIAMS, of North Carolina, moved to refer the joint resolution to the Committee on the Post Office and Post Roads.

The SPEAKER remarked that, by a rule of the House, all action by any other committees than those of the Judiciary, the Ways and Means, and Elections, had been suspended for the present session.

Mr. CONNOR alluded to some of the troubles at present experienced by the mistake of people as to the extension of the franking privilege to letters by express mail, &c. He thought the revenue arising to the Department would be benefited, rather than impaired, by the adoption of this resolution.

Mr. PHILLIPS hoped the subject would not be acted upon without due investigation. The adoption of the resolution would produce great embarrassment in the business arrangements of mercantile men, as to the opening of postage accounts in certain cases. If there was any necessity for acting on the subject at the present session, he thought it should be referred to the Committee on the Post Office and Post Roads, even if the rule alluded to should be suspended, to permit such a reference. If not, Mr. P. was in favor of laying the resolution on the table.

Mr. WILLIAMS, of North Carolina, modified his motion so as to propose a reference of the bill to a Committee of the Whole.

Mr. CUSHING alluded to yet another practical difficulty in the proposed scheme. It happened frequently that the express mail started at unseasonable hours, when it would be impossible to pay the postage of letters, for the want of clerks' attendance at such hours. The object of the express mail was expedition, and this object would be defeated by the resolution; and the revenue accruing from the express mail would be materially diminished.

Mr. BRIGGS was opposed to the reference to the Committee of the Whole. If referred at all, he hoped the rule would be suspended, and the reference be made to the Committee on the Post Office and Post Roads.

Mr. WILLIAMS's motion to commit it was lost.

Mr. GRENNEILL said the House was legislating without that sort of information on the subject which should be the basis of all legislation. No petition had come up from the people on the subject, nor any communication from the public officers. The House was legislating for itself; the principal argument in favor of the resolution under debate being the imposition of triple postage on letters received occasionally by members of Congress. The express mail had not been long enough established to have fair play, and be fully understood. It had better be tested yet further.

Mr. G. objected to the arguments in support of the resolution. He thought the troubles that would arise from its adoption were more than enough to counterbalance those springing from the present state of things. There was no proper information on the subject, and legislation was not called for in relation to it. Mr. G. moved to postpone the further consideration of the joint resolution until the first Monday in December next.

Mr. CAMBRELENG said that there was not now time to go off upon other subjects than those pertaining to the financial concerns of the country. He therefore demanded the previous question.

This motion was seconded by a vote of 88 to 53, and the main question [on ordering the bill to a third reading] was carried without a division; and the joint resolution being then read a third time, was passed, and returned to the Senate.

Mr. CAMBRELENG now moved for the orders of the day,

THE SUB-TREASURY BILL;

And the House went into Committee of the Whole on the state of the Union, (Mr. SMITH, of Maine, in the chair.)

Mr. PICKENS moved to take up, first, the Senate bill, for imposing additional duties as depositaries, in certain cases, on public officers.

Mr. LEGARE strongly objected to taking up this bill in preference to other bills on the table, as being likely to obstruct and impede the transaction of business which it was necessary for the House at once to act upon.

The House divided upon Mr. PICKENS's motion, which was carried, 100 votes to 80.

The bill was then read through.

Mr. PICKENS rose and said, that notwithstanding he labored under painful indisposition, yet he felt bound to present his views upon the interesting and absorbing questions connected with the bill on the table; but he could assure the committee that he would economize its time as much as possible.

Sir, (said Mr. P.,) we have heard much declamation upon the distresses and embarrassments that pervade large classes of our community, and I confess I have heard these complaints with the deepest and most profound emotions of sympathy. I trust I have felt as an American ought to feel on such an occasion. A stranger, unacquainted with our peculiar form of Government, might be led to believe, on hearing the cries for relief that have come up to us from all quarters of this land, that we had nothing to do but to speak and to proclaim peace, prosperity, and contentment, to an excited and divided community; but, sir, I am induced to believe that that Government is the freest which is the farthest removed from those individual pursuits, and those individual occupations, that belong either to sections or to classes; and that the less we interfere with those concerns, the more contented and the more prosperous will the people be.

I have also been induced to believe that it is one of the peculiar features of the federal constitution, that this Government was formed principally to conduct our foreign intercourse with the nations of the earth, and to prepare us to defend ourselves from foreign invasion, and to resist foreign aggression; and that local interests and local pursuits, whether connected with commerce, manufactures, or agriculture, were almost entirely left to those territorial divisions over which separate and independent Governments hold their sway. I protest against this modern doctrine, which has been introduced so extensively into this country within the last fifteen years, and which teaches classes and sections of this community to look up to the bounties and favors of this Government with more eagerness and anxiety than do the farmers of our land, under a burning noonday sun, look for the coming shower to bless and refresh their parched and withering fields of grain. The consequence of all this is to introduce that servile dependence upon this Government which is utterly at war with the nature of our institutions and the integrity of man. Sir, I feel for the distresses of my country, and I trust I shall ever feel as I ought; but there are constitutional limitations to this Government that forbid the idea of carrying out those sympathies which, though they ever belong perhaps to generous natures, yet, if habitually put into practice, produce as much injustice and pressure, and not unfrequently more, than they ever avoid. Any other doctrine would substitute our poor and frail judgments in place of that interest and instinct which belong to every individual in society, and prompt him to pursue whatever is best and most suitable for his happiness and prosperity. But let the Government attempt with one hand to dispense favor and bounty, and the inevitable consequence is, that the other will be stretched out but to be felt in its pressure and the burden it imposes. Such reckless and miserable policy as this would

OCT. 10, 1837.]

Sub-Treasury Bill.

[H. OF R.]

convert the Government into one great insurance office for all those who chose to engage in the mad and giddy career of speculation and extravagance, instead of waiting the slow but certain rewards of honest industry. Government has no magic power by which to create wealth or to bestow its bounty upon one class or one section, unless at the expense of others.

Mr. Chairman, I am not disposed to trespass upon the attention of this committee, by discussing minutely those abstruse questions connected with currency and trade. I too well understand the sagacity of this committee, and its profound common sense, to detain them long upon those subjects. I know well, sir, that for a man to discourse here upon currency, trade, and commerce, at least if he expects to command the attention of this body, he must have a high character for experience, and be blessed also with a good old age. Yes, if he expects to entertain this House upon those abstruse questions, he must first put on the "powdered wig" and "fair top boots," and place himself on the "tripod," and talk about trade and commerce beyond the waters, and in another hemisphere, thirty or forty years ago. Such a man would be listened to as a sage, particularly if he stepped forth as the advocate of some peculiar theory, or if he ascribed the prevailing embarrassments to some foreign or remote cause, or declared them to be owing to causes beyond our control; to something that operated deeply upon the community, which they could neither foresee nor avert! If one were to proclaim the doctrine that our suffering and ruin have sprung from over-speculation, over-trading, or extravagance, or a combination of them all; or if he were to say that many a man had been brought to bankruptcy and poverty by dashing forth in a coach and four, with splendid damask curtains, Brussels carpets, and broad mirrors, upon a capital in reality of but three hundred dollars, with a credit of thirty thousand dollars, he would advance such sentiments but to call down upon his head the denunciations of the wise in this enlightened age for his folly and his madness! But while I am not disposed minutely to touch these intricate points, I cannot altogether overlook them without a passing notice.

The immediate causes, sir, of our distress arise from that peculiar system of credit and currency which has, for the last five years, been enlarged so extensively both in England and in this country. In England, during the year 1836 alone, no less than two hundred joint-stock banks were created; the influence of which was deeply felt, first in that country, and then in this. Vast facilities were extended to our capitalists, while, also, they received an extension of the credit system here, connected with a peculiar juncture in our affairs during the same period. The Bank of the United States was about to wind up, or was supposed to be about to wind up, its concerns. For twenty years had that institution held a control over the currency and exchanges of the country, and hundreds, I might almost say thousands, of other institutions were created in order to supply the demand in the circulating medium which, it was supposed, would ensue upon the decease of that bank. We all know, too, (I refer to those things as matters of history,) that a war at that time was carried on against that institution; and that, for the purpose of creating counter interests in society, the deposits of this Government were placed in local institutions; and that these latter, after being made the fiscal agents of this Government, with an immense surplus, were expressly encouraged, nay more, enjoined, to enlarge their circulation. This, connected with the extended credit system in Great Britain, and the long peace which had engendered confidence, producing large investments of foreign capital in our stocks, had the effect of expanding our local currency and credits, and produced a gigantic system of speculation and enterprise never witnessed in any age or country before. I do not allude to the increased amount of mere issues alone;

but the bills, checks, and other substitutes for money which these banks brought into circulation. This produced a bloated system of credit, which, with the apparent prosperity of the times, seemed to expand and place unbounded means within the grasp of almost every individual member of society. He seemed to breathe a new atmosphere, and gaze alone upon the splendid fortune that glittered before his excited imagination.

This system has one remarkably peculiar feature: It grows up, is fostered and nourished under free institutions. But there is another remarkable principle in it, that, after it has spread itself into all the ramifications of society, then, sir, those who depend upon it, and are deeply identified with it, (although at first springing up under free institutions,) soon become disposed to lean, for aid and support, upon any Government, no matter how despotic, rather than run the risk of a shock by reform or revolution.

The slightest irregular movement of the Government must necessarily produce an electric shock in this delicate and vital credit system, which would be felt, and extend from the centre to the circumference of all society. It can only live under a free Government, as far removed from it as possible; and, if it be once brought into contact with a lawless Government, it must either fall all together, or lean upon that Government for protection and support, and become intimately identified with it. Now, I am about to refer to something which belongs to the history of this question, and which has happened within the last four or five years. To my mind, it is an example not to be disregarded, but presents a lesson of profound wisdom, which no one can reflect upon without profit. The war made upon the Bank of the United States, and the seizure of the public deposits—a seizure without law—caused local institutions to spring up like mushrooms, under the fostering care of an all-powerful hand here, dispensing distinction and patronage and wealth, until all society became, as it were, dependent upon his will and movements. Let no man be induced to create the same state of things again, when a bold and daring genius may be tempted to run the same career, and bring the property and honest industry of the country under the will and mercy of him who may give life and soul to this Federal Government.

This conflict produced a tremendous shock, and even the banking system itself, the local institutions, created for the express purpose of sustaining the warfare against that overshadowing central institution, have been paralyzed, for a time at least, under its desolating effects. And here I will say, that though I ever believed in the unconstitutionality of that institution, yet those who made war upon it never could have succeeded without raising up powerful local antagonist interests. The effect of that war was felt from one end of the country to the other, and the consequence was, that sagacious capitalists in stocks, ready for any result, began to look elsewhere for safe investments; and hence it was that we find such extensive investments in real estate, to the amount of forty millions of dollars, in two years alone, in the public lands, besides upwards of one hundred millions in other real estate speculations, such as town and village property, &c. This conflict against credit, deeply affecting currency, was anticipated by capitalists, who preferred risking the loss of something in the high prices of real estate, to a probable loss of all. It was at least investing in something beyond total destruction from an arbitrary Government.

Sir, when this change began, and the capitalists began to contract their credit, the banking institutions of the country also felt it incumbent upon them to contract too. And what was the result? Why, the result was exactly what we now experience.

Approaching this juncture, viz. in 1836, the deposit act was passed, to be carried into effect in 1837. I was a supporter of that law, sir, but I understood it at that time,

H. of R.]

Sub-Treasury Bill.

[Oct. 10, 1837.]

as I now understand it to be, in the nature of a bill for general account and settlement with those institutions which had, up to that time, leaned upon, and been sustained by, the credit and fiscal action of this Government. They were therefore compelled by that distribution or deposit act, and particularly in the peculiar manner in which it was executed, to come to a general account. Their paper was necessarily compelled to be "convertible" paper, or they themselves compelled to suspend specie payments. This circumstance, connected with our immense foreign debt, and the demand thereby produced for specie, or its representative, abroad, brought about this result; that is, brought us to the present condition of the country, under a general suspension of specie payments by the banks.

But, Mr. Chairman, I will say here, that the great and radical difficulty, and, in fact, the primary cause, that produced the present state of things, arises from the peculiar currency which, in modern times, has so much extended itself in Great Britain and in this country, and its peculiar capacity for expansion and contraction, in the hands and under the control of banks and bankers; and particularly from the fact, that there, as here, the system has depended upon and been so deeply identified with Government, and its financial action, for support and extensive credit. This is the real and radical cause which has produced this great shock in our modern banking and credit system.

Sir, under this suspension of specie payments the Government is found in a peculiar situation. Under the law of 1816 it can receive, in payment of its dues, nothing but gold and silver, or convertible paper, or notes of the then Bank of the United States; the latter clause became, however, practically repealed when these institutions suspended specie payments, thereby making their paper inconvertible. Then, there was, in fact, under the provisions of the law, an immediate separation of the Government from the banking institutions of the country. Under the law, the Government could not take inconvertible paper, and convertible paper did not exist from one end of the country to the other, with the honorable exception, perhaps, of one or two banks in the State of Georgia, and a single small institution in the State of Ohio. And now, sir, the great question presented to this committee is, not whether you will separate the banks from the Government, because that is already done, but the great question is, whether and how we shall reunite the Government and the banks. Under this view of the case, we have three alternatives presented to us:

The first is, to reunite ourselves, or rather the Government, with the State institutions, in the manner in which they have been connected for the last three or four years.

The second is, the proposition creating a bank of the United States, a national institution to conduct the fiscal operations of this Government, and regulate the exchanges and currency of the country.

The third is, the proposition on your table, sir, to separate the Government and its agents from all banks whatever.

Now, sir, as to the first proposition: if we do not separate the Government from the banks in this peculiar juncture of our affairs, we never can separate them. The system will be fixed upon us forever, and we compelled to run the same round we have done for the last three or four years in periodical terms, and then be in the same, or worse condition—distracted and embarrassed from one end of the country to the other.

Now, Mr. Chairman, I have heard a great deal as to the comparison between the State bank system, as it is called, and the peculiar policy of separating the Government and its agents from all banks whatever. I have heard too much declamation and no little denunciation of that system, that it is the most outrageous proposition ever presented to the American people; that it is, in fact, a Treasury bank.

Yes, sir, I have heard much declamation upon that subject, both here and elsewhere, (better suited to newspaper politics than grave legislation,) but I confess to you that that declamation only reminds me very strongly of the description of a certain grandiloquent class of poets which a profound and polished ancient critic describes as swelling—

*"Inceptis gravibus plerumque et magna professis,
Purpureis, late qui splendeat, unus et alter
Assuitur pannus."*

It is not pretended that this system is perfect, because you cannot present any system to the people that is so. All questions upon which a practical legislator is called to act, involve more or less a comparison of evils, and we must not adopt any measure as perfect, but as embracing the lesser evil. We must go on to perfect details after the establishment of great and vital principles. It is neither pretended, sir, that this bill involves no patronage: it certainly does to a degree. But the question is, whether this system, or that of employing the local banks as fiscal agents of the Government, contains or involves the most patronage? Now, upon that point, permit me here to say that I feel myself committed, from a deep and an anxious reflection upon the question heretofore. The question is between the power and influence of an individual, and the power and influence of an incorporated bank. To tell me that a bank which chooses to go into the politics of the country, with its power to extend discounts and accommodations to its friends, and refuse them to its enemies, has no more influence than an individual, is to tell me what is contradicted by the daily experience of every man; even if that individual have millions of the public money in his possession for safe-keeping. Sir, the one system winds and spreads itself into all the secret and business recesses of society. Hundreds and thousands of honorable and high-minded men have been brought to degradation and sycophancy by this tremendous and almost invisible power. I have seen them around their domestic firesides, with every thing apparently to bless and gladden the heart of man, full of sadness and gloom; while even those who were the confiding and devoted partners of their joys and their sorrows, were in doubt and ignorance as to the causes of melancholy and dejection.

Sir, this system is as hidden as the air we breathe, and penetrates unseen, but, alas! not unfelt, into the most retired scenes of society. No man can tell upon what power he is depending when he looks for support, aid, and assistance from this system. No man can tell what the situation of his neighbor may be—what his obligations—his alliances and contracts, that swerve him from the path of independence and rectitude. Then how can you say that such a system as this, allied to, and dependent upon Government, has less patronage than that which makes an individual responsible for whatever public funds he may have in his custody, without the power of loaning, without the power of discounting, without the power of accommodating a friend, or refusing an enemy, unless he chooses openly to incur the odium and penalty of crime and misdemeanor? It does seem to me that the question admits of no argument so far as the question of patronage is concerned.

But I have said, sir, that I felt myself somewhat committed on this subject. In 1835, a friend of mine from Virginia, (Mr. Gordon,) now not a member of this House, (and I will here take occasion to say of him, that he is a gentleman who would have done honor to Virginia in her proudest days of glory and fame,) presented the very identical proposition to this House which is embraced in the bill on your table. For that proposition, sir, I then voted. I acted from reflection, and from a conscientious conviction of the effects of that measure to bring about honesty in the Government, and secure the independence of the people. True, I was then but a very young man, and

Oct. 10, 1837.]

Sub-Treasury Bill.

[H. of R.]

had but for a few weeks taken my seat in this House; yet, sir, I had made up my opinion from observation and reflection. And although young, yet, to use the language applied to another, I was old enough—

"Acta parentum jam legere, et quæ sit poterit cognoscere virtus."

Sir, I had formed my judgment then, and have not yielded it since. On the contrary, the experience between then and now has only tended to confirm my conviction.

I desire the Clerk to read the proposition and the vote upon it.

"The question recurred on the motion made by Mr. Gordon, to amend the said bill, to strike out all thereof after the enacting words, and insert:

"That, from and after the — day of —, in the year —, the collectors of the public revenue, at places where the sums collected shall not exceed the sum of — dollars per annum, shall be the agents of the Treasurer to keep and disburse the same, and be subject to such rules and regulations, and give such bond and security as he shall prescribe for the faithful execution of their office; and shall receive, in addition to the compensation now allowed by law, — per centum on the sums disbursed; so that it does not exceed the sum of — dollars per annum.

"Sec. 2. *And be it further enacted,* That, at all places where the amount of public revenue collected shall exceed the sum of — dollars per annum, there shall be appointed by the President, by and with the advice and consent of the Senate, receivers of the public revenue, to be agents of the Treasurer, who shall give such bond and security to keep and disburse the public revenue, and be subject to such rules and regulations as the Treasurer shall prescribe, and shall receive for their services — per centum per annum on the sums disbursed: provided it does not exceed the sum of — dollars per annum.

"Sec. 3. *And be it further enacted,* That, from and after the — day of —, the whole revenue of the United States, derived from customs of lands or other sources, shall be paid in the current coins of the United States."

This received 33 votes.

Mr. Chairman, it was not my desire, nor have I caused the vote upon that proposition to be read, to show the consistency or inconsistency of any honorable member of this body. My sole and entire object was to prove that the present bill was no new proposition, and that, as far as I am concerned, it is the very identical proposition upon which I then voted coolly and deliberately. I have no desire, sir, to show that there has been any contradiction on the part of any gentleman on this floor, or that there has been any change in their opinions. It is with neither of those views that I had the proposition read. I will now quote a paragraph from the speech of the mover of the proposition, made at the time, as illustrating the views under which we acted, and which too truly portrays what has really happened since, and what, I fear, we will again see, if the system be continued. Mr. Gordon said:

"There is another consideration which has induced me to offer this amendment. We may all very plainly see that the contest for the Executive office is the rock on which the permanency of this republic is likely to be wrecked. And the vehemence of this contest will ever be in proportion to the Executive patronage. But for this, the office would have no allurements but for virtuous ambition; but with this concomitant, it exerts an influence which may one day prove fatal to the federal part of our system. If we do not separate the influence of the Executive from the interest of banking corporations, we shall have another controversy on the subject of banks. The political will be united with the money power; the contest must come; it will come. You will witness a struggle in this Capitol between State banks and federal banks; and the combatants for the President's chair will be found contending in

different ranks of interest and influence, whilst they mar the peace of the country, and shake the pillars of the constitution. Separate them, I beseech you, representatives of the American people, if you wish to put down this fearful contest for the Presidential chair—I had almost said Presidential throne—separate, I beseech you, banking and politics. Let the banks facilitate the exchanges of commerce, and further the interest of trade; but let them, I pray you, have nothing to do with the Government."

The predictions of my friend have been fulfilled to the letter. What have we seen? You brought into existence a system of State banks, connected from one end of this Confederacy to another, receiving, disbursing, and acting upon those deposits, organized and controlled by, and responsible to one man, and then brought into overwhelming conflict, as I believe, with the freedom of elections. Sir, I speak plainly. I believed then, and I now believe, that this was the true source of power for the last three years. Gentlemen may speak as they please; they may deny, and say they have never seen or felt it; but who is it that knows any thing of the operations of banks—who is it, at all acquainted with their peculiar influence, who is not irresistibly impressed with their tremendous power? Sir, I believe they did more than any thing else to elect the present President of the United States; and am I now to be called upon, and urged to re-organize such a system, and abandon the position I then assumed? The experience of the last three years strengthens my position. It may be denied, but I conscientiously believe that these institutions have controlled, more or less, not only the destinies of this Government, but the destinies of the people of this country during that period. Yes, we all know that at the last session of Congress enough was developed upon this floor to demonstrate that there was an organized system, acting through one man, giving energy to the whole, and for one and the same purpose. Yes, sir, we have seen this cordon of leagued banks, with their various interests, raising their banner from one end of the Union to the other, upon which was inscribed the infamous motto, "To the victors belong the spoils;" and calling upon their mercenary bands to gather in to the plunder of sacked cities and subjugated provinces.

Again, Mr. Chairman, am I now, at this time, to change my course because others have come to me? No, sir, I maintain the very grounds I then maintained, and I ever will maintain them till my judgment and my conviction tell me they are wrong.

I cannot but believe that the signal failure of these institutions as fiscal agents for this Government—I cannot but believe, too, sir, that the experience of the last three years, must have convinced every one of their inefficacy, and the inexpediency and folly of their being selected again as the depositories of the Government, except with one view. And this is the reason why some gentlemen now acquiesce in their reorganization; that is, that they well know that this operation, and their reorganization, will bring us again into a state of anarchy and confusion, and force the country into the adoption of a bank of the United States. They know well, sir, that it tends to that, and they know that if these State banks are again selected as public depositories, they will be but a stepping-stone to the establishment of a bank of the United States. This, sir, is the real, the true issue. It is an issue between making the fiscal agents of the Government separate and independent from all banks, and the establishment of a bank of the United States, which inevitably must be adopted eventually, and that not at a very remote period, if you readopt now the State bank system as the fiscal agency of the Government.

As to the constitutional argument, Mr. Chairman, in reference to the establishment of a national bank, I will not trespass upon the attention of the House to discuss it

H. or R.]

Sub-Treasury Bill.

[Oct. 10, 1837.]

at length at this late period of the session. I too well know, sir, that a reference to the strict letter of the federal constitution is too apt to excite the laughter and mirth of a majority on this floor; and the gentleman from Pennsylvania, [Mr. BIDDLE,] the other day, with truth, alluded to an observation of a late distinguished citizen from Virginia, (John Randolph,) that "the time was not far off when a man would be called to order on the floor of Congress for speaking of the constitution of the United States." I am not, therefore, disposed to press that argument, but still I take occasion here to say, that the framers of the constitution never intended to confer such a power. What changes might have taken place, could they have foreseen what has since taken place, is a question not for me to decide. I lay down this position, from the history of the federal convention, that the framers of that instrument never intended to confer this power. And why? Because the proposal was distinctly made, first to create corporations generally, and then to incorporate where the general good required. These propositions were referred to a committee, and that committee never reported. Afterwards a proposition was made to confer the power to make canals, and a motion to amend it, by conferring the power to create corporations, was made, and it was expressly rejected. One argument used in debate was, that, if this power were conferred, the Government would incorporate a bank, and that, therefore, the large cities would then be opposed to the adoption of the constitution. As far, then, as history is concerned, it is clear the framers of the constitution never intended to confer that power.

I know, sir, there is an argument upon this point which appears very specious. It is this: that in looking into that instrument, we cannot look *dehors* the preamble and the specific provisions for its sound construction, but are bound to confine ourselves to the instrument itself. Sir, if this were a court of justice, I would yield to the general soundness of that rule; but we are a political tribunal, not sitting in judgment upon the law already made, but to make the law itself, according to the instrument under which we hold authority. I know that, in a judicial tribunal, in a case arising between *meum* and *tuum*, where vested rights are concerned, a judge can only look to the preamble and the act; he cannot look beyond the law itself. This is a sound and wise rule, as applied to a judicial tribunal, but will not hold in its application to a political tribunal, where we are bound to look at the circumstances under which the constitution was formed, and we are to decide on the powers contained in that instrument by the circumstances under which it was itself adopted. Here we have no case arising under the law, no vested interests. That which is a wise rule when applied to a judicial tribunal, has no application to a political tribunal. The creation of a corporation is the exercise of a substantive independent power, and to attach it by construction as a vagrant power to this or to that clause in the constitution, is establishing a loose generality of reasoning which must end in the total overthrow of that noble instrument. I am not unaware of the argument, that, in fact, the constitution of the United States intended to confer the power in this Government over the currency of the country, and that the State banks have been created since the formation of that instrument, which have substantially created a new currency, and thereby usurped that power from the General Government. It is a *questio vexata* whether the States have not committed a fraud upon that clause in the constitution which forbids them "to emit bills of credit, directly or indirectly." They have created local institutions, which, to a great extent, have set afloat a new currency that the framers of the constitution never contemplated; and now it is contended that it is constitutional to counteract and control this currency by the creation of a corporation under the style and title of a bank of the United States. Now this argument proves

too much, if it proves any thing; because it is clear that if this evil has arisen since the formation of the constitution, the framers of that instrument never could have intended to counteract it. The evil is admitted to be a new one, and has arisen since the formation of that instrument, and they never could have intended to confer a power to counteract that which they never understood or knew would exist.

Sir, I say the argument proves too much; but I am not disposed to press this matter. I will only say that, as far as experience goes, (and it may seem strange to some gentlemen, but I am disposed to lay down and maintain the proposition, strange as it may appear to some,) the bank of 1816 never did restore the currency of the country, and could not; that it was not the bank which restored the deranged currency at that time, but it was the power and credit of this Government, under the constitution, by enforcing the collection of its dues in specie. If this power had been simply enforced, it would have compelled an unsound currency to be withdrawn, or to fall to an ascertained value. The United States Bank was the agent to carry on the fiscal operations of the Government, and what gave it power was the credit given to it by this Government, declaring that its bills should be received as gold and silver. It was the credit of this Government endorsed upon its bills, without reference to their convertibility at all, but simply and absolutely receiving them as gold and silver. The Government, being the great and universal money dealer, had practically surrendered up its power to coin money, and to receive nothing else, into the hands of a corporation, and made its notes the same as coined money, so far as the Government demands were concerned. But even then, in 1817, '18, and '19, that bank was brought to the brink of insolvency, and all the other banks were made to feel its power, while many fell prostrate before it. And what alone sustained that bank then? The power of this Government, declaring that its bills should be received in payment of its dues as gold and silver. While other banks had to sustain themselves upon their capacity to convert their bills into coined money, this bank sustained itself by the Government converting its credit to the use and benefit of the bank, and that credit serving as a specie basis. The great confusion that has occurred on this subject arises from the fact that many have confounded the power and credit of the Government with that of the bank.

The power to "coin money and regulate the value thereof," and the prohibition of this power to the States, and also the prohibition that prevents any thing but gold and silver being made a legal tender, is all the power conferred by the constitution over the currency. Whether it be defective or not, it is all the power given. But if it be rigidly adhered to, without temporizing, it must, of necessity, create a general standard by which the local or paper currency can be compared. It is immaterial what a bank bill purports to be on its face; if it have an ascertained value, by comparison with specie, it is all that can be required. And the Government, collecting its dues in this standard, and habitually disbursing its equivalent, would create centres at different points, around which the local currency would revolve, and receive a fixed and known value.

Sir, to all intents and purposes, this would be a measure of currency. I am aware that it is not as exact a measure as weights and measures are applied to other things, but it is the best ever invented by man, and comes nearer to it than any other standard yet created by Government, or which, I believe, can be created. As to exchanges, this is not a subject within the legitimate object of this Government, except as it may be incidentally affected. They must be left, as they are in other countries, to be regulated by the interests of the commercial community, and conducted by banks or bankers, who have acquired credit by long economy and prudence, based upon real capital, and resting upon the productions of different sections.

Oct. 10, 1837.]

Sub-Treasury Bill.

[H. OF R.]

Sir, the difficulty in 1814 and 1815 was, that the Government became embarrassed and involved. Individuals could not advance to it. The local banks did advance; and upon the faith of the debts, in the shape of stocks, they held against the Government, these banks went on discounting as if they had that amount in specie instead of Government stock; and what was the result? Why, when those debts became due, the Government itself was unable to make payments, and the inevitable consequence was, that these local bank notes fell below par, as they could not be converted, and the Government then, in turn, sustained those institutions it had borrowed from. And, although it never was, I believe, sanctioned by law, yet the Government received their notes in public dues on a par with gold and silver. This produced a demand for depreciated paper; and that which was most depreciated was sought after to pay into the custom-houses, as it could be purchased with the least coined money. The result of this was that the Government would have had finally all the depreciated paper of the country forced upon its collectors. It was the policy the Government adopted of receiving advances from the local banks, and then pursuing the temporizing expediency of receiving their depreciated paper, after they had discounted upon what they had no right to discount upon, (because they were, at the same time, receiving interest upon the Government stocks,) that involved us in the depreciated paper of that day. It was the folly of this Government, not its impotency under the specific powers of the constitution. It was this state of things which the Government felt bound to stop the progress of, and they therefore adopted the joint resolution of 1816, declaring that they would receive in payment of the public dues nothing but gold and silver or the notes of specie-paying banks. This, of course, threw depreciated paper out of circulation, and stopped the issues of spurious banks. The Government was enabled to enforce this resolution, because peace had been restored, and the resources of the country became expanded; and if they had adhered to that resolution, and never adopted the policy of receiving other notes, you could have had, for all practical purposes, a sound currency, according to the intent of the constitution.

It is the only control over the currency which the constitution contemplates; whether enough or not, has been questioned. I contend that it is enough for all safe purposes. You receive nothing but gold and silver or its equivalent, and the result is, that the local banks are compelled to have that which is as good as gold and silver, or their paper will be run back upon them. I admit that if you receive by law, as the permanent policy of this country, the paper of local institutions, the result will be that you are compelled to resort to a bank of the United States. I maintain that if you receive paper, you cannot control it and make it a sound and equal currency under the constitution, except by and through a national bank. There are but two feasible modes by which you can regulate the currency. The one is the mode provided for under the constitution, in the clauses to which I have referred, and which is the mode intended and pointed out by our ancestors. And if you attempt to throw this Government upon that stupendous system of currency which has grown up in modern times, by receiving the paper of banks in Government dues, then there is no other possible regulation of it but by a bank of the United States.

But, sir, what a monstrous proposition is contained in the second mode! You declare that you will receive the paper of banks, and you charter a bank of the United States, and give it power to control all other banks; and, by subjugating the State institutions through the creation of this check, you at the same time part with the power given to you by the constitution, and confer it upon a set of men wholly irresponsible, except to the stockholders of their bank, and reckless and regardless of every thing, save

the interests of the institution. Sir, in creating such an institution as this, you create a greater evil than that which you intend to counteract.

What would have been the result in 1813 and 1814 if a bank of the United States had been in operation? Why, the Government being in difficulty, instead of borrowing from the local institutions, as it did, it would have borrowed, in all probability, from that bank; that bank would have discounted upon the credit of the Government, as the others did, and the Government being unable to meet its debt, the notes of the institution would have fallen below par, as those of the local banks did, and you would have had precisely the same state of things as did take place. And then nothing could have sustained the bank but the power of the Government to receive its notes as gold and silver, although not convertible; and this Government credit would have given it power and control over other banks without the slightest merit. It is absurd to talk about the bank sustaining the Government. The Government can sustain the bank, but not the reverse. The credit of restoring the currency is due to the Government, under that noble instrument, the constitution, and not under the bank.

But, sir, will you part with your power—the power to coin money and regulate its value—a power that is one of the greatest and highest attributes of sovereignty? And if you make paper money the currency of the Government, then the power that regulates it is as high and sovereign as the power that now makes coin and fixes its value. And let gentlemen recollect that, if they once part with it on the policy of creating a bank institution, it is not to last for this year or the next, but forever; for that which is sound policy in regulating the currency now, will be so fifty years hence; and it must become a branch of Government, permanently engrafted upon the institutions of the country. And are we prepared to say that those who are to manage it are forever to be pure and enlightened men? Recollect that the power that holds the sway over the currency, holds a sway over the fortunes of every man in this republic. Sir, if we once part with this power, my deliberate and firm conviction is that we shall centralize a moneyed action in this country, which will, in the end, make the labor of the confederacy virtually and forever tributary to those who will have but little interest in it. I believe that nothing tended so much to this as the establishment of the last institution. It is its natural and inevitable course.

Now, sir, what would be the results upon the exporting sections of the country? Where would you locate your institution? Why, you must place it where nine-tenths of the banking capital of this country already exists. And what can be a greater or more tremendous engine of power than this, located in a particular section, organizing with system, and creating dependence in all the banking and stock interests of the country? You do nothing more or less than give away the power to regulate the money and exchanges of the whole country to an institution located in the non-exporting section, and thus deprive forever the possibility of the exporting region of the country doing its own importing trade. Identify it with Government, by receiving in public dues its notes as gold and silver, and you in effect loan the credit of this Government, which is equal annually to its revenue and disbursements, to capitalists in stocks for their benefit; thus creating an artificial credit, instead of letting all interests, resting upon their natural resources and credit, rely finally upon the productive industry and *bona fide* capital of each individual or section.

Is it not an extraordinary fact that nearly all the exports and imports of the exporting region of this confederacy touch, both going and coming, at Northern ports? Why is this? It has arisen from the fiscal action of this Govern-

H. OF R.]

Sub-Treasury Bill.

[Oct. 10, 1837.]

ment, which has heretofore sustained, and been identified with, the banking capital of this country. We have raised the articles demanded in foreign countries, and they compel us to touch, both going and coming, at their ports. This does not arise from their holding the tonnage, or their bottoms, but they hold the credit or banking system, and, by their connexion with the Government, create exchanges against us, and force us to touch for tribute. Suppose, for a moment, we were separate States, would it not be absurd for us then to touch at foreign ports? Let there be no central moneyed power with which the fiscal action of the Government shall become identified, and the export region will do its own imports through its own ports. With our local currency, resting, as it does, on those articles which go into the markets of the world, fifteen per cent. discount in New York, we can never afford to sustain the state of things that has existed heretofore. Without a bank, identified with Government, the exports of the country must, to a great extent, become a substitute for all foreign and even domestic bills.

Mr. Chairman, in looking over the statistics of the past, I find that, in 1769, Virginia and Maryland imported, in amount, 851,140 pounds sterling; the New England States, 561,034; New York, 188,976; Pennsylvania, 399,820; South Carolina, including part of North Carolina, 535,714 pounds sterling, &c. In 1774, the exports from Virginia and Maryland to England were 738,356 pounds sterling; South Carolina, 579,549; Pennsylvania, 175,962; New York, 187,018; New England, 116,588, &c. This general proportion is sustained, with no great variation, whenever things were not deranged by war, up to 1788 and 1789. The export region did its imports; and, although it was, of course, generally in foreign or British bottoms, yet it never touched at two ports, but went and came directly through our own ports. But things have now changed, and we have lost our relative proportion. Trade was then suffered to take its natural channel. Since then, however, the political power, together with the moneyed power, has been worked against us, and our trade is now compelled to touch where nature never intended. I contend that, as far as the fiscal action of the Government is now concerned, we are where we were under the articles of the confederation; and I, for one, desire for the present to keep there. And, sir, it is under these convictions, and believing this to be the operation of things, that I feel bound to make the true issue now presented by the bill under consideration. I contend that this organization of the banking power of the country connected with the Government tends directly to the result which I have attempted to show; that is, to make the labor of the exporting region of the country tributary to those who hold nine tenths of the banking capital in their hands. I call upon gentlemen to consider well before they make this plunge. We have some deeply interesting questions before us, intimately connected with the power and ascendancy of sections, and the destiny of this republic. Sir, I have been here for three years, and watched the progress of this abolition feeling, which is now spreading itself over half of this confederacy. When it was first brought into this hall, it was viewed with indifference, as the excitement of a few bigots and fanatics. But now, in the short progress of a few years, we find that it has pervaded all society with intense anxiety. That speck, which was at first scarcely visible to the naked eye, has now grown blacker and deeper, until over one half of our horizon hangs a dark and gloomy cloud, through which the thunder rolls and the lightning flashes, and this temple, under which we all have heretofore gathered for common protection, is destined to rock and totter amid the desolating whirlwind and rushing tornado. It has assumed of late somewhat a different shape.

But gentlemen need not be deceived by the color given to the Texas question. Do you suppose it is opposition to

Texas? No. It is opposition to that vital interest in this confederacy with which we are identified—a deep, pervading opposition, grown up from education and infancy, and partaking now even of the religious sympathies of the community; and I call upon gentlemen to pause before they are willing to throw the power and the credit of this Government into the hands of capitalists who are at war with us, not only in interest, but in feeling and in sympathy. Organize again the banking interests of this confederacy, and connect them with Government, and you cannot escape from the grasp. I cannot look upon the future without feeling the deepest (unless we are true to ourselves at this juncture) and most solemn apprehensions that that persecuted and slandered country, which now stretches itself from the banks of this noble river to the mouths of the Mississippi, rich in character, rich in intellect, rich in the glory of the past, rich in all those qualities which make a great and a gallant people, will, in progress of time, be laid low in ruin and desolation, with only here and there a solitary inhabitant to trace out, upon deserted tomb-stones, those obliterated letters which transmit to posterity the names of our mighty dead, and then to shed over them a burning tear.

Sir, it is the fiscal action of this Government, connected with the banking power, that has tended to draw from us our substance for forty years. It is the vampire that has fed upon our life-blood and our vitals, and I, for one, am not prepared to perpetuate it, or sanction its renewal.

But, Mr. Chairman, gentlemen say, in opposition to this bill, that is impracticable, and that the Government will find great difficulty in getting along with it. Sir, that furnishes no objection in my mind. I love a Government the better that moves with difficulty. Despotisms only move in untrammelled power. Free Governments live and move in difficulty. Collect your taxes with difficulty, and the consequence is that you never will find people willing to pay taxes for distribution upon lawless and unconstitutional objects. No, sir, the difficulty presents no obstacle to the passage of this measure to me. When Mr. Fox visited Paris, at the time Napoleon was in the height and pride of his glory, the First Consul desired to know something of the operation of the trial by jury, with a view to introduce it into France. But when Fox told him that its fundamental principle was that no man could be deprived of his rights but by the judgment of his peers, and those peers twelve of his fellow-citizens, the First Consul immediately replied it would not do for him, "his Government would find too much difficulty to get along with it."

Mr. Chairman, many may suppose that I am unnecessarily apprehensive in my fears as to the connexion of the banking system with the power and credit of this Government; but, sir, I have seen enough to fear and dread it. In 1832, when the contest, as we supposed, was about to arise for the very existence of our peculiar rights and liberties, we felt its power. And, though I shall forbear to dwell upon particulars now, yet I will take occasion to say to those gentlemen who are deeply identified with that institution—those gentlemen who were the bitter political opponents of the then President of the United States, what was the spectacle they exhibited? When he asked for the sword of this Government, to be buried in the vitals of our people, they came forward and gave it to him freely. And why? Because they dreaded a revulsion which would shake the credit system, and that institution, with those who depended upon it, to the deepest foundation. Sir, no part of this country, under the influence of a bank of the United States, will ever resist the encroachments of this Government, or the Government itself, however despotic it may be. Such an institution, then, connected with this Government to control the moneyed power of this country, I confess I dread. I confess I do look with dread and terror upon its influences. Sir, if you want to make the

Oct. 10, 1837.]

Sub-Treasury Bill.

[H. OF R.]

Government of this Union despotic, create a bank of the United States, and connect it with the destinies of this Government, and, my life upon it, you can never escape.

You can never resist this Government in the hands of the moneyed power of the country, and the result will be that the fairest portions of this Union will become tributary to other and more powerful sections.

Mr. Chairman, while making these observations, I confess that I will go as far as any gentleman to sustain those peculiar local institutions organized by the States for their benefit, and to carry on their commerce with the different sections of this country. If they be properly organized, and limited within proper bounds, I will go as far as any man to sustain them, and give them vigor, as long as they act upon *bona fide* capital, for the good of the community, as well as for their own individual interest: such institutions are essential to the present state of commerce. But, while I say this, I am compelled to say that I believe the banking system of modern times, as organized in different sections of this country, has any thing but a tendency to elevate or give liberty to man. Even this very session we have heard gentlemen upon this floor, from the State of New York, denounce the manner in which things have been conducted there as disgraceful and outrageous: charters granted, stocks distributed to political partisans for political power and ascendancy.

The minority there, as in many other sections of the country, have been practically reduced to political vassalage; and it is idle to discuss or question the fact that stock operations have been organized with a sole view to sustain political power, and make the labor of the country tributary to themselves.

Now, sir, a gentleman from Massachusetts, [Mr. CUSHING], not many days ago, warned Southern gentlemen, and declared that the "progress of radicalism at the North was nothing more than the progress of abolitionism." Sir, I have thought of this matter. I have considered it with painful anxiety, and I feel bound to present what I conceive to be the true interests of this country. We are a peculiar people, I admit. We own nearly one-half of our population. We hold them by physical force, and the law of necessity. I make this frank and candid avowal. And I will here take the occasion to say, that the connexion which exists between the slave laborers and capitalists of the South is one of the deepest interest to the Northern and Middle sections of this Union. We are interested in the *bona fide* profits of daily labor, for we own not only the proceeds of labor, but labor itself; and that Government which interferes as little as possible, by any artificial arrangements, with the management or proceeds of labor, is the Government for us, because it leaves us in undisputed and undivided control over all profits of labor.

We are, then, in fact, capitalists standing in the place of laborers, and are, to all intents and purposes, laborers. There is little or no separation with us of capitalists and laborers. They are, in fact, one and the same. The laborers of the non-slaveholding States are interested also in the *bona fide* (not spurious or doubtful) profits of daily labor. The struggle of their capitalists (I speak of pecuniary interest, and it is nature) is to divide those profits with them. Hence they resort to all the artificial modes known to Government, by which they are brought to act with system and energy as one man, through corporations of all sorts, and the most important of which is the banking system. You pretend to give universal equality and equal power to all; and, if this were practically carried into effect, after society has gone through an era long enough to be pressed down into its natural classifications, the inevitable result would be in a conflict that labor would make capital tributary, until it would, in the operation, change hands. To prevent this, where you profess to make all equal in political power, you are compelled to resort to those arti-

cial combinations created by the Government, to give you that control which will enable you to sustain yourselves, and make your capital profitable, by the management of labor which your political professions forbid you to own. Now, sir, when gentlemen preach up, as they have done for the last three years, insurrection to the slaves of our community, I warn them that their own institutions are not so pure as they might at first suppose; and that I will preach up insurrection to the laborers of the North, when the tendency of things is such as to swindle them out of their power, by the fraud, duplicity, and cunning of modern times.

As far as mere pecuniary interest is involved, the relation of capital and labor is the same as that which exists there, in Great Britain, and every where else; that is, just to allow labor as much as is necessary for subsistence, and to take the balance to divide among themselves, by all the inventions which the fraud of Government can create. This will be finally the interest of our Northern capitalists. They have no standing armies to perpetuate this state of things, as in other countries; and the consequence is, that though they cannot keep the laborers in physical subjection, they are compelled to resort to banking corporations and chartered institutions. While they preach to us universal equality and universal emancipation, they themselves are destined, if unreformed, to hold in tribute not only the labor of their own section, but also of this confederacy.

The two systems of subjugation which now divide the world seem to be a resort either to fraud or force, by which one-half of mankind may rule the other half.

Mr. Jefferson proclaimed, thirty years ago, that the democracy of the North were our natural allies, and there was profound philosophy in that declaration. When we contend for the undivided profits and proceeds of our labor, do you not see that we stand precisely in the same situation as the laborer of the North? We are, to all intents and purposes, in the place of laborers. We are the only class of capitalists, as far as pecuniary interest is concerned, which, as a class, are identified with the laborers of the country, while, at the same time, we shall ever form a barrier against breaking up the laws and foundations of society. I know this is a proposition which will strike some men with astonishment, and I know, too, that I utter words which burn. But I know, sir, it is the truth; and, when these gentlemen expect to preach up insurrection and rebellion to the slaves of our country, I will preach back to them the same doctrine, by proclaiming universal equality, universal privileges, a universal right to Northern laborers to be redeemed from the fraud, duplicity, and cunning by which they are destined to be made tributary to those who wield capital, connected with political power. The whole banking system there is a political substitute for the standing armies of Europe, without which the capitalists of the North would be compelled to submit to a loss of power.

Sir, these are my sentiments, and I believe that, as far as our people are concerned, we are not compelled to resort to those artificial institutions of society by which non-slaveholding regions seek to delude and deceive their victims. No, sir, we avow to the world that we own our black population, and will maintain that ownership, if needs be, to the last extremity.

Mr. Chairman, in maintaining these peculiar sentiments, and in proclaiming the peculiar identity of interest existing between the capitalists of the slaveholding region and the democracy of the North, I am aware that I come under denunciation, and am liable to the charge, from certain quarters, of being a "locofoco." For maintaining my own rights and interests, and the rights and interests of those I represent, I may be called a "locofoco;" but this name shall never terrify or deter me, when the question arises, from maintaining the interests of those with whom I ex-

H. of R.]

Sub-Treasury Bill.

[Oct. 10, 1837.]

pect to live and hope to die. And, sir, when gentlemen tell me these things, I tell them I proclaim the doctrines of Jefferson, that the democracy of the North are the natural allies of the South; and this arises from peculiar interests, which I, for one, am not disposed to sacrifice on this floor. "Locofoco!" Gentlemen seem to raise up that name as a ghost to create terror and alarm. The progress and tendency of things to be carried away by prejudices and party feelings are monstrous. Why, sir, it was but the other night, that, while holding a portrait of John Milton in my hand, a very estimable friend of mine looked at it, sneeringly, and denounced him as a "locofoco!" John Milton a locofoco! And pray, sir, who was he but a man, the grandeur of whose soul, and the splendor of whose genius, breathed not only inspiration into poetry, but threw a halo of glory over those burning pages which he devoted to English liberty? Sir, it is nature for those small birds that hop from branch to branch in the shrubs of the forest to gaze with envy and hatred upon the noble eagle as he soars aloft in the sunbeams of heaven, whose brow defies even the concentrated fury of the elements, and whose eye scans in scorn the earth beneath him. If John Milton was a "locofoco," then I, too, glory in catching, if I can, one live coal from off that altar which he hallowed and consecrated to the everlasting rights of man.

Sir, if I maintain the universal freedom of the white race, and the inalienable rights of man, shall I be deterred from my position by the contemptible name of "locofoco!" The scribbling writers of the day may call me what they please; their denunciations have no terrors. I scorn and despise them.

Perhaps, Mr. Chairman, in the sentiments I am about to utter, I may be considered as behind the age, and they will be regarded as very singular, if not unpalatable, by gentlemen raised from their infancy in large cities, or under the controlling influence of newspaper essays. But my excuse for entertaining them is, that the people among whom I was educated and trained up are also peculiar in their habits and their institutions, and partake more of the impress of antiquity than of modern improvements. And I confess to you, sir, that I feel for them a lingering affection and attachment, because they were the customs and the habits of those ancestors who have given to us all that we inherit in virtue and freedom. I do not believe much in the great blessings of your modern forms of society, and the great "improvements of the age." I do not believe the intellectual and moral endowments of man have been advanced or elevated of recent years. Sir, I admire the people who have gone before us, and bequeathed and transmitted examples worthy of our admiration. It is true we have more wealth, more enterprise, more speculation, and more of the gaudy show and pomp, and temptations of commerce and luxury; but, as far as the heart is concerned, as far as intellectual and moral qualities are concerned, I do not believe man has advanced for the last ten years. No, sir. It may be from my peculiar situation that I entertain these sentiments. You have drawn together the world; you have made your splendid works of improvement, by which contented and remoter parts of society have been drawn under the temptations and vicissitudes of speculation; you have your credit and banking system, by which all christendom has been concentrated into one consolidated living mass, and we have been brought by that system to bow in subjection before the banks and bankers of London and Wall street; and we look with more interest and admiration upon the movements of Shylocks, gathered together in the exchanges of commercial cities, than we do to those noble pages of history which transmit to us the glory of arms or oratory.

Our people are consumed with avarice, deep, absorbing, unfeeling, mean avarice. Yes, sir, selfishness, hypocrisy, fraud, and cunning, seem to me to be the great character-

istics of modern times, instead of that lofty heroism, that devoted valor, that burning patriotism, which characterized former and better days. True, sir, we develop more physical resources; but is there more sentiment, more virtue, more honesty? What is it that constitutes a great people? Is it power—is it wealth—is it numbers? No, sir. It is virtue—valor—devoted patriotism—arms—eloquence, and letters. These are qualities that have covered others with immortality, and kindle in the heart of man all that is noble and spirit-stirring.

All society seems now to receive its hue and cast from those who hold the moneyed power of the world. Even our interior villages, painted as they are, and dressed up in all their show, receive in submission their fashions from the dandies of Broadway, and kneel in reverence before the molten images that idolaters raise up for worship in Wall street and London. The tendency of all these things is to constitute society into one living mass; and I war against it because, if it succeed, my peculiar section, and the peculiar institutions existing in it, will be overwhelmed.

In reference, Mr. Chairman, to the details of the bill under consideration, I will only say that upon that point I have my own peculiar notions. But the bill asserts a great principle for which I contend—the principle which I believe to be identified with the liberties of this country. I will go for it, and hold the administration responsible for its details. I do not choose to propose any amendment in those details, for if it be bunglingly or injudiciously arranged I will not be held responsible. I go for it, sir, because it asserts those principles which belong to the constitution of my country; but I leave the details to the administration to execute, and I shall hold them responsible for it. I go for that great leading feature which separates this Government from all connexion whatever with State banks, or any great money institution here. I am for it, because I have seen the fatal consequences upon the Government and banks themselves.

Sir, we have had these institutions, as I said before, entering directly and indirectly into the political canvass of the day, dispensing power, and controlling, as I believe, to a great extent, the elective franchise; and we have seen the results, and have heard the shouts of triumph raised around the funeral pile here upon which the constitution was placed, and a fiendish joy seemed to light the countenances of hundreds, even while the smoke thereof rose as a sweet incense to that popular idol which we were all called upon to kneel down and worship before, as the only true and living image of democracy. And am I now to put this Government in the same position again? Let gentlemen beware how they unite the political with the banking power again. Have we not seen enough to give us lessons of wisdom in the dreadful consequences that have resulted from warring upon the institutions of the country? And, sir, in this conflict, who have been the greatest sufferers? The industry of the country—men who have vested their all in the enterprise of the day, and who have been left to the mercy of contending foes. It is to separate these, and to avoid this result in future, that I am for this bill; for who can look at the future, and not see how some bold and designing demagogue may desire to rise into power, and contend for political influence, by calling up the basest passions and prejudices against any institution which you may deem to be stable and fixed? He may wage a war of extermination, and may ride over the laws of his country. I desire no such conflict, in which the honesty, the industry, and the enterprise of all will be left to the mercy of factions contending for power over an institution in which the destinies of this country, through its currency, are to be placed. And if such a contest should come, I could not with any heart sustain an institution which I believe to be against the constitution and the liberties of the country.

Oct. 10, 1837.]

Duties on Merchants' Bonds.

[H. OF R.]

Mr. Chairman, my friend (and I use the term in no idle manner) from Virginia [Mr. Wise] the other day warned me that on this measure I should be "left in the lurch." Sir, on a question of this kind, affecting the liberties of my country, I never stop to inquire whether I shall be "left in the lurch" or not. I never stop to inquire who may be with me, or who may be against me, on a question of that character. All I ask myself is, is it a constitutional proposition, and if it be right and correct to maintain it? I never stop to inquire who is with me or who is against me. The more triumphs of party I disregard. I throw aside party considerations where a great question is concerned, in which the liberties and destinies of the people and the Government are involved. On such a question, sir, I subscribe to no party creed. Let me also say to those gentlemen who suppose that the tide of popularity upon which they are now floating is forever to set in one direction, that they will find the future full of bitterness and disappointment.

Let them not labor under the fatal delusion that the letter writers and newspapers of the day are to create that popularity which is to endure through time. Let them rather look to that deep-settled, abiding opinion, which is to come back to us from the enlightened and reflecting freemen of this country—come back to us upon the settled conviction of what is true, of what is constitutional, of what is for the good of the Government and the people.

Let us all look to that deep and fixed public opinion, formed upon enlightened conviction and sound discretion. Allow me now to say, in the noble language of Lord Mansfield, that those who have foregone that pleasing adviser, and given up their minds to be the slave of every popular impulse, I sincerely pity. I pity them still more if their vanity leads them to mistake the shouts of a mob for the trumpet of fame. Experience might inform them that many who have received the huzzas of a crowd one day have been visited with its execrations the next. And many who, by the popularity of the times, have been held up as spotless patriots, have nevertheless appeared upon the historian's page, where truth has triumphed over delusion, the assassins of liberty.

When Mr. PICKENS had concluded,

Mr. GARLAND, of Virginia, said he would offer an amendment to the bill under debate, when its friends had put it into the shape in which they wished it to pass.

Mr. CAMBRELENG said that he did not mean to offer any amendments to the bill.

Mr. GARLAND then moved to amend by striking out all the bill after the enacting clause, and inserting another bill, (heretofore indicated by him,) which he sent to the Chair.

The amendment being read, Mr. GARLAND said he did not intend to address the committee at the present time on his proposition, but would do so, unless some other gentleman wished to precede him.

Mr. PHILLIPS had not risen to debate this bill. He would suggest that the committee take up the merchants' bonds bill, laying that now before them aside for the present.

Mr. CAMBRELENG assented to this arrangement, and moved to take up Senate bill No. 3, being that alluded to by Mr. PHILLIPS.

This proposition was sustained by the committee, by a vote of 88 to 54.

DUTIES ON MERCHANTS' BONDS.

Mr. CAMBRELENG moved to amend the bill by striking out the second section thereof, which was as follows:

"Sec. 2. *And be it further enacted*, That the additional credit of nine months, granted by the first section of this act, upon outstanding duty bonds, shall be upon the same terms and conditions granted upon all bonds for duties

which may be given during the period of one year from and after the first day of October, in the year one thousand eight hundred and thirty-seven."

The committee, having adopted this amendment, rose and reported the bill, thus amended, to the House; and the question arising as to the concurrence of the House with the Committee of the Whole in the proposed amendment,

Mr. TITUS addressed the House in opposition to the same, and had proceeded but a little way, when

The House took a recess till 4 o'clock.

EVENING SESSION.

The House met after recess. Very few members being in their seats, there was a call of the House; which, having proceeded for some time, was suspended.

The question still being on the following amendment reported by the Committee of the Whole to the bill from the Senate, further to defer the payment of duty bonds, viz:

"Sec. 2. *And be it further enacted*, That a credit of three and six months shall be allowed on the duty on all merchandise which shall have been or may be imported on or before the first day of November next, upon which the duties are payable in cash, and that the bonds received for such duties shall be payable in equal instalments, bearing interest at the rate of six per cent. per annum, and shall be in the form and upon the conditions prescribed by existing laws and by this act."

Mr. TITUS said he had hoped that some of the honorable members of this House, whose character and talents would have given weight to their opinions, would have thought proper to address the House upon the bill before it. He was aware that views similar to his own were entertained by very many upon this floor, but the disposition generally manifested, seemed to render hopeless any opposition to the amendment offered by the honorable chairman of the Committee of Ways and Means. Viewing it, however, as he did, and in the absence of any discussion, he felt it to be his duty to give, very briefly, his objections to the consideration of the House.

The first section of the bill grants an extension in the time of payment on all revenue bonds of nine months. To that he had no objection. The condition of the times unquestionably requires it, on the ground that it will render the payment ultimately more certain, and it may, moreover, tend in some degree to relieve those immediately connected with the importing interest. Still, it appeared to him that the only just and tenable ground upon which an extension could be granted, was the additional safety attained by that extension.

But neither the second section of the bill nor the amendment offered, can be entertained upon the principle of increased security, or of relief to any portion of the community, except the merchants. There is no indebtedness to the Government that the amendment proposes to secure; on the contrary, it releases in these days of non-payment, from the custody of the Government, the merchandise held in security for cash duties, and proposes the substitution of a lengthened credit upon bonds, subject of course to the contingencies of the times.

He was opposed to this portion of the bill, as well in regard to its practical effect, as to its violating a settled principle of existing laws. He took it for granted that the laws in relation to revenue were proper and just; they had been a subject of exciting interest and profound discussion during a long period, and were finally settled in the spirit of compromise amid the convulsions of the nation. Were they to be lightly disturbed? Were they to be approached without great and apparent causes? However unimportant in that point of view the present proposition might appear to the House, it acted forcibly upon his mind. It was well known to this House and to the nation, that at the last session of Congress the Committee of Ways and

H. OF R.]

Duties on Merchants' Bonds.

[Oct. 10, 1837.]

Means, with its present chairman at its head, introduced a bill to reduce the duties on imports. It bore in that character too unfavorable an aspect to meet support, and was abandoned.

The subject is now approached with more caution, and we are only presented with the first step by which the ladder is to be mounted; another is about being introduced, which, if accepted, will scatter to the winds whatever of protection, if protection it can be called, that the producing classes now receive.

The proposition, then, being to that effect, it is desirable that the Committee of Ways and Means should approach the subject directly; that they should toe the mark, and introduce a bill entitled an act to repeal the duties on imports. Its object would then be understood, and the honorable members of this House would act advisably.

The practical operation of this bill will be to increase, and throw into market, the already excessive importations of goods, paying, by existing laws, cash duties. The means obtained by the bounty of Government will furnish forth new importations; and none can act with such deleterious effect upon the labor and interests of the producing classes as those of this character; and an acquiescence in the demand of the commercial interest will fall with peculiar hardship upon that extensive class of the people. They suffer not only in common with all other classes of the community, but, by the provisions of this bill, they, in effect, are required to furnish forth the means to enable the importers, by further unnecessary importations, still more to injure and depress them.

Gentlemen are aware that merchandise paying cash duties, as embraced in this bill, consists of wool, woollen goods, and goods of which wool is a component part. We have been told in this hall that our manufactories are generally suspended in their business; that thousands of our citizens connected with them are out of employment, and are in a condition of want and suffering; and it is well known by those conversant in such matters that the price of goods of this description is depressed beyond all former precedent. The quantity on hand of this kind of goods, foreign and domestic, is immense; and the amount of wool in the warehouses, and remaining yet in the hands of the producers, scattered over the northern half of the Union, cannot be less in value than twenty millions of dollars.

Does not this state of things exhibit embarrassment and distress to an extent that does not require legislative enactments to increase it? Shall the command—he believed the term was not inappropriate—of the commercial interest add to the general calamity, by screening themselves from the effects of their own imprudence, and throwing it with appalling force upon the great mass of the producing classes, whom that imprudence has already so severely injured? It is true that those classes are not asking for relief; they disdain to prefer the mendicant's prayer; but, in the language of the honorable gentleman from Ohio, they pull off their coats, roll up their sleeves, and go to work.

He had said that the distresses of the people were principally caused by the imprudence of the commercial interest. It was generally conceded that they had proceeded mainly from over-trading; but, to his mind, a proper distinction had not been taken as regards the kind or character of over-trading. So far as the individual concerned is affected, no distinction exists; but it must be borne in mind that, however severe the revulsions in business may at any time be among a great people, a vast majority of individuals are not materially affected by it—a vast majority do not incur liabilities that create embarrassment. Hence, when the balance of trade is not against us with foreign nations, our immense domestic operations are not impeded; and, although in their excesses individuals will suffer, capital is not diverted from its accustomed channels; it merely changes hands within a circle over which it is not required

to pass. A brief view of our own condition will establish that position. Our domestic operations, including current business and general indebtedness, reach to an amount of which it is difficult even to form an opinion. We have no data to direct us but what is derived from our own knowledge of indebtedness to banks, but he thought he was more likely to be below than above the mark in placing it at two thousand millions per annum.

This immense business had at all times been transacted without difficulty, when balances abroad had not pressed too heavily upon us. No revulsions under such circumstances had taken place, and all the efforts to that end that were made by politicians and others, in 1834, were abortive. No efforts could have been more animated, nor means more powerful applied, to create confusion and produce disaster; but the energy and resources of the people, not being crippled by foreign demands, the payment of which required the basis of our paper currency, bore up triumphantly and successfully against the storm. In illustration of this view of the subject, he would adduce a remark of an English statesman in comparing the relative condition of England and the United States in the present crisis. He said that the former, with a national debt of eight hundred millions of pounds sterling, and an annual tax of fifty millions sterling upon the people, was prosperous and unembarrassed, and its industry and trade not materially affected; whilst, on the contrary, the Government of the United States, with a surplus of forty millions of dollars, and the people comparatively no taxes to pay, yet the Government and the people were alike bankrupt. Without literally adopting these positions, they nevertheless went clearly to elucidate to his mind the effects of the commercial action of the two countries. England has no balances against her, and hence the comparatively partial evil she experiences; whilst the balance against us required, in its liquidation, the coin of the country—the basis of our paper currency. The step taken was inevitable. The basis of our currency would have been swept from the country but for the proper and justifiable course of those who held it in possession. Had England received her dues, she would, of course, not have felt the blow; but had we promptly paid our debts we should have been ruined.

In establishing the position that the present state of things has been produced principally by over-trading, the condition of England has been assimilated to ours, and her embarrassments ascribed to the same causes. In his judgment, however, there was a material, a radical difference: our over-trading consisted in buying too much, in buying more than we can pay for, of foreign countries. The over-trading of England, on the contrary, consists in selling more than she can obtain pay for, and the losers only feel the effect, without its pervading all branches of business. Our over-trading abroad, as before remarked, in creating balances against us, affects, in a greater or less degree, all classes of community by its operation on the currency. He hazarded little in saying that excessive importations had been the forerunner of all the severe revulsions we had felt for the last twenty years. That of 1819 must be familiar to most of the members of this House, and he thought no individual could doubt its cause. It operated with extreme severity; and, however great may be the embarrassment and suffering of the commercial interest at the present time, the general distress at that period was incomparably greater than it now is. Our numerous manufacturing establishments, with scarcely a single exception, were overwhelmed in irretrievable ruin. Thousands of farms changed proprietors, and those who but yesterday thought themselves secure in a certain, though perhaps humble independence, were on the morrow tenants of their former freeholds. And it may not be unworthy of remark that they asked not, received not, any of the bounties of Government.

Oct. 10, 1837.]

Claims upon Deposit Banks.

[H. OF R.]

He had no doubt of the existence of the difficulties complained of by the commercial interest. Public fame, as well as the documents before us on that subject, establish that fact; and he should hope, for the honor of humanity, that that distress must be deep indeed, that could bring before us, begging alms, that class of our citizens who, in their own estimation, and, as it would appear, in the estimation of this House, were first in importance as they were in wealth.

He trusted the provisions of the first section of this bill would afford them great relief; at all events, it was their proportion of the bounties of Government. He considered the second section, as well as the amendment offered, went to increase, by the aid of the Government, an evil which had, to a great extent, been checked by its own excesses. Importations, embraced in the amendment, being principally from the west of Europe, had in general been ordered since the commencement of the present embarrassments. The importers were consequently aware of their inability, if that inability exists, to comply with the requirements of the revenue laws. If, then, they have knowingly and purposely plunged in beyond their depth, they should be left, as the great mass of their fellow citizens are, to get out of their difficulties, without the special bounties of the Government. He would say no more except to express the hope, though apparently a vain one, that those who had contributed to the establishment of the present revenue laws, would feel and see the propriety of rendering them permanent.

Mr. EVERETT inquired of Mr. CAMBRELENG whether the amendment was intended to cover goods now in the custom-house, as well as those which should be bonded between now and the 1st of November?

Mr. CAMBRELENG replied in the affirmative.

Mr. E. then said there was one view in which the bill would operate rather favorably to the manufacturers. The merchants would be reduced to the alternative of either selling their goods at auction, or reshipping them; and no doubt many would prefer to reship, which would operate favorably to our own manufacturers. He was in favor of the amendment as being, in this view, preferable to the original bill.

Mr. CAMBRELENG made a verbal modification of the amendment, to remove all doubt as to its applying to goods now in store: instead of "shall be" imported, to insert "shall have been, or may be," which was agreed to.

Mr. MENESEE, after a few remarks, not heard by the reporter, moved to amend the committee's amendment by adding the following proviso:

"Provided, further, That all others in anywise indebted to the United States, except for public moneys received, shall be entitled to the benefits of this act on the terms and conditions hereinbefore prescribed."

The amendment was not agreed to.

Mr. ADAMS moved the reference of the bill to the Committee on Manufactures. This motion he made, although himself personally rather favorable to the bill, from a sense of duty as chairman of that committee which was charged with the guardianship of the manufacturing interest.

The motion was negative.

Mr. DUNN, of Indiana, moved that the following be added as a new section to the bill:

"And be it further enacted, That all persons indebted on such extended bonds may pay the same, or any part thereof."

Mr. D. supported the amendment by a speech of considerable length, in which he insisted on the justice and good policy of such a measure.

After some explanations between him and Mr. CAMBRELENG, the amendment was rejected.

The question then recurring on the engrossment of the bill, and on ordering it to a third reading, it was carried without a count: whereupon the bill was read a third time as amended, and passed.

CLAIMS UPON DEPOSITE BANKS.

The House then went into Committee of the Whole on the state of the Union, (Mr. F. O. J. SMITH, of Maine, in the chair,) and took up the bill from the Senate to adjust the remaining claims against the late deposit banks.

The bill having been read—

Mr. RICE GARLAND, of Louisiana, moved to amend it by striking out all the bill after the enacting clause and inserting a substitute, the object of which is to extend the proposed indulgence to the banks from three, six, and nine months to nine, twelve, and eighteen months.

After a brief explanation of the points in which his amendment differed from the Senate's bill, he proposed to fill the blank by inserting the word "five," so as to read "five per cent."

Mr. JOHNSON, of Louisiana, supported the amendment, and went into a statement of the present condition of the banks of Louisiana, whence he argued the propriety and necessity of granting them further time; but, in consideration of the losses they had sustained, he contended that they ought to be relieved from all payment of interest.

Mr. LYON, of Alabama, said, as one of the late deposit banks embraced by the provisions of the bill under consideration was situated in the district he represented, he would explain the transactions between that bank and the Government, by way of showing that the indulgence proposed by the amendment of the gentleman from Louisiana [Mr. GARLAND] ought to be allowed.

The branch of the State Bank of Alabama, at Mobile, had, since it was made a depository of the public money, less than four years ago, received to the credit of the Treasury upwards of seven millions of dollars, and had, without expense or loss to the Government, faithfully disbursed and paid over this large sum, with the exception of a balance of about nine hundred thousand dollars, the amount now due from the bank. More than three millions of the sum received on deposit at Mobile had, as Mr. LYON was informed, been transferred by the bank to the Northern and Eastern cities, by order of the Secretary of the Treasury, when funds at the North were, in Mobile, worth from 1 to 2 per cent. more than par. The bank, he said, had made, as it was supposed, ample provision to transfer the balance due the Government to the North, where it was understood payment of the amount would be preferred by the Treasury Department. They had purchased exchange on New York and Liverpool to a large amount, drawn upon the authority of letters of credit supposed to be perfectly good, and drawn, too, in execution of orders for the purchase of cotton. A very large amount of these bills, upwards of three millions, as he had been informed, had been dishonored and returned to the bank, without even the payment of the net proceeds of the cotton actually shipped. The bank had been compelled to look to the drawers and endorsers of these bills for payment, and to give time to the parties.

In addition to the delay in collecting the money, which must necessarily result from such a state of things, Mr. L. said it was but reasonable to suppose that some loss would ensue to the bank. He thought the Government should extend to the bank such indulgence as that institution found it necessary and proper, under the circumstances stated, to allow to its debtors.

He said the failure of this bank to pay punctually the balance due the Government had resulted from no want of good faith in its dealings. It might have discounted too liberally upon the public deposits, and he believed had done so; but the bank would, at all times, have been ready to have discharged the drafts of the Treasury, but for the sudden embarrassments which had fallen upon the whole country, and prevented the debtors of the bank from meeting punctually their engagements with it. He had before had occasion to state to the House that the amount

H. OF R.]

Florida War.

[Oct. 11, 1837.]

which had accumulated to the credit of the Government in Mobile had not been deposited in specie. The amount was principally in bank bills, and had accrued from the sale of lands for which the Government had received what he considered a liberal price—more, perhaps, in many instances, than the same land, in its unimproved state, would now sell for.

Mr. LYON said he would call to the attention of the House a fact which, in his judgment, would afford an excuse to the bank at Mobile, and, he supposed, to other deposit banks also, for discounting somewhat liberally upon the public deposits.

The late Secretary of the Treasury, in selecting the deposit banks, had advised them to afford increased facilities to commerce. He read the following extract from a circular issued by the Department to the banks:

“The deposits of the public money will enable you to afford increased facilities to commerce, and to extend your accommodation to individuals; and, as the duties which are payable to the Government arise from the business and enterprise of the merchants engaged in foreign trade, it is but reasonable that they should be preferred in the additional accommodation which the public deposits will enable your institution to give, whenever it can be done without injustice to the claims of other classes of the community.”

The Bank of Mobile had (said Mr. LYON) afforded facilities to commerce, and had extended accommodations to persons engaged in foreign trade. The directors could not, under the circumstances, have justified a refusal to discount upon the public deposits to persons in need of bank accommodations and able to secure the repayment of the money. The public deposits had, shortly before this time, been withdrawn from the Bank of the United States, and many persons engaged in business, who had before looked to the branches of that institution for accommodations, had to go elsewhere for such facilities. This was no doubt the cause of the advice given by the Secretary; and, situated as the country was at the time, no one can be surprised that the advice was pursued, even to a liberal extent, by the banks. He referred to these facts for no other reason than to show that the late deposit bank at Mobile had not acted in bad faith in failing to pay over promptly the balance due from it. All the facts and circumstances, taken together, ought, in his opinion, (said Mr. L.) to excuse the payment of interest on the balance remaining due; but, if required, interest on the amount would be paid. He thought the indulgence proposed for the payment of the balance due could not be considered unreasonable.

Mr. LYON said he felt less concern about the banks themselves than he did about those who were indebted to them. If the banks were pressed, and early payment required, the injury would fall, not upon the banks, but upon the people. If the Government should resort to coercive measures against the banks, they would, in turn, fall upon those who owed them, and, in many cases, sacrifices of property and ruin to individuals would be the consequence. He hoped the claims would be divided into easy instalments. The banks would thereby be enabled to pay them punctually, and, at the same time, afford a corresponding indulgence to their debtors. He had no objection to the security required. The Government had already the State for security for the balance due from the bank at Mobile.

Mr. L. concluded by moving to amend the amendment by striking out the clause in reference to interest.

Mr. LOOMIS, of New York, took the opposite side, inveighing against the injustice of setting the banks free from interest on their debt to the Government, while the Government itself, which their non-payment had reduced to straits, was borrowing money at six per cent., (for the

Treasury note bill allowed the Secretary to pay as high as that.) The object of the bill was not to relieve the banks themselves, which, as such, were entitled to little indulgence, but to relieve the people through them.

Mr. LOOMIS and Mr. MARTIN each presented amendments to the original bill.

Mr. POPE made some remarks in reference to the course of trade in the West, and the season of the year in which it would be the easiest for the banks to pay; and suggested a modification which should bring their term of payment in July.

Mr. ROBERTSON, now adverting to the noise and confusion which prevailed in the House, and which had prevented him and those in his neighborhood from hearing the amendments, or the remarks by which they had been advocated, moved that the committee rise.

The motion prevailed—Ayes 74, noes 67. So the committee rose and reported progress.

Mr. REED, of Massachusetts, moved an adjournment.

Mr. CAMBRELENG demanded the yeas and nays on that motion; they were ordered, and taken, and stood as follows: Yeas 98, nays 70. So the House adjourned.

WEDNESDAY, OCTOBER 11.

FLORIDA WAR.

The House proceeded to the unfinished business of the morning hour, which was the consideration of the following resolution, submitted by Mr. Wise on the 19th of September:

“Resolved, That a select committee be appointed by ballot to inquire into the cause of the Florida war, and into the causes of the delays and failures, and the expenditures which have attended the prosecution of that war, and into the manner of its conduct, and the facts of its history generally; that the said committee have power to send for persons and papers, and that it have power to sit in the recess, and that it make report to the next session of Congress.”

Mr. GLASCOCK had moved to amend the foregoing resolution, by striking all out after the word “resolved,” and insert the following:

“That a select committee be appointed to inquire into the cause of the Florida war, and the causes of the extraordinary delays and failures, and the expenditures which have attended the prosecution of the same, and all the facts connected with its history generally; and that said committee have power to send for persons and papers.”

The question immediately pending was the motion of Mr. HOWARD to strike out the words “that a select committee be appointed,” and insert “that the Committee on Military Affairs be instructed.”

Mr. McKAY, who was entitled to the floor, addressed the House at some length in opposition to the adoption of the resolution. He opposed the raising of this select committee, because the same subject was now under investigation in various ways. It had been referred to the President of the United States, who had caused an inquiry to be instituted, and had made a report in part, and he understood would probably report in full at the next session of Congress. Besides this, the chairman of the Committee on Indian Affairs [Mr. BELL] had moved to have this subject referred to that committee, and after a lengthy, and no doubt arduous investigation, the papers had been reported back to the House without coming to any conclusion thereon. He presumed, however, that, at the commencement of the regular session, the chairman of that committee would move to have the subject again referred to that committee, and proceed with the investigation. He could not, therefore, see the necessity of raising this select committee, because it was before the President of the United States, who had appointed commissioners to investigate the matter, and the gentleman from Massachusetts [Mr. ADAMS] had

Oct. 11, 1837.]

Fees on Bonds—Sub-Treasury Bill.

[H. OF R.]

admitted that they had performed their duty faithfully, so far as they went, and laid before the House information which, to use his own expression, had made the blood tingle in his veins. They will doubtless lay the whole proceedings before the House at the next session of Congress. In relation to the causes of delays and failures of the campaigns, it will be recollected that an inquiry was instituted by the President at Frederick, at which all the officers engaged in the first campaign (Scott, Gaines, and Clinch) were fully examined, and the court came to the conclusion that the failures and delays of the campaigns were in consequence of the insalubrity of the climate, the impregnability of the swamps, and the absence of all knowledge of the topography of the country by the commanding generals, and the difficulty in transporting supplies for the army from one point to another. Here, then, at this tribunal, all the causes of the failures of the campaigns conducted by Generals Gaines and Scott were examined into; and it certainly could not be designed by the House to institute an inquiry in relation to the conduct of the present commander in Florida, (General Jesup,) at a time when he was just preparing and organizing his forces for another campaign. It would certainly be improper for the House to interfere with this campaign before there was an opportunity of doing any thing with it. It would be interfering with the legitimate duties of the Executive to send an investigating committee, with power to send for persons and papers, into Florida; and, by so doing, the whole of the benefits to be derived from the approaching campaign might be set aside. Mr. McK. next referred to the remarks of the gentleman from Tennessee, [Mr. BELL,] who had stated that the probable causes of failures of the campaigns in Florida had arisen from the deficiency in the number of officers connected with the army in Florida. He admitted that there might be some justice in this remark, but said the subject had already attracted the attention of the President of the United States, and referred to an order issued as early as October last, directing all officers of the army on detached service to join their regiments and companies, in which order the President had said that this state of things must no longer exist. If any notice was to be taken of this matter, however, by this House, it was the legitimate business of the Committee on Military Affairs to take charge of it, and he hoped they would take the matter under consideration. In relation to the subject of expenditures, he admitted that they had been very large, amounting, he believed, to about seven millions; but he could see no necessity of appointing a select committee to take charge of this subject, when we have committees appointed under the rules whose special business it was to take charge of these subjects. He alluded to the Committees on the Expenditures of the Executive Departments, all of which committees he believed were composed of majorities opposed to the administration. The Committee on the Expenditures of the War Department should take this subject into consideration, and report upon it. Mr. McK. concluded by moving to postpone the further consideration of the resolution until the first Monday in December next.

Mr. WILLIAMS, of North Carolina, opposed the motion. If there was to be any investigation at all, it was as necessary and as practicable now as it could be ever. He hoped the committee would be at once appointed, and pursue the inquiries during the recess, so as to report, in whole, or in part, at the next session. He was opposed to the reference of investigations of alleged extraordinary abuses to standing committees, and replied to the remarks of Mr. HOWARD, of Maryland, who had made the pending motion to refer the subject under consideration to the Committee on Military Affairs.

Mr. ADAMS. The question is an entire new question. It is not now a question as to what committee it shall be referred to, but whether it shall now have the go-by altogether.

er. The whole of the argument of the gentleman went to the point that it is unnecessary for this House to trouble itself at all about the matter, and would be just as strong an argument against the investigation in December as now. Mr. A. alluded again to the investigation made under the direction of Congress by the late Executive, and said that the horrible disclosures of that report convinced him still more strongly than ever of the necessity of the proposed inquiry. He replied to the suggestions of Mr. McKAY, with regard to the propositions of various committees, as the proper referees of the subject before the House. Among the rest, the Committee on the Expenditures of the War Department had been recommended by that gentleman. Mr. A. reminded the House that the committees on expenditures were sinecures, without pay, and without duty also. A chairman of one of them [Mr. HAWES] had told the House that he had never called the committee together, and did not even know his colleagues! Mr. A. had intended to offer a resolution to rescind the rule requiring that those committees should be appointed.

Mr. A. replied, further, to the argument of Mr. McKAY, that the constitution of the Committee on Military Affairs was the same in previous administrations as now. That was no good reason why it should still continue to be so, Mr. A. contended.

In allusion to there being on this committee eight members from the South, and only one from the Northern section of the country, Mr. A. said that the reason must be that the people of the North had no interest in the subjects referrible to it. As to the interest of all the New England States, as well as of those of New York, New Jersey, Delaware, and Maryland, in the benefit that would result to them from the enormous expenditures of public money in the prosecution of the Florida campaigns, Mr. A. admitted it was very little indeed. But they had a very deep interest in the amount of those expenditures, at all events. Were the army disbanded to-morrow, it would be money in their pockets; and he looked upon this fact as another exemplification of that profound philosophical theory of his friend from South Carolina, [Mr. THOMSON,] who had said that the money of this Government flowed naturally towards the North. Since he had made these remarks, that gentleman had published his speech, and he had now turned the globe half round. The stream now flowed to the East, and not the North. Well, sir, be it then "the East!"

Mr. CAMBRELENG rose and interrupted Mr. ADAMS here; remarking that the gentleman seemed to be concluding to no point; and, calling for the orders of the day,

Mr. ADAMS said he was ready to yield the floor, and did so.

BILL REGULATING FEES ON BONDS.

The District Attorneys' fee bill on bonds had three readings, as it came from the Senate, and was passed.

SUB-TREASURY BILL.

On motion of Mr. CAMBRELENG, the House resolved itself into a Committee of the Whole, (Mr. SMITH, of Maine, being in the chair.)

The bill as to the settlement of the deposit bank accounts being the first bill announced as before the committee,

Mr. PICKENS said that he considered himself bound, by the deep interest he felt in the sub-Treasury bill, to move that it be taken up at that time. And on that motion he demanded a count by tellers, which being sustained, (after some conversation as to the regularity of the proceeding,) the motion prevailed: Yeas 105, nays 35.

Mr. JAMES GARLAND's amendment to the bill being read, by request of a member,

Mr. HOFFMAN rose and said, he would not offer an apology to the House for addressing it upon a subject so fraught with the highest good or the deepest evil to his own

H. OF R.]

Sub-Treasury Bill.

[Oct. 11, 1837.]

constituents, as that now before it. He had been aware when he first took his seat in that body, that he would have to contend against great power and patronage. There had been a time in his political life when he thought the arm of this Government needed to be strong to regulate some of the consequences of the rapid increase, in extent and resources, of the country. The usurpations of the Executive, which he had witnessed for the last few years, had taught him a different lesson. He now found the Government too strong for the people; and that some of the memorable predictions of the gentleman from South Carolina [Mr. PICKENS] and his friends, in regard to the influence of Executive dictation and usurpation, were in a fair way to be realized. He had come to his seat prepared to combat that usurpation, and to contend for the lost rights of the States; and he thought he should find the bold, manly, and chivalrous arm of the Southron bared to aid him in that contest. What had been his surprise to find that very arm on which he had relied for such aid, raised in the van of the attack he had to resist! That gentleman [Mr. PICKENS] had said that he had renounced no opinions he had entertained before, and yet he is lending his aid in the advancement of a scheme which is to unite in one hand the purse and the sword of this Government, and to make, by his adhesion and support, the bill before the committee too strong for the opposition of those with whom he had been used to act in concert.

Commenting on the argument of Mr. PICKENS as to the character and influence of a national bank, Mr. H. demanded of that gentleman what would be the influence of an Executive, in any action against the rights of the States, who could wield so formidable a weapon against those rights, as all the revenues of this Government? And upon this subject he enlarged extensively.

As to what had fallen from that gentleman in his remarks of yesterday, in relation to the North and South, as relatively placed, in interest and in policy, with regard to each other, Mr. H. was very eloquent and forcible. That gentleman [Mr. PICKENS] had threatened a servile war as the consequence of a struggle between those interests, and had promised to preach insurrection to the laborers of the North, as an offset to similar alleged appeals to the South. That gentleman (said Mr. H.) is mistaken if he thinks that there is any parity of reasoning as to the laborers of the North, or the slaves of the South. They were not, as was so boldly argued, under the domination or control of the capitalists. They were freemen, conscious of their rights and privileges. By the laboring classes of the North the banner of the Revolution had been unfurled, and the fields of Lexington and Bunker Hill been won. By those classes there, even in the cities so much vilified and denounced, were the men who sit in that hall sent thither; and they were alive to all the rights of freemen, which they sent their representatives there to defend and advocate. Mr. H. regretted that this ball of discord had been set rolling there; that the Texas question, and the slavery question, had been started on that floor to frighten the House "from its propriety." He was not unfriendly to the South. Far from it. Many of his early and most friendly associates were connected with that section. He should be ever found by the side of the people of that section, in resisting any invasion of their rights. But still he had a paramount duty to perform—to vindicate from attack, and to shield from reproach, the people of his own part of the country.

Mr. HOFFMAN paid a deserved compliment to the bold and frank manner in which Mr. PICKENS had come forward to the aid of the administration in the support of this bill. That gentleman had not crept into the ranks of his former enemies. He had, like Tullius Aufidius, in Roman history, boldly told his new allies of his former battles against them; he had, almost in bravado, indeed, spread

before them the records of his consistency as their uncompromising opponent. They had taken him into their employ, and, being in the ranks of the enemy, he (Mr. H.) must defend his countrymen, though it be Coriolanus who heads the Volscians against Rome!

The gentleman (continued Mr. H.) is proud of the name of locofoco. Sir, that is a matter of taste.

[Mr. PICKENS explained. He had said, in allusion to a remark made on that floor some days since by an honorable member, that he was willing to be such a locofoco as John Milton was, if he were, indeed, one. He had not intended to be understood as declaring himself a locofoco, under the ordinary acceptance of that term.]

Mr. HOFFMAN said that he certainly did not mean to misrepresent the gentleman from South Carolina. He hardly understood what the term in question signified. But he is not surprised to hear the gentleman declare that he is not one of the followers of him who had once sworn that his "mouth should be the Parliament of England," and that "his horse should graze in Cheapside."* But he had eulogized Milton as his exemplar. For that name, he, too, (Mr. H.,) had great reverence. He remembered well the noble defence of John Milton of the subject; and yet this very man was choleric, hasty, and often rash in his opinions. There was (said Mr. H.) a striking coincidence, which he could not but allude to, in the history of Milton, as applicable to our own times. The same intrepid patriot who, in his zeal for liberty, had aided in bringing his monarch to the block, afterwards threw himself into the arms of the Protector, and supported the throne which was reared on the downfall of Charles. Here Mr. H. drew a parallel between the succession of the present to the late Executive, and that of the Protector to the King, and between the conduct of the gentleman from South Carolina and that of the great statesman he had alluded to, under the parallel change of circumstances.

Mr. H. was opposed to the sub-Treasury bill, because it violated the constitution of the country—if not its plain and palpable literal language, its spirit, which is its life-blood, and which alone recommends it to the people of the nation. That spirit is the principle that the people shall govern themselves. The mode of choosing public officers, the appointment of those officers, duties, &c., are but the trappings of the constitution. But this principle, which is its spirit, enters into the labors of the artisan, and the researches of the scholar. It should be the atmosphere by which we should be sustained and strengthened, and from which we should receive buoyancy and vigor to perform the duties of good citizens and patriots.

The connexion between the Government and the people of this Union, Mr. H. looked upon as a great partnership. There should be a common credit or discredit, a common honor or dishonor, a common interest in all things between them. The distress, if there be any, of the Government should be reflected upon the people. The arm of power should not be wielded over the governed, to be looked up to as paramount. The people should not, while struggling amidst discontent, embarrassment, and perplexity, be insulted by the spectacle of their Government walking free, unfettered, unembarrassed, and in prosperity.

Mr. H. remarked that it had been said that this was no new proposition; that England and France had furnished examples of similar schemes; and not long since (though perhaps not parliamentary to allude particularly to it on that floor) the great Mormon of this golden bible (Mr. BENNETT, of the Senate) had instanced Rome also as furnishing a similar example. In reply to these allusions, Mr. H. adverted to the difference between the institutions of England and France and those of our own country, and asked, why not model our whole Government upon those examples? Why not establish the "divine right of kings"

* Jack Cade. See 2d part Henry VI, act iv.

Oct. 11, 1837.]

Sub-Treasury Bill.

[H. OF R.]

principle throughout; create a standing army, authorize a system of passports, and all the rest! And Rome, too; Rome had her *quæstors*, or public treasurers! Yes, (said Mr. H.,) she had; and they "grew by what they fed on." They followed the Roman eagles to conquest, and, in every situation, were ever the links between the worn-down people and the overbearing Government.

Mr. H. alluded to the provisions of the bill before the committee. The public money is to be given by the Executive to the different disbursing officers. Defalcation would ensue delatation, as the consequence of this provision. Besides the direct pilfering and frauds of the officers who will have the charge of the public revenues, there would be the brawling sycophant, and the unscrupulous partisan, whose very bread would depend upon his subserviency to Executive dictation. He did not allude more to one administration than to another. This would ever be the case, were this bill to become a law. In case of an election depending in any State, or district, or town, there would be a call on the partisan officeholder's exertions. On one side would be his honesty, and on the other his office; and he would console himself, while making the sacrifice of the former to the latter, that the bread of his wife and children depended upon it. And who will call the defaulter in such a case to account? The Executive? This would never be; and, as to the Congress! That, too, was powerless. The proceedings of the last Congress, under similar circumstances to those described, afforded a sufficient proof that this was so.

Here Mr. H. alluded to the novel and monstrous doctrine which had been broached under the late administration, that every officer of the Government was accountable to the Executive alone; and he only to the impeaching power of Congress; and insisted that no people were ever strong enough to resist the union of the purse and sword of Government.

If the bill passes, he contended the money of the people would not be safe; it would be less safe than in banks, where the stockholders' interests require the selection of careful directors and officers, and where there were many hands, and not a single hand, to guard those interests. And to this point Mr. H. read from the Congressional Debates of 1835 an opinion of one who he wished could take a part in that debate, and sustain the views he had once expressed, and which he would now quote—views which he was confident the high regard for his opinions, entertained by the members of that House, would lead them to regard with great respect; he alluded to Mr. SPEAKER POLK, who, in the course of a debate in 1835, had said that "corporations were safer than any individual could be, as the depository of public moneys," because corporations were bound together by the strongest ties of interest, with an immense aggregate of wealth, which furnished a safe security, &c.

But, (said Mr. H.,) who can tell but that, if that gentleman could descend from the chair, and address the House on this bill now, he would not also be found to have undergone some change of sentiment since the time alluded to? This would not be more surprising than that one of that gentleman's friends, also on that floor, should have changed his views on the subject within the same term of time. In a debate upon a resolution offered in 1835 to that body by Mr. GAMBLE, as to the best mode of keeping the public moneys, Mr. CAMBRELENG was reported in the Congressional Debates to have uttered the opinion that the sub-Treasury scheme would find no friends there, and that it was a proposition too odious and monstrous to be entertained.

[Mr. CAMBRELENG read, in answer to this allusion, an extract from his own prepared report of the speech adverted to, to the effect that he had expressed the hope that the time would come when banks, as fiscal agents of the Government, could be dispensed with altogether.]

Mr. H. remarked that the gentleman had *voted* against the scheme at the time, and was reported, in the book of debates, before he had had time to prepare carefully his own report of the speech he had made, to have said that such a proposition could find no friends in that body. But still (said Mr. H.) I know that opinions often change, like the gourd of Jonah, in a single night.

Mr. H. here alluded to Mr. FOSTER's eulogy on the safety-fund system, which he admitted to be appropriate and deserved. And he eloquently detailed the consequences of that system to the prosperity of the State—the springing up of her western cities almost at the very sound of the woodman's axe—the stretching out of long lines of railroads, those avenues of communication and social intercourse with the different parts of the country. The North and East had made the West, and the West had poured back her gratitude in increasing contributions to the wealth and prosperity of the State:—and this was the working of the safety-fund system. It had worked well: and now, he would ask, what was the reverse in the country? The President now says that over-speculation is the cause of our present troubles. The philosopher whose theory it was that the earth rested on a tortoise, was puzzled to find a place for the tortoise. And what was the true cause of this distress and embarrassment? Mr. H. said that it was the war on the United States Bank by the late Executive. The first germ of all that Executive power which now oppresses us was the withdrawal of the deposits. That was the fountain whence all these bitter waters flowed. The hopes and wishes of the people were involved in that institution. The boat was proceeding on its way, in a swift but equable course, when there had suddenly ensued a crash, which was the prelude to a bubbling cry of agony and despair from the passengers and crew. The balance-wheel had been removed by the ignorance or the wantonness of the engineer.

Mr. H. had never been the friend or the enemy of the United States Bank, nor of the local banks. He had not worshipped Pompey, in all his pride of power and place, when armies had sprung up at the stamp of his foot; nor had he ever bowed the knee to his great rival. Yet would he not withhold from the latter the justice which he should extend towards him; as

"——— in his mantle muffling up his face,
Even at the base of Pompey's statue,
Which all the while ran blood, great Cæsar fell!
And now lies there,
With none so poor to do him reverence!"

After some discussion of the conduct pursued by the State deposite banks, which he contended had, in the majority of instances, been honorable and upright, he insisted that it was inconsistent for the friends of the administration to decry and destroy them. They had eaten of the fruit, and should not now cut down the tree. The United States Bank had been ruined to aggrandize the State banks: not in accordance, as had been asserted, with the people's will; the people would never have destroyed that institution; but as a sacrifice to the popularity of the late Executive. It was withered by the resplendent "glory" from the brow of the victor of New Orleans. It was destroyed, that the "weeds," as Mr. PRICKENS had called the State banks, might grow and flourish.

Mr. H. contended that there had been a time when those "weeds" were shallow rooted, and might have been easily eradicated. He then went on to show that Mr. Van Buren originated and rose into power by the aid of the safety-fund system. That it still continued its influence, politically, and procured a Van Buren majority there of two-thirds: and that Mr. Van Buren was now kicking away the ladder by which he had mounted, not even saying to those who had been wondering at his ascent with up-turned eyes, "Stand from under!" This part of the speech was very minute in its details, and excited a deep interest.

H. of R.]

Sub-Treasury Bill.

[Oct. 11, 1837.]

Mr. H. said the bill before the committee had been christened "a divorce bill." It was no such thing. It was a bill authorizing "a fatal marriage"—fatal to the constitution, and to the liberties and happiness of the people. It was not a divorce bill. The "divorce" had already taken place, without cause or right, by the act of one of the parties, and it was the nuptial benediction or another alliance that the House were now called on to pronounce.

History furnishes a parallel. He who was

"—but yesterday a King,
And armed with Kings to strive,"

Napoleon Bonaparte, loved Josephine. The conqueror of Italy had laid his laurels at her feet, and whispered in her ear his aspirations of love as well as of ambition. By her were his troubles assuaged, and she was ever his good genius, pointing him the path to glory and renown, and with her, as his companion and adviser, he found himself upon the throne of Charlemagne. But no sooner did the diadem glitter upon his brow, than she, who had been ever true to him, was cast off for the furtherance of schemes of policy. He was thus, but he would be safely and ever thus, and he procured from a weak Senate a divorce from her, and wedded Louise of Austria, who mounted his throne only to see his crown snatched from his brow! Sir, there may be a moral even in the lesson read to our own Government from the rock of St. Helena.

Mr. H. closed his remarks by warning gentlemen of the consequences of passing a bill so fraught with danger as that under consideration. He said, "the bow is bent, make from the shaft!" unless by a bold effort you can wrest the bow from the hands of the archer! Rise from the mire of party! Sustain the administration in every thing in which it is just and right, but resist it when its measures are hostile to the best and most enduring interests of the people. Do not aid in that unwholy alliance of the purse with the sword in the hand of power: and

"—never more
Let the great interests of the State depend
Upon the thousand chances that may sway
A piece of human frailty!"

After Mr. HOFFMAN concluded—

Mr. HUNTER, of Virginia, addressed the chair as follows:

Mr. Speaker: I arise under the painful sense that I am asking almost too much of this committee, when I throw myself upon its indulgence whilst I express my views in relation to the subject before us. But our present position is highly responsible; the consequences of our action in the existing crisis may be lasting to the country, and I wish to be heard in vindication of the principles which will govern my course. We stand, sir, in the midst of a great commercial revolution; we have just witnessed an explosion in the credit system, through which the stream of capital circulates and dispenses its mighty agency to the country. Old channels have been abandoned, new ones are being formed; and now, sir, when every institution of the land is trembling under the shock, and our most important interests are sympathizing with the distress in the circulating system of the body politic, the eyes of the people are turned in anxious solicitude upon our course.

They have suffered with exemplary patience under calamities which would have goaded almost any other people to tumult and bloodshed; and they have even forbore to speak forth their grievances, as if fearful that the clamor might disturb the presence of mind of those whose peculiar task it was to work the ship of state off the lee shore upon which it was driving—"Nec tumultus, nec quies;" but there is that state of deep and silent suspense which more forcibly than by words seems to say that, upon this occasion, "our country expects every man to do his duty." I feel, sir, a most painful sense of the responsibility of my position. On the one hand, I know that he cannot be justified on the plea of ignorance who lightly tampers with the

important interests now concerned in our action; and, on the other, if personal or party considerations were to deter me from doing whatever may be done for the relief of the country, I feel that my name would deserve to be pursued through all posterity with execrations. I might, perhaps, escape responsibility by declaring that, as I had nothing to do in producing the present distress, so I was bound to do nothing towards restoring things to a sounder condition. Sir, I scorn the excuse. I think I see something which may be done for the good of the country, and I am willing to share the responsibility with those who will attempt it. In taking my course I form no new connexions, I make no alliances; I act as I was sent here to act. I legislate not for party, but for the good of our common country. I tread all personal and party considerations into the dust, when they present themselves in competition with the most important interests of the people.

Mr. Chairman, if I can free this Government from a corrupting connexion, if I can aid in so moulding its action as to remove the causes by which it has disturbed the natural level of our circulating capital, and advance one more step towards that perfect freedom which American trade ought to enjoy, I shall be content, be my own fate what it may; but if I should unfortunately work harm where I mean good, I shall only regret that others will suffer under the consequences of my mistake. But, sir, I turn from these considerations to the great question before us. How can we exercise the powers given us by the constitution, and remould the fiscal action of the Government, so as to relieve the country of its sufferings, and prevent their recurrence again? It has been well said that debt is the evil under which we are suffering. The real balance of trade has been against us; the foreign creditor demanded the adjustment of this balance in specie; and the currency system of the country, having been inflated beyond its just dimensions, was unable to meet the demand for a conversion so sudden. What, then, can be done, sir, to relieve the people from this pressure? There are but two modes of relief from debt; the one consists in its payment, and the other palliates the evil by obtaining time, so as to divide between several years the burden which is too heavy for one. It is obvious that, as a Government, we have neither the right nor the means of paying the debt. Governments may spend money, but they never make it; and their attempts at political alchemy have always resulted, like the vain search after the philosopher's stone, in more expense than profit.

Has the Government the means of extending the credit upon the debt due abroad? If this could be done, we should undoubtedly find immediate relief. Instances have occurred in the history of English commerce, and in some of our own States, in which Government has effected this purpose by interposing its own credit between the domestic debtor and the foreign creditor. There are times when a people may be unable, without great suffering, to meet a sudden call for the balance of trade which exists against them. But it can scarcely happen that they should not be ultimately able to meet the call, if time were given. On these occasions, the foreign creditor presses, because he cannot well know the actual responsibility of individuals. In such situations, the English Government has exchanged its own credit, which was undoubted, for that of the domestic creditor, who was thus enabled to make his remittances abroad in undoubted securities. We have no power here to enter into any such trade; and although the exercise of this power might occasionally be useful, yet it is too liable to abuse to have been wisely entrusted to us. The direct fiscal action of Government might have been rendered conducive to this end, and eminently beneficial. If we had issued certificates of loan upon time for the money necessary for Government, I believe, sir, that the merchant, instead of exporting his specie, would have given

Oct. 11, 1837.]

Sub-Treasury Bill.

[H. OF R.]

it to us in exchange for this paper, which would have served a better purpose abroad. In this way we should have done much for the relief of the country; we should have avoided all danger of a depreciated paper currency issued by Government, and we should have been clearly within the limits of our constitutional power. But the occasion has passed away; we have passed a bill for Treasury notes; and when I connect the discretion, as to interest, confided to the Secretary, under the bill, with his known opinions on that subject, I am bound to conclude that they will be issued and designed as currency.

But, Mr. Chairman, that subject is not now before us, and I will not detain the committee with its further consideration.

I shall pause but a moment to consider the expedient of a United States bank, which has been suggested by some as affording the means of producing immediate relief. If this were so, the suggestion would be useless to those who, like myself, believe that it is demonstrable, and that it has often been demonstrated, that we have no power under the constitution to charter such a bank. But, for one, I do not believe that the expected effect would flow from such an institution. It would enter the field as a rival of the State institutions, and could only sustain the competition by either debasing its currency to the level of the State institutions, or by elevating their circulation to the sounder level which it might establish for itself. The first operation would prolong the present evils; and the other, if attempted by any but the most gradual means, would break the State banks, and aggravate the distress of the community. But I pass from the consideration of the means of immediate relief, real or imaginary, which are not within our reach, to those which may be. And here I beg leave to pause upon our fiscal policy, and its incidental effects upon currency and trade. If it has introduced causes which disturb the natural level of circulating capital, and furnished a false excitement to currency and credit, that policy ought to be changed. Public convenience may require that the change should be gradual, but important interests demand that it shall be ultimately made. After much consideration, I have come to the conclusion that the present and past commercial distresses have been mainly produced by the American banking system; a system, sir, which, by the law of its creation, hurries to its downfall as the necessary result of its own action; and this catastrophe is only hastened by the excitement of the connexion between it and the Government.

It has been said, Mr. Chairman, by McCulloch, one of the ablest political economists of the present day, that our system of banking is the worst in the world. I will not stop now to institute that comparison, or to examine his conclusion; but I shall demonstrate that its natural tendencies are to produce a state of things like the present, if I succeed in showing, first, that it causes a false distribution of capital, and, secondly, that it creates a diseased action in the credit and currency systems, by forming an improper connexion between them.

According to our banking policy, these institutions have the exclusive right of making a paper currency; and their paper only is received in payment of public dues. To these exclusive privileges they unite the power of drawing interest from an amount greatly exceeding their capitals. Take, in connexion with this, the usury laws, which exist, I believe, in all of the States of the Union, and you have the result that capital, loaned through bank agency, will draw an interest greatly exceeding that which any other capitalist can derive from money lent. The loanable capital of the country will of course seek that investment, and fill those channels of circulation before it reaches any other; the consequences of the artificial direction thus given to capital, is its false distribution between the different sections of that country, and the different classes of society in that country, in which banks have those exclu-

sive privileges. The loanable capital will seek the places in which these institutions exist, until it has exhausted the demand for it there, before it reaches those portions of the same country in which banks do not exist. It will do so, because, through bank agency, it can derive more than the legal interest within the sphere of its operations, whilst beyond that sphere its profits are confined to that interest. The system establishes, in effect, a bounty upon capital lent to the mercantile, and those classes whose labor brings a speedy return, at the expense of the agriculturists, whose returns are slow. Loans for thirty or sixty days are obviously more profitable than those for longer periods. It is the difference between simple and compound interest. The merchant, therefore, whose outlay is speedily returned to him, can thus afford to deal in these short credits, whilst the agriculturist, whose returns are generally annual, finds himself forced to pay compound, for what the merchant returns only simple interest. The effect of this is so much felt, although its causes are perhaps not generally understood, that in my State it is received almost as an adage, that no farmer can afford to go into bank. There is yet another mode, sir, in which the system produces a false distribution of capital. The available profits of these institutions, within the limits presented to them, are so great that they may become credit insurance offices. The directors, under these extraordinary advantages, may run the risk of insuring a favorite's credit when it is doubtful, when he may have no real resources, and thus the fair trader will be injured by the reckless and often ruinous competition of these men who have nothing in fact to lose. This, sir, will always happen when a bank has supplied the demands of good customers without reaching the limits of circulation prescribed to them. The temptation to run this risk is so strong that they too often yield to it.

Mr. Chairman, it is no answer to these objections, to say that every section of the country may be supplied with its due proportion of banking capital. The country is supplied with banks through its Legislature, and no Government has the means of ascertaining the relative wants of different sections in this respect. But, sir, if the Government could ascertain the relative proportions in which the different sections should be supplied to make the distribution just, it would be unable to make that distribution. A supply of all the capital wanted for loan in any country, through the medium of banks like ours, would expand the credit system so rapidly, from causes which I shall endeavor to show, as to produce revulsions which would present a scene of wide-spread ruin and disaster. A fact which is so impressed upon the public mind, that every Legislature, not perfectly wild in its movements, seems to have endeavored to restrain the system within the supposed wants of the country, rather than make the attempt to supply the value demanded. If I have been successful so far, Mr. Chairman, I have shown that this system is injurious in giving a false direction to capital; which, if left to itself, would seek those investments which had most natural advantages, and which, therefore, would have paid the highest profits.

I come now, then, to the false and artificial laws of expansion and contraction, which are introduced into our currency and credit, (as I maintain,) by the banking system as it exists here. Instead of leaving currency and credit to the regulation of the great laws ordained by nature for that purpose, instead of leaving them to that self-regulating power which would adapt them to the changing condition of society, and harmonize them with each other, our Governments vainly practise their political alchemy, to the injury, and sometimes to the destruction of both. At their very creation, we arm these corporations with incompatible functions. We unite in them the money-making and the money-lending powers; and what, sir, are the inevitable consequences? Why they make as much

H. OF R.]

Sub-Treasury Bill.

[Oct. 11, 1837.]

money as possible, that they may have the more to lend. They have a direct interest in issuing as much as possible, and they always do it. When their capitals are loaned out, they cannot add a dollar to the credit of the country, without making a like addition to the currency. The latter, under this system, is swelled to an undue proportion, and when once it is beyond its level, its overflow is inevitable. Debase it in the least degree, and its downward tendency is ever increasing. The moment you increase, in this way, the nominal or money price of commodities, the catastrophe is unavoidable. The merchant who deals annually in \$10,000 of bank credit, when wheat was \$1 per bushel, will require \$20,000 of the like credit to deal in the same quantity of grain. The banks which supplied the demand for credit, when wheat was at one dollar, are unable to meet that demand, when it is at double its former price. The cry is, therefore, "more banks," and more paper money is the consequence, until the proportion between the currency and the material wealth of that country is greater than in other parts of the world. If the real balance of trade then turns for a moment against us, a great commercial catastrophe occurs. And even if this should not be the case, the trade in our currency becomes more profitable than that in our commodities. This currency promises to be convertible into specie, which is of uniform value everywhere. The constitution of this country requires that it should be so convertible, and when the paper currency is purchased with commodities, the holder seeks a redemption of the pledge to pay in specie.

Mr. Chairman, I refer to that period in the English history, when its paper currency was so inflated as to furnish to a foreign enemy the means of a direct attack upon its credit system. It is known that Claviere, whilst the Brissotine faction prevailed in France, bought up bills with the direct purpose of presenting them for specie, and breaking the Bank of England; a scheme which threatened so much of mischief as to have furnished the secret cause (as many believe) of the suspension of specie payments by that bank in 1793; a measure which is said to have been advised by the ministry itself. I am greatly mistaken, sir, if this very trade in our currency has not been one of the leading causes of our present distress. But I will not enter into an inquiry which would lead through so wide a field of speculation. I have thus endeavored to show, sir, how this artificial connexion between credit and currency causes them to perform that perpetual cycle of contraction and expansion from which our country has suffered so much and so often. It ought not to surprise us then if these vortices in our credit system, like those of the wild theorist of antiquity, should produce strange combinations and unexpected results. The epicurean philosopher accounted for the existence of the world, by supposing it to result from the fortuitous concurrence of atoms; and we, not at all wiser, have attempted to build up a fabric of credit upon a revolving foundation.

I have said, Mr. Chairman, that the process which I have just described is the result of an unnatural connexion between the credit and currency systems. It may be asked, in what respect is this connexion unnatural? Why, sir, in this: we make the currency expand with the credit of the country, when in truth, although credit must expand when currency is increased, yet it may increase when currency remains the same. For instance, if we were suddenly to double the amount of money in the world, the same real value in credit must be doubled also in its nominal amount. But if the currency remained the same, new resources discovered in one country, making the employment of capital more profitable there, might readily draw a greater proportion of currency, as a measure of value, than circulated there before the discovery. Instead, then, of making the currency and credit systems the means of mutual expansion, they ought to be left separate.

When each is true in the discharge of its own functions, they vary according to different laws and upon different principles. Let us look for a moment to the functions of each separately, for the purpose of ascertaining the true laws of their variation. And here I first inquire, what is currency? It is that nominal and floating standard, by which mankind have consented to measure the value of their commodities, and to regulate their exchanges. To discharge these functions, it must first be durable, so as not to be consumed in the use; secondly, it must be portable, so as to be transferred conveniently from place to place, as the uses of exchange may require; and, thirdly, it must be uniform as a measure—by which I mean that the proportion between the currency and the material wealth of all countries should be the same; and, to be a perfect measure of value, this proportion should not only be invariable in all places, but in all time, from age to age. The last desideratum, as to uniformity from time to time, has never been supplied in practice or even suggested in theory; but the first requisites are to be found but in one medium—I mean the precious metals. These, sir, are highly durable, are portable, and if not obstructed in their flow by artificial regulations, which disturb their level, their proportion to material wealth will be the same in every country, because the supply would be in proportion to the demand, and as there would be most demand for them where there was most material wealth, so the supply would also be greatest in those places. It is also a manifest requisite in currency, that it should exist in sufficient quantities to be available to all who have a use for it, and doubts have been expressed as to the existence of enough of the precious metals for the uses of money. But these I have always thought unfounded. It is obvious that, from time to time, even if the quantity remained the same, it would appreciate in value so gradually as not to affect the mass of contracts which are for short dates, by its change as a measure of value. And if the relation of debtor and creditor were not seriously affected by the change, it would be as convenient to use a half ounce of silver in the dollar as one ounce. This change would of itself present the means of doubling the currency. But if we put this out of the question, we have the facts that the quantity of the precious metals now bestowed on ornamental uses in Europe and America, is supposed to exceed the gold and silver coinage of those countries by more than a fourth, and that the mines are constantly pouring in new supplies, which are capable of still further increase. Take these facts into consideration, and there is every reason to believe that the supply of these metals would be adequate to our purposes, if Governments would abandon their contrivances for furnishing a paper money currency. The general tendency of the metallic currency, through a series of ages, has been to increase somewhat faster than the material wealth of the world, so that experience would here seem to support me, independently of theory. This very circumstance has sometimes operated to affect seriously those contracts which embrace a long period of time in their execution, as is the case in some of the English leases. But this change has been so gradual, that the great mass of contracts, which were for a shorter time, have been adjusted by this measure of value without serious inconvenience. If any improvement upon this metallic currency has been suggested in modern times, it is perhaps to be found in some such expedient as that of the Bank of Amsterdam; a system which, upon an actual deposit of specie, issues a like amount of paper, for the actual return of which specie, upon the demand of the bearer of the paper, the faith of the State is pledged, or some security, equally undoubted, is given. The advantage of this circulation is, that it varies precisely with gold and silver as a standard of value; that it saves the loss by wear of these metals, and renders them in effect as portable as paper.

Oct. 11, 1837.]

Sub-Treasury Bill.

[H. OF R.]

If the State Governments will have a paper currency, this is undoubtedly the safest mode in which they can put it forth. But a paper currency put forth by Government on any other principle, will always have the unfortunate effect of continually changing the measure of value by which contracts are to be adjusted. Different Governments adopt different rules of issue. The proportion of paper currency to material wealth is different in each. A man contracts, expecting to deliver by one standard, and owing to its change is forced to deliver by another. He receives, perhaps, in ounces, and is forced to return in pounds. This injurious change in the relations between debtor and creditor leads to disasters and sufferings so often witnessed that I need not depict them. Other Governments have means of palliating the evils of this sudden change in the measure of value, not within our reach. When a demand is made for a sudden adjustment in specie, of contracts formed under the expectation that they are to be redeemed in paper, these Governments can, and always do, interfere to prevent this change in the relations between debtor and creditor. They make the paper a legal tender between man and man. Indeed, the English Government seems to be well aware of the necessity of making paper currency a tender, after it is once issued; it sees so clearly that contracts will always be made under the expectation of redeeming them in this paper, and that it would be impossible to force their adjustment in specie, that it has made the paper of the Bank of England a legal tender by a standing law of the land. Here we can resort to no such expedient. Nothing but gold and silver can be made a legal tender; a point of difference which no American statesman should lose sight of. What folly is it, then, to introduce by legislation a standard of measure in the formation of contracts, which can always be altered by the creditor at his pleasure, in despite of our laws! How vast and complex is the fraud which we thus practise upon our citizens, when we indirectly force them to contract by one standard, whilst the constitution requires them to pay by another! If a law were passed requiring every man who had contracted to deliver a bushel of corn to deliver two, the injustice would not be greater, nor the mischief more, than our paper currency has often produced. So much, Mr. Chairman, for the operation of our banking system upon the currency; let us trace now its effects upon credit.

What is credit? and what is the real law which regulates its expansion and contraction? Credit, sir, is the contrivance by which we translate future resources to our present use and employment; or, in other words, it affords the means by which we obtain the present use of capital by a pledge of future resources—of resources which exist either in mind or matter—of resources to be found, sir, either in our skill and industry, or in capacities yet to be developed in our material possessions. The fabric of credit to endure, sir, must rest on the solid rock of responsibility, and not upon the fleeting sands of mere confidence: or, sir, if I may change the figure, credit is the venous system through which the stream of capital flows, to visit every part of the body politic with its life-dispensing power. Disturb for a moment the free and natural course of its circulation, and you derange every function of social life. Leave it to follow its natural courses, and it will quicken anew the spirit of enterprise, impart more vigor to the arm of industry, and dispense health and freshness to the frame and spirit which it supports and vivifies.

I have said, sir, that it was the pledge of future resources for the present use of existing capital. To make the operation beneficial, this pledge must be upon real resources; so that the borrower may not only return the principal and interest of the capital employed, but also retain a profit for himself. If his employment returns him an amount just equal to, or a less amount than, the principal and interest of this capital, there is a clear loss to society

of his labor, at least, and perhaps of more. It is manifest, then, that this operation, if beneficial to society, must be founded upon real resources, and new capacities for producing wealth. There is a certain amount of capital in the world, to which Government cannot add by any of its regulations. This is all which can be distributed; and if the credit system exists in a sound condition, this capital will be distributed between the different parts of the world, and amongst different individuals in society, in the relative proportion of their comparative resources. That country which can give most for the use of capital will be first supplied, according to the laws of trade; and any community which, directly or indirectly, gets possession of more capital than its relative resources entitle it to enjoy, receives it upon the terms of paying for the use of more capital than it can advantageously employ. This, sir, could never be the case if Government were not to interfere; but, unhappily for mankind, it too often happens that a Government, under the vain hope of benefiting its people, pursues a system of measures which disturbs the natural level of capital. For an instance of this, I need only refer to the currency operation of our banking system. I have shown, sir, the operation of this system has a tendency to increase the currency of the country in which it exists, far beyond the basis of the metallic, which is the currency of the world. The nominal amount of money is increased, and its real value diminished. Suppose, for instance, that two dollars represent the same amount of the necessities of life which were formerly represented by one. The capital which is borrowed at this nominal rise in its money price, must be returned when the nominal price falls, and the real value is raised. In other words, the community which borrowed in half dollars must return in dollars. The reason of this is obvious. The credit system of any country, when it is sound, rises or falls with its relative resources. This is the true and single law of its valuation. But Government interposes and alters the measure of value. It doubles, for instance, the proportion between the paper currency and the material wealth of the country, by forcing every addition made to credit, through the banks, to produce a like addition in currency. The country, then, which has fewest resources in comparison with others, may have the largest nominal credit system, on account of the inordinate expansion of the standard by which its value is measured.

The credit system being thus expanded, let us look for a moment into the mode of redeeming the obligations thus incurred. This debt can only be discharged by a system of exchange, under which one debt is made to offset another, so as to save the necessity for currency; or else by redeeming the obligations in money. So far as the exchanges adjust the balances due on a certain day throughout the country, the operation is beneficial; and the relations between debtor and creditor are not ruinously affected, notwithstanding the inflation of the currency. But in this diseased state of affairs, the operation of the conversion of that portion of the credit system which must be redeemed by money is terrible. The obligations were contracted upon the paper standard, but they must be redeemed in specie, if the creditor chooses to demand it, and this he will do, if the paper currency exceeds its just proportions, because then it will be to his interest to exact this mode of adjusting contracts. So far, then, Mr. Chairman, I have endeavored to prove to this committee that our banking system produces, first, an unjust distribution of capital between the different sections of the same country and the different classes of the same society; and, secondly, that the connexion which it instituted between currency and credit caused them both to expand and contract, according to laws different from those which nature had prescribed for their regulation. If I have been successful in my effort, I have shown that these effects must flow

H. OF R.]

Sub-Treasury Bill.

[Oct. 11, 1837.]

from the very laws of their creation, and that this was the original sin of them both.

I know, sir, that some advantages have also resulted from their operation, but none, in my opinion, which compensate for these evils. The advantage of adjusting the balances due under the credit system, by exchange or offset, so as to avoid a direct result to currency, is immense; and it is true that a large capital is necessary for this business. It is necessary, because the greater the variety of exchanges commanded by any one institution, the greater the facility for offsetting the one debt against another. The limit to this advantage is only to be found when the amount of capital employed in this way, by any one institution, is so great as to preclude competition. It was the opinion of Mr. Baring, however, one of the most intelligent of English merchants, when examined before a committee of the House of Commons on this subject, that the important business of exchange could be effected more readily through private dealers than by banking institutions; and there seem to exist strong reasons for his opinion. Be this as it may, however, and let us suppose, for argument's sake, that in a young country like ours we can only raise capital enough to deal in exchanges, domestic and foreign, by means of corporations, still I maintain, sir, that those corporations should be single in their end and aim. They should be confined to the business of dealing in exchanges, and all power of issue should be denied them. If the banking system of this country is ever reformed, the change must be conducted in that spirit of analysis which has effected most of the modern reforms in science. If currency be the object of the constitution, I have already intimated the model upon which I think it should be moulded. If the regulation of exchange and the diffusion of loanable capital be the object, the institution should be confined to this end alone. A currency bank should exist for currency alone, without the power to discount; and a bank of discount should be confined to that purpose without the power to issue. The true secret, I believe, sir, of regulating the machinery of corporations so that it shall work the precise end intended for it, and no other, is to create them with a single purpose, upon which they will then be sure to move. But, sir, unite in them incompatible functions, and you are apt to introduce a complexity into their operations, which will often produce results entirely unexpected at their creation, and contrary to the public good.

I believe, sir, that the history of our system of paper currency connected with credit, as we have instituted that connexion, would illustrate the truth of my views, if there were time to enter into this inquiry. I will not raise an issue of fact, however, when my purpose is satisfied by dealing with first principles. I will not enter into the history of that early struggle between the colonies of Massachusetts and Rhode Island, for the field of circulation which each was endeavoring exclusively to occupy with its paper issues; a contest which waxed so warm as to make a reference of their disputes to the Crown necessary for the preservation of peace. Neither will I occupy the committee with the history of that continental money, whose improvident issue was said by one who both felt and knew its consequences, to have caused more real suffering than all the complicated horrors of the war of the Revolution. Did time permit, I might well pause, for the purpose of tracing to the inevitable tendencies of our banking system, the wide-spread derangement of our currency and credit, from the suspension of specie payments during the war, until 1819, when the Bank of the United States itself was perhaps only saved from a like catastrophe by the suspension of a Treasury draft. Yes, sir, and for confirmation almost as strong as proof of holy writ itself, I might turn from that period to this. In a time of profound peace, when the mighty energies of the American

people were tasking themselves to their utmost upon the finest theatre for exertion which any people ever enjoyed, we have seen their career suddenly stayed, and the arm of enterprise itself folded in the mournful contemplation of the ruins of the prostrate system of credit; a fabric which fell, sir, as I before observed, because it was founded, not on the solid rock of responsibility, but upon the fleeting sands of a mere confidence—a false confidence—engendered, sir, by those very institutions which were relied upon as the pillars of the edifice.

And here, Mr. Chairman, let me not be misunderstood. I do not war upon existing institutions, but with the policy which gave them birth. I would be the last man in this community to encourage a violation of these vested rights. Neither do I blame individuals, sir, for entering into employments to which the policy of their State Government invited them. I have no desire either to return suddenly from one measure of value to another, so as to disturb the relations between debtor and creditor. I go for reform, sir, not for revolution. I wish to see a change of policy, it is true; I care not how gradual it be, so the prospect of reform be certain. As one of the means of effecting this gradual reform, I propose a divorce between this Government and all banks. I propose it, sir, as a measure required by public interest, and ultimately beneficial to the banks themselves. The deposits of public money, upon which these institutions trade, and the credit given to their paper by means of its receipt in public dues, only serves to stimulate an action already false in its nature, and tends but to hasten the round of expansion and contraction which they are ever performing. In that point of view the connexion is injurious alike to the Government, the people, and the banks. Upon every occasion in which this connexion has existed with the State banks, we have seen it result in a general explosion of the credit system. I believe no one doubts but that this connexion hastened the late catastrophe, which furnished the occasion for the late call of Congress. The receipt of bank paper in payment of public dues increases its credit, and extends its circulation. The amount of paper currency necessary for making all the payments required in collecting and disbursing the public revenue, is added to the natural circulation of the banks, and has no other basis than the confidence that it will be received in payment of Government dues. As this revenue expands and contracts, so this portion of the currency increases or diminishes. Whilst the surplus revenue was collecting, this circulation increased upon that credit: it increased, too, from the use of the deposits upon which they traded; and when the surplus and annual revenues of the Government were being distributed, and diminished, a portion of this currency was drawn from the field of circulation; and, being no longer useful, its conversion was sought in specie. Here is the unhappy and fruitful cause of fluctuation in credit and currency, which must always exist under a connexion between Government and bank. There were doubtless other causes growing out of that connexion, which tended to hasten the suspension of specie payments. I throw them out of consideration, however, because they do not enter into the general question, and take only those consequences which necessarily flow from a connexion between bank and Government under any circumstances; and, having shown the injury which they work to the bank, I turn to their operations upon the fiscal concerns of the Government: when this violent rupture of the ties which bind them together takes place, the Government is forced either to take depreciated paper, or to demand specie. If they take the first alternative, they give a bounty to each State to depreciate its paper, to lower its taxes, and duties become no longer uniform. If they choose the latter alternative, they find that its operation is to raise the taxes upon the people precisely at the time when they are least able to encounter an

OCT. 11, 1837.]

Sub-Treasury Bill.

[H. OF R.]

increase of expenditure. If, on the other hand, this connexion had never existed, the banks would have been better able to meet their engagements, because their circulation would have been more limited and more justly proportioned to the wants of trade. The operation, too, would have kept enough of specie in circulation to have met the demands of Government, and to have afforded a rallying point to the banks when any sudden emergency created an unexpected demand for specie. If I have shown, Mr. Chairman, that this connexion injures both bank and State, I need not state the obvious consequence, that whatever injures either the banks or the Government, injures the people also. But my colleague seems to suppose that this Government can find the means of regulating the operations of these banks, and of producing, through them, a sounder currency. His projet supposes a system of rewards and punishments, through the fiscal action of this Government, which is so to control the banks as to effect this salutary end. I will not revert to those views which I have just given, to show that this expectation is false in theory; nor will I pause to cite to him the opinion of Secretary Dallas, who, after a long experience, in 1816, pronounced this hope to be impracticable; much less would I cite to him as authority my own opinion upon this subject. I will take his position as true, for argument's sake; and then I would ask my honorable colleague how it is that, thinking with me that this Government cannot charter an institution for the purpose of controlling currency, still he will maintain its right to buy up the corporations of the States, and regulate their chartered functions so as to control the currency and the exchanges of this country?

But, Mr. Chairman, much as I object to the connexion between this Government and the banks, on account of the disturbing causes which I think it introduces into the action of the currency and credit systems of the country, I have another objection still more powerful. I never wish to see the banks converted into political engines again. Of all the enormous additions which have been made to Executive patronage, in late years, I regarded its connexion with the State banks as the most fearful. The army of officeholders, though you should count them as 100,000 strong, would confer not half the power upon the Executive which the possession of the State banks would give to him. Convert them into political engines to be worked by his hands; give him the control over the exchanges and currency of the country; give him the dispensation of bank favors, and if he were disposed to use them for personal advancement, he would scorn your title of king, and your gewgaw of a crown, as if the offer intimated a doubt of his absolute authority without them. If the choice of means were given to a wise king, who wished to maintain his power, he would not choose a nobility, said to be the natural support of the crown, but he would ask for some hundreds of corporations, wielding the money power of the whole country. He would ask for those whose deliberations might be secret, whose agents might be invisible, and whose march upon their purpose could only be diverted by that impulse of interest which he alone could regulate. Give him these, sir, and he would despise your standing armies and your orders of nobility as cumbrous devices, unworthy of the refinement of the spirit of modern despotism. Mr. Chairman, I have always regarded the connexion between bank and State in this country as a conjuncture most ominous to our liberties. Use the public money to buy up the State banks for the use of this Government, or of its Executive branch, and you at once convert them into political engines, you deprive the States of the control of their own institutions, and you place the people under the dominion of a league of corporate influences. Endow a moneyed corporation with the functions of Government, and you behold at once the most ruthless of all despotisms; and the history of human suffering and of East Indian op-

pression is not silent upon this subject. You may place the worst of men in authority, and he will have some touch of human feeling. Not so with a moneyed corporation. It deliberates in secret; it moves by the power of a majority, with no sense of personal and individual responsibility at the bar of public opinion; and it is governed by the single impulse of interest. You cannot move it to pity for the present, or to remorse for the past; for its action is mechanical, and not under the influence of feeling or of soul. I protest, then, sir, against any attempt to bind the moneyed corporations to one government, and by one common political purpose. I have given my reasons for objecting to any connexion between bank and State, and, perhaps it may be reasonably required of me to suggest some better plan for the custody of the public treasure. If the selection were left to me, sir, I should adopt the plan of special depositories. The General Government should be independent of the banks as to the medium in which its revenues are collected, and banks would be independent of the Government when they were no longer exposed to the power of its rewards through the privilege of trading upon the public depositories. If such an arrangement could be effected by giving the banks a fair compensation for keeping the public money, at the same time that they were effectually restrained from using it, I should much prefer it to the scheme proposed by the Committee of Ways and Means. The pecuniary responsibility would be greater than that of individual collectors, and its custody of the public revenue would, perhaps, be safer. But the chief recommendation would be in the means which this plan would afford the representatives of the people to ascertain the state of the public money, if at any time there was cause to suspect either the ability or the honesty of the Secretary of the Treasury. I shall not fatigue the committee, however, with the details of a scheme which I shall not propose by way of amendment, as there would be no reasonable prospect of its adoption at present. I should greatly prefer a bill carefully framed upon this basis to the one now before us; but I give to that the decided preference over the other alternatives, of a United States Bank, or the connexion between the Government and the State banks. Doubtless, there will be difficulties attendant upon any scheme for regulating the custody of the public revenue. The money power, in all its combinations, presents the most difficult problem to be solved in the science of Government. But we must choose the best plan within our reach. It is idle to expect perfection in a system of finance. I go, sir, for the great principle of divorce, without committing myself to the specific details of this bill further than by the expression of a preference for them over the connexion between bank and State. In that comparison, I have satisfied myself that it does not increase Executive patronage, as its opponents maintain; nor do I believe that its tendency will be to retard the resumption of specie payments. It, in fact, diminishes the Executive patronage by a larger amount than any other reform ever proposed under this Government. It subtracts the entire amount of bank patronage from the Executive, and, in comparison with this, the few additional officers to be created are as nothing. How is this bill, sir, to retard the resumption of specie payments by the banks? They will be afraid, it is said, of runs upon them for specie to be paid for public dues. This objection, sir, is more specious than valid. The quarterly receipts of this Government will range from six to eight millions. The greatest possible amount of the addition to be made to the legal currency, under this bill, would be six or eight millions, and, in point of fact, I am informed that a far less sum would suffice, as the public money is paid out nearly as fast as it comes in. Is it to be supposed, sir, that the eight hundred banks of this country could not meet such a requisition, if they were ready in other respects for the resumption of specie payments?

H. or R.]

Sub-Treasury Bill.

[Oct. 11, 1837.]

But, sir, in point of fact, the requisition for specie upon the banks, or upon the country, under this bill, cannot amount to a dollar if these Treasury drafts be issued for circulation, as I presume will be the case. They furnish more than enough of medium for the collection of our revenues. The banks, Mr. Chairman, cannot resume specie payments generally until the foreign debt is nearly or wholly liquidated. When that is done, if they will elevate the value of their currency to the par of specie, partly by curtailing their circulation gradually, and within the limit of the present discount upon their paper, and partly by a judicious command of exchanges for converting their own obligations, they may then safely resume specie payments. Whenever their paper will command its par in specie in the market, they may safely undertake to give specie for it themselves. This I believe to be the only true mode of effecting the resumption, and this operation is entirely independent of the fiscal action of the Government. Rely upon it, sir, that a speedy resumption of specie payments by any other means would be impracticable, without producing more distress than we have yet seen in the community. To take their depreciated paper in payment of the public dues, would rob them of all inducement to resume, as the Government credit would thus be worth more to them than it would be if their paper was convertible.

Mr. Chairman, I know that I have this day presented views which, if true, will disturb the dream of those who believe that an infusion of banking medium, like the fabled juice of Medea, will renovate the body politic, and restore to age the vigor and freshness of youth. I know, sir, that there are many who will view my opinions as wild and extravagant. But I am willing to leave the issue between us to the arbitration of time and future experience. I am aware, too, that you cannot touch a fibre of one of the cords imposed upon trade, by the restrictive system, without exciting a host in opposition. But, sir, in a contest upon the great principles of free trade, I am willing to enlist for the war. I feel that they must succeed, because I trust to the power of truth. Its pace may be hobbled, but its march will still be onward. Yes, sir, it will be onward and onward, until the people awake to a sense of the injustice which imposed fetters upon the free spirit of American enterprise. I hope, yet, sir, to see the day when the captive will throw its hands loose from their bonds, and proclaim in joyful exultation to the world that it is free—free to pursue the impulses of its own genius, free to take the direction of its own interest, and ready to put forth the whole of its mighty energies to the fulfilment of the proud destiny which will then await it.

Mr. MASON, of Virginia, next took the floor, and addressed the House, until the hour of recess, in opposition to the bill, as calculated to blast the hopes which had inspired the course of the late administration, that the country would enjoy the advantages of a sound currency.

EVENING SESSION.

Mr. MASON, of Virginia, resumed the course of his remarks, the whole of which are given below.

Mr. MASON said: Agreeing, I as most cordially do, in the several measures which have so far been presented by the Committee of Ways and Means, for the consideration of this House, it is with the utmost reluctance that I am now brought to differ with those with whom I have heretofore acted.

This difference, however, I am pleased to consider, is at least but one of mere expediency, and in itself contains nothing which should sever those who are united otherwise in the preservation and support of those great and leading principles which actuate political parties.

Differences of opinion necessarily pertain to deliberation; it is against the constitution of our nature that it should be

otherwise; intelligence, reason, and sound judgment, are alike hostile to entire unanimity; nor would our representative Government be any thing more than a mere formal acquiescence in the will of some ordained superior, if the doctrine were allowed to hold, that party discipline exacts an unconsidered sanction to every measure, which brings a recommendation from the Executive chair.

Such is certainly not the spirit of our institutions; nor should it be the spirit of any party that would act safely and wisely, or even successfully, in the administration of the Government committed to their charge.

Having thus premised, I will proceed at once to state my objections to the bill under consideration.

Those who have brought it in, address its claims to our favor, as a measure simply intended to provide for the safe-keeping of the public money. It is said that the former depositories, the State banks, having proved either inadequate to the duties required, or unfaithful to the trust reposed in them in this branch of the public service, it is necessary that Government now should take care of its own interests; and that this will be most effectually done by a return to what is called the legal currency of the country, and by constituting certain fiscal officers of the Government the keepers as well as the disbursers of the public money.

The machinery is certainly very simple, and if the only end to be attained were, in truth, the safe-keeping of the public money, however I might dissent from the expectations of those who have planned its operation, I could not see in it those insuperable objections which impel me now to remonstrate against it.

The evils, sir, which we are expected to remedy by some adequate law, lie far deeper in the public mind than any alleged insecurity of the public money—evils for which no remedy is provided by this bill, but which will, in my judgment, be fastened upon the community by its passage—I mean the present degenerate condition of the currency.

What is now the currency of the country? I ask not what ought to be, but what actually now is the sole currency; the only medium having exchangeable value, by which the business of the country is carried on? It consists entirely, from one end of the confederacy to the other, of irredeemable bank paper; every payment that is made, every debt that is collected, every transaction of every kind, whether large or small, into which money enters, is carried on and effected by paper that has been issued by the State banks, and which they no longer redeem with gold or silver. These metals have passed entirely out of circulation; they form no longer any portion of the money of the community; treating money as that only, which, for the time being, serves as the symbol of exchange, of things having merchantable value.

This condition of the currency, is the true and great evil of the times; it affects the people in their business, precisely and in the same manner as it affects the Government in the conduct of its affairs; and there can be no remedy, at all adequate to relieve the Government from its embarrassments, which shall not, at the same time, and to the same extent, relieve the people from theirs.

In considering this subject as I propose to do, it is unnecessary to go at large into an examination of the causes which have operated to bring about this state of things. I do not know that I am, nor do I at all profess to be, equal to this duty. And yet, were I to attempt it, I should certainly differ very widely from those who trace these causes no farther than to a redundant issue of bank paper. That each issue has been to a great extent auxiliary to the present embarrassments, there can be doubt. But it has been auxiliary only; and I freely admit that, in my very humble judgment, a well-founded objection to our banking system lies in this very thing: that banks of discount, or-

OCT. 11, 1837.]

Sub-Treasury Bill.

[H. OF R.]

ganized as our American banks are, yield the facilities of credit too readily and amply to the demands of trade, without a power of discrimination between such as arise from the extension or accidental vigor of healthful commerce, and such as have their origin in a wild and gambling spirit of speculation.

Commerce requires credit. From the day that men passed in their dealings beyond the first simple stages of barter, credit, in some form, entered into the affairs of trade. Its agency soon came to be understood; and the winds are not more active in circulating the common air, than credit now is, all over the world, in circulating through every land the productions of every soil.

Trade and commerce, then, becoming drunk with prosperity, have drawn too lavishly upon the credit offered them through the banks; or, if you will have it otherwise expressed, the expansible character of bank credit has offered too great temptations to commercial enterprise, and we are now suffering under the consequences of over-action, as well on the part of those who used this credit as of those who gave it.

In this reasoning, I am borne out by the message of the President: he says that "our present condition is chiefly to be attributed to over-action in all the departments of business; an over-action deriving, perhaps, its first impulses from antecedent causes, but stimulated to its destructive consequences by excessive issues of bank paper, and by other facilities for the acquisition and enlargement of credit."

I have entered into the subject thus far, only that I may invite you to a more enlarged view of the difficulties to be met than are presented when our inquiry is confined simply to a consideration of the safest custody that we can provide for that portion of the people's money which is to pass into the public coffers.

My great objections to the measures proposed in this bill are, that they are not at all commensurate with the exigencies of the times; they do not meet the real difficulty. The bill simply ordains that the Government, after a limited time, will receive nothing but gold and silver in payment of public dues, and will intrust its keeping to its own officers alone. Now, if there were a creative power in our law; if, by this simple enactment, the bank paper could be driven out of circulation, back whence it came, and the precious metals substituted in sufficient quantities to meet the wants of society, as well as the demands of the revenue, the chief ground of my opposition would be at once removed. I can well see, from the experience we have had of the evil tendencies of the banks to excessive issues, (and such, at present, are my decided impressions,) that, whenever the currency is placed in a condition to bear the tribute, the true policy of Government may be found to be to exact its dues altogether in coin, and to withhold its revenue, while resting between its collection and its disbursement, from the use of banks, as a fund to increase their discounts. My reasons for this I will give hereafter, when treating of the proper positions which the Government may ultimately assume toward the State banks.

The bill is to operate upon the currency as it now is; for we have not only no guarantee that it will be found in an improved condition at the end of twelve months, (the limited time,) but it is susceptible almost of demonstration that one necessary consequence from the proposed law will be to continue the currency in its present debased condition.

The precious metals, all will agree, are now banished from circulation. They are in the country, I grant you, and in sufficient quantities, perhaps, to answer their accustomed duty of circulating in those channels below the reach of bank paper; but they no longer pass from hand to hand as a medium of exchange. Their former exchangeable value has been converted, by the course of trade to which I have alluded, to a value exclusively marketable;

and thus they have fallen back, and are entirely merged in the common and general mass of merchandise. Specie, whether in coin or in bullion, is now merchandise, and not money; and those who require it for any purpose must go into the market and buy it at market rates, as they would any kind of merchandise whatever. How long, then, is this state of things to continue? How long will this marketable value attach, which detains the coin from its most appropriate function as current money? And by what process can it be restored to circulation?

The answer to the two first inquiries is very simple. Specie will continue to be merchandise, so long as there exists any demand for it greater than that which would invite or retain it in circulation. It was driven out of circulation by the demand for exportation, after the business of the country had realized the fact that our exports were insufficient to pay for our imports. The balance must be met, and the precious metals were called out of circulation to answer this new demand. It is a necessary and fundamental law of currency, that where you have two media, of which either answers all the purposes of exchange, and one of them, besides those purposes, will answer another purpose as a subject of trade, the latter will fly at once to meet the new demand, and leave the duties of currency exclusively to its fellow.

So it was between the paper and the specie, when, by the exigencies of trade, the latter was suddenly called off to meet the new demand created by the necessity in commerce, of extinguishing the balances against our importers. There is no mystery in all this. Imports are to be paid for from those two sources alone: by the produce and labor of the importing nation, or by gold and silver; and whenever the former is found inadequate, the precious metals must make up the deficiency.

Thus stood the country when the banks suspended the payment of specie. They had an agency, and a large agency, I grant you, in bringing that necessity about; pampering, as they did, the pride of commerce. They met all its demands, honored all its drafts, as well in the rage for importation, as in those extravagant speculations to which the apparent prosperity of the age gave birth. But the banks are not alone to blame in this. It is due to the occasion, and will aid us in searching out the true remedy against a recurrence, to admit, candidly and fairly, that the Government itself saw as little the mischiefs that would follow from the extension of their credit, as the banks did themselves. It is a part of the history of the times, and should be recorded on the same page, that when the deposits were given to the State banks, they were expressly instructed to make them the basis of new incentives to commercial enterprise.

I do not speak this at all, sir, in the spirit of rebuke; far, very far from it. I adduce it only to show that the Government itself, against whom, as some have said, the banks have committed the unpardonable sin, was itself actively instigating them to that very extension, now so zealously condemned. How far the banks might have gone in extending their discounts, upon the immense deposits thus cast upon them, without this authoritative hint none can easily tell. But it is fair and reasonable to infer, that this license in advance did not pass unimproved.

Having stated thus the actual condition of the currency, and briefly traced the causes which have led to it, let us inquire next what will be the probable operation of a law that takes no account of its enfeebled state, but peremptorily demands, after a given day, that the entire revenue, amounting to some twenty millions of dollars per annum, shall be paid up in gold and silver. One necessary consequence, in my apprehension, would be, effectually to place it out of the power of the banks to resume the payment of specie within any reasonable time. How can it be otherwise? They suspended payment,

because of the new demand for coin created by the exigencies of trade. They have not yet resumed, because although that demand has entirely diminished, as shown by the rate of foreign exchange, yet there is still demand enough to warn them of the consequences of an attempted resumption, before the trade of the country is in a fit condition to bear it. Sir, the country is recovering fast from the violent and sudden convulsion into which it has been lately thrown. It cannot otherwise be, when we consider the immense resources of this vast continent, wielded, as they are, by a people whose industry and enterprise acknowledge no other limit than the very bounds of the earth. But the Government must keep its hands off; time must be allowed for the system to react, before any new or additional pressure can be borne.

If the necessities of circulation are not strong enough now to bring specie into general use, as part of the currency, because of the existing collateral demand in trade, does it not necessarily follow, that any new demand will have an additional effect in retarding that operation?

You create this new demand by the bill under consideration; pass it, and you at once increase the premium that specie already bears over the ordinary currency; you give it increased value in the market to the extent of such new demand; and to that same extent you postpone the day when it can return into use as a part of the circulating medium. Until that day comes, it is impossible for the banks to pay out specie upon their notes; they never can do so, until the demand upon them is reduced to a naked demand for circulation. If I am correct in this reasoning, the best that could be hoped for under the proposed law would be, that it should remain a dead letter upon the statute book.

I think I have shown that we could have no return to a circulation of specie under its auspices; and, if this be so, do you believe, does any man believe, that the law could be carried into effect?

What, sir, that the Government alone should be paid in silver and gold, while those who have the payments to make receive nothing but irredeemable paper! How vain and idle it is to expect any such thing. If, by any chance, or lucky accident, over-ruling those stern necessities to which all human affairs are subject, the exigency of the times should have passed by, before your policy begins, then it might, thus chance-favored, be that the scheme could be carried out. But it becomes us not to legislate upon such improbable contingencies. I want no better evidence of what the Government would be twelve months hence, under the operation of this law, than what is now daily passing before our eyes. There are, it is said, (and I presume with an approximation at least to the truth,) now in this country eighty millions of dollars in coined metal. By the existing law, (as there is no bank paper convertible into specie,) Government can now receive nothing but coin in payment of any part of its revenue. I ask, confidently, is any part of that revenue so paid? With all this abundance of the precious metals, fully three times as much as we have had at any former period, do we not all know, that none whatever is paid into the Treasury from any source of revenue. I mean none, when compared even with the lowest necessity of the public service. The mint, it is true, does furnish a small supply, barely sufficient, if at all, to meet those demands which coin alone will satisfy. But this does not come in any shape of revenue—far from it. It is purchased by Government, at market rates, and a premium paid upon every dollar that is brought in. Such is the present state of things, under the operation of a hard-money law, while the only money of the country is in irredeemable paper; and such must ever continue to be your condition, under the operation of any laws that you may pass, so long as

the money which you require is banished, by whatever cause, from the channels of circulation.

I lay down, then, this position, and defy any refutation: that the Government must, as a permanent necessity, deal in that currency in which the people deal; it is the law of its creation and inseparable from its condition. It must receive what the people receive, and pay what they pay—a necessity from which Government cannot escape if it would, and ought not if it could.

I speak of this as a permanent necessity, distinguished from the necessities of immediate want. It is struggling now against this very want, and precisely as any large capitalist might equally do, by using the resources of its credit to supply the temporary absence of revenue. Have we not just passed a law, authorizing an issue of ten millions of Treasury paper, for this very purpose? I mean for the single purpose of reserving the Government from the necessity of coming down at once to the irredeemable paper of the banks. And this only to answer the present emergency; for it will certainly follow, unless that medium can be restored, in which alone the Government is allowed to deal, that we must issue at least ten millions more, before we return home from the ensuing session. Sir, I went cordially with you in this use of Government credit; and I will do so again should the emergency continue. But I tell you fairly and candidly, and I tell the people, too, that this Treasury issue is all that saves the Government now from coming down at once to bank paper. I say this, sir, because your revenue laws, exacting gold and silver, are not and cannot be enforced. If you collect any revenue, it can only be in that very paper, because there is nothing else to pay with.

Suppose, then, your law passed, and the currency remain, as under such policy it inevitably must, in the condition that it now is; what are you to do? If you could enforce the law then, I ask why do you not do so now?

Why do you not now compel your debtors to go into market and buy specie, in order to replenish the Treasury? So far from this, we have now a bill before us, and which it is admitted on all hands must pass, to save the Secretary from the necessity of so idle an attempt. With more than four millions of dollars now due in New York alone, so far from exacting payment, we are about to give further time on all bonds due and to become due between this time and the next session of Congress.

I say, then, confidently, pass what law you may, you cannot have your revenues paid in specie, so long as it remains at a premium; and that the very first effect of this law, by creating a new demand, would be to increase the premium, and thus render permanent the very exigencies to which your legislation is now actually yielding.

But take another view of the subject. Suppose the law carried out, what then would follow? The importer, besides all other charges for freight, insurance, duties, &c., is required to pay five or ten per centum for specie to pay the duties. Certainly this latter would be added to the price of the commodity; and thus the whole effect of your policy would be to tax the people to this extent, in order that Government might deal in gold, while they were left to struggle on, unaided, against all the ills of worthless paper money.

My view of the subject, then, is that, by passing this law now, you postpone to an indefinite period the resumption of specie payments by the State banks; that until they do resume, the law must be inoperative, and the Treasury supplied by loans; or, if enforced, besides creating a new and heavy tax upon all foreign merchandise, the sole effect will be to enrich the officeholders, and all who feed upon the public crib, at the expense of the rest of the community. I know, sir, that this last objection has been scouted as mere slang, as part of a mere "rabble," and unworthy of notice. But I tell you that it has never been met, and that it cannot be overthrown. I do not believe (and tha

Oct. 11, 1837.]

Sub-Treasury Bill.

[H. or R.]

disbelief is founded on the experience of the present day) that such a law could be carried out; but if it were, the host of Government dependants would grow rich under it. They would have money worth five or ten dollars more in the hundred than the money used by the people; and the people would be taxed to the extent of this five or ten dollars in the hundred, to furnish the former with the better currency.

Now, sir, in all this, my sympathies are with the tax payers, and not with the tax gatherers. I go for the interest of those who are to pay, and not for those who are to receive. I cannot agree to any policy which might, and I believe would, lead to these results. It is unwise, unjust, and unnecessary; and it could not, and ought not, to stand one day after those results are ascertained.

I may express myself strongly, but I do not mean to do so harshly. I see mischief and disaster without end, in any attempt to legislate now as you would have us do by this bill; and it is to save ourselves from utter defeat and shame that I beg you to pause with me, and consider the consequences of such an attempt.

Let me, before leaving this part of the subject, present another view, which, to my mind, increases the difficulties to be encountered by the proposed law. I have, so far, considered only the demand arising under the accruing revenue, as that which is to retard the resumption of specie payment. But the revenue in arrear, that of which we are to postpone the payment, will come heavily in aid to increase this demand at the very outset of the new law; to what extent we do not as yet very certainly know, but, reasoning from what we do know, the promise is sufficiently appalling. The duty bonds to be postponed, amount in New York alone to more than 7,000,000 dollars, computed to January next, and, including the other cities, to more than 10,000,000 dollars; constituting, to such extent, whatever it may be, an obstacle at the outset, over and above what is to be encountered in its ordinary course.

I have heard it said, however, that this very demand to be created under the law, will have the effect of bringing in specie to meet it; and thus it is alleged that the demand will occasion the supply. I do not deny this in the least degree. There is nothing more certain, in every branch of political economy, than that there will be a supply for the demand. But regard for one instant only what this demand is, and the fallacy of the reasoning will appear at once. It is a market demand which is to produce this supply. It is an increase only of the same demand, which has already banished coin from circulation; now it is purchased for exportation, then it will be purchased for Government, and the effect will be precisely the same in both cases—to give a marketable value to specie as merchandise, in lieu of the exchangeable value which it would otherwise have as money. None will pretend that, because Government will pay it out again, it will thereby circulate, unless they can find the term circulation fully satisfied in a constant round from the custom-house to the broker, and from the broker to the custom house.

If it be true, then, that Government cannot command the precious metals through its revenue, until they return back to circulation, the inquiry remains to be answered, how that end is to be attained? I would answer, first, it will be attained even before a very long time, if matters are allowed to remain, as far as Government is concerned, precisely where they now are.

Let us keep our hands off, and the banks will resume as speedily as reviving trade will allow: within that period I will not profess to answer; but their course of dealing since the suspension evinces the strongest purpose to do so, at the earliest practicable day. The Secretary of the Treasury tells us, in his report, that since the suspension of specie payment, "the policy pursued by most of them, has been favorable to an early discharge of their engage-

ments to the Treasury and to a resumption of specie payments." And, again, in proof of that position, he says, speaking of the deposit banks, that "since the 1st of May, their discounts, as a whole, have been reduced about \$20,388,776; their circulation \$4,991,791; and their public deposits \$15,607,316, while their specie has diminished less than \$3,000,000." Such is the encouraging account which the Secretary himself gives us of these institutions. We have already seen the great reduction in exchange since our session began, evidencing the rapid extinguishment of the foreign debt, and the effects manifested by the approaching market for the Southern staples. Even the presentation of the bill for an issue of Treasury paper, had an effect in bringing down exchange. Putting all these things together, we may safely argue that the evil day is passing by; and all that I urge upon you is, to keep hands off, and let very well alone.

The resolution of 1816, now in full force, had the effect at that day of bringing about a general resumption of specie payment by the banks. It will do so again, if its operation be unaffected. I have shown you already the promise under it. But the bill proposes to repeal that resolution, as the first step in the policy of the new law. Then, the attitude of Government towards these institutions was one of encouragement and confidence. It offered inducements to them to resume, and invited back the confidence of the community. The wisdom of that policy was manifested by the result. Now, the very reverse is to be attempted; in lieu of confidence, we present discredit; for encouragement, menaced destruction. I need not add, that the same end cannot be obtained by such opposite means.

But again, sir, there is in this bill an entire departure from the great and leading principles of the administration, on the subject of the currency. It looks no farther than to a supply of specie for the Government and its dependants. There is no account taken of the more important object of infusing specie into circulation for the common use of the people. Then, the great effort was to enlarge the specie basis, by the suppression of small notes. The Government, as the greatest creditor of the banks, sought to effect this by the control incident to its large deposits. The banks were encouraged in every way to co-operate; and the States were appealed to for their aid in the common duty of a reform in the currency.

Many of them, where there was a bank issue under five dollars, met the appeal at once, by a direct prohibition to that extent.

But the State of Virginia went farther. She had long since realized the benefits of a specie circulation below five dollars, by a prohibition of all paper under that amount; and, on the very first occasion when the charters of her banks would be reached, so recently as during the last winter, the prohibition was extended to ten dollars, and to take effect at an early day.

These were the measures then contemplated for the improvement of the currency, and begun to be carried out by the powerful aid of State legislation. Why are they to be abandoned now? It was admitted then, and it is beyond all question true, that specie, either in gold or silver, will not circulate by the side of paper. If experience of this were wanting, it is abundant in Virginia, in reference to small notes; as soon as they were expelled by her law, silver took their place. And there is no doubt that if her policy could be carried out, by the expulsion of all paper under twenty dollars, gold would flow at once into the vacant channels. All this can yet be done, by a simple adherence to the original plan. But your policy is in utter disregard of all such intent.

The great forcing process now in contemplation, will work the very reverse of what was then so strenuously urged. It will put all our golden dreams to flight, of the

H. of R.]

Sub-Treasury Bill.

[Oct. 11, 1837.]

haleyon days of hard money, and the States will be compelled, from sheer necessity, to license once more the very lowest issue of bank paper. Seeing these things, as I clearly do in prospect, under the operation of the proposed law, I can have no choice but to raise my voice against it.

As to so much of the bill as constitutes the collectors of the revenue, with the mint and its branches, depositories of the public money, I have but little to say. It is certainly subject to very strong objections, not the least of which is, the very great increase of patronage to which it must give rise; and a patronage of the most dangerous influence, as being so immediately connected with the public money. Neither is this objection at all answered, when it is said that the patronage will be less than that exercised in the intercourse between the Government and the deposit banks; because, by the simple substitute of a special for a general deposit, all patronage will be at once taken away; and on the score of safety, the difference is incalculable.

Whether I regard, then, the pernicious influence which this bill must exercise upon the currency, if now enacted into law, or the inadequacy of its provisions for the safe-keeping of the money, I am equally constrained to withhold my assent. In the first aspect, it has never been submitted to the country, and has had very little consideration here. The innovation is too great, the transition too violent, from all previous usage, to be thus suddenly met.

The people are too deeply interested in the consequences which may follow, to have this usage changed, without the most matured consideration. For myself, sir, I want to go home from this whole subject, *reinflecta*. It is a new proposition, presented for the first time, in an imposing form by the late message, and, before adopted, should be well and thoroughly canvassed before the country. The President himself, in proposing it, invites, and the subject is well worthy of, the fullest deliberation.

Let it be discussed, then, as it will be, and as all great public measures ought to be, by the people themselves in their primary assemblies, and through the press, before it is enacted into law.

No inconvenience can possibly arise from this postponement; first, because the time must necessarily be short, as Congress will be again in session, within six weeks from the adjournment. And, secondly, because the whole system proposed is now, under the late orders of the Treasury, in as full and complete operation, as if specially ordained by the law under consideration. The Secretary has already adopted it, in the exigency of the occasion, under the discretion given to him by the law organizing the Treasury Department. There is no occasion, then, for this great haste, and there is every reason why we should forbear.

We are told, however, by an honorable member from South Carolina, [Mr. PICKENS,] that, by our opposition to the present bill, we are strengthening the interest of that party which seeks the re-establishment of a national bank. This suggestion, sir, has come from a very remarkable quarter. I do not allude now to the member from Carolina, but to a distinguished statesman from the same State, in the other wing of the Capitol. The sub-treasuries, it is said, must be ordained at once, as the only safeguard against the restoration of a great national banking institution; and this ratiocination seems to be thrown out as a sort of bugbear, to frighten us into instant submission.

Sir, in my humble sphere at home, or in the halls of our State Legislature, my opinions on the subject of a federal bank need no new confession. I have ever been an uncompromising foe to any such institution. I believe the existence of such a bank is inconsistent with the purity, and dangerous to the safety of popular government. I have ever opposed it, in every form, on grounds of expediency; and, what is above all, to fix and confirm that opposition, I entertain no doubt whatever that it has no sanction, either in the spirit or the letter of the constitution. Strongly com-

mitted, then, to such opinions, and having uniformly acted up to them in every time of trial; in the removal of the deposits, through the panic era, and the Executive veto, I am not to be frightened from what I have taken as the path of duty, by the new-born fears even of so distinguished a proselyte.

I distrust the quarter, sir, whence the denunciation comes. I have no confidence in that counsel which springs from the zeal of recent conversion—opinions that are hastily taken up, are as speedily laid aside, and are worthy of no reliance whatever.

No, sir, in my humble judgment the danger of recurrence to a national bank is to be looked for in the very opposite quarter: in the immature conception and hurried execution of this sub-Treasury scheme. I do not mean to predict it, because I would not be understood as disparaging the judgment of those who confide more readily than I do. But suppose they should fail; suppose it should be found impracticable to carry out the new scheme; that the currency should grow worse; that bank paper should continue irredeemable; and the people become wearied out with your rigid exaction of coin from them, while nothing but paper is paid to them: I ask you, and I put it to the serious consideration of the country, what remedy would then be found? You could not fall back upon the State banks. They had just been divorced, and common decency would forbid the new espousal. Where, then, would you find refuge? Why, sir, as was done once before, in the arms of a national bank, and nowhere else.

I am not at all answered in the objections thus advanced, when I am told that my apprehensions of this failure are without foundation. You relied as confidently when the public money was transferred to the State banks, that they would not fail. Every official report and every State paper was replete with their commendation. We were told that they were equal to every emergency, in the fiscal operations of the Government, and furnished its best and safest reliance. And yet, within two short years, the whole system is denounced as an entire failure. What better assurance can you give us now than you offered then?

Why may not your new scheme fail? I believe that it must, inevitably must, if attempted now. And when it does fail, I can imagine no possible resource left, but that which our new convert so earnestly deprecates. I pray you to excuse me, then, if I do not see with his eyes.

Sir, in attempting these sub-Treasuries now, the Government, if I may so express it, is retreating to the *citadel* at once, in the great battle with a national bank. I see nothing but danger in the attempt—opinions differ amongst your best and ablest advisers, whether you can now make the position good; and if you do not, there is no escape, no choice, but in unconditional surrender.

One word more, sir, to the honorable member from South Carolina, and to those to whom this portion of his address is directed. I understand him as making an appeal to the democrats of the North, to rally around this sub-Treasury scheme, as their surest and safest protection against the oppression of Northern capitalists. He tells them that they are looked upon as the natural allies of the South, because their labor holds the same position to capital in their country that our slaves hold to their owners at the South.

How these Northern democrats may relish the doctrines of their new ally, I need venture no prediction. I doubt whether they can be brought to rally around the standard of a leader, who denies them any place, even in the common scale of humanity.

Is it upon principles such as these, that the Northern democracy is invoked to lend their aid to the measures contemplated by this bill? These are they, I presume, who are appealed to in the occasional addresses of certain newspapers, as the "*democracy of numbers*," contradistin-

Oct. 11, 1837.]

Sub-Treasury Bill.

[H. OF R.]

guished, we find now, from any democracy of men—who hold no place in the thinking, acting part of the community, but are classed as mere dead weight, to be thrown at will into either scale of the political balance.

If there be any such party in our favored land, I thank Heaven that it is unknown in the quarter of the country from whence I come. We have there, sir, I am proud to say, as honest and sturdy a race of democrats as ever the sun shone upon. Of intelligent, thinking, independent, and free men; each doing and acting for himself in all questions of public interest; having perfect equality of right, and participating, to the fullest extent of a free citizen, in the direction and control of all public affairs.

This, sir, is the character of the democracy with which I am familiar; nor I apprehend are our true Northern democrats of a texture any whit inferior. But I desire my constituents at least to know to what sort of democracy the merits of this bill are addressed by its friends. Not to intelligent and thinking men, but to a class who are counted only by their numbers, and are estimated to have no influence in public affairs, save as a mass holding a certain position toward capital.

[Mr. PICKENS here asked the floor, and was understood to say, that he did not lay down the proposition as broadly as was stated by Mr. MASON. He meant only to say, that the tendency of the institutions at the North was to organize capital, and to make labor tributary to it; and, unless such tendency were checked, would finally reduce labor there to a state of vassalage.]

Having thus given my objections to the passage of any law at this time, which has not for one of its principal objects a reformation of the currency, or, I should more properly say, which will not by its operation lead back the banks to a resumption of payment, I proceed briefly to suggest what my opinions are of the ultimate attitude which the Government should assume towards these institutions. I have no expectation or belief, notwithstanding the cry which has been raised against the banks, through the press and otherwise, that by any action of this Government these institutions can be destroyed. It is not in your power to do so, sir, if you would; and, if attempted by any means, direct or indirect, every effort that you could make would eventuate in defeat. They are created by the States—are incorporated, and have life given to them by their separate law—for their being they lean upon the States, and are as entirely independent of you, as you can ever become of them. Most of the States have a large moneyed interest in their stock, and participate largely in their management by the immediate appointment of directors.

Virginia has an immense fund invested in her banks, the income from which is appropriated to education, to internal improvement, and to other favorite objects of her State policy. Besides all which, the banks of each State furnish to each the entire paper circulation within its borders—a source of profit in which the States themselves largely participate. For good or for ill, then, these banks are so closely interwoven now, in all their relations with State interests, that they cannot be eradicated, even by the power upon which they depend for existence.

They enter largely into, and influence to a great extent, all the elements which affect the trade of the country; and thus, whether you are connected with, or divorced from them, whenever trade or the course of exchange (in which they largely deal) is deranged or injured, your finances will be immediately affected. You may be divorced from them *a mensa*, and a *vinculis*, and should a period ever occur again, when there is a general suspension of specie payment, your Treasury will stop payment in unison with the banks, precisely as it has done now; and the only difference between you will be, that they will stop payment as a measure of precaution, and you from necessity.

I say, then, emphatically, that the present embarrassed condition of the Treasury is not owing to its connexion with the banks. You have not now money enough to the credit of the Government, in all the banks north of the Potomac put together, (the quarter where the principal revenue is collected,) to carry on the Government for two weeks. The Treasury is without money; not because the banks have stopped payment, but because its supplies are cut off. Its revenue is stagnant in the hands of its debtors, and not in the vaults of the banks. There is money enough due to you, but you cannot get it in, and so it is precisely with the banks. You and they are both obliged, being operated upon by the same causes, to give time to your debtors, and to wait for the reaction of trade, the revival of commerce, before you can again get afloat.

Neither is this reasoning at all weakened by the fact that you have some five or six millions yet on deposit in the Southern and Western States, which is styled “unavailable”—meaning that you cannot command it for use. You cannot command it, simply because you have no use for it in the place where it is. In the Northern and Eastern States, where you had use for the money, you have withdrawn it rapidly since the suspension, and so you would have done from those South and West, could you have used the money at the place where it was. Suppose, then, that this money, instead of being on deposit in the banks, was locked up in sub-treasuries in gold and silver. Five or six millions of bullion is too large a sum to be suddenly transferred from one quarter of the country to the other without producing very serious effects upon the trade and business of those places whence it is taken; and yet you would have no other resource whatever in order to make it “available,” but to bring it away in bulk, transporting it at heavy cost across the country from the place where it was collected to the place where it was wanted.

You could not command a dollar by means of exchange; for the very causes that now make your deposit “unavailable” there, have run up exchange to rather more than the expenses of transportation. And thus that whole fund, even if now in gold and silver, and in sub-treasuries to boot, would be just as unavailable to Government, in the present condition of the country, as their deposit is in the banks mentioned. Government would not attempt to bring away the metal. The country would not allow itself to be thus drained; or, if it were done, the very operation would open the people's eyes to the working of the machinery, and all would cry out against it. No, sir; if this whole “unavailable fund” in the South and West were now locked up there in gold and silver, sooner than encounter the cost and risk of transportation, and the clamor that would be raised against it in those States, we should go quietly to work, as we are now doing, and issue Treasury notes to answer in its place, until the restoration of trade to its accustomed channels would allow its being made available by the use of bills of exchange.

Treating the banks, then, as they certainly are, institutions dependent for their being upon the States alone, and yet exercising so important an influence upon the trade and business of the country, it becomes us next to inquire what is the best and safest relation in which the Government can place itself toward them, to avoid, as far as may be, a recurrence of the evils under which we now labor.

In the first place, I see no prior necessity, either as regards the welfare of the Government or the banks, for any connexion between them whatsoever. A sudden and violent separation, such as is contemplated by this bill, I have already said would, in my judgment, be impracticable in the present condition of the country. I believe the transition (from the state of things which such a “divorce” would create) would be a national bank, as inevitably as

H. of R.]

Sub-Treasury Bill.

[Oct. 11, 1837.]

from anarchy and confusion a people always seek relief in despotism.

The process of separation must be gradual after it is commenced. And its commencement must await the entire recovery of trade, accompanied, as such recovery will be, by a sound and healthful currency; that is to say, a currency, so far as it is paper, convertible into specie at will.

The Government may, I think, under such circumstances, and at such time, confine its receipts to gold and silver, and withhold its revenue, while resting between collection and disbursement, from all use, whether of banks or others.

I am aware that strong objections hold to keeping so much money idle as would remain permanently on hand under any system that may be adopted. But my decided impression is, nevertheless, that the patronage and political influences with which its use by these corporations must be attended, together with the great incentive which it offers to overtrading, are objections far stronger. And from such inaction of the public money I should look for another great practical good. It would invite, in the most urgent manner, as a fixed policy, a scale of revenue reduced to the lowest standard of the most economical administration.

And again: by confining its receipts to gold and silver, the collection of the revenue would exercise a salutary control over the issue of the State banks. It would do so, by presenting at their doors, to the extent of that demand, always an inexorable creditor—a curb sadly wanted by the banks in their late career. The receipt by Government of gold and silver only, after the paper medium becomes freely and immediately convertible into coin, presents nothing inconsistent with the position that Government must deal in the same currency in which the people deal, because coin and paper immediately convertible are substantially the same.

But I can see no advantage, and on the contrary a fruitful source of mischief, in making Government officers the keepers of the cash. Place about them what guards you may, in the shape of commissioners, inspectors, or whatever else, speculation will be endless. There is no security in it, and it will involve heavy and unnecessary expense. The chief and over-ruling objection, however, is the endless source of patronage to which it would give rise. Make the machinery as simple as you may, and open to view, wherever money is, temptation will creep in, and corruption in every form following at its heels. But the money can be safely kept, under the most ample security, and freed from every objection of patronage or political influence, by a simple system of special depositories in the State banks, remaining always in specie, the separate property of the Government, and paid out in kind upon drafts from the Treasury.

I have thus stated my objections candidly and fairly to the bill. They go more to its peculiar machinery, and to the time at which it is brought forward, than to its general scope as a measure of State policy in the subject which it is intended to affect. There is no sufficient reason, as I have already declared, satisfactory to my mind at least, why it should be passed now at the close of a short and hurried session. And I take leave of it, therefore, in the confident hope that this great subject of the relations between bank and State will, at a future day, be presented in such form as will unite those counsels which are now so unhappily divided.

When Mr. MASON had concluded—

Mr. ROBERTSON, of Virginia, addressed the chair as follows:

Mr. Chairman: As the gentleman from South Carolina [Mr. LEGARE] has declined for the present occupying the floor, and no other gentleman seems disposed to address

the committee, I avail myself of the occasion to ask a share of its attention. Before attempting to express my views, permit me, sir, to advert to an amendment which I had the honor, some two weeks past, to lay upon the table, and which, with some modifications, it is still my wish, at a proper time, to present.

[Mr. ROBERTSON here requested that the Clerk might read a part of his proposed amendment.]

My proposition, sir, substantially is, that the public treasure shall be placed as a special deposit in the local banks.

The bill before us, Mr. Chairman, presents for our consideration two questions, essentially distinct, which, however, seem frequently confounded: one, as to the medium in which the public dues should be paid; the other as to the manner in which they should be kept. The one is a question of currency: the other of custody merely.

Agreeing, sir, with my colleague, [Mr. JAMES M. MASON,] that no Government ought to exact from the people a currency which they cannot command without a heavy sacrifice, I am prepared to go farther than he is. After so strongly protesting against such a policy, he must pardon me for saying that in insisting, as he does, on specie, or the notes of specie paying banks, he runs counter to his own doctrine. There is but little difference between his scheme, indeed, and that of the bill before us, which he denounces as oppressive. The only difference is, that he would permit the whole revenue to be paid in notes of specie paying banks, whereas this bill permits three-fourths only for the ensuing year, gradually diminishing the proportion, until, at the end of four years, specie only shall be received. But at this time, and until the banks shall open their vaults, both propositions are equally oppressive; for until that shall happen, and no man can foretell the day, there can be no notes of specie paying banks, and gold and silver therefore is exacted by both. To afford any effectual relief, we must receive such currency as the people can procure; we should take from them until the resumption of specie payments by the banks, such notes as they take from each other; such as the State governments receive in payment of public dues—provided they be not too greatly depreciated. If gentlemen can insure a speedy resumption, it may be well to insist on gold and silver, or the notes of banks which pay it out; but to exact either at this time, is to be guilty of the very oppression my colleague so justly denounces. The only remedy for the evil which those who have the power propose to apply, is to be found in the plan they have adopted of issuing Treasury notes. The manufactory of paper money just established in Washington, is to afford us a currency adequate to all our wants. My colleague, who supported the measure, disavows any design of creating this currency with a view to circulation. I am glad that he does. But the object has been explicitly avowed by many of its friends on this floor. We have been told by the President that eight or ten millions will suffice for public payments; and, with the view of meeting those payments, we authorize the issue of ten millions in Treasury notes. It only requires authority to continue them in circulation, by a re-issue, to supply the whole annual revenue. Should this system become established, all the channels that lead to the Treasury will be supplied with our new paper money, and not a dollar of specie, in all probability, find its way to it, except what may flow from the mint. This is the plan of our hard-money Government; and, to reconcile us to it, the gentleman from Maryland, [Mr. McKIM,] by a strong figure of speech, calls this paper gold and silver.

I do not profess to measure the consequences of this new issue of paper money. I believe it to be calculated, if not intended, to throw discredit upon the State banks, and am unwilling myself to engage in a war upon them. All the States have adopted the policy of banking. Their

Oct. 11, 1837.]

Sub-Treasury Bill.

[H. or R.]

right to do this none will question: they have a deep interest in their respective banking institutions. The State represented by myself and colleagues has invested in them her funds for education and internal improvement. Under these circumstances, it is not in our place to read homilies to the State governments on the impolicy of banks, nor to do any thing here in our representative character, with the view of crippling or destroying them. On the contrary, within our constitutional power, we should rather endeavor to restore their credit and stability.

As for that part of the bill which directs in what currency the public dues shall be paid in all time to come, it seems to me unnecessary and premature. We need not legislate in this matter for posterity; nor even for the next three or four years. The present state of the currency is such, that we should act more wisely to leave this question to those who will come after us, and content ourselves with providing for the present emergency. But, sir, I waive the subject of currency, as one in regard to which the Government has already settled its policy, and pass on to the other very interesting question presented by the bill—that relating to the custody of the public money.

The plan which I have had the honor of suggesting—by no means, however, of originating—that of specially depositing the public funds in the local banks, is essentially different, not only from the bill, but also from the amendment of my colleague, [Mr. GARLAND.] It maintains the principle of separating this Government, both in its pecuniary and political concerns, from banking corporations, which my colleague's amendment, providing for a general deposit, does not, and at the same time secures the public treasure from the risk to which the bill subjects it, by leaving it in the custody of individuals. We have already experienced the ruinous consequences of leaving the vast revenues of the Government in the banks as a basis for banking operations. The plan of special deposits, if adopted, will prevent their recurrence for the future; and prevent, too, the no less serious evils which may be anticipated from suffering these immense treasures to remain in the hands of our revenue officers. There is every reason to fear that those officers will themselves use the money, as the deposit banks have done, by way of loan and discount, or be tempted to employ it in private speculations. The instances of such abuses are, unfortunately, but too frequent. I must say, however, that those alluded to by my colleague, [Mr. GARLAND,] as having occurred in Virginia, do not justify the use he has made of them to show that his plan of general deposit in bank is exempt from danger; for they occurred under that very system, and not, as he seems to have supposed, under a system resembling what is called the sub-Treasury. The same may be said of the almost innumerable defaults in the Post Office. Still, they prove the difficulty of resisting temptation, and the danger to which the public treasure must be always exposed under the most guarded regulation; and, it must be acknowledged, apply with increased force to the scheme contained in the bill.

There are but three modes suggested of providing for the custody of the public money; by placing it in bank as a general deposit, or as a special deposit; or leaving it in the hands of individuals. I prefer the plan of special deposit; but if compelled to select between the bill upon your table, and the amendment, imperfect and exceptionable as it is, I must say, unequivocally, I will take that which insures a separation rather than that which perpetuates the union between the Government and the banks—between political power and moneyed capital. I hope, sir, the measure in its present shape will not be forced upon us. It is because I wish the principle to be successfully carried into practice, that I object to a plan almost certain, by its failure, to give a triumph to its enemies, and pave the way for a national bank.

All agree, Mr. Chairman, that a national bank, at this time, is inexpedient and unattainable. Yet no one can be so blind as not to see that the friends of such an institution have it in full prospect. The whole course of the debate during the present session, proves that they by no means despair of its ultimate establishment. Elaborate arguments have been urged with a view to forestal public opinion. I must, therefore, sir, ask the indulgence of the committee, not to enter at length into the examination of a subject so thoroughly investigated by the ablest statesmen, that an idea can scarcely be presented that has not been repeatedly presented before; but to glance at the grounds upon which it is urged, and the reasons which render it the object with me of apprehension and aversion.

The power to establish a national bank is deduced from various clauses in the constitution. No one pretends that it is granted in express terms; and the variety of sources from whence it is inferred, is a strong argument against the pretension. We are referred to the clause which authorizes Congress to regulate commerce with foreign nations and among the several States. The term *regulate*, is expounded as synonymous with *facilitate*, and then the grant of power is made out without difficulty; for banks, none will deny, facilitate commerce; and so, it may be asserted with equal truth, do ships, and canals, and roads; and the conclusion to which we arrive that Congress may incorporate a bank, is equally strong in favor of the right to build ships or incorporate companies for constructing roads and canals; and this conclusion, accordingly, Mr. Hamilton and the federalists have always adopted. It leads us still farther: for it would justify, as indeed Mr. Hamilton asserts, the power to incorporate companies to carry on a foreign trade, and, as may upon the same principles be maintained, to incorporate companies to carry on agricultural pursuits—for commerce is essentially dependent upon agriculture, and, indeed, cannot exist without it. The argument that proves all this, proves too much; and, proving too much, proves nothing.

But Congress may coin money and regulate its value, and, therefore, may establish a bank. Making bank notes is not, in the sense of the constitution, or in any sense, "coining money." It would be a reflection upon the understanding of those who framed the constitution, to suppose they did not know the meaning of the terms they used. If to issue paper be to coin money, then every State bank has exercised this high prerogative of sovereignty, and usurped the power exclusively conferred upon Congress. Printing or stamping paper is not coining, more than a bit of worthless paper so printed or stamped, is really what the gentleman from Maryland terms it, gold and silver. I will not admit, sir, that bank paper or Treasury paper is a coinage; but I fear that in establishing this manufactory of paper money the friends of State rights have done the very act which they denounce. They have established a bank—the worst of all banks—a Government bank. Let gentlemen turn to the able argument of Mr. Hamilton—for able it unquestionably is—and they will find that one of his strongest reasons in favor of the right to incorporate a national bank is deduced from the power, which he contends they possess, to establish just such a manufactory of Treasury notes as that which we have recently created. Assuming that power, which he considers in essence the power to engage in banking operations, he readily and plausibly at least contends, that if to create a bank be lawful, it cannot be unlawful to incorporate it. Sir, I will not say that; but I will say, if it be lawful to create a bank, it is wholly immaterial whether the power to incorporate it exist or not. It is the banking principle to which I am opposed, not the mode in which it shall be carried into practice; or rather, I would say, this power to engage in banking operations, is more odious when exercised directly by the Government, than when exercised through the in-

H. or R.]

Sub-Treasury Bill.

[Oct. 11, 1837.]

strumentality of a corporate body. One man may be a banker, as well as a corporate body; a Government as well as an individual. Gentlemen war against the power of incorporation; but the real danger is in the power of banking; and of all the modes of which that power can be exercised, the most odious, I repeat, and the most dangerous, is that by its own direct agency; in other words, a Government or Treasury bank, such as we have just created.

Gentlemen tell us again, that all duties must be uniform, and that this provision presupposes the right to establish a national bank. No, sir, it requires nothing more than to exert the power vested in Congress to coin money and regulate its value. When this is done, all duties are easily made uniform by requiring them to be paid in the same currency, or in other equivalents. It requires no bank to do that.

There is yet another ground: the plea which justifies every usurpation—the plea of necessity. Congress may make all laws necessary and proper to carry into effect its granted powers; and we are told that a bank is necessary to enable the Government to collect and disburse its revenue. I deny the necessity or propriety of such an institution for such a purpose. That institution cannot be regarded as necessary or proper, in the contemplation of the constitution, which did not exist for years after it was adopted; without which we conducted our fiscal operations from 1811 to 1816, and from 1832 to the present moment. We have the authority, too, of Mr. Madison, recently after its adoption, uncontradicted, that the power to grant corporations was applied for, and refused. It would be a reflection upon the understanding of the sages who framed that instrument, to hold that the incorporation of a bank was necessary and proper, and yet that all power of incorporating such an institution was denied.

Sir, to assert the necessity of such an institution is to fly in the face of facts, and to endow Congress with a discretionary power to do whatever they may choose to declare necessary. It is to assume absolute and unlimited power.

If the constitutional right of Congress, however, sir, were undisputed, I should still oppose a national bank as inexpedient. I concur, sir, most fully, with my colleague, [Mr. HUNTER,] that the credit system needs no artificial stimulus; or, if it does, that it has no claim to derive its aliment from the public treasure. I am no enemy to the credit system within its legitimate bounds: that credit which rests upon anticipated returns of capital or labor will deserve aid and encouragement; but a credit having no such solid foundations leads to far different results. The facilities afforded by an undue increase of banking capital, often tempt those who rest solely on borrowed means to engage in wild and reckless adventures; speculations in fancy stocks, in lands yielding no produce, in cities without a house, harbors without a ship. If the gambler in these lotteries should fail, the loss falls on the laborer or the capitalist. If he succeed, it is often at their expense. His palaces rise like exhalations, and he lolls in his magnificent coach, while the farmer or the mechanic, often with ten times his substantial capital, can scarcely afford an humble dwelling or a one-horse chaise.

But the gentleman from New York [Mr. HOFFMAN] informs us that the credit system works well; not, I believe, sir, just at present. Doubtless it has worked well, through the aid of the Bank of the United States; at least in the North, and so it may again. But what has been its effects at the South? Upon this subject, my friend from South Carolina [Mr. PICKENS] has given us some interesting details. Look back, sir, to the condition of the South before and since the establishment of the first national bank, and you will not fail to be struck with the rapid advance of the Northern States compared with the Southern. It may be that other causes have conspired to increase the

relative prosperity of the North, and depress the South. But the result is most striking. Virginia, with one of the finest harbors in the Union—with three large rivers leading to the interior; rich as she is in vegetable and mineral wealth—is tributary to the North for most of the foreign goods she consumes. And is it not reasonable to suppose that much of this may be attributable to the cause I have mentioned? Would not the necessary effect of such an institution be to afford superior facilities to those among whom its capital was principally divided, and render it impossible that the Southern merchant could come in competition with the Northern?

There is another and obvious injury which a national bank may inflict upon the South. The able man who presided over the last, has boasted, it is said, of his power, whenever he pleased, to crush the banking institutions of the States. This power—the power materially to affect our prosperity, by sudden expansions or contractions of its loans—may never be exerted. But it is one too dangerous to be entrusted with those whose interests are not indented with our own. Money, sir, it has been often and well said, is power. We should not be satisfied to look at the mere expediency of the moment! We should look to the future, as well as to the past. In all free States, collisions may be expected to arise. An oppressive tariff has once, already, nearly shaken our confederacy to its centre, and brought us to the very verge of civil war. A restless band at the North are even now plotting the destruction of our domestic institutions. We have heard of a Pennsylvania legion of ten thousand ready to draw the sword at the command of the Executive. Such threats should not disturb us; but for one, sir, I frankly declare that I should be unwilling the South should contribute the means which may be employed for her own destruction. A national bank was never a favorite measure in Virginia. Even in 1816, though many yielded to the pressure of the times, a majority of her delegation voted against it, and in 1791, when the original sin was committed, it received the support of but three members of the entire representation from the south side of the Potomac. I trust the attempt will never again succeed.

I say not this, sir, in an invidious spirit, or with any unkind feeling to the North. But the common treasure—the credit of the Government—should not be made the means of aggrandizing one section of the Union exclusively, still less made the instrument of oppression to another. It is for these reasons, Mr. Chairman, I have no desire to see a national bank ever re-established. Sincerely approving the principle which the bill upon your table proposes to carry into practice, I would have it as free as possible from all serious objection; that this Government may be once again, and forever, separated from any direct interest in the business of banking corporations, and they cease to have any influence over the political movements of the Government. That principle, assailed as it has been by argument and ridicule, every friend of our free institutions should wish to see successfully adopted. It is not, as my colleague [Mr. WISE] supposes, a novel one, originating in an agrarian spirit. It claims a much loftier origin. It received the sanction, many years ago, of Mr. Jefferson. Sir, it is my habit to lean upon the authority of great names; but it may be regarded as among the evil auguries of the times, that the opinions of Mr. Jefferson are made the theme of ridicule, while the ultra federal doctrines of Mr. Hamilton are quoted with approbation in this hall. No man was ever more ardently devoted to the cause of liberty than Mr. Jefferson; few ever possessed a more vigorous or original mind, or more independently expressed the opinions he entertained. It is to him, as much at least as to any of the great statesmen of his day, that we are indebted for what is most valuable in the free institutions under which we live.

Oct. 11, 1837.]

Sub-Treasury Bill.

[H. OF R.]

But, sir, we need not the aid of his name to vindicate the principle we maintain. Our own history gives us proofs that it is neither a new idea, nor had its birth in a factious spirit. We need only go back to the session of 1834 to find it supported by men whose patriotism and sound republican principles will not be questioned. Early in that session, Mr. Gamble, of Georgia, moved an inquiry into the practicability of dispensing with banks in our fiscal operations. Subsequently, when the deposit bill was before the House, General Gordon, then my colleague, proposed his plan for what is now called the sub-Treasury. Approving the principle, but believing it imperfect in details, I had the honor of submitting a motion to recommit the bill, with instructions to amend it so as to dispense with bank agency. On this motion the yeas and nays were called: ninety-one members, including General Gordon himself, and the opposition party almost to a man, voted in favor of the motion; one hundred and fifteen, almost exclusively the friends of the administration, voted against it. Were those who sustained it agrarians, or actuated by a spirit of factious opposition? None will assert it. For myself, I can truly say the motion was made in good faith. It was placed upon the ground of the insecurity and danger, both in a pecuniary and political view, of a connexion between this Government and banking corporations. On the contrary, the administration party derided the proposition; those particularly who have since occupied conspicuous stations in the House. The present Speaker, then chairman of the Committee of Ways and Means, warmly commended the State banks as every way competent, and worthy of all confidence. The present chairman of the Committee of Ways and Means [Mr. CAMBRELENG] also opposed it. He has reminded us of his speech, in which he said he concurred with me in the principle, but did not think that the proper time to assert it. Yes, sir, I remember it well. He approved the principle, but refused to carry it into practice. He spoke in favor of the proposition, and voted against it. The bill providing for a general deposit of public money in the State banks was passed. It was the favorite measure of the party in power. But, sir, strange to say, those who, seemingly at least, favored the principle of separation, now denounce it as factious and chimerical; and its opponents have become its warmest advocates. It is not for me to question the sincerity of either party. That is between them and their consciences. We have to do here with measures, not motives. I think now, as I thought then; and will not change my course, because the administration party, or the opposition party, may think fit to change theirs. I have never so far enlisted under the banners of either, as to give up the exercise of my own judgment, nor consented to submit to the dictation of any party, or of any man in this House, or in the other House, or in the White House. Still less will I yield up the convictions of my own mind, because my political adversaries have acknowledged their truth. The experience of the last two years has been enough to open their eyes; and I will hope, sir, they have seen their error. To adhere to an opinion, when reason and experience show it to be erroneous, is to be a bigot or a hypocrite. It is equally true that those who desert their own principles, and act in opposition to their own judgment, are slaves, mere puppets, moved by the will of another. Maelzel could construct a House of Representatives as fit to exercise the functions of legislators—yes, sir, speaker, orators, and all, down to the previous question.

But it is asked, why legislate upon the subject now? The separation has taken place, and the sub-Treasury scheme is in full operation. True, sir, but how has this been effected? By the simple mandate of the Executive. Is it not obvious, too, that this plan itself, as now practised, is insecure, and stands in need of legislative provisions?

It is the duty of Congress to provide for the safety of the

public treasure. We cannot justify ourselves if we abandon it to the control of the Executive. It is a power never safely entrusted to any but the immediate representatives of the people. Yet our legislation is almost wholly shaped, so far as concerns the revenue, by the other House, or by the Executive. We have even received bills for raising supplies from the Senate almost without a murmur. The bill for depositing the surplus with the States, it has been said, was amended at the White House, so as to meet the views of the President. Look, sir, to the history of the Treasury circular—a measure adopted in known opposition to the will of Congress, and the act repealing it pocketed by the President, and, for aught we know, now at the Hermitage. Look to the course pursued for years past, in regard to the custody of the public money—removed from the place where you had appointed it to be kept, to places you had never authorized to receive it. Yes, sir, you had ordained a union between the Government and the national bank; not, perhaps, strictly in the bonds of lawful matrimony. This union lasted for years; it was severed by the Executive fiat; our Chief Magistrate cut the knot with as little ceremony as Henry VIII, and then took up with almost as many wives as surrounded King Solomon—forty or more—eighty, sir, it is said around me. The State banks came into favor. It was an illicit connexion; the banns had never been celebrated. We were called upon to sanction both acts—the divorce, and the new union, and we complied most obediently. The State banks, in turn, have given offence, by too faithfully obeying the orders of their lord and master; and now the royal edict has gone forth, and the cry is “off with their heads.” The chamber of Blue Beard never exhibited a more bloody spectacle. Yes, sir, in little more than two years, these new favorites are discarded; and, after the flattering picture drawn of the entire security of the State banks, we now behold upon our table a bill to settle up our accounts with the late depositories of the public money. The Executive has again taken the public treasure into its keeping, or, rather, has scattered it throughout the land, without the authority of law, in the hands of thousands of individuals. I repeat, sir, it does not become us to leave it in that condition. We may avoid the danger to which it is exposed, in my humble judgment, by placing it as a special deposit in the local banks, and, in making that deposit preserve, substantially, the principle which the sub-Treasury scheme is designed to assert. Special deposits no more imply any pecuniary or political union between the Government and the banks, than such a union would spring from employing a railroad or steamboat company to transport the mail or munitions of war. I trust, therefore, sir, we shall have the aid of the chairman of the Committee of Ways and Means to amend the bill in the way I have had the honor to suggest. It would be the most effectual means of rendering the measure successful, and putting an end to the hopes of those who look to its failure as resulting in the establishment of a national bank.

Mr. GARLAND, of Virginia, thought it his duty to make some remarks on the amendment he had proposed. After replying to some arguments of his colleague in relation to the Virginia banks, he adverted to the present bill. He was sure the Government would never prosper when divorced from the banks, between whom and the people there still existed a matrimonial connexion. It was his opinion that, in less than eighteen months after the passage of this measure, the Government would seek to reunite itself with the banks. The relief now proposed to the people in lieu of the State banks, reminded him of a certain criminal, who, when on his way to the gallows, was offered a reprieve on condition of his marrying an ugly, wrinkled old woman. The man, after a moment's reflection, exclaimed,

“A sentence hard you do impart;
The woman's worse—drive on the cart.”

H. or R.]

Florida War—Sub-Treasury Bill.

[Oct. 12, 1837.]

And thus preferred hanging to a wedding on such terms. So the sentence was more preferable to the people than the system now proposed. The object of the divorce bill was to take the money from banks and to deposit it with sub-agents. But, in his opinion, taking into consideration the frailties of human nature, it would be a dangerous scheme. He did not mean to say that the officers of Government had less integrity than other men; but when the lamentable instances were called to mind where individuals of high standing had sacrificed an unblemished character for a mere paltry amount, it ought to teach a lesson to guide them in the present instance. He would repeat the words of his colleague this morning, who had said even the words of our Saviour were, "lead us not into temptation." He advocated the plan of keeping the money in the vaults of the banks, as more secure, and particularly if the amendment last offered were adopted, which provides that the banks shall receive the money as a special deposit, and without using it in any way whatever. He denied that the banks were insolvent, as had been stated. He had been informed on unquestionable authority, that they were as sound now as before they suspended specie payment. As regarded the proposed separation, he had always understood that our system of Government, although necessarily divided into many branches, was all one. But now they talked of a separation from those institutions of which the States had laid the foundation, and which they had cherished to this time. How fearful would be that time, should it ever occur, when this Government should consider it as its duty to make its action independent of the States! He did not say that gentlemen designed this, but he would entreat them to reflect whether the present measure would not pave the way for such a state of things. The true policy of Government was to cement itself more closely with the States, and he had no doubt but that the issue of Treasury notes would speedily afford relief, and enable the banks to resume specie payments. It had been said that these notes would lay the foundation of a Treasury bank, but he had no apprehension of that kind, for the restrictions to that bill would render such a result impossible. He contended that the bank note system had not had a fair trial, and referred to the Bank of France, and other institutions, in support of his position. At the conclusion of his remarks,

On motion of Mr. HAYNES, the committee rose and reported the bill to the House, without coming to any resolution thereon; when,

On motion of Mr. BRIGGS, the House adjourned.

THURSDAY, OCTOBER 12.

FLORIDA WAR.

The House proceeded to the unfinished business of yesterday morning, which was the motion of Mr. McKAY to postpone the consideration of the resolution of Mr. WISE for a committee of inquiry on the Florida war till the first Monday in December next.

Mr. McKAY made a brief explanation, stating, in substance, that he had moved the postponement because all the important points in the resolution were already within the province of different standing committees, or had been investigated before courts martial or of inquiry. As to the expenses of the war, he had no objection to a strict investigation of them; but this could be prosecuted through the standing Committee on Expenditures in the Department of War, whose duty it was to report on that subject at the next session.

Mr. ADAMS said he was happy to hear the explanation, and to learn that the gentleman from North Carolina (to whose vigilance he paid a compliment) was not, as Mr. A. had before understood him, of opinion that no investigation was necessary. Mr. A. made some remarks going

to show that the committees to which the several subjects of investigation had been formerly referred, were not likely to prosecute the inquiry with any practical efficiency. Indeed, he was of opinion that no standing committee of the House ever would conduct a scrutiny of this nature with effect, and insisted that none but a select committee, and that appointed by ballot, would be likely to do any thing to the purpose in the matter.

In reply to remarks of Mr. McKAY, on the composition of committees, and especially of the Committee on Manufactures, Mr. A. went into a history of that committee, from the time when he had entered Congress, and had, contrary to his own earnest remonstrance, been placed at its head. He gave an account of the circumstances which had attended the report by that committee of the tariff bill of 1832; went into a history of the manner in which the celebrated compromise bill had been introduced into the House, and passed without debate by force of the previous question. He made some general observations on the practice of appointing, on all the important committees of the House, a majority of members in favor of the administration; to which he did not object; but stated that, until the late era of reform, the opposite practice had prevailed. He objected to the postponement, as the committee would want all its time, and much useful progress might be made during the recess.

Mr. WILLIAMS, of North Carolina, demanded the yeas and nays on the question of postponement, and they were ordered by the House.

Some conversation took place between Messrs. BOND, McKAY, and REED, as to the necessity of the investigation proposed, and as to the abuses which exist in the Indian relations of the country.

Mr. BOND took occasion to introduce a statement of appropriations, within the last two years, for the suppression of Indian hostilities, all these expenditures being so much in addition to the ordinary expenses of the military establishment.

Mr. WHITTLESEY, of Ohio, hoped if the motion for postponement prevailed, one good result would follow: that the Committee on Expenditures would discharge the duties assigned them. He animadverted with much particularity upon the neglect of duty which characterizes so many of the standing committees of the House, and the difficulty even of procuring meetings for the performance of their duties.

Mr. A. H. SHEPPERD, of North Carolina, made some remarks to a similar purpose, and gave an account of the manner in which he had performed his duty as chairman of the Committee on Expenditures in the Department of State; stating some facts going to show the necessity of vigilance in the discharge of their duty by the Committees on Expenditures in the several Departments.

SUB-TREASURY BILL.

The House then proceeded to the orders of the day, and went again into Committee of the Whole on the state of the Union, (Mr. F. O. J. SMITH in the chair,) on the Senate's sub-Treasury bill.

Mr. RICE GARLAND made an ineffectual attempt to have the bill laid aside, to take up the bill to settle with the deposit banks.

Mr. HAYNES, who was entitled to the floor, addressed the committee as follows:

Mr. Chairman: At an early stage of this discussion, while the Committee of the Whole on the state of the Union was engaged in the consideration of the bill to postpone the fourth instalment of deposit with the States, so extraordinary were some of the statements of fact, inferences, and arguments, presented by some gentlemen who took part in it, more especially the remarks made by my honorable friend from South Carolina, [Mr. THOMPSON,]

Oct. 12, 1837.]

Sub-Treasury Bill.

[H. OF R.]

that nothing but the position occupied by me could have prevented my endeavoring to offer an immediate reply. That honorable gentleman, in his zeal to throw upon the late and present administrations the burden of the present difficulties and embarrassments of this country, was pleased to institute a comparison between the course pursued by the monarchies of Great Britain and France, in periods of commercial distress in those countries, for the purpose of contrasting their paternal solicitude for their subjects, and the grievous oppression of the American Government towards its citizens. Among the extraordinary statements sometimes ventured in this House, I was not prepared to hear an honorable gentleman speak in terms of eulogy of the conduct of the French Government in the memorable explosion which terminated the Mississippi bubble. The honorable gentleman from South Carolina surely has not lately revived his historical recollections, or he would have held very different language in reference to the conduct of the French Government at the period to which he referred.

What, Mr. Chairman, is the history of the Mississippi bubble? A foreign adventurer established a bank in Paris in the year 1716 or '17, which, having been managed to apparent advantage for a few months, was purchased in the name of the King in the course of the following year. Banking was then a novelty in France, and the scheme seemed to work so successfully, that an emission of paper sufficient to redeem the public debt was issued shortly after the bank became the property of the King. It would be a waste of time to recapitulate the measures which were adopted to enable this bank to monopolize the whole external commerce of France. By what means it is unnecessary to inquire, the shares, originally of the value of 500 livres, were raised, by a series of speculations, to the enormous advance of 10,000. The Government having become alarmed by the wild and reckless spirit of speculation produced by an immense issue of bank notes without a specie fund for their redemption, and fearing there might be a run upon the bank, issued an edict, under severe penalties, that no individual should have in his possession, in coin, more than the sum of 500 livres. To aid the bank in sustaining its credit, the livre, in coin, was reduced or debased to one-half its original value; and, to cover the difference between the livre in coin and the livre in paper, the latter was made to undergo such successive reductions in value as should, in the course of a few months, bring it down to the standard of the debased coin of that denomination. All would not do to sustain the credit of the bank; and, in the course of three or four years from its establishment, having afloat the enormous sum of four or five hundred millions of dollars of irredeemable paper, the notable scheme was wound up by issuing an edict reducing the price of shares to 5,000 livres; which was shortly followed by another, compelling its holders to fund the bills for the miserable pittance of an annuity for fifty years' purchase, and that, so far as I can ascertain, without interest. This, sir, is a statement of what the honorable gentleman from South Carolina has been pleased to eulogize, as showing the paternal care of the French Government for its subjects.

How far it tallies with the history of the late and present administrations of this Government, the committee can judge. Of the parallel the honorable gentleman was pleased to institute between the course of the British and American Governments towards their subjects and citizens, in periods of pressure and alarm, I shall speak hereafter. Flat, stale, and unprofitable as it would seem to be, I was not particularly surprised to hear the American Government charged, by almost every gentleman opposed to the system of measures under consideration, with having produced the extraordinary state of things which has existed for the last few months in this country. Such is the infirmity of our nature, that what is often repeated may

sometimes come to be believed as truth, when at its original promulgation it was known to contain no one single element of truth whatsoever. And in what manner has this grave charge been supported? If it would not be disrespectful to those who have made it, I would say, we have had "declamation without argument, and assertion without proof." That the late President should have come in for a full measure of condemnation is not wonderful, considering the tone in which the opposition have spoken of him ever since the commencement of his administration. But, sir, I will not imitate the example of those who have ascribed the late commercial revulsion to Executive usurpation, by relying on a mere contradiction of their charge, although, in all fairness, I might do so.

The first specification against General Jackson is, that, by refusing to sanction the recharter of the United States Bank, he opened the field for the creation and operation of State banks without limitation or control; and, as a consequence, that the country has been flooded with irredeemable paper. And here it may be proper to remark, that the opponents of the late and present administrations are not agreed whether the paper currency has, or has not, been extended to an unreasonable amount. If I did not greatly misunderstand the honorable gentleman from South Carolina, a considerable portion of his remarks was intended to show that the local bank issues had, at no period, gone beyond their proper and healthful proportion to the specie in this country. If this argument be true—and for the present I shall pass it by without further examination—this grave charge of Executive influence in producing an unsafe increase of bank capital and circulation, must fall to the ground. That the veto upon the bill to recharter the United States Bank in 1832, may have had some influence in increasing the establishment of local banks, and their consequent issues, I might be disposed to admit, if the testimony of a distinguished financier, high in the confidence of my honorable friend from South Carolina, together with considerations connected with it, did not go to establish the contrary. It is well known that the advocates of a national bank base their support of that measure on the ground that it can and will so regulate and control the issues of the local banks, as to keep them in a sound and healthy condition. For the purpose of the present argument, it is sufficient that I admit it. It is equally well known, that after a charter had been granted to the stockholders of the late United States bank by the State of Pennsylvania, its president congratulated them upon its severance of the connexion which had existed between the Government and the old bank, because it was better for both, and the bank was stronger without it than with it. Put this testimony together, and how dare any gentleman say that the circulation of the local banks has been unsound or excessive? They shall not discredit their own witness, Mr. Biddle, for the purpose of extricating themselves from the contradictions by which they are environed. What then is the result? Either that there has been no excess of local bank paper in circulation, or a national bank is impotent to restrain it. I care not which horn of the dilemma gentlemen may select—either is fatal to their favorite scheme of a national bank. If I understood the honorable gentleman from South Carolina, he argued, or, if he did not so argue, it is a fair inference from his remarks upon the currency, that there had been no overtrading in this country. And here, too, if I am correct in my recollection of what was said by that gentleman, he is sustained by the testimony of Mr. Biddle, given in a letter addressed to the distinguished member from Massachusetts [Mr. ADAMS] about the time Congress convened in 1836, in which he showed by the state of foreign exchange that this country had not overtraded.

It is true, that in a subsequent letter, addressed by him to the same distinguished individual, he did say that we had

H. or R.]

Sub-Treasury Bill.

[Oct. 12, 1837.]

eaten, and drunken, and worn, a little too much, and we must pay for it. How his friends can reconcile the inconsistency, it is not for me to determine. But as other gentlemen have pursued a line of argument very different from that trodden by my friend from South Carolina, it may be necessary that I should show in what they have been mistaken. They seem to think, one and all, except the honorable gentleman from South Carolina, that the increase of local banks and banking was occasioned entirely by the measures of General Jackson's administration, and in urging this charge we have been taunted with the predictions of two distinguished citizens of Massachusetts, one a member of this, [Mr. ADAMS,] and the other a member of another branch of this Government, [Mr. WEBSTER.] It is said, and I do not pretend to question it, that it was foretold by both the individuals referred to, that expansion, overtrading, pressure, and ruin, would be the result of the Executive veto of the United States Bank charter, and the withdrawal of the public money from the custody of that institution. Well might those gentlemen predict such a result, when their own immediate fellow-citizens were so actively engaged in the bringing about its fulfilment. And here permit me to make one observation, which seems to be a fair inference from the general tenor of the remarks upon this subject, that it would seem to be imputed to the friends of the late and present administrations, that they have mainly contributed to that creation of local banks and banking, under which it is alleged the country is now suffering. For the purpose of ascertaining not only the rate of increase of banking capital within the seven years, from 1830 to 1836 inclusive, and the States which have contributed to it in the largest proportions, I will present a table comprising five administration and five anti-administration States.

Banking capital in—

	1830.	1836.
New York - - -	\$20,083,353	\$37,308,000
Maine - - -	2,050,000	3,935,000
New Hampshire - -	1,791,000	2,603,000
Virginia - - -	5,571,000	6,511,000
North Carolina - -	3,195,000	2,664,000
	<u>\$32,690,353</u>	<u>\$53,076,000</u>
		32,690,353
Increase - - -	-	<u>\$20,385,643</u>
Massachusetts - - -	\$20,420,000	\$40,830,000
Vermont - - -	432,000	1,125,000
Maryland - - -	6,250,495	8,203,000
South Carolina - -	4,631,000	7,936,000
Kentucky - - -	1,875,000	5,116,000
	<u>\$33,608,495</u>	<u>\$63,210,000</u>
		33,608,495
Increase - - -	-	<u>\$29,601,505</u>

I have not considered it necessary to carry the comparison further, by arraying any additional State. This selection probably makes it as fair as if it included all the rest. But does not the result excite our wonder? That, in five opposition States, containing an aggregate representative population of two millions and a quarter, without fractions, and sending to this House forty-seven representatives, the increase of banking capital within the period referred to should have exceeded the increase in the five administration States, containing a representative population of upwards of four millions, and sending here eighty-seven representatives, by more than nine millions of dollars; and that the increase in Massachusetts alone, loyal as she is to a national bank, should exceed the increase in

all the five administration States just mentioned, notwithstanding that the greatest commercial city in the Union is situated in one of them! Henceforward, let no member of the opposition taunt us with the increase of local banks and banking, nor with the fulfilment of Massachusetts predictions. It is preposterous, sir, in view of these facts, to accuse General Jackson and his friends of their agency in this business.

Well may it have happened that some who have made the charge were unable to see the mote in our eye, because there was a beam in their own. Suppose, then, it be conceded for this argument that local banks and issues have been inordinately increased: let those who have had the largest share in the mischief take their part of the odium, and I am satisfied. But until they shall have done so, let them not again say that we did it. I might have adverted to facts in the banking history of other States, under the control of those opposed to the late and present administrations, by which the disproportion would be increased; but it cannot be necessary. As I have shown the relative increase of banks in a series of administration and anti-administration States, I will make a single observation upon the subject of the general expansion of the paper circulation, which is believed to have occurred since the first of December, 1833. At that period, the order had been but recently issued to change the custody of the public money from the Bank of the United States to the local banks. Every one remembers the panic and pressure which existed from a short time after the meeting of Congress in 1833, to the close of that protracted session in 1834. There was no expansion, there could have been none, in the panic-stricken state of the country throughout that whole session. It is true that within a short time after the adjournment the storm subsided, and things gradually returned to their accustomed channels. What followed?

It has been asserted, and, so far as I know, without contradiction, that from about November, 1834, to July, 1835, the Bank of the United States extended its discounts about twenty, and its circulation about ten millions of dollars, thus taking the lead in stimulating at its commencement, and, as I believe, creating, that very spirit of speculation under which, so far as causes in this country have been concerned, we are now laboring.

It is true we have heard much about the effect of the specie circular in producing the present embarrassments of the country. But, for my own part, I have no doubt that its effect was any thing but injurious. If its operation was to restrain, as it certainly must have been, and not to stimulate, the speculations in public lands, its effect could only have been salutary. But I forbear to go further into that subject. Before I dismiss my review of the causes which have contributed to the multiplication of local banks, and the increase of their capital, I must refer to one which, above all others, aside from the expanding resources and augmented population of the country, has, in my opinion, been of the most efficient in bringing about that result; and that is, the rapid and final extinction of the public debt since 1829. In whatever form a promise to pay money may be made, it is credit; in all conceivable varieties, from the open account to the instrument under seal, including bank notes and stocks, whether of corporations or the Government, and in all these various forms may that credit be used for commercial purposes. But it is not particularly for the purpose of illustrating the commercial uses of the evidences of the public debt, that I now speak of the effect produced, by the redemption of that debt, upon the banking institutions of the country. I intend to speak of it merely as producing a transfer of capital from one employment to another.

In the year 1830, the public debt amounted to forty millions of dollars, which was redeemed in the short period of

Oct. 12, 1837.]

Sub-Treasury Bill.

[H. OF R.]

four years. A very large portion of that debt (how much, it is not particularly necessary to mention) was owned by capitalists in the commercial portions of the Union; owned generally by those who preferred the security of the Government, at even a moderate rate of interest, to any private security whatsoever, and who would have been glad that their stock could have been irredeemable forever. But the Government had the right and the means to redeem it, and it was redeemed accordingly.

The same motive which gave a preference to Government security would naturally prefer the next best security, and that security existed, or was to be obtained, by banking corporations. Hence the redemption of the public debt, at least in the commercial portions of the Union, by releasing the capital which had been invested in it, was one of the most efficient causes, I doubt not the most efficient cause, of increasing the number and capital of the local banks in that portion of the Union to which I have referred.

In the younger States, where capital was scarce, other causes have been instrumental to the same result—the multiplication of banks, and the augmentation of their capital. Nor is it to be wondered at that the scarcity of a circulating medium, in the States last referred to, has been mainly instrumental in introducing the establishment of banks. When we consider a well-settled principle of trade—that a profitable channel of enterprise always, for a time, tempts adventurers into it, until its profits are brought down to the level of other pursuits, and for a time below them—especially when capital is suddenly released from other pursuits, and left unproductive in the hands of its owners, we need not doubt that much of the over-banking of this country has resulted from the redemption of the public debt. Having, as I think, acquitted the late administration of the charge of producing the banking mania which has manifested itself within the last seven years, I will proceed to inquire into the immediate causes which have produced the revulsion under which the country is now laboring. Whatever may be the opinions of others, I have no doubt that this revulsion has been occasioned by the heedless extension of credit in every form, in which credit may be employed, as by bank issues, bills of exchange, &c.

It may be impossible not only to ascertain what is the amount of the currency of a country, but what should be its proportion to the commerce of that country; nor is it at all material to my purpose, in regard to the present inquiry: that individual or community has overtraded which cannot meet its engagements. Will any one controvert this proposition? If it be incontrovertible, and I believe it to be so, have the banks been guilty of overbanking, and the merchants of overtrading?

The present condition of the country can answer this question. With a large balance of foreign debt unsatisfied, and for which there are no present means of satisfaction, who can deny that the merchants have overtraded? And are the banks in a better condition? How stood the accounts of the late deposit banks as to immediate means and liabilities on the 15th of August? They show immediate liabilities to the amount of one hundred and four millions of dollars, and immediate means to the amount of but forty-four millions and about eight hundred and nine thousand dollars, of which only ten millions five hundred and eighty thousand dollars and a fraction was in specie. In the general account of means and liabilities, it is true that a large amount of these obligations are to the stockholders; but the fact of the great disproportion between their discounts and circulation, shows conclusively that much of the stock itself has been withdrawn from them, and exists in mere credit in the notes of the stockholders; thus showing that the supposed capital of the banks is credit, and not money. But if evidence is wanting, as conclusive as evidence can be, to prove that the banks have overtraded, it

is found in the fact that they cannot redeem their promises, and at best are only able to exchange one promise for another. For my part, I cannot conceive how any advocate of the banks can pretend that they have not overtraded to an enormous extent, without indirectly charging them with deliberate and wilful fraud upon the public. It may be said that the banks are unable to meet their engagements because their debtors are unable to pay them. But this only carries us one step further to the conclusion that the whole country has overtraded—a fact of which I have not the smallest doubt. I might have shown the enormous disproportion between the value of our exports and imports for the two or three years ending with the year 1836, of the immense sums vested in public lands, the disproportion between the prices of various species of property, and the annual profits of such property; but I have chosen to save the committee and myself such details, and only to present incontrovertible facts, establishing, beyond the shadow of doubt, that the banks have overbanked, and the traders have overtraded. What has stimulated to all this is the inordinate hastening to be rich. I will not stop to inquire whether this overtrading has been occasioned exclusively by an overissue of paper money, from reduced supply, or speculative demand for various commodities, believing as I do that the first and last of these causes have operated jointly in producing the present embarrassment. For the first, there is no remedy but the partial one of reducing and reforming the currency. I may be asked, if, as you suppose, the Government is free from the sin of producing the evils under which the country now labors, what is the remedy for relieving them? I answer, that the remedy is mainly to be found in the industry and economy of the people. So far as the Government can indirectly relieve, by its action on the deposit banks, and the obligations of the importing merchants, it can go, and no further. But, in its action on these subjects, its relief will reach the remotest ramifications of society. It has been well said, that the mercantile community pervades the remotest portion of the body politic. If this be so, and none can deny it, relief to the importers will be felt by the humblest and remotest citizen of this great republic to whom mercantile credit has been extended. And, although indulgence to the suspended deposit banks will not reach to so wide an extent, it will relieve those who stand in the greatest need of relief. Thus, the passage of the bills to extend indulgence on duty bonds, and to give time to the banks gradually to call in their dues from their debtors, will extend relief to a number of our embarrassed fellow-citizens, which no one is able to estimate. And here I may be permitted to reply to the remarks of my honorable friend from South Carolina, in which he endeavored to contrast the conduct of the British Government, in 1797, in a period of commercial distress, with that of his own Government, in this season of pressure and embarrassment. My honorable friend told us that the pressure in Great Britain was relieved, at the period referred to, by the issue of no more than twelve millions of exchequer bills. And if he has attended to the state of the money market at New York, he must know that it has been decidedly improved even by the passage of the bills which have come down from the Senate, especially those giving indulgence on duty bonds, and authorizing the issue of Treasury notes, especially the latter. How, then, can he extol the British Government and condemn his own for adopting a measure of the same character? What distinction can be drawn between exchequer bills in the one case and Treasury notes in the other, in their effects, I am at a loss to discover. I pass over the question whether or not there is or soon will be a deficit in the Treasury. To me it seems to be a question on which there can be but one opinion: that there is such a deficit, and that it can only be met by using the credit of the Government. Whether it is best to use it in the form of Treas-

H. of R.]

Sub-Treasury Bill.

[Oct. 12, 1837.]

ry notes, or by authorizing a loan in the ordinary way, is a matter of indifference, as it respects the obligations which will be contracted by the Government. Nor am I sufficiently versed in questions of finance to say which will be the preferable mode. But, to my mind, the most immediate and direct is the course best suited to the present wants of the Government, and that is to issue Treasury notes. Nor can it be of any very great consequence whether they are hoarded or go into general circulation. In either case, they will displace an equal amount of the present circulating medium, driving it out of or into circulation, as they may be laid up or otherwise; and if we may be permitted to look forward to their final effect, they will contribute, at no distant day, most materially to restore a sound currency. Situated as I was during the discussion of the bill to postpone the fourth instalment of deposits with the States, connected as it is with the bills yet to be disposed of, I may be permitted, in the latitude given to the debate, to say a word or two upon it.

The period of making that deposit was at hand; the Treasury had not the means of making it, nor could they be commanded without creating a public debt. Thus necessarily arose the question, whether Congress had the power to tax the people to enable it to raise a fund to deposit in the treasuries of the States. To my mind, the answer was clear, that the constitution had conferred no such power upon us. If it had, the policy might well be doubted of taxing the people with one hand, and returning the money so raised with the other, by which they would receive it with the loss of the expense of collecting, and the interest for the time intervening between the collection and transfer, subject to the serious objection that it would never, it could never, be equitably returned to those from whom it had been collected.

I have already adverted to the causes which led to the present embarrassments of the country—the overbanking and overtrading which have characterized its business transactions for the last two or three years. But as these were the remote, what was the efficient or proximate cause of the present revulsion both in Great Britain and America? I answer, the course adopted by the Bank of England when called upon to prop the falling credit of American houses, so called, but English bankers, who had gone enormously beyond their means in the acceptance of drafts from this country for which the owners had furnished no fund of redemption whatsoever. That measure of the bank not only destroyed for the time the credit of the owners of the bills referred to, but shook American credit to its foundation, and resulted in the immediate and ruinous fall in the price of the great staple of our country, by which the means of American merchants were reduced to almost one-half the amount of their value at the time their debts were contracted. This being the fact, which none can question, is it wonderful that consternation and ruin spread over the land? If any one can doubt the effect of that measure of the bank, in applying the match which has produced this mighty explosion, he is a much greater sceptic than I am. If any other proof were wanting besides open and apparent connexion of the cause and its effect, it will be found in the existing state of the money market in Great Britain. Shortly after the Bank of England had, intentionally or unintentionally I shall not stop to inquire, knocked down the price of cotton, she came forward to sustain the private bankers who had involved themselves by their American acceptances; the London money market became easy, and we are now told that money is a drug there, and can be obtained on unquestionable security for three and half per cent. per annum, and probably much lower. Thus am I sustained in the assertion that the immediate and efficient cause of the present pecuniary condition of this country, was the conduct of the Bank of England towards the British acceptors of American bills of exchange, and the fall of

cotton, which was produced by it. Panic, then, on the part of that bank, or a motive so much worse that I will not impute it, was the match that lighted up this tremendous explosion. Nor was a similar course in this country without its instrumentality, if we have been correctly informed—that from first to last there were millions of idle capital in New York, Boston, and other cities, which remained idle for want of that confidence between man and man, which is the life-blood of credit in every country in the world. I have already stated what measures might, and as I supposed would, be adopted by Congress for the relief of the country in the present extraordinary emergency: extension of time on duty bonds, and reasonable indulgence to the suspended deposit banks.

But can no measures be adopted as preventives against the recurrence of a similar calamity? I think there can; and that they are to be found, not in the charter of a national bank, but in the measures proposed for ultimately collecting the public dues in the only medium recognised by the constitution as money, and in changing the mode of keeping the public revenue. But I may be asked, why not establish a national bank? I answer, first, not only because the constitution confers no power to do so, either in terms or by rational inference, but its history forbids the implication of it in the fact that the federal convention was asked to confer it, and it refused preemtorily to do so. I will not so far insult the committee as to go over the argument to show how far any doubt arising upon the face of an instrument is to be settled by a reference to its history. In the next place I answer, that if the power had been explicitly granted in the constitution, it would be inexpedient to exercise it. It would be inexpedient, first, because the whole history of the late national bank, and its successor, the United States Bank of Pennsylvania, conclusively shows, that it cannot, or it will not, prevent overbanking, and consequent overtrading, through the instrumentality of the local banks.

New as I may be to public affairs, I have not forgotten the history of the commercial embarrassment which reached its acme in 1819, less than three years from the time when the United States Bank, established avowedly to prevent the future recurrence of excessive local bank circulation, had gone into operation; an embarrassment occasioned by the same spirit of reckless adventure in public lands, and every thing else that could be made the subject of speculation, which characterized the money transactions of the country in 1835 and 1836. If there are any here too young to remember, or who have been too indolent to acquire, information upon that subject, it is sufficient to point them to the impotence of the Pennsylvania Bank of the United States, avowed by its president within two short years to be stronger than its predecessor, to ward off such a calamity. It is true, that when its suspension was announced in May last, its presiding officer informed the country that if it had consulted its own strength, that suspension would not have been necessary.

But, if the fact was as he stated, how much worse was that act than it has been characterized by a distinguished individual to whom the declaration was made let an insulted and injured people decide. If it was true, there are no terms of condemnation known to human language strong enough to express the execration which it merits.

But there is another, and, to my mind, equally strong, or stronger, if possible, objection to the establishment of a national bank. It is the political character assumed by the late bank, especially when coupled with its foreign connexions. To the employment of foreign capital, wielded by American hands, directed by American hearts, in furtherance of objects of public or private enterprise, I make no objection. But I protest most solemnly against permitting in its use the shadow of foreign control or direction.

OCT. 12, 1837.]

Sub-Treasury Bill.

[H. OF R.]

The late Bank of the United States was believed to have been influenced in its political course by foreign stockholders, not only having no sympathy with our political institutions, but hostile to them. If it was so—and of the fact there can be little or no doubt—how much closer is the connexion of its successor with foreigners, how much more powerful will be their influence over it, let recent facts, showing the establishment of its agencies in Liverpool and London, attest. Let me not be answered that a national bank is advocated. I am not to be misled by such a declaration, from my firm conviction that the war upon the late and present administrations of this Government was and is waged for the revival of the Bank of the United States.

Having shown, as I think, that such an institution is not only unconstitutional, but dangerous to the constitution itself, I come to the measures which, in my judgment, are best calculated to save the country, so far as our legislation can save it, from future revulsion and embarrassment; and here I take occasion to say, that no free Government can so legislate as entirely to prevent their recurrence. But, before proceeding to consider the measures referred to, I may be permitted to state one other objection to the establishment of a national bank: it is the clearly and strongly expressed decision of the people against it.

In discussing the measures most likely so to check and control the local banks, as to restrain their issues within safe and proper limits, I will first consider the proposition to require all payments to the Government to be ultimately made in the constitutional coin of the country, and in that only. It has been said by gentlemen opposed to this, what they call innovation, that it is calculated and intended to destroy the system of credit upon which this country has reached its present elevated rank among the nations of the world. But in what manner can it effect such a result? Is any member of this committee prepared to permit the debts due to the Government to be discharged in irredeemable and inconvertible paper? If not, who can entertain a reasonable objection to requiring their payment, not in promises, but money?

Where would be the difference between the payment of coin or bank notes, convertible into it at the will of the holder, in its effect upon the interest of the banks? If they should be always ready, as they certainly should be, to redeem their notes at the will of the holder, what hardship can there be in requiring that the Government debtor shall so convert them without making it necessary that it should be done by the collecting officers of the Government? It may be said that, as it would only be a question of convenience between private individuals and the collecting officers, the convenience of the community should always be preferred. But, upon a closer examination, it will be found that, even upon this point, there is no equality whatsoever. The collecting agents of the Government may be engaged, and in the large importing cities will certainly be almost constantly, in receiving money for the Government; therefore it is much more reasonable that individuals should convert their bank notes into specie before making payment to the collecting agents of the Government, than that the whole burden should fall upon these agents. But I apprehend, that to require payment to the Government in coin, in every instance, will have a salutary influence upon specie paying banks, so called, in restraining imprudent issues of paper by them. That no injustice would be done either to individuals or the banks, upon the principle that all bank paper shall be convertible into specie, by the adoption of the scheme proposed, is, to my mind, as clear and conclusive as mathematical demonstration could make it. But we have heard it said by the opponents of this measure, who are alike the opponents of the late and present administrations, with, perhaps, occasional exceptions, that by this scheme we should create

one currency for the Government and another for the people. But how such an objection can be sustained I cannot imagine. Gentlemen, in making it, would seem to confound the present condition of bank paper with what would be widely different, if it possessed the supposed convertibility, the only element which can entitle it to the character of money. If the operation of the system of specie payments should be such as to bring back the banks to the fair and proper redemption of their notes, I would ask in what essential particular would the one currency differ from the other? In fact, the whole currency of the country would then consist of specie or credits equivalent: a result which would do more to prevent the indulgence of rash and ruinous speculation, than any other measure the Government could adopt short of the entire destruction of that system of commercial credit which, properly controlled by prudent foresight and economy, is so essential to the maintenance of our national and individual prosperity. If I have been so fortunate as to make my meaning understood, I think I have shown that the scheme proposed would establish a currency of equal value to the Government and the people, and such an one as would lay the fabric of our prosperity on foundations too stable ever to be again shaken down by such revulsions as have occurred, at least on two occasions, within less than the last twenty years.

In the discussion which has taken place upon the various propositions presented by the Committee of Ways and Means, in conformity to Executive recommendation, we have heard much about taking care of the Government and neglecting the people. What, sir, is the Government? It is but an agency constituted by the people themselves, for the promotion of their own prosperity and happiness. And what, I would ask, is desired in the measures proposed for the relief of the Government, but to give it the means of carrying out the will of the people? To my mind, it is the idlest of all clamors to say, that, because we intend to place the Government in a condition to execute the purpose of its creation, that purpose being to secure the public prosperity and happiness, we are providing for the Government, as something distinct from, and opposed to, the interests of the people.

The last particular topic upon which I desire to offer a few observations to the consideration of the committee, is the mode proposed for the safe-keeping of the public revenue. And what is that mode, stripped of all the mystery and disguise which has been attempted to be thrown around it, by the incessant outcry of exchequer banks, Treasury bank, sub-Treasury system, and all the et ceteras gentlemen have applied to it? Nothing more nor less than the plain republican, unsophisticated scheme of requiring the receivers of the public revenue to be answerable for its safe-keeping. What feature of a bank can it be possibly supposed to possess? It is not contemplated to authorize the issue of paper of any kind as the mere representative of the money so deposited for safe-keeping.

All that is intended, beyond the payment of money, upon properly authorized drafts from the Treasury, to the public creditors, is the occasional transfer of it, as circumstances may require, from one place to another, for the disbursements of the Government. It is not, therefore—it cannot in any sense be so considered—a bank of any sort whatever.

What, then, are the objections to it? That it will increase the patronage of the Government, by the increase of public officers, and the additional expenditure necessary for their compensation; that the money will be unsafe in the custody of the public officers; and that it will open the door to the corrupt influence of the Executive, and may lead to the establishment of an odious despotism upon the ruins of the constitution. The very decisive vote which has been recently given, here and elsewhere, on the sub-

H. of R.]

Sub-Treasury Bill.

[Oct. 12, 1837.]

ject of a national bank, renders it unnecessary for me to discuss its merit as a public depository. The only comparison which it is then necessary to institute is, between the system pursued and a return to the employment of the local banks. Nor does it seem material to carry that comparison further than the consideration of the objections just stated to the placing the custody of the revenue in the hands of the collecting officers of the Government. So far as I have heard, no one is willing to restore the revenue to the custody of the banks, upon any other principle than as a special deposit, not to be used by them for any purpose, and to be paid over to the orders of the Treasury whenever it may be required.

Nor is it proposed, so far as I have understood, to ask the banks to perform this service without just compensation. What compensation, I would ask, do gentlemen suppose they would require for such service, including the risk of safely keeping the public money?

I know but little of banking transactions, but have little doubt the service required would not be performed by them for less than one per centum upon the money committed to their charge. Taking, then, the public revenue at twenty millions per annum, and the cost of its custody would be two hundred thousand dollars.

But, that I may be within the rate which must be conceded by every one as low enough, I will fix it at one-half of one per cent., and the annual expense will be one hundred thousand dollars; a sum larger by forty thousand dollars than the sum estimated by the Secretary of the Treasury, if it shall be committed to the collecting agents of the Government. On the score of economy, therefore, the calculation is decidedly in favor of the system proposed.

But to the question of patronage. How much will Executive patronage be increased by the appointment of a small additional number of clerks in some half a dozen cities or less in this Union? So far from being increased, it will be lessened in comparison with the numerous banks which would seek the custody of the public money, and to which it would be committed, the compensation being made an object to them, and without it they would not assume the responsibility, by a President desirous to establish the reign of influence and corruption. It may be answered, that there would be less danger of a corrupt use of the public money, if placed in the keeping of the banks, than in the hands of public officers. For my part, I cannot perceive the force of such an objection. Is it said that there is danger of servility on account of dependence of public agents upon the Executive for their offices? The question is then resolved into a question of money, and as that reduces the objection against the public officers and the bank to the same principle, it is unworthy of further consideration. But, it may be said that the chances of Executive corruption will be increased by the greater facility of obtaining money from public officers than from the banks. To this, I answer, that there can be no possible difference in the matter. The same checks and control exist in the one case as the other. And the banks are as much bound to answer the drafts of the public Treasury, as the public officers could be, and would as readily answer them. Human nature is essentially the same under equal circumstances, and the officers of banks would be quite as likely to act under the influence of temptation to execute a corrupt Executive will, sufficient inducements being offered, as would the collecting officers of the Government. I come now to the only remaining question—the question of the safety of the public revenue under the system proposed. And in discussing this question, I must be permitted to inquire, what magic is imparted by an act of incorporation, by which the honesty of men becomes so purified and refined, that they are placed above the ordinary level of their race? If the homely proverb of an English lawyer of former days be true, corporation moral-

ity has nothing to boast of when compared with that of individuals. But it is said that, allowing that public collecting officers are generally as honest as the officers of banks, yet the stock of the latter furnishes better security than an individual can offer. On this point I am at issue with the objector, and say that the public officer will be able to make the Government as secure as the banks.

But, if it were allowed that occasional default might be the consequence of confiding the custody of the public money to the collecting officers, how long would it be before it would amount to the loss and inconvenience already experienced by employing the banks, and receiving bank paper in payment for public lands before the system of cash payments was adopted, or the inconvenience already experienced within the last five months, not to say—for yet it cannot be said—what losses may in the end be sustained in the debts now due by the late deposit banks?

When Mr. HAYNES had taken his seat—

Mr. CALHOUN, of Mass., rose and said: An attempt had been made during the discussions of this session to give to the financial system of this country a new character, an impression of novelty, an air of mystification. Gentlemen who had taken a prominent part in the discussions in this hall and elsewhere, had spoken of an extraordinary crisis in the monetary affairs of the age, a development of principles hitherto unknown or not acted upon, of a great financial theorem or issue of modern times.

This pretension seems to me (said Mr. C.) to be an arrogant one, if honestly believed; and, if not, to be intended solely to cover over some most singular changes of opinion. Whatever may be the truth in this regard, certainly these assumptions have their origin in an undue fondness for theorizing and speculating. I have no antipathy to a spirit of this kind, if kept within proper bounds, and applied to suitable objects. In all that can contribute to human happiness, or that may tend to elevate the mass of mankind, I have the strongest sympathy with those who are philanthropically engaged in pointing out a new and better way, and for the abundant reason that they are giving their thoughts to what, unfortunately, does not attract the universal or even general interest of our race.

But, in reference to subjects which are of every day concern, which enter into the constant business of existence, and which form an essential and prominent feature in all the aims and objects of the industry of our country, I cannot but look upon this undue attachment to theory as a sore evil. The subject of finance is peculiarly practical, and minds of a practical cast are almost the only ones that master its details, and meet with success in its pursuit. Whatever pertains to the finances of the country, to its business, and its currency, is better, far better understood by men whose lives are devoted to that business, by men of large and long-earned experience, than by any mere politicians, however ingeniously or adroitly they may theorize. And certain it is that, in this country, and in every country where civilization and intelligence have left their mark, the wisest, profoundest, and most successful statesmen have been those who, in their financial systems, have drawn most extensively upon the resources and experience of men of practical business.

The mingling of matters of business and of financial institutions with partisan politics I look upon as the curse—the very evil genius of our country. It is this which lies at the bottom of all our troubles and distresses as a people, and which causes the administration of the Government to be so loudly and emphatically complained against. So long as the politicians continue to drag the business of the country within the vortex of politics, and to make it tributary to their own personal aggrandizement, to their own unpatriotic objects, so long will derangement and distraction reign in both.

We were yesterday asked quite imposingly by the gen-

Oct. 12, 1837.]

Sub-Treasury Bill.

[H. OF R.]

tleman from Virginia, [Mr. HUNTER,] why not carry that system of analysis and induction into finance, which has been brought to bear so successfully upon science generally? I have given, I think, the true answer: finance is essentially practical; in all its operations analysis and induction are necessarily and incessantly at work.

With such views, I find no difficulty in determining where to look for guidance and direction in all questions connected with currency and business. There is no safety but in the lessons of past experience. And what is the voice which the experience of our country utters upon this important subject? If we examine our past history, we shall find that our financial system has, for the most part, uniformly worked well; and that nearly all our derangements and embarrassments have arisen from the obtrusive interference of politics and politicians. Legislation has always been necessary in order to give the country a suitable currency. When this has been effected, and the currency has been suffered to take its own course, and to be regulated by the usages and laws of trade practically established, and always understood by business men, nothing has ever interfered with or interrupted the steady progress of both currency and business, but some event, rarely occurring, extraordinary in its character and overwhelming and controlling in its influence. In the conflicts of our neutrality with foreign aggression; in the restrictions upon our commerce; and in the measure of war, which form a part of our past history, we find examples of such events. Aside from these, our prosperity has been uniform, except when checked by occasional and short-lived overaction. This latter is a state of thing; not of very frequent occurrence, which usually subsides rapidly under the unfailing operations of the laws of trade and the principles of a just political economy. With these exceptions, I repeat the important lesson derived from our past experience, that all our troubles and annoyances have originated in the unhallowed connexion of politics and business, for purposes of momentary triumph to the former, and with disaster to the latter.

We come to the great question which runs through the discussion of all the measures proposed to us at this extraordinary session. What is the cause of the embarrassments which have now so long afflicted the country?

We are told by the President, in his recent message, that the true cause is overaction. I object to this position, that, instead of being the assignment of a cause, it is simply a statement of the fact in another form. The country has suffered, and is still suffering, from overaction; that is, from overtrading and overspeculating. And the only question which can sensibly be asked or answered is, what has caused this overaction; to what is it attributable? Are we to seek its origin in the abandonment of those wholesome laws of trade, to which I have already referred, by the practical and sagacious business-men of the community, or is it to be found in the measures of the administration affecting the national currency? What induced the hordes of anxious speculators to precipitate themselves upon the great public domain of the West? What induced another class of adventurers to take advantage of the boon proposed by the Government, in the extraordinary, and, in some cases, most indecorous and servile scramble for the public moneys? What induced the unusual increase of banks, on a sudden, and in defiance of that cautious policy which had so long characterized the country in the asking and granting of bank charters? What induced the general rush into the business of trade and commerce, and the undue importation of foreign commodities? What induced the anomaly which we have all witnessed and wondered at—an extravagant demand for every thing, at extravagantly high prices, and money at the highest and most ruinous rates?

Unless the true cause can be ascertained for the evils

which have so long disturbed the prosperity and deranged the business of the country, it is obvious that those evils cannot be remedied effectually and permanently. If simple overtrading be the cause, that has not unfrequently occurred, and has always readily yielded to the suggestions of prudence and ordinary sagacity. Indeed, overtrading never causes more than temporary embarrassment. If nothing affected our general system now but mere overtrading; if our financial system were not radically and deeply disordered, the discontents and distresses of the country would long ere this have passed away. No one has the assurance to assert a pretension of this kind.

Under the operation of a bad, disjointed, dislocated financial system, permanent prosperity cannot revisit the country. An apposite illustration of what I deem to be the truths now laid down may be seen in the present condition of England, to which reference is made in the President's message.

The President looks upon the state of things as substantially the same in both countries. "The causes of the revulsion in both countries have been substantially the same." Such is the language of the message. But, by a singular fatality, the President ventures to express a truth, within the compass of the same paragraph, which effectually overturns the fancied analogy in the causes of the revulsion in the two countries. "The most material difference," (I quote the words of the message,) "between the results in the two countries has only been, that with us there has also occurred an extensive derangement in the fiscal affairs of the Federal and State Governments, occasioned by the suspension of specie payment by the banks." Why did not the President carry his thoughts one step farther; why did he not see that the causes which led to this suspension of specie payment, thereby producing the acknowledged "derangement in the fiscal affairs" of this country, constitute absolutely the whole that is material to the subject, and the whole difference between the revulsion here and that in England? The monetary system in England has not, as a system, been affected at all. Here the monetary system has been changed entirely. Or rather, to speak more accurately, here we have been shifted from one system to another—upon the explosion of one experiment, betaking ourselves to another—until we have at last arrived at the proposition immediately before us, the sub-Treasury or divorce bill, under which we are to dispense with all system. This is what is vaunted before us as the great theorem or issue of modern times.

But, if the revulsion in England and in our own country had been, as supposed by the President, substantially the same, how happens it that, whilst he was busied in penning his message, the revulsion in England should have subsided, and business have resumed its place? That such is the fact, all accounts now agree. And no well-informed person can hesitate as to the cause of the embarrassments in England, growing, as they notoriously did, out of the connexion with American trade. The President, indeed, avers in the message, "that the issues of paper credits put in circulation in England by banks and in other ways during the years 1834, 1835, and 1836, will show an augmentation of the paper currency there, as much disproportioned to the real wants of trade as in the United States." But the President gives no authority for this opinion. And it conflicts most glaringly with official, and, therefore, authentic, statements, furnished by the Bank of England, and by all the other banks of every description, upon this subject. From these statements it appears that the whole amount of circulation of the kind referred to in the year 1834 was £28,568,000; in 1835, £28,519,000; and in 1836, £28,875,000; showing an increase of circulation, in the three years designated by the President, of only a little over three hundred thousand pounds; whilst, in this country, within the same period, the bills in circulation had increas-

H. or R.]

Sub-Treasury Bill.

[Oct. 12, 1837.]

ed forty-five millions; and the loans one hundred and thirty-four millions. The difference thus strongly marked between the two countries arises from the fact already stated; a fact which cannot be too often repeated—that in England the financial system has not been affected as a whole; whilst in this country the financial system has been absolutely overturned. And hence has arisen the difference in the results between the remedies applied in the two countries. If we apply to a disordered and revolutionized currency a remedy, as suggested by the President, applicable only to a state of overaction, it will turn out to be inefficient. We already see that such a remedy is utterly inefficient. The disorder remains. The taint is upon us. How can successful business be resumed without a sound currency and a healthful system of exchanges? How can the country go on without the vigor of a permanent and accredited financial system?

The causes of the embarrassments of the country do then force themselves upon us in a way not to be resisted. They are written all around us in sunbeams. They are neither to be evaded nor escaped from. They are impressed upon the country in broad lines from end to end. Every man of business in the land bears the marks of them. At morning, noon, and night, when we lie down and when we rise up, they are ever and most disastrously present to us. They are distinctly traceable to the change, to the entire revolution, of which I have spoken, in our financial system. The bankruptcy of the Government, the bankruptcy of the country, lie at the door of the politicians, who, for their own sinister and selfish purposes, have brought that system, the currency and the business of the country, into the arena of political warfare. Here, in my estimation, is the root of the evil.

Look back at the experience of our past history, to which I have heretofore adverted, constituting the true test, in a special manner, of all financial changes. What do we learn in the pages that immediately precede those which are to record this new theorem of modern times, this entire disruption and scattering of a currency, which had carried the country along successfully and prosperously? I ask you, Mr. Chairman, to look back at the period of twelve years, which preceded the late administration, comprising the whole term of service of President Monroe, and that of my venerable colleague, [Mr. ADAMS.] In the year 1816, there were two hundred and forty-six banks, with a capital of nearly ninety millions of dollars, and a circulation of about sixty-eight millions. In 1820, there were 308 banks, with a capital, including the United States Bank, of one hundred and thirty-seven millions. In 1830, there were three hundred and thirty banks, with a capital of one hundred and forty-five millions, and a circulation of sixty-one millions. During the whole period, then, from 1816 to 1830, being fourteen years, there was an increase of eighty-four banks, with an increase of fifty-five millions of capital; of which thirty-five millions belonged to the United States Bank; but at the same time there was a diminution of circulation from sixty-eight down to sixty one millions.

Such was the state of the banking system under Mr. Monroe and Mr. Adams. At the commencement of this period there was great embarrassment all over the land, similar to that which now exists. In 1816, a national bank was chartered. In commencing the operations of that bank, there was much bad management, and the consequences were unfavorable to the business of the country; but these difficulties soon disappeared under the superior skill of new managers. And the whole period was marked by unusual commercial prosperity, although unfortunate cotton speculations, and the agitation of the tariff controversy, were distinctive features of it.

It is remarkable, too, that, during this period, no complaint whatever was uttered from any quarter against the currency or the banking system. The business of the

country went on without interruption, except from occasional ill-judged speculations or overtrading, leaving no distinctive mark, except as matter of historical remembrance. In addition to this, and as confirmatory of it, another remark may be made, that the financial system was kept entirely detached from the politics of the country: the politicians interfered not at all with it; and its course was therefore an undisturbed one, answering the great purposes of all financial systems, benefiting the people, promoting industry, awakening well directed enterprise, and therefore reflecting credit upon the Government.

Immediately upon the close of the period embraced within the comments I have now submitted to the committee, a new order of things arose. The country was in a state of unequalled tranquillity in all its prominent interests. The excitements of party had been, and continued to be, animated and bristling: but the business of the country was successfully pursued in all its accustomed channels. But, with a new administration, new men had found their way into the public councils. Adventurers were numerous: the appetite for distinction, for office, but more especially for money, became unappeasable. Politicians rose up in myriads of swarms. If the present moment would not suffice to provide them with the claimed rewards and spoils of victory, the future was drawn upon; and partisanship scented its prey in every avenue and by-path that led to game to be run down. Thus was the field of political aspiration immensely widened. Within the great vortex of party politics were absorbed, one after another, all the great interests of the country. Nothing escaped that could by any possibility minister to the hopes or the cupidity of politicians. And thus was it that the business interests, the financial systems, the moneyed institutions, gradually and successively fell before the destroyer. Each and all surrendered, or were trodden down beneath the tread of the political war-horse. In this way was prostrated the United States Bank. For the purposes which I have now indicated to the committee, were the public moneys of the United States wrenched from their legal depository, and thrown down at the feet of the politicians.

These events, the first in that train of measures which have led to the existing embarrassments of the country, occurred about four years ago. Against these measures, in their inception, my venerable colleague [Mr. ADAMS] raised his warning voice. Intimately connected as he had been with the preceding policy of the country, well might his judgment be taken as oracular. Unfortunately, it was disregarded and set at naught.

And what was the progress, what were the consequences of these measures; especially of the transfer of the public moneys to the new league or coalition of State institutions? A general movement was made to obtain a share in the division and distribution. The appeals which were made to the Secretary of the Treasury, to be made "fiscal agents" of the Government, are many of them spread out upon our legislative records; and they evince, in too many instances, a cringing servility, at war with all just ideas of republican dignity and independence. The removal was effected under the dictation of that extraordinary man who has but recently descended from the Presidency. The public moneys were distributed throughout the country; and, under the repeated injunctions of the Treasury Department, founded upon the instructions of the President, which I shall not stop to collate or refer to more particularly, the chosen banks were directed to use those moneys for the public accommodation in every variety of way. And so were they used; they were carried into every branch of business, regular and speculative. They were absorbed in the speculations in the public lands; they formed the nucleus for the erection of new banks; they were sought after with avidity by partisans; they found their way wherever money can go, and for all purposes to

OCT. 12, 1837.]

Sub-Treasury Bill.

[H. OF R.]

which money can be applied. In the general scramble for the means of speculation, bank rose into existence upon bank, and incredible was the rapidity with which these moneys performed their circuit through the routine of banks, land offices, and the counters of the receivers.

And what is the exhibit which sober and undisputed facts present to us, of the state of our financial affairs within seven years from the close of the period of which I have already given an account? The report of the Secretary of the Treasury has been placed before us, furnishing an ample view of the banking institutions of the country up to December, 1836. From that report, we learn that at the latest period to which the report is brought down, there were 823 banks in the country, including 146 branches; and that the capital amounted to more than three hundred and seventy-eight millions; and the circulation to more than one hundred and eighty-five millions. Here is an increase, in a little less than seven years, of nearly five hundred banks—of more than two hundred and thirty-three millions of capital—and of more than one hundred and twenty-four millions of circulation. There are now considerably more than twice as many banks as there were in 1830, nearly three times as much capital, and more than three times as much circulation.

This increase of banking facilities, for which it would be difficult if not impossible to find a parallel, commenced immediately after the first attack upon the old and long-accredited financial system of the country. But the larger growth of this rank crop of banks was subsequent to that revolutionary measure, the removal of the deposits. The banking capital created within the last seven years is greater than all the banking capital created during the whole anterior period of our history. How could such a state of inflation and excess long exist without being felt through every part and parcel of the business of the country? Shall we be amused with speculative notions about overtrading, when an exhibit like this is staring us in the face? If the President wishes for an example of the overaction of which he speaks in his message, here it is—the concomitant and consequence of that fatal measure, the transfer of the public funds, to which he gave his strenuous counsels and advice. If overaction, overtrading, overspeculation ever existed, they are to be found in this inflated, overcharged, and now exploded system of banking, which the counsels and instructions of the last and present administrations of the General Government substituted for the system which preceded it. I do not intend to say, or wish to be understood as implying, that this extraordinary course of measures was entered upon with a view to the result now manifested. It is unnecessary to take this ground, could it be maintained. I impeach not motives. I inquire for facts. With these facts, well authenticated, I go wherever truth will lead me. No one, it seems to me, can shut his eyes upon the fact, the pre-eminent fact, that here, in this inordinate stimulus to banking—this furnishing of means without stint, limitation, or caution—is to be found the cause of the excesses which have been indulged in; of the overaction which has gorged every channel of business; and of the disasters which have bowed down the country under a yoke too heavy to be borne.

A member from Ohio [Mr. HAMER] has said that the foreign debt, which he estimates at thirty millions, together with the distribution of the surplus revenue, are, in his view, the true causes of the troubles which have afflicted the country. And he asks, with an air of triumph, did General Jackson, did Mr. Van Buren, did the friends of the past or present administration, either or all of them, induce that debt to be incurred? I answer, unhesitatingly, because I answer upon the solid foundation of facts, they did, each and all of them. Has that gentleman examined the course, the progress of that debt? I apprehend, if he had done so, he would have discovered some facts suffi-

cient to lead him to doubt the policy of some measures of the last few years, to which he has given, if I mistake not, his vigorous aid. During the year in which the celebrated tariff compromise bill was adopted, the imports of free goods into the United States amounted to about sixteen millions of dollars. According to the last annual report of the Secretary of the Treasury, giving statements of the commerce and navigation of the country for the last year, the amount of free goods imported had risen in their estimated value to more than ninety-two millions of dollars. During the same year the whole imports of every description amounted to nearly one hundred and ninety millions of dollars. The import of goods "free of duty," therefore, was equal, very nearly, to one-half of the whole importation of the year; and the difference between the imports and exports was over sixty-one millions—the balance of the former over the latter.

Now, how will the gentleman from Ohio account for this extraordinary increase of goods imported "free of duty," within the short period of about three years, upon any other ground than that of the incessant attacks which have been annually made upon the compromise bill? It has been the policy of the administration to take off the duties from all goods, the importation of which, it was supposed, would not directly interfere with the products of American industry. But the indirect interference does not seem to have been cared for. This has induced the importer to glut the American market with cheap foreign fabrics and products: and the direct attacks which have been made upon the system, from year to year, have had a tendency at the same time to paralyze our own manufacturers. And then, striking in unfortunately with this policy, there has been the extraordinary facility for obtaining means and credit to carry on the foreign trade, since the removal of the deposits: for since that event it is that the principal part of the enormous increase of free goods imported has taken place. I repeat, then, that the foreign debt has been incurred under the inducements held forth by this incautious policy of the administration. And thus it is that the overtrading of the merchants, about which so much has been said, and so vaguely said too, lies at the door of the past and present administrations, and is traceable, with great directness, to the breaking up of our old financial system.

I find myself fully sustained in the view which adherence to facts compels me to take of the causes of the existing disasters, by a recurrence to a very absorbing and interesting topic—the sales of the public lands. For a considerable number of years anterior to the removal of the deposits, the income accruing from the sales of the national domain averaged, annually, not more than two millions of dollars. Immediately upon the great change effected by that extraordinary measure of General Jackson, we find a rapid and startling increase in those sales; so that, in the three years following that event, the increase from this source amounted on an average to fifteen millions a year. In the year 1836, the amount was considerably over twenty millions. The proceeds of the sales during the period which intervened between the removal of the deposits and another great event, the distribution of the surplus revenue among the States, were more than equivalent to the whole amount set apart for deposits under the provision of the distribution act.

The committee will see, therefore, that but for the impulse which was given to the spirit of speculation by the transfer of the public funds from their legal depository to those points from which money accommodations were advisedly urged upon the public, no surplus revenue would have accrued for distribution. But as soon as the public funds were withdrawn from the influence of that financial system which, through all the reverses consequent upon overtrading and overspeculating, had kept the machinery

H. of R.]

Sub-Treasury Bill.

[Oct. 12, 1837.]

of business steady and well-ordered, a revolution followed which disjoined every thing, diverting business from its fixed orbit, and giving a wild and erratic play to that headlong mania for speculation, which absorbed all and controlled all, until itself finally exploded. Nor is it to be concealed, nor can it be denied, because the records of this House bear the proof, that the politicians, the partisans, were most eager, most importunate in pursuit of those means of speculation.

Nor can it be irrelevant here to remind some members of the committee, especially the gentleman [Mr. PICKENS, of S. C.] who opened the debate upon the bill immediately before us with so much earnestness and vehemence, that, from the statement I have now made, it follows, most conclusively, that the tariff system is not to be held accountable or chargeable as the cause of the extraordinary surplus, so universally and so justly deplored. Such an opinion has been advanced, over and over again, and is relied upon as furnishing a stable reason for frittering away, in detail, the good effects contemplated by the celebrated compromise. I have already commented upon the facts, which show indisputably the impolicy of the attempt to interfere with the just operation of that compromise. That impolicy is still more convincingly manifested by the facts, now presented to the committee, which point to the true origin of the surplus revenue. The public domain has been the great field of speculation; and the excessive banking, consequent upon the removal of the deposits, and principally warmed into existence by that measure, has poured forth the overshadowing means by which that speculation was conducted.

I am still further fortified in the position I have taken, and the opinions I entertain concerning the causes of the embarrassments of the country, by a consideration of the effects of the immense importations of specie, which have been the theme of so much self-glorification. It is unnecessary here to inquire into the necessity for an ample specie basis for the circulating medium of the country. Such a basis is indispensable, and never can, without criminal neglect, be overlooked by any prudent and watchful administration of the Government. But the idea of forcing a circulation of specie in any one country, whilst the supply of the precious metals for all is extremely limited, cannot be sustained for a moment upon any sound notions of public economy. A circumscribed medium exclusively of specie may be imposed, and carried out perhaps, but it must be at the risk of sacrificing or overturning the great business interests of the country, and of throwing the limited business that may remain into the hands of a monopolizing few.

The excessive importations of specie by the last administration, at a time when the balance of trade was largely against us, and a very large foreign debt was outstanding, militated most strikingly against all the acknowledged laws of trade. And this, in connexion with the Treasury order or specie circular, as it has usually been termed, hastened the approach of that financial crisis, which, without the powerful and electric aid of these causes, might have been longer postponed, but, in all probability, could have been avoided. The drain of specie from the East deeply affected all the operations of business which are there concentrated; and the fountains of our whole system were thus broken up. Vast as have been the importations of specie from abroad, did that specie enter into the circulation of the country? Were the promises concerning it at all fulfilled? Have not those promises long been the byword and jest of the scorner? And are not the precious metals banished from among us so far as the purposes of circulation are concerned?

This was most certainly true long before the crisis arrived. Instead of enlarging the circulating medium of the country in any essential degree, the imported specie was

employed most extensively in forming the basis of new and increased banking operations. And thus, what was probably well intended theoretically by the Government, operated to defeat the very object which the Government professed to have in view. We are not to forget, however, that this very rage for banking, which in this manner so sadly crossed the path of the late administration, grew up under the fostering and nurturing of its own measures. In this fact we have an illustration, that ought not to be lost upon us, of the extreme hazard which is always incurred by a violent and uncalled-for interference with a subject so sensitive and delicate as the currency of a country.

I have now gone through, succinctly, the consideration I intended of the causes which have conspired to bring the country to its present disastrous condition. I am unable to avoid the conclusion—to my mind it is as ready as it is irresistible—that these causes have led directly to that overaction, which is the genuine manifestation or development of the disease with which the country is afflicted. And what has been the result? What has been the winding up of that long train of measures, violently entered upon, and energetically pursued, which must, in all time to come, hold up Andrew Jackson to the country as no ordinary man? The result is stamped upon the country in deep and broad traces. The winding up of this experiment of a new and better currency has engulfed Government and people in one common bankruptcy. The causes, of which I have spoken, opened throughout the land a boundless field of credit, accessible through myriads of avenues to the lowest and obscurest spots. Every description of business felt the effects of this overshadowing credit—to such a degree, indeed, that, during the period to which I have referred, the amount of all kinds of transactions has been estimated to transcend five hundred millions of dollars. And when, at length, the experiment ran out, and the catastrophe came, the country was found, and still remains, with its commerce prostrated, industry at a stand, the banks unable to redeem their bills, and the Government rich only in unavailable means.

The Government and the people being thus alike embarrassed and paralyzed, it would seem to be the dictate of ordinary wisdom that they should make common cause, and breast themselves together against the storm. Especially would it very naturally be expected of the Government that they should not abandon the people, and seek to find refuge and safety for themselves alone. Their measures having prostrated both in a common calamity, the country had a right to look for peculiar favor in any contemplated schemes of relief. The measures which have brought about this deplorable state of things were never asked for by the people. They never petitioned for a change in the financial system of the country. They never even complained of the operation of that system. As far as their opinions and wishes can be gathered from the representations of their agents upon this floor, in this the House of the people, they were contented with things as they were. It is historically true, that all the remarkable and extraordinary measures on which I have commented, met, when proposed, the signal rebuke of the representatives of the people. The two measures most decisive, effective, and revolutionary in their character and tendency—the removal of the deposits, and the Treasury order, or specie circular—have never obtained any favor within these walls. They have been sustained, and the latter is still sustained, against the will of the people. Emphatically is this true, and not to be denied.

With what face, then, can the Government seek relief, to the exclusion of the great mass of the country? Why shall those who have devised, counselled, advocated, and adopted the measures which have resulted in a depreciated currency, be relieved from the inequalities of that currency; whilst the people, who, to say the least, have been

OCT. 12, 1837.]

Sub-Treasury Bill.

[H. or R.]

passive in regard to those measures, are left alone to reap and enjoy the harvest of their bitter fruits?

But it is said that two of the bills before us are specially intended for the relief of the country: the one authorizing a further postponement of payment upon duty bonds; and the other to adjust the remaining claims upon the late deposit banks. If there be relief in these bills, it is obvious to remark that it is extremely limited in its scope. But whose is the sole interest to be secured, if it can be secured, by these bills? Is it not the Government's? By pressing its debtors, the merchants and the Southwestern banks, the Government may lose all; by granting an extension of time, all may be saved.

The Committee of Ways and Means have reported three bills, in conformity with the recommendations of the Executive, and growing out of the relations of the Government to the disasters which have befallen the country. The first proposes to postpone the fourth instalment of deposit with the States; the second authorizes the issuing of ten millions of Treasury notes; the third is a bill to impose additional duties as depositaries on public officers. The operation of all these bills has distinct reference to the Government. The same committee also reported a resolution, declaring it "inexpedient to charter a national bank." I was debarred from the expression of my opinions upon this proposition, after having risen to address the House, by the operation of the previous question—that convenient piece of machinery to check debate, but applied so only in this the freest Government in the world. That proposition is one of the three connected with the great question of the currency, to which our attention has been directed. I voted against it distinctly upon the ground of its being bald and abstract in its terms. I voted against it upon another ground—because it negated the only wishes or opinions which have come before us by petition from the people. We have the sub-Treasury scheme suggested to us by the President; we have a new modelling of the deposit bank system presented by a member from Virginia, [MR. GARLAND.] The proposition for a national bank finds its way to us only through numerous and respectful petitions. I am unwilling to thrust aside unceremoniously a proposition to which the people have invited our attention. I should be unwilling to dispose of any scheme, even that of the sub-Treasury, in so summary a manner. I would receive and entertain all of them; I would reject no one, until it was laid before us in proper form and features, that we might examine it in its practical details, and judge of it with precision. I know not that I should vote for a bill to charter a national bank. I have no constitutional difficulties in regard to it; but I should seek to have it well guarded and secured at all points, especially, as far as possible, against the machinations of partisan politicians—the root, the fruitful source, as I verily believe, of all the troubles that afflict the country.

But, Mr. Chairman, the administration having determined to shape their policy, under the new and extraordinary circumstances of the country, with special reference to themselves and to their own distinct interests, let us look at the measures suggested for our consideration.

We have a bill to postpone the fourth instalment of the surplus revenue. I opposed that bill in the committee. I shall record my vote against it, in whatever shape it may come up. In the present condition of the country, the payment of that instalment, amounting to nearly ten millions of dollars, would operate to that extent advantageously to the people. I am unable to see the necessity for the postponement. I have carefully examined the report of the Secretary of the Treasury on the finances; I have examined all the subsidiary and "verified" statements that have been laid before us from various quarters. If the deficiency supposed by the Secretary were susceptible of clear proof, that proof ought to be on our tables. I have not

seen it. If it exist, it can be shown by that which does not lie: it is a matter of figures. I shall not follow the steps of the gentlemen who have addressed the committee in this particular, by going into the details upon this subject. The task is irksome. I agree fully with most who have preceded me, that a clear case has not been made out by the Secretary. No one can doubt that the Treasury is in an embarrassed condition: the mismanagement of the finances and the disruption of our whole system could not but throw our exchequer into utter confusion. That is the evil under which we are laboring. Confusion reigns through every department of finance and business. Hence arises the unintelligible exhibit which has been made by the Secretary. In the deposit banks there remains a balance greater than the amount of the fourth instalment. Very many of the States could and would make an arrangement with those banks for their proportion of that instalment, which would be beneficial to the banks, satisfactory to the States, and tend to the relief of the Government. To those States which, from their relative position, could not enter into such arrangements, drafts, in the language of the Secretary, "drawn, but not yet paid, though payable," and therefore, in the view of the Government, equivalent to specie, would fully answer the purpose. In whatever light I regard this subject, it seems to me to be demanded, by every consideration that can enter into a sound and just policy, to pay over the fourth instalment to the States, even at the hazard of some inconvenience and even sacrifice.

The bill to authorize the issue of Treasury notes to the amount of ten millions I oppose; because I deem the proposition, if not unconstitutional according to the recently avowed opinion of General Jackson, certainly fraught with the greatest hazard, and of dangerous tendency as a money measure or experiment of the Government. It is a bad precedent to establish: it has once only been resorted to in the history of the past, and then in the extraordinary emergency of war. It is a scheme which furnishes too great facility for money making to any administration. It is a power too easy to be perverted; and the exercise of it is inconsistent with the simplicity of republican institutions. Surrender this power as a matter of ordinary legislation; connect with it the proposed system of sub-Treasuries, designating the kind of currency which the Government is to demand, and you fix upon the country at once a Treasury bank in its worst form. I cannot shut my eyes upon the suggestion which has been made in another branch by a distinguished and now willing advocate of all these measures, that the Government ought to provide for an emission of paper money, declaring his opinion at the same time that inconvertible paper does not constitute a suitable currency. I believe the same opinion has been avowed during the debate in this House. Such a proposition would carry us back at once to the old continental money: so monstrous a proposition shows most convincingly the dangerous career we have before us, in consequence of departing from a financial system that had been reared upon the foundation of a long and successful experience.

I have voted, sir, in favor of an amendment of the Treasury note bill, to authorize the Government to raise, by loan, such sum of money as the actual wants of the Treasury demanded. That is the mode of raising money which the constitution has designated. "Congress shall have power to borrow money on the credit of the United States." I see no reason for departing from this plain requisition of the constitution. I see every reason, in the avowed and obvious disposition of the Government to resort to experiments, why we should adhere strictly and guardedly to such a requisition. I repeat, sir, that I am willing to vote for any sum of money that shall be needed to relieve the Government from its embarrassments; but I am not willing to do so in any way but that which shall be clear, safe,

H. OF R.]

Sub-Treasury Bill.

[Oct. 12, 1837.]

and in accordance with the letter and spirit of the constitution.

The sub-Treasury scheme, or bill imposing additional duties as depositaries on public officers, is confessedly the leading and distinguishing measure of the session. It has been characterized, and I think justly, as a proposition to detach the interests of the Government from those of the people; to give to the Government a "better currency," and to the people such a one as they shall feel willing, or be compelled, to content themselves with. This representation, I know, has been denounced, as if it were intentionally used as the watchword of party. Were it really such, I would freely join in the denunciation. But I look upon it as accurately descriptive of the bill. Such are the whole tenor and scope of it; and the only way in which, under the operation of this measure, there can be a community of interest and of feeling between Government and people will be by the universal adoption of the same scheme. When that event occurs, we shall have arrived at the much-talked-of age of an exclusive metallic currency. If this measure shall receive the sanction of Congress, and pass into the solemn form of a law, the conflict will be but commenced between the system to which the country has been accustomed from the earliest days of the republic, and that system which bears upon its front the baptismal name of "untried expedient." Is it plain to suppose that this whole people will quietly and unrepiningly witness the exhibition of their own servants in the undisputed enjoyment of a high privilege, and themselves excluded from all participation in it? A stormy and wrathful contest will arise, upon which, even as a fancy sketch, no patriot can look with composure. Sir, I cannot join in the crusade, which the adoption of this measure, as the settled policy of the Government, cannot but beat up against the long-standing order of things. I will not consent ruthlessly to pull down an ancient institution, until I can be convinced the substitute for it shall better answer the purpose. I am contented, nay, anxious to reform, where reform is necessary; but I cannot yield to what I feel confident must be the effect of this bill, if carried through to its outside purposes. I cannot agree to destroy.

This, then, is the stable and firm ground upon which I plant my opposition to this sub-Treasury scheme. Carried out into all its consequences, the effect of it must be, to change the framework of society; to revolutionize property and business; to reduce the former indefinitely and most essentially, and to withdraw the latter into the hands of the few; to circumscribe, and almost to obliterate the field for enterprise; to paralyze credit; to deaden the vigorous arm of industry; and, finally, and in one word; to give to wealth that ascendancy which nothing but free competition can break down, and to make poverty hug its chains more closely. Whilst the tendency of this scheme must be to give superior and unjustifiable privileges to wealth in large accumulations, and necessarily to make the poor poorer, the blight and mildew of it must fall in a special manner upon that immense mass of our community, which, I would to God, were the one and only mass—the men of moderate property and of enterprise, chastened and well regulated.

Mr. Chairman, I will not dwell upon the numerous objections which are urged against this bill with great force as a matter of business. Its insecurity forms of itself an abundant reason why it should be distrusted and repudiated. The placing of public funds in the hands of individuals for safe-keeping or disbursement, leads the depositary into that temptation from which every prudent man should pray to be delivered. The importunities of friendship alone have, through this means, dragged down many an honest name to the dust. The field of such temptation should be hedged in as much as possible, not enlarged. Gentlemen have referred already to sad cases of defalcation

from this source in several of the States. The Commonwealth from which I come is not without this stain upon its history. And what is the experience which the records of one department of this Government have recently furnished? Within the last eight or ten years, over eighteen hundred instances of defalcation are officially reported to have occurred in the Post Office Department. Who does not know that most or all of the motives in the way of temptation either do not operate at all, or to a very limited extent, in regard to funds entrusted to corporations? Sir, these are considerations which ought to address themselves with great seriousness to wise and discreet statesmen.

The necessary increase of Executive patronage is also a solid objection to this bill. Such patronage, operating upon the individual, is always dangerous. The state of public sentiment in this country points with singular significance to the sober truth, that such patronage "has increased, is increasing, and ought to be diminished."

Mr. Chairman, I pass to the leading objection to this bill, which I am compelled to dispose of briefly, in consequence of our being very nearly at the last stage of the deliberations of the session. This bill denies in the face of the country the obligation on the part of the Government to furnish a sound system of currency and of domestic exchanges. The doctrines of the message upon this point are entirely new. But they are new, only because the Government, or rather the administration, instead of wisely retracing their steps, are determined to go on with their experiments; and surely it cannot be strange that these experiments should interfere with the provisions of the constitution as well as with the prosperity of the people. The administration, having resolved by this measure to detach their interests from those of the people, it necessarily follows that the interests of the people are not to be cared for or provided for. The constitution has declared that Congress shall have power to regulate commerce between the States. Congress has always heretofore made such provision, or attempted it, by establishing what has been deemed a sound currency, and with it, and dependent upon it, a healthful system of domestic exchanges. The opinions of all our statesmen, of all parties, from the foundation of the Government down to the present dynasty, have coincided upon this subject. And yet, we are now told that the Government might as well be called upon to convey the merchandise of its citizens from one point to another, as to regulate their internal commerce. Such are the absurdities to which we are reduced by a spirit of theorizing and a fondness for experiments. In support of these novel and unheard-of notions, the example of the States of Europe is referred to; and their usages are marshalled before us against an express provision of our constitution, and the unbroken practice of the Government and country. Sir, who and what are we, that we are thus called upon to abandon all our experience, every lesson of our history, and to lay ourselves down at the feet of the monopolists and autocrats of Europe? We differ from the whole of them, individually and collectively; and I desire to thank God that we do so. We stand upon the solid platform of free institutions; we live only in the free hope that is given to labor, and industry, and competition. We are a confederacy of sovereign and independent States—many in number—and differing in our local institutions, arrangements, and usages. And are we to be referred to the single and consolidated arm of power in the States of Europe for business examples and currency precedents? It is this peculiarity in our political fabric, which led the statesmen of the Revolution to make the provision in the constitution to which I have adverted; it is the same peculiarity, distinguishing us from all other States, which has led all our statesmen until now to conform to the wise forethought of those sages and patriots.

Sir, I will not trouble you by recurring to the opinions

Oct. 12, 1837.]

Sub-Treasury Bill.

[H. OF R.]

of the older statesmen. I will only refresh your recollection by adverting to some of more recent date—to opinions that have been uttered within the last four years. What does Mr. Taney say in one of his reports concerning the State or deposit banks? This is his language: "They are providing a general currency at least as sound as that of the United States Bank, and will afford facilities to commerce and in the business of domestic exchange quite equal to any which the community heretofore enjoyed." Again, he uses strong language—language free from all doubt, when he declares of the same banks that "they are competent to perform all the services which the Government ought to require, and to afford all the facilities to the internal commerce and exchanges of the country, which have been claimed from the Bank of the United States."

I offer but one opinion more—that of the late President Jackson in that celebrated paper which was "read to the cabinet." Who will doubt the meaning of this passage: "It should also be enjoined upon any banks which may be employed, that it will be expected of them to facilitate domestic exchanges for the benefit of internal commerce."

These are excellent opinions; but they were most unfortunately applied, as our sad experience every day is showing us. They indicate the firm convictions of those who uttered them: and they correspond with all the opinions of past time upon the subject until now. Sir, the business of this great country cannot be carried on—it is monstrous to suppose it can be—without a sound, general currency, and a well-regulated system of domestic exchanges. These are indispensable. They are equally necessary to the man of large business and to the man of limited operations. Remittances are made by every class and almost by every individual in the community. How can they be made without a general and universally accredited currency? I declare to you, then, my unshaken conviction that the people will not countenance the system you propose in this bill. They will not consent to be cut off from these indispensable requisites of good business and healthful prosperity. They will not suffer their best interests to be sacrificed in order to gratify your unmanly attachment to impracticable experiments. They will demand of you, they are already demanding of you, that you retrace your steps.

Mr. Chairman, before concluding, I feel bound to notice some remarks which fell from the member from South Carolina, [Mr. PICKENS,] who opened this debate. That gentleman thought proper to make an attack upon Northern labor, and, by way of retaliation upon "Northern Abolitionism," proclaims his intention to "retort the preaching of insurrection;" and the text which he takes is "the universal emancipation of Northern labor from Northern fraud and duplicity." He represents the banks and corporations of the North as engaged in "enslaving and subjecting the laboring class." And he, a slaveholder, proposes to erect the standard of insurrection, and to draw thereto the laborers of the North.

Does that gentleman understand what is meant by the labor of the North? Does he deem it an instrument which he can wield to carry out his purposes of sedition and insurrection? Let me tell the gentleman that the laboring classes of the North comprise the whole population of the North. The great rule of existence there is labor, and only labor. I would like very well to see that gentleman advancing upon the North with his insurrectionary intentions. It would gratify me much to see him at the head of his new-raised cohorts, with his banners floating upon the breeze, and, under the inspiration of martial music, marching forward "to preach the universal emancipation of Northern labor from Northern fraud and duplicity!" The holder of slaves at the South, preaching insurrection to the honest, intelligent, and independent laborers of the North! It would be an exhibition worthy to attract more than the gaze of curiosity.

Sir, the gentleman misunderstands the character of our institutions, the character of our people, the character of our labor. If he will come to the North, I will gladly introduce him to our farmers in their fields, to our mechanics at their benches, to our manufacturers at their looms. He will find them a body of men able and ready to explain to him what is meant by Northern labor, and what is the character of Northern institutions. He will find them full of general intelligence, possessed of a perfect knowledge of their own rights, and prepared to maintain them. Let me tell the gentleman he will not find them very patient listeners to his "preaching of insurrection." He will not find them flocking to the standard of a slaveholder, as he proclaims to them the way to "universal emancipation from Northern fraud and duplicity."

Sir, the gentleman misunderstands the nature of our banking institutions and other corporations, as much as he does the character of our labor. They are not engaged "in enslaving and subjecting the laboring class." They are themselves the laboring class. The men of business of the North, the men who manage and control all these institutions, are the great middle class of society—the men who, by their own industry and intellect, have made themselves what they are. The banking institutions are owned not by the great capitalists, but by the active, thriving, and energetic men of business. The proprietorship of these institutions is for the most part in the hands of the men of moderate property, of females, of orphans, of charitable societies. I do not stand here as the apologist or the advocate of banks. Much, very much they may have done wrong. They are in the hands of the people at all times, for regulation and reform. Sir, I will not detain the committee, but I cannot avoid asking permission to read a passage from a letter of a distinguished personage upon this subject, which expresses, better than I can do it, what I deem to be the truth upon this subject. The letter was addressed to the chairman of the Committee of Ways and Means, of the Congress before the last.

"If there were no State banks, the profitable business of banking and exchange would be monopolized by the great capitalists. Operations of this sort require capital and credit to a large extent; and a private individual in moderate circumstances would be unable to conduct them with any advantage. It is proper that the business of banking and exchange should be open, as far as practicable, to the most free competition, and its advantages shared by all classes of society. Individuals of moderate means cannot participate in them, unless they combine together, and, by the union of many small sums, create a large capital, and establish an extensive credit. It is impossible to accomplish this object without the aid of acts of incorporation. The incorporated banks, moreover, under proper management, will offer a safe and convenient investment of small sums, to persons whose situations and pursuits disable them from employing their money profitably in any other mode.

"No commercial or manufacturing community could conduct its business to any advantage, without a liberal system of credit, and a facility of obtaining money on loan, when the exigencies of business may require it. This cannot be obtained without the aid of a paper circulation, founded on credit."

This is the language of the present Chief Justice of the United States, when Secretary of the Treasury; and here I leave the banks.

Let the gentleman from South Carolina proceed in his insurrectionary project against the labor and the institutions of the North. He looks for aid from the operation of this sub-Treasury scheme. It might aid him, it is true; but with whom, that is sound hearted, will that consideration recommend the scheme? Let the gentleman proceed. He will return from the campaign mortified as well as instruct-

H. OF R.]

Sub-Treasury Bill.

[Oct. 12, 1837.]

ed. His purpose is vain; his threats are impotent. As well might he attempt a crusade against the grave yards of the North, and seek to spread ruin and destruction over the memorials of our dead, as expect to carry on a warfare, with any hope of success, against the industry, the enterprise, the sagacity, the honor of New England and the North.

When Mr. CALHOUN had concluded, Mr. POPE addressed the Chair. He observed that he rose with reluctance, and much hesitation, to give his views to the committee on the principles involved in the bill, and the several subjects connected with it, after they had been discussed with so much ability in both Houses of Congress, and our session had approached its termination. He was aware that the committee were impatient to have the debate closed, and to take the question. He felt, however, that duty to the expectations of his immediate constituents and to himself forbade him to give a silent vote on a measure of so much magnitude, both in principle and consequences.

Many topics had been introduced into our debates during the present session, which did not seem to belong to any of the measures before us, and with reference to the parties in this House and the past political struggles of the country, to which he begged leave to give a passing notice. We ought (said Mr. P.) to lay out of view every thing which does not belong to the crisis in which we are placed; and it seemed to him that gentlemen of all parties should elevate themselves for a moment above the mere party contests of the day, and act exclusively with reference to the good of the country. The vessel of state, in relation to our monetary system, appeared to be stranded, and all certainly should unite to put it fairly afloat again upon the great current of the public interest.

Mr. Chairman, the part I acted in the election of the late Chief Magistrate is well known; and on that account I have ever been unwilling to assail him or the measures of his administration. His veto of the bank bill, the removal of the deposits, and other acts tending to an alarming increase of Executive powers, at the expense of the other branches of the Government, were so much at war with his opinion of the principles and genius of our free institutions, that I have for several years declined to participate in the mere party struggles of the country. While I could not endorse the measures alluded to, I have not indulged in bitter censure or crimination of those with whom I have been politically associated. In my canvass for a seat here, I appealed to no party on party grounds. My opinions about the United States Bank, currency, &c., were given to the people with openness and candor. Without disguise or evasion, or any mental reservation whatever, (Mr. P. said,) he had publicly avowed to his constituents his firm conviction that a national bank was a necessary and proper fiscal agent for the Government, the best regulator of our paper system, and an important auxiliary to the foreign and domestic commerce of the United States; and for the correctness of that opinion, he had appealed to the force of reason and experience.

Mr. P. declared that, notwithstanding all the denunciations of the bank or a bank of the United States, his firm and unshaken belief was, that it is the best possible remedy of a permanent character which can be applied to cure the disorders in the local currencies, check excessive issues of paper money, and insure to the nation a stable and uniform medium, and restore a healthy action to our money system. Public opinion in the Western States was strong and decisive in favor of this measure, and would be more so, from causes which do not apply as strongly to the Atlantic States. In Virginia, Maryland, New York, and other States on the Atlantic, the people trade to the cities on the seaboard in their own States; and the local currency will answer their purposes to a considerable extent. The trade of the West-

ern States is carried on to distant places, much of it through other States, and the local currencies will not answer, and our Western traders are subjected to much loss in changing the paper received in every State through which they pass, going and returning; and all this loss falls on the farmers of the West; whereas, while the branch banks of the United States Bank existed in the South and West, the traders were not subjected to the losses and inconveniences to which they are now exposed.

As so much has been said about merchants and over-trading, &c., Mr. P. would remark that he represented an agricultural district, and that the farmers of the West were, if possible, more urgent than any other class for a national bank, in order to have a currency in which they could confide—one sound and uniform. They had experienced the beneficial effects of a United States bank, and were desirous to see that sound condition of things restored. Mr. Chairman, (said Mr. P.,) I had occasion to act on this question of a national bank twenty-five years ago, in the other branch of Congress; and I then examined it with an honest inquiry after truth, and became entirely satisfied of the constitutionality and the great utility of such an institution. The opinion I then formed I have maintained ever since, through good and evil report. Whether popular or unpopular, (Mr. P. said,) he had made it a rule through life, when duty required him to act on a principle of cardinal importance or vital interest to the people, to explore it well, to establish truth in his own mind, and to adhere to it, unless overruled by the deliberate will of his fellow-citizens. Fortunately for him at this moment, in the opinion he expressed, he stood supported by the voice of those who sent him there, and the State at large.

Mr. Chairman, before I proceed to bestow a special consideration on this sub-Treasury scheme, contemplated by the bill under consideration, or a national bank, which seems to be associated with it in this debate, permit me to notice other topics so frequently adverted to at this session. We are daily entertained or disturbed about the annexation of Texas, the tariff, and abolition. On the subject of Texas, I have no opinion at present to give; indeed, I have not considered it sufficiently to decide on the power or expediency of the annexation of Texas, if desired by the people of that country. Mr. P. said he was not prepared to say to what extent our plan of government could expand without endangering its integrity. It was a question on which an American statesman should not indulge hasty speculations; it was one which demanded grave and profound consideration.

In the old world there seemed to be natural barriers between nations—the Alps and Pyrenees separated communities; but here we had disregarded those geographical divisions, and cut down and perforated the Alleghany which divided the Atlantic States from the great Western valley. By roads and canals, with the consequent facility and rapidity, we had contracted practically the extent of our territory. I would, however, implore gentlemen from the North and East, and especially the distinguished gentleman from Massachusetts, [Mr. ADAMS,] never to urge as a ground of opposition to Texas that slavery is tolerated in that country. It does not appear to be a legitimate ground of opposition. Should the provinces of Canada be ever separated from the mother country, and their independence established on the plains of Abraham, and that people should desire to be made part of this republic, I should not think of objecting that they have or have not slaves. The question ought to be viewed on more elevated ground. We should bear in mind that, in the struggle for liberty and independence, Virginia and Massachusetts shook hands as brothers, and staked their lives, fortunes, and sacred honor, in the common cause. Each State was left free to act in relation to domestic slavery.

Oct. 12, 1837.]

Sub-Treasury Bill.

[H. of R.]

It affords me pleasure, on this occasion, Mr. Chairman, to do justice to the consistency of the respectable gentleman from Massachusetts, [Mr. ADAMS,] in the opinion he has expressed that Congress has no power to annex Texas to the United States. I well recollect that he expressed the same opinion in the Senate during the session of 1807-'8, in regard to the admission of new States formed out of the territory of Louisiana; but, at the same time, avowed his willingness, and I believe with entire sincerity, while he could not concede the power to admit them, to vote for an amendment of the constitution to authorize their admission.

The subject of abolition, so often mentioned on this floor, has never disturbed the people of Kentucky, although a slave State. I know that there have been in my own State a large number adverse to slavery, desirous of getting rid of it by emancipation, or in some other way. Some, probably, were in favor of abolition; but experience and observation have convinced the warmest friends of emancipation that any mode of terminating slavery and retaining them among us would be mischievous and dangerous. The Ohio river divides Kentucky from the free States of Ohio, Indiana, and Illinois; and, while we are aware that there is a religious feeling and some fanaticism in relation to slavery, we indulge no suspicion that the great body of the people of those States are disposed to disturb our slave property; and, as to the enthusiasts and fanatics, we tolerate error and folly, while reason and practical observation are left free to counteract them. The question of domestic slavery is one over which each State must be left to exercise sovereign control, subject to the power of Congress in reference to the importation of slaves from abroad.

The tariff is often mentioned, too, here, certainly foreign to the subjects of our present deliberations. Permit me, Mr. Chairman, (said Mr. P.,) to retrospect the history of this tariff policy for the last thirty years. Nearly thirty years ago, he was a member of the other branch of Congress; and gentlemen from the South and West, with the exception of Mr. John Randolph, and perhaps a few others, favored the tariff policy; and, in accordance with the expressed or imputed opinions of Mr. Jefferson, advocated the policy of rendering this country, to a great extent, independent of the workshops of Europe. I well recollect that I united in this opinion, without having ever considered deeply the effects of this policy on the different sections of the Union. The people of the Eastern States were at that time more inclined to employ their capital in commerce than manufactures, and Mr. Hillhouse, a Senator from Connecticut, a man of practical wisdom, remarked to me, with apparent candor and much earnestness, that it was wrong to force or stimulate manufactures prematurely; that they ought and would grow up gradually with the growth of the nation. Circumstances, however, turned a large portion of Eastern capital into manufacturing establishments, and the Eastern people, ever astute and sagacious in whatever concerns their interest, asked for protection—more and more protection—until the South, awakened to a sense of the effects of this protective policy on the planting States, changed their course, and resisted this protective policy, which at one time gave rise to a most angry and excited contest. Fortunately for our peace and harmony, the question was compromised by the agency of a Kentucky member of this House, and a distinguished Senator from the same State; they, at least, aided much in restoring quiet to the country, and I hope that compromise will not be disturbed; and that, until the year 1842, this matter will be at rest. It is very probable that the tariff policy was carried too far. Kentucky is a consuming State, as much so as Virginia and many other Southern States; and, while she admits the power and policy of giving reasonable protection to American industry, she will be among the last to support, knowingly, any policy tending to sac-

rifice the interest of the South to advance or aggrandize any other portion of the Union. He would, however, take leave to remark that he believed that at no distant day Virginia and Kentucky will rival the Eastern States in many branches of manufacture. These States abound in coal, water-power, and minerals, with a temperate climate; and it has been said of Kentucky that she contains the richest mineral wealth in the United States. Regions there, hardly inhabited now, and considered of little value, will ultimately be filled with towns, villages, and an industrious and thriving population.

In connexion with these vexed and exciting questions of abolition, tariff, annexation of Texas, we too often hear of disunion, &c., and I must confess, Mr. Chairman, (said Mr. P.,) that I regret to hear language of this sort from the distinguished gentleman from Massachusetts, [Mr. ADAMS,] when speaking of Texas. When contending for freedom and independence with Great Britain, our brethren of the North did not object to an association with the South on the ground of domestic slavery. Kentucky is a central State, and a farming or planting State; a great consumer of foreign and American manufactures. We, the people of Kentucky, although, from habit, education, personal and commercial intercourse, partial to our Southern brethren, are not blind to the value and importance of our political association with the Eastern States. We consider them the right arm of our national strength as a maritime power. For intelligence, hardy enterprise, and skill in commerce and navigation, they are not surpassed, if equalled, by any nation of ancient or modern times. By the union of free and slave States, by their joint counsels and arms, our liberties and independence were achieved; and let not the trashy effusions of fanatics, or the visionary speculations of enthusiasts, disturb our tranquillity, or weaken those ties by which these States have been so long united. If we continue a united people, this nation will, at no distant period, by their justice and power, exercise more influence and control over the affairs of nations than ancient Rome when mistress of the world, or Great Britain when she asserted the empire of the seas. He begged pardon of the committee for digressing so far from the question under consideration, and had only to assure them that he was led off by a solicitude to divert their attention from subjects which had been, as he thought, rather strangely brought into discussion, and to bring the minds of all to a deep and solemn consideration of the existing crisis: for sufficient for the day is the evil thereof.

The bill under consideration provides not only for the collection of the revenue, but the establishment of a number of sub-treasuries, to be located in different places in the United States where the revenue and proceeds of the public lands are collected, and the Secretary of the Treasury is authorized to appoint agents to inspect the books and accounts of these sub-treasuries, and report to him. Those charged with the collection and preservation of the money drawn from the pockets of the people, with the agent to inspect, &c., are to be appointed by the Executive, removable at his pleasure, and in all respects subject to his control. It is in substance a bill to unite the purse and sword of this Government in the hands of the President, in derogation of a fundamental principle of our free constitution, and the title of it should be, a bill to consummate the overthrow of that equilibrium and division of power which the wise founders of this republic intended to establish to secure American liberty.

The maxim that a division of power among different departments or bodies of magistracy was necessary to secure liberty, seems to have been better understood and practically applied by the statesmen of modern times than in remote ages. This maxim has been incorporated into all the American constitutions, and pervades every ramification of this confederated republic. Such a division of

H. of R.]

Sub-Treasury Bill.

[Oct. 12, 1837.]

power as will prevent undue accumulation of power in the hands of one department or body of magistracy, was deemed by our ancestors essential to the security of the public liberty. This great principle forms a vital feature in the political law of modern Europe, where it is held that every power ought to be restrained within such limits as will insure the independence of neighboring States; and hence the numerous wars to maintain the balance of power.

Our constitutions divide the powers of Government into several departments or bodies of magistracy, and these powers are again divided between State and federal bodies of magistracy. To the legislative department it belongs to impose taxes upon the people; and I put the question to the grave and candid consideration of this committee, whether it properly belongs to the Legislature or the Executive authority to create or select the agent to keep and guard the money of the people, until drawn out in conformity to appropriations made by law? Is the Executive or Legislature the keeper and guardian of the public treasure? In practice the first Bank of the United States was the chief agent in taking care of the public money, and the last bank was made the agent by legislative authority; and that both were safe and responsible agents is ascertained by the fact that no loss was ever sustained while they had the care of it; whereas we know that numerous defalcations, and frauds, and pecuniations, have been committed by collectors, receivers, and others charged with the care of the public revenue. Large sums confided to individuals furnish temptations too strong for poor, weak human nature. Treasurers in Virginia and Kentucky, of the fairest character for purity and honor, afford strong proofs of the danger of confiding large sums of money to the care of individuals; and both States have directed the public money to be placed in sound and responsible banks. When it is deposited in a bank, to the credit of the Government, the whole corporation is responsible. The capital of thirty-five millions of dollars of the late Bank of the United States was bound for the money placed in its vaults.

I will not detain the committee by any calculation of the additional expense, or Executive patronage of this new scheme of sub-treasuries, because it is liable to other objections of much more magnitude. To what responsibility, Mr. Chairman, do you look for the security of the public revenue? Do you rely on the bonds and securities provided for in this bill? Remember that there will be collected in the city of New York alone from twelve to fifteen millions; and that in the cities of Boston, Philadelphia, Baltimore, Charleston, and New Orleans, from three to five millions on an average will be received by the collectors at each port; and a large amount of this money must remain for a considerable time in their hands before it can be paid out. In the whole of these sub-treasuries there will generally be on hand from five to ten millions of dollars. Now, sir, what individual and securities can be good and responsible for millions? Sir, you have no security for the safety of the public funds but in the honor and integrity of the officers charged with the care of them.

I have, Mr. Chairman, other fears and objections in relation to this measure. The officers to have charge of your money will be the creatures of the Executive, holding their offices at his pleasure, and responsible directly to him. We all know that money has become a powerful agent in our political contests, and especially in the large cities. Let me suppose a violent party contest for the Presidential office, and the man under whom these treasurers hold their office a candidate; can you believe that they will resist the appeals of the friends of power, to use the public money to insure the election of their favorite candidate? I cannot think of a scheme more likely to be fatal to the purity of our institutions, and the public liberty, than the one on your table. I deem it a most sacred duty of the representatives of the people

to place the money drawn by their authority from their constituents in safe hands, and not where it will be in danger of being wasted and plundered. The guardianship and care of the public treasure belongs to Congress, and not to the Executive. Acting upon this principle, and in accordance with the genius of our free institutions, the people of Kentucky, in convention, provided that the Treasurer of the State, who was to be charged with the care of the public money, should be elected by the Legislature, while the appointment of all other officers was confided to the Governor and Senate.

This measure seems designed to substitute an exclusive metallic currency for the specie and paper currency, that is, paper convertible into specie, to which the people have been accustomed for half a century. During forty years out of forty-eight of our political existence under the present constitution, we have had a currency consisting chiefly of silver money and bank money, that is, bank notes convertible into specie; for such paper has been considered and called money from the commencement of the banking system in Europe. That notes at all times convertible into specie, such as were issued by the Banks of the United States, have been deemed by the people money, and paid and received as such by all classes in this nation, is a fact of universal notoriety. And why we should, after this long practice and experience, revolutionize our whole monetary system, and run counter to the fixed habits and prejudices of the people, I am utterly at a loss to imagine. Are gentlemen prepared to injure the best interests of the people, and endanger our domestic tranquillity merely to preserve their consistency in error? Would it not be more wise, manly, and patriotic, regardless of all party considerations and past opinions, to sacrifice party opinions and a selfish policy on the altar of their country's good? Let us, now look at our condition. According to the last estimates with which we have been furnished, there is now in the United States from sixty to eighty millions of gold and silver, twice as much as we ever had before, with double the number of banks we had five years ago, and our whole land abounding with the finest crops ever before witnessed; and yet, strange to tell, owing to the instability in the public councils, and a disordered currency, confidence and credit are destroyed, and distrust and painful anxiety pervade this great community. The commercial action of the nation is, to a great extent, suspended; a large number of our vessels and steamboats are laid up and idle; and a large portion of the laboring classes thrown out of employment.

The wisest statesmen and purest patriots of this nation have abandoned long-established opinions and prejudices in obedience to the voice of experience and the exigencies of their country; and why cannot we do likewise to redeem this people from the embarrassments, dangers, and difficulties which surround them? In this age and Government of experiment, we ought not to be surprised at change of opinion in the wisest men. The most enlightened statesmen ever selected to preside over the affairs of nations have been often mistaken: they have only seen through a glass darkly the consequences of their measures. God has given to the mental vision of mortals but an imperfect and limited view of the future. I must here be permitted to repeat the remarks of Mr. Giles, of Virginia, a most distinguished parliamentary debater on the floor of the Senate, when charged with inconsistency. In his defence, he observed that he should have lived to little purpose, if he had not learnt by experience to correct his errors; but, said he, I have another very sufficient answer to give to the charge—I am consistent in this, said Mr. Giles, that I consider it my duty, at all times, to my country to do what is best for that country under the circumstances in which I am placed. In a review of our political history for the last forty years, it will be found that there

Oct. 12, 1837.]

Sub-Treasury Bill.

[H. of R.]

have been frequent and great changes of opinion on the most important subjects. At one time the great body of the people of the South and West were opposed to a navy; but experience has corrected their error. Many of the most distinguished men have changed their opinions on the question of a national bank—Mr. Madison and Mr. Monroe among others. Thirty years ago the people of the Eastern States were rather opposed to the manufacturing policy, the South and West for it; and now the East for it, and the South and West, or a great portion of them, against it.

Let experience, the best of all teachers, learn us to act wisely, in relation to the existing crisis in our public affairs. Let us reason together with frankness, and in a spirit of patriotism, and with bosoms animated with no other feeling than the public good, apply such remedies to the disorders in the currency which experience has proved to be efficacious, and restore once more a healthy action to the body politic. Let us have no more new, untried nostrums. The brokers and shavers are now reaping a rich harvest from this ruinous condition of the currency, and the loss must ultimately fall on the laboring and industrious classes of the community. The vacillating and unstable policy of the Government has shaken the confidence of moneyed men, who are now hoarding their treasures because they are unable to calculate the results and consequences of the present state of things, afraid to lend or invest their money.

Mr. Chairman, the farmers of the West, when they sell their stock or other products of their industry, want that sound, good currency to which they have been accustomed; and when they sent agents here to correct existing evils, they did not expect them to provide good money for themselves only, but for their masters—the great body of the people. This bill provides that no money shall be received for land, or at the custom-houses, but gold and silver. Twenty or thirty millions of gold and silver are to be drawn from the interior every year into the land offices, and to the large cities on the seaboard, where it is to remain until paid out to the public officers—to the navy, army, and for the public works; and I fear it will be slow in its march back to the interior States, where there will be little or no public expenditures. How the State banks can resume specie payments, or maintain specie payments under this operation, I must leave to better judges to decide. From five to ten millions must be generally locked up in the Government vaults, and withdrawn from circulation. To reconcile us to this experiment, we are told that we are to have a hard-money constitutional currency. I will not, by exploding paper money convertible into specie, and establishing an exclusive metallic medium, carry this nation back to a rude and half civilized age, before commerce, enterprise, and navigation had enlightened and civilized the nations; but will content myself with the facts and examples furnished by the most enlightened and powerful people of modern times, as the basis of my opinion and reasoning on this question. On a territory of no greater extent than Delaware or Rhode Island, or the city of New York or Philadelphia, a hard-money medium would be practicable, and a paper medium could be dispensed with. It can only suit a small territory, where the population is dense, where it can be removed from place to place without much expense or hazard; but in this extensive country it must be evident, on a moment's reflection, that convenience and necessity require a paper representative of specie. Every traveller through this vast territory, with a moderate amount of the precious metals, would be exposed to hazard; the weight of his trunk or saddlebags would give notice, at every inn at which he stopped, of the amount of his treasure; and when large sums are to be transported to distant places, the peril and expense would be increased.

I will not, Mr. Chairman, by my vote, authorize the

President of this free people to imitate the example of kings and emperors a few centuries past, who hoarded up at the capital all the gold and silver they could extort or filch from their subjects, to carry on wars of ambition and conquest. Neither my pursuits nor reflections have led me to explore, with the eye of a profound financier, the monetary systems of the commercial world in all their ramifications and effects; but I believe I may venture to say that neither this nor any other people can long have more than their fair proportion of the gold and silver of the commercial nations. If we should be able to obtain an excess, so as to produce a pressure in other countries, that excess would soon leave us and return to places where it would be wanted; nor can bolts, or bars, or vaults, embargoes, prohibitions, pains or penalties, arrest the current established by the laws of trade, which no power, the most despot, had ever been able to control. The currency of Great Britain and France consisted of gold chiefly, and paper, with this difference, that in Great Britain the proportion of paper, in the form of bank notes, to gold, was greater than in France. With these countries we have more commerce than with any others. Our currency has generally consisted of silver chiefly, and paper in the form of bank notes, with a greater proportion of paper than in either Great Britain or France; and the specie must flow from those countries to this, and from this back, according to the laws of trade, regardless of any laws or regulations of either.

Mr. Chairman, in exploring the causes of our present difficulties, I shall not go back to the removal of the deposits, but content myself with the recital of a few extracts in relation to this subject. There is no doubt that the extensive and extravagant speculations in the public lands, diverting twenty or thirty or forty millions of dollars from the ordinary channels of trade and business, may have had some influence. The unusual importation of gold from England and France may have produced a pressure for specie there, which, reacting on this country, produced a rapid return of it, and forced the banks, for self-preservation, to suspend specie payments. In this conflict and pressure in both countries, cotton fell, merchants failed, and a shock was given to confidence, credit, and business; and owing to the fall of cotton, with other causes, a large balance was created against us in favor of Europe. In this state of things, the Government, instead of denouncing the State banks, and threatening to crush them by destroying their credit and issuing commissions of bankruptcy, should, on account of the people, if not the banks, have exerted all their power and influence to sustain their credit and confidence in them and their paper, the only currency among the people.

The effort made to carry into effect, at this moment, the hard-money policy, and cast off the State banks, is calculated to have the most disastrous consequences on the community, by encouraging creditors to refuse to take the local currencies for their debts; to reduce the value of property, and unjustly change the relation of creditors and debtors. The Legislatures of the States may be driven to stop execution, unless the creditors will take paper, as has been done by Virginia at her last session. Mr. Chairman, we do not realize the dangerous consequences to result from the disordered condition of the monetary system. Derangement of the currency, loss of confidence and credit, is the hinge upon which many revolutions have turned in civilized countries. It is well known that the derangement of the finances, and destruction of public and private credit, was the immediate cause of that revolution in France which deluged that country with blood. At an early day an insurrection occurred in the State of Massachusetts; and in my own State, not more than ten or twelve years ago, after we had created numerous banks, the creditors and debtors had a most angry conflict; and, after relief

H. of R.]

Sub-Treasury Bill.

[Oct. 12, 1837.]

laws, judge-breaking, and a temporary war upon our judiciary, the people of that State were brought to the verge of civil war. On no condition of the State ought we to look with more deep concern than a disordered state of the monetary system. There are duties of more paramount obligation on the Congress of the United States, than to exercise all the powers granted them by the constitution, to restore a sound and healthy action to that currency which regulates the transactions of the people. To preserve union, establish justice, and insure domestic tranquillity, are among the leading objects of the federal compact.

Mr. Chairman, another unmeaning and complex notion is to be presented to the nation to reconcile them to this new and dangerous project. They are to be amused with the cant phrase, that Government ought to be divorced from the banks; and the people, who have based all their transactions on the local banks and the currency furnished by them, are to be abandoned to shift for themselves, under the denunciation and slanders of the Government—that same Government that brought many of these banks into existence, and assured the people they were to be confided in, and that they would furnish a better currency, and do the business of exchange on better terms, or as good, and more extensively, than the Bank of the United States ever had. And this language was held by the administration up to the 4th of March last, when the late President, in his farewell address, only about eight weeks before the banks all suspended specie payments, from causes to which I have briefly adverted, announced to the nation that all was well in regard to our banks and currency. If those placed by the people of this country at the head of public affairs, for their supposed wisdom and patriotism, could not foresee the fatal catastrophe which was to occur in so short a time, how can they criminate with such wanton and unfeeling cruelty the conduct of the banks which had followed their counsels? For, sir, I have now before me the letter of Secretary Taney to the deposit banks, after the removal of the deposits, in which he exhorts the State banks to expand their issues, and to be liberal in their accommodations to the community. No sooner, however, had the shock been felt by the banks, and their doors closed, than the friends of the administration became alarmed lest censure and reproach should fall on the administration, and “let slip the dogs of war” on the banks, in order to make them the scape-goats to bear off the sins and blunders of the administration.

Sir, how many of the deposit banks are insolvent, and how much is the Government likely to lose by them? I should like to have a candid answer to this question. I am sure that I have not been informed. If any are likely to prove insolvent, they ought to be designated. On the contrary, we are informed by the Secretary that the public money placed in them will be ultimately safe. Their whole crime, then, consists in having expanded their issues in conformity to the advice of the Secretary of the Treasury, and the approbation of the Government, and, under an unexpected revulsion in trade, and a pressure for specie, which the wisest men among us did not foresee, suspended specie payments. In this hour of difficulty and alarm, Mr. Pore said he would ask of every candid man whether the Government, after having nationalized these banks and their paper, were not bound in gratitude to their bank friends and the people to put forth all their strength and constitutional power to aid and sustain their credit and the confidence of the community in their paper?

Mr. P. said he had not much sympathy for those banks which accepted the deposits at the time of their removal from the United States Bank, because they had been hired and seduced to embark their influence in a crusade against the national bank, which they will find, and ought to have known long since, is the best regulator of our paper system, and the great conservator of the sound State banks of

the nation. From the commencement of the Government, the national bank and State banks had lived in harmony and worked together for the good and prosperity of this rising nation. By their joint efforts spurious and fictitious banks had been kept under, and, during the existence of a national and good State banks, the people had been secure against a vicious national or local currency.

Mr. Chairman, if I was as jealous of men in power as a political man ought to be in this free Government, I should incline to believe that the plan has been long and deeply laid to destroy the present banking system of the nation, national and local, for the purpose of rearing up on its ruins a great Government bank, to be wielded by those in power; yes, sir, to concentrate in the hands of the Executive not only the sword, but the great money power of this nation. The first bank to be destroyed was that of the United States; and, that accomplished, the next to be sacrificed were State banks; and it might have been supposed, from what occurred in 1814 and 1815, that they would fall an easy prey from similar causes; and then a Government bank would seem to be a necessary result of the destruction of all others; for, sir, it has never been imagined by the enlightened men of this country that the fiscal and commercial business of the United States could be carried on over our extended territory, by an exclusive metallic medium. Until lately, I was utterly at a loss to conjecture the motive which induced the friends of the administration to oppose, with such zeal and violence of denunciation, the charter of the late Bank of the United States by the State of Pennsylvania; and what is most extraordinary is, that a distinguished citizen of Pennsylvania, now on a foreign mission, should have so lately advocated, in the public prints, the revolutionary course of annulling, in a convention, the solemn charters granted by that State. The bank had ceased to exist as a national institution; and why there should have been such hostility to its incorporation by the State of Pennsylvania, I could not divine, until this sub-Treasury scheme was announced in the late message of the President. It is possible that it was apprehended that a State bank of such magnitude, under State authority, might present some obstacle to the great destroyer of banks, and embarrass the scheme under consideration, designed, if I am not greatly deceived, to lay the foundation of a great Treasury bank.

In looking at the past and present course of things, I am led back to the discussions, in the Virginia convention, of this constitution, between Patrick Henry, the first orator of ancient or modern times, and one who looked through the deeds of men, and the late Mr. Madison, among the most virtuous and enlightened statesmen in America. Mr. Madison could not believe that any President would remove a good officer without reasonable cause, and supposed that the powers of Government were so arranged and divided that there could be no undue or dangerous accumulation in any department. Mr. Henry, with prophetic vision, at the same time that he bestowed a merited eulogium on the virtues and intelligence of Mr. Madison, said, in emphatic terms, that, unfortunately for himself, and unfortunately for his country, he had been bred up in the dark closets of study, and knew nothing of mankind. Sir, said Mr. Henry, whatever others may think, however they may admire this constitution, to me it has an awful squinting towards monarchy. Mr. Henry had studied human nature thoroughly, and explored, with the eye of a wary statesman, all the secret springs of human actions, and foresaw, or thought he foresaw, a strong tendency in this Government, to concentrate too much strength in the Executive head, and predicted that at no distant day he would be more absolute in fact, if not in form, than any monarch on the British throne since the Revolution of 1688. Mr. Chairman, from what I have observed within a few years past, I fear Mr. Henry's predictions will be fulfilled, unless every man who thinks

Oct. 12, 1837.]

Sub-Treasury Bill.

[H. of R.]

this free system is worth preserving will stand forth and contribute his mite to check this tendency to prostrate all other departments at the feet of the Executive.

I know that many gentlemen calculate that this cant phrase of divorce of Government from banks is to carry them triumphantly through the pending struggle; but if they mount this petty, poor hobby, they will soon find themselves cast into insignificance. They rely too much on the credulity of the people, and underrate their intelligence. In prosperous times, when they feel no distress or suffering from the measures of the administration, they cannot be easily roused to resist error; but in times like the present, gentlemen may be assured that the whole intellect and energy of the people will be brought into action to vindicate their rights and interests.

The respect I have for many gentlemen who talk about a divorce of the Government from all banks, induces me to examine more gravely than might seem to be necessary or proper, the nature and character of this divorce. The parties to be divorced are the Government on the one part, and the banks, and, I would add, the people, on the other part. Now, sir, what is the Government, the party of the first part? It is, Mr. Chairman, if I understand the matter, the States and people acting here in all the Departments by agents; this is a Government of the people and States, who are at present acting by selected agents, in one branch, the States acting by agents selected by them in their corporate capacity. Now, sir, what are the banks of the States but money corporations, created by the States, furnishing bank money or currency for the people of the States, and solemnly made by this Government money agents of the United States, and furnishing, with the sanction of this Government, bank money for the Government and people of the United States? The stock of some banks is owned exclusively by the States; in some the stock is owned in part by the States and in part by the people; in others, the whole is owned entirely by citizens. This divorce, then, if I can comprehend the true character of it, is a separation of the States, banks, and people, from the States, banks, and people. There is something so obscure and preposterous in the proposition advanced, that the Government of the nation ought to sever itself from the States and people, and leave the people to struggle with a ruinous currency, without an effort to correct the evil, that I am at a loss for argument to combat such an incomprehensible, idle phantom. Am I to understand gentlemen that the existing currencies in the nation, practically the money of the people, long the standard and measure of value among them, the basis of all their contracts and transactions, is to be left in chaotic disorder and confusion, without an effort on our part to apply a correct ve, and that we, the agents of the people, are merely to provide good money for ourselves and public officers—that we, a select few only, are to be taken care of?

Mr. Chairman, let us reflect like faithful representatives and guardians of the public prosperity and happiness, and act effectively in obedience to the dictates of duty and patriotism. Let us exert all the powers granted by the constitution to redeem our country from the evils and dangers which surround it. It is proper to examine the powers of this Government in relation to commerce, and money, or currency. By the constitution, power is expressly granted to Congress to coin money and regulate the value thereof, and to fix a uniform standard of weights and measures. To Congress power is expressly granted to regulate commerce with foreign nations, and between the several States, and with the Indian tribes. That money and currency is intimately associated with commerce, and has been so in all times and in all well-regulated commercial nations, I need not adduce facts or arguments to prove. Money and currency have ever been considered the life and soul of commerce; in the language of Mr. Hume, it is the oil

which renders the wheels of trade smooth and easy, and he considers the thorough concoction and circulation of money through a State of much importance.

The people of the United States, in convention assembled, were deeply impressed with the necessity of granting to Congress full power over the subjects of commerce, external and internal, and currency; and, to make their intention more manifest, they denied to the States the power of coining money or emitting bills of credit. The evil which had been experienced from the power of the States to coin money or emit bills of credit, and the danger and inconvenience of permitting the States to regulate commerce with foreign nations, or with each other, induced the convention to vest Congress with plenary and exclusive sovereignty over these subjects; and I put it to gentlemen to answer whether the powers and duties of this Government in relation to currency and commerce are not as ample and imperative under the limitations of the constitution, as can be imposed on any other Government. The States and people of the States have not reserved any control or sovereignty over these subjects, but have surrendered them to Congress.

The people of these States, by their relation to this Government, are bound, by their money and their arms, to stand by and support it in good and evil times, and have a right to demand the exercise of all the power and means within the sphere of their authority, to give them a good currency, a fair measure of value to insure a just relation between creditor and debtor, and preserve a healthy action in the external and internal commerce of the country. Nor can the Government refuse or neglect to perform these duties to the extent of their power and means, without a criminal violation of their highest duties and obligations. If those placed in authority are too elevated to feel for the distresses of the people, or not wise enough to perceive the remedies necessary and proper to cure existing disorders; are so tight laced with commitment and consistencies as to be unable to act the part demanded by the exigencies of the times and the voice of a disturbed nation, let them retire from the post assigned them, and give place to wiser and better men, who have not sought the post of honor at the expense of principle and the public good; will not be committed against measures essential to maintain credit and confidence, and protect the great springs of the public prosperity. How different is the language held by the administration of public affairs in this country, from that held by the administration of Great Britain and the whigs of that country. In the year 1793, when the people of that country were overwhelmed with difficulties and embarrassments, and the commercial credit was in danger, the Government stepped forward with a kind and aiding hand, and arrested the ruin and desolation which seemed to be impending.

In 1797, when the Bank of England suspended specie payment, and a panic seized the nation, the prime minister of England, instead of denouncing the bank and ordering a commission of bankruptcy against her, had a committee raised to examine her affairs, who reported, after a full examination of the affairs of the bank, that the means were ample to meet her engagements, and that she was sound and solvent; that the suspension was forced on the bank by the circumstances which surrounded the country and the dangers which menaced it.

If, Mr. Chairman, this Government had taken the same course, had an investigation made into the condition of our banks, and a report of the same character, so far as merited, made to the nation, with assurance that the Government would aid them with its credit and countenance to resume specie payments, they would have maintained with the people confidence in our institutions, so important in this hour of alarm and distrust; and if the President, in his message, instead of denouncing a nation-

H. of R.]

Sub-Treasury Bill.

[Oct. 12, 1837.]

al bank, had declared, like President Madison, that the State bank experiment would not answer without a national bank, and recommended the measure to the consideration of Congress; if he had hurled from him the hobby by which he rode into power, and dismounted his followers, and admitted his error, with that magnanimity which becomes the Chief Magistrate of a nation, he would have gained a crown of public approbation worth all the Treasury note bills and sub-Treasury schemes which his ingenuity can invent in the four years for which he was elected. In confirmation of the opinion I have advanced, of the duty of this Government to give the people a good currency, and guard against a ruinous and unstable one, let me call your attention to the sentiments expressed by the whigs of England, such as Charles Fox, Sheridan, and others, whose lives were devoted to sustain the rights of the people against the usurpations of the Crown.

In a protest entered on the journals of the House of Lords in the year 1797, during the war between England and France, they hold and maintain the following language and opinions. The whigs insist in that protest that "the advisers of the Crown are responsible for the condition of the State; responsible for its internal peace and general good government; for the protection of its commerce, its credit, and the various sources of its prosperity and wealth." And, Mr. Chairman, I concur with Fox, Sheridan, and other whigs of England, whose lives were devoted to the maintenance of the powers and privileges of Parliament against the encroachments and usurpations of the Crown, that those charged with the administration of this or any other Government are responsible for the condition of the State, and for the protection of its commerce and credit, and that no administration can evade that responsibility with honor or a regard to public duty. According to the express provisions of our constitution, and the fundamental law inherent in every political association, those placed in authority are under the most imperious and sacred obligations to perform the duties to which he had adverted. It is true that, technically and strictly speaking, nothing but gold and silver can be forced on a creditor; but we know also that, in practice, whatever medium may by law or general consent be generally received in exchange for property or commodities, and in payment of debts, is, and must be, the circulating medium and currency of such country, and will regulate the performance of contracts, if another medium be not specially provided for; and hence the necessity imposed on the sovereign power to guard against the depreciation and fluctuations of currency, whatever it may be, to secure society against violent struggles between debtor and creditor, the necessary consequence of a spurious, uncertain standard of value. For forty years out of forty-eight of our national existence, our Government, by the use of national banks, has secured the country against these evils. It seems to be fashionable now to denounce the banking and credit systems, and extol the hard-money plan. The policy and expediency of banks I do not consider, at this day, a debatable question. They are liable, like all other good institutions, to abuses; but the systems here, while we had a national bank, attained as much perfection as in any other country where they had been used. Banks have been introduced in the most enlightened countries of Europe, the offspring of commerce and wealth in commercial nations. The experience of ages has established their utility, and it would be strange for us, at this day, to run counter to the long usage and testimony of the whole commercial world. We have had them in this country for more than half a century. Few men are willing to keep in their private coffers a large amount of money; the fact is difficult to conceal from those about them. A man cannot be always at home to guard his treasure, and is exposed to robbery and murder; hence men are generally disposed to deposit their funds on hand

in some place of safety, and banks of good and solvent character, and having general confidence, are selected by prudent men to take care of them; and these deposits are of great advantage to the public, because the money of the country, instead of being hoarded, is secured by the owners from fire and robbery, and placed in good banks, and put in circulation by the banks, to aid the enterprise, industry, and business of the people. But to secure these advantages, and augment in this way the active capital of the community, it is necessary that the banks should be sound, and have the firm confidence of the people.

Banks, in their origin in Europe, were places of deposit and of inspection for money, to prevent clipping or debasing the coin. The checks of the depositors passed from hand to hand as money, and, being convertible at all times into specie, this species of transfer was called bank money; so the notes of the Bank of England and of the Bank of the United States, while convertible into specie, may be properly denominated bank money. To give to paper, in the form of bank notes, the character of money, it is necessary so to organize and regulate our banking system as to secure to the holder of a note the power of converting it into gold and silver at all times; and this we have never been able to do uniformly, but by the agency of a national institution. The banking and paper credit of Great Britain has been carried to a greater extent than that of any nation in Europe; and under its operation and influence she has become the first commercial and naval Power in the world. When Bonaparte was preparing to invade England with a million of soldiers, the timid part of the nation became alarmed, and made a run upon the bank, in order to prepare for flight from the kingdom, in the event of Bonaparte's success; and this, with other causes, forced a suspension of specie payments; and yet England, with this suspension, maintained a war against nearly all Europe for more than twenty years—triumphed over the combined fleets of France and Spain in two decisive victories, at Trafalgar and the Nile, and carried her power and domination to regions where the Roman eagles never flew when mistress of the world; and there would seem to be no limit to her domination, but for the rising greatness of this republic.

It was, sir, the Anglo-Saxon spirit of this people that gave us independence; and this nation, if united, will, at no distant period, rival Great Britain in commerce, and check her supreme dominion on the ocean.

What, Mr. Chairman, has been the effect of the banking system and paper credit in this country? It commenced more than fifty years ago, has expanded with the growth of the nation, and, in less than half a century, under our present constitution, we have risen from a small beginning to be the second commercial nation in the civilized world. Our navigation has increased; our country has improved, with astonishing rapidity, in wealth and internal improvements of every kind; our population has expanded to the far West, where the wilderness has been made to blossom like the rose, under the operation and influence of this banking system so much denounced of late.

Banks are useful, not only in aiding the general operations of commerce, but they place the poor and wealthy on more equal ground. Young men of enterprise, industry, and good habits, can generally, with the aid of friends, obtain loans, on moderate interest, to embark in trade and business; and thousands of enterprising young men without capital, with a little credit, have risen from poverty to opulence. I know, too, that the branches of the United States Bank established in Kentucky, after all other banks were wound up there, diffused their loans and accommodations to the people of my State as fairly and usefully, and, indeed, more so than any other bank ever did, and without interfering in our party contests. I believe no institutions were ever less liable to such an imputation.

Oct. 12, 1837.]

Sub-Treasury Bill.

[H. of R.]

Mr. Chairman, I have now to say to my friends from Virginia, who oppose this bill, and insist that the State banks shall be continued as depositories of the public money, that while I do not believe that this Government ought to depend on the agency of banks under State authority, I will vote with them to make general and special deposits in those banks in preference to the bill under debate; and I hope if the amendment proposed in favor of State banks should be rejected, that my friends from Virginia will unite with me for a bank of the United States. They will answer me, probably, that they cannot do this, because it is forbidden by the constitutional doctrines of Virginia, which, he (Mr. P.) must confess he had never been able to understand, although born in Virginia, often an actor on the political theatre, and a supporter of three Virginia Presidents—Jefferson, Madison, and Monroe. If these distinguished men are to be considered the elders of the Virginia political church, with the addition of the late Mr. Crawford, born in Virginia, and supported for the Presidency by that State, we shall be still more at a loss to understand what is meant by the Virginia doctrines; and we shall probably find them, like the doctrines of most other States—one rule of faith in theory, and another in practice.

It has been generally supposed that the Virginia statesmen of the Jefferson or republican school were opposed to the exercise of implied or constructive powers; or at least that they are more strict constructionists than others; that they are opposed to the exercise of powers not expressly granted; and so am I, Mr. Chairman. If there is any plain line of demarkation between the opinions of Virginia politicians and others, in regard to the powers of this Government, I have never been able to discover it.

It is true that parties have differed about the power to pass particular measures; but there is no general rule of construction on which the statesmen of this country have differed, at least in practice. Those in opposition have, under every administration, assailed the constitutionality of measures adopted by those in power; and those in power have uniformly exercised all the powers in their opinion necessary and proper to sustain their policy and accomplish their objects. If politicians of the Virginia school have, in practice, observed a more strict construction of the constitution than others, I have in vain looked for evidence of the fact. Mr. Jefferson, Mr. Madison, and Mr. Monroe, united in the purchase of Louisiana, and its incorporation into the United States, the constitutionality of which was controverted by the statesmen of the Eastern States; and the correctness of their constitutional objections was admitted by Mr. Jefferson himself; but he justified the act on the ground of necessity. He considered the acquisition necessary, to secure to the West a free outlet to the ocean, and to preserve the Union. After this, a law passed Congress to establish a branch of the United States Bank at New Orleans, which the bank had no right to do under her charter; and, therefore, that act must be considered in the nature of an original proposition, and it received the sanction of Mr. Jefferson, then President of the United States; and other laws were, I believe, passed during his administration to protect this unconstitutional monster.

Mr. P. said that among the first acts for which he ever voted in Congress, was the embargo recommended by President Jefferson, in the winter of 1807, for which there is no express grant of power in the constitution, unless embraced by the clause authorizing Congress to pass all laws necessary and proper to carry into effect the powers granted, &c.; or the power may be implied as incidental to the powers to declare war and regulate commerce. The public men from the Eastern States, or many of them, contended that, under a power to regulate commerce, Congress had no power to destroy commerce. The law, without

limitation as to time, declared that no ship or vessel should depart from any port or place in the United States, for any foreign country; certainly one of the strongest measures ever hazarded by any Government.

Mr. Chairman, I do not intend to be understood as questioning the constitutionality of the embargo law. At an early period of this Government, I think the Virginia statesmen supported the constitutionality and expediency of protecting and encouraging American navigation, by imposing discriminating duties on foreign vessels; and, until lately, they admitted the power of Congress to pass a protecting tariff. In the year 1781, the continental Congress, composed of the most godlike men for wisdom and elevated patriotism ever assembled under the sun, passed the first national bank, called the Bank of North America, ten States voting for it, of which Virginia was one, and three against it. After the next bank, first under this constitution, had passed both Houses of Congress, and been presented to President Washington for his signature, in consequence of some opposition to it in Congress on constitutional grounds, General Washington, with that caution and prudent circumspection which characterized his course through life, called on his cabinet for their written opinions on the constitutional question; and after receiving and considering them without reference to men or parties, (for he was above all party,) with that practical wisdom and forecast for which he was distinguished, approved the law. Yes, sir, this father of his country, this Virginia President, decided that a national bank was constitutional.

In 1816, Mr. Madison and Mr. Monroe, regardless of previous commitments, bowed to the voice of necessity and experience, and sacrificed their consistency on the altar of their country's good. Virginia supported Mr. Crawford, a decided supporter of a national bank, for the Presidency; and in that vote, according to the notions of the day, has declared in favor of a national bank. While on this subject, I will add to the authority of Virginia statesmen the opinions of Mr. Gallatin, Mr. Dallas, Mr. McLean, and others might be mentioned, the most enlightened financiers in the country, who have, from a thorough and practical knowledge of the necessity and utility of such an institution, concurred in opinion with the distinguished men to whose authority I have appealed. May I be permitted to refer to the decisions of the Congress of 1791, 1816, and 1832, as high authorities in favor of a national bank?

In the face of this high authority, the experience of forty years of our national existence, and admonished by the present disturbed condition of the country, it is given out in speeches, and strongly intimated by the President in his message, that he will put his veto on any bill for the creation of a national bank; and he speaks further, in his message, of the persevering opposition of the people of the United States to a national bank, and seems to suppose his election a high evidence of public opinion on this question. The conclusion he draws from the event of his election furnishes very slender evidence on this point, for it never has happened that any presidential election has turned on any one political question. The choice by the people of a President is influenced by various considerations, and rarely with reference to any particular question or principle; and, besides, it ought to be recollected that the bank question had been disposed of long before his election, and could not have been the only ground of selection. But if they decided against a national bank, they must have declared in favor of State banks. In pulling down the Bank of the United States, it was distinctly announced to the nation, not that bank agency would be dispensed with, but that State banks would answer the purpose better. The people, therefore, if they decided any thing, have approved the substitute presented to them by those high in authority, who now acknowledge that the substitute of State banks has failed;

H. of R.]

Sub-Treasury Bill.

[Oct. 12, 1837.]

and hence it is but fair to contend that the people have only declared against a bank on the condition that the State banks would fulfil their expectations; and, therefore, it would seem to be still an open question, or the decision is in favor of a national bank. If any thing has been decided, it was the question between the administration and the late bank, on the ground of imputed misconduct on their part, and not the general question of a national bank. He was not sufficiently acquainted with the facts to decide on the merits or demerits of the late bank; he had thought it indiscreet in them to issue publications concerning the controversy with the Government, because it did them no service, and subjected them to the imputation of interfering in the elections and politics of the country. For this course there may have been some excuse on the score of self-defence. I certainly never heard of any charge of the kind against the bank before its contest with the administration; and the branches in Kentucky, I believe, have acted fairly and usefully, and to the satisfaction of all parties. I neither, Mr. Chairman, understand the facts involved in the controversy, nor am I disposed to engage in the discussion of them. I am for a good bank, under proper regulations, with a competent capital; reserving to the States one-fourth or one-third of the stock, to be divided among them according to an equitable ratio to be paid out of the proceeds of the public lands; foreigners to be excluded from any direction of the bank; the interest to be moderate, and a majority of the stock to be subscribed by citizens of the United States, with a reservation of full power to Congress to guard against abuses, and insure to the people a sound, stable, and uniform currency, and a fair and faithful administration of its affairs. Mr. Chairman, I have no expectation of a national bank until demanded by the voice of the nation; nor is it desirable that Congress should act in advance of public opinion. I am ready to act, at any time, when a majority shall feel satisfied that their constituents are for it. I shall not be deterred from pressing this subject on the consideration of this House or the Executive by any intimation or menace he may give of a veto, and I deny his right in this way to dictate to or influence the deliberations of the legislative body. In doing so he departs from the sphere of action assigned to him by the constitution of his country. From what part or clause of that instrument does he derive the right to tell the Legislature that he will not co-operate in measures deemed by them necessary for the good of the people?

The constitution makes it the duty of the President, from time to time, to give to the Congress information of the state of the Union, and recommend to their consideration such measures as he shall judge necessary and expedient; but on what part or clause he claims the right to tell the Congress of those things they ought not, or shall not do, I am yet to learn. The veto power was vested in the President to protect him against encroachments of the Legislature. It is, to the President, a conservative power, and may, on extraordinary occasions, be interposed to stay, for a time, rash and intemperate measures proceeding from high party or popular excitement, and pregnant with very disastrous consequences to the nation; and in such a possible case, not likely often to occur, the President may interpose to throw back the subject on the consideration of the people; but when it goes through the crucible of investigation, and is presented as their settled and deliberate will in relation to matters of concern to the whole nation, I cannot imagine a case where the President could rightfully use his veto to defeat the popular will; and the case is not materially different in regard to constitutional questions. After the nation has long considered and deliberately decided a constitutional question, the President must co-operate with the legislative department, not as he understands it, but as understood by the intelligence of the great community, for whose benefit it was made. The pop-

ular will, clearly and deliberately expressed, must control the course of this free Government, and especially on subjects of doubtful policy, and doubtful constitutional power.

To illustrate and support my views of this veto power, Mr. P. said he would call the attention of the committee to the last paragraph of Mr. Jefferson's letter to General Washington, on the bank question, in the year 1791. Mr. Jefferson, after expressing his opinions against the bank, well concludes by telling President Washington that, unless his mind, on a view of every thing, was tolerably clear that it was unconstitutional; if the *pro* and *con* hung so equal as to balance his judgment, a just respect for the wisdom of the Legislature would decide the balance in favor of their opinion. It is chiefly for cases where they are clearly misled by error, ambition, or interest, that the Constitution has placed a check in the negative of the President. This opinion was given to the President at the first session the bank question was agitated in Congress, and before it had been discussed or decided on by the people. How much stronger is the case now, after we have made two successful experiments of twenty years each, after the constitutional power has been three times asserted by large majorities of both Houses of Congress, confirmed by all the other departments of Government, and supported by the opinions of a host of the most enlightened statesmen and patriots of this country? Let it be remembered, that the charter of a national bank does not invade the Executive or Judiciary, and can only trench, if unconstitutional, upon the rights reserved to the States and the people, and is a measure which concerns the interest of the people at large.

If the people and the States, from a conviction of the necessity and utility of such an institution, should call on Congress to establish a bank, on what ground could the President rightfully interfere? Should this measure pass both Houses of Congress in conformity to the public will, I cannot believe it possible that he would venture a veto; but should he, in defiance of the public will, do an act so subversive of the great principle of self-government, for which our ancestors bled, I trust that another Patrick Henry will rise on this floor, and remind those clothed in a little brief authority here, that Cæsar had his Brutus, Charles his Cromwell, and that they had better profit by their fate. Sir, this menace of a veto has no precedent in our history, except an opinion expressed in a message of Mr. Monroe about the appropriation of money for roads, for which he was censured by a friend on this floor. The British monarch would not dare to threaten a Parliament with a veto on a measure demanded by the voice and interest of the nation. The veto power, placed as a shield to protect the Executive and other departments against the invasions of the Legislature, and to stay, for a moment, rash and intemperate action, was never designed by our constitution to defeat the deliberate will of the nation in relation to measures of general interest.

I will not, Mr. Chairman, say any more, on this occasion, of the veto power or its exercise, but will proceed to notice, very briefly, the amendment offered by a gentleman from Virginia [Mr. GARLAND] to the bill under consideration, for which, I repeat, I will vote, as the least of evils, and continue this State bank agency, whether the deposits are general or special, until the wisdom and experience of the nation shall provide a better. And here he would take leave to remark, that he felt proud that the Old Dominion was the land of his birth, when he saw her representatives stand forth, with manly firmness, regardless of party and the frowns of power, and resist measures of such dangerous tendency; and he begged leave to assure them that he was not hostile to State banks; on the contrary, he believed it was wise for every State to have banks of solid capital, and under prudent management. He was not disposed, (continued Mr. P.) to impair the strength of the State

OCT. 12, 1837.]

Sub-Treasury Bill.

[H. OF R.]

Governments, because he held them to be essential pillars of the temple of American liberty. While he was not prepared to go the whole length of nullification, his observation of the course and tendency of this Government for a long period had convinced him that the strength of the State Governments must be maintained, and that they were the great bulwarks around which the people must occasionally rally to arrest the anti-republican tendencies to which the central power is liable in the hands of wickedness or folly. At the same time that I express this view, with unfeigned sincerity, I must be permitted to say, that the national Government must be allowed the full and fair exercise of all the powers assigned to it, according to a fair interpretation of the constitution, to enable it to accomplish the objects for which it was intended. The powers were granted to Congress to regulate commerce, external and internal, and to coin money and regulate the value thereof, in exclusion of State power; and it would be a violation of the spirit and intent of the constitution to withhold from Congress any of the means fairly necessary and proper, and clearly adapted to carry into effect the objects of those grants of power to which I have referred. An unreasonable distrust or jealousy ought not to be indulged of this Government more than of other Governments created by the people, from whom both State and National Governments had emanated. Our national compact, whether of the people in the aggregate, or by the States in their sovereign corporate capacities, ought to receive, especially in regard to powers and subjects to which the States are not competent, a fair and rational interpretation, to accomplish the object of the parties to it, instead of an over-strict, technical, or metaphysical one.

His conservative friends, he said, must pardon him, while he admired their manly independence, to say, with great deference to their intelligence, that, according to his reflections on the subject of commerce and money, they are only half right. We agree, if I understand them, that an exclusive metallic medium will not answer over this extensive country; and that our social and commercial intercourse and business requires a paper representative of gold and silver, otherwise called bank money; for bank notes of undoubted credit, and convertible everywhere into specie, are money, for all the purposes of human society. If a paper medium is necessary—if one is to be coined or manufactured for this people, I put the question to the candor and intelligence of those gentlemen and all other gentlemen on this floor, whether, according to the divisions of power established between the State and national Governments, that medium ought not to emanate from the Federal instead of State authority? And if gentlemen could only free themselves from their commitments, and disregard of what is termed consistency here, they must respond in the affirmative.

Commerce and currency are certainly placed by the constitution within the sphere of national legislation, and the paper medium or bank money representative ought to be issued by a national bank of universal credit and confidence, and on a foundation as firm as the Government itself.

It is essential that any paper substitute for specie, to make a currency over the whole nation, and convertible into specie everywhere, must have a national character; and I now put it to gentlemen, to answer whether it is possible to make the notes of the banks of twenty-six States current everywhere, and constitute a uniform and stable currency for this people? Is it in the power of this Government to nationalize the notes of all these banks, however solvent they may be, so as to give them a par value everywhere? And if they cannot, the harvest of the brokers must continue, and the losses to the holders of notes must fall chiefly on the laboring, farming, and planting classes of the community.

It is impossible for the great body of the people to know the condition or credit of all the local banks scattered over this vast country; hence the necessity of a medium with the national stamp on it. The people may be acquainted with the condition, and have confidence in the banks of the State or neighborhood in which they live, but few can know much of distant institutions.

In the most prosperous season of trade and business, when there existed little distrust of banks, it was difficult to travel in different States with local notes, and they were generally under par at a distance from the banks of issue, and had to be sold to the brokers. Mr. P. said he could not believe that this Government ought to be dependent on the agency of banks not responsible to them, but under the control of the States, and he had other strong objections to this connexion; but he preferred them to the plan under consideration. In addition to the objections he had urged against this bill, he would observe that these sub-treasuries were to be dispersed over the country, and to be inspected by the agents of the Secretary of the Treasury, and their reports, through him, would be all the information which it would be practicable for Congress to obtain. A large portion of the public money might be purloined from these sub-treasuries, which it would be impossible for Congress to detect, without sending committees to all these distant places to examine things and count the money, and then, without an inspection of the whole, the most vigilant scrutiny could be eluded. It cannot be expected (said he) that the members of this House can absent themselves from their duties here so long, and encounter the labors such an examination would require.

Mr. Chairman, we have now twenty-six States, with unlimited power to make banks beyond the direct control of Congress, and the banking system has taken such a deep root in our country that it is the extreme of folly to think of exterminating it; and if one State banks, another will, and this system must remain a permanent part of our domestic policy. These banks furnish, and will continue to furnish, local currencies for the people; and the inquiry is, whether this Government ought to guard them against the evils of the system, and what are the best and most practicable means of doing so? Every administration, commencing with that of Washington, down to the present, has considered it the sacred duty of this Government to use the best means in their power to cure disorders in the currency, and insure to the people a stable and uniform measure of value for commerce and contracts of every kind. Can it be expected, however we may get along in good times, that, in a commercial or pecuniary convulsion or war, these numerous local banks can have general confidence in each other, or can be united and act with that concert which is necessary to sustain credit and confidence and a good uniform currency during the shocks incident to periods of difficulty and danger? Alarm and distrust overspread the country; moneyed men and holders of notes run on the banks, and force them to close their doors; business of every kind is suspended; thousands are thrown out of employment, and the public tranquillity endangered. A wise Government ought not to content themselves with the means of managing the vessel of state in pleasant seasons, and when temperate breezes only are to be met with, but should be prepared to keep her steady and moving in the great current of the public interest in the most tempestuous seasons. Throughout our past political history, the strong ground taken against a national bank has been, that State banks would answer; for, at all times, it has been admitted that bank agency was a necessary and important auxiliary to the fiscal and commercial operations of the country. Twice has that agency failed; twice, for a period of twenty years each, has the agency of a national bank succeeded to the full extent of public expectation; and yet will those charged with the control of public affairs obstinately adhere to the

H. of R.]

Sub-Treasury Bill.

[Oct. 12, 1837.]

ground they have assumed. If gentlemen believe their constituents are opposed to a bank, I will not ask them to oppose their will; I will, however, I must, exhort them as friends, fellow-citizens, and patriots, when they return among the people, to tell them with frankness that there is no other effectual and permanent cure for the disorders of the State but a national bank.

Gentlemen must be sensible that, in the exigencies of war and the revulsions of trade, a national bank, with a competent capital, with well established credit and confidence, at home and abroad, would be able, with the aid of the Government, to do more to sustain public and private credit and confidence, keep the monetary system sound and regular, and avert the evils incident to the perils of war and shocks in trade, than a thousand local insulated institutions, with no common head, jealous and afraid of each other, which, in a moment of panic, would each revolve on its own axis, and take care of itself. What occurred twenty years ago, will occur again; when another bank shall be established, the small fictitious banks will be wound up; others of sound capital will dissolve and subscribe their funds to a new bank, and those of good and large capitals, freed from the competition of swindling institutions, will be able to do a fair business in harmony with a national institution. A new bank, if established, will be required to locate branches, one, at least, in every State, which will be particularly advantageous to the Western and Southwestern States. The capital and wealth of the South and West consists chiefly of land, live stock, and slaves; and the people there are more disposed to vest the fruits of their industry in such property than in bank stock, yielding a moderate profit of five, six, or seven per cent.

The interest of money in the West is high; in some of the States the legal interest is ten per cent., and the people of those States have little motive to put their capital in banks, who must lend at five or six per cent. The property of the commercial States consists, to a great extent, of money derived from the profits of trade, and they are willing to vest their capital in good stock, yielding a moderate profit; and they would prefer stock in a national bank, because more valuable, and under the protection of the constitution and Government of the United States. Their capital, through the bank, would be diffused over the nation, according to the demands of trade and business, and would aid and encourage the trade, enterprise, and industry of the West, and especially of the new States of the far West. It would facilitate their exchanges and commerce, and every branch of their industry. The traders from the interior States of the West to the South and West would be able to do their business in a currency which would pass everywhere, and remit their funds from place to place without hazard or loss.

Sir, this bank, with its branches diffused over our extended country, part of the stock belonging to the States, would be a bond of union. Every man using a note of a national bank, would, in feeling at least, be in some degree identified with the National Government. The power and influence of such an institution is an objection urged by some, to which (Mr. P. said) he would answer that he believed that the State institutions exercised forty times as much influence and power over the political affairs of the country as had ever been used by both Banks of the United States. Nor can (continued he) any bank exercise one-hundredth part of the power and influence which belongs to the Post Office Department alone. The same objection of power was urged against a navy, at an early period of this Government; it was said that the navy would be an instrument of power in the hands of the Government, but time and experience had overruled all objections to this strong arm of our national defence. The navy is not only a weapon of defence and protection to our rights on the ocean, but a powerful bond of union. Our ships of war do not belong

to any State; they are the common property of the nation; and every victory or defeat vibrates through every fibre of the body politic.

The strong ground of objection, and the one chiefly relied on at all times, has been that the constitution does not authorize the creation of a bank, while its utility and convenience have been generally admitted. I shall not enter at large into a discussion of this objection, nor have I the vanity to suppose that I could shed any new light on a question on which the intellectual powers of a Hamilton, a Gallatin, a Marshall, a Pinckney, a Crawford, a McDuffie, and a host of others, the most distinguished statesmen of our republic, have been exhausted, supported by the cool and deliberate opinion of the Father of his country, sanctioned three several times by large majorities of both Houses of Congress, and, at a late period, after a long trial of its utility and necessity, confirmed by the opinions of a Madison and Monroe, two of the elders of the Republican church. One fact, often mentioned in the public prints, and much relied on here, I must be permitted to notice; and that is, that the convention rejected a proposition to grant charters of incorporation. I have not examined the proceedings of that body; but, if the fact be as stated, it proves nothing, because that proposition was for a general power to grant charters of incorporation. That was, I think, very properly refused—nor is such a power contended for by the friends of the bank. It will be a sufficient set-off to that fact to state another, and that is, that in the same convention a proposition was made to grant Congress a power to emit bills of credit, and that it was rejected. Now, sir, it is well known that, during the late war, Congress did issue bills of credit; and the bill passed at the present session, to issue Treasury notes, approaches very nearly, if not entirely, to bills of credit.

If it be fairly necessary and proper to grant a charter to carry into effect any of the great powers granted—if such a measure is a necessary auxiliary to effectuate other powers, and it has a fair relation to them, then the bank is constitutional; and, if money is not to be had to meet the demands of Government by taxes or loans, if it is necessary to resort to an issue of notes, then it may be constitutional. I voted with much hesitation for this Treasury note bill, because it authorized a larger sum than appeared necessary, and it seemed to me more congenial with the spirit of the constitution to borrow money directly than to do it indirectly; but as the amendment to borrow directly failed, and the interest on the notes gave it the appearance of a loan, I voted for it to relieve the Treasury, and give some relief to the country. I entered this House, with no disposition to find fault or embarrass the administration. I voted for indulging the merchants, and will give time to the banks to enable them to indulge the people, and would have voted for the postponement of the fourth instalment provided the House had adopted the amendment offered, making it the duty of the Secretary of the Treasury to pay the money at the period to which payment is postponed; but, sir, I felt constrained, by a regard for principle and the public good, to exert my feeble powers against the passage of this sub-Treasury bill.

Mr. Chairman, I had more to say to this committee, on the several subjects embraced in this debate, but I feel too much exhausted to proceed, and will therefore conclude with urging on the consideration of the representatives of the people the propriety of postponing a final decision on a measure of so much importance, and involving principles of such great magnitude, until public opinion can be pronounced upon it. If the measure be doubtful in principle or policy, we ought to avoid the appearance of precipitancy; respect for our constituents, who have had no opportunity of making known their sentiments, and who are to be bound by this measure, require that the final action on this bill should be suspended until the next session. Let us

OCT. 12, 1837.]

Sub-Treasury Bill.

[H. OF R.]

think a little more ourselves, and afford our constituents an opportunity of thinking and speaking also.

Before Mr. PORE had concluded his remarks, as given entire in preceding pages, he was arrested by the hour, and the House took its usual recess till 4 o'clock.

EVENING SESSION.

The Committee of the Whole met at four o'clock, and had to wait long for a quorum. Mr. PORE had the floor, but yielded it for a short time to

Mr. CUSHMAN, who observed that, as the gentleman from Kentucky had made a personal allusion to him, he would, with that gentleman's leave, say a word or two by way of explanation. It is true, as that gentleman says, that while the report of the Committee of Ways and Means was under discussion, and after it had been debated during the morning hour for several days, he moved the previous question. It is true, also, that the honorable gentleman from Kentucky asked him to withdraw the motion, that he might make a few remarks upon that subject, and he now complains that he was then prevented from so doing by the above-mentioned motion.

Mr. C. said there were two reasons why he did not comply with that request. The first was, that there was around him a general desire that it should not be granted: and if he had withdrawn it, the same motion would have been renewed by some other gentleman. Secondly, that the subject of a United States bank had, for the last five or six years, been the common theme of discussion in every city, town, village, and hamlet in the country. It is true, he said, that several gentlemen, during this debate, had declared that the subject of a bank has not been before the people for their discussion, but it was *the* bank.

Mr. C. said if gentlemen would only go back to the re-election of the late venerable President of the United States, they would find that that Presidential canvass was put upon the question of bank or no bank. A bank, *the* bank, or any bank, were all denounced by the people at that time, as appears by the result of that election. It was the pivot upon which that election turned. But if the subject of establishing a bank was not before the people for consideration at that time, the whole subject was before them during the election of the present Chief Magistrate of the United States.

Mr. Van Buren, before the late Presidential election, in pursuance of a call which was made upon him for that purpose, declared, in the most unequivocal manner, that he could not sanction an institution of that character; and this was the pivot, also, upon which that distinguished individual was elevated to the Presidency. Twice, therefore, have the people declared that a United States bank ought not to be established.

Mr. C. observed that, from the course which he had thought proper to pursue, some gentlemen may have supposed that he was disposed to cheek, unnecessarily, the freedom of debate. But he would assure gentlemen that they mistook his character altogether. He would go with him who would go farthest to protect the great vital principles of civil and religious liberty, the freedom of speech, the liberty of the press, and the right of petition. These sacred rights he never would yield but with the last breath of life.

But there is a very wide difference between the rightful exercise of these invaluable privileges, and a wilful abuse of them. To correct this evil, this abuse, the rule regulating a call for the previous question was adopted as a part of the by-laws of this House; a rule which has existed ever since the formation of the General Government. A similar rule has been adopted by several State Legislatures to correct the abuses which are the subject of so much complaint in this House. In fact, nothing of any importance could be accomplished in this House without such a law.

On the east side of the Atlantic, in the Spanish Cortes, the question asked is, "Has not this subject been sufficiently debated?" If this question is responded to by a majority of that body, an end is put to the discussion, and a vote taken on the main question. This is the operation of the rule for the previous question in this House: the design of the motion is to ask the House if the subject under consideration has not been sufficiently debated, and cannot be enforced without a majority of the members present. As the gentleman from Kentucky states that he merely alluded to him as stating a fact, and not for the purpose of impugning the purity of his motives, Mr. C. observed that he would close his remarks by stating, that, so long as his fellow-citizens of New Hampshire should provide him a seat upon this floor, he would faithfully and independently execute his political trust; and should any gentleman, here or elsewhere, dare to question the purity of his motives, he would pronounce him a base calumniator. Mr. C. was here interrupted by

Mr. WM. COST JOHNSON, who said that he rose to a point of order. He said that he rose to arrest the current of the honorable gentleman's remarks with great reluctance; but he considered them so out of place at this moment, that he was constrained to protest against their further continuance.

We are now, Mr. Chairman, (said Mr. J.,) within a few days of an adjournment, and have to decide upon an important bill; and, in the midst of this discussion, the honorable gentleman from New Hampshire [Mr. CUSHMAN] thinks fit to consume the time of the House by discussing the merits of the previous question, which he called some four or five days ago. Then was the time for explanations, if the gentleman thought any necessary. But his object was then to arrest explanations and discussion upon the merits of a resolution which the chairman of the Committee of Ways and Means thought fit to introduce, but was afraid to have discussed. And now the honorable member from the Granite State feels a strong propensity to enlarge upon it. Yes, sir, with great and peculiar emphasis, he now discusses *a bank* and *the bank*, and called the previous question upon it, after but one member had spoken upon the subject. Why did not that gentleman use that occasion (said Mr. J.) to discuss a bank and the bank? He has edified the committee with his learning and research upon the history of the previous question; and after making a great display of his exalted patriotism in defending the freedom of debate—and we must, in giving him the credit which he claims for the patriotism of his notions, listen to his pretensions, and not judge him by his acts—he refers us to the high authority which he has culled from the east side of the Atlantic. He has talked about Turkey, and has shown that he has precedent for the gag-law in the example of the Spanish Cortes. The gentleman is as unfortunate in his authority as he is in the time of his using it.

The gentleman can find Authority in the Spanish history for the inquisition; and from his readings of Spanish history, and adopting their principles for his standard of action in this hall, we may account very rationally why he has so often called the inquisitorial and detested previous question—the instrument of petty tyranny all over the world. And, to use the gentleman's own figure, he is the "pivot" around which that question has so often wheeled in this hall. But I urge the distinguished gentleman to forbear in this discussion, for he has already reaped honors enough in that barren field, for his head now blooms and blossoms with the glories of the previous question.

[Here Mr. CUSHMAN rose, and said that his object was not to consume the time of the House, but he had risen to explain, by the courtesy of the member from Kentucky, [Mr. PORE,] who was entitled to the floor.]

Mr. J. said that he utterly denied the right of the mem-

H. OF R.]

Sub-Treasury Bill.

[Oct. 12, 1837.]

ber from Kentucky, or of any other member, to allow the gentlemen from New Hampshire to consume the time of the House, at this stage of our proceedings, in discussing the merits of the previous question, which the gentleman from New Hampshire called some weeks ago. I have tried (said Mr. J.) several times to gain the floor, in order to speak upon the bill now under debate, and have failed. I wish to give my views upon it; but, knowing the propensity of the honorable member whom I have interrupted to call the previous question, I have no guaranty that I might not be precluded from speaking at all. And if the gentleman, whom I regard as a living personification of the previous question, will not desist from this discussion, I will be constrained to use his own remedy upon himself, and will call his own previous question upon him. I hope, in concluding, that the gentleman from Kentucky will be permitted to resume the floor.

Mr. POPE then resumed the course of his remarks, which he continued till long after lights had been brought into the hall, when, being exhausted, he sank into his seat without having closed his speech.

A motion was now made for the committee to rise; but

Mr. W. COST JOHNSON, having conferred with Mr. POPE, stated that the gentleman had no objection to Mr. J.'s taking the floor at this time, in the confidence that the House, in the morning, would permit him to conclude his remarks. Such seeming to be the general understanding,

Mr. JOHNSON rose and addressed the committee as follows:

Mr. Chairman: I return to the honorable member from Kentucky [Gov. POPE] my thanks for yielding the floor to me before he has completed his remarks. After having spoken for four hours, his physical energies have yielded before the rich abundance of his mind is exhausted on this interesting question. I feel (said Mr. J.) how perilous my situation is in attempting to follow the learned and distinguished member who has just taken his seat. At this late hour, too, when the committee have been so long in session, I am strongly apprehensive that I may not compensate them for any portion of their attention. I must therefore throw myself upon their magnanimity. But before I enter upon the subject under discussion, I feel it a duty which I owe to myself and to others, to give a passing notice to an observation which fell from the honorable member who last addressed the committee.

The honorable member remarked, in the course of his observations, in substance, that the friends of the administration, or some of them, had said that the opposition had a few years ago made charges against the Post Office Department, and, among others, his friend, the late Postmaster General; and that the administration sacrificed some of the members of that Department (at least the chief clerk) to the avenging deity of the relentless opposition. I do not for one moment suppose (said Mr. J.) that the honorable gentleman purposed any personal application of his remarks to any particular member of the opposition, but spoke of the opposition as a party. But having been a member of the twenty-third Congress, when the administration of the Post Office Department was made a subject of special examination, and the report upon that examination was submitted to this House, I felt it my duty to take a humble part in a debate in this hall in relation to the abuses committed in that Department. And my name having been thrown before the public in connexion with that discussion, and with a collision with the late Postmaster General and his son, I feel warranted in now alluding to it, from what has been said, and in giving an explanation which circumstances at the time rendered it impossible for me to do.

When a bill was under discussion in this House giving, as I thought, increased patronage to that Department, I took occasion to oppose its passage, and to animadvert upon

the corruptions which were proved to exist in it. A spirit of intimidation then still lingered in this hall, and clearly manifested itself, I thought, on the night of that discussion; for, during that session, a member had been waylaid on the street and attacked for words spoken in debate; and, but shortly before, other members had been beset and assaulted. I saw, or thought I saw, that there were members willing to place themselves before the officers of Government and the members of this House who wished to scrutinize their official conduct. I was soon left alone on one side in that exciting discussion, and, fancying I saw its result in advance, took the distinct ground, when daggers were spoken but none used, that I was willing and ready to hold myself responsible to any member of this House, or to any officer of Government, who might imagine himself aggrieved by my strictures. That was the position I assumed—perhaps rashly—but still it was the position. The next morning, in this Capitol, and before I entered this hall, I received a laconic note from the Postmaster General, by a gentleman whom I had never seen before, but whose bearing convinced me that he was a gentleman. There was no threat written in it, but, from its peculiar brevity, I regarded it as a threat; so did two honorable gentlemen of this House to whom I submitted it. I felt it to be my duty to give it a very short answer. Soon after, I received a challenge from the son of the Postmaster General—a gentleman whom I have never seen in my life. I accepted it. By the advice, I apprehend, of others, it was withdrawn. Rumor reached my ear that I was to receive some two or three more, and was to be caned by I know not how many. Under such circumstances, I would neither explain nor authorize any friend to explain in my name, as an honorable friend in this hall will well remember. The system of interrogatories I dislike at best; but, according to my sense of propriety, I can never bring myself to answer them when they are blended with even the shadow of a threat.

But now that the late Postmaster General is no more, and the restraining circumstances of the affair have passed away, I embrace the opportunity which the remarks of the honorable member have afforded me, to say, in my place, that I never designed to charge the Postmaster General with peculation, though I was unwilling to except him from the charge (of which I had proof enough to convince my judgment) that it did exist at that time in the Department. I deem it due to myself, due to those whom he has left behind him, his relations and friends—and the honorable member as one of those friends—to say, that I had no proof that he was corrupt, nor do I believe that he was a corrupt man in the moral or legal sense of the term. The most that I meant to say was, that when corruption was proved to exist in a department, the censure should fall with the heaviest force upon the head of that department, if he did not suspend the guilty subordinate.

But I dismiss this subject, now and finally, and will attempt to approach that immediately under debate.

Mr. Chairman, (said Mr. J.) when Sir Walter Scott was asked why it was that he had not written the life of the Emperor Napoleon in one instead of three volumes, he answered, because he had not time! And if I should trespass upon the kind indulgence of the committee a little longer than it may think judicious, I beg the committee to receive in advance, as my apology, that I have not had time to investigate, in all its bearings, the important subject before us, and to arrange my reflections in perspicuous brevity, which is the best proof I know of a familiar knowledge of a subject.

Day and night have we been occupied in this hall, for weeks past, without hardly taking respite for sleep, in investigating the important bills which have been crowded upon our attention; with not even time to eat with comfort, and with scarcely a spare hour to read the budgets

OCT. 12, 1837.]

Sub-Treasury Bill.

[H. OF R.]

daily placed on our desks, or to spend in examining books of knowledge, or be occupied in quiet reflection.

The experienced debaters, and the learned members of this House, may easily surmount such obstacles; but the humble member who claims your indulgence feels them with the strongest and almost overpowering force. Notwithstanding such embarrassing considerations, I am unwilling to give a silent vote on the bill before the committee, but will assign, as briefly as I can, the reasons why I shall give a negative voice.

We have been assembled, Mr. Chairman, in extraordinary session, and have already acted on some most extraordinary bills. But the most extraordinary ever presented to the consideration of this House, with an earnest and specious hope of being received with favor, is the bill now under debate. A bill of no less a nature, in my judgment, than one calculated, if passed, to obliterate some of the brightest features in our constitution; to annul in its operation almost all the statutes which so carefully guard the mode of receiving and disbursing the public revenues; in one word, a bill to take from the representatives of the people all supervision and control of the public moneys, and to place in the Executive hand, which now has control over the army and the navy, the appointment of an almost illimitable number of public officers, and has command of the militia when in the actual service of the United States—to place in the same hand, to receive and to pay out, without scarcely a check or restraint, all the public money of the nation.

The request from the Executive to be possessed of such delicate and enormous power greatly surprised me; to find the representatives of sovereign States tamely acquiescing, completely astonished me; to find it advocated on this floor by some of the representatives of the people, who, under the constitution, are the purse-creating and the purse-holding power, has awakened into alarm every hidden apprehension of my mind.

What proofs of superior knowledge and superior usefulness has the Executive given, to warrant a surrender of power to its discretion? Has it shown, from the prudent exercise of powers delegated to it by the constitution and the laws, that, to promote the interest of the nation, its powers should be amplified and new authorities delegated? That, to promote the interest of the people, you must abandon your trust and your duty, and give almost unlimited discretion to the Executive will? That the Executive will better administer your duties than the conjoint wisdom of the representatives of the people? Or does the President even place his request upon the pretext that, by your surrendering into his hands all control over the money of the people, it will give them relief in their present distress, and equalize the exchanges and currency of the country? Even this plausible argument is not offered, but is distinctly repudiated in the Executive message. No argument of this sort is offered; and yet you are asked to make the surrender simply to gratify the executive pleasure. But, Mr. Chairman, I would not care how strong the reasons might be that could be assigned; if they were ten times as strong as any I could imagine, I never can be guilty of violating, by voting for such a measure, the whole genius and spirit of the constitution—the essence of every republican constitution in every representative Government. So far from the Executive exhibiting superior sagacity and prudence in regulating the financial operations of the Government, it has shown itself most culpably inefficient to discharge the duties required by the existing laws, and those which it has assumed, in violation of both law and usage. I have not even a shadow of doubt in my mind, that all the embarrassments in our country, in the currency, and in business of every kind, are in a chief degree chargeable to the Executive of the last four years.

To justify this allegation, I am constrained to allude

briefly to the past, but shall take only a rapid glance at circumstances that have transpired, as that ground has been most ably occupied by members who have preceded me in this debate. When, Mr. Chairman, did any country present as great a degree of prosperity as this nation did at the time that General Jackson commenced his unrelenting hostility to the late Bank of the United States? What country on earth possessed a better currency than this did at that time? What country afforded such a reduced rate of exchanges? Where was labor better rewarded? Where was industry better recompensed? Search the inhabitable globe for a parallel, and you will search in vain. Where was an institution better organized and conducted, and its paper more readily received in every part of the United States, if not in every part of the world, by people of every pursuit, from the centre to the remotest borders of the Union, than the paper of the Bank of the United States? It had realized more than had been predicted by its most ardent advocates in 1816. It had been chiefly instrumental in effecting and maintaining, for nearly twenty years, what I regard to be the great desideratum in a country where agriculture, planting, manufactures, and commerce lean upon and support each other—a convertible paper currency—bank paper converted at the will of the holder into gold and silver. Such was the state of the currency four years ago. Bank paper was not only convertible into silver at the counter of the bank that issued it, but was convertible everywhere in the interior at the counters of retail merchants, who were always glad to exchange their silver for bank notes, which better suited their purposes for transmission. Peace and plenty gladdened the whole land; content and cheerfulness were found in the most humble cottage as well as in the more costly edifice; a prospect of universal prosperity was then presented, on which the mind loved to dwell. I will not expatiate upon it, but content myself with a simple narration.

General Jackson, in the plenitude of his power and unparalleled popularity, had forced, by his system of proscription, most of the officers of the Government to become political partisans. To be an active partisan, to gain preferment, was a *sine qua non* with him. The political armor was put on, and each saw written on it, “this is the road to Byzantium.” The president of a northern branch of the United States Bank had displeased some active partisan, and the mother bank refused to dismiss the honest and independent head of the branch; that partisan infused the venom of his feelings into the bosom of General Jackson. Threat after threat was made, in the President’s messages, against the United States Bank. A better currency was promised the people, if they would unite with the Executive in destroying that institution. That promise had a charm in it, as all persons are anxious to better their condition; and all believe, however prosperous, that their condition can be improved. But still an honest and upright Congress refused to lend itself to the malignant purposes of the Executive, or to gratify his sullen will. Congress was in favor of renewing the charter of the bank. The Executive veto nullified the will of the representatives of the States and the people. Congress refused to gratify the will of the Executive in ordering the Government deposits to be removed from the Bank of the United States, where the law had placed them; but he, with ruthless hand, seized upon the public treasure, as Cæsar had done before him, and parcelled out the money of the people among a host of State institutions, which he now testifies are the most unprincipled and profligate in the annals of history.

Those institutions were urged by the Secretary of the Treasury to discount most liberally upon the deposits of the Government; and as slaves always most readily obey the first orders of a new master, they not only discounted

[Oct. 12, 1837.]

paper offered to them, but in many cases invited customers. Congress altered the standard of gold, and reduced its value. (I rejoice that I had the honor to vote against that bill.) Europeans sent their gold here to be coined, and then ordered it home again. The Neapolitan and French indemnities were adjusted, and imported in gold. This was hailed as the millennium of the golden age, and General Jackson was told by his flatterers, and believed it, that he had at last discovered the Philosopher's stone. Jaundiced-eyed and near-sighted politicians, whose minds cannot realize causes and effects, or discriminate fictitious from true and abiding causes, thought that they had really worked a specie miracle; and the General himself read his valedictory, "still harping" on the monster bank, and congratulating himself and the country on the experiment which he had tried in his humble efforts to improve, as he said he had, the currency of our country. But I am fast in my chronology; there is one other remarkable event which I wish to allude to. Before General Jackson retired from office, a distinguished Senator, who had aided much in building up the golden image which he wished all to fall down and worship, made a political prediction, that, if the people of the West would co-operate with him in destroying the Bank of the United States, they would see, in violation of all the laws which govern fluids or solids, gold flow up the Mississippi. They believed, and looked with anxious hope, but looked in vain. He conceived the expedient whilst Congress was in session, but revealed it perhaps to few—lingered until Congress had adjourned, and then, "solitary and alone," he thought he would set the golden stream in motion. Congress ordered the Secretary of the Treasury to receive the notes of specie-paying banks and gold or silver in payment of public dues. The alchymical operation was to be effected by a disregard of the law, and the Secretary of the Treasury was ordered to issue his famous proclamation, demanding nothing but gold or silver for public lands. The prediction was realized: gold and silver flowed up the valley and over the mountains, but flowed in steamboats and in stages—flowed to the land offices and to the banks of deposit, but never into the pockets of the working people of the West.

This last act broke the glittering dream, and the veil of Mokanna fell to the ground. Convertible paper and gold were no longer synonymous; Government, which should have been the last, was the first to make the distinction. Gold and silver were at once more valuable—for the article most in demand in this country is land; and the Government is the largest (because it is the greatest proprietor) and cheapest seller, and can control the market value. Thousands daily purchased public land, and of course thousands were forced to procure specie. It soon became an article of merchandise, to be bought in the market, rather than a medium of exchange. The banks found their paper returned upon them, and their specie almost exhausted, and wisely suspended specie payments; and the deposit banks were the very first to set the example. Confidence became impaired; the banks had been pressed by those who held their notes, and they, in turn, called on their debtors, and the debtors of the banks called on all who owed them; thus the pressure passed the whole round of the circle of trade and business. Panic, dismay, confusion, and bankruptcy, followed in quick and fatal succession. The Government could not escape the consequences of its measures, and suspended specie payments.

The last Congress, foreseeing the evil consequences of the specie circular of the Treasury Department, passed a bill rescinding that order. General Jackson treated it with contempt, placed it in his pocket, and retired to the Hermitage, denouncing the insolence of Congress in sending a bill to him which questioned the wisdom of any measure which he had ordered. Mr. Van Buren, who succeeded to the Presidency, was urged most earnestly to rescind that

circular, but he refused. When he saw, as he ought to have seen, its evil tendency, he should have yielded to the counsel of honest and practical men. I will here say that, whilst I believe that the evils of that measure might have been in some degree softened if Mr. Van Buren had rescinded the order after the fourth of March, I do not think that it would have prevented a suspension of specie payments: it would have changed the direction of that suspension; much of the silver would have been drawn from the West to the Atlantic and to the Southern cities, and would have, in some degree, relieved them; but that would have forced a suspension of specie payments by the Western and Southwestern banks, which would have been quickly followed by the banks of the commercial and large cities. When silver is at a premium, it is impossible, in the nature of things, for the paper of any bank to remain long in circulation, or for any bank to throw out its paper to any useful extent to the people, and redeem it with the precious metals.

From this train of measures and circumstances I trace the causes of the suspension of specie payments by all the banks, the great confusion and embarrassment in business of every kind, the distresses and bankruptcies which occurred, and the confusion which has overwhelmed both the people and the Government. From such measures you can trace consequences, with the same unerring accuracy as the human eye can mark the path of the desolating whirlwind.

Amid this disastrous crisis, the President issued his proclamation convening Congress, which he had positively refused to do a few weeks before. We assembled, some of us with hope, some with apprehension, though all equally anxious to know what measures would be recommended, and what position the Executive would assume. Some thought that the President would recommend the sub-Treasury system; others, a retiral of the State banks; whilst others hoped, at least I did, that he would throw himself upon the advice of Congress. This was really my belief, as well as my hope. His appointment of Mr. Poinsett at the head of the War Department had inspired me with some hope of better things. No man, save one, who had been born either south or west of Pennsylvania held a place in the cabinet. And the appointment of a second, and one so highly worthy and eminently qualified, was, I thought, the harbinger of some salutary changes. So first-rate men are in office, I care not from what quarter they are taken, or where may be their birth-place. But I do maintain that every prominent place should be filled by high-minded and efficient gentlemen, who understand their duties, and are prompt to discharge them. I came here with no pledged hostility to his administration, and, personally, I had a very high regard for the President. My situation here is peculiar. I have been elected by the aid of both parties. If I were to consult the feelings of a majority of the persons who voted for me, rather than the opinions of a majority of the voters of the district, I would pause in my course. But, when entrusted with a public duty, I do not feel at liberty to be governed by feelings of personal predilection or antipathy. I feel bound to take a more expansive view of the whole district and the nation.

When we assembled here, speculation was at once hushed by the receipt of the President's message; and I must confess I was greatly disappointed. I had read his famous letter to Mr. Sherrod Williams, in which he considered the State banks as Government depositories, and said how admirably the system worked—where he denounced the United States Bank, and promised to tread in the footsteps of his illustrious predecessor. I thought all this was the mere electioneering language of the day, and that, when once in office, he would make himself the President of the people, and not of a party. All my expectations were disappointed; for almost the first thing he informed the representa-

Oct. 12, 1837.]

Sub-Treasury Bill.

[H. OF R.]

tives of the people whom he had called together—who assembled here fresh and warm from the midst of the people—was, that if they should dare to pass a bill to establish a bank of the United States, he would be a lion in their path; that he was armed with a veto power, and would assuredly use it. Such language is unprecedented in the history of this or any other country. The President, in his inaugural address, informed the people that if a particular measure should be passed by Congress, he would use the veto. I thought that unnecessary and uncalled for, but supposed it was designed for Southern effect. A veto in that case would be unnecessary; nor did Mr. Van Buren, or any one else, suppose that he would ever be called on to redeem his pledge; for, Mr. Chairman, whenever the Congress of the United States shall so far forget their compact with Maryland as to violate private property in the District of Columbia, your jurisdiction will end, and that of Maryland will begin, over all that part of the ten miles square north of the southern bank of the Potomac river. I may go farther: that moment this House shall contain a majority of members who will be so reckless as to vote for the abolition of slavery in the District of Columbia, the annunciation of that majority by the Chair will be the sounding of the death-knell of the Union.

Before Mr. Van Buren is six months in office, before a single bill or resolution has been sent to him for his signature, he has voluntarily, gratuitously, stepped out of the line of his duty, to inform Congress that upon at least two measures he will use his veto. I have an hostility to the veto power, and can never be reconciled to its use. The framers of our constitution placed it in the hands of the Executive, under the fallacious belief that it is the weakest of the co-ordinate branches of Government. Sir, the framers of the constitution and the authors of the Federalist were mistaken. The Executive is more powerful than all the other branches put together. All power is fast consolidating in the Executive hands; and the Executive history of the last four years is sufficient to justify the remark without any proof. They thought it harmless, because they found it obsolete in England, though existing in the English constitution.

The Government of the United States is the last in the world which should tolerate the veto power. There may be some plausibility for it in the State constitutions, which secure to the people the right to elect both branches of the Legislature; for there both branches may be moved, in a greater or less degree, by the same commotion or popular impulse. But even in the constitution of my own State, where the Senate is not elected by the people, the Executive is denied the veto power; the constitution says the Governor *shall* sign the laws. And it has been judicially decided by our highest courts, that laws which have passed the General Assembly, or both Houses of the Legislature, are valid without the signature of the Governor. And that is almost the only feature in the Maryland constitution which, I think, could not be changed for the better. And in the Federal Government, also, every useful caution exists in framing laws, without the existence of the oppressive veto power in the Executive. In our Government, part representative, part confederative, no law can be enacted without its first receiving the sanction of the representatives of the people; or, in other words, a majority of the people in their aggregate capacity, without distinction of States, control in this House. In the confederate branch, where the sovereign States are equal, a majority of those States must give sanction to every bill. What greater safeguard can there be to liberty than to require first the concurrence of a majority of the people, and then a majority of the States, to every measure of public utility? Every restraint beyond this is actual, real oppression. I regard the abuse of delegated power to be as obnoxious to censure as the usurpation of power. And an Executive

places itself within the range of that censure, when it arrogantly uses, or presumptuously threatens, the veto. It is to awe free and fearless deliberation, by suspending the sword of Damocles over the heads of nervous politicians, in this hall or the other.

Historians inform us that, with all his vices, "Nero never attempted any thing against the jurisdiction of the Senate."

Marcus Aurelius, though armed with the imperial tribunitian (or veto) prerogative, said, in alluding to the Senate, "It is more proper that I should submit to the opinion of so many and such friends, than that so many and such friends should follow my will."

An able writer says, "It was by adding the tribunitian power (*intercedere vetare*) to the military, in their own persons, that the Roman Emperors consummated the ruin of the republic." "It was by this mode," says Tacitus, "that Augustus found means, without the name of King or Dictator, to make himself superior to the legislative and executive powers of the commonwealth."

If the Romans lost their liberty by the union of the military and the veto power in the same hands, how can it be preserved in this nation, when you unite in the same hands, which have now the military and veto, the power of the purse, which you propose to do by the bill now on your table?—a power which Augustus never possessed.

But in these modern days, a President is called a Roman patriot, who freely uses this detested instrument of tyranny; though Pliny boasts, in panegyrizing Trajan, "that the Emperor never allowed himself to annul or prevent the execution of the Senate's decrees."

I will not longer dwell on this subject than to say that, as it was by the use of the veto that Louis XVI lost his head—so may the next American who shall use it lose his personal popularity.

But the President has thought fit to read to Congress a lecture upon constitutional law, and gravely tells us that a Bank of the United States would be unconstitutional. Yes, sir, he would fain convince us that the constitution was in his keeping, and that he will not let the rude hands of the representatives of the people profane it. Mr. Chairman, how much crime has been committed, how much blood has been shed, by fanaticism, under the pretext of serving the cause of religion? How much usurpation and tyranny have been practised, upon the pretence of saving the constitution and serving the people? Let history answer—for every volume can answer, from the creation of the world to the present moment. Who is this mighty expounder of the constitution? Is he the venerable and glorious man who presided over the deliberations of the convention that formed that sacred instrument? Or is he the wise and distinguished individual whose pen gave it form and proportion, and who has been emphatically called the Father of the constitution? No, sir, he is not. But he is Martin Van Buren, of Kinderhook. The same individual who informed the nation in his inaugural address, on the east front of the Capitol, that he was the first President elected who had not participated in the patriotic struggles of the Revolution; who thought it proper to say, for the information, perhaps, of the ladies present, that he was born since those ancient days. He is the first and chief of the modern expounders of the constitution. Yes, sir, even Amos Kendall, an officer, not of the constitution, but of the law, says that he is a limb—yes, sir! the right arm, I suppose—of the Executive body, and has dared to read a homily to the courts upon their duties and the constitution. It is time, for the dignity of this House and the nation, that such insolence and effrontery should be frowned down, if not punished. But I will leave these distinguished personages for a moment, and allude to others. There is another class of politicians in this House, who have been thrown into ecstasies because Mr. Van Buren says that, as

H. OF R.]

Sub-Treasury Bill.

[Oct. 12, 1837.]

he construes the constitution, Congress cannot create a United States bank. They call themselves the true State rights Old Dominion republican democrats of the Jeffersonian school, and quote the name of that patriot, for every purpose, numberless times, in every speech with which they favor this House. My mind is in doubt whether such displays should be treated gravely or lightly. Gentlemen seem to speak as if no one had read and understood Mr. Jefferson's writings but themselves, and quote slips from, and fragments of, his letters written some fifty years ago, before the existence of a United States bank. I have been amused to see the dreadful warfare of words carried on among those Southern State rights politicians, who dispute upon subtleties too refined to be perceived by my mental vision. One descants upon constitutional law, and all eagerly listen, in hope to hear some idea which may impinge against something which Mr. Jefferson may have loosely written or said, believing it will be his political destruction at home. Quick as thought, a messenger is sent to the library to produce a letter or conversation of Mr. Jefferson. The orator ends, and another begins with anticipated victory joyously illumining his features, and his Southern friend is handled without gloves or mercy. But with that propensity for long speaking which is so remarkable in the South, where all are imaginative children of the Sun, and where all possess the *copia verborum* in an eminent degree, he soon runs foul of some other opinion of Mr. Jefferson, on some other and foreign subject. Yes, and another more Mercury-footed page is posted, to tell the first to be swift. Then another State rights Jeffersonian Old Dominion true republican democrat rises, and, with the merciless vengeance of a Samson, he routs and vanquishes the political Philistines before him, behind him, and around him, horse, foot, and dragoons. These gentlemen regard it high treason, verily, to differ in the minutest particular from Mr. Jefferson. What a bombastic Englishman once said of Homer, they think true of Jefferson:

"Read Homer once, and you can read no more,
For all books else appear so mean, so poor,
Verse will seem prose; but still persist and read,
And Homer will be all the books you need."

They regard it heresy, beyond the benefit of clergy, if any man dare speak, think, or breathe, without producing the authority of Mr. Jefferson; and he is read out of the State rights party. They call to my mind an anecdote which occurred in my own State on the death of Alexander Hamilton, in the best days of Maryland hospitality, before she was governed, as she now is, by uncles and aunts, who are all united by either affinity or propinquity, who fill all places, and hold the reins of government in their feeble and effeminate grasp—for Maryland is pretty much like the rest of the Southern States. They have all been, for the last ten years, like so many barrels of frozen cider—the spirit has not escaped, but it has become concentrated; some of them now show signs of reanimation, and enlivening feelings are beginning to pervade them; and we may hope that even "Rip Van Winkle" (North Carolina) will in time open his wondering eyes. But to my anecdote. The news reached a coterie of thorough-going federalists, who were dining on the Eastern shore of Maryland, where wine and wit were flowing in equal streams; all expressed in general exclamation their bitter sorrow; all, save one, became earnest and eloquent in speaking of the powers of that great man's mind—of the great services he had rendered to the country, and the heavy loss which the nation had sustained, and how much they lamented it. At length, Thomas Bailey, the brother of the Attorney General of Maryland, who was remarkable for a high order of intellect, when he would venture to exercise it, setting down his empty wine-glass, said to his bevy of friends, that he had listened to the expressions of grief which the sad news had called from them, but he felt that his grief was greater than theirs, because his loss was greater in the death of Hamil-

ton; for as long as Hamilton lived (said he) he had never been put to the labor and trouble of investigating questions for himself, and that, as Hamilton was dead, he now, alas, would be forced to the dire necessity of thinking for himself.

I could but think, since this discussion has commenced, if Mr. Jefferson had not left behind him some two volumes of State Papers, one volume of Correspondence, and his Notes on Virginia, how awfully annoyed some of the Virginia politicians would be, if driven, like Tom Bailey, to think for themselves. What would these gentlemen do if the *point d'appui* of their political lever were destroyed?

An able member from Virginia informed us, last night, that he considered Mr. Jefferson the polar star that directed his course. Suppose we draw imagination from around the figure, and examine it by the test of real life. Will a traveller always keep his eye on the polar star? If he should direct his gaze continually that way in his journey, he will soon find that furs would add to his comfort; he would next find that the white bear and the wandering Indian would be the only living things about him; and the next step he would find himself plunging into Symmes's arctic hole. Will the prudent and skilful mariner look alone at the north star, in directing his vessel's way over the trackless ocean? At times he is forced to look at other fixed or less beautiful luminaries, and finds them equally true and useful. Yes, sir, astronomy and navigation teach him to point his glass, at times, to all the bright stars in the zodiac, and the power of human reason makes them subservient to its control.

So I should fain think the practical American statesman should view every star in the firmament, or, to quit the figure, should read all that has been written by the wise and the good, and then dare to think for himself.

When Jefferson embarked in the glorious cause of the Revolution, did he take Solon or Lycurgus, Sidney or Hampden, for his model of greatness? Did he take Locke or Milton as the text-books of his creed? No, sir, he did not. He read all that patriots had written; he read deeply the volumes of human nature: and then, sir, he dipped his pen into his own mind, and wrote the immortal Declaration of Independence. He had no model; daring to think and to act for himself, he made himself great as he was.

We are in Committee of the Whole on the state of the Union; and I am unwilling, as an American citizen, to sit silently and hear Mr. Jefferson's name quoted, to effect every narrow and selfish purpose. His fame is the property of the whole nation, and is not placed in the hands of a few Southern politicians. Mr. Jefferson had faults, as all men have; but Mr. Jefferson was a man of enlarged and expansive mind. And if any supernatural power could resuscitate his body with the magic wand of one of old, as we read in solemn history, and present him living before us, he would rebuke his friends for using his name, as it has been, on many occasions.

Mr. Jefferson doubted, before the first United States Bank was established, whether it was constitutional to establish such an institution. But did he advise General Washington to put his veto upon it? No, sir. He cautions him against using the veto—he urges him to respect the representatives of the people. This he did in the last sentence of his letter to General Washington, in 1791. He says, "it must be added, however, that, unless the President's mind, on a view of every thing which is urged for and against this bill, is tolerably clear that it is unauthorized by the constitution; if the *pro* and *con* hang so even as to balance his judgment, a just respect for the wisdom of the Legislature would naturally decide the balance in favor of their opinion."

Such is the manly language of a great mind; and I wish, for the interest of the country, that his modern friends

Oct. 12, 1837.]

Sub-Treasury Bill.

[H. or R.]

knew how to appreciate it. He recommends no veto, but cautions the President against it. He advises the President to respect the Legislature. This is the language of a true democrat. A democrat is he who will think for himself, vote for himself, speak for himself, and obey the laws and decisions of the tribunals of the country. A man who puts on the blind-bridle of party, and allows himself to be caparisoned with party trammels, is not a democrat—he is half a vassal. A democrat must be a free thinker and a free talker—a free and fearless political actor.

Whilst Mr. Jefferson spoke and wrote freely his sentiments, he knew how to respect the opinions of others. He respected the constitution and obeyed the laws. When the Bank of the United States was established, he acquiesced in deference and with cheerfulness. And in 1804, after he was exalted to the Presidency, he signed a bill authorizing the bank to establish branches in the Territories. If he had not surrendered his first opinion, he placed himself in the attitude of being guilty of base perjury in sanctioning the measure; and I would not venture to give utterance to the opinion I would entertain of the man who would bring such a charge against him.

It was but last night, while listening to an able member from the Old Dominion, who was quoting Jefferson against the Bank of the United States, that I turned to a learned friend from Virginia, by whom I was sitting, and said that I really believed that, if Mr. Jefferson were on this floor, and saw the distresses of the country, he would be the first and warmest to advocate a United States bank. My friend remarked that I appreciated justly Mr. Jefferson's character; for he had heard a few days ago a distinguished gentleman, who was a neighbor of Mr. Jefferson, assert that Mr. Jefferson had said that, if the State bank system was to be tolerated, the only way to control it, and to give a good currency, was to have a bank of the United States. But this fact has been alluded to by the able gentleman who preceded me, [Mr. POPE.] That he said so, I have not the smallest doubt. Your Supreme Court, last winter, decided that the State banks were constitutional. Then, if Mr. Jefferson's opinions are to be quoted, they would be in favor of a United States bank.

But those very gentlemen, who wish to chain down Mr. Jefferson's opinions to the narrowest views upon all subjects, will find themselves in an awkward predicament at the next session. I predict, Mr. Chairman, that they will then quote Mr. Jefferson as the greatest latitudinarian who ever filled the Presidential chair.

When the question of the annexation of Texas to the Union shall come up, as I expect it will next winter, these gentlemen will quote Mr. Jefferson as a precedent, because he recommended the purchase of Louisiana.

Mr. Jefferson has admitted that that purchase was made without any authority being given in the constitution. But still he recommended it, and signed the bill. Sir, he acted wisely; he acted as a philosophic statesman should have acted. There are occasionally and rarely great national emergencies which no framers of a constitution can foresee. Those emergencies must be met, and acted upon promptly. This was one of them. In such a case, all public functionaries are justified in adapting their course to the circumstances. Whilst they venerate the constitution, they are required by duty to obey what must be the sense, not of a party, but of the whole nation, in the emergency, and adopt such measures as will meet the wishes of the present generation, and which they are convinced will meet with the approbation of all posterity. Such occurrences are but seldom presented, but still they do sometimes occur. And Mr. Madison said truly, in his able report upon the Virginia resolutions of 1798, that, "as the constitution is above the law, so are the people above the constitution." That maxim should be received with caution, to be sanctioned only when the people desire a change in their or-

ganic law, or when great national exigencies arise, such as I have alluded to.

Some of these Southern constitutional lawyers seem to revel in denunciations against the Bank of the United States—not only some of the Virginia politicians, but the able member from South Carolina, [Mr. PICKENS,] who sprung into the front rank in this debate. Some new light has illumined his path. I thought, if any State in the Union had acquiesced in the constitutionality of the Bank of the United States, it was South Carolina. If the people have erred in sustaining the bank, South Carolina has inculcated that error; for all of her great men have advocated it. In 1816, seven out of eight of her representatives voted for the charter of the United States Bank. Yes, sir, Messrs. Calhoun, Chappell, Edwards, Huger, King, Lowndes, Middleton, Pickens, Taylor, and Woodward; and Mr. Mayrant stood "solitary and alone" against it. But the onward path of modern genius can demonstrate that all these men were ignorant of the constitution and their duties.

"We think our fathers fools, so wise we grow;
Our wiser sons, no doubt, will think us so."

Yes, sir, Mr. Calhoun, who was a Southern fixed star, has, by some inscrutable phenomena of nature, by some undiscoverable law of attraction, wandered from his station, and is now in the northern polar hemisphere; or, rather, is now a planet revolving around, by attraction and repulsion, the executive centre. Sir, I grieve at the sudden transition, because I like Mr. Calhoun personally. But he has made himself a living warning, to the opinions I have expressed, how dangerous it is for any free-thinking and generous man, whether in public or in private life, to pin his faith to the skirts of any man. Mr. Calhoun's political life has been most strangely erratic. If I should wish to find an argument in favor of the Bank of the United States, I would read his speech made in 1816; if I wished to find a confirmation of those opinions, I would read his speech made in the twenty-third Congress; if I wished to find an argument against the bank, I would read his recent speech made in the twenty-fifth Congress; if I wished to find an argument in favor of the tariff, I would read his speech made in 1816; if I would wish to find an argument against the tariff, I would read at least a dozen speeches which he has made within the last four years; if I wished to find an argument in favor of forts and fortifications, I would read his report made when he was Secretary of War; if I wished to find an argument against forts and fortifications, I would read his speech delivered in the twenty-third Congress; if I wished to gain proof that he was friendly to the tariff and internal improvements, I would ask for it from the gentleman of Pennsylvania, who, some ten or twelve years ago, urged his name for the Presidency, and I would be answered that they urged his claims because they thought him ultra on those subjects; if I wished to find arguments against that system, they would be found in every speech which he has delivered, on any subject whatever, for the last six years. Let the generous and chivalric young men of the South follow such a polar fixed star, and they will find, when too late to retrieve their standing and usefulness, that they had been following an *ignis fatuus*, which had been leading them from swamp to bog, from bog to glen, from glen to morass, and finally left them in a cypress swamp of the most impenetrable darkness. He may be quoted for any political opinion, as a distinguished judge once said Croke's reports could be quoted for any legal opinion. I had rather at once cut my political jugular than follow such a star; for, if I did not, the people would soon do it for me; and I regard suicide preferable to public execution. I was amused at the gallant bearing of my chivalrous friend from South Carolina, [Mr. PICKENS,] when he took the lead, conscious of his right and ability to lead, in this debate; it proved to my mind that his Southern feeling

H. of R.]

Sub-Treasury Bill.

[Oct. 12, 1837.]

still animated his bosom. I thought it seemed cruel, though it was just, when he required the Clerk, with his strong voice, to read out the names of those who had voted for and against General Gordon's proposition a few years ago. I thought that that was, to his new allies, "the most unkindest cut of all." I was then seated in the chair on the Clerk's platform, which is now occupied by the honorable Senator from Massachusetts, Mr. WEBSTER, [Mr. J. pointed in the direction of the Clerk's seat,] philosophizing and surveying the effect it would produce on many countenances, and perceived, as some names were pronounced, their faces would crimson; others would blanch; some twisted in their chairs, whilst others left the hall, as old Proteus once quitted an unpleasant theatrical hall; whilst in some old and hardened sinners, who had long and often offended, not an eye would wink, or a muscle move, or a single feature change. They seemed to look as if they were conscious that they were past all forgiveness, and had made up their minds to look with more composure upon their past acts, than upon the enormity of those which they fully expected to perpetrate; whilst I heard, or thought I heard, several voices involuntarily exclaim, "expunge the journal." That gentleman, [Mr. PICKENS,] whilst he is advocating, in his able speeches, State rights, is at the same time, supporting a measure which is the very definition of consolidation. The whole reasoning amounts to this: because Congress has not the power to establish a bank, therefore Congress must surrender into the hands of the Executive all power over the public money.

Whilst I regard a Virginian or South Carolinian, who will act upon the principles of his ancestors, and dare think for himself, as one of the noblest beings in creation, I regard that different Lilliputian race, who are seven-month's children, always talking about the constitution, and never reading it, who ride about with saddlebags and the Revised Code, and spout "Constitution and Jefferson" at every court-house and cross-road, as the unsafest guides in the world; and if they should happen to be such lawyers as "rare Ben Jonson" describes, I would warn the people to beware of them who

"Give forked counsel: take provoking gold
On either hand, and put it up,
So wise, so grave, of so perplexed a tongue,
And loud withal, that would not wag, nor scarce
Lie still without a fee."

There may be one other class of Southern politicians who are worse constitutional advisers. They are those of more standing at the bar, and who are called great special pleaders—the true green-bag gentry—who know all the arts of filing a declaration, or framing a demurrer—who can at once analyze in their minds all the dry maxims of the black letter and the lighum-vitæ terms of the law—who know how to make thin distinctions, and can quibble on the point of a cambric needle. Such men I would counsel with upon a contingent remainder or executory devise; but they are not such men as I would select as my guides to expound the constitution on this floor, or to make them my archetypes as philosophical statesmen. Hair-split distinctions prove, they think, superior wisdom; and they will beautify them with rich diction and elegant manner, and leave you in a perfect paradise of ecstasy, figures, and flowers. Mr. Chairman, there are safer and better guides. Let those who wish to understand the constitution read the debates of the convention which framed that instrument—read the debates in the State conventions which adopted it—read the Federalist and Chief Justice Marshall's decisions upon it: let him do this, and then he will dare to think for himself, and will know something about it. And in this reading he may learn that Mr. Jefferson was not in this country at the time of the formation of the constitution, but was minister in France. As a politician, Mr. Jefferson was superior to Mr. Madison; as an expounder of the constitution, I regard him as inferior.

Can any one doubt that, had Mr. Van Buren recommended the establishment of a United States Bank, chartered with cautious and well guarded restraints, it would have been passed by this Congress, and that in less than six months every solvent bank would resume specie payments, and the overwhelming misery and distresses of the people would have changed into a brighter and more prosperous aspect? I do not doubt it. Had Mr. Van Buren said that he had been disappointed in the new experiment, as all of his friends had been; that it was the part of wisdom now to adopt the old and well-tried policy of his predecessors, a policy which had acted well: if then some of his friends here had opposed it, he could have held up the example of Madison, and been sustained by the nation. Madison's name would have outweighed a host of modern politicians. When Mr. Madison stood alone in his vote in the last Virginia convention, against all the rest, an able American writer said that he would sooner have taken Mr. Madison to be right than all the rest put together. As much as I admired his wisdom, I could not say that much. But Mr. Van Buren's course has been called a firm one; and a distinguished Senator now in my eye, [Mr. WEBSTER,] said, in a speech which I heard with great pleasure, in another quarter of this Capitol, that after reading Mr. Van Buren's message, and finding that he was really tracking the footsteps of the late President, he would not charge him with a want of firmness. I differ with that distinguished gentleman, and many others who have used the same language in this and the other end of the Capitol. I will not call it, at the same time, timidity, but I will call it rashness. The brave Roman who sent his gallant son at the head of an army, cautioned him as much against rashness as he did against cowardice. "The mean of true courage," said he, "lies between the extremes of cowardice and rashness." It is a proof of an absence of moral courage for any man to persist in wrong because his friends urge him to do so. Mr. Van Buren had an opportunity of showing moral fortitude in an eminent degree; for it does require no small degree of moral courage for a man to gently chide, softly to rebuke, a ruinous career of his friend. Had Mr. Van Buren said to his friends that he had believed in the experiment as they had done, but he and they had been disappointed; it had overwhelmed the whole land in misery and distress; his supporters as well as his opponents were beggared by it; that he felt it his duty to abandon the scheme which had so signally failed, and he had determined, for the good of the nation, to go back to the well-beaten path in which Washington and Madison, and all the other Presidents, trod—he might have lost here and there a friend, but he would have gained a hundred for one; he would have proved himself worthy of the office which he holds, proved himself of true and generous courage, and would have then been placed by the side of the amiable and patriotic Madison. But what does he do? When the popular phrensy was highest against a bank, Mr. Van Buren, in an evil hour, committed himself against the bank, supposing the pet bank system would succeed; because General Jackson had sworn, in his wrath, that it should succeed. But failed—exploded—blowing up the Treasury as well as the banks; and the people were ruined. Mr. Van Buren was in a dilemma, and could not go for a United States bank, and preserve his consistency; and had magnanimity of feeling to confess error, repent, and ask forgiveness of the thousands and tens of thousands whom he had helped to ruin. What was he to do in this emergency, as Congress had been called in the panic of the moment? He was pledged to go in the footsteps of the late President, and there were no footsteps. Mr. Van Buren was at fault, sadly at fault. A fast runner was posted to the Hermitage, two letters are quickly written by General Jackson, published in the Globe, and thus footsteps are made where none were before. Never did Ti-

Oct. 12, 1837.]

Sub-Treasury Bill.

[H. of R.]

berius reign with as much awful terror as when he retired from Rome and went to his gloomy and secluded hermitage, and sent his authoritative and bloody edicts to a slavish and affrighted Senate.

One or two gentlemen have thrown out, during the discussion on this bill, or the one which was acted on a few days ago, a delicate intimation that the expediency of the bank might be more clear to their minds if the constitution were altered so as to express distinctly that Congress should have power to establish a bank. Of such allusions I think as Lowndes did, in 1816, when he was requested by a member to move an amendment to the constitution to authorize Congress to establish a bank. Lowndes said that he had two objections to doing so: one was, that he thought such an amendment would not be adopted; and the second was, that he thought the power already existed in the constitution.

Mr. Chairman, I do not profess to be a constitutional lawyer. I have read some law, it is true, but have never practised in the courts. I have been admitted to practise in the court at the base of this Capitol, as a great many other unworthy lawyers have been admitted. I studied law in Virginia, under the most distinguished jurist of that State—a personal and political friend of Mr. Jefferson. I was taught to believe that it was the duty of a lawyer to respect the constitution and the laws; that the constitution had authorized courts armed with power to decide litigated questions; that from the inferior courts there was a right to appeal to the higher, and that the decision of the Supreme Court of the United States was final; and its powers were broadly and clearly written in the constitution: that if the Supreme Court were to decide a question or principle, which did not suit the popular taste, the decision still was final; but the people had a remedy in two ways, pointed out by the constitution, by which Congress and the States should not alter the decision, but could alter the constitution, as they have on some occasions altered that instrument. This was the doctrine which I was taught; this is the doctrine which all my reading and reflection have since confirmed.

The Supreme Court has said that it will not decide political questions; but that same court has twice said that the constitutionality of the bank was a legal question, and has twice decided it to be constitutional. The decisions of that court have, in every case, been acquiesced in by the people of the whole nation. General Washington, who presided over the convention which framed the constitution; Mr. Madison, who was most prominent in framing it; Alexander Hamilton, who, in intellect was second to no man in the nation; have given their sanction to a bank. The Congress of 1791, which chartered the first United States Bank, voted two to one in favor of it—ayes 39, noes 20. The greater portion of the members of that Congress, who were in the convention which framed the constitution, voted for it. Every President has given it his sanction: Washington, J. Adams, Jefferson, Madison, Monroe, J. Q. Adams, Jackson—for the latter, in one of his messages said he would condescend to write a charter, if Congress would meanly ask him to do so: every President, save Martin Van Buren; and even he signed a memorial to have a branch established at Albany. The man who would raise his voice against this overwhelming authority, I would respect more for his pertinacity and obduracy of opinion than for his dispassionate judgment.

We are told by metaphysicians that nothing is so difficult to prove as self-evident propositions. And I regard the right of Congress to establish a bank as being so decidedly clear as to remove all necessity for other argument on that subject.

The President says that against a United States bank the sentiments of the people are "deliberately fixed." How does he know that? What spirit of divination does he possess, to know whether the people always think with him?

He has changed against the pet bank system; he was for it three months ago; his message contains his palinodia. May not the people, who changed against the bank in hopes of bettering their condition, change for it now, to bring themselves where they were, rather than be beggared and miserable? If they should be convinced that it will improve their present distressed situation, they will very quickly change. Self-interest is a powerful lever; and the President and his friends, by their acts, have induced the people to look to it. The people will not ruin themselves because Mr. Van Buren has held out false hopes, false lights, by which they have been wrecked; they will come back, and denounce and quit all crude experiments.

But when the committee of New York merchants told Mr. Van Buren of the dreadful distress in that city, he did not believe it; he thought it all panic. The recent elections ought to be a gentle warning. But no man is so blind as he who will not see; and I am half disposed to believe that some politicians do not yet know that the gold experiment has failed.

The expediency of a bank presents a very different proposition.

We can often, Mr. Chairman, look into the future by the lights of the past. And the past furnishes to my mind the most conclusive evidence that a United States bank is highly, almost indispensably, necessary to promote the rapid and uniform prosperity of the nation. Without money, no business can prosper; and without a convertible currency, and a near uniformity of exchanges, the prosperity of all business is in a great degree paralyzed. Whilst the inequality of exchanges in a depreciated currency will secure wealth to the brokers and money exchangers, in the same degree will it diminish the profits of the farmer and the mechanic, of the merchant and the man of useful enterprise.

Whenever we have had a United States bank, we have had everywhere a convertible, redeemable currency, by which the value of property could be clearly estimated; whenever we have not had a bank of the United States, we have had a stoppage of specie payments, distress, and individual ruin. If we are to judge of effects by causes, what can be more convincing and conclusive? When the Bank of the United States was in existence, exchanges from New Orleans to New York were never more than one per cent.; often at par; and sometimes, from one city to the other, above par. There was then but a reasonable and useful number of State banks.

How are the exchanges now? We can sometimes judge of great things by small. A friend sent me a hundred dollar note, a few days ago, on a bank in Florida, which he had been trying to pass off, but could not. I went to a broker, and he offered me seventy-five dollars in District paper for the hundred dollars on the Florida bank. I offered him the note for eighty-five dollars, and he refused it. I called on the delegate from Florida, to know whether the bank was good. He informed me that it was perfectly solvent, and as sound as any bank in the world; that its paper passed freely in Florida. Then, a man who owes a debt of seventy-five dollars in this city, who may reside in Florida, will have to pay one hundred dollars in paper, which he takes at par at home, to liquidate his liability in this city. Such is the discount, at but one-half of the extent of our nation. If my mind had ever doubted on the subject of the expediency of a United States bank, this single circumstance would have removed every doubt. The Government has disconnected itself from the currency, and all things are in confusion, and I fear will remain so until we have, what was appropriately called yesterday, by my eloquent friend from New York, [Mr. HOFFMAN,] the balance wheel of a United States bank. I have travelled almost in every part of the Union with United States Bank paper, and never met with an individual in my life who did

H. or R.]

Sub-Treasury Bill.

[Oct. 12, 1837.]

not prefer receiving it to specie. But the condition of our exchanges has been enlarged upon by several gentlemen, and with great force by the able member who preceded me; and I will not consume the time of the committee on that branch of the subject.

I had intended to offer some considerations upon, first, the right of the Government to create and establish a good and sound currency for the people, and a safe and salutary mode of exchange; and, secondly, the duty of the Federal Government to exercise that power: but I have been anticipated by the able member from Winchester, [Mr. MASON,] who made an argument upon this subject, clear and lucid; one which has been unanswered, because it is unanswerable. He showed the evils which would be inflicted on the people by establishing one currency for the Government and another for the people. He proved the close affinity of both, and their relative duties and responsibilities. I will only ask, in addition, Mr. Chairman, that if the Government will not exercise any control over, and feel no obligation to regulate, the currency and the medium of exchanges, for what purpose was this federal alliance formed? Why was it that the States gave up to the General Government the whole control over commerce, if that Government will not adopt means for carrying on that commerce with a currency uniform, or as nearly so as human wisdom can devise? Why have they made the sacrifice of so large and surrender of so great a portion of their sovereignty, as to be denied the right to regulate commerce between neighboring States and foreign nations, if the General Government will take no step to promote this interchange? What other consideration could they receive for this immense surrender of State sovereignty, but that the Government would extend its paternal care to effect a good currency and safe and easy exchanges? But the President, with a profound ignorance of both the spirit and the intention of the constitution, has told us that the people might as well expect the Government to aid in the transportation of their merchandise, as to cause or establish a good system of exchanges. It is the first time that an American President has uttered such a sentiment of disregard to an injured people; and I trust that their indignation will make it the last. If this is to be the established doctrine and policy of the Government, each State will, or might as well, stand in the relation of separate and distinct nations; for each will bear the same relation to the other, so far as currency is concerned, as Canada does to the United States, or the different nations of Europe do to each other. And the quicker they reassume the power over commerce, the better will it be for their interest and happiness.

The miserable bunglers of the Executive, who have attempted to regulate and improve the currency, have not yet discovered that they are totally ignorant of the subject, and have failed in their experiments; and even now feel disposed, like a bewildered pilot, to let the ship of State float at the mercy of the winds and the waves, in hopes of reaching a safe point which their pretended skill could not attain, or leap into the long-boat, and desert the crew.

The President, after writing us a long message containing many maxims of sound policy, many long sentences of sophisms, much plausibility, and more bad reasoning, finally hands us over, by way of recommendation, to his Secretary of the Treasury, for the details of his new schemes and untried experiment. I will use this occasion to express my utter abhorrence of the long essays which are annually given by our Executive to the representatives of the people and the States. The Executive seems to think it his duty to send us a long lecture upon our public duties, and assumes as much importance as if he were a professor lecturing a class of sophomores upon the principles of philosophy, and schooling us in the line of our duty.

The King (or now the Queen) of England and the King of France send their messages or speeches to the Parliament or the Chamber of Deputies, of about a span's length, simply saying that the nation is at peace with the world, the King is thankful for the supplies granted, and that he will take pleasure in carrying out such measures as the Parliament or Chambers may think proper to promote the interest of the nation. If either the King of England or the King of France were to threaten a veto, neither would hold his crown a month, if he would escape with his head. I think it ought to be an impeachable offence for any executive officer of Government to send a message or communication to Congress longer than a column of an ordinary newspaper, unless, after that space, statistics and tabular exhibits should require more.

The Secretary of the Treasury has sent us a volume of eighty-eight large pages, laying off his subject, like the monster in grave history, into "seven heads and ten horns." I have read it by candlelight and by daylight; and in groping through it for a clear idea, I could not find one! Now and then you will find a beggarly thought enshrouded in a whole mist and cloud of words. But his thoughts and ideas are like the arts of the cuttle-fish, which, naturalists inform us, when pursued, throws out, as quick as magic, a dark liquid which embarrasses and bewilders its pursuers, whilst it escapes from pursuit amid its own self-created darkness. You pursue his thoughts, but in the pursuit you are left in darkness. If the Secretary of the Treasury is a man of delicate and refined feelings, I would not have suffered the perturbation of mind which he must have endured, whilst he was thinking of and writing that report, for all the public money which he has handled for the last four years. I could never fully realize to my mind the description which Milton has given of one of his heroes, who was confused and disappointed, until I read the Secretary of the Treasury's report. Milton describes a personage who attempted a great reform—not, perhaps, in currency, but in civil government—(and in quoting Milton I do not wish to interfere with the criticisms of my eloquent friend from New York, [Mr. HOFFMAN,] and my no less able friend from South Carolina, [Mr. PICKENS,] who have rendered him, by their able review, of such questionable authority.) This reformer was disappointed, as the Secretary has been, and was humbled from his high estate; and "nine times the space which measures day and night to mortal man," he lay "counfounded, though immortal." And if that immortal personage could not recover his faculties for nine days, amidst the ruin around him, why should we be surprised that it should take Mr. Woodbury, who is only mortal, nine times nine days to regain his, amid the distress and ruin which he has created? In good sooth; I have no doubt that he was confounded whilst writing. Indeed, I am satisfied that he had not regained any of his faculties, save his "modest assurance," when he asked Congress to give him these powers, and to make him, according to his will and judgment, the sole receiver and disbursing officer of the public moneys.

And here, Mr. Chairman, I will claim the kind attention of the committee whilst I say a few words in relation to the Treasury Department, and the bill under consideration granting it additional (I might say unlimited) powers. I feel conscious, Mr. Chairman, that whatever I may say can have but little weight in this House or with the nation; but I should be happy if I could flatter myself that any thought which I may express would awaken reflection in the mind of any member of this House, or any citizen not a member. The day was, Mr. Chairman, when a public officer thought himself an officer of the country and responsible to the laws. Things have changed. Now, every officer, however important or insignificant, considers himself an executive officer, and responsible to

Oct. 12, 1837.]

Sub-Treasury Bill.

[H. OF R.]

the Executive. This modern doctrine has obtained, and therefore I must consider the bill in relation to modern usage and construction. Still, I will offer my protest against the construction. It might be more curious than profitable to account for this transition of custom and construction. Perhaps it may be found in the fact, that, as General Jackson had overwhelming popularity, and rewarded most liberally his partisan friends, each who felt anxious to be promoted thought that, by placing himself under the executive wing and will, he would sooner be rewarded for his servility; and Congress, under the zeal of party feeling, thought that their friend and chief could not err—that the President “could do no wrong”—and therefore acquiesced. Whilst I know this to be the prevailing construction in this House and out of it, still I will venture, perhaps with temerity, to express my disagreement.

The Secretary of the Treasury is an officer not known in the constitution. Then, under the constitution he can claim no powers. He has been created by law, and to that law he should look for not only his existence as an officer of Government, but for the powers and duties which have been assigned to him. And he should look to all the laws (and not to the Executive) which assign him duties, for the quantity and discretion of duty which may be imposed upon him to discharge. He is not to look to the nominating power for his authority of action, but to the creating power. The law brings him into being, and the law alone rightfully prescribes his power of action. The Executive might have exercised the constitutional negative at the time of his creation; but it gave its sanction to the law, and in that sanction it yielded its acquiescence to all the powers of the Secretary of the Treasury which run with and are contained in the law of his creation, and to the subsequent laws which enlarge or restrain his sphere of duty. A question of great interest might here naturally arise, whether the powers granted by the constitution and those granted by the laws should be decided by a common rule of interpretation. I have not the time now, if I possessed the ability, to make an argument upon the true rules of construction of both the constitution and the laws. I will content myself for the present by quoting a rule laid down by Mr. Madison, in a letter to Mr. Ingersoll, in 1831. “A constitution, (says Mr. Madison,) being derived from a superior authority, [to the laws,] is to be expounded and obeyed, not controlled or varied, by the subordinate authority of a legislature. A law, on the other hand, resting on no higher authority than that possessed by every successive legislature, its expediency as well as its meaning is within the scope of the latter.” If this rule is correct, the Secretary of the Treasury should direct his eye to Congress in the discharge of his official duties, and not make himself, as he has made himself, or allowed himself to be made, the supple instrument in the executive hands.

Those who urge that the President has entire control over the Secretary of the Treasury, because he has the power under the constitution to nominate to office, run into error; and, in order to make their construction more plausible, assume (what is not the fact) that the Secretary is a mere subordinate auxiliary officer of the Executive department; that the President is not only responsible for his own acts, but is responsible for the acts of all officers of Government whom he may nominate; and being responsible, they maintain, for the acts of the Secretary of the Treasury, he has a right to control the actions of the Secretary, and to assume, in the Secretary's stead, the entire responsibility of the Secretary's acts. The President, I humbly conceive, has the mere right to nominate (or he may suspend) a person to discharge the duties of the office of Secretary of the Treasury; the Senate, a co-ordinate branch of the Executive, *quoad* the appointing power, have a right to confirm or to reject the nominee. This gives no power to either to control the actions of the Secretary. But

it is the law that throws dignity and duties around the Secretary, and the law assigns his powers and his obligations. For the fidelity of discharging his duties, he becomes responsible neither to the nominating nor the appointing power, but he becomes only responsible himself to the law; and for an infraction of the law or malfeasance in office he is amenable to the law, and answerable before tribunals adequate to pronounce decision of acquittal or condemnation for all of his official acts. The President may nominate—Congress can abolish. If the modern doctrine is correct, as has been assumed, that the right of the President to nominate to office carries with it a right to control the acts of a Secretary, then the President, who has legislative power as well as executive duties to perform, (for no law can be passed without the signature of the President,) can, by a parity of reasoning, not only interpret and control, and arrest the operation of the law which he has signed, (as has been done,) but he can set the constitution at defiance, and find his justification, not in the sanctions of that instrument, or in the written law of the land, but by assuming the responsibility of outraging both—seek his justification in making an appeal, not to the tribunals of the country, but to the American people, to countenance his attack upon the institutions of the country, upon the co-ordinate departments of Government—for assuming sole executive and legislative power—and for arrogating uncontrolled power over the Secretary of the Treasury and the currency and money of the Government. When the representatives of the people of the several States framed the constitution, they assigned the President his duties, and required him, in the discharge of those official duties, to make his conduct quadrate with that instrument; nowhere recognising his right to control a public officer in the discharge of his legal duties; nowhere recognising his right, in justification of an infraction of the constitution and the laws, to appeal to the people, in order to gain their sympathy or contempt, their forgiveness or their censure. Every usurper appeals to the people; Cæsar appealed to the people; so did Cromwell and Bonaparte; all deceived the confidence of the people, and each trampled upon their liberties. A candidate for office may appeal to the people—a public officer should appeal to the law; and if the law will not suit the people, they can order their representatives to alter it. Whether these views are correct or not, they are still the sentiments I entertain; and, holding them, I am free to give them utterance; for I believe this to be a time when every representative of the people should think audibly.

The law of September 11, 1798, entitled “An act to establish the Treasury Department,” declares, in the first section,

“That there shall be a Department of the Treasury, a Secretary of the Treasury, a Comptroller, an Auditor, a Treasurer, a Register,” &c.

“Sec. 3. It shall be the duty of the Comptroller to superintend the adjustment and preservation of the public accounts; to examine all accounts settled by the Auditor, and certify the balances arising thereon to the Register; to countersign all warrants drawn by the Secretary of the Treasury, which shall be warranted by law; to report to the Secretary the official forms of all papers to be issued in the different offices for collecting the public revenue, and the manner and form of keeping and stating the accounts of the several persons employed therein. He shall, moreover, provide for the regular and punctual payment of all moneys which may be collected,” &c.

“Sec. 4. That it shall be the duty of the Treasurer to receive and keep the moneys of the United States, and to disburse the same upon warrants drawn by the Secretary of the Treasury, countersigned by the Comptroller, recorded by the Register, and not otherwise. He shall take receipts for all moneys paid by him, and all receipts for moneys received by him shall be endorsed upon warrants signed

H. OF R.]

Sub-Treasury Bill.

[Oct. 12, 1837.]

by the Secretary of the Treasury; without which warrant, so signed, no acknowledgment of money received into the public Treasury shall be valid. And the said Treasurer shall render his account to the Comptroller quarterly, (or oftener, if required,) and shall transmit a copy thereof, when settled, to the Secretary of the Treasury. He shall, moreover, on the third day of every session of Congress, lay before the Senate and House of Representatives fair and accurate copies of all accounts by him, from time to time, rendered to and settled with the Comptroller, as aforesaid; as also a true and perfect account of the state of the Treasury. He shall at all times submit to the Secretary of the Treasury and the Comptroller, or either of them, the inspection of the moneys in his hands; and shall, prior to the entering upon the duties of his office, give bond, with sufficient security, to be approved by the Secretary of the Treasury and Comptroller, in the sum of one hundred and fifty thousand dollars, payable to the United States, with condition for the faithful performance of the duties of his office, and for the fidelity of the persons to be by him employed; which bond shall be lodged in the office of the Comptroller of the Treasury of the United States."

Section 5 assigns the duties of the Auditor.

Section 6, of the Register.

"Sec. 8. That no person appointed to any office instituted by this act shall, directly or indirectly, be concerned or interested in carrying on the business of trade or commerce; or be owner, in whole or in part, of any sea vessel; or purchase, by himself, or another in trust for him, any public lands or other public property; or be concerned in the purchase or disposal of any public securities of any State or of the United States; or take or apply to his own use any emolument or gain for negotiating or transacting any business with the said Department, other than shall be allowed by law. And if any person shall offend against any of the prohibitions of this act, he shall be deemed guilty of a high crime and misdemeanor, and forfeit to the United States the penalty of three thousand dollars; and shall, upon conviction, be removed from office, and forever thereafter be incapable of holding any office under the United States," &c.

In 1817, March 3, four Auditors were created, and one Comptroller, additional; but the restraints upon each officer are as great as in the law of 1798.

I cannot, Mr. Chairman, but pause here for a moment to admire the great wisdom and foresight of the wise framers of these statutes in guarding the public moneys of the people, by the variety of officers which they have created to be guards and checks upon each other. They knew the frailty of human nature, and its impotency to resist the seductive influence of temptation. By these statutes, we find that even the Secretary of the Treasury could not touch one dollar of the public money; that he had as little control over it as any other officer of the Government.

By the extracts of the statutes which I have read, it will be perceived that the same law which created the Secretary of the Treasury, created co-ordinate, and I maintain co-equal, officers of that Department, who are as independent of the Secretary of the Treasury as they are independent of the Secretary of War; who are as independent of the President as they are independent of each other. They are not to look to any power but the law, and that they are to obey. The Treasurer is required to give a large bond. To whom? to the Secretary of the Treasury? No, sir, to the nation. Then he is responsible to the nation, and not to the Secretary. The co-ordinate officers, the Comptrollers, the Auditors, the Treasurer, and the Register, hold no responsibility to the Secretary; Congress have appointed them guards upon the public money and upon the Secretary of the Treasury; and I fondly hope that

they will so regard themselves. Rumor has reached my ear, upon the wings of the wind, that some officers have been considered too honestly faithful to the law, and would not bend to advice from a particular direction. It will be understood where I wish it to be, when I say to them, be firm and faithful to the law and your duty. I will say to those officers in Washington and out of it, whether I know them or not, whether they are Conservatives, Whigs, or Van Buren men, as long as they are faithful to the laws, and firmly resolved to do their duty, I beg them to consider me as their friend. Let them do their duty to the people and the laws, and, if persecution should assail them, I care not how dark the cloud, how fearful the storm, as long as I have a place on this floor I will raise my humble voice in their defence.

But, to examine for a moment the bill on your table. What does the Committee of Ways and Means propose by that bill? In a bill of ten little sections, to blot out from your statute book all the many laws which created, regulated, restricted, and restrained the Secretary of the Treasury; and to destroy the enactments of our forefathers, which so cautiously guarded the public moneys of the people. To destroy the power, or to surrender it, of the Congress of the United States over the revenues of the nation, and to place it all in the hands and under the control of the Secretary of the Treasury. This is not all; the bill proposes more: it proposes to give to the Secretary, singly and alone, not only power over the money of the nation, but it also invests him with legislative powers. It proposes, in the very first section, after saying that "the collectors of the customs," "postmasters," &c., shall be "receivers" and "fiscal agents," that they shall be governed "by any regulation of the Treasury Department" "which, in its wisdom, it may think necessary," &c. In the fourth section, after saying that the receiving officers of the revenues "may be allowed any necessary additional expenses for clerks, fire-proof chests or vaults, (as if the keeper of the key of a vault could not have the same ready access to it as he would have to his own private bureau,) or other necessary expenses of safe-keeping, transferring and disbursing said moneys; all such expenses, of every character, to be first expressly authorized by the Secretary of the Treasury, whose direction upon all the above subjects, by way of regulation and otherwise, are to be strictly followed by all the said officers."

In the fifth section, he has the power "to appoint special agents, as occasion may require, with such reasonable compensation as he may allow;" "and reports are to be made in all cases, as the Secretary in his discretion shall direct."

I ask any candid mind if it is in the power of language to give more absolute and unqualified power over the money of the nation, and over every officer who is to receive or pay it, than is given by this bill to the Secretary of the Treasury? Can such a measure ever receive the sanction of a majority of the representatives of freemen? That such a bill should be received in this House, without exciting the strongest feelings of indignation, surprises me. That this House should patiently allow any committee to ask them, without prompt resentment, to surrender their rights, and the rights of those whom they represent, into the hands of one single individual, excites my distrust for the spirit of its independence. Even the slavish members of a Turkish divan would rebel against such a measure. If the representatives of the people abandon their interests on this floor, I have greatly mistaken the genius and character of my countrymen, if they will not quickly abandon them. I use this language in no spirit of censure or threat, but in prophecy.

We have wandered beyond our reckoning; we have been floating in an unknown sea! and our pilots are ignorant of the seas, the winds, and the stars. This they have proved;

Oct. 12, 1837.]

Sub-Treasury Bill.

[H. OF R.]

but still they call on us to trust to them, although they have run us aground; they promise to run on another tack, and say they can escape the reefs and breakers. They are in a fog, but are still determined to rush recklessly on, instead of using the anchor, and run the ship of state they know not where.

It is a good, a safe maxim with the merchants—I hope and trust it will become the maxim of the farmers and the mechanics—never to trust those twice, who have deceived them once. I was in the panic session of the twenty-third Congress, one of the youngest (I know the humblest) members on this floor. When the rash, now all know the ruinous, experiment was proposed, almost the entire Executive party predicted that it was the commencement of a golden era—that every mechanic would have all his pockets filled with gold. I might read extracts from fifty speeches to prove this assertion, if it were necessary. I could read extracts from fifty speeches, made by the opponents of that measure, to prove that they predicted all the dire effects which the whole nation are now groaning under, if that visionary scheme should be adopted.

What were then promises on the one side have proved as deceptive as what was then prediction on the other is now sad reality. If the half-starved children, and the haggard looks of their miserable mothers and agonized fathers, which we all have left behind us in our districts, be not sufficient proof of the fact, it is to be found in the evidence of the fact that the President has convoked us at this unseasonable and unusual period. When I saw then around me the grave and experienced, the learned and practical men, discussing the whole policy of our currency and our Government, I felt too distrustful of my ability, though confident in my judgment, to participate in that debate. But when I have seen that experiment fail, and the same men who urged it press upon us another—an experiment which I believe will make the rich poor and the poor miserable—I am unwilling to be a silent voter; and, however limited my range of thought and ability, I am still resolved to speak the inmost feelings of my mind, if this speech were to be my last; for diffidence in this crisis I do not regard a virtue.

What is the character of our currency now? what is the character of our exchanges? what, let me ask you, is the condition of our people? Miserable beyond description or parallel. What were the people promised, if they would go against the United States Bank, and go for the humbug experiment? They were promised all that the imagination could throw out to eager hope. The farmer was told that the Bank of the United States checked his energies and caused a failure in his wheat crops; the mechanic was told that he would never be a rich man as long as there was a United States Bank; the merchant was told that exchanges would be improved if he would but aid in destroying the monster; the professional man was led to believe that he would never have a patient, or a client, or a marital rite to perform, if he did not join in a cry against Nick Biddle and the bank. All were promised, and too many believed, that if they would war against the monster bank the whole land would flow in gold and silver; that the imagination of the travelling Spaniard through South America would be changed from conceit to vivid and tangible reality; that the houses would be covered with gold and silver; that the trees would bear ambrosial fruits of vegetable gold; that the whole nation would be an El Dorado and a specie paradise; that all might voluptuously live without working, and be rich without industry. This picture was delightful to the imagination, and it required the sternest philosophy to resist its captivating influence. For who, Mr. Chairman, would labor for wealth, if he can gain it by idleness?

The people were promised the same national and individual blessings which a notorious reformer in England once promised his followers and believers. He said:

"There shall be, in England, seven half-penny loaves sold for a penny; the three-hooped pot shall have ten hoops; and I will make it felony to drink small beer; all the realm shall be in common."

"Away, burn all the records of the realm."

The last part of this promise is the first which has been kept. The constitution enjoins upon each House of Congress to keep a journal of records. The Senate have expunged their record. I would to Heaven, for the honor and fame of the nation, that, after expunging, they had burnt the record, so that the infamy of the act might have been consumed with the record!

Sir, you have falsified all your predictions and your promises to the people, and still you have the temerity to ask them to go with you in another crude and untried experiment, which shows upon its face a delusive hope and a ruinous consequence. Sir, you claim to be the poor man's only friend, and you have brought the poor man to poverty and ruin.

You are consulting your own ambitious aggrandizement at the expense of the misery and suffering of the people. With consciousness of error, you still persist in wrong. You first induced the people to wage with you a war upon the United States Bank, and promised them better things and more prosperous times; you have not realized the hopes you awakened. You now tell the people to wage a war against all banks—and the very pets upon which you relied as your instruments to effect a better currency. Yes, sir, you have done all this; and now, by your Executive's recommendation, you wish to create a universal bankrupt law. The honorable chairman of the Committee of the Judiciary has, creditably to himself, and—I return him my acknowledgments—to the committee, informed you that he is not prepared at this time and at this session to obey the executive will in that request. Yet the Senate's committee have reported a bill to annihilate the banks of this District—a step, I suppose, preparatory to a general bankrupt law.

[Here Mr. JOHNSON was informed by a voice from behind him that the chairman of the committee of the Senate [Mr. GRUNDT] had asked leave that morning in the Senate to be relieved from the consideration of the executive request, to establish a general bankrupt law against the banks.]

Mr. J. said, I return my thanks to the voice which I hear, and to the honorable member from whom it proceeded, for the information which he has given me; I was not apprized of it before. I regard it as an omen of better things; I congratulate this House, I congratulate the country, upon the fact, that, as pliant as the Senate have been, they have not been so reckless of the public interest as to go with the Executive in all its mad and violent projects. I have now, for almost the first time, some hope that there is a redeeming spirit in this House, to check and oppose some of the crude and ruinous measures of the Executive; and I feel animated with fresh and enlivening sentiments. But, sir, to resume the entangled thread of my discourse.

You found it popular with the public taste to go against the United States Bank. But, remember, when you got the people to go with you, you promised a better currency, and a better system of exchanges; you promised them gold for bank notes, and prosperity in their business for what you called bank oppression. The scheme took well on the start, but failed in those results; and now, because you deceived the people once, you would fain believe that you can make them think that it is now the State banks—your pets—that have caused all this misery and suffering. You are really, now, attempting a bold experiment on human credulity. Sir, you seem to revel instead of sympathizing in the distresses of human beings: you first deceive, and hope to make atonement by misleading. You

H. of R.]

Sub-Treasury Bill.

[Oct. 12, 1837.]

think, because you got popular feeling against the United States Bank, you can now direct it against State banks, against all banks. If that fails, then to direct it against all rich men, and adopt the levelling, the agrarian system.

Sir, when I read, in my early youth, Rochefoucault's maxims, one (although he seemed to "understand the human heart as though he had made it") I marked with my pencil at the time, as wrong and impossible—the maxim where he says "that there is something in the distresses of our friends which does not displease us." Although I read Dean Swift's approval of it, who was well read in the secret impulses of human action, still I doubted. He describes it better in verse—

"As Rochefoucault his maxims drew
From nature, I believe them true;
This maxim, more than all the rest,
Too base 'tis thought for human breast—
That, in the distresses of our friends,
We first consult our private ends;
And nature, kindly bent to ease us,
Points out some circumstance to please us."

Sir, I begin to doubt, and am almost inclined to believe, that, in the unsophisticated thoughts of less experienced life, I was wrong—when I have seen and witnessed the great excitement which was brought to bear in the public mind against the late Bank of the United States, how completely politicians succeeded in elevating themselves, by destroying that institution; although, in its destruction, their friends, as well as their opponents, were whelmed in the same common distress and ruin. Whether some of these same politicians have not looked on the general ruin and misery with complacency, and at least consoled themselves that, as the first experiment acted politically (if not financially) well, they could now turn the indignation of the people from themselves against the State banks; and if that should result as the first experiment has terminated, and the people should still suffer distress, that they would say to them, to complete the glorious reform in our currency and money affairs, the people must go one step further, and it will be but one step, and direct their indignation against every rich man; and that there is no freedom where there is not an equal distribution of property; that, to be free, we must have the agrarian locofoco feeling to triumph; that—

"All the realm shall be in common."

Sir, every feeling of my nature startles at such a monstrous doctrine. The doctrine is avowed by few, but many are acting in the way to cause such a result. It will fail, I predict. I know it will fail. There is too much honor and integrity in the composition of the American character ever to allow such a doctrine to prevail. There is too much honesty and worth with the unaspiring portion of our farmers and mechanics to suffer such sentiments to obtain a place in any honest bosom. I believe that one-half of those politicians who talk so much about the poor, are their worst enemies; I judge so, because their measures are not calculated to aid, but to oppress, the indigent. Professions of patriotism have become trite and stale. I judge, and would urge the whole nation to judge, of public men, not by their professions, but by their acts; it is the safest test. The pinching distresses of the people will force them to adopt it. You have touched the most sensitive nerve in the American system. You have touched the pocket nerve, and it communicates directly to the thinking faculties of the mind. "Of all rebellions," said Lord Bacon, "those of the belly are the worst."

The attempt to draw a distinction between the rich and the poor, which is so often hinted at in the message, is delusive, because it is false. The President alludes to the people and to the poor to gain their favor, but recommends nothing to relieve their embarrassments. If he turns his eye at all to the sufferings of the people, it is a mere side-long look that falls upon them

"As cold as the moonbeam on the barren heath."

He will not carry their produce to market, or think about their exchanges. The Emperor of China ploughs a furrow every year in respect to agriculture. The President might have written one line in his message in favor of that interest. And yet politicians talk about the poor—the laboring men—the very men who have suffered the most by their pretended friendship.

We hear the terms of "the poor" and "the aristocrats" used in every public place and in every public document. These epithets are unjust when applied to the people. We have no such distinctive classes; and those politicians, who denounce the honest man who has made a competent fortune by honest industry and frugality as an aristocrat, are themselves the worst sort of aristocrats.

As General Foy, in the French Chamber of Deputies, was enlarging with much earnestness in a discussion in the Chamber, and had just used the word "aristocracy," a voice from one of the ministers asked him to define it. "Aristocracy," he replied at once, and quickly—"Aristocracy, in the nineteenth century, is the league, the coalition, of those who wish to consume without producing, live without working, occupy all public places without being competent to fill them, seize upon all honors without meriting them: that is aristocracy."

This I regard as a true and practical definition of the word. It is as just as it was happy. There is no such class in this country as the poor, if you will exclude the tenants of the almshouses. Every man in this country, who works at daily labor, gains wealth enough to secure him all the comforts of life, and many of its luxuries; is well fed and well clothed; and has, at the end of the year, spare money and feels properly as proud and as independent as any man in the nation. He knows that whilst he is one of the people, he is part of the Government; that his voice is felt and obeyed as much as if he had millions. He knows that, whilst he has to labor hard, the laws will protect him in his rights, and in the possession of the rewards of his industry.

The laws of our country, of every State in the Union, prevent a large accumulation of wealth in the hands of the few. The accumulation of one generation is divided with the descendants in the next. All that is wanted to acquire wealth is stability in wise laws to regulate the currency. Repeated fluctuations and changes, such as our rulers have produced, cause want of confidence, and finally distress. Confidence causes credit; and a system of credit, when controlled within cautious limits, adds to individual enterprise, which augments the wealth of the nation. Credit is the poor man's capital; and by it, in a moral point of view, the nation is benefited; for every individual is more anxious to preserve the rectitude of his integrity and honesty, when he knows, that by doing so, it may advance his wealth and prosperity. The rich man of last year is the poor man this; and the poor man this, is the rich man next year; so the changes go round the circle, from year to year, from generation to generation. From some knowledge of the people of the United States, I do not hesitate to give it as my opinion, that, of the many who possess great wealth, a larger number of them have started from humble means, and have been the architects of their own fortunes, than those who have derived it from patrimonial inheritance.

By the laws of descent of the States, it is impossible that any family or class of individuals ever can accumulate so much wealth as to be enabled to oppress any portion of the people. Public functionaries that are wise should be cautious in awakening prejudices against any class in the community, when the interests of all are so naturally dependent upon each other, and are knit together like the web of the spider's web, so that whatever touches or deranges a part must be felt at the most remote and attenuated extremities. They should hold out, by establishing a

OCT. 12, 1837.]

Sub-Treasury Bill.

[H. OF R.]

safe and convertible currency and wise regulations of law, inducements and facilities to the needy industrious to accumulate property; and, in this way, to give a stimulus to industry; for it is not by the amount of specie which may be in a nation that you alone are to judge of its prosperity and its wealth—a better criterion is its productive industry. A man who acquires property accumulates wealth; and when he has done this, he can soon convert it into money. The man who has but a thousand dollars, will find that at six per cent. it would support him with the necessities of life for a month; but, if he were to expend it in Government lands at a dollar and a quarter an acre, and apply his labor upon those lands, the production would not only support him and his family, but the surplus of his productions would enable him annually to increase his wealth. But he must have either the capital in money, or the capital gained by his credit; for if there is neither capital nor credit in the country, to allow him to establish himself, he must be forever poor and miserable. Then I maintain that, to promote the prosperity of the poor, you must supply them with the facilities of acquiring either capital or credit, or rather of both. And this brings me to an important part of our inquiries and our duties: Whether a nation can prosper without a sound and abundant convertible circulating medium? whether gold and silver alone will be sufficient to promote that prosperity? and whether the poor would be benefited by the destruction of all banking institutions? Not having had time to arrange a regular and systematized argument, I will offer a few considerations in relation to these several propositions, without speaking of each separately, and care but little in what order I may take them up, and speak of each in conjunction. No member on this floor has said that there is more than eighty millions of dollars in this country in gold and silver. The easiest way of arguing this question is by the Yankee mode of asking a question. That question is, how will the people be enabled to pay off all their debts, which amount to many thousand millions, with only eighty millions of specie, if you force by your policy bank paper from circulation? For the constitution authorizes every creditor to exact specie, (if he is unfeeling enough to do so,) as your law authorizes the Secretary of the Treasury to exact specie, when the banks cease to redeem their paper.

We can form some idea of the amount of debts which are owed by the people, from the President's message. He says: "At the commencement of the year 1834, the banking capital of the United States, including that of the national bank then existing, amounted to about two hundred millions of dollars; the bank notes then in circulation to about ninety-five millions; and the loans and discounts of the banks to three hundred and twenty-four millions. Between that time and the first of January, 1836, being the latest period to which accurate accounts have been received, our banking capital was increased to more than two hundred and forty-one millions; their paper circulation to more than one hundred and forty millions; and the loans and discounts to more than four hundred and forty-seven millions. To this vast increase are to be added the many millions of credit," &c. Then, according to the President's own showing, the people owe the banks nearly eight hundred millions of dollars, to say nothing of the immense amount which is owing between merchant and dealer, between farmer and mechanic; and I should not be exorbitant, if I were to say it amounts to at least ten times that sum. Then, suppose you would carry out your hard money experiment; what would it lead to? The Government exacts its dues in gold and silver, and requires the deposit banks and the people to pay it in gold and silver; the banks which have made loans, as all have, call on the importing merchants to pay them in gold and silver; the importing merchant calls on the retailing merchant to pay

him in gold and silver; the interior merchant calls on the farmer, and the farmer calls on the mechanic. Cannot all see the impossibility of paying more than ten hundred millions of debts with eighty millions of gold and silver? There is not gold enough in the world to pay the debts of the people of this nation. But suppose, purlblindly, you press on with your schemes: I ask any member on this floor, if any of his constituents were to owe a debt, say one thousand dollars, and be possessed of property to the amount of ten thousand dollars, if it would not require the whole property he possessed, if it were to become a general policy to pay in gold and silver, to sell for one thousand dollars. So far from this policy having the tendency to benefit the poor, it will, in its results, if it be not arrested, make the rich poor; and the poor man, who is forced to pay all his debts in gold and silver, will find himself beggared, if not incarcerated in the jail of his county. That is the paradise of suffering and misery, which such a measure will lead him to; and if he follows such counsellors as we have had for the last three years, he should prepare his mind and body to endure penury and suffering. "It is in those countries," says an able writer, "only, where labor is well rewarded, and where the mass of the people are placed in a situation to accumulate wealth, that they acquire a stake in the hedge, and are, in consequence, made to feel a direct personal interest in the support of all those great fundamental principles essential to the existence of society, which they otherwise regard either with indifference or aversion, and which the slightest provocation is sufficient to induce them to attack."

But those statesmen, who ride in their English carriages with white servants in livery, who all feed upon the public crib, say that the people are too voluptuous, they have too many luxuries, that they are too extravagant, and that their rulers are determined to bring them down to primeval simplicity; that they must be brought down to the economy of the pastoral ages, and republican simplicity, which we read of in books of olden times; to the hard-money days of Lycurgus, when a man was regarded a patriot, if he not only would covet, but if he would steal his neighbor's property, without being detected in the theft—when their bread was made of acorns, and the skins of wild beasts furnished them with raiment. Or are we to be brought down to later days, the days when cocoa seeds were received in part of South America for a currency? That had more plausibility about it, for the holder of that currency could convert it into an article of food, which was no small improvement upon Lycurgus's system.

Example has more effect than precept; and he who wishes to reform society must first reform himself; and if the President and his Secretary would start the fashion, they might advise with better hope of success. Let the President dress himself in sackcloth, and his Secretary in the skins of wild beasts, or borrow a dress from Keokuck or Black Hawk, who are now in the city, and start out as missionaries to proselyte the people, and they will soon find how many converts they will make. The first district which they would enter would be the district which I have the honor to represent on this floor. Let them approach some settlement of industrious Friends, or German farmers—the former they would first reach in about ten miles from this place. The President would enlarge upon the advantages of his new system, and finally hand the listening crowd over to his faithful squire, who would show, by statistics, what would be saved to the nation, if no luxuries were imported from abroad, and how much less their merchants' and tailors' bills would be if they adopted his attire—to banish broadcloth coats and merino shawls. We can well conjecture, Mr. Chairman, that the women, if they said nothing, would look inexpressible things. And I can imagine some such man as Roger Brook, a resident of Montgomery, who is a man of read-

H. of R.]

Sub-Treasury Bill.

[Oct. 12, 1837.]

ing and a wit, replying to the President, and saying that his costume and the Secretary's were unique and peculiar; that he belonged to a society that but seldom changed good habits; that he liked to read of such attire in the Bible, but could not say that he was at that moment prepared to adopt it. Although they are remarkable for treating both invited and stranger guests with great hospitality, he would play off Van Burenism upon Van himself; and say to him, as a delinquent debtor once said to a dunning creditor, friend, call next week, and — then I will tell you when you can call again.

But we have had some of these currencies in our own country, or something very much like them. In the democratic simplicity of the trappers of the Rocky Mountains at this time, they use pelt instead of bank notes, and pay their debts in the skins of beavers, otter, or racoons. Before the purchase of Louisiana, and until 1804, deer skins were a legal tender, by the laws of all Upper Louisiana, at forty cents a pound. Our forefathers, in their republican simplicity, made fish oil, cotton, and tobacco, a legal tender; and you cannot now open an old statute book, of either Virginia or Maryland, that has not tobacco so often written in it, that it almost smells of the indigenous weed. In Maryland, by the law of 1732, tobacco was made a legal tender at a penny a pound, and Indian corn at twenty pence a bushel. Whilst in Virginia, in 1618, tobacco was made a legal tender at 3s. per pound; and, in 1620, the "young" and beautiful "women who were shipped by the Virginia Company in England to that colony to be married to the residents, the price on each was a hundred pounds of tobacco, though, when the article was scarce, as much as a hundred and fifty pounds was paid."

This kind of currency is very elegantly described in the sixteenth number of *Salmagundi*, where it represents that "the lady of a Southern planter will lay out the whole annual produce of a rice plantation in silver and in gold muslins, lace veils, and new liveries; carry a hoghead of tobacco on her head, and trail a bale of sea island cotton at her heels; while a lady of Boston or Salem will wrap herself up in the nett proceeds of a cargo of whale oil, and tie on her hat with a quintal of codfish!" I do not believe that any of my constituents wish to go back to the tobacco experiment of their ancestors; many of them raise most excellent tobacco, and some like to exhilarate their senses with it; but none, I believe, are anxious to have their dues paid in it; they would prefer the miserable currency which you have now afflicted them with. I know by how frail a tenure I hold the attention of the committee; but, as it has favored me with its attention, I am emboldened to proceed a little further, and will attempt to illustrate the positions loosely thrown out in my remarks—the necessity of the Government to establish, by wise regulations, a currency for the people; and the absolute impossibility of the advance of this nation in its usual and rapid strides to wealth, to greatness, and to power, without an abundant and good currency. I will not go into a discussion of metaphysics and abstractions, as one-half of the political economists do, who write long and labored books, to find out whether gold and silver is properly money or not; whether it is a merchantable commodity, and ought to be sold as any other production of labor; whether bank paper is a good and safe representative of value, or whether it may be worn out and more quickly consumed than the precious metals. I will leave these discussions to those who have a taste for them. I am in the Congress of the United States, and feel that it is my duty to act upon circumstances around me; to look at the past, and try to do the best I can for the future. Close refinements may suit the purpose of the learned lawyer, and abstract metaphysics may suit the man of recondite lore, but practical utility, I think, will best suit an American legislator.

I will take the liberty of reading an extract or two from a little volume I hold in my hand. It is about half the size of the report of the Secretary of the Treasury, and contains, in my poor judgment, more sound maxims of usefulness to the laboring class than all the messages and reports, and speeches too, which have been written by the Presidents and Secretaries, and their friends, for the last four years. I am sorry to discover that it is not to be found in any of the libraries in this Capitol; and, whilst I am making a miscellaneous speech, I will use this occasion to say that I am sorry for the American taste, that they buy up every large volume of romance that is published, whilst pamphlets of solid information are neglected. In England it is different; nothing is quicker bought and read there than political essays and statistical tracts. We have not a taste for statistics, and nothing is more important for a public man. The volume which I will read from is one that was sent to me by a travelled friend from Edinburgh. It was written by J. R. McCullough, and is entitled "An Essay on the Circumstances which determine the Rate of Wages, and the Condition of the Laboring classes." The first section is headed "Rate of wages in any given country at any particular period, determined on the magnitude of the fund or capital appropriated to the payment of wages, compared with the number of laborers." He says: "The capital of a country consists of all that portion of produce of industry existing in it which can be made directly available, either to the support of human existence, or to the facilitating of production. But the portion of capital to which it is now necessary to advert, consists of the food, clothes, and other articles required for the use and consumption of the laborer. This portion forms the fund out of which their wages must be wholly paid. We shall err if we suppose that the capital of a country depends on advantageousness of situation, richness of soil, or extent of territory. These, undoubtedly, are circumstances of very great importance, and must have a powerful influence in determining the rate at which a people advance in the career of wealth and civilization. But it is obviously not on these circumstances, but on the actual amount of the accumulated produce of previous labor, or of capital devoted to the payment of wages, in the possession of a country, at any given period, that its power of supporting and employing laborers must entirely depend. A fertile soil affords the means of rapidly increasing capital; but that is not all. Before that soil can be cultivated, capital must be provided for the support of the laborers employed upon it, just as it must be by providing for the support of those engaged in manufactures, or in any other department of industry.

"It is a necessary consequence to this principle, that the amount of subsistence falling to each laborer, or the rate of wages, must depend on the proportion which the whole capital bears to the whole amount of the laboring population. If the amount of capital is increased, without a corresponding increase taking place in the population, a larger share of such capital will fall to each individual, or the rate of wages will be increased. And if, on the other hand, population is increased faster than capital, a less share will be appropriated to each individual, or the rate of wages will be reduced."

"So long as capital and population continue to march abreast, or to increase or diminish in the same proportion, so long will the rate of wages, and, consequently, the condition of the laborers, continue unaffected; and it is only when the proportion of capital to population varies, when it is either increased or diminished, that the rate of wages sustains a corresponding advance or diminution. The well-being and comfort of the laboring classes are, therefore, essentially dependent on the relation which their increase bears to the increase of the capital that is to feed and employ them. If they increase faster than capital, their

Oct. 12, 1837.]

Sub-Treasury Bill.

[H. OF R.]

wages will be reduced; and if they increase slower, they will be augmented. In fact, there are no means whatever by which the command of the laboring class over the necessities and conveniences of life can be enlarged, other than by accelerating the increase of capital as compared with population, or by retarding the increase of population as compared with capital; and every scheme of improving the condition of the laborer, which is not bottomed on this principle, or which has not an increase of the ratio of capital to population for its object, must be completely nugatory and ineffectual."

Such are the views, not of a man who wishes to be returned to Congress upon some popular prejudice, who aspires to a secretaryship, or a foreign mission, or to the Presidency, but one who writes for the benefit of mankind, and is willing to meet his reward in the approbation of a benefited and grateful posterity. If I may venture to illustrate his views, in this country we have now some eight or ten hundred millions of circulating medium, which is received, and gladly received, by all who have debts to collect, as money. If you adopt the advice offered, and destroy our banking institutions, you reduce the circulating medium to the amount of the specie in the nation, which has been computed at eighty millions; but I do not believe that it is much more than half that amount. Then you will have a currency or circulating medium which, if you were to divide it among the people, would give each individual some three or four dollars. The effect would be, that those who work for a dollar a day now would have their wages reduced to some ten or twelve cents per day; for, instead of increasing the capital with the increase of the population, you reduce the capital to about five per cent. of what it is now, whilst the population of the country increases about five per cent. every year. Or you would have to raise the value of money more than a thousand per cent., and say that a dime shall in future pass for a dollar, an eagle for a hundred dollars. I will read another extract from his second chapter, exhibiting the "Comparative increase of capital and population." "It is not possible to obtain," he says, "any precisely accurate estimate of the absolute quantity of capital in a country at different periods; but the capacity of that capital to feed and employ laborers, and the rate of its increase, may, notwithstanding, be learned with sufficient accuracy for our purpose, by referring to the progress of population. It is clear, from the statements already made, that the inhabitants of a country, supposing them to have the same, or about the same, command of the necessities and conveniences of life, cannot increase without a corresponding increase of capital. Whenever, therefore, we find the people of a country increasing without any, or with but very little, variation taking place in their condition, we may conclude that the capital of the country is increasing in the same or very near the same proportion. Now, it has been established beyond all question, that the population of several of the States of North America has, after making due allowance for immigrants, continued to double, for a century past, in so short a period as twenty, or at most twenty-five years; and, as the quantity of necessities and conveniences falling to the share of an inhabitant of the United States has not been materially increased or diminished during the last century, this increase of population is a proof that the capital of the country has advanced in a corresponding ratio. But in all old settled countries, the increase of capital, and consequently of population, is much slower. The population of Scotland, for example, is supposed to have amounted to 1,050,000 in 1700; and, as it amounted to 2,135,000 in 1820, it would follow, on the principle already stated, that the capital of the country had required about one hundred and twenty years to double. In like manner, the population of England and Wales amounted to 6,064,000 in 1740, and to 12,256,000 in 1821: showing that the popu-

lation, and, therefore, the capital, of that country applicable to the support of man, or the supply of food, clothes, and other articles necessary for the support of human life, had doubled in about eighty years.

"The effects which the different rates at which capital and population advance in different countries have on the condition of their inhabitants, may be exemplified in a very striking manner by comparing the rate of increase and the actual state of the people of Great Britain, with the rate of increase and the actual state of the people of Ireland. It is certainly true that there has been a considerable increase in the capital of Ireland during the last hundred years; though no one in the least acquainted with the progress of the different parts of the empire, has ever supposed that this increase has borne the proportion either of a third or even a fourth to the increase of capital in England and Scotland during the same period. But the increase of population in Ireland, as compared with its increase in Britain, has been widely different from the increase in the capital of the two countries, or in their means of employing people, supporting them in a state of comfort and respectability. According to the tables given in the Parliamentary reports, the population of Great Britain amounted, in 1720, to 6,955,000, and in 1821 it amounted to 14,391,000, having a little more than doubled in the course of the century; while, from the same reports, it appears that the population of Ireland, whose capital had increased in so inferior a proportion to that of Britain, amounted to very little more than two millions in 1731, and to very near seven millions in 1821; having nearly quadrupled in less time than the population of Britain took to double!" He further says: "All the witnesses examined by the committee of the House of Commons, on 'the employment of the poor of Ireland,' in 1823, concur in representing their numbers as excessive, and their condition as wretched in the extreme. Their cabins, which are of the most miserable description, are utterly unprovided with any thing that can be called furniture. In many families there are no such things as bed clothes. The children, in extensive districts of Munster and the other provinces, have not a single rag to cover their nakedness; and, whenever the potato crop becomes even in a slight degree deficient, the scourge of famine and disease is felt in every corner of the country. The Right Honorable Maurice Fitzgerald, M. P., mentions that 'he had known the peasantry of Kerry quit their houses in search of employment, offering to work for the meanest subsistence that could be obtained, for two pence a day; in short, for any thing that would purchase food enough to keep them alive for the ensuing twenty-four hours.'"

I will read but one line more, and then lay down this useful volume. He says, "that while the average market price of a day's labor in England may be taken at from 20*d.* to 2*s.*, it cannot be taken at more than 5*d.* in Ireland."

These undoubted historical facts are so conclusive to my mind, that I will not attempt to enlarge upon what seems so convincing to the reflecting understanding, further than to say that they first convince us that you are not to judge of the prosperity of a nation by its rapid increase of population; but if capital does not advance side by side with population, misery and poverty will be the inevitable consequence, and that the poor will be the first and most numerous sufferers; that capital advanced in England with its population, and wealth and comfort followed in its train; population rapidly increased in Ireland, whilst capital lagged behind, and misery and wretchedness now scourge that people. Then carry out the President's views, and those of his Secretary; after first destroying the United States Bank, then destroying the State banks, by your bankrupt scheme; destroy capital; destroy credit, which the President says has been carried too far, and should be

H. OF R.]

Sub-Treasury Bill.

[Oct. 12, 1837.]

checked. Do all this, and the poor man sees his fate read in the history of Ireland. Their distresses are great beyond description; their means of support the most scanty; and the Irishman said truly, as he said wittily, that the first mouthful of bread he ever ate was a potato; yes, sir, the potato is his meat and his bread, and often he is without it. Carry out your system, and the cheapest food, which is the potato, will be that which the poor of this country will be forced to live upon. They will not be able to buy a barrel of flour or a barrel of pork.

Bank credit, individual confidence, and the credit system, have been the chief currency of our nation for fifty years. Never has any nation prospered as this nation has in so short a period. But now the President tells us and the people, that the Government must cut loose from the community; that they have been trading on borrowed capital; and have carried the credit system too far. Such language would be ungenerous from that source, if in all respects true. Who did most to adopt measures which brought about these results? You destroyed the United States Bank, and at least tacitly invited the States to fill the vacuum of that institution by making banks of their own. You told these State banks to discount liberally. The people, believing that all was true which you told them, increased their business: the farmer bought more land, the mechanic employed more journeymen. Each went in debt, believing, if your promises of a better currency would be realized, that he could not only meet his liabilities, but enlarge his means. Your promises were not realized; and now he meets with executive denunciation for trusting to that very Executive. Is not this ungenerous? Is it not cruel? It is a very refinement in cruelty, which a fallen angel might envy.

The President, in his message, has written, as I have spoken, about a great many things; among others, he tells us that England has overtraded, and all Europe felt embarrassments as we feel them.

It is often true, (and the President's message proves it,) as Lord Brougham has well said, that philosophers have been led into an error, not uncommon in many of the departments of science, and in none more frequent than in politics—the mistake of the occasion for the cause, and of a collateral effect for a principle of causation. Sir, it is true that there have been, and are, embarrassments in the moneyed arrangements of Europe; but did it originate there? No, sir. I have an interesting pamphlet before me, written very recently, and translated from the French, which I cannot trespass upon the time of the committee to read extracts from. But it shows by the most conclusive demonstration, that the first cause of our distresses was the warfare upon the bank and the currency by General Jackson in this country; that so clearly allied is the whole commercial world with this nation, that embarrassments in this country are felt, and will be, in a greater or less degree, by every Power of Europe with whom we trade. Civilization and commerce have made the human family, so far as trade is concerned, as one people, and you cannot derange the interest of one without affecting the business of all.

This connexion and this dependance have been the result of the credit system, which has been so much denounced, and which has been enlarged upon in the executive message. I have listened to speeches on this floor, in which whole pages of the Gouge plan have been adopted; yes, sir, the whole anti-bank plan. The little States of the Germanic provinces have been alluded to, to show that by individual banks the interest of the people and the nation could be promoted. Sir, statesmen and political economists run into error in receiving the theories of abstract writers. Practical judgment knows how to receive or to eschew maxims of writers which apply to a particular nation in a particular condition. The provinces

of Germany are small; the line of business is defined. Our nation is as yet new, and immensely expansive. What may be wise in a little State in the centre of Europe, may not be wise in a large State in an immense hemisphere.

But I deny that any of the Germanic provinces have gained their wealth or their prosperity by the simple gold money system, by excluding the whole foundations of the credit system. And, in support of this opinion, I will read one sentence from the first volume of Lord Brougham's admirable work on the Colonial Policy of European Nations: "Credit has contributed to the astonishing increase of the Dutch settlements, so much wanted in all other colonies." To sustain this opinion, I will read an extract from Thornton on Paper Credit, showing that paper credit has been a great cause of the prosperity of Holland. He says "the extent of the circulating medium of Holland is deserving of notice. Besides the great circulation of bank notes and receipts, Government paper and bills of exchange, (which latter are without doubt a part of the circulating paper of every trading country, although they circulate more slowly than the other parts,) the system of colonial credit must have always thrown into the market a very large portion of circulating paper." Then, sir, when it is thus shown that the Germanic States and Holland owe their prosperity to the paper system and to credit, they will no longer be quoted against both.

If there is one man on earth who knows when to use the credit system, it is the German, whether he is in Europe or America; because he is a close calculator of number one. If he finds, after making his estimates, that he can easily repay, he will then borrow money at six per cent., when he has convinced his mind that he will make eight, or ten, or twelve, upon its judicious use. They do not want the Executive, or any one else, to tell them how to make their estimates; they are themselves the safest calculators in the world.

Some gentlemen here, from the South, have advocated this measure and the views of the Executive—to destroy the banking system of our country, to disconnect Government from the banks, and to restrain the credit policy of the nation. I have, it is true, travelled much through the South, the West, and the North. I have read much of all, and reflected anxiously on their separate and blended interests; still I do not feel sufficient confidence in myself to dissent too rashly from some of the opinions which I have heard of members, who take, with an air of confidence, the interest of their respective regions of the country under their own protection. I cannot, however, restrain the expression of my doubts that the interest of the South will be promoted by these measures. I honestly believe that there is no part of the Union where capital is in such demand, and credit so much required, as in the South—the cotton-growing regions. It may be true that, in some of the old Southern States—in South Carolina, for instance, where capital is somewhat fixed and established—those who receive large patrimonial possessions, with hands upon them to work them, and money to carry them on, may do well in any vicissitude of our policy, but less advantageously upon the new than the old system. But even that favored portion of the population of the States of the South is comparatively but a small portion. The great mass of the cotton-growers are men who have moderate means, and are forced to extend their credit. They may have a few thousand dollars and a few negroes. After they shall have purchased a plantation, they will find their funds are exhausted, and that they must resort to credit to get their establishment into profitable operation; and this is more especially the case of the Southwestern States. An editor in Mississippi some time ago said that that State did not owe less than ten millions of dollars for negroes; in other words, for laboring capital. Now, require that State to pay ten millions in specie, and you would have to

Oct. 12, 1837.]

Sub-Treasury Bill.

— [H. OF R.]

sell at least one-fourth of the State to make the amount; and that is the most extensive cotton-growing State in the Southern country.

Sir, I maintain that this very productive labor, as it has been called—the slave labor of the South—is strictly and truly more of capital than labor. I could quote Lord Brougham, and the reasoning of Senator Tracy, to sustain the opinion, but I will not read from either; for I have not time to discuss it before this almost exhausted committee, nor is it important for my present purpose. But, to come to the middle, the grain-growing and agricultural States: how few of the number of their inhabitants have been left farms, and utensils, and money, sufficient to carry on the whole of the paraphernalia of farming operations? Nine out of ten have to purchase farms, and to gain credit for their personal property, in order to carry them on with prosperity. “A farm,” says Senator Tracy, “is a real manufactory;” “a field is a real utensil, or, if you please, a store of first materials;” to set it into profitable motion, you must have capital, or credit to gain capital, in order to make it useful or profitable.

But if we were, as it is our duty, to turn our eyes and inquiry farther north, where manufactures and farming go hand in hand together: a manufacturer builds his factory, but finds that his ability will not be sufficient to purchase all of the raw material to be worked up into useful and profitable fabrics. He must either gain credit, or at once dismiss his hands, and abandon his useful enterprise; these hands must work in some other and new employment, for a quarter of a dollar a day, instead of gaining a dollar, if the head of the factory could have obtained credit. Thus, your system will prostrate the man of some capital, and throw out of employment the man who has but a useful trade.

But how can you carry on commerce between man and man without a sound convertible currency, without immense loss to both the consumer and producer? Tracy has truly said that “commerce and society are one and the same thing;” he has said in another place, “commerce is the whole of society, as labor is the whole of riches.” The internal commerce among the States and the people of the States is vastly greater than its foreign commerce, and requires some circulating medium to represent value. There is not gold and silver enough for this purpose: then you are forced to have either a convertible or inconvertible paper currency, or make the productions of labor a currency. You had a convertible paper currency, the best in the world, and the nation was happy and prosperous. You taught the people to be dissatisfied with it, and to aid you in destroying it; and they are now afflicted with an inconvertible depreciating currency. To restore the former prosperity, you must restore the former currency.

You tell the people to banish from use small notes; and your measures force the people to countenance their existence. We had a good currency in Maryland a few years ago. That State prohibited the circulation of notes under five dollars, and I believe but one bank under their charters could issue notes of a less denomination. Public necessity has been made paramount to the law and the policy of the State, and every corporation, and almost every individual in business, feels himself authorized to become a banker, and to fill the State with notes of the fractional parts of a dollar. This was the case in all the States, as now, when the first Bank of the United States was destroyed. I have in my possession a relic of those days—a note of the denomination of “ten cents,” which a friend sent me from Virginia, on the “Farmers, Mechanics, and Merchant’s Bank” of “Charlestown, Jefferson county, Virginia;” issued “November 2d, 1815,” and signed “Wm. Brown, cashier.” I have another precious relic of past days, when there was no United States Bank. It is printed on coarse stiff paper, and designates “No. 27,418” for “fifteen shil-

lings,” “according to an act of the General Assembly of Pennsylvania, passed the thirteenth year of the reign of his Majesty George the Third, dated the first day of October, 1773, signed Thos. Leech, William Criffin, James Stephens;” and on the back of the note is written, “*To counterfeit, is DEATH.*” I am as much opposed to the circulation of small notes, and as much in favor of a sound and abundant specie basis, and specie circulation, as any gentleman on this floor. Hence it is that I am in favor of such measures as will effect that desirable result—measures that have been tried; not the chimerical schemes of fanciful politicians.

From the genius and character of our people, spread as they are from the east many thousand miles west, filling all the intermediate country, of every variety of production, from almost the polar region of the North to the land of the sugar cane and perennial verdure, it is impossible to carry on free interchange and trade, without immense loss to the people, without a better currency than we have at this time. I have no doubt if a United States bank were established, with a capital of thirty or forty millions of dollars, to issue no notes of a less denomination than ten dollars, its notes to be received in payment of Government dues, and the notes of all banks that shall resume specie payments within a given period; that, after a limited period, neither the Government nor the bank should receive notes of any bank that issued notes less than five dollars, and, after a further period, of ten—you would gradually have withdrawn all the small notes; confidence would be restored, and the people would once more see and handle specie. The operation would be gradual, and create no alarm, or embarrassment, or derangement in business. Whatever might be the character of the State banks, they would find it to their interest to conform to these regulations; for the receivability of their notes by the Government and the bank would induce them to call in all their small notes; for those banks could not prosper whose notes would be continually returning upon them as soon as thrown into circulation, as the notes of every bank would that were not received by the Government and the bank and its branches.

At any rate, this is the conclusion to which my mind, after anxious research and reflection, has attained. By such a course we would enable the people gradually to extricate themselves from their difficulties, and the nation, now and in future time, would be benefited.

But we have been told by a distinguished member from Virginia, [Mr. ROBERTSON,] that we are not legislating for posterity, but for ourselves; and that posterity will legislate for itself. This is not the first time that I have heard of the remark being made in a legislative assembly, though not by Thomas Jefferson. But there is authority, and very high authority, for it—the authority of Sir Hugh Boyle Roch. Barrington, in his Personal Sketches, mentions that a debate arose in the Irish House of Commons, on the vote of a grant which was recommended by Sir John Parnell, Chancellor of the Exchequer, as one not likely to be felt burdensome for many years to come. It was observed, in reply, that the House had no just right to load posterity with a weighty debt, for what could in no degree operate to their advantage. Sir Hugh, eager to defend the measures of Government, immediately rose, and, in a few words, put forward the most unanswerable argument which human ingenuity could possibly devise. “What! Mr. Speaker,” said he, “and so we are to beggar ourselves for fear of vexing posterity! Now, I would ask the honorable gentleman, and this still more honorable House, why we should put ourselves out of the way to do any thing for posterity—for what has posterity done for us?”

Sir Hugh perceiving, upon taking his seat, that there were many smiling, and not being conscious that he had said any thing out of the way, concluded that the House had mistaken him. He therefore rose and begged leave to

H. OF R.]

Sub-Treasury Bill.

[Oct. 12, 1837.]

explain, as he apprehended that gentleman had entirely mistaken his words. He assured the House "that by *posterity* he did not at all mean our *ancestors*, but those who were to come *immediately* after them.

Such reasoning may have effect on some minds, but it can have none on mine. That an American Congress shall not shape their measures to benefit posterity, is a sentiment I can never subscribe to. There is an instinct in all animated nature, to protect its offspring. The most timid animal that is not endowed with reason will peril its existence to protect its young. What huntsman has not seen the skittish pheasant change its nature, at times, at his sudden approach, and, crying warning to its affrighted brood, flutter before his footsteps, with its rich plumage expanded, as if to challenge his deadly aim! And what generous huntsman has not paused, in harmless admiration, till the fond mother could make an adroit retreat to its secure brood! Is it possible for the day ever to arrive when the House of Representatives will have become so metamorphosed as to forget all instinct of nature, all duty of reason, as to look singly at the selfish interest of themselves, without consulting their duty to posterity? No, sir, it is not possible; the laws of human nature will never be so changed.

I cannot but allude to a remark made by the gentleman from South Carolina, [Mr. PICKENS.] He expatiated, as the message has, upon the banking system of this country and England, and said that England had overtraded and overbanked.

I could but picture in my mind that the gentleman from South Carolina was in the British House of Commons, addressing that body with the same earnest and impassioned strain to change its policy, to destroy its bank, and to narrow down its credit system to the standard of his judgment. I could fancy to my mind the whole House giving him profound attention, and admiring his eloquence, if they doubted the wisdom of his views; and that, after he had concluded, some veteran statesman would approach him in terms of friendly gratulation, and privately admonish him, before he made another speech on those subjects, that he should lock himself up in an abundant library, and neither give nor receive a visit until he had thoroughly read the entire history of England in relation to the causes of her prosperity; that then he hoped he would be willing to make a speech on the other side, for he would find ample occasion for that change; he would find it was that policy which quickened into usefulness the hidden coal and embedded ore; it was that system which taxed the watercourses to lessen the taxes of the people, which had before flowed on unobstructed from the mountain side to the ocean; it was that system which makes them now, in tribute to industry, leap on the water-wheel, and labor into motion millions of spindles; it is that policy which has built up factories, and made all England one vast and prosperous workshop, and created her wealth, which all the gold of all the mines of South America could not purchase; and has given her power that half the world could not subdue, and has made almost all of it tributary to her.

Another gentleman, in his remarks yesterday, [Mr. HUNTER, of Virginia,] in making a hard-money speech, (and if he will allow me, I will say it was one of the best I have listened to,) wished to demonstrate the evils of the banking system, by referring, in illustration of his position, to the fact that, during the long war in Europe, the French Government adopted the policy of making a run on the Bank of England, whose paper was in circulation on the continent, and consequently the bank had to suspend specie payments. That honorable gentleman is right in his historical fact, but I must differ with him in his conclusion, that the British Government sustained an injury by that bank from this circumstance.

It is true, Mr. Chairman, that the French nation thought that one of the best ways of defeating the British arms was to make an attack upon the means of supply of money to her armies, and did employ Jews to present at the counter of the Bank of England its notes. But did that quick-sighted nation bend to the policy of its enemy, and countenance the discredit of its bank? Did the Government of England, when a run was made on the bank, do as our Government has done—denounce and aid to ruin the bank? No, sir. The ministers at once brought in a bill to invite—yes, sir, to request—the Bank of England to suspend specie payments. Did the Government of England do as our Government has done—refuse to take the notes of the bank? No, sir; in that very bill of 1797 they made the notes a legal tender, and stamped the encouraging seal of the nation upon them, by saying that the Government would take them for public dues. It was a consummate policy, and the sequel proved it; for, although the law was limited to six months, I think it was renewed, from time to time, for some twenty years. Did the notes of that bank depreciate as the notes of our banks have, that have been dishonored by the Government? Read the history of English currency, and you will find that they did not. That policy prevented a panic and sustained credit, and enabled England to contract a debt of twenty five hundred millions, in a war of unprecedented consumption and fury. By preserving credit at home, she gained it abroad; and nothing aided her more than the Bank of England. It was this policy which made her victorious in that war; it was because industry was her capital, and credit her currency.

Mr. Chairman, I have trespassed much longer upon the time of the committee than I had intended; but a dread of the consequences of this measure upon the farmers and mechanics of the district which I represent has induced me, together with the attention which I have received, to claim so large a portion of your time.

I will answer one other remark, whilst up, from my Southern friends, and then hand them over to their constituents. My friend from Virginia [Mr. ROBERTSON] said that he voted for this same scheme in the twenty-third Congress, when General Gordon proposed his "skeleton" of a bill; that, as he went for the "divorce" system then, he will sustain his consistency by going for the bill under debate; and that most of the members of the opposition went for it then. A friend from the Eastern Shore of Virginia [Mr. WISE] has informed the House that he and many others voted for it then, in courtesy to his colleague who had moved it, so as to bring the proposition before the House; but never dreamed for a moment of voting for it on its final passage.

I wish here to say that I was not in my place—from indisposition—when the vote was taken on General Gordon's proposition; but had I been, I would have voted against it.

If my honorable friend is willing to sue out for a "divorce," in order to marry a "skeleton," I should not be, if I were united to the worst shrew in the world. But there is no debating about taste.

If I wished to consult a lawyer of profound legal reading and reflection upon an abstract question in that complex science, the first gentleman in this House that I would approach would be the learned gentleman from Richmond, [Mr. ROBERTSON;] but if I wished to ask advice in selecting "a help meet," I think that he would be the last. I will candidly admit that my friend has more courage than myself. I do not believe that I could screw my courage up to join in wedlock's embrace a skeleton of dry bones. I would have first to see it filled with muscles, flesh and blood, life and animation, fair symmetry and proportion. I must first see the human form and face divine; and then, but not till then, I would venture to—"speak to it."

What assurance can the gentleman have that his skele-

OCT. 12, 1837.]

Sub-Treasury Bill.

[H. OF R.]

ton might not be made by the Secretary, who has to fill up the outlines of the form—a hideous caricature—a monster in human form, afflicted with

"All the ills that flesh is heir to."

"——— all diseases, all maladies,
Of ghastly spasm, or racking torture, qualms
Of heart-sick agony, all feverish kinds—
Convulsions, epilepsies, fierce catarrhs,
Intestine ills and ulcers, colic pangs,
Demoniac phrensy, moping melancholy,
And moon-struck madness, pining atrophy,
Marasmus, and wide wasting pestilence,
Dropsies, and asthmas, and joint-racking rheums?"

The skeleton of the bill before us—for it is but a skeleton—although accompanied with "vaults" and "strong boxes," they are not boxes of ointment—they are but Pandora's boxes, filled with scourges and diseases, without having hope at the bottom, with which the Secretary may afflict with pestiferous evils the body politic on whom you are going to force this unnatural alliance.

But, before I exhaust the patience of this committee and myself, I wish to refer to one historical fact, in hopes that the advocates of this measure may find a moral in it; and in the hope that they may pause and profit by it before they consummate this hasty and ill-judged measure.

At one period of the English history, corporate privileges were as unpopular as they have been made in this country; they were unpopular because abuses existed under them—real, not imaginary; and in none did abuses exist to so great an extent as in the East India Company.

Mr. Fox, who was made Premier, finding that popular feeling existed strongly against the abuses practised under that company's incorporated privileges, and knowing how strong an influence he could wield if he could bring every interest connected with that company to be dependant upon the ministry, conceived the plan, not of remedying the evils, but the bold scheme of annulling their charter, and appointing commissioners with absolute power to conduct the affairs of that company. He brought forward a bill, and predicated it upon a plausible preamble of the good of the company and the good of the people, for its better regulation and theirs. It was not the skeleton of a bill, like this on your table, but full and ample in its parts and in its details. That the committee may judge of its character, I will request the Clerk to read the preamble and the first section:

["A Bill for vesting the affairs of the East India Company in the hands of certain commissioners, for the benefit of the proprietors and the public.

"Whereas disorders of an alarming nature and magnitude have long prevailed, and do still continue and increase, in the management of the territorial possessions, the revenues, and the commerce of this kingdom in the East Indies; by means whereof the prosperity of the natives has been greatly diminished, and the valuable interests of this nation in the said territorial possessions, revenues, and commerce have been materially impaired, and would probably have fallen into utter ruin, if an immediate and fitting remedy were not provided:

"Be it therefore enacted by the King's most excellent Majesty, by and with the advice and consent of the Lords spiritual and temporal, and the Commons, in this present Parliament assembled, and by the authority of the same, That the government and management of the temporal possessions, revenue, and commerce of the united company of merchants of England, trading to the East Indies, by the directors and proprietors of the said company, or either of them; and all and singular the powers and authorities of the said directors and proprietors, or of any special or general or other court thereof, in the ordering and managing the said possessions, revenues, and commerce; and all elections of the directors of the said company be, and are hereby, declared to be discontinued for and during the con-

tinuance of this act, any charter, usage, law, or statute to the contrary notwithstanding."]

The section which you have heard is sufficient for my purpose.

"Ex uno disce omnes."

For the public good he was for seizing upon its chartered rights and its revenues, making it dependant upon the executive will. Under a tide of strong popular feeling, he carried his bill through one House with an immense majority. His bosom glowed with triumph, and he fancied himself secure in his place.

The public mind passed, and judgment had time to counsel its feeling. The people began to reflect upon the consequences of the measure. They saw if that company was to be destroyed, its charter taken from it, and all control placed in the hands of a few, it might be the case of all other institutions; every chartered privilege might be taken the same way, and, finally, all power in the nation might be exercised by the Executive, or surrendered to it by a subservient Parliament. They soon drew a distinction between remedying and destroying; and, by the force of a change in the popular mind, the bill was lost in the other House, and Mr. Fox was no longer minister.

What was the great Fox's fate may be the fate of others. Let others, therefore, take warning by the lessons of history.

Our institutions are too firmly implanted in our general system, they have taken too deep root in the business and well-being of society, property is too much valued and too equally divided by the laws of our States and the laws of industrious gain, for the people to throw all things into hotch-potch and form a common stock, or ever to induce them to sustain such measures, or measures which lead to such results. The golden bawble will not now even amuse much less captivate, sober, well-thinking men. You cannot even entice children with it.

You may, in a few congressional districts, still hold out the delusion to the people, but be assured they will be but few. There is one district north of "Mason and Dixon's line" in which it may succeed—a district represented on this floor by a gentleman who defeated one of the most intelligent and amiable gentleman I have ever known, by telling his constituents enormous witch stories—stories as miraculous as were ever told by the famous "witch king" who figured in the north of England some three centuries ago. But he finally was drowned, and as I know that there are mill-ponds in that gentleman's district, more than six feet deep, I beg the member to keep a look out.

Sir, since the days of Isaac of Cyprus, no man has been pleased to have golden fetters placed upon him. Hume informs us, that after his treasures were seized upon by Richard the First, and the prince incarcerated and bound in irons, he complained of the cruelty of his conqueror. Richard had the iron fetters taken off, and golden ones placed on in their stead. The Cypriot, pleased with this distinction, expressed his gratitude for the generosity of his conqueror.

The people have been restrained in their business by golden fetters, which the executive brain has forged; they want them thrown off, so that they may have elbow-room to prosecute their industry as formerly.

I ask, I beseech, this House to pause in its course before it sanctions such a ruinous measure.

I appeal to the candid of all parties, whether conservatives, administration men, or whigs, to let us cease this "triangular fight," and unite in defeating this measure. If we have differed as widely as the poles on other questions, let us unite in defeating this. Let us say, in the language of another, "Like men we differed, but like men we have agreed." I had rather see the pet bank plan new vamped and tried again.

If you will not reject this bill, or will not lay it on the

H. of R.]

Sub-Treasury Bill.

[Oct. 12, 1837.]

table never to be called up again, and are resolved to pass it, let the worst come to the worst quickly; and the people, who will suffer, will soon show that they have power as well as the Executive and the two Houses of Congress; and that the constitution has informed them how they can remedy their grievances.

But I hope it will be rejected, and that the Executive will do as the Kings of England and of France are forced to do in like cases—change his ministers and his measures. Or, if he will not change his advisers, at least change his measures. Or, if he will not change his measures or his advisers, then, as a republican President, in practice, finding himself in a minority in either House, and that he and his ministers will not alter their views of the constitution and the policy of the nation, they will resign the seals of office to the people, and say to them, elect other agents; we come down from our high places, that other, and abler, and better men may ascend.

Or, are the lines of the philosophic poet true?

"The age of virtuous politics is past!
And we are deep in that of cold pretence;
Rulers are grown too shrewd to be sincere—
And we—too wise to trust them!"

Mr. JOHNSON having concluded,

Mr. LEGARE moved that the committee rise, but was solicited to withdraw it by

Mr. DAWSON, of Georgia, who wished to offer an amendment; but that gentleman having explained, the motion was still insisted on.

Mr. CAMBRELENG hoped the committee would not rise.

The vote was taken by tellers, and decided in the negative: Ayes 75, noes 93.

So the committee refused to rise.

The question was then put on the substitute for the bill moved by Mr. GARLAND, of Virginia, (proposing to continue the deposits in such banks as should resume specie payments, &c.; when it was rejected: Ayes 73, noes 90.

Mr. CAMBRELENG now moved that the committee rise, and report the bill.

Mr. DAWSON now offered his amendment, which was the following substitute for the bill:

Strike out the whole bill and insert as follows:

Sec. 1. That it shall be the duty of the Secretary of the Treasury to select, as soon as practicable, and employ as the special depositories of the money of the United States, such of the banks incorporated by the several States, by Congress for the District of Columbia, or by the Legislative Councils of the several Territories, as may be located at, adjacent, or convenient to the points or places at which the revenues may be collected or disbursed; and in those States, Territories, or Districts where there are no bank or banks, and within which the public collections or disbursements require a depository, the said Secretary may make arrangements with a bank or banks in some other State, Territory, or District adjacent, to establish an agency or agencies in the States, Territories, or Districts so destitute of banks, as banks of such special deposite, and to receive through such agencies such special deposits of the public money as may be directed to be made at the points designated, and to make such disbursements as the public service may require at those points: the duties and liabilities of every such bank thus establishing any such agency to be the same, in respect to its agency, as are the duties and liabilities of said banks of special deposite generally under the provisions of this act: *Provided*, That at least one bank shall be selected in each State, Territory, or District where the collection or disbursements of the public money may require, if any can be found in such State, Territory, or District, willing to be employed as the special depository of the public money upon the terms and conditions prescribed by this act, and shall continue to conform thereto; and that the Secretary of the Treasury shall not

suffer to remain in any deposite bank an amount of public moneys more than equal to three-fourths of the amount of its capital stock actually paid in, for a longer time than may be necessary to enable him to make transfers of the same, as required by this act; and the banks so selected as the special depositories shall, in his opinion, be safe depositories of the public moneys, and shall continue to do and perform the several duties and services and to conform to the several conditions prescribed by this act.

Sec. 2. *And be it further enacted*, That if at any point or place at which the public revenue may be collected or disbursed, there shall be no bank located, or none there located which, in the opinion of the Secretary of the Treasury, is in a safe condition, or where all the banks at such point or place shall fail or refuse to be employed as special depositories of the public money of the United States, or to comply with the conditions of this act, or where such banks shall not have sufficient capital to become the special depositories of the whole amount of public moneys collected or disbursed at such point or place, he may and shall order and direct the public moneys collected or deposited for disbursement at such point or place to be deposited in some other bank or banks in the same State, Territory, or District, or in some one or more of the States, Territories, or Districts adjacent, upon the same terms and conditions: *Provided*, That nothing herein contained shall be so construed as to prevent Congress at any time from passing any law for the removal of the public moneys from any or all of said banks, or from changing the terms of deposite; or to prevent the said banks, or any of them, at any time from declining any longer to be the depositories of the public moneys, on hand, according to the terms of agreement with the Secretary of the Treasury.

Sec. 3. *And be it further enacted*, That no bank shall hereafter be employed as a special depository of public money until such bank shall have first furnished the Secretary of the Treasury with a satisfactory statement of its condition and business, a list of its directors, the current price of its stock, a copy of its charter, and all such other information as may be necessary to enable him to judge of the safety of its condition.

Sec. 4. *And be it further enacted*, That said banks, before they shall be employed as the special depositories of the public moneys, shall agree to receive and keep the same safely, upon the following terms and conditions, to wit:

First. Each bank shall receive, as special deposits, all moneys of the United States paid into the same, and the same keep as a special deposite, and as specie, to the credit of the United States, and not use or bank upon the same.

Secondly. Each bank shall furnish to the Secretary of the Treasury, from time to time, and as often as he may require, not exceeding once a week, statements setting forth its condition and business, as hereinbefore prescribed, except that such statements need not, unless required by the Secretary, contain a list of directors or copy of the charter. And the said banks shall, respectively, furnish to the Secretary of the Treasury and the Treasurer of the United States a weekly statement of the condition of his account from their books; and the Secretary of the Treasury shall have the right, by himself or an agent appointed for that purpose, to inspect such general accounts in the books of the bank as shall relate to said statements: *Provided*, This shall not be construed to imply a right to inspect the account of any private individual or individuals with the bank.

Thirdly. To credit as specie all sums deposited therein to the credit of the Treasurer of the United States, except such as may be deposited in Treasury notes, or such other notes or scrip as Congress has or may hereafter specially direct to be received in payment of the public dues, not

Oct. 13, 1837.]

Losses in Florida Campaigns.

[H. OF R.]

being bank notes, and to pay all checks, drafts, or warrants drawn on such deposits in specie, if required by the holder thereof.

Fourthly. To give, whenever required by the Secretary of the Treasury, the necessary facilities for transferring the public funds from place to place, within the United States, and the Territories thereof, and for distributing the same in payment to the public creditors.

Fifthly. To render to the Government of the United States all the duties and services heretofore required by law to be performed by the late Bank of the United States and its branches.

Sec. 5. *And be it further enacted,* That the Secretary of the Treasury shall be, and he is hereby, authorized and required, whenever, in his judgment, it may be necessary or proper, to require of any bank so selected or employed as a special depository of the public money, collateral or additional securities for the safe-keeping of the public moneys deposited therein, and the faithful performance of the duties imposed on them.

Sec. 6. *And be it further enacted,* That the Secretary of the Treasury shall, in each case, take from the banks which shall agree to receive the deposits of the public moneys, bonds with good and sufficient sureties, containing conditions for insuring the faithful performance of all the duties required by law, and for the proper enforcement of the same.

Sec. 7. *And be it further enacted,* That no bank which has been so selected and employed as the place of deposit of the public moneys, shall be discontinued as such depository, or the public money withdrawn therefrom, except for causes hereinafter mentioned; that is to say, if, at any time, any one of said banks shall fail or refuse to perform any of said duties as prescribed by this act, and stipulated to be performed in its contract; or shall fail to keep in its vaults, at any time, such an amount of specie as shall be required by the Secretary of the Treasury, and shall be, in his opinion, necessary to render the said bank a safe depository of the public moneys, having a due regard to the nature of the business transacted by said bank; or shall fail to keep separate, and as a special deposit, the moneys deposited therein to the credit of the United States; or fail to pay the same when demanded by the holder of any draft, check, or warrant, in specie, when there is on deposit to the credit of the United States sufficient specie therefor; in any and every such case, it shall be the duty of the Secretary of the Treasury to discontinue any such bank as a depository, and withdraw from it the public moneys on deposit in it at the time of such discontinuance. And in case of such discontinuance, it shall be the duty of the Secretary to report to Congress immediately, if Congress be then in session, and, if not in session, then at the commencement of its next session, the facts and reasons which have induced such discontinuance. And, in case of the discontinuance of any such bank as a place of deposit of the public money, for any of the causes hereinafter provided, it shall be lawful for the Secretary of the Treasury to deposit the money thus withdrawn in some other bank of special deposit already selected, or to select some other bank as a place of special deposit, upon the terms and conditions prescribed by this act. And, in default of any bank to receive said special deposits, the money thus withdrawn shall be kept by the Treasurer of the United States, according to the laws now in force, and shall be subject to be disbursed according to law.

Sec. 8. *And be it further enacted,* That the Secretary of the Treasury is authorized and required to fix, in his contract with the said banks, respectively, which may be selected as the special depositories of the public moneys, such a compensation as he may judge reasonable, for the services required to be performed by this act, provided the rate of such compensation shall in no case exceed — per cent. on the public moneys so deposited.

VOL. XIV.—96

Sec. 9. *And be it further enacted,* That it shall be the duty of the Secretary of the Treasury to lay before Congress, at the commencement of each annual session, a statement of the number and names of the banks employed as special depositories of the public moneys; of the terms upon which each is employed; and of their condition, and the amount of the public moneys deposited in each, as shown by their returns at the Treasury. And if the selection of any bank as a special depository of the public moneys be made by the Secretary while Congress is in session, he shall immediately report the name and condition of said bank, and the terms on which it is employed, to Congress; and if such selection is made during the recess of Congress, he shall report the same to Congress the first week of its next session.

Mr. CUSHING, of Massachusetts, moved that the committee rise, (with the desire, as he said, that Mr. LE GARE, who had first made the motion, should be considered as entitled to the floor when the committee should resume its sittings,) and the motion prevailed: Ayes 98, noes 89.

So the committee rose, and reported progress; and, at about 9 o'clock P. M., the House adjourned.

FRIDAY, OCTOBER 12.

REMUNERATION FOR LOSSES IN THE FLORIDA CAMPAIGNS.

On motion of Mr. WHITTLESEY, chairman of the Committee of Claims, the House took up the bill reported by that committee, to amend the bill making provision for the remuneration of volunteers and others, for horses, &c., lost in the military service of the United States.

[The Committee of Claims accompanied this bill with a report, stating

“That several claims are presented to the committee, arising from the horses and saddles, and other equipage of disbanded mounted volunteers, having been turned over to the United States, by the order of General Jesup, as it is alleged, when said volunteers were dismissed from the service.

“It is represented to the committee by Colonel King, acting adjutant to Colonel Caulfield's regiment of Alabama mounted volunteers in Florida, that most of the claimants with whom he is acquainted are young men who obtained their horses and equipage on credit, and that they are obliged to look to the United States for the value of the property to enable them to make payment to the persons of whom they purchased. Most, if not all, of the claimants were sick at the time they were dismissed, or left the service on furlough; and it was thought best by General Jesup that they should return home by water, rather than encounter the fatigue, hardships, and danger of returning home by land. The committee, at the last session of Congress, reported a bill for the relief of James L. Kenner, whose horse was turned over to the United States by the order of the commanding officer, on the discharge of said Kenner by reason of sickness.

“The committee refer to that report in the first volume of Reports, No. 3. The number of claims that will be embraced under a general law, Colonel King thinks may be one hundred. It appears to the committee it is expedient to provide for this class of cases by a general law.”]

The House having resolved itself into a Committee of the Whole on this bill, (Mr. BRIGGS in the chair,)

Mr. CARTER said he was not opposed to the bill now under consideration, except that its provisions were not sufficiently extensive. It did not embrace a class of cases of real hardship that he believed existed. He said he would take this occasion to bring to the notice of the committee, and at the same time suggest to the honorable chairman of the Committee of Claims, that there were among the volunteers some cases of real and peculiar hardships, that were

H. OF R.]

Losses in Florida Campaigns.

[Oct. 13, 1837.]

not yet provided for by law, although great exertions were made at the last Congress in their behalf; and he would now tender to the honorable chairman of the Committee of Claims his acknowledgments of gratitude for his assiduity and exertions favorable to the relief of those patriotic young men he had the honor to represent, and who had sustained losses in the service of their country.

Mr. Chairman, in my opinion, the Government should always be scrupulously careful never to permit the patriotism of her citizens to be rewarded with ingratitude and with losses, and, consequently, with embarrassments that may render their domestic peace and tranquillity precarious for years. Sir, it is not the aristocracy or the wealthy that most usually embark in the toils and dangers attendant on a campaign in times of troubles and of war; but, sir, real patriotism and love of country, in its most disinterested form, is always found with those whose circumstances are more humble—not humble in the common acceptance of the term, but only humble so far as wealth is concerned. These are the men who are always first in the field in defence of their country's rights and honor. In the late campaigns in the West, many of such men were volunteers; and many were they who had not the means of equipping themselves, furnishing their horses, &c., only upon time, and by the aid and endorsements of their friends. Now, I submit it to this House—I submit it particularly to the Committee of Claims, and to the country—whether such men as these are to be permitted to be the sufferers, on account of their manifested patriotism and risks in the service? If so, I say to all that such conduct, such ingratitude, will deter all men in humble circumstances, or who are poor, from engaging in the country's defence.

The provisions of the laws now in force, for the payment for lost property, are limited, and do not cover the cases of hardship to which I have allusion. Those laws merely provide payment for property lost in battle, or lost on account of the Government failing to furnish the necessary supplies of provender. But, sir, there are other cases for which Congress is in honor and duty bound to make ample remuneration. I know some volunteers that involved themselves, and their friends with them, to purchase horses and other necessary equipage for the campaign, and who lost their horses in the service; but perhaps not in battle, nor for the want of forage. Therefore, by the laws now in force, their claims cannot be recognised and paid by the Third Auditor, who is charged with the settlement of these claims. But, sir, these horses were lost by casualty or unavoidable accidents, and were lost in the service of the United States; and being so lost, the Government is as much bound, in honor and justice, to remunerate the soldier thus circumstanced, as though the loss had occurred in battle, or by the default of the United States in furnishing forage. Sir, some of these praiseworthy volunteers are now doomed to labor by the day, or the month, or by the year, to procure the money they owe for horses purchased and taken into the public service, and there lost by casualty; and thus far the Congress of the United States, who directed the Executive to invite them into service, have wholly failed to meet their distresses, by not ordering their relief, and indemnifying them against these liabilities and these losses. Is this right, sir? I say most unequivocally it is not; and I say, further, let the Government continue to refuse payment, and you cast a damp upon the patriotism of the West, and upon the whole country, which will, in all time to come, deter, in a great degree, men in moderate circumstances from incurring monetary liabilities, to go to the field, at the call of the Government, for her defence. And whenever you cut off that class, by your parsimony and rigid policy, you cut off that portion of the defence of the country that has never deceived you, and has never lent a deaf ear to your calls, and the distresses of the country.

Sir, I will take occasion to say here that, in my opinion, (if the reports be true that have reached my ears,) the Government has not dealt as kindly and as liberally as she should have done towards the volunteers of Tennessee. We provided by law at the last Congress, that the soldiers or volunteers who had rendezvoused, were mustered, and immediately discharged, should be paid one month's full pay; and, by the estimates furnished the Committee of Claims by the War Department, one month's full pay was made to amount to between \$65 and \$70, I think, perhaps \$68 and some cents; and, by the decision of the Attorney General under the old law, another class of those volunteers, that were indefinitely furloughed, and required to return to service if they should be ordered to do so, were to be considered in service until absolutely discharged, and consequently were entitled to their full pay. I have heard some hints, sir, that the War Department has not carried into effect this law, and this decision, as was contemplated by Congress and those representatives who were looked to to guard and sustain the rights of those particular individuals. I do not know, sir, how far the War Department has failed in a compliance with the law; nor have I any idea as to what extent those volunteers have been injured by the defalcations of the Government. But I hope, and I have no doubt, I will be able to obtain the information; and, if my fears are realized, and they have been defrauded out of any portion of the amount that Congress intended they should have, and I cannot obtain redress by an application to the Secretary of War, I will feel myself bound to bring the subject again to the consideration of this House, believing that the representatives of the people are ready upon all occasions to do justice to the people. And I am glad now to have the assurance of the honorable chairman of the Committee of Claims that he will afford all the aid in his power to render to the volunteers of my State ample compensation for their service and their losses at the next meeting of Congress. I have also a right to complain, on behalf of these men, in another point of view. I am informed our volunteers were paid off in the depreciated bank paper that was perhaps ten or fifteen per cent. below par. If this be true, and my former suggestions be true, that they have not been paid as much as Congress intended them to have, why, sir, your volunteer soldiery of Tennessee have been cheated and defrauded out of half, or at least a large portion, of their just dues. And if so, we must ask Congress hereafter, whenever the true state of facts can be ascertained, to grant such relief as the merits of those claimants may justly and honestly demand. And I have no doubt, from the disposition heretofore manifested by this House, and by the Committee of Claims, in relation to this deserving and meritorious class of claimants, that ample relief will be awarded them.

Mr. WHITTLESEY explained the grounds on which the Committee of Claims had reported the bill; and after a few remarks by Mr. CHAPMAN,

Mr. EWING offered an amendment extending the provisions of the bill to all persons engaged in the service at the battle of Tippecanoe, and prior to the late war with Great Britain.

After some few remarks by Mr. CARTER, the amendment was rejected.

Mr. THOMPSON moved to add a section to the bill providing payment for all horses impressed into the service in Florida.

After a few remarks by Messrs. THOMPSON, WHITTLESEY, and CLARK, the amendment was rejected.

On motion of Mr. WHITTLESEY, the committee then rose and reported the bill to the House.

The SPEAKER having resumed the Chair, and the question being on the engrossment of the bill,

Mr. EWING, after some remarks, renewed the amendment he had submitted in the Committee of the Whole,

Oct. 13, 1837.]

District Banks—Sub-Treasury Bill.

[H. OF R.]

and called for the yeas and nays on the question; which were not ordered.

After a few words by Messrs. PETRIKIN, WHITLESEY, and EWING, the amendment was rejected.

Mr. EWING then varied his amendment somewhat, and moved it again; but the CHAIR ruled it to be out of order.

Mr. THOMPSON then renewed his amendment made in Committee of the Whole.

Mr. CARTER called for the yeas and nays, but the House refused to order them, and the amendment was rejected.

Mr. PETRIKIN moved that the further consideration of the bill be postponed until the first Monday in December next; lost.

The bill then, having been ordered to be engrossed, was read a third time and passed.

The House then proceeded to the orders of the day.

THE CURRENCY OF THE DISTRICT.

The Senate bill, restraining the circulation of small notes in the District of Columbia, came up, and was read twice. The question on its reference pending,

Mr. PATTON moved its reference to the Committee for the District of Columbia.

Mr. THOMPSON moved its postponement until the first Monday in December next.

Mr. THOMAS suggested the Committee on the Judiciary.

Mr. BOULDIN was in favor of the motion of Mr. PATTON. He was sure the Committee for the District would give the subject proper attention.

Mr. ADAMS was in favor of the postponement. And he hoped that if it were referred to the Committee for the District of Columbia, that committee would report that it was expedient to postpone it. After all the mass of legislation in the great State of New York, against such a circulation, it was still in full currency there, and it became Congress to pause before they adopted any such measure.

Mr. HARLAN moved that the whole subject lie on the table; which, being a question entitled to precedence, was entertained and carried.

THE SUB-TREASURY BILL.

On motion of Mr. CAMBRELENG, the House then went into Committee of the Whole, and resumed the consideration of the Senate bill imposing additional duties on certain officers.

Mr. DAWSON's amendment, providing that State banks be used as places of special deposit for the revenue, being immediately under consideration,

Mr. LEGARE rose and addressed the chair as follows:

Mr. Chairman: I do not know how I can more appropriately begin the remarks I am about to make, than in the very words with which a most able English writer, addressing himself to the causes and character of the recent crisis, concludes his: "The events (says Mr. Samuel Jones Lloyd, in a pamphlet published last spring) which have occurred in connexion with the late pressure upon the moneyed and mercantile interests, are full of instructive illustrations of the effects, both beneficial and otherwise, of our present system; and the evil consequences of this pressure will be as nothing, compared with its benefits; if, amongst these, we shall be enabled to reckon an increased degree of intelligence upon subjects connected with currency, and a nearer approximation to sound principles in the management of our paper issues." The revulsion, it is true, has been far more disastrous on this side of the Atlantic than in England; and yet even at its darkest period—now, as I confidently believe, passed away to give place to returning prosperity—I found consolation in the idea, that dearly as we were buying our experience in this important matter, the price would not be too high for the benefits we should

ultimately derive from our reverses. A national visitation ought to be considered as a great providential lesson. It teaches the most momentous truths, and it teaches them in the most impressive manner, and what we have recently seen and felt will dispose us—if any thing can dispose us—to look the difficulties with which this subject is surrounded fairly in the face.

Sir, it is surrounded with difficulties. Even in England, as you perceive from the citation I have just made, they are felt and acknowledged by the most able men. I have upon my desk many other proofs of the same fact. They abound, for instance, in the minutes of evidence taken before the committee of the House of Commons on the renewal of the charter of the Bank of England, in 1832. You will find there, that while high authorities agree in thinking that there should be but one bank of issue for the capital, at least, if not for the whole country, the representatives of the great commercial and manufacturing interests, on the contrary, protest against the continuance of a monopoly to which they impute the most sinister influence over their immense business,† and demand a system of joint-stock banks, regulated by principles more agreeable, as they contend, to the course and policy of trade. A third party insists upon the necessity of compelling all banks of issue to give adequate security to the public, (in Government stock, &c.) for the redemption of their issues;‡ while every stockholder or partner shall continue to be, as at present, responsible for all the debts of the company, to the whole amount of his private fortune. A fourth (and I have received from London a little volume in which that opinion is most plausibly maintained) urges the most unlimited freedom in banking; and sees no more danger to society from perfect liberty in this than in any other branch of business; the supplying, for example, the market of a great capital with the necessities of life.§ In this complexity and distraction of English opinion upon this subject, however, all parties agree in one thing, and that is, in adhering to the paper system. Nobody there thinks of any thing so extravagant as the overthrow of that system, whatever defects may be seen or supposed to exist in it, or whatever projects may have been imagined to purify, to correct, and to improve it.

But if such is the state of English opinion in regard to this subject, how must it be with us, when to all the intrinsic difficulties of the thing itself, we add those arising out of the complicated structure of our political institutions! It would be hard enough to say what ought to be done, in the present emergency, were this a simple consolidated Government; but how much harder is it to advise the administration of a Federal Government as to the course it ought to pursue, where one happens to doubt its possessing all the power necessary to give complete relief, without a co-operation of others? For, sir, at the risk of being set down in that category of "tiny politicians," of whom the gentleman from Maryland, [Mr. W. C. JOHNSON,] in a very amusing speech, in the course of which, however, he uttered some grave and important truths, spoke last night with such profound contempt, I must confess I agree with the Executive in the general principles of constitutional law involved in the message. In the divisions of the attributes of sovereignty between this Government and the States, it may and must happen, that we should experience sometimes a chasm, and sometimes a conflict of powers. More is taken from the States, perhaps, than has been

* Messrs. Horsley, Palmer, Tooke, Rothchilds, &c.

† Messrs. Burt, Smith, and Dyer, of Manchester. It is worthy of remark, that these remonstrances were admitted to be well founded by the change which, in consequence of them, was made in the law, in reference to joint-stock banks beyond 55 miles from London.

Sub-Treasury Bill.

[Oct. 13, 1837.]

given to the confederacy; neither can do enough, while each can do too much, for perfect harmony; defects, discrepancies, and contradictions, exist in the scheme itself, detected only in a long course of practice, and which nothing but practical skill, the wisdom called for and called forth in the management of great affairs, especially political affairs, can reconcile and rectify. Undoubtedly the task is an immensely difficult one—but it must be undertaken and it must be done. The subject before the committee is an example of the high and difficult duties I refer to; nor can I imagine an occasion better fitted than this to awaken the House to a lively sense of its infinite responsibilities to the country.

Judge, then, sir, with what deep disappointment and regret, I learned that the bill on the table was to be pressed upon us at this short session. It is quite enough for me, that it proposes a great innovation upon the whole course of the Government, from its foundation up to the present moment, and upon all the habits of our people. They who see deeper or clearer into such matters than I do, must pardon me for declaring that I cannot conscientiously vote for the measure in such haste. If I had no positive objections to it, it would be quite enough for me, that I have not had sufficient time to reflect on it. During this extraordinary session, (for so it has been in every sense of the word,) fatigued, harassed, exhausted, by incessant attendance, by night and by day, in this hall, it has not been in my power to inform myself on any subject as I could have wished to be able to do. I have had absolutely no time for minute research, hardly a few hours for calm reflection. Under such circumstances, I cannot vote for the bill. I must go home to my constituents and talk with them. Many, perhaps most of them, understand these matters better than I do; but when I left them, although this subject had been discussed, and ably discussed, here and there, by an individual or two, public attention had not been awakened to it; and nothing like an opinion—certainly no opinion favorable to the principle of the bill—had been formed in regard to it.

And here, sir, I might take my seat again, if I had risen only to explain my own vote, or to influence those of others, on the proposed measure. But the true issue seems to me very far to transcend, in importance, that single measure, important as it unquestionably is. It involves, in my opinion, the whole credit system of the country. I do not say that the bill on your table presents that issue, still less that the Executive message presented it, or propounded any principle or opinion that should lead to it. But no one who has watched the progress of this discussion, in this House or in the Senate—in or out of this Capitol—will deny that it must soon come to that. Sir, if there is any truth, at all, in what has been urged with great ability and all the zeal, I had almost said the fanaticism, of the deepest conviction, by men accustomed to influence, nay, even to control public opinion in different parts of this country—if they have any idea of rigorously carrying out the principles they profess, to their logical consequences, in practice—if what they say in the highest places, on the most solemn occasions, is not such idle declamation as such men are not to be suspected of—they mean that, and nothing short of that. Doctrines have been uttered, with all the authority which can be imparted to paradox from talent ripened by experience, which seem to me inconsistent with the constitution, not only of American, but of all modern society, with its whole spirit and tendency—with all its wants and all its ways. I have, sometimes, in the course of the debates, looked around me to see where I really was—whether the shade of some old lawgiver, some Minos or Lycurgus, had not been evoked, to bring a degenerate age back to the stern principles of Dorian polity, to an agrarian equality of property, to iron money and black broth; or else, if it were not the spirit of Benedict

or Bernard, returned to the holy solitudes of Monte Cassino, or Cluni, or Cîteaux, to preach to a world lost in vanity and pleasure the blessings of poverty and mortifications of the flesh. Now, sir, it may be true that luxury, according to the old saw, is the ruin of States, and that sumptuary and agrarian laws are necessary to maintain your true Spartan discipline. But I am excessively disinclined to try any such experiment upon my constituents; at least without receiving an express instruction, to that effect, from them. I am afraid they have no taste for black broth; that Spartan discipline will be irksome, and even revolting to them. In short, sir, I have reason to believe, that, without being as deeply imbued, perhaps, as other people are, with the spirit of the age, they do still partake too much of it, to be willing to forego the many agreeable objects that principally engage and excite it.

Sir, I am far from denying that, in the eyes of a stern reformer, with opinions of a certain complexion, this generation is a perverse and crooked one. We love money, I admit, as much as men ever did—certainly as much as they did in the Augustan age, nearly two thousand years ago. The committee will excuse my quoting a very common piece of Latin to prove it, after the example of other gentlemen in this debate.

*Querenda pecunia primum est;
Virtus post nummos—Hæc Janus summus ab imo
Prodocet.*

Make money by all means, and before all things. Washington street certifies it to Wall street, and Wall street declares it to Broadway, and Broadway proclaims it to Chesnut street, and Chesnut street publishes it to the whole country. We have the same strong thirst for gold which has unhappily afflicted mankind in other times, and especially in very civilized ages; and the only difference is, that we have learned how to acquire, by honest means, a thousand times more of it. I will add, however, in justice to the age, that it has made a great discovery in social philosophy. We have found out that—what I would call physical civilization—a demand for the conveniences and accommodations of life, and an abundant supply of them is, and must be, the basis of all other civilization, that is intended to be high, solid, and lasting. Every real improvement in the condition of mankind springs out of, or leads to, the elevating of the standard of comfort among a people. Sir, this is the grand work—the mission—of modern commerce, which, in my opinion, is just beginning to develop its mighty resources—to pour out the inexhaustible fulness of its treasures, and its blessings. A great revolution is taking place, has taken place, in human affairs. War is every day becoming a more remote contingency. I do not say an impossibility. I know human nature too well for that. I am fully aware, too, how many disturbing causes, growing out of the history of the past, still exist to prevent the realizing, all at once, of the great end of Christian civilization, the dream of Henry IV, and of Sully—the union of all nations in a state of peace under the protection of law. I know, especially, what is to be dreaded in this respect, from that dark power that hovers over the confines of Europe and Asia, and throws its vast shadows over both. But during my last residence of four years abroad, I saw sufficient grounds of quarrel, to have led, under the old order of things, to twenty wars, as spreading and bloody as the thirty years' war, or the seven years' war—and yet these threatening differences passed harmlessly away; cloud after cloud dissolved as they rose above the horizon, leaving the sky more serene than before. Sir, it is a favorite phrase of those who boast of what is called the "march of intellect," that things are thus changed because the "schoolmaster is abroad." But I tell you something far more effective than the schoolmaster, a mightier than Solomon, is abroad. It is the steam-engine, in its twofold capacity of a means of production

Oct. 13, 1837.]

Sub-Treasury Bill.

[H. of R.]

and a means of transport—the most powerful instrument by far of pacification and commerce, and therefore of improvement and happiness, that the world has ever seen; which, while it increases capital, and multiplies beyond imagination the products of industry, brings the most distant people into contract with one another—breaks down the barriers which exclusive legislation would oppose to the freedom of mercantile exchanges—effaces all peculiarities of national character, and promises, at no distant period, to make the whole Christian world, at least, one great family. Sir, the social effects of this great instrument of modern improvement, have been singularly promoted by a branch of industry in which the part of the country I have the honor to represent is most deeply interested; and I will avail myself of this occasion to call the attention of the committee to a view of our Southern institutions, that may not have occurred to it before, or made the impression it ought to make upon it. I beg you, sir, to believe that I do not speak in what is called a “sectional” spirit; for I protest before God that nothing can be further from my heart. But let not those whose minds have been recently so much inflamed against what they consider as the abomination of domestic servitude, shut their eyes to the truth. Sir, I allude to the cultivation of cotton, and its effects, through the commerce it fosters, upon the condition of society. Whoever shall write the political history of that invaluable plant, will have a more important work to perform than has ever fallen to the lot of a biographer of statesmen or philosophers. I will venture to say, without going more into details, that the single circumstance of bringing the wonderfully cheap fabrics produced by modern machinery within the reach of even the humblest of the laboring classes, of substituting decent and comfortable raiment for the few scanty and filthy rags—the squalid exterior, which makes poverty not only more painful, but at once more humiliating and degrading to its victim, and more disgusting to others than it ought to be, will signally contribute to elevate the condition of the poor in the social scale, to raise their self-esteem, and to increase the sympathy of others for them: in a word, to make them feel themselves men, entitled to a place among men; not pariahs and outcasts, whose contact is contamination. A people well clad and well housed will be sure to provide themselves with all the other comforts of life; and it is the diffusion of these comforts, and the growing taste for them among all classes of society in Europe—it is the desire of riches, as it is commonly called, that is gradually putting an end to the destructive and bloody game of war, and reserving all the resources hitherto wasted by it, for enterprises of industry and commerce, prosecuted with the fiery spirit which once vented itself in scenes of peril and carnage.

But, sir, the result of all this is that very inequality of wealth, that accumulation of vast masses of it in a few hands, against which we have heard so much said lately, as if it was something inconsistent with the liberties, the happiness, and the moral and intellectual improvement of mankind. Gigantic fortunes are acquired by a few years of prosperous commerce—mechanics and manufacturers rival and surpass the princes of the earth in opulence and splendor. The face of Europe is changed by this active industry, working with such mighty instruments, on so great a scale. I have travelled in parts of the continent which the spirit of gain, with its usual concomitants, industry and improvement, has invaded since the peace, at an interval of fifteen years, and been struck with the revolution that is going on.

There is a singularly beautiful, though rather barren tract of country between Liège and Spa, where, in 1819, my attention had been principally attracted by the striking features of a mountainous region, with here and there a ruin of the feudal past, and here and there a hovel of some poor

hind; the very haunt of the “Wild Boar of the Ardennes,” (See *Quentin Durward*) in the good old times of the House of Burgundy. I returned to it in 1835, and saw it covered with mills and factories, begrimed with the smoke and soot of steam-engines; its romantic beauty deformed, its sylvan solitudes disturbed and desecrated by the sounds of active industry, and the busy hum of men. I asked what had brought about so great a change, and found the author of it—a man having a more numerous band of retainers and dependants than any baron bold of the fourteenth century, and in every respect more important than many of the sovereign princes on the other side of the Rhine—was an English manufacturer, who had established himself there some twenty years ago, without much capital, and had effected all this by his industry and enterprise. Such, sir, is the spirit of the age; of course, in this young and wonderfully progressive country, it is more eager and ardent, and therefore occasionally extravagant, than anywhere else. But it is vain to resist it. Nay, I believe it worse than vain. It is evidently in the order of nature, and we must take it with all its good and all its evils together. The great design of Providence, in giving to the most active and enterprising of all races, a new world to possess, to build up and to adorn, are not to be thwarted by our policy, even if we thought it good policy to thwart them; all the instincts of that race would revolt at a system which would disappoint its high destiny.

Mr. Chairman, I have made these general remarks, because, as you will have perceived, they have a direct and important bearing upon the collateral issue presented by the advocates of this bill, though not in the bill itself as something to be accomplished hereafter. In a country so much governed by opinion, it is all important that opinion should be enlightened; and errors uttered by distinguished men in high stations, and surrounded with whatever talent can contribute to render them seductive and imposing, cannot, without public detriment, be suffered to pass unnoticed. On this occasion, as I have already intimated, it is far less the measure proposed, than what I consider as the *quo animo* of its advocates here and elsewhere, that has excited my alarms and my opposition. But I have objections, which I will now proceed to state, to the policy of the bill itself.

There are two very distinct questions presented to the committee. The first is, shall the revenues be collected only in gold and silver; the second, how shall they, when collected, be kept and disbursed; shall sub-treasuries be established by the Government, or shall banks be employed for that purpose as heretofore—and if the latter course be preferred, then shall the banks be allowed the use of the public deposits, or shall special deposits only be made with them. It is very evident that these propositions have no necessary connexion with each other, and that either of them may be approved or rejected, by those who do not reject or approve the other.

As to the collection of the revenue in specie, my objections are by no means so strong, or I should say so vehement now, as they were at the opening of the session, when gold and silver were selling at a premium of nine or ten per cent. At that time it appeared to me that such a measure would have been a mere wanton act of oppression upon the people of the States, for no earthly good purpose whatever. It would have been simply authorizing usurers and money brokers to lay upon the importers, and, through these, upon the consumers of foreign goods, that is to say, upon the public, and especially upon the planters of the South, a tariff of duties, in a good degree arbitrary, for their own benefit, and that of the functionaries of the Government. Believing, as I did and do, that the paper circulation of the country, from the great and sudden contraction in consequence of the panic, was rather too much reduced than redundant, I confess, as I said on a former occasion, I could

H. of R.]

Sub-Treasury Bill.

[Oct. 13, 1837.]

not see that justice, at least that equity and good conscience, made it imperative upon us to resort to so stern a measure; especially, as the idea of furnishing, by that means, a broader metallic basis for our circulation, had proved itself, to our very senses, to be completely fallacious. We all now see that not a dollar collected by the Government, and disbursed by its creditors, circulates for one moment as money, but is carefully hoarded, and sold as merchandise; and that it will continue to be the case, so long as, from any cause whatever, exchanges shall be unfavorable to the country, is equally evident.

I admit that, since the fall of the price of gold and silver to five per cent., this objection loses somewhat of its weight, but it loses none of its truth. The same law of currency now operates, though in a mitigated degree, to make it an objectionable measure to repeal the act of 1816, and so to discredit, *pro tanto*, all bank notes in perpetuity. Yes, sir, to organize panic and perpetuate distrust, so far as your example has any weight. And why do so? What apology have you to make for an act that certainly requires one? What public occasion, what pressing exigency requires it? The message puts the subject, I admit, in a very specious and captivating form; it supposes the case of a war, and the Government to find its treasure suddenly turned into bank credits; and we are asked whether such a thing could be borne. But admit that, in case of war, the Government would be driven to that, or any other measure of equal or even greater severity. What then? Does it follow that such a system should be unnecessarily adopted in time of peace? But the truth is, that, even in time of war, it would make less difference to the Government than is generally supposed. Certainly some of its operations, distant naval expeditions, and the like, would require gold and silver, and they must be had, at whatever price, from within or from abroad; but, after all, with such credit as that of the United States now is, it is impossible to imagine that the nation should be embarrassed, even for a single moment, by the failure of its banks to pay some millions in gold and silver. Look at England, in the eventful period between the suspension of payment in 1797 and the peace of 1815. It is now universally confessed that that measure, and that measure alone, boldly empirical as it was once thought, enabled her to sustain the burdens of that terrible conflict, and to achieve a triumph worthy of her generous constancy under misfortune. I do not, therefore, see how even the necessities of war would compel Government, abounding in such resources of public credit as no other Government ever enjoyed, to resort to a measure so novel, so harsh, so inconsistent with the established order of things in the country, and with all the habits of the people.

But the great objection with me is that which appears from a passage quoted by the gentleman from Virginia, [Mr. GARLAND,] to have presented itself to Mr. Dallas, in 1815. You will do some harm by refusing bank paper; considering how little specie there has ever been in this country, you may, by requiring it to be paid to you in a large amount annually, make it always an article of merchandise; you will thus permanently discredit bank notes, and render impossible the restoration of their convertibility. But that is not all; even should this mischief not ensue, you at least, by thus rejecting them, to the whole extent of your transactions, abandon the currency to its fate, under the administration of the States. You make no efforts, you exert no influence, to maintain its purity and uniformity, by distinguishing between corporations which redeem their notes and those which are notoriously insolvent. You proclaim your distrust of all of them alike; you write it in your statute-book; however disastrous the condition of the monetary concerns of the States may be, through want of skill or want of concert, you leave them to themselves, and that when standing in the most intimate and the most com-

manding relation towards them, you might, if you gave yourselves the least trouble about the matter, exercise a most salutary control over them, and remedy those great inconveniences for the benefit of us all. For, sir, it is not enough to say you have no power, strictly so called, under the constitution, to regulate the currency. I admit that you have none. What then? Have you no influence— influence of example— influence of precept— influence of authority— influence of patronage— influence of connexion and custom in business, in the use of these very deposits? Has not the constitution provided that all defects in our institutions shall be corrected by amendments regularly recommended and introduced, and is it not one of your duties so to recommend and introduce them?

Why do you not urge upon the States any reform you may judge necessary in the matter? I appeal to every one that hears me, what he should think of an individual, who, possessing immense influence in a community, with an income of many millions a year, should, in a time of trouble, coolly withdraw himself from society, and hoard his money, like a usurer in a commercial panic, waiting until the extreme necessities of his neighbors shall throw them upon his mercy? Is this the morality we are taught in our private relations? Shall nothing be expected from him to whom so much has been given? Shall he hide his light under a bushel? Shall he bury his ten talents in the earth, and escape condemnation as an unprofitable servant? And shall that be right in a Government, which, in a private person, shocks the moral sense of all mankind—in a Government standing towards the people of this country in relations so very peculiar? Sir, what answer would you have to give to the States, if, in a moment of public calamity, like that which is just passing away, feeling their distresses aggravated through your harsh exactions of what their people had not to give, appealing in vain to you for succor or for counsel, they were to hold to you the language which indignation and astonishment would naturally inspire under such extraordinary circumstances? If they were to say to you, "We have done every thing to exalt and to magnify you—we have clothed you with authority and awe—we have armed you with mighty powers, with the axes and fasces of supreme jurisdiction—we have surrounded you with all the glorious equipage and pomp of empire, endowed you with a vast treasury, with fleets, armies, senates, and judges—that palace, these gorgeous domes—this *capitolium fulgens*—what for? That you should renounce all community of interest, all sympathy with us? That there should be no ties of affection or of duty between us? That you should ostentatiously proclaim yourselves, as your worst enemies have sometimes alleged that you are, a foreign Government in the midst of our country, and even avail yourselves of a moment of cruel revulsion and calamity, to make us feel that you are so in spirit and in truth!" Sir, I do not know, I cannot conceive, how such a course should fail to strike every body as a perversion of all the eternal obligations of morality, which are, and ought to be, as binding upon communities as upon the individuals that compose them; how gentlemen can, at such a moment as the present, entertain, without emotion, the strange proposition that this Government should bury itself, like Sardanapalus, in a selfish repose, a degenerate and inglorious indifference to all the interests of the country; or, if I can make such a comparison without shocking them too much, that, like Nero, it should fiddle while Rome is burning.

Agreeing, then, sir, with the Executive in the principles laid down in the message, I differ with it in the practical inferences deduced from them. In the division of power between the Government and the States, I think with it, that all that is required to meet this emergency, has not been given to the former. But the inadequacy of our powers is no excuse for not exerting them to the uttermost for the public good, especially as there is reason to think that the

Oct. 13, 1837.]

Sub-Treasury Bill.

[H. OF R.]

convention did not foresee the present state of things. We can do much, if we cannot do every thing. The occasion calls only for a good will, and a moderate share of practical ability; and I have no hesitation in saying, that among the existing banking institutions of the country, can be found ample means of accomplishing the two great objects of restoring specie payments, and maintaining hereafter, in all ordinary times, a convertible currency, which is all that we can expect to do.

Sir, I do not wish to be misunderstood. It is of the utmost importance that the paper of the banks should not only not in fact be depreciated, (as I believe is actually the case,) but should be able to stand the only sure, and, to the public at large, satisfactory, test of that fact; I mean convertibility into specie. I am fully aware that the accident of a failure in the means of making their payments in the precious metals, is one against which, according to the course of modern commerce, there can be no complete security; and that nothing can be more absurdly exaggerated, than the importance attached to that occurrence, by persons not familiar with the principles of banking, when it happens in consequence of an extraordinary demand from abroad, or a sudden panic within. Nay, more; I admit that the most usual effect of a great revulsion in trade, is, to throw much paper out of circulation; to contract the currency, and so to bring down exchanges and prices, and raise the value of the money that remains in the hands of the public. But a suspension of specie payments, though it may not be a present evil, is always fraught with danger. It is the indispensable duty of a statesman to put an end to it as soon as possible, either by encouragement or by compulsion. It is for this, among other reasons, that I so cheerfully acquiesced in the issuing of Treasury notes; inasmuch as it relieved us from the necessity either of directly refusing to take the paper of the banks at par, or, by receiving it, (as we might otherwise very safely have done,) of betraying those companies into an impolitic enlargement of their issues, before the balance of payments had been turned in our favor, as I hope it will be, by the coming crop. I regarded it as an excellent temporary expedient, for avoiding, at present, this choice of evils. So far, I think nothing more unfounded than the general charge of insolvency against all our banks, which is so inconsiderately uttered by the press, and in debate, as well as the assertion repeated over and over again, on this floor, that the country is laboring under an excessive and depreciated currency. It is not yet so; but it will, I fear, very soon be so, if the banks do not make an effort to return to specie payments in the course of a few months. Now is the time to do so: now that their issues are contracted; that importations have been checked; that exchanges are become more favorable; and that the great southern crops are about to be sent forward to make them still more so. Let every one interested in the fate of these institutions, as well as in the commercial prosperity of the country, exert whatever influence he may possess, to bring about that result; and to deliver the banks from the temptations to dangerous excess, to which the return of an active and prosperous business will inevitably expose them, if they do not, once more, lay themselves under the restraint of convertibility.

Sir, should they unhappily take a different course, and should this Government, after using all its influence and authority to establish the currency of the country on a better footing, fail of success in its most zealous endeavors, I admit that it may be driven to the necessity of taking care of its own business and creditors, by independent legislation of its own. There is no doubt that a variously depreciated currency cannot be tolerated as the settled system of the country. The ports of one State cannot be preferred to those of another, in this way, any more than by an express statute to that effect. Nor can the public

creditor be justly paid in money really depreciated—I mean not in reference merely to gold and silver, which are themselves liable to great fluctuations in value, but to the general mass of commodities that compose the conveniences and necessities of life. The effects of a redundant currency, when once they begin to be distinctly perceived, are counteracted by a general rise of prices. Money is twice as easy to be got, but you have to pay twice as much for every thing which it buys. But there is one class of persons who have no means of indemnifying themselves by raising the nominal value of their property or their claims. It is the class of those who live on fixed incomes—annuitants, fundholders, functionaries of States, pensioners. They are paid a certain sum, and with every diminution in the value it expresses, they lose just so much of what they are fairly entitled to. In this view of the subject, therefore, it is quite clear, that Government is under the highest of all moral obligations to see that their dues be not paid them in what is really worth a great deal less than it purports to be.

What I have hitherto said relates to the first question propounded by the bill on your table—shall gold and silver only be received in payment of Government dues? As to the second inquiry, sir, whether the revenue shall be kept by officers of our own, or by the banks; and if the latter, whether in the shape of special or general deposit, so much has been said, and so ably said, upon that head, against the system recommended by the message, that I am very little disposed to trouble the committee with any additional remarks in regard to it. Were I driven to make a choice between the two plans referred to, I should, as at present advised, greatly prefer that of a special deposit, on a small commission, as at once the safest, the cheapest, and most simple—as departing less from our previous customs, and not being so liable to the great practical objection of going permanently to increase the already enormous and disproportionate influence of the Executive power, which, beyond all doubt, far exceeds any thing that was anticipated by the founders of the Government, and seriously threatens to disturb, if not to subvert, the whole balance of the constitution. I need not say that I have no reference whatever to the present, or any other individual incumbent. I speak of the operations of great general causes, and of a system, whose effects are almost entirely independent of the will of man. Another very great objection to the scheme reported by the committee, is its resemblance, or, at least, its fearful leaning to that of a great political bank of the United States, of which a justly celebrated report of one of my predecessors, upon this floor,* demonstrated, some years ago, the dangers and inconveniences, as I have always supposed, to the universal conviction of the people. But although I should prefer the special deposit system to that of the Committee of Ways and Means, I am not yet prepared to adopt it. That immense benefits have been conferred upon the country, by adding to its productive capital, the large amounts of public money which would otherwise have lain dormant in the Treasury, does not admit of a question. I will venture to say that in the course of the half century that has elapsed since '89, countless millions have been the fruit of this truly paternal and beneficent system. Our predecessors, Mr. Dallas among them, seem to have been deeply impressed with

* Mr. McDuffie. Report of the Committee of Ways and Means, in 1831. Mr. Gallatin remarks of this system of sub-treasuries, presented as an alternative to a bank of the United States, in his celebrated pamphlet on that subject, that with the exception of the power of receiving private deposits, the object of which provision is not perceived, this is precisely the species of national bank which has been suggested in the President's last message, (1830.) The question whether the purchase of drafts would, as we think, be a charge on the Treasury, or prove, as seems to be expected, a source of profit, is one of secondary importance. It is sufficient to observe that the issues of the State banks could not, nor indeed is it expected that they could, be checked by this plan.—*Note by Mr. L.*

H. OF R.]

Sub-Treasury Bill.

[Oct. 13, 1837.]

this view of the subject. They seem to have felt themselves bound to render our system of taxation, which, even in its mildest form, is, in fact, a confiscation of private property for public uses, as little burdensome as possible to the community. Sir, whatever we may think of the policy of pursuing their footsteps any further, no one can deny that they are entitled to the gratitude of the country for the past; and I, for one, am too sensible of the benefit, to throw it away without very mature consideration, unless under the pressure of a cogent necessity.

But we have been told, sir, that, far from being an innovation, this mode of collecting the public revenues was universal from the earliest times until the beginning of the last century—that is to say, until an age of philosophic light and diffusive civilization, at which another good old plan, established from time immemorial, the burning of witches and heretics, unhappily ceased too. This coincidence certainly appears to me to be entitled to some consideration; the committee will see, that in the matter of innovation, going back too far is at least as dangerous as going forward too rapidly. But there has been another reference to the examples of the past which struck me still more forcibly as a most extraordinary perversion of the lessons of experience. Sir, I do confess to you, that before any discussion had taken place in either part of this Capitol on the subject before you—long before I had heard of that allusion to the *Quæstor*, referred to the other day by my eloquent friend from New York, [Mr. HOFFMAN,] at the bare stating of this project in its first conception and most general outlines, certain images presented themselves to my mind, and have ever since haunted it, in spite of all I could do to banish them. They were ideas that, in my simple way of considering such matters, shocked and alarmed me—ideas of Roman conquest and Asiatic despotism. I thought of that most fearful of all things, a vast empire with power centralized at its capital, with commerce centralizing by the inevitable course of trade, which always and everywhere tends to centralization, at some great emporium, with its revenues collected only in gold and silver, to be hoarded, as was the way at Rome and Babylon or Persepolis. I fancied I could see one of the Proconsuls or prætors—the Bashaws of the republic, as Montesquieu so justly calls them—Verres, for example—going forth with the same *Quæstor*, surrounded with an army of publicans or farmers of the revenue, to gather the dues of Rome in a devoted province—another Sicily—as dues were wont to be gathered by the satraps of that military commonwealth, that is to say, wrung with their blood from subjugated nations, whose pleasant places were laid waste, without remorse, to glut the rapacity of conquest. Sir, I little imagined that such a system would have been cited, nay, alluded to, in this age, except with a view to inspire the horror and execration it is so well calculated to excite. Roman example! “The Demon city,” (as it has been called by a writer of genius—Herder,) whose whole history, from beginning to end, is a tragedy far deeper and more dreadful than the tale of *Cædipus* or the *Attidæ*, and leading to a catastrophe of an awful political justice. Why, sir, there is nothing in the annals of Mongolian conquest, worse than the ravages perpetrated by her consuls—by Mummus, Paulus, Æmilius, Sylla—in some of the fairest and most civilized portions of the earth. There were flourishing countries, whose fertility and population were exhausted by a perpetual drain of corn and gladiators to feed her lazy and licentious populace, and amuse them with the unutterable atrocities of her amphitheatre. And what was the end of all this misrule? Weakness, poverty, desolation, barbarism—the Goth, the Vandal, the Hun. Yet long before the footstep of a barbarian had been impressed upon the soil of the empire, as Gibbon has well remarked; long before that scourge of God, under whose horses’ hoof the grass was said never to grow again, had

been sent to avenge the wrongs of mankind, in the course of half a century after Constantine had founded a new Rome, whole tracts of fertile country had been completely depopulated and abandoned. Even of that paradise of all this earth, on which poetry and panegyric have been exhausted in every age, in all languages, the *Campania felix*, a very considerable portion was become a waste. Nor, sir, was this owing to the despotism of the Cæsars, as an excellent writer has well observed, (Jacobs,) in reference to this passage of the “Decline and Fall,” and as this committee will do well to remark. There co-operated with that misgovernment, a curse which has been said, and is thus proved, to be worse than “the inclemency of the seasons and the barrenness of the earth,” (Ad. Smith,) a decreasing currency. The supply of the precious metals had been for upwards of two centuries continually diminishing, while the quantity of them sent in quest of luxuries to the East, to return no more, had been increasing in the same proportion, and a revenue of £15,000,000 or £20,000,000 was constantly levied in gold and silver, to be expended at a distant capital, or on the frontiers. This important fact speaks volumes to us on this subject. It is unquestionably true that one of the greatest calamities of the declining empire, was a circulation diminishing so frightfully that the pay of a general in the third century was nominally not higher than that of a private had been in the reign of Augustus, (Herder.) So much for the Roman sub-Treasury system, and the example of the *Quæstor*!

But, sir, another objection to the present system is, that it leads to fluctuations in the currency; and that brings me to consider the general effects of the credit system upon the prosperity of the country.

I begin by admitting that there is something in this objection, but by no means as much as is thought by persons who have not very attentively considered the subject. Undoubtedly if your revenue, instead of being uniform, or at least varying very little from year to year, be permitted to fluctuate extremely—if a great surplus like that of which you disposed last year is to be allowed ever and anon to accumulate, and then to be withdrawn from one depository and scattered among many others; to be again suddenly withdrawn from them, and ultimately distributed without reference to the wants of commerce and the course of business, but on merely arbitrary principles, among the States; if such financial blunders are to be repeated often in our future policy, we should do well to confine the effects of them within as narrow limits as possible, and even a system of hoarding might, in such a case, perhaps, do less harm than all this vexatious irregularity and uncertainty. But, in the first place, whose fault was that? Whose legislation occasioned that preposterous accumulation? Whose unequal and oppressive tariffs extorted from commerce the vast sums which were afterwards to be lavished upon it with such intoxicating effects? Yours, sir; this House, this Congress is responsible for whatever mischiefs grew out of that strange anomaly. Let the blame light upon the heads of the guilty. I trust in God we are not destined soon to see another such surplus—and if we should, most certainly I should expect proper precautions to be adopted to prevent its operating again so powerfully to derange the business of the country. But what sort of argument is it against the comparatively moderate deposits made in the ordinary course of things by the Government, to recompense the banks for their services as fiscal agents, and make taxation less oppressive, that an enormous accumulation like that referred to, so capriciously disposed of, so violently transferred from one place of deposit to another, produced much evil? And here, sir, I beg to ask gentlemen, whether it has ever occurred to them to imagine what would have been the effect—what would always be the effect—of such an accumulation, if it had been in gold and silver?

Oct. 13, 1837.]

Sub-Treasury Bill.

[H. OF R.]

What if our revenues should ever again amount to what they were in 1815? Will any man undertake to say that the abstraction from the circulation of the commercial world of so large a sum as forty or fifty millions of specie, would not, at any time, occasion a serious derangement of business and fall of prices abroad, attended with all the usual evils of such an event? I shall advert, hereafter, more particularly, to the important subject of the supply of the precious metals for the purposes of commerce; but I here call the attention of the committee to a view of it that is entitled to their profound consideration. If I do not greatly err, in all the conclusions to which I have been brought by my researches in this matter, no calculation can be made of the effect which the adoption—I will not say of the “hard-money system,” but of any system whatever, calling for a much greater demand of the precious metals—might have upon the state of trade.

Sir, I have said that the importance of these fluctuations in the paper currency of a country, have been very much overrated. Some people seem to think an expansion in the circulating medium must always be attended with a sudden rise in prices, and a spirit of extravagant speculation. But it is not so. Mr. Tooke has shown that these two things have in fact very seldom coincided—that speculation depends, in the first instance, upon moral causes wholly unconnected with the state of the currency; and, although an abundance of money may, and does aggravate the evil where it exists, yet, by itself, it never leads to any excitement. Take any example of a commercial crisis you please, and you will find that there were extraordinary circumstances which acted on the imaginations of men—florid pictures of general prosperity, bright visions of possible success in new channels of trade, and adventures as yet untried. There is a remarkable proof of this in the terrible convulsion in England in 1825, the most serious perhaps that she has ever passed through. In 1822 there was a most depressed state of prices below the cost of production. The lowering of the interest on an immense amount of Government stock in 1823 and '24, engendered an impatient desire of more profitable investments. Then came the acknowledgment of the independence of the South American States, with hopes of advantageous loans to the new Governments, of great mining speculations, and of a vast extension of all branches of trade, upon which that great political event, it was supposed, could not fail to produce sudden and incalculable effects. The spirit of adventure thus awakened, soon spread itself abroad over every department of commerce; and a moral epidemic, as it has been well termed, broke out, such as no policy of Government, of free Government at least, could possibly control. But the same excitement would have occurred had the circulation of England been metallic; and, sir, a proof of it is to be found in the fact that, owing to a long series of good harvests, and to the preparations which the Bank of England had been making to substitute gold for the small notes which still circulated in 1824, her treasure was unusually large, (something like £13,000,000 instead of £10,000,000, its regular maximum,) and so far as her issues had any thing to do with exciting the spirit of circulation, it was not a deficiency, but an excess of bullion that occasioned the mischief—just as was the case in this country during the last two years. I say, sir, this spirit of speculation is incident to the adventurous operations of commerce, and it makes no difference whether those operations be carried on in specie or in paper. The gentleman from Pennsylvania who sits near me, [Mr. SARGENT,] anticipated me in citing the example of the famous bubble year in England, (1721,) when, as he justly remarked, the circulation of that country might be considered as almost exclusively metallic, for the issues of the bank were what they had been for some years before, only about £2,000,000, and not more than

half what they were in a few years after, in a state of perfect calm. But I will add another instance, a most memorable and instructive one, from our own history. If this country has ever been blessed with a purely metallic currency, it was shortly after the peace of '83, and from that epoch until the establishment of the first Bank of the United States; and, sir, if a man were called to point out that era in its history in which its pecuniary condition was most deplorable, he would, without hesitation, name that. There was a want of money, even to transact the ordinary business of life; a good portion of the little trade left us was carried on by barter;* industry was languishing for want of the means of exchanging its products; nobody had any credit; all was embarrassment, despondency, and gloom. In the midst of all this distress, there was a cry, not for hard money, as in the present crisis—they had enough of that, in one sense, at least—but for the good old-fashioned paper money issued by the States, and the discontents of some of the boldest and most active spirits of New England broke out into open revolt against society, and seriously threatened its overthrow. Sir, never since we have been a people, have we passed through a period so full of perils of all sorts! Never was the morality of the nation put to so severe a trial; or its peace and its institutions, and its destinies brought so near to the very edge of the precipice. And what was the immediate cause of all this intense pecuniary distress? Speculation, sir, far wilder, in proportion, than any that has since occurred. We had imported in the two first years after the peace, a large amount, \$30,000,000, against exports of some eight or nine millions. Look into Pitkin's Statistics. And yet with a fact from our own history, so important, so authentic, so full of instruction on all the points involved in this discussion, you hear able and leading men speak of the spirit of speculation, as something inseparably connected with paper money alone. No, sir, it results from what is called the “course of trade,” in its perpetual round of quiescence—improvement—increasing confidence—prosperity—excitement—overtrading—convulsion—stagnation—pressure—distress—ending in quiescence again.† Nor is it by bank issues, even where banks most abound, that it is supplied with the means of compassing its object. In 1825, it is said that mercantile paper to the amount of near \$600,000,000 was negotiated in London. Mr. Rothschild mentions that his house received, in the course of two months, bills to the amount of a million and a half;‡ while the circulation of the Bank of England, and the country banks together, did not exceed thirty millions. It is commercial credit and private loans, that at such periods encourage and sustain those great and perilous operations—not banks, not bank notes, not redundant currency, strictly so called.

But, if banks do not occasion such excitements, they, on the other hand, greatly mitigate the effects of the revolution that follows. We had no banks in this country in '86 to help the people in their distress, as the Bank of England aided and saved the commercial community of England in 1825.

But let us look a little more closely into the causes of the late excitement in the moneyed and commercial interests of this country. In my opinion, they have been too partially considered, and we have added to our other misfortunes mutual reproaches, which are certainly (I speak it with the profoundest deference for the very able persons with whom I differ) not all of them well founded. The merchants, as a body, have been censured for imprudent and profligate speculation. They, in turn, accuse the Government of a wanton and even wicked tampering with the great interests of commerce, which Governments seldom

* Washington's writings, vol. IX. Hamilton's report on the Bank in 1790.

† Mr. S. Jones Lloyd. ‡ “Minutes of Evidence,” &c. in 1832.

H. of R.]

Sub-Treasury Bill.

[Oct. 13, 1837.]

touch without doing some mischief. Sir, I do not think this a fit occasion for angry recrimination, and having been absent during the conflict to which I allude, I desire to mingle as little as possible in the passions of the past. I must say, however, that I incline to believe more importance has been attached to the specie circular, in a mere economical point of view, (I say nothing of its political character,) than it deserves. I do not mean to affirm that it had not its share in adding to the embarrassments of the money market after the revulsion had begun. But the tide had turned before. That paper was issued here on the 11th of July, 1836. Now, as early as the 1st of July, the Bank of England had felt itself constrained to adopt a course which led to an instant fall of prices, and this fall of prices was in a short time as much as 20 or 30 per cent. Mr. Horsley Palmer, in the pamphlet already alluded to, admits the fact, and justifies the proceeding. *Habes confitentem reum*.* Now, sir, be pleased to consider what frightful havoc a loss of 20 or 30 per cent. on 1,500,000 bales of cotton alone would occasion in the commercial world, especially when such a terrible deficit happens to be accompanied by a contraction of bank issues, and great scarcity in the money market, at a period of prodigious excitement in every branch of trade, (for it is then only that contractions are dangerous,) and of speculative investments in every sort of enterprise. The Bank of England, through its deputy governor, alleges, in justification of its course, that its treasure, which was just beginning to recover from the drain occasioned by speculations in Spanish and Portuguese funds, during the year 1834—another phrensy of the times, that led to a catastrophe which I witnessed in the spring of 1835, and in hard-money countries, too—was again reduced by drafts made upon it, for various purposes, in America, to the amount of £2,600,000. Of this amount, £1,200,000 was borrowed for the Bank of the United States; the rest came over to be laid out, no doubt, in canal and railway or bank stock; or, to supply, as Mr. Palmer supposes, the vacuum in our circulation occasioned by the prohibition, in some of the States, of small notes, or the new demand for gold consequent upon the change introduced by the gold bill, in the session of 1835. Sir, as the guardian of the currency of England, the bank was, no doubt, on strict principle, justified in pursuing that cautious policy, in imposing a salutary check upon speculation; but I have very great doubts whether it did not go too far; and whether its sudden and rather violent interference with the natural course of things, has not been attended, in England as well as in this country, with evil consequences that might have been avoided, or at least very much mitigated, had exchanges been left to correct themselves, as they have a natural tendency to do. It is a circumstance worthy of the particular attention of the committee—and I advert to it to show that nothing can be more unjust than the charge of profligate speculation made against the great body of our merchants, (however individuals may deserve censure,)—that, from 1831 until late in the autumn of 1836, exchange with Europe never fell below, and was often much above par, although the apparent balance of trade was, during that period, steadily and greatly against us. Sir, this singular phenomenon is now satisfactorily explained. We know that it was owing to immense investments of British capital (much of it, no doubt, sent over in the shape of goods,) in the United States, quite independent of the ordinary commercial balance. For example, a run was made upon the Bank of England, in May, 1832, during the agitation that accompanied the

passing of the Reform Bill, to the amount of £2,000,000, which never returned to the bank, and was supposed to have been hoarded, but which I believe came hither. This circumstance was, at the time, attributed to a political trick, to prejudice the minds of the people against the great measure then before Parliament. I have reason, however, to know, that the panic was by no means feigned; that apprehensions of revolution were seriously entertained by many of the higher classes in England; and, as the payment of our national debt, and our immense prosperity, had called the attention of European capitalists to this country, large amounts were sent hither, not only in quest of higher interest, but as a safer investment than could be made at home; for in the present state of the world, capital will go abroad, in spite of all the contrivances of Government, recommended, I regret to say, by Mr. Palmer, to prevent it seeking more profitable employment there. We know all this now, and we see what this vast influx of British gold and British credit had to do with prices and speculation here; but who saw it then? How was the merchant to know what was at hand? That the ground upon which he stood, or thought he was standing, covered an abyss that was so soon to open and swallow him up; that the scene of most flattering prosperity which had for five years excited and entranced his senses, was to vanish like a dream, at the touch of a foreign Power?

A great many circumstances conspired to keep up the delusion, and even some which one might have thought would produce the very opposite effect. Thus the removal of the deposits, and the panic and contraction in 1834, consequent upon that measure, led to further importations of the precious metals, and accordingly it appears that there was an accession of nearly twelve millions of specie in that single year. A metallic basis was thus formed for the inordinate number of banks chartered by the State Legislatures, to supply the place of the United States Bank; and still greater aliment was added to the spirit of speculation, already excited by the high prices of produce in England, and the unprecedented demands for the public lands in the West, by emigration from abroad. The idea that an excessive circulation was the sole cause of all the mischief—an idea encouraged both by the friends of a national bank and by the enemies of all banks—appears to me entirely fallacious. It is in vain to state, as is so continually done in such discussions, the amount of currency at one period, and to compare it with that amount at another, without any reference to the amount or the prices of the commodities it has to circulate. No sound inference can be drawn from the naked fact of such a difference. For instance, had the price of produce not fallen in the English market—had the cotton crop been worth 80 or \$90,000,000, instead of being fallen to half the former sum, it is manifest that it would have required, *ceteris paribus*, twice the amount of circulation to effect the usual exchanges in it. Not only so: but, in periods of great excitement, it is not merely the products of our industry that we sell; it is not simply the annual income of the land and labor of the country that is exchanged, but the very soil itself; the whole country, with all that it contains, is in the market. This, to the extent to which it is carried, is a peculiarity of our people. Sir, I do not mention this as a very prepossessing or honorable trait in our character; I mention it simply as a fact. We have no local attachments, generally speaking; nothing bears the *pretium affectionis* in our eyes. If an estate, a residence in town, a country seat, rises a little beyond what we are accustomed to think its value, it is sold without any hesitation. Accordingly, there is in such times a capacity for absorbing an expanded currency in this country, greater perhaps, in proportion, than was ever known in any other country. I am of opinion, therefore, that prices in the United States were, in general, not relatively much higher than elsewhere, during

* The Causes and Consequences of the Pressure upon the Money Market, with a statement of the action of the Bank of England, from the 1st of October, 1833, to the 27th of December, 1836, by J. Horsley Palmer, Esq. London, 1837.

† The fall in prices of almost all the leading articles of raw produce, (sugar, coffee, tea, silk, cotton, &c.) from the 1st of July last, when the rate of interest was first advanced, has not been less than from 20 to 30 per cent.—p. 23.

Oct. 13, 1837.]

Sub-Treasury Bill.

[H. of R.]

the last two years, except in cases where, on the usual relation of demand and supply, it was easy to account for their being so. By far the greatest amount of speculation, too, no doubt was carried on in private paper. But of course, as soon as a fall took place in that great leading staple commodity in which we pay our foreign debts, and of which the value affects that of almost every thing else in the country, and that, too, to so fearful an amount as 30 or \$40,000,000, the currency became (before the late contraction) at once redundant. It was precisely as if property to the value of 3 or \$400,000,000 had been swallowed up in the sea, for it destroyed the income of property to that amount.

From this view of the causes that led to the present distress, I do not see what inference can be drawn from it unfavorable to the connexion that has always subsisted between the Government and banks. It is one of those extraordinary revulsions to which the adventurous spirit of commerce will always be exposed, organize your currency as you will, and take what pains you please to diminish the sources of excitement. In this country especially, holding out so many temptations to foreign capital, so many hopes to enterprise, such dazzling prizes to fortunate speculation, with a people distinguished above all others by their intelligence, sagacity, activity, and boldness in affairs, such periods of crisis and convulsion are inevitable, and no mischiefs which they can possibly do would be half so bad as the only preventive that would insure us against their occurrence—the entire extinction of the spirit that leads to them.

Sir, to the general declamation against banking, we have to oppose the experience of the most prosperous nations in the world. There is a country, for instance, whose whole currency is of paper, where one seldom meets with a piece of gold, and whose banking companies, whether with or without charter, subjected to no restraints or control but such as spring out of the vigilance of a free and eager competition, have, for upwards of a century together, conducted their affairs with so much skill, integrity, and prudence, as not only never to have occasioned any loss either to the public or the parties interested, but, on the contrary, by the confession of all competent judges, to have conferred the greatest blessings upon both; to have contributed more than any single cause, perhaps than all other causes put together, to bring out and develop completely all the resources of the land, to foster industry, to animate enterprise, and, by an abundant supply of the means of exchange, to turn its capital and labor to the greatest possible account; where, in addition to these economical advantages, they have contrived to exercise a high moral control, a sort of censorial authority, over the community, and especially the humbler classes of it, by bestowing rewards in the shape of credit upon industry and economy, and lending upon good personal character, as if it were solid capital, and, through a system of cash accounts and interest upon small deposits, have given to the deserving laborer the combined advantages of a savings bank and a friendly endorser; a country which has made greater progress, within the period mentioned, than any other in Europe; with an agriculture second (if second) only to that of Flanders; with a flourishing commerce; with manufactures of the greatest extent, and the most exquisite refinement; whose cities have almost kept pace with ours, whose whole face, in its gladness and beauty, bears testimony to the spirit of improvement that has animated her: what country is that? Scotland, sir. Every body has heard, or ought to have heard, of the Scotch system of banking; and I ask if any thing can be more irreconcilable with the theories so confidently advanced here, than facts connected with its history? I know, sir, what may be said in reply to this otherwise triumphant example. I am aware that the Scotch banks have, in times of pressure, been compelled to lean upon the

Bank of England; that objections have been made by high authorities to the principles on which they have been conducted, and that other persons, admitting their unquestionable usefulness and success, have ascribed it to circumstances which render the system an unfit model for imitation elsewhere. Be it so. But still it is banking; banking on the English plan, with a very inadequate supply, scarcely any supply of bullion; banking, without limitation or control, without any reference or responsibility to Government; banking, in a word, with all the defects imputed to that system in their most exaggerated forms.

But if this example be not satisfactory, let us look at the experience of the two other countries in which the system exists, and exists, as we are told, in its most vicious state—England and the United States. Look at the results. I have no faith at all in speculative politics. A theorist in Government is as dangerous as a theorist in medicine or in agriculture, and for precisely the same reason—the subjects are too complicated and too obscure for simple and decisive experiments. I go for undisputed results in the long run. Now, surely a philosophical inquirer into the history of the commerce and public economy of nations, if he saw a people pre-eminently distinguished in those particulars above all others, would be inclined to ascribe their superiority to what was peculiar in their institutions; at least whatever might be his ideas *a priori* on such subjects, he would be very slow to deny to any remarkable peculiarity in those institutions its full importance as one of the probable causes of the success which he witnessed, unless he could clearly show the contrary. Then, sir, by what example are we to be guided in such matters, if not by that of England—by far the most magnificent manifestation that the world in any age of it has ever beheld, of the might and the grandeur of civilized life? Sir, I have weighed every syllable that I utter; I express a deliberate conviction, founded upon a patient inquiry and a comparison, as complete as my limited knowledge has enabled me to make it, between the past and present condition of mankind, and between the great nation of which I am speaking, and those which surround her. Sir, there is a gulf between them—that narrow channel separates worlds—it is an ocean more than three thousand miles wide. I appeal to any one who has been abroad, whether going from England to any part of the continent be not descending immensely in the scale of civilization? I know, sir, that that word is an ambiguous one. I know that in some of the graces of polished society, in some of the arts of an elegant imagination, that in the exact sciences, and in mere learning and general intellectual cultivation, some nations have excelled, perhaps, many equalled England. But in that civilization which, as I have said before, it is the great end of modern political economy to promote, and which is immediately connected with the subject before you—which at once springs out of and leads to the accumulation of capital, and the distribution of wealth and comfort through all classes of a community, with an immense aggregate of national power and resources—that civilization which enables man to “wield these elements, and arms him with the force of all their regions,” which gives him dominion over all other creatures, and makes him emphatically the lord of the universe—that civilization which consists not in music, not in playing on the flute, as the Athenian hero said, but in turning a small city into a great one—in that victorious, triumphant, irresistible civilization, there is nothing recorded in the annals of mankind that does not sink into the shades of the deepest eclipse by the side of England. I say nothing of her recent achievements on the land and the sea—of her fleets, her armies, her subsidized allies. Look at the Thames crowded with shipping—visit her arsenals, her docks, her canals, her railways, her factories, her mines, her warehouses, her roads, and bridges—go

H. of R.]

Sub-Treasury Bill.

[Oct. 13, 1837.]

through the streets of that wonderful metropolis, the bank, the emporium, and the exchange of the whole world—converse with those merchants who conduct and control, as far as it is possible to control, the commerce of all nations, with those manufacturers who fill every market with their unrivalled products—go into that bank which is the repository of the precious metals for all Europe—consider its notes, as well as the bills of private bankers, at a premium everywhere, more valuable than specie, symbols not merely of gold, but of what is far more precious than gold, yea, than fine gold, of perfect good faith, of unblemished integrity, of sagacious enterprise, of steadfast, persevering industry, of boundless wealth, of business co-extensive with the earth; and of all these things possessed, exercised, enjoyed, protected under a system of liberty chastened by the law which maintains it, and of law softened and mitigated by the spirit of liberty which it breathes throughout. Sir, I know, as well as any one, what compensations there are for all this opulence and power, for it is the condition of our being that we “buy our blessings at a price.” I know that there are disturbing causes which have hitherto marred, in some degree, the effect of this high and mighty civilization; but the hand of reform has been already applied to them, and every thing promises the most auspicious results. I have it on the most unquestionable authority, because, from an unwilling witness, that within the memory of man, never were the laboring classes of England so universally employed, and so comfortably situated, as at the beginning of the present year.*

But I said that there was another nation that had some experience in banking and its effects. Sir, I dare not trust myself to speak of my country with the rapture which I habitually feel when I contemplate her marvellous history. But this I will say, that on my return to it, after an absence of only four years, I was filled with wonder at all I saw and all I heard. What upon earth is to be compared with it? I found New York grown up to almost double its former size, with the air of a great capital, instead of a mere flourishing commercial town, as I had known it. I listened to accounts of voyages of a thousand miles in magnificent steamboats on the waters of those great lakes which, but the other day, I left sleeping in the primeval silence of nature, in the recesses of a vast wilderness; and I felt that there is a grandeur and a majesty in this irresistible onward march of a race created, as I believe, and elected to possess and people a continent, which belong to few other objects, either of the moral or material world. We may become so much accustomed to such things that they shall make as little impression upon our minds as the glories of the heavens above us; but looking on them lately as with the eye of the stranger, I felt what a recent English traveller is said to have remarked, that, far from being without poetry, as some have vainly alleged, our whole country is one great poem. Sir, it is so; and if there be a man that can think of what is doing in all parts of this most blessed of all lands, to embellish and advance it; who can contemplate that living mass of intelligence, activity, and improvement, as it rolls on in its sure and steady progress to the uttermost extremities of the West; who can see scenes of savage desolation transformed, almost with the suddenness of enchantment, into those of fruitfulness and beauty, crowned with flourishing cities, filled with the noblest of all populations; if there be a man, I say, that can witness all this passing under his very eyes, without feeling his heart beat high, and his imagination warmed and transported by it, be sure, sir, that the raptures of song exist not for him; he would listen in vain to Tasso or Camoens, telling a tale of the wars of knights and crusaders, or of the discovery and conquest of another hemisphere.

Sir, thinking as I do of these things—not doubting, for a moment, the infinite superiority of our race in every thing that relates to a refined and well ordered public economy, and in all the means and instruments of a high social improvement, it strikes me as of all paradoxes the most singular, to hear foreign examples seriously proposed for our imitation in the very matters wherein that superiority has ever appeared to me to be most unquestionable. The reflection has occurred to me a thousand times, in travelling over the continent of Europe, as I passed through filthy, ill-paved villages, through towns in which there is no appearance of an improvement having been made since the Reformation, as I have looked at the wretched hovel of the poor peasant or artisan, or seen him at his labor with his clumsy implements and coarse gear—what a change would take place in the whole aspect of the country, if it were to fall into the hands of Americans for a single generation!

But is it paper money and the credit system alone that have achieved all these wonders? I do not say so, sir; but can you say, can any one presume to say, that they have not done much of all this? I know that the cardinal spring and source of our success is freedom—freedom with the peculiar character that belongs to it in our race—freedom of thought, freedom of speech, freedom of action, freedom of commerce, freedom, not merely from the oppressions, but from those undue restraints, and that impertinent interference of Government in the interests properly belonging to individuals, which stand in the way of all improvement in the nations of continental Europe. It is this vital principle, the animating element of social equality, tempered and sobered by a profound respect for the authority of the laws, and for the rights of others, and acting upon that other prominent characteristic of the Anglo-Norman race, the strong instinct of *property*, with the personal independence and personal *comfort* that belongs to it, that explains our unrivalled and astonishing progress. But of this rational, diffusive liberty among a people so intelligent as ours, the credit system is the natural fruit, the inseparable companion, the necessary means and instrument. It is a part and parcel of our existence. Who ever heard of *credit* in a despotism or anarchy? It implies *confidence*—confidence in yourself, confidence in your neighbor, confidence in your Government, confidence in the administration of the laws, confidence in the sagacity, the integrity, the discretion of those with whom you have to deal; confidence, in a word, in your destiny and your fortune, in the destinies and the fortune of the country to which you belong; as, for instance, in the case of a great national debt. It is the fruit, I say, of all that is most precious in civilized life, and to quarrel with it is to be ungrateful to God for some of the greatest blessings he has vouchsafed to man. Compare Asia with Europe; hoarding has been the usage of the former from time immemorial, because it is slavish, oppressed, and barbarous; and it is curious to see the effect of English laws in breaking up (as they are doing) that system in Hindostan. Depend upon it, sir, all such ideas are utterly alien to our way of thinking—to all the habitudes of our people, and all the interests of the country. My friends from beyond the mountains are familiar with the great principle, the magical effect of credit in a young and progressive country. They know what miracles are wrought by a small advance of money to enable enterprise and industry to bring into cultivation a virgin soil. They know how soon the treasures of its unworn fertility enable them to pay off a loan of that sort with usurious interest, and make them proprietors of estates rising in value with the lapse of every moment. Compare the great Western country now with what it was twenty years ago—sell it *sub hasta*—and compute, if the powers of arithmetic will enable you to do so, the augmentation of its riches. Sir, this is one of the phenomena of our situation to which attention has hardly ever been called—the manner in which the mere increase of pop-

Sub-Treasury Bill.

[H. OF R.]

nation acts upon the value of property. To be struck with the prodigious results produced in this simple way, you have only to compare the estimated taxable property in Pennsylvania and New York, when it was returned for direct taxation in 1799, with the returns of the same property for the same purpose in 1813, after an interval of only fourteen years*—you will see how it is that our people have been enriched by debt, and, “by owing, owe not”—how, with a balance of payments almost continually against them from the first settlement of the country, they have grown in riches beyond all precedent or parallel. You will appreciate all the blessings of the credit system, and imagine, perhaps, how this wonderful progress could have been impeded and embarrassed by the difficulties of a metallic circulation. †

But the *fluctuations* of the currency—the ruinous irregularities of bank paper! Why, sir, I have already shown they belong to commerce itself; not to the means which it employs, and that there is no remedy for them. But, after all, what is the sum of the evil? Look again at general results. Tell me not that reactions produce fewer disasters, or less extensive derangements of money and circulation, in countries whose business is principally metallic. It may be so; but what does that prove? If you never soar, you will be in no danger of falling, certainly; but then,

Serpit humi tutus nimium timidus que procellæ.

A go-cart may be a very safe contrivance for the tottering footsteps of infancy; but is it thus that manly vigor is to be trained for the dust and heat of the Olympic race? Sir, it is the condition of all that is grand and awakening in nature, to be somewhat wild and irregular. In the moral world, especially, peril and difficulty are the price which Providence exacts of us for all great excellence and all eminent success. It is in struggling with them that the heroic virtues which elevate and purify humanity are called forth and disciplined; and it is precisely because our people have been trained in that stern school that they have effected more, and are now able to effect more, with equal means, than any other in the world. Sir, it is not our currency only that is obnoxious to the imputation of irregularity. What is democracy; popular government itself? How often has it fallen to my lot to defend it by the very considerations which I now urge on a kindred topic, when foreigners have spoken to me of the disorders that have occasionally checked our history. When they exaggerated the importance of such events, I have reminded them that all human institutions must have their imperfections; and that it is by their general effects in a long course of experience, not by occasional accidents, however striking and important, that they are to be judged. That the absence of restraint which leads to occasional licentiousness, fosters that bold, robust, energetic, and adventurous spirit, and that habit of haughty self-reliance and independent judgment, which are the very soul of republican government; which have rendered that form of Government, wherever it has existed, so illustrious for heroic achievements, and has made every era of liberty in the history of mankind, even in its most imperfect form, an era of flourishing prosperity and progress. Sir, such a people, as has been said of beings of a higher order, “live throughout, vital in every part;”

“All head they live, all heart, all eye, all ear,
All intellect, all sense.”

This is the great secret of our superiority, and of that of every free people; not the forms of a constitution, not the outlines of a system, not mere organization, but the principle of *Life*, the all-pervading animation and vitality that informs the whole body politic, and gives it the warmth, and strength, and activity, the winning graces and expressive countenance of a man, instead of the cold and repulsive stillness of a painted corpse. Jury trial is another of these

irregularities—liable, undoubtedly, to much criticism in detail, and scarcely susceptible, as a juridical institution, of a strict defence in theory—yet what should we think of a reformer that should propose to us the abolition of a system so full of practical good, because it was unknown until recently any where but in England, and often leads, as it certainly has often led, to great abuse and injustice?

But, then, it seems, our banking system is an innovation, introduced only a century and a half ago, and deviates from the primitive model of the Bank of Amsterdam—the *honest* system, as it is called—and that, instead of lending money, it lends merely credit.

As to the idea of its being an innovation, I would just remark, that it had its origin at that great epoch of human improvement, as I must still be allowed to call it, when mankind ceased to cut each other's throats for differences in religion, and began to make war for colonies and commerce—an era perfectly familiar, as such, to every one that has studied history philosophically. But there is something more in the historical reminiscence than the mere fact just referred to. If the comparative effects of Dutch and English banking are to be judged by the event, what an instructive lesson is to be drawn from a parallel between those two Powers, at the close of the 17th century, and their relation towards each other now! Where is Van Tromp? Where is de Ruyter? What is become of the mighty fleets which disputed the dominion of the seas with England and France? Poor Holland! her defenceless ports, blockaded by British squadrons—her court brow-beaten by British diplomacy—shorn of all her strength and glory, she seems almost sinking again into the waters out of which she merged. So much for the innovation. But what is the objection to the system? Let us understand each other. I will put a case. The quantity of the precious metals required in any transaction, or any number of transactions, between two countries, (or two individuals, for it comes to the same thing,) depends not only upon the balance of payments between them, but also in the confidence they have in each other. Thus, Hamburg imports corn for England, in a season of dearth, from Prussia. If trade be prosperous and the world at peace, she will probably pay for this corn by a bill at six months, with interest, and when the time comes for meeting her engagement, she will do so by sending to Dantzic a cargo of colonial produce.—(Thorn-ton.) But should the times be such (from war, commotions, &c.) as to make commerce uncertain, or to impair credit, the purchase can be made only for cash, and paid for in gold and silver. Now, sir, commerce being a mere exchange of commodities, every body must see, at a glance, that it is very much more promoted by a state of peace and order, than by one of war and commotion; by a state of confidence, than by one of distrust; by a state of things that admits of payments in bills, than by one that requires payments in cash. In a simple operation, like the one described, this is quite manifest, and yet the whole theory of money and of banking, is contained in that simple operation.

Sir, it explains at once why it is that in countries very far advanced in commerce and civilization, the precious metals, for all purposes of currency, are superseded by commercial paper, as is particularly the case in England, whose paper circulation of all sorts, is something like two hundred millions, resting upon a basis of only thirty millions of specie.* Money is nothing more than what is called by the brokers “a bought and sold note;” it is a token, which shows that its holder has parted with commodities to that amount, and that he is entitled to receive their equivalent in other commodities, whenever it shall be his pleasure to do so. Why should that token be of gold? Why should a mere title or evidence of debt, be itself of a material as

* Mr. Burgess, in the Minutes of Evidence, &c. before the committee of the House of Commons, in 1812.

* Pitkin's Statistics, 1835. † Mr. Gallatin's pamphlet, p. 68.

H. of R.]

Sub-Treasury Bill.

[Oct. 13, 1837.]

costly as the thing of which it is the symbol and the evidence?

It is clear that were there any means of insuring society against excessive issues of paper, besides its convertibility into gold and silver—were not that the only practical test hitherto discovered, by which prices in different countries can be compared—all commercial nations would dispense with the precious metals as a medium of exchange. But, as yet, there are no such means, and the currency, theoretically the most perfect, is for the present impracticable. The nearest approximation to it has certainly been made occasionally in the United States, where the specie basis has just answered the purpose of ascertaining that our currency was on a level with that of other nations.

But there is another step in the commercial operation just mentioned. The holder of the bill of exchange, received in payment of coin, stands in need of some other commodity, which his own credit does not enable him to procure. He applies to a broker, or any other capitalist, for the cash, or, what will answer just as well, his credit, in the shape of a note payable on demand, or at a short date, for which the original bill, at six months, is given in exchange, with a reasonable discount. This last operation is what is considered as the great abomination of banking. The bank receives a discount on giving its own bill, payable on demand, or one at a short date, (for which, therefore, it is compelled to reserve or prepare a fund,) for a bill payable at six months, of which, of course, payment cannot be demanded until the expiration of that term. And now I ask, where is the difference between the first operation, which every body must perceive is eminently conducive to the extension of commerce, and the last? What objection can be made to it that does not lie equally against the drawing and discounting of bills of exchange, an improvement of which Europe has been boasting for at least six hundred years, and of which the advantages have never, to my knowledge, been questioned before? Why is not a credit founded on property as good in the one case as in the other? And why should gold and silver be used in either, when they are not wanted?

The banking system, sir, is only one form of that division of labor which takes place in all opulent countries. It leads to a great economy both of time and money; of the former, because the business of a whole community, in receiving and paying away, can be transacted by the clerks of a single institution as well as by one hundred, or one thousand times the number, in the separate employment of individual merchants; of the latter, because, instead of each individual in a community reserving the quantity of gold and silver necessary to meet our current demands, a much smaller proportional amount, kept by a banking-house, has been found to answer the wants of the whole society. But the utility of that system is not confined to the advantages just mentioned. It appears to me very clear, in the first place, that the credit system, carried to the extent in which it exists in England and the United States, could not possibly be made to rest upon any thing so liable to be disturbed by a foreign demand, and by other contingencies, as the metallic basis, and of which a given quantity cannot, therefore, be counted on at any given time. What is commonly called the currency of a country, that is to say, bank paper and the precious metals, really constitute a very small portion of it; but it may be considered as the test or touchstone of all the rest; and if engagements in bills of exchange, &c., be not met according to their tenor, in what is considered as cash, it is difficult to calculate the effects of the alarm that may ensue. But there is another point of view in which banks appear to me quite essential to our commercial system. It is that, according to the remark of an excellent writer,* the appreciation of the credit of a number of persons engaged in

commerce, has become a science, and to the height to which that science is now carried in Great Britain, (and in this country,) that country is, in no small degree, indebted for the flourishing state of its internal commerce, for the general reputation of its merchants abroad, and for the preference which, in this respect, they enjoy over the traders of all other nations.

Sir, I have been driven to this elementary way of considering the subject, by the course which the argument has taken here and elsewhere, and because, in solemnly reviewing, as we are now compelled to do, the whole monetary system of the country, it is of the very last importance that the subject, in all its aspects, should be fairly presented to the people. I shall, therefore, proceed briefly to consider the question, how far it is practicable or desirable to substitute a metallic currency for bank paper, or even very materially to widen the metallic basis of our present circulation.

I presume it will hardly be disputed that, by a general return to the precious metals, as the only medium of exchange for the whole commercial world, the operations of trade would be everywhere embarrassed and impeded, and the value of money enhanced; or, which is the same thing, the prices of commodities reduced in an incalculable degree. How far a similar effect has already been produced, by the diminution of the supply from the Mexican and South American mines, within the last twenty years, is one of the most difficult and controverted questions of the day. This is not a fit occasion for stating the arguments advanced by the advocates of different views of that subject, but I will mention to the committee, that in a very able work, to which I have already referred as having been recently sent to me, the author, who examines this point with perfect candor, advances the opinion, that thousands have, within the period alluded to, been precipitated into embarrassments from that cause alone.* If it be true, as is alleged by Jacobs, that the whole stock of coin in circulation in 1829, was less, by upwards of £60,000,000, than that which circulated in 1809; and if any thing like the supposed diminution of the actual quantity by abrasion, by loss, by consumption in manufactures takes place, (one per cent.* a year,) it becomes matter of serious speculation, what means shall be adopted to obviate so great an inconvenience as a continually decreasing metallic basis, at a period when commerce and its productive powers are so immensely on the increase. Sir, that question is infinitely more interesting in a highly progressive country than in any other. In such a country, the currency must be regularly enlarged, with the growth of its population and of its productive power, or it is subjected to the most terrible of all evils, falling prices. Every body that has ever treated of such subjects, has dwelt upon the effects of an increasing currency, as wonderfully favorable to industry. No more striking example of this truth can be desired than what was witnessed in the 16th century, after the importation of gold and silver from America began to produce a decided effect upon the distribution of wealth. It is admitted on all hands to have been the period of the greatest improvement in society that has occurred in its history; and of all countries, be it remembered, England benefited most by the general rise of prices, because so large a portion of her farmers held leases for long terms of years, and paid money rents; the increase of the circulation operating to reduce the real value of the returns made to the landlord in favor of his tenant. The great benefit of a full and especially an increasing circulation thus consists not only in quickening and facilitating exchanges, (itself an immense stimulus to industry,) but in securing to the industrious classes rather a larger proportion of the income of society than they would otherwise enjoy. Every thing which they buy to sell again advances in price while it is

* Thornton.

* Money and its Vicissitudes in Value.

Sub-Treasury Bill.

[H. OF R.]

in their hands, and this unquestionable truth is of itself a total refutation of all that is said concerning the oppressive operation of bank paper upon the productive classes, by the very persons who, in the same breath, speak of its excess and depreciation.

With a population, then, increasing at the rate of four or five per cent. a year, and with an accumulation of capital and productive power proportionably greater, I hold it to be utterly absurd to talk of any thing like a metallic currency in the United States. There is no possible means of procuring it; and if by any means it could be procured, I venture to affirm that our people would get rid of it in the course of a few years, though all the penal laws of Spain against the exportation of gold and silver should be re-enacted here—laws which were passed with no other effect, even in that country, but to show the utter futility of such legislation. I say, sir, that, with their present habits of active enterprise and strict economy, the American people would export the precious metals as fast as they were imported, beyond any amount of them which might be absolutely necessary for the domestic exchanges of the country, and they would do so, because gold and silver would be of more use abroad in purchasing commodities, and would be wholly superfluous at home, where paper would do as well. If you put down “the banks,” it would have no effect but to set up something worse in their place, in the shape of private paper. There are some things over which the most despotic law-givers are unable to exercise any control; and one of them, as all experience shows, is this commerce in bullion.

Sir, it has been said that the only advantage of a paper currency over the precious metals consists in its cheapness. I am, by no means, as you may gather from what I have said, ready to admit this; but, supposing it to be true, is that saving really an unimportant matter? Mr. Gallatin, in a pamphlet of signal ability,* has, as I conceive, fallen into a grave error on this subject, which it is so much the more important to rectify, as I perceive that he has misled others more disposed than himself to turn a speculative error into a practical mischief. He states the whole benefit derived from the use of paper, instead of the precious metals, in the United States in 1830, including, under the name of circulation, private deposits in the banks, as they ought undoubtedly to be, at about five millions of dollars a year. It is true that, according to principles admitted by Mr. Gallatin, the progress of the country, both in wealth and population, in the last seven years, would require a very considerable addition to be made to this estimate, in order to a correct application of it to our actual condition. But, sir, it appears to me that the estimate was made on data altogether erroneous. In the first place, the quantity of currency, if it were metallic, necessary to the circulation of this country, was prodigiously underrated. For reasons that need not be stated here, it is found that a given amount of metallic currency does not circulate as rapidly as an equal amount of paper, and, therefore, that more of it is, *ceteris paribus*, required to do the same business. But, without going into such minute inquiry here, why should the United States, with sixteen millions of inhabitants, and relatively the most active trade, both foreign and domestic, in the world, and with extraordinary productive power of all sorts, not need, at the very least, half the circulation in France, with only double their population, and not half their industry? The stress that ought to be laid on this latter circumstance may be illustrated by comparing Asia with Europe in this particular: double the population in the former, possessing, according to the most accurate researches, only one-fifth the quantity of gold and silver, which, in addition to paper of all sorts, is required in the latter. Now, the circulation of France was, before the first Revolution, set down by

Necker at £88,000,000;† and Theirs, in his history of that event, makes a similar estimate.‡ Its present amount ought, in reference to the increase of her capital and population, to be at least 600,000,000 dollars; and accordingly, as was observed by one of my colleagues, [Mr. THOMSON,] it is stated at that on good authority.‡ Mr. Rothchild, in his examination before the committee of the House of Commons, in 1832, mentions the paper circulation of the Bank of France as amounting to 750,000,000 francs. According to this, then, we should require, on the footing of population alone, at least 300,000,000 dollars. So much for the amount; now for the loss upon it.

Mr. Gallatin considers it only as so much interest on dead capital, and even the interest he puts at an exceedingly low rate. But I apprehend the difference to the country between having a vast inert mass of gold and silver as currency, and turning it into productive capital, must be determined not in relation to interest merely, but to the profit of stock laid out in active industry, which is nowhere in this country less than ten per cent., and in the great majority of cases, the new States and all included, nearer double that amount on an average. You see, then, sir, what an enormous loss a metallic currency would be to the nation, without taking into account its wear and tear. Look back at the half century that has passed away, and say what that loss would have been, on principles of compound interest, from the beginning up to the present day. Why, sir, it exceeds all powers of calculation, nay, of imagination. Do not suppose for a moment that so important, so palpable a truth, although never stated in abstract terms, or as a general proposition, has not occurred to the people of the United States. They have felt it, without perceiving it; they have acted upon it, without reasoning about it; they have perfectly well comprehended the uses of money, without studying the principles of currency; and they have preferred paper as a circulating medium to gold and silver, on the simplest maxims of prudence and economy. You may depend upon it, this conclusion is as deeply rooted as it is just. You will never be able to shake it. All your policy will be of no avail, as all legislation will be forever vain which comes into conflict with the genius of a people, especially in matters so deeply and visibly affecting their private interest. The barbarian who, in his impotent rage, threw fetters into the Hellespont, and scourged its foaming billows, did not wage a more insane war against the nature of things.

But we are told that if it is an experiment that has been proposed to us, we need not be alarmed at it, because we are accustomed to experiments, and successful ones; that our constitution itself is a mere experiment. Sir, I deny it utterly, and he that says so shows me that he has either not studied at all, or studied to very little purpose, the history and genius of our institutions. The great cause of their prosperous results—a cause which every one of the many attempts since vainly made to imitate them on this continent or in Europe only demonstrates the more clearly—is precisely the contrary. It is because our fathers made no experiments, and had no experiment to make, that their work has stood. They were forced, by a violation of their historical hereditary rights under the old common law of their race, to dissolve their connexion with the mother country. Their external, their federal relations were of course changed, and in that respect, and in that respect only, they were compelled to do their best in the novel situation in which they stood. What relates, therefore, merely to the union of the States is all that gives the least countenance to this superficial idea of an “experiment” which has done so much to misguide the speculations of some visionary minds upon these important mat-

H. OF R.]

Sub-Treasury Bill.

[Oct. 13, 1837.]

ters. Even in this respect, however, an attentive study of our history will show that strong federal tendencies existed, and had, frequently, on former occasions, manifested themselves.* But the whole constitution of society in the States, the great body and bulk of their public law, with all its maxims and principles, all that is republican, in short, in our institutions, remained after the Revolution, and remains now, with some very subordinate modifications, what it was from the beginning. Our written constitutions do nothing but consecrate and fortify the "plain rules of ancient liberty," handed down with Magna Charta from the earliest history of our race. It is not a piece of paper, sir, it is not a few abstractions engrossed on parchment, that make free Governments. No, sir, the law of liberty must be inscribed on the heart of the citizen; the word, if I may use the expression without irreverence, must become flesh; you must have a whole people trained, disciplined, bred, yea, and born, as our fathers were, to institutions like ours. Before the colonies existed, the petition of right, that Magna Charta of a more enlightened age, had been presented in 1628 by Lord Coke and his immortal co-peers. Our founders brought it with them, and we have not gone one step beyond them. They brought these maxims of civil liberty, not in their libraries, but in their souls; not as philosophical prattle—not as barren generalities, but as rules of conduct; as a symbol of public duty and private right, to be adhered to with religious fidelity; and the very first pilgrim that set his foot upon the rock of Plymouth, stepped forth a living constitution! armed at all points to defend and to perpetuate the liberty to which he had devoted his whole being.

It only remains for me to advert briefly to one or two additional topics, and I have done. It has been argued as if the currency given to bank paper in this country were due almost exclusively to the countenance which Government affords it, by receiving it in payment of public dues. Certainly, sir, the patronage of Government is an important concurring cause of this credit, but it is not true that it is essential to it. What does the house of Rothschild owe to the Governments of Europe—that house to which all the Governments on the continent are obliged to have recourse in their financial exigencies? And here let me call the attention of those who declaim so vehemently against the agency of banking corporations, to the fact, that this mighty house, with its scarcely less than royal influence and splendor, like most of the other establishments of the same kind in Europe, is no corporation at all, but a mere private partnership; and to the additional fact, that this colossal fortune has been amassed in little more than a single generation, by an obscure person, born in a corner of the Juden Strasse of Frankfort on the Main, and his four sons. Do you not see, then, sir, that the odious common places, about "the money power," and "the political powers," either have no meaning, or apply with all their force to every accumulation of capital, and all the great results of modern commerce? The "money power," I presume, signifies "the power of money," which is widely diffused in this country, thanks to the protection of equal laws, and which will exist and continue to have its influence so long as those laws shall protect it from confiscation, whether it shall borrow the credit of the Government, or the Government shall borrow its credit. It is scarcely necessary to notice an idea, analogous to the last, which has been very much insisted on, and that is, that the commerce of New York has been built up by Government credits. Why, sir, this does appear to me too extravagant to need exposure. New York has been built up by her unquestionable natural advantages, and there is no measure of this Government—there is only one event that can possibly deprive her of her immense commercial ascendancy, the dissolution of the Union—that, and nothing but that,

* Convention at Albany, &c.

can do it. Commerce, as I have already remarked, leads everywhere to centralization: look at Liverpool—look at Havre, the last, in a hard-money country. But on this head there is a very important consideration, which has been urged with all his admirable eloquence by one of my colleagues in the Senate, [Mr. PRESTON.] If this concentration of commercial business at that city be injurious to the others now, what will it become if, by collecting the revenue in gold and silver, and thus making gold and silver mere merchandise, you add to the disadvantages of centralization all the difficulties of procuring coin; make New York the great specie market; and render the whole country tributary to the money changers of Wall street?

Sir, a word more to the South, and for the South. When your system of protection was still in all its vigor, we (I mean the people of South Carolina) sent you a protest against its principles and tendency, which contained, among other objections to it, one that deserves to be repeated here. We told you that we depended absolutely upon commerce—commerce on the largest scale—commerce carried on as it has been for the last half century, with an ever-increasing production, provoking and creating an ever-increasing consumption, and permitting us to send a million (now a million and a half) of bales of cotton into the market, without any danger of a glut. We told you the staple commodities, especially the principal one which we produced, were among the very few in the production of which slave labor can enter into competition with free. We reminded you that great revolutions in trade sometimes arose from apparently slight causes, and that, however far it might be from your purpose, or even your apprehensions, it was possible that your legislation might occasion us the loss of our foreign market, our only resource; that the result of that loss to us would be poverty and utter desolation; that our people, in despair, would emigrate to more fortunate regions, and the whole frame and constitution of our society would be seriously impaired and endangered, if not dissolved entirely. And we adjured you not to persist in a course of legislation of which the benefits to yourselves, even were they unquestionable, were nothing in comparison of the danger to which they exposed us—a danger which, however contingent or remote, involved our whole existence, and could not be contemplated without well-founded alarm. Sir, I repeat to you now—I repeat to the representatives of the whole South on this floor—the words then addressed to the House on a different subject. Let well alone. Resist this uncalled-for innovation, of which no one can foresee the whole extent nor the ultimate results. Mark what your Secretary of the Treasury has told you in the very paper in which he reveals the project on the table—you produce too much cotton. Go home, gentlemen of the South, and tell your people that their successful industry is a vice; that the fertility of their soil is a curse; that their excessive production occasions disorders in the State; and that the remedy for our troubles is, that they should live on short commons. Let them co-operate with our political economy, by depriving themselves of the little mercantile capital they have; let them abolish those corporations to which people, who cannot themselves do business with the widow and the orphan, have contributed their means for the accommodation of commerce; let them but do this, and their docility will be admirable, and shall have our approbation.

Sir, before I take my seat, there is one other topic that I feel it my duty to advert to—I mean to the supposed injurious effects of banking institutions upon the laboring classes of society. Although I have no doubt but that there are many defects in the constitution, as well as the management of those institutions in this country, and should be most willing to co-operate, if occasion served, in reforming them, I have no hesitation in acquitting them at least of this charge. Who that has ever heard of the re-

OCT. 13, 1837.]

Sub-Treasury Bill.

[H. OF R.]

lation between capital and labor, between wages and profits, but must see at once that it is unfounded; and, accordingly, Hume objects to banks that, by their issues, they raise wages, and so hurt the manufacturing interests of a nation. I have already remarked, that one of the effects of an increasing currency is to make a distribution of the wealth of society more favorable to the industrious classes of it—to confiscate, in a manner, the property of those who live on fixed incomes, for the benefit of those who produce the commodities on which those incomes are laid out. It is for this reason that the radicals of England—Mr. Atwood, for example—are all strenuous advocates of paper money, and even of inconvertible paper. The idea that the poor are to gain by a return to a metallic currency is, so far as I know, confined to their friends in this country, whose zeal is certainly greater than their knowledge.

It is true, sir, that among other disadvantages attending frequent fluctuations in the currency, it is said that wages are the last thing that rises in a case of expansion. And that may be so in countries where the supply of labor is greater than the demand; but the very reverse is most certainly the fact here, and where the demand, especially when stimulated by any extraordinary increase, real or fictitious, of capital, is always greater than the supply. All price is a question of power, or relative necessity between two parties; and every body knows that, in a period of excitement here, wages rise immediately, and out of all proportion more than any thing else, because the population of the country is entirely inadequate to its wants. During the last year, for instance, the price of labor became so exorbitant, that some of the most fertile land in South Carolina, rice fields, which have been cultivated for a hundred years, were in danger of being abandoned, from the impossibility of paying for it. Sir, as a Southern man, I represent equally rent, capital, and wages, which are confounded in our estates; and I protest against attempts to array, without cause, without a color of pretext or plausibility, the different classes of society against one another, as if, in such a country as this, there could be any natural hostility or any real distinction between them—a country in which all the rich, with hardly an exception, have been poor, and all the poor may one day be rich—a country in which banking institutions have been of immense service, precisely because they have been most needed by a people who had all their fortunes to make by good character and industrious habits. Look at that remarkable picture—remarkable not as a work of art, but as a monument of history—which you see in passing through the rotundo. Two out of five of that immortal committee were mechanics, and such men!* In the name of God, sir, why should any one study to pervert the natural good sense and kindly feelings of this moral and noble people—to infuse into their minds a sullen envy towards one another, instead of that generous emulation which every thing in their situation is fitted to inspire—to breathe into them the spirit of Cain, muttering deep curses and meditating desperate revenge against his brother, because the smoke of his sacrifice has ascended to heaven before his own! And do not they who treat our industrious classes as if they were in the same debased and wretched condition as the poor of Europe, insult them by such an odious comparison? Why, sir, you do not know what poverty is. We have no poor in this country, in the sense in which that word is used abroad. Every laborer, even the most humble, in the United States soon becomes a capitalist, and even, if he choose, a proprietor of land; for the West, with all its boundless fertility, is open to him. How can any one dare to compare the mechanics of this land (whose inferiority, in any substantial particular, in intelligence, in virtue, in wealth, to the other classes of our society, I have yet to learn) with that race of outcasts, of which so terrific a pic-

ture is presented by recent writers—the poor of Europe! a race, among no inconsiderable portion of whom famine and pestilence may be said to dwell continually; many of whom are without morals, without education, without a country, without a God! and may be said to know society only by the terrors of its penal code, and to live in perpetual war with it. Poor bondmen! mocked with the name of liberty, that they may be sometimes tempted to break their chains, in order that, after a few days of starvation in idleness and dissipation, they may be driven back to their prison house to take them up again, heavier and more galling than before; severed, as it has been touchingly expressed, from nature, from the common air, and the light of the sun; knowing only by hearsay that the fields are green, that the birds sing, and that there is a perfume in flowers.†

And is it with a race whom the perverse institutions of Europe have thus degraded beneath the condition of humanity, that the advocates, the patrons, the protectors of our working men, presume to compare them? Sir, it is to treat them with a scorn at which their spirit should revolt, and does revolt. Just before I left Charleston, there was a meeting called for some purpose, which was regarded by the people of that city as unfavorable to public order. There was something, I suppose, in the proceedings which looked to the invidious distinction of which I have been speaking; for it led, as I have heard, to an expression of sentiment from one of our mechanics,‡ which struck me as noble beyond all praise. He said he wondered what could be meant by addressing to the industrious classes, particularly, all inflammatory appeals against the institutions of the country, as if they were not a part of the community as much interested in its order and peace as any other; as if they had no ties of sympathy or connexion with their fellow-citizens; above all, as if they had not intelligence and knowledge enough to take care of their own interests, but were reduced to a state of perpetual pupillage and infancy, and needed the officious protection of self-constituted guardians! Sir, that was a sentiment worthy of a freeman, and which may be recorded, with honor, among the sayings of heroes.

Mr. Chairman, I thank the committee for the attention with which it has honored me. I have detained it long; but I was full of the subject, which appears to me to be one of vast importance in all its bearings. I have spoken what I felt and thought, without reference to party. But I will say one word to those with whom I have generally acted on this floor. I have heard that some of them disapprove this measure, but are disposed to vote for it to oblige their friends. Sir, this is a strange and a great mistake. A true friend ought to be a faithful counsellor. Let them remember the deep reproach which the great poet puts in the mouth of one of his heroes:

"Hadst thou but shook thy head, or made a pause,
When I spoke darkly what I purposed;
Or turned an eye of doubt upon my face!"

When Mr. LEGARE had concluded,

Mr. NAYLOR, of Pennsylvania, rose and said, it was with great reluctance that he rose, for the first time, in this hall. He felt himself obliged to rise. Yes, (said Mr. N.,) I am impelled to speak. I cannot remain silent. I voted for the introduction of this bill to our deliberations some days since, on purpose to afford the honorable gentleman from South Carolina [Mr. PICKENS] an opportunity to express his views in relation to it. I perceived his anxiety to speak, and felt a friendly disposition to gratify him. If I were surprised when I heard him draw into the vortex of discussion the exciting topics of abolition, Texas, slavery, and locofocoism, topics which have nothing to do with this subject, what must have been my feelings when I heard him denounce the institutions of the North as mercenary

Sub-Treasury Bill.

[Oct. 13, 1837.]

and slavish, and exalt those of the South as ancient, patriarchal, and almost perfect; boldly avow that the laborers of the North were the subjects of the Northern capitalists; put the Northern workmen on a footing with the Southern slaves, and threaten to preach insurrection to the laborers of the North. Yes, preach insurrection to the Northern laborers!

I am a Northern laborer. Ay, sir, it has been my lot to have inherited as my only patrimony, at the early age of nine years, nothing but naked orphanage and utter destitution; houseless and homeless, fatherless and penniless, I was obliged, from that day forward, to earn my daily bread by my daily labor. And now, sir, when I take my seat in this hall as the free representative of a free people, am I to be sneered at as a Northern laborer, and degraded into a comparison with the poor oppressed and suffering negro slave? Is such the genius and spirit of our institutions? If it be, then did our fathers fight, and bleed, and struggle, and die in vain!

But, sir, the gentleman has misconceived the spirit and tendency of Northern institutions. He is ignorant of Northern character. He has forgotten the history of his country. Preach insurrection to the Northern laborers! Preach insurrection to me! Who are the Northern laborers? The history of your country is their history. The renown of your country is their renown. The brightness of their doings is emblazoned on its every page. Blot from your annals the deeds and the doings of Northern laborers, and the history of your country presents but a universal blank.

Sir, who was he that disarmed the Thunderer, wrested from his grasp the bolts of Jove, calmed the troubled ocean, became the central sun of the philosophical system of his age, shedding his brightness and effulgence on the whole civilized world—whom the great and mighty of the earth delighted to honor; who participated in the achievement of your independence; prominently assisted in moulding your free institutions, and the beneficial effects of whose wisdom were felt to the last moment of "recorded time?" Who, sir, I ask, was he? A Northern laborer—a yankee tallow-chandler's son—a printer's runaway boy!

And who, let me ask the honorable gentleman, who was he that in the days of our Revolution led forth a Northern army, yes, an army of Northern laborers, and aided the chivalry of South Carolina in their defence against British aggression, drove the spoilers from their firesides, and redeemed her fair fields from foreign invaders—who was he? A Northern laborer, a Rhode Island blacksmith—the gallant General Greene, who left his hammer and his forge and went forth, conquering and to conquer, in the battles of our independence! And will you preach insurrection to men like these?

Sir, our country is full of the glorious achievements of Northern laborers! Where is Concord, and Lexington, any Princeton, and Trenton, and Saratoga, and Bunker Hill, but in the North? And what, sir, has shed an imperishable renown on the never-dying names of those hallowed spots but the blood and the struggles, the high daring and patriotism, and sublime courage of Northern laborers? The whole North is an everlasting monument of the freedom, virtue, intelligence, and indomitable independence of Northern laborers! Go, sir, go preach insurrection to men like these!

The fortitude of the men of the North under intense suffering for liberty's sake, has been almost God-like! History has so recorded it. Who comprised that gallant army that without food, without pay, shelterless, shoeless, penniless, and almost naked, in that dreadful winter—the midnight of our Revolution, whose wanderings could be traced by their blood-tracks in the snow! whom no arts could seduce, no appeal lead astray, no suffering disaffect, but who, true to their country and its holy cause, continued

to fight the good fight of liberty, until it finally triumphed? Who, sir, were these men? Why, Northern laborers; yes, sir, Northern laborers!

Who, sir, was Roger Sherman, and—but it is idle to enumerate. To name the Northern laborers who have distinguished themselves and illustrated the history of their country, would require days of the time of this House. Nor is it necessary. Posterity will do them justice. Their deeds have been recorded in characters of fire!

And such are the workmen of the North at this time. They have not degenerated; they are in all respects worthy of their intelligent and sturdy sires. Whose blood was so profusely shed, during the last war, on the Canada lines, but that of the Northern laborers? Who achieved the glorious victories of Perry and McDonough on the lakes, but the Northern laborers? Yes, they "met the enemy and made them theirs." Who, sir, have made our ships the models for all Europe, and sent forth in the late war those gallant vessels that gave our little navy the first place in the marine annals of the world, and covered our arms on the ocean in a blaze of glory, but the skill, and intellect, and patriotism of the Northern laborers? And who, sir, manned these vessels and went forth and for the first time humbled the British lion on the ocean, but the Northern laborers? And who, sir, was he, that noble tar who, wounded, and bleeding, and mangled, and to all appearance lifeless on the deck of one of our ships, on hearing that the flag of the enemy had struck, and that victory had perched on the proud banner of his country, raised up his feeble mangled form, opened his languid eyes once more to the light of heaven, waved his palized hand around his head in token of his joy, and fell back and died. Who, sir, was he? Why, a Northern laborer; a Northern laborer! And yet these men are the slaves of the North, to whom the honorable gentleman is about to preach insurrection!

[Mr. PICKENS explained, and said in substance that he had spoken only of the tendency of Northern institutions to make the workmen of the North tributary to the capitalist, and to prevent them from rising from their laborious situation. That he had not degraded them into a comparison with the slaves, but had said that, if the people of the North would continue to interfere with the slaves of the South, that then he (Mr. PICKENS) would preach insurrection to the Northern laborers!]

Mr. NAYLOR resumed and said: I have not misunderstood the honorable gentleman. That the honorable gentleman does treat the Northern workmen as Southern slaves is evident from what he had just said. If he had not intended to place them in the same degraded situation of slaves, how could he threaten to preach insurrection among them? Sir, the honorable gentleman has mistaken the tendency of Northern institutions, as much as he has misconceived the worth and spirit of Northern character. Our institutions have no such tendency; no, sir, but exactly the reverse. They raise up the laborer. They place every man upon an equality. They give to all equal rights and equal chances, and hold out to all equal inducements to action. Northern institutions tend to keep down the Northern laborers! The whole history of the North, from the landing of the first pilgrim on the rock of Plymouth to this hour, contradicts this position.

I appeal to the Representatives from Pennsylvania. I ask you, sirs, who is Joseph Ritner, that distinguished man, who, at this very moment fills the executive chair of your great State—a man who, in all that constitutes high moral and intellectual worth, has few superiors in this country—one who has all the qualities of head and heart necessary to accomplish the great statesman, and who possesses, in the most enlarged degree, all the elements of human greatness—who, sirs, is he? A Northern laborer—a Pennsylvania wagoner—who, for years, drove his team

OCT. 13, 1837.]

Sub-Treasury Bill.

[H. OF R.]

from Pittsburg to Philadelphia, "over the mountain and over the moor," not "whistling as he went," no, sir, but preparing himself then, by deep cogitation and earnest application, for the high destiny which the future had in store for him. And who, let me ask the same gentlemen, who is James Todd, the present attorney general of Pennsylvania, distinguished for the extent of his legal acquirements, for the comprehensive energy of his mind, for his strength of argument, and vigorous elocution—who, sir, is he? He, too, is a Northern laborer—a Pennsylvania wood-chopper. In early childhood a destitute, desolate orphan, bound out by the overseers of the poor as an apprentice to a laborer! These, sir, are some of the fruits of Northern institutions, some of the slaves to whom the honorable gentleman will have to preach insurrection!

But, if the Northern institutions be hostile to equality, and have the effect that the honorable gentleman contends for, to keep down the workmen and make them tributary to the capitalists, how comes it, how comes it, that I am now, at an early age, a representative in this hall? Sir, the gentleman is utterly, utterly deceived as to the effect of our institutions and the character of public sentiment in the North.

Fellow-freemen of my own, my native district, bankers, capitalists, and merchants, (so much denounced,) manufacturers, mechanics, and laborers, I appeal to you all: Did it ever occur to any one of you, when I was a candidate for the high office to which your free suffrages have elevated me—did it, I say, ever occur to any one of you to object to me because poverty, orphanage, and destitution had once made me a laborer for my daily bread? No, sirs, no, I will do you the justice to answer for you—no! Your inquiry was not, "is he rich or poor, a laborer, a capitalist, a banker, or a merchant?" but "is he a man? has he ability enough moderately to sustain our interests in the great councils of the nation, and nerve and moral courage enough fearlessly to defy the assaults of power, and to vindicate the outraged principles of our constitution?" And here, sir, I now am, and what is there to prevent me from taking my stand by the side of the proudest man in this hall?

Mr. Chairman, it is not the first time that I have heard a parallel run between the slaves of the South and the working-men of the North. For a while, sir, that parallel was made as to the relative condition of the free negroes of the North and the slaves of the South. Recently, however, some of those who advocate the surpassing excellence of the slave institutions of the South, have taken a bolder and more daring stand. Racking their brains for arguments and illustrations to justify slavery as it prevails among them, they have hazarded the bold proposition that slavery exists in every country; and that, in the North, the operatives, though nominally free, are in fact the slaves of the capitalists. Such a proposition is monstrous. I tell you, sir, gentlemen deceive themselves. They slander the free institutions of their country. They wrong the most intelligent and enterprising class of men on earth. I know them well; I have been long associated with them. I have seen them form themselves into libraries and other associations for intellectual improvement. I have seen them avail themselves of every leisure moment for mental culture. I have seen them learned in the languages, skilled in the sciences, and informed in all that is necessary to give elevation to the character of man, and to fit him for the high destinies for which he was designed. Let the honorable gentleman go among them, and he will find them in all respects equal to those who make it their boast that they own all the laborers in the South. Yes, sir, as well qualified to become honorable rulers of a free people—having heads fitted for the highest councils, and fearless hearts and sinewy arms for the enemies of this great nation.

Mr. Chairman, I call upon gentlemen of the North to

bear witness to the truth of what I have said; I call upon them to look back to the days of their childhood and say whom they have seen attain honor, distinction, wealth, and affluence? Are they not the working, the industrious parts of society? And do not the institutions of the North necessarily lead to such results? Sir, when I pause for a moment, and behold what are now the little destitute playmates of my childhood, I am overwhelmed with astonishment. Some of them have gone forth from their homes, become draughters and signers of declarations of independence, founders of new empires, breakers of the chains of despotism, and the earth, even in their youth, has drunk up their blood, shed willingly in the cause of the rights of man. Some have ministered at the altar of their divine Master. Some have led the bar, adorned the Senate, illustrated the judiciary; and others have wandered in the flowery field of literature, trod in the cool, tranquilizing paths of philosophy, delved in the depths of science, and compassed the world with their enterprise. In a word, civilization has no pursuit that they have not already honored and adorned. And yet these men are some of the fruits of those odious institutions against which the eloquent gentleman has undertaken his crusade.

Sir, it is the glory of the Northern institutions that they give to every man, poor and rich, high and low, the same fair play. They place the honors, emoluments, and distinctions of the country before him, and say "go run your race for the prize, the reward shall encircle the brow of the most worthy." Thus it is that every one feels and knows that he has a clear field before him, and that, with industry, prudence, and perseverance, he can command success in any honorable undertaking. He knows that his industry is his own; his efforts are his own, and that every blow he strikes, whilst it redounds to his own immediate advantage, contributes also to the good of the community, and the glory and renown of his country. All honorable employments are open to him. The halls of legislation are open to him; the bar is open to him; the fields of science are before him; there is no barrier between him and the object of his ambition, but such as industry and perseverance may overcome.

Look at the workings of their institutions upon the appearance of the North. Look at her mighty cities, her forests of masts, her smiling villages, her fertile fields, her productive mines, her numerous charities, her ten thousand improvements. Behold my own, my native State. Pennsylvania is intellectualized under their auspices. Her soil and hills and valleys and rocks and everlasting mountains live and breathe under the animating influence of her intelligent and hard-working population; every stream feeds its canal, every section of country has its railroad, distance is annihilated, the flinty ribs of her rocky mountains are driven asunder, the bowels of the earth yield forth their treasures, and the face of the earth blooms and blossoms and fructifies like a paradise. And all this, all this is the result of the intelligence, industry, and enterprise of Northern laborers, fostered by the genial influence of their institutions.

Nor are their efforts confined to their own country alone. Their industry and enterprise compass the whole earth. There is not a wave under heaven that their keels have not parted; not a breeze ever stirred to which they have not unfurled the starry banner of their country. Go to the frozen ocean of the North and you will find them there; to the ocean in the extreme South and you will find them there. Nature has no difficulty that they have not overcome—the world no limit that they have not attained.

In every department of mind do the institutions of the North exert a wholesome, a developing influence. Sir, it was but a few days since that you saw the members of this House gathered round the electro-magnetic machine of Mr. Davenport. There they stood, mute and motionless; be-

H. of R.]

Sub-Treasury Bill.

[Oct. 13, 1837.]

holding, for the first time, the secret, sublime, and mysterious principles of nature applied to mechanics; and there was the machine, visible to all eyes, moving with the rapidity of lightning, without any apparent cause. But the genius that made the application of this sublime and mysterious influence, who is he but a laboring, hard-working blacksmith of the North?

Sir, where do learning, literature, and science flourish but in the North? Where does the press teem with the products of mind but in the North? Where are the scientific institutions, the immense libraries, rivalling almost at this early day, Europe's vast accumulations, but in the North? And who, sir, gives form, and grace, and life, and proportion to the shapeless marble but the sculptor of the North? Yes, sir, and there, too, does the genius of the pencil contribute her glowing creations to the stock of Northern renown: To Northern handiwork are you indebted for this magnificence of this mighty Capitol. And those noble historical pieces now filling the panels of the Rotondo, which display the beginning, progress, and consummation of your Revolution, and give to all posterity the living forms and breathing countenances of the fathers of your republic—they, too, are the works of a Northern artist!

But before I conclude this branch of my subject, let me make one observation that I had almost forgotten. The gentleman seems to think that our workmen must of necessity be the passive instruments of our capitalists. His idea of the power and influence of wealth, controlling the very destinies of the man who labors, must be derived from the institutions of his own generous South; where he frankly avows that the capitalist does absolutely own the laborers. His views are, however, utterly inapplicable to the North. Who are the Northern capitalists of to-day, but the penniless apprentices of yesterday? Sir, in the North there is scarcely a class of men existing exclusively as capitalists. The character of capitalist and laborer is there united in the same person. In ninety-nine cases out of a hundred, he who is a capitalist has become so by his own industry and perseverance. He begins as an humble "laborer"—his industry, virtue, and integrity his only capital. He gradually accumulates. Every day of toil increases his means. His means are then united to his labor, and he receives the just and honest profits of them both. Thus he goes on, joining his accumulations with his labor, receiving the profits of his capital and his toil, scattering the fruits of his efforts abroad for the benefit of society, living in manly independence, and laying up a stock of comfort and enjoyment for his declining years. Such was the rich Girard, the "merchant and mariner," as he styles himself in his last will. He began his career a destitute cabin-boy. And such are the capitalists all over the North. They were all laborers some few years since; and the humble operative of to-day must and will be the wealthy capitalist in some few years to come; and so far are the institutions of the North from retarding his advance, that they encourage him, aid him, cheer, cherish, and sustain him in his onward career.

But, sir, there is no limit to this subject. I will pursue it no farther. I might easily exhaust myself, but the subject is inexhaustible. What I have said has been said to vindicate the character of my constituents from unjust attacks, and to relieve the institutions of the North from the burden of denunciation which has been so profusely heaped upon them. I have uttered nothing in a spirit of disparagement to the South. No, Heaven forbid! I am incapable of it. The whole country is my country. To me there is neither North nor South, East nor West. I am a humble representative of it all. Our fathers fought and bled and died for it all. And how can we, their sons, if we respect their principles and cherish and venerate their memories, how can we quarrel about local difficulties and

foster sectional jealousies? I stand here the representative of the whole country. Not an inch of any part of that country shall be disparaged with my consent. Whatever concerns its honor and renown deeply and dearly concerns me. I will scrupulously respect the rights and feelings of every section of the country, and do all in my power to advance, nothing to retard, its peculiar interests except where they may come in conflict with some great fundamental principle which must not be sacrificed. I will exert my influence to heal sectional differences, extirpate petty jealousies, foster a becoming spirit of conciliation, promote universal harmony among the different portions of the Union, and make the Union itself as everlasting as the soil which it embraces. With these feelings and this determination I have come into this House. But, sir, I never can and never will remain silent when the rights, or interests, or characters, or institutions of my own immediate constituents are attacked. No, sir, let that attack come from what quarter it may, I will be ever prompt to offer my feeble resistance and interpose my voice in their just vindication!

I now beg leave, Mr. Chairman, to make a few remarks, more immediately connected with the bill under consideration. By the madness and folly of her rulers, our country has been precipitated to a crisis. We have been convened here to meet that crisis. That is, the people and this House have been so informed. But have we met it? Are we meeting it? No, sir; we have been called here to do what this House has been doing for the last six years, to echo the will and further the wishes of the Executive; to carry out the recommendations of the President's message; to cease to be the free representatives of the people, and to become the pliant instruments of power. Nothing is to be introduced to our deliberations but what the President has recommended. Petitions are presented, and they are trampled under foot; plans of relief are suggested, and they are laid upon the table. The people demand from you, through their representatives, a fair and impartial hearing, and you meet them with that gag of despotism—the previous question. And when we ask why is all this, we are impudently told that we must attend to the relief of the Government; that we have nothing to do with the people; that the President has submitted his plans, and that right or wrong we must sustain them; that he has chalked out to us the line of our legislative duties, and that we must follow that line, toe the mark; yes, toe the mark is their phrase, and then go home and tell our constituents that we have slavishly done our master's bidding.

Sir, it is by conduct like this that our country has been precipitated from the height of prosperity into the very depths of distress. This House is responsible for much of the evil under which the people are now groaning. Their representatives in Congress have been faithless to them. They have surrendered up their independence and become the mere echo of the President's will. Instead of freely deliberating and choosing what was best for the people and the country, they have been watching the ever-changing countenance of the Executive, and ascertaining what were his wishes and determinations—and thus have they been slavishly echoing and re-echoing that will until the great fundamental interests of the country have been entirely sacrificed. The people have been lost sight of; those who were their servants have become their masters. I ask every candid man whether the legislation of Congress has not, for many years, conformed, in every important particular, to the commands of the Executive? Whether the rescripts of the administration have not been the law of the land? Let us revert to the history of the past and see what are the lessons that it teaches.

Large majorities of both Houses of Congress passed an act for the recharter of the Bank of the United States. The

Oct. 13, 1837.]

Sub-Treasury Bill.

[H. or R.]

democratic Legislature of my own State, Pennsylvania, unanimously recommended it. It was vetoed by the President. And what did Congress do? Why, sir, changed their opinion—echoed that veto! Yes, we saw the very man who draughted and advocated the bill for rechartering the bank, (Mr. Dallas,) presiding at a town meeting a few weeks afterwards, and there opposing the very measure of which he was the author and father; ay, turning at the beck of the President, like Saturn of old, to destroy his own offspring. This, perhaps, may have been all very well; but is it not a remarkable proof that members of Congress found it inconvenient to have opinions which did not exactly conform to those of the Executive?

But again: Congress investigated the situation of the Bank of the United States, for the purpose of ascertaining whether it still continued to be a safe depository of the public moneys. They found its situation to be sound and wholesome, and declared, by a large majority, that the deposits should be continued in it, according to law. The President, however, a short time afterwards determined otherwise, ordered the Secretary of the Treasury to lay violent hands upon the treasures of the nation, to take them from the place where Congress and the law declared they should be, and scatter them abroad over the land, by depositing them with the pet banks; there to be used for the purpose of swelling the deluge of paper money, and of feeding and pampering and bloating the demoralizing spirit of speculation.

In sixty days afterwards Congress met. Well, and what did members of Congress do? Did they adhere to their former resolution? No, sir, they again surrendered up their independence; again changed their opinion, and again echoed the will of the Executive.

Then it was, that the President formed his league of pet banks. He conceived and planned, and put in operation, a project which, according to his promise, was to banish bank rags from the community, give us the best of currencies, and fill up the channels of circulation with gold. This was the sole work of the Executive and his agents. Congress had nothing to do with it. He submitted his plan, however, to Congress, in the form of a law, for their approval. They hesitated for a while, and grumbled a little; but, not daring to disobey, they at length again complied with his requisitions, went through all the unmeaning forms and idle ceremonies necessary to give it a legal shape, forgot the people and the country, and again echoed the will of the Executive!

But, sir, it is in vain to give further examples of the entire dependence of this House on the Executive. The President has been passing our laws! Congress, in truth and in fact, has had nothing to do with them! His will has been supreme. This House, instead of being the free representative body of the people, has been the representative of the President!

But the bubble has at length burst. The gilded project of which so much was promised and so much expected by an injured and confiding people, is at an end. While the people stood anxiously awaiting the realization of its promised advantages, it suddenly exploded, and involved them and their business, the country, its exchanges, currency, and prosperity, in a scene of confusion and distress unparalleled in the annals of our civil history. The Government, from a hollow and bloated appearance of sanity, became suddenly bankrupt. The people were overwhelmed with distress, and from every quarter of the country asked relief from the evils that had come upon them.

Meeting, then, under these circumstances, I ask had we not a right to expect that Congress once more would resume its independence, and attend faithfully and fearlessly to the business of their constituents, and that the administration would now abandon its projects and give over its attempts to sway and subjugate and enslave the repre-

sentatives of the country? But have our expectations been realized? What have we been about? What have we done? Let us see whether we have not again been subserviently echoing the will of the Executive?

Our first act was to pass a bill for the postponement of the payment of the fourth instalment to the States, to withhold from them the sum of upwards of nine millions of dollars, which, by the act of 23d June, 1836, we had contracted to put in their possession. By that law it is provided "that all the money in the Treasury of the United States, on the first of January, 1837, reserving the sum of five millions of dollars, should be deposited with the States in proportion to their respective representation in the Senate and House of Representatives of the United States." Under this law it became the duty of the Secretary of the Treasury, on the first of January, 1837, to reserve five millions out of it for the use of the Government, and appropriate the balance, whatever it might be, to the States as already mentioned. The Secretary of the Treasury performed this duty, and found that there were upwards of forty-two millions of dollars in the Treasury. He reserved the five millions, and then announced to the different States of the Union, that there was in the Treasury, specifically set apart for them, the sum of thirty-seven millions of dollars, to be paid to them in four instalments. The States agreed to receive the money. Three instalments of the money they did receive. The fourth and last instalment of between nine and ten millions of dollars was to have been paid to them on the first of this month. This is a plain unvarnished statement of the case. Thus we see that on the first day of January last, there was in the Treasury thirty-seven millions of money specifically set apart by the law for the States. There it was. The Secretary of the Treasury counted it and declared it to be there. Now, why has not this money been all paid to the States? Was it because this House passed a bill for the postponement of the last payment? No, sir, but because this administration had previously used this money for their own purposes. They, Martin Van Buren and his administration, betrayed the trust reposed in them, squandered this money—and when the representatives of the people assemble here in special session, we are informed by the President and his Secretary of the Treasury that the money that was in the Treasury for the States is gone, has evaporated, and that we will have to postpone the payment of one fourth of it. Thus we see that the money was used by the administration. The President and his policy have postponed the payment of the fourth instalment. Congress has had nothing to do with it. The money was there for the States on the first of January last. When we met here in eight months afterwards it was not there. Suppose the bill for postponing its payment had not been passed, could the States have got the money? No. Why? Because the administration had previously used the money that was specifically set apart for them. Thus you perceive that the Executive postponed the payment of it. And, after doing this, he very modestly calls upon Congress to pass a law to do what he had previously done! Well, and what did Congress do? Why again they echo the will of the President, pass a law postponing what had already been postponed, and declaring a solemn falsehood to the whole country, that we, yes, that we had withheld from the people of the States nine millions and a half of money, when it had been done months before by the executive rulers of our country!

This is the first exhibition of the independence of this body! If we continue thus to comply with the behests of power and to delude and betray the people, I ask, in the name of Heaven, what is to become of our country and its free institutions?

[Here the House took its usual recess. After the recess Mr. NAYLOR resumed.]

H. or R.]

Sub-Treasury Bill.

[Oct. 13, 1837.]

Mr. Chairman, the embarrassment incident to my novel situation, and the excitement which hurried me on to vindicate Northern people, sustain Northern institutions, and to show their effect upon the community, caused me to forget this morning some of the topics that I had intended to introduce, and to enlarge on others that I expected only to have glanced at. It is too late, however, to take them up now. I will go on, therefore, where I left off.

The second great measure which the administration commanded you to pass, and which you did pass, was the bill for the manufacture of ten millions of Treasury notes. Yes, ten millions of paper money—ten millions, not of bank rags, but Government rags—ten millions of old continental paper—ten millions of shin plasters! And is it possible that these are the fruits of those long years of exciting, convulsing, distracting experiments, which our rulers promised us should produce such a safe and convenient currency, and flood the whole land with gold? Ay, gold, gold, was the cry; and now we have gold with a vengeance! The banner of our rulers has had for its motto, not our country, nor liberty, nor patriotism, nor union, nor any other ennobling or inspiring sentiment; no, sir, but that miserable and mercenary promise “for gold, gold, gold.” For years have our people been mocked and deluded with the empty promise of gold. And now, at the very moment when they reach forth their expecting hands to possess it, like the gold which is said to reward a bargain with the Prince of Darkness, it turns in their grasp into dust and ashes! The Government has been raking it together from all quarters of the earth. They have wrung it with an iron and unrelenting grasp from the possession of the people. They have forced it out of circulation. It is money no longer; it is now merchandise. It is bought and sold, as you would buy your bread or any other necessary or convenience of life. The people are forced to buy it in order to pay their debts to the Government. And what does the Government do with it? pay it back to the people? No, sir, no, but magnanimously gives it to the officeholders! The officeholders then sell it to the people at a profit of from seven to twelve per cent. The people again pay it to the Government from which, as before, it immediately passes to the officeholders, who again sell it to the people at a large profit. Thus it moves round, and round in one continued and contracted circle, cursing the people, and taking at every turn from their hard earnings the amount of premium paid for it, and enriching the pampered officeholder, just in proportion as it robs them. In the meantime the officeholders have got the Government exclusively to themselves. They have all the gold to themselves. They tell us that the Government and the people must be separate and distinct, that it was never intended that the Government should sympathize with their sufferings, or extend relief to their distresses. And how, sir, does this golden Government, with its immense professions, pay its own debts? What do they give to the hard toiling mechanic—the aged, feeble and tottering war-worn soldier of the Revolution? And what has the country for a currency? Why, rags, rag; not “bank rags” alone; no, (for they grow more scarce every day,) but all kinds of rags—a complete piece of patch work, an undistinguished gathering together of rottenness and confusion. And, to crown the whole, the President and his gilded partisans, have passed the bill for the manufacture of ten millions more of rags, with which still further to curse the country—the bill creating ten millions of paper money for the people!

In the name of Heaven, I ask, when will this evil end? When will members of Congress be members of Congress, break the shackles that bind them to the blind and dark and ferocious spirit of power, and stand forth the free representatives of the country?

Mr. Chairman, what an awful reckoning must the peo-

ple have with those in power? Sir, the account must be made up sooner or later, between them and those rulers who have been promising only to deceive them, sporting with their hopes, trampling down their interests, marring their enterprises, and bruising their tenderest sympathies. The day of reckoning must come, will come! As certainly as truth must prevail over error, as certainly as rights must be vindicated and injuries redressed, so certainly will the people have justice, ay, and vengeance too, for the many wrongs with which a long course of misrule has visited them. We have already heard the rumbling at a distance. The volcano will burst forth. I warn gentlemen—I warn the administration, to “flee from the wrath to come!”

But, sir, I have again been hurried beyond my subject. I intended to have alluded to the Treasury note bill only to show that this measure, like all others, had been passed in conformity with the President's will.

The opposition in this House did all that reasonable men could do to prevent its passage. One submitted a plan for the collection of the debts owing by the deposit banks, and showing conclusively that, by this means, the Government could get their money from the banks and be saved the mortifying expedient of issuing ten millions of rag money. But no, it would not do. His proposition was not listened to. Another gentleman submitted a plan for the sale of the bonds which were given by the Bank of the United States, and not yet due to the Government; proving satisfactorily that this would entirely disconnect the Government from the bank, and raise money amply sufficient to dispense with the issuing of the Treasury notes. No, they would have Treasury notes. The President had recommended them, and of course his recommendation must become a law. So accustomed are the President and heads of Departments to consider their recommendations as having the force of law, and so certain was the Secretary of the Treasury that the Treasury notes would be issued, that a month before the bill was passed for that purpose, we find him writing circulars to many of the banks, and a great number of the large capitalists in the country, huckstering these very notes about for sale! What a humiliating commentary upon the independence of the people's representatives in Congress!

But, sir, the Secretary of the Treasury knew that this House would not disregard the will of the Executive. You did again echo that will. The law is passed. The administration designed to establish a great Treasury bank. The design is as evident as the sun in a cloudless heaven at noonday. They knew that they could deceive the people no longer with the golden humbug. They have now established their bank. You have ordered the issue of ten millions of its notes to begin with. These are all, and the only gold which the suffering people of this country will ever get from this false and deceitful administration! These, sir, are solemn truths, and why should I fear to utter them?

What next? The next great measure that we have recommended to us is the last great experiment of those in power, the “Sub-Treasury System.” This project has not yet received the sanction of this House, and I pray Heaven that it never may. It is now before us for consideration. I purpose, in conclusion, to make a few hasty remarks upon it. I am opposed to this measure. Although not yet approved by Congress, it is now in operation. We see its workings. We have eaten of its fruits, and, for myself, they are distasteful to me. I loathe them. I am for cutting down the tree that produced them.

Sir, this scheme proposes to place in the hands of individuals who are dependent alone on the will of the President for their continuance in office, all, yes all the countless millions of the money of this Government for disbursement and safe-keeping. These men are to receive it, hold

Oct. 13, 1837.]

Sub-Treasury Bill.

[H. OF R.]

it, use it, when and as they please, with no earthly barrier between it and the temptation to appropriate it to their own uses, which the personal custody of such immense treasures must offer, than the feeble restraints of poor, weak, fallible human nature, and the fear of the consequences which might result from an ultimate detection.

How many receivers and holders of the public money, or, in other words, how many "sub-treasurers" there will be scattered throughout the whole extent of this wide spread country, no man can at present determine. In France, where a similar system prevails, there are one hundred thousand! Here, I have no doubt, in a short time, the number would even exceed that. These men are to hold and absolutely possess the whole treasures of the nation. Some of them, particularly in our large cities, will have millions of dollars in their hands at a time. One uninterrupted golden current will be continually pouring in upon them. What a temptation, (even aside from party political influences) is thus offered to use a portion of this money occasionally or continually, as need or circumstances may require! Sir, the temptation will be irresistible. Surrounded by needy or pressing friends in distress, whose families and fortunes they may think will be comforted or repaired by a timely loan; in the very midst of the exciting whirl of speculation, with Fortune's dazzling visions urging them on to use the treasures confided to their keeping, and embark in schemes promising to result in the enjoyment of immense possessions, and with the full certainty that a temporary use of even large amounts, cannot be discovered; taking into consideration with these circumstances the fact that there will be one hundred thousand of these men—I say they will, in some cases, inevitably misappropriate the money. Large amounts of it must be lost. The treasures of the country will be plundered. Under such a system, there is no safety for the public funds.

But, sir, this is not the only evil that I see in this measure. The loss of the public moneys will be nothing compared to the moral and political evils that must flow from it. "Lead us not into temptation," was the sublime prayer of our God. Our rulers, disregarding this divine lesson, seem determined to surround their public officers with a consuming fire of temptation, from which there is to be no hope of escape. Their consciences are to be seared, and they are to go abroad corrupted and corrupting until the whole body politic becomes one offensive mass of putridity, smelling to heaven and tainting the very atmosphere of freedom. This may be strong language. But I see the evil strongly. I feel it strongly.

I have heard of the danger of uniting the purse and the sword. All the unions of this kind, heretofore deprecated as existing in this country, are as ropes of sand or bonds of gossamer compared to what will be the case if you pass this bill! You will not only unite one purse and one sword—no, sir, you will unite one hundred thousand purses and one hundred thousand swords—all ready to yield up their treasures and leap from their scabbards at the nod or stamping of the foot of one man!

A "sub-Treasury bill," it is gently termed in this House. Before the country, for the purpose of deluding the people and exciting popular feelings in its favor, you name it a "bill to divorce the Government from the banks." But what is it? Trampling the mere name under our feet, and looking at it as it is, stripped and naked in all its odious deformity—I ask what is it? Why, sir, it is a bill for arresting the flow of our prosperity—for subverting the fundamental principles of our republic—a bill for laying the corner stone of despotism. How do those in power recommend it to us? What arguments do they urge in favor of its adoption? "Oh," they say, "it is no new scheme. It exists in France; it flourishes in Prussia and Austria—it has grown into full and vigorous perfection in Russia. It prevails in Turkey and in every despotism of the new and old world."

My heart shudders, my blood curdles at their recommendations. In every country under heaven where such a system prevails, the people are trampled on and plundered of their rights; ground down to the very dust by the awful despotism of their rulers; bought and sold like cattle with the earth, persecuted by power, plundered by these very sub-treasurers, "chained to the brutes and fettered to the soil." And yet, sir, this administration and its advocates urge the example of these odious tyrannies, as almost the only argument in favor of the adoption of their hateful scheme. They tell us that their plan works very well in those countries. But they do not tell us that it is there the grand engine of despotism, without which the people could not be kept in slavery! Yes, the plan does work well in despotisms. It does the work effectually. It works admirably well. It answers the very purpose for which it was designed—that of plundering and enslaving the people, whilst it deprives them of the power of resistance!

Where am I? Is it possible that here, in this mighty capital of the only free republic on earth, with the deeds of our gallant fathers still green in our memories, with here and there one of their lingering associates now gazing upon our deliberations, and the thunders of Yorktown yet ringing in our ears—is it possible, I say, under these circumstances, that we can calmly listen to a proposition to abandon the settled policy of our Government from its beginning to this day, despise and denounce the wisdom of its immortal founder, reject a course which has secured an unexampled prosperity to our country, and the utmost stretch of liberty to ourselves—and 'turn back and affectionately embrace—hug to our bosoms, as jewels above all price, the barbarous institutions of the dark and benighted despotisms of the old world? Are we to turn a deaf ear to the counsels of our revolutionary sages and receive for our guide the arbitrary decrees of autocrats and tyrants? Sir, is the republican seed, scattered far and wide by our immortal sires, to be eradicated with our own hands—and are we to transplant into our fertile soil the sickly shoots of despotism, and nurse and water and cherish them into health and vigor and fructification? Heaven forbid. Let every man who wishes well to our republican institutions put the seal of his reprobation on this scheme.

I have said that this very "sub-Treasury system" is one of the great means used by the autocrats of Europe for perpetuating their tyrannies. In the hands of a monarch it is an engine of tremendous power. He appoints every officer. They are all absolutely dependent upon him, and are appointed to do his bidding. They are responsible to him alone. They are scattered all over the empire. Every petty district has its officer to receive and hold the revenues of the Government. They have immediate communication with the people. Of course, as the interest of the officer binds him to serve his sovereign, and as there is no one to interfere between them, the money he receives can be used in influencing the people (or subjects as they are there called) in any way desirable. Thus thousands and tens of thousands of these little treasurers are using the money in their respective districts, so as to produce the desired influence on the people. And yet, in a moment, the whole treasure can be collected in one concentrated mass at the nod of the monarch. This is all done silently and secretly. The evil is felt and no one can tell whence it comes. Despotism is upon them, and they have no means to break it.

This system of monarchy, this engine of despotism, is the very one which the bill under consideration proposes to introduce into this country. It will make the power of the President as supreme as that of any autocrat of Europe. You will have a hundred thousand officeholders appointed by the President, holding their office at his pleasure, dependent upon his will for the very bread they eat, and commissioned to do his bidding. Every neighborhood will have within its narrow confines one of these

H. of R.]

Sub-Treasury Bill.

[Oct. 13, 1837.]

"sub-treasurers," "to harass the people and eat out their substance." The land will be filled with spies and informers. All the public money, millions on millions, will be in their hands! It will be scattered about among their partisans, become the source of countless demoralizing speculations upon the industry and property of the people, and must inevitably end in concentrating all power in the breast of the Executive. Adopt this scheme, carry out its provisions in all their ramifications, and there will be no salvation for this republic; republican forms may exist, but despotism will be its very life-blood, its pervading spirit.

This scheme will not only increase the number of your officers four-fold, and thus quadruple the taxes of the people, but it will furnish Government with an irresistible means of controlling the popular will. These officers must use the money to promote the views of their masters. They are appointed for that purpose. He who would dare refuse to do their bidding would not only be instantly dismissed, but hunted beyond the pale of national consideration; yes, be denationalized and proscribed by the hireling hacks of party power.

Will any gentleman dare say that these evils are all imaginary? What takes place in one country will, under the same circumstances, take place in another. This system is the one by which despotism perpetuates itself all over the world. Why can it not, why will it not, be used for the same purpose here? Is it for the want of a disposition in our rulers? What takes place among us now? Do not those in power attempt to force the minds of the people to think with them? Do they follow the popular will, or do they make the popular will bend to their decrees? Sir, my honorable colleague [Mr. SENECA] told a grave truth the other day, when he said that Government carried every thing by a war. Itingles out its object, selects its plan, adopts its measures, and then opens its campaign, and, with its countless officeholders, vast treasures, and immense power and patronage, enters the field, marshals all the "faithful" to its standard, shoots as deserters all who fly, and marches onward crushing those who dare oppose!

There was a time in the days of Jefferson—in the good old days of real democracy—when an officer of the Government interfering with the freedom of elections, or attempting to influence the popular will, was instantly dismissed from office. It was the cardinal maxim of the administration of this illustrious man "that an officer who would attempt to use his power and influence to control public opinion should at once lose his office." This was the fundamental law of Jeffersonian democracy. Now, sir, those who claim to be the exclusive democrats of the land have reversed this law. The maxim at present is, "that the officer of the General Government who does *not* use all his power and influence to control the people shall be forthwith dismissed." Hence, sir, we find that it is the officeholders all over the Union who fight the political battles for the administration. They *must* do it; they are *bound* to do it; and they *do* do it.

In the election which resulted in sending me as a representative of the people into this hall, the officeholders of the General Government of my own and the neighboring districts were the persons who bore all the heat and labor of the campaign, and did all the speech-making against me. Not only that, sir; but at least one person residing here, in the city of Washington, in this grand seat of Executive power, holding a lucrative situation under the Government, having his sons employed here in Government departments, left his family, travelled one hundred and fifty miles to get into my district, and there mounted the stump, became an open-mouthed brawling advocate of party power, called upon the people to reject me, and come to the support of his master in Washington. Sir, if such scenes are familiar to us now, what will take place when you make four times the number of officers, and place mil-

lions and tens of millions of public money in their hands? My heart shudders at the contemplation.

Mr. Chairman, I have shown that this system is the engine of tyranny wherever it exists, and that the example of other nations, urged upon us by its advocates, are all derived from despotism.

They urge another argument in favor of this measure, which consorts in all things with the one just mentioned. They say that the effects of this scheme will be to destroy the whole system of credit. It is true that wherever this "sub-Treasury scheme" exists there is no credit except upon the most narrow and limited scale. Nor is this singular. Recollect that this system prevails only in tyrannies. The absence of credit is one of the grand characteristics of despotism all over the world. Every body must know, or can know if he will, that a well-regulated credit system and despotism never have existed, do not, and cannot exist together. It matters not what the forms of a Government may be; if a system of general credit prevails throughout its whole extent, the heart and spirit of despotism must be crushed and broken.

There is no credit system in Russia, Prussia, Austria, Denmark, Sweden, Spain, Turkey, nor in any other country under heaven, where the people are in chains and wretchedness, misery and degradation. Nor is this all. The converse of the proposition is true. There is no country in which a well-regulated credit system prevails where the people are in bondage. It is a fact, which no man having any respect for truth can deny, that just in proportion as a sound credit prevails in any country, in the same proportion are the people in the enjoyment of happiness and civil and political liberty.

The reason for all this is very obvious. What is credit? It is trust, confidence, belief and faith in the honor and integrity of man. It was the first kind of money, upon which all other money is founded. It existed before paper or letters were dreamed of, and long before the metals, either precious or base, were extracted from the gloomy bowels of the earth.

In the early stages of society, men obtained from each other the product of their labors by barter, or exchange. The artisan would exchange his wares for the gain of the husbandman. If he wanted bread and had nothing at the time to give in exchange, the farmer, giving credit to his integrity, would furnish him with bread stuff on his promise to give him his wares in return when convenient. This credit was, therefore, the only money then. It was nothing but confidence of one man in another! In order to get this confidence or credit it was necessary that a man should be honest. Thus it improved the morals of mankind. The more it was used the closer did it unite men in society; because it made men, in a degree, dependent upon one another, and made each individual interested in the welfare of the whole. Thus it encouraged the kindlier sympathies and humanized the human family. When it passed from hand to hand, or in other words, when the farmer passed the promise of the artisan to his neighbor for something that he wanted of him, it became circulating credit or confidence; and as that became widely extended from man to man, it associated together into one family and in one interest the most distant inhabitants of a whole empire.

Thus, sir, it becomes the bond of society. It introduces man to his fellow, and gives mutual confidence. It promotes travel, improves the country, facilitates civilization, develops industry, quickens the mental faculties, expands moral and charitable feelings, unites men together by the gentlest, but strongest of all ties, and teaches them their power. This is the reason why credit and despotism are never found together. It makes men too strong for tyrants! Were it possible to diffuse, at once, throughout all Russia the credit that prevails in this country, the iron

OCT. 13, 1837.]

Sub-Treasury Bill.

[H. OF R.]

bonds of Russian despotism would be burst asunder as by magic, and the Russian serf, springing at once into the full dignity of freedom, would stand erect and unshackled !

It is the policy of tyrants to keep their subjects apart. They are for weakening the ties that bind them together. They are for disconnecting every man from his neighbor—forcing him to stand isolated and alone; sowing the seeds of jealousy, distrust, and individual disunion, destroying all combinations, and making every one depend alone upon the sovereign power.

This state of things cannot exist with a credit system. Credit gives men one interest, makes them depend upon one another, and combines them into one irresistible whole. Therefore it is that despots are at war with credit. They must keep men apart in savage, barbarous, desolate isolation. The moment a common interest, given by a common understanding and mutual confidence, combines them together, they become irresistible in power; and despotism flies before them. This, sir, is the reason why liberty and credit are found side by side together wherever either of them have an existence. They are never found apart.

Look at all the non-credit countries of Europe. They are all despotisms, every one of them ! And what are they doing for man, for civilization, for the spread of free principles ? Why nothing, absolutely nothing ! There they are in chains and wretchedness, without liberty, without domestic comfort, enveloped in ignorance and barbarism, without even the hope of rational freedom to cheer and brighten up the future.

Now turn your eyes to old England—the credit country of the world, our “father land,”—the land from which most of us derived our blood and our name. Look at her manufactures, her arts, her literature, learning, science, and her civilization, that carries a portion of comfort and liberty into every cottage throughout her island domain; with her fleets on every ocean, her commerce embracing the whole world, diffusing her language, institutions, and free principles to the remotest corners of the earth; overrunning India, filling up New Holland, peopling all the South sea islands, and everywhere planting the standard of civilization, christianity, and civil and political liberty ! Whilst other European nations are stationary, England, by her moral power, derived, in a great degree, from her credit system, is producing a moral and political revolution throughout the globe.

Sir, let us recross the Atlantic and turn our attention to America, and see what the people are doing there. Look to Mexico and the South American Governments. That part of the country was first discovered and first peopled. The inhabitants are in possession of inexhaustible mines of the precious metals; hard money is no scarcity there. But they have no credit system, and therefore no confidence in one another. They have no liberty, not even proper notions of liberty. They have no commerce, no agriculture deserving of the name, no navy, no manufactures, no arts, no internal improvements, no literature, no science; but with an abundance of gold, they are benighted, ignorant, miserable, wretched, enslaved, and oppressed, but one degree removed from the brutes around them ! Their whole history is but one unmitigated narrative of savage discord, murder, rapine, and bloodshed; mad infuriate revolution, and sanguinary insurrection ! These are the people, and these are the institutions that are held up to us for our example !

After this view of the degradation, wretchedness, and slavery of the southern part of America, with what feelings of pride and patriotic exultation can we return to our own proud and happy United States. I will not pretend to speak of her glory, prosperity, and advancement, nor portray the virtue, intelligence, genius, skill, and hardy and adventurous enterprise of her people. Under the influence of her present institutions, she has done, and is now

doing, more for her own people, more for the cause of human rights, more for civilization, more for the elevation of morals and of mind, and more for the whole human family, than any other nation that has, or ever had existence.

Now, sir, I appeal to every patriot in this House—I care not by what party name he may be called—I solemnly appeal to every man in the country; I ask you all, are you prepared to abandon the means which have placed yourselves and your country on such high grounds, and adopt in their stead the miserable, unnatural, and wretched policy of the foul, rank, brutal despotisms of the earth ? Will you follow in the paths which your fathers have made holy, and which have led to glory, peace, liberty, prosperity, and unbounded comfort—or will you obliterate every trace that they left behind them, shut your eyes against the brightness of the past, destroy every germ of hope as to the future, and follow that rugged and that crooked way which has always terminated in tyranny, degradation, wretchedness, and wo ? As for myself, my mind is made up; I am for abiding by what has been tried. I must vote against this bill.

One word more as to credit, and I am done. I know, sir, the evils of credit. I know how it may be, how it is abused. I have ever been a bold and open opponent of its abuses. I have, for years, taken an active stand against the inordinate increase of banks. I have spoken against it. I have written against it. I have petitioned and remonstrated against it. I have done all that a reasonable man could do to limit their number, and check their abuses. Yes, and I have seen the very men who now so bitterly oppose all credit, within six years, double the number of those banks, and more than double the banking capital of the country !

Credit has been abused. But it is no reason why it should be destroyed. The abuse of any thing, is no argument against it. The best of institutions are always those that are abused most. In the name of our holy religion the earth has been deluged with blood, and countless millions have been consumed in the flames of martyrdom. But this is no argument against either the truth, necessity, or value of our religion. Let us, therefore, labor to purge our credit system of its abuses. To destroy it, would be to break down all confidence between man and man, and restore once more the savage, desolating reign of barbarism.

Mr. Chairman, let me beg gentlemen to pause—pause before they pass this bill. It is now nearly six weeks since the commencement of this session; during which time, we have been in this hall night and day. We come at early morning, the day passes away, and the darkness of midnight still finds us here. We have had no time for reading, for thought, reflection, research, or calm and dispassionate examination. Wearied and jaded and worn out with fatigue, the President and his partisans have been hurrying and lashing us into their measures. We have been forced to sit here night and day on purpose to prevent discussion, and to compel us, right or wrong, to sanction the plans of the Executive. We have been openly called upon by the leader of the administration party in the House [Mr. CAMBRELEN] not to deliberate, discuss, and honestly make up our minds—No, sir, no; but to “toe the mark !” We have invoked gentlemen to rush to the rescue of liberty suffering, of our country bleeding, and our people overwhelmed with distress ! Our appeals have been met with but one answer—“toe the mark !” “toe the mark !”

But a few days since I picked up from the floor of this House, a petition of nearly one thousand inhabitants of Mobile, setting forth in eloquent language the accumulated evils and distresses which had borne them down to the earth, and praying as a remedy the establishment of a national specie paying institution by Congress. There was the petition on the floor—trampled upon—spitten upon—blurred and blotted and stained ! And at that very moment—yes, at that very moment, an honorable gentleman

H. of R.]

Sub-Treasury Bill.

[Oct. 13, 1837.]

from North Carolina, [Mr. BYNUM,] was addressing the House and characterizing such petitioners as panic-makers, speculators, and rag-barons! Great Heaven! I exclaimed to myself, can such things be? The petitions of freemen trampled under foot, and the petitioners themselves denounced by their own representatives! I sprang to my feet at the first opportunity; but before my mouth was opened, the honorable gentleman from New Hampshire, [Mr. CUSHMAN,] whose head is said to "blossom and bloom with the previous question," availed himself of his privilege. The previous question was moved—and there could be no reply.

Such, sir, is the mode in which measures have been forced through the House during this session. It is now time to pause. I solemnly believe that the prosperity of the country and the "sub-Treasury system" cannot long exist together. It will check the tide of our advancement. It will endanger our liberties. I call upon gentlemen to pause ere the Rubicon be passed.

Before Mr. NAYLOR had concluded his remarks, as given entire above, the House took its usual recess till four o'clock.

EVENING SESSION.

The House again resumed the consideration of the sub-Treasury bill.

Mr. ELY MOORE rose and addressed the Chair as follows:

Mr. Chairman, it is with a degree of reluctance that I solicit the indulgence of the committee at this late period of the session. It is well known that, since I have had the honor of a seat in this House, I have troubled it but seldom with remarks of my own. Indeed, I have long considered it neither proper nor respectful in any member of any legislative body to engross the time to be devoted to public business in speech-making, unless the speaker have it in his power to impart some important information, or shed new light on the subject of debate. And here, sir, I feel bound to confess that, were I now to be governed strictly by this rule, I would have refrained from participating in this discussion.

Mr. Chairman, I regret to say that, such is the poor and unprofitable fashion of the times, unless the people's representatives occasionally make long and lusty speeches, they are but too liable to incur the people's displeasure. And for this reason they often deem it expedient to make elaborate speeches on some given subject, that shall, when printed, occupy so many columns of a newspaper, or so many pages of a pamphlet. In order to comply with this requisition, the member is often compelled, especially when the subject does not happen to be a very fruitful one, or the speaker does not chance to possess that kind of creative power which can produce something out of nothing, so to draw out and dilate his ideas, that the reader, should he judge from their texture and gossamer properties, would be liable to conclude, that, like the spider's web, they had been spun rather from the bowels than the brain. The cause of this evil, sir, lies, in a great measure, with the people themselves. The representative, unless he inflicts some half dozen speeches upon the body to which he may belong, in the course of a session—whether called for or not, whether to the purpose or not—returns to his constituents under the apprehension that he will not receive at their hands the gratifying welcome of "well done, good and faithful servant." The political aspirant, therefore, must either make up his mind to swim with the current of public opinion, and speak often, or to remain silent, and sink beneath its waves. And as legislators, like other men, are more or less moved by self-love, pride, and ambition—passions upon which hang the fever of the world, and which stimulate men to action—they are but too liable to consult their own rather than their country's interest, and to embarrass the business of the nation, by making speeches designed for home consumption, and

their own political aggrandizement. Sir, I intend no disrespect to the members of this body, nor to the people who send them here. I but speak of a custom which I conceive to be justly obnoxious to censure. I speak of men as I find them, and as they are. I am aware, sir, of the irrelevancy of these remarks, and will not further occupy the time of the committee by pursuing them.

Previously to approaching the subject properly before the committee, I will briefly notice certain remarks of the gentleman from Pennsylvania, [Mr. NAYLOR,] who has just taken his seat. He has paid high and deserved compliments to the working men of the North—to their intelligence and to their integrity. To these sentiments my heart most cordially responded. He represented himself to be a working man; he professed great regard for the interests of working men; he declaimed most energetically in their behalf; but he uniformly votes against every measure which they advocate. During the present session he has voted for the United States Bank; he has expressed his determination to vote against the bill on your table. But he knows that the working men are opposed to the United States Bank; that they are in favor of the divorce bill, so called; and I feel justified in saying that ninety-nine out of every hundred working men are favorable to this bill. Sir, the relation in which I stand to the laboring classes enables me to judge of their views on this subject. I am in daily correspondence with working men in different parts of the Union, and I know that a unanimity of opinion and of sentiment in its favor prevails among them. Sir, I cannot conceive how the honorable gentleman can reconcile his professions with his practice. If he knows the feelings and the opinions of the working men, as he ought to know them; and if he estimates their intelligence and their integrity as he professes to estimate them; why then does he go counter to their views and to their will? Sir, the laboring classes have had too many such advocates! They have been too often flattered and betrayed by politicians! Too often deceived by those who caressed and bepraised them! But, sir, the gentleman from Pennsylvania, not content with eulogizing the laboring men of the North, has made a false issue with the gentleman from South Carolina, [Mr. PICKENS,] by misrepresenting his views. Sir, what was the position taken by the gentleman from South Carolina? I understood him to say that the incorporated monopolies of the North were inimical to the interests and the liberties of the laboring classes; were calculated to abridge their natural and political freedom, and to subject them to a moneyed aristocracy; and, for the expression of these sentiments, the gentleman from Pennsylvania has thought proper to rebuke him. But let me tell the gentleman from Pennsylvania, that the laboring classes of the North are apprehensive of the very evils so ably depicted by the gentleman from South Carolina. Look at their organs; consult their papers; and you will find that exclusive legislation—that the grants of chartered monopolies—are regarded by them as hostile to their interests and dangerous to their liberties. And did not the gentleman from Pennsylvania, previous to his election, and during the canvass, did not he intimate his opposition to these very moneyed monopolies, now dignified by him under the title of institutions? And how has he answered the expectations which he created by his professions? By voting for a United States Bank! By opposing the bill which proposes to disconnect bank and State! In a word, by warring with all the principles and opposing all the wishes of the laboring classes! "If such be thy gods, O! Israel! wo! wo! to those who bow before them!"

I now, sir, feel constrained to notice, briefly, some remarks which were made yesterday by my honorable and much respected colleague, [Mr. HOFFMAN,] while addressing this committee on the bill under consideration. I understood him to say, sir, that the present Chief Magistrate is,

OCT. 13, 1837.]

Sub-Treasury Bill.

[H. or R.]

in a great degree, indebted to the influence of the banks for his political elevation. Sir, I deny the correctness of this assertion. I am satisfied that Martin Van Buren owes his elevation to his own merits, and to the unbought suffrages of a majority of the American people. But, sir, if my colleague represents this matter truly, and the election of Mr. Van Buren to the Presidency was achieved through bank officers or bank influence, what an important lesson does it teach us? And how forcibly does it illustrate the dangers of the banking system? If banks band together in one political contest, they may in another. If they unite their energies in behalf of one individual, they also may unite in behalf of another, without any regard to his merits, his virtues, or his qualifications, provided he will lend himself to their interests. This is a fruitful theme, but I will not pursue it at present. I now turn to the subject of political changes, on which my colleague has said so much. If I mistake not, he took occasion to rebuke the chairman of the Committee of Ways and Means for certain alleged political somersets, which he is said to have made some few years since. My friend over the way [Mr. CAMBRELENG] is fully competent to defend himself from the charge, and I shall, therefore, leave this part of the subject in his hands. On the general topic of political changes, my colleague [Mr. HOFFMAN] has all the advantages over me which practice and experience can give. It would, therefore, be manifestly imprudent for me to enter the lists with so old and so experienced a tactician in this branch of political science. Did I desire instruction on this subject, my colleague would be the very first man to whom I would apply. He should be my preceptor above all others; for I am satisfied that none can be better qualified than himself, to descant on the facility with which political changes can be made; none have the power to speak more feelingly and understandingly on the subject. It was but a short time since, sir, when my colleague and myself stood foremost in the ranks of the democracy; when the old wigwag resounded with our respective voices; when we advocated the same measures and the same men; when we sang the same political hosannas, and worshipped at the same political altar. But, sir, that time has passed; and my colleague, instead of joining with me in the old rallying cry, chooses to lift up his musical voice in a political palinode; and we now find ourselves planted foot to foot as political opponents, instead of standing shoulder to shoulder, as political associates, as we were wont to stand. In the course of his remarks, my colleague discoursed right eloquently on the calamities of the times and on the sufferings of the people. But on this topic he is not singular nor alone. All his whig brethren have strenuously emulated each other in their extraordinary professions of peculiar love for the patient people. When I reflect on the wonderful solicitude manifested by the members of the opposition for the welfare of the nation, I cannot withhold an expression of admiration at the patriotic and benevolent spirit which pervades and warms and expands their benevolent bosoms.

We have heard gentlemen from the East and the West, from the North and the South, mingling their notes of lamentations over the sufferings of the unfortunate wherever found. Every fibre of their heads and hearts, every feeling of their souls and bodies, appears to be attuned to benevolence, and to vibrate with deepest sympathy at the calamities which they assure us have befallen our common country. Sir, these are honorable feelings, and highly creditable to human nature. Patriotism so exalted, philanthropy so generous, sympathy so sincere, benevolence so pure, holy, and disinterested, cannot fail to challenge our warmest admiration. When we hear men sincerely deplore the misfortunes of their fellows, we cannot but admire, honor, and respect them. But how are these feelings of respect and admiration strengthened and augmented when we behold them exerting their utmost energies in

behalf of the unfortunate; when we see them promptly and eagerly rushing to the rescue?

And, sir, here I must be permitted to intimate to my political opponents, that in order firmly to establish their characters for superior patriotism and philanthropy, it will be necessary for them to act as well as to feel. If you know the remedy, gentlemen, and apply it not, the sincerity of your professions may be doubted. The uncharitable may surmise that party is your object, and public good the scape-goat. Sir, what would we think of the patriotism of the man who was able, but unwilling, to succor his country in the hour of her extremity? Or what would we say of the benevolence of a physician who refused to administer to his sick and dying patient the remedies which he knew would restore him to life, health, and vigor? And are not gentlemen aware that, after having so constantly, so earnestly, and so eloquently, bewailed the fallen fortunes of their country, they will naturally be looked to by that country with anxious, shuddering solicitude for the remedies competent to heal the deep disease, which we are told is preying upon its vitals? Are they not aware that their benevolence will be questioned, and their sincerity doubted, even by the confiding and the faithful?

But, sir, we have been told that the friends of the administration have the power, and that the responsibility rests with them! Sir, what are we to understand by this? Is it meant to be insinuated that the administration party in this House have the power to relieve the distresses of this country, but that they have not the will to exercise it? Is it meant to be affirmed that the dominant party are so utterly destitute of feeling and of patriotism as willingly and intentionally to withhold the aid which they might rightfully and constitutionally extend to the people? Is it their intention to represent us to the American people in so odious and offensive a light? Sir, I am aware that the gentlemen in the opposition have long claimed all the wisdom, and all the worth, and all the decency; but I did not suppose, until now, that they also claimed all the patriotism, and all the benevolence, and all the sympathy.

For one, sir, I protest against such unwarrantable and unfounded pretensions. I am clearly against this additional monopoly. If the gentlemen really possess all the charity and benevolence which they claim, I trust that they will not be inexorable towards us; that they will not thrust us beyond the pale of humanity; that they will not strip us of all the common attributes of civilized men, nor paint us as savages or brutes, by representing us to be deaf or indifferent to the voice of distress. Why should we be thus treated as guilty of the grossest injustice—of the most flagrant inhumanity? If the gentlemen of the opposition do not consider adequate the means of relief proposed by the Executive, let them suggest such as will be effective, and, my life on it, if these means shall be just, proper, and constitutional, the friends of the administration will cheerfully yield them their most cordial and hearty support. We confess that we know no other remedies for the ills complained of than those we have already suggested. And if the gentlemen in the opposition have it in their power, as they would have us and the country believe, of proposing an efficacious and constitutional remedy, for heaven's sake let them tell us what it is! If there be a balm in Gilead—if there be a physician there—let him administer the balm to our afflicted country. Do not, I beseech you, gentlemen, do not any longer keep secret your political catholicism, like quack physicians; but, like good and true patriots, make it publicly known, that it may be employed for the healing of the nation.

My colleague has pronounced the sub-Treasury system unconstitutional, but did not attempt to prove it so. Now, sir, by way of a set-off, I pronounce unconstitutional the substitute of my colleague—a national bank; and so I shall endeavor to prove it by calm and dispassionate argument.

H. of R.]

Sub-Treasury Bill.

[Oct. 13, 1837.]

A national bank being the principal antagonist measure to the bill under discussion, I shall confine my remarks principally to that subject; and, as this is the only point that has not been fully and thoroughly discussed in the progress of this debate, there will be the greater propriety in this course. I shall, therefore, attempt to argue at length this part of the subject.

I can find no authority in the constitution for granting charters of incorporation, of whatever name, kind, or description; and no honorable gentleman, I presume, will hazard the declaration that such power is directly given to Congress by the constitution. The most hardy and reckless advocates of a national bank have never ventured to affirm that such power was specific and direct; that the warrant was express. They all resort to the doctrine of implication and construction. Sir, let us examine this doctrine; let us take up the constitution in a spirit of honesty and soberness, and see what clause of that instrument, if any, vests in Congress even an implied power to incorporate a national bank.

Sir, I am aware of the vastness of the subject which I propose to examine. I am aware that the constitutionality of a national bank has been repeatedly discussed by the most eminent jurists and statesmen of the nation. And I am also aware that an attempt, on my part, to grapple with a subject of such magnitude, and under such circumstances, will be attributed by many to a want of discretion, if not to a culpable vanity. Be it so. I conceive it to be my duty—I know it to be my right—to express my views fully on this subject; and, although I may be unable to shed any additional light on this long agitated and vexatious question, yet I will, nevertheless, state the arguments and considerations which exert a controlling influence on my judgment. Permit me, then, sir, to call, for a moment, the attention of the committee to the peculiar character of our Government. It is conceded by all parties, I believe, to be a Government of limited and specified powers; which powers are expressly prescribed by the constitution. To the constitution, then, and to the constitution alone, must Congress look for all and every power they would exercise. Unless, therefore, the power to grant charters of incorporation be expressly granted by the constitution, the exercise of such power, on the part of Congress, would be a violation of that instrument. But, say gentlemen, although we do not pretend to assert that the power to incorporate is given in direct terms to Congress by the constitution, we contend, nevertheless, that such power is derived by fair and legitimate construction. But, when the advocates of this doctrine have been called upon to designate the clause of the constitution which confers on Congress the power to incorporate a bank, they have been sadly puzzled to comply with the requisition, but have wandered and wandered from article to article, and from clause to clause, seeking in vain for authority. When driven from one position they flee to another; ever vacillating; never fixed in their views; never satisfied with their own, nor with each others' arguments. No unity of opinion prevails among them as to the particular clause in the constitution, where this doctrine of construction and implication, authorizing acts of incorporation, is to be found; but, like certain deluded ones of old, one cries, lo! it is here; and another, lo! it is there; when, as was the case with the asses of Kish, it happens to be "nowhere." But, sir, let us examine those parts of the constitution where this power is said to reside. Some have attempted to locate it in the first article of the eighth section of the constitution, which gives Congress the power "to lay and collect taxes, duties, imposts, and excises, to pay the debts, and provide for the common defence and general welfare of the United States." The power to "lay and collect taxes" and to "pay the debts of the United States;" in other words, the power to raise and appropriate money, and the power to grant char-

ters of incorporation, I believe never have been, and I presume never will be, regarded as synonymous, even by the most desperate "constructionists." Those, therefore, who pretend to find authority to grant charters of incorporation in the article under consideration, must look for it in the words "common defence and general welfare." And it is from these words that some pretend to derive the power to incorporate a national bank. Can those who have contended for this construction have considered well of the consequences which must inevitably follow from an exercise of such implied powers? Have they reflected that, by giving to these words the construction they contend for, they render the enumerated powers of the constitution nugatory; that they virtually annul the powers reserved to the State Governments; break down all the constitutional guards designed to protect the rights of the States and of the people, and make the constitution itself, in the hands of Congress, what clay would be in the hands of the potter? And, lastly, have they considered that this doctrine is flatly contradicted by the tenth amendment to the constitution, which expressly declares that "the powers not delegated to the United States by the constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people?" General Hamilton, latitudinarian as he was on the subject of construction, had too much regard for his reputation to give to the words "to provide for the common defence and general welfare," a construction that would confer on Congress powers not enumerated in the constitution. By reference to his report on manufactures, it will be found that he confines, in every instance, the application of these words to the power given by the first sentence of the clause; and, in this particular, Mr. Jefferson agrees with him. The latter, in adverting to this subject, calls it "a grammatical quibble, which has countenanced the General Government in a claim of universal power. For," continues he, "in the phrase to lay taxes, to pay the debts, and provide for the general welfare, it is a mere question of syntax, whether the two last infinitives are governed by the first, or are distinct and co-ordinate powers; a question unequivocally decided by the exact definition of powers immediately following." Sir, I conceive that the clause of the constitution under consideration admits of but two constructions—the one limiting the powers of Congress, as contended by General Hamilton and Mr. Jefferson; the other conferring on Congress powers incompatible with the spirit, and utterly subversive of all the express powers of the constitution—powers independent of, and paramount to, the constitution itself—powers indefinite, boundless, omnipotent. If the latter construction be admitted, the will of Congress, and not the constitution, is the law of the land. Or if, peradventure, Congress should think it expedient to revert to the constitution at all, it would only be necessary to refer to that part of it containing the cabalistic words "common defence and general welfare." And as these words, according to certain commentators, convey a plenary power on all subjects, and are applicable to all cases that come within the jurisdiction of the national legislature, it would be quite unnecessary to look further. This would be economical, withal, saving much precious time to the people's representatives, which otherwise might be squandered in wandering about the constitutional kingdom in search (as well search for the lost pleiad) of the enumerated powers, which, unfortunately, have been swallowed up by the implied powers discovered in the words "common defence and general welfare." Let us suppose the doctrine here combated to be established and carried out into practical legislation. Congress is applied to by a number of influential individuals for an act of incorporation, granting to them and to their successors and assigns forever, the sole and exclusive right, extending to all the States in the Union, of smelting iron ore with anthracite coal, and of manufacturing the same. The memo-

OCT. 13, 1837.]

Sub-Treasury Bill.

[H. OF R.]

rialists set forth in their petition the immense benefits that would result to the nation from their contemplated enterprise. They dwell upon the advantages incident to associated capital, and concentrated wisdom and industry. They represent that the mining interest of the country would be benefited in proportion to the extent of the monopoly—inasmuch as the products of the iron and coal mines would ever find a ready market at the company's works; that the public in general would be enabled to obtain the manufactured articles at a much cheaper rate and of a better quality; and that, in time of war, arms and ordnance could be furnished with greater facility, and of superior temper and calibre. The States, notwithstanding all these plausible representations, remonstrate—individuals remonstrate. The States urge that the grant would be a violation of their reserved rights, and the principle upon which the Union was founded, and demand of Congress the source whence the power is derived to grant such a charter of incorporation. Congress very complacently point them to the potent words "common defence and general welfare," and the thing is settled. Individuals represent that an equality of civil and political rights constitute the basis of purely democratical Governments; that none but equal laws can legitimately flow from the principle of equal rights; and that all laws which invade that principle conflict with the spirit of our institutions, and are, to all intents and purposes, legislative frauds upon the rights of the people; and, consequently, utterly destitute of constitutional sanction. They further show, that an exercise of power such as asked for by the petitioners, would confer exclusive privileges and legislative favors—infringe on their natural and political rights—violate the sacred principles of justice and political equality, and, for this reason, be clearly unconstitutional. But Congress, regardless of the truth and propriety of these representations, grant the charter of incorporation; and, when called upon to show their constitutional right to do so, triumphantly refer to the magical words "common defence and general welfare," and there the matter ends. I have put this case for the purpose of illustrating the evils consequent upon an assumption of power, such as contended for by those who maintain that the clause we have been examining authorizes Congress to establish a federal bank. And, as legislators are as much subject to infirmities as other men, and the world not having, as yet, approached that desirable state of which Plato dreamed—"the perfectibility of man"—it is not only possible, but very probable, that cases of this kind might frequently happen. Nor can those who contend for the principle which merges all power in the words "common defence and general welfare," or, what amounts to the same thing, in the will of Congress, object to any case coming within that principle, however dangerous and pernicious in its consequences. As this clause of the constitution has been, and is still much relied on by the advocates of a United States bank, I will take the liberty of introducing such authority in opposition to their views, as will, I trust, have weight, both with this House and the nation. The fourth resolution passed by the General Assembly of Virginia, in December, 1798, reads as follows:

"That the General Assembly doth also express its deep regret, that a spirit has in sundry instances been manifested by the Federal Government, to enlarge its powers by forced constructions of the constitutional charter which defines them; and that indications have appeared of a design to expound certain general phrases (which, having been copied from the very limited grant of powers in the former articles of confederation, were the less liable to be misconstrued) so as to destroy the meaning and effect of the particular enumeration which necessarily explains and limits the general phrases; and so as to consolidate the States, by degrees, into one sovereignty; the obvious tendency and inevitable result of which would be to transform the present

republican system of the United States into an absolute, or at best a mixed monarchy."

Mr. Madison, in his report commenting on this resolution, observes:

"The first question here to be considered is, whether a spirit has in sundry instances been manifested by the Federal Government to enlarge its powers by forced constructions of the constitutional charter.

"The General Assembly having declared their opinion merely by regretting, in general terms, that forced constructions for enlarging the federal powers have taken place, it does not appear to the committee necessary to go into a specification of every instance to which the resolution may allude. The alien and sedition acts, being particularly named in a succeeding resolution, are of course to be understood as included in the allusion. Omitting others which have less occupied public attention, or been less extensively regarded as unconstitutional, the resolution may be presumed to refer particularly to the bank law, which, from the circumstances of its passage, as well as the latitude of construction on which it is founded, strikes the attention with singular force; and the carriage tax, distinguished also by circumstances in its history, having a similar tendency."

"1. The general phrases here meant must be those 'of providing for the common defence and general welfare.'

"In the 'Articles of Confederation,' the phrases are used as follows, in article 8: 'All charges of war, and all other expenses that shall be incurred for the common defence and general welfare, and allowed by the United States in Congress assembled, shall be defrayed out of a common treasury, which shall be supplied by the several States, in proportion to the value of all land within each State, granted to or surveyed for any person, as such land and the buildings and improvements thereon shall be estimated, according to such mode as the United States in Congress assembled, shall from time to time direct and appoint.'

"In the existing constitution, they make the following part of sec. 8: 'The Congress shall have power to lay and collect taxes, duties, imposts, and excises, to pay the debts, and provide for the common defence and general welfare of the United States.'

"This similarity in the use of these phrases in the two great federal charters, might well be considered as rendering their meaning less liable to be misconstrued in the latter; because it will scarcely be said that, in the former, they were ever understood to be either a general grant of power, or to authorize the requisition or application of money by the old Congress to the common defence and general welfare, except in cases afterwards enumerated, which explained and limited their meaning; and if such was the limited meaning attached to these phrases in the very instrument revised and remodelled by the present constitution, it can never be supposed that, when copied into this constitution, a different meaning ought to be attached to them.

"That, notwithstanding this remarkable security against misconstruction, a design has been indicated to expound these phrases in the constitution so as to destroy the effect of the particular enumeration of powers by which it explains and limits them, must have fallen under the observation of those who have attended to the course of public transactions. Not to multiply proofs on this subject, it will suffice to refer to the debates of the federal legislature, in which arguments have on different occasions, been drawn, with apparent effect, from these phrases, in their indefinite meaning."—*Elliot's Debates*, vol. 4, pp. 577—8.

Again, the same distinguished personage, in a letter to Mr. Stevenson, dated November 27, 1830, in which he examines the origin and progress of the clause under consideration, remarks:

"A special provision could not have been necessary for the debts of the new Congress; for a power to pro-

H. of R.]

Sub-Treasury Bill.

[Oct. 13, 1837.]

vide money, and a power to perform certain acts, of which money is the ordinary and appropriate means, must, of course, carry with them a power to pay the expense of performing the acts. Nor was any special provision for debts proposed, till the case of the revolutionary debts was brought into view; and it is a fair presumption, from the course of the varied propositions which have been noticed, that, but for the old debts, and their association with the terms 'common defence and general welfare,' the clause would have remained, as reported in the first draft of the constitution, expressing generally 'a power in Congress to lay and collect taxes, duties, imposts, and excises,' without any addition of the phrase 'to provide for the common defence and general welfare.' With this addition, indeed, the language of the clause being in conformity with that of the clause in the articles of confederation, it would be qualified, as in those articles, by the specification of powers subjoined to it. But there is sufficient reason to suppose that the terms in question would not have been introduced, but for the introduction of the old debts, with which they happened to stand in a familiar, though inoperative relation. Thus introduced, however, they pass undisturbed through the subsequent stages of the constitution.

"If it be asked why the terms 'common defence and general welfare,' if not meant to convey the comprehensive power, which, taken literally, they express, were not qualified and explained by some reference to the particular power subjoined, the answer is at hand, that although it might easily have been done, and experience shows it might be well if it had been done, yet the omission is accounted for by an inattention to the phrasology, occasioned, doubtless, by the identity with the harmless character attached to it in the instrument from which it was borrowed.

"But may it not be asked, with infinitely more propriety, and without the possibility of a satisfactory answer, why, if the terms were meant to embrace not only all the powers particularly expressed, but the indefinite power which has been claimed under them, the intention was not so declared; why, on that supposition, so much critical labor was employed in enumerating the particular powers, and in defining and limiting their extent?

"The obvious conclusion to which we are brought is, that these terms, copied from the articles of confederation, were regarded in the new, as in the old instrument, merely as general terms, explained and limited by the subjoined specifications, and therefore requiring no critical attention or studied precaution.

"Mr. Wilson, justly distinguished for his intellectual powers, being deeply impressed with the importance of a bank at such a crisis, published a small pamphlet, entitled 'Considerations on the Bank of North America,' in which he endeavored to derive the power from the nature of the Union in which the colonies were declared and became independent States; and also from the tenor of the 'articles of confederation' themselves. But what is particularly worthy of notice is, that, with all his anxious search in those articles for such a power, he never glanced at the terms 'common defence and general welfare,' as a source of it."—*Elliot's Debates*, vol. 4, pp. 646-7.

And here, sir, I think I may safely rest this part of the subject.

The second paragraph of the 8th section of the constitution, which vests in Congress the power "to borrow money on the credit of the United States," has also been appealed to by the friends of a national bank. But as nothing like an argument has ever been adduced in support of this position, as it rests upon mere conjecture, without the shadow of authority to support it, and as a bill to charter a bank is not a bill to borrow money, I will not trouble the com-

mittee with any further remarks on this point, but proceed to examine the third paragraph of the 8th section of the constitution, which gives Congress the power "to regulate commerce with foreign nations, among the several States, and with the Indian tribes." This clause has been appealed to by the advocates of internal improvements, as authorizing Congress to construct roads and canals, &c.; it has also been appealed to by the friends of the tariff system, as vesting in Congress an implied power to protect our domestic manufactures; and, lastly, it has been appealed to as authorizing Congress to establish a United States bank. Now, sir, in my humble opinion, the power to regulate commerce does not include the power to make internal improvements of the character just noticed—to protect manufactures by imposing a tariff—nor to establish a national bank. Neither the clause immediately under consideration, nor any other found in the constitution, authorizes Congress, in my judgment, to do either of those three things. Sir, is it meant to be affirmed that the power to "regulate commerce," includes the power to regulate the currency of the several States? If so, then is Congress authorized, under the power to "regulate commerce," to regulate the issues of all the State banks; for these constitute the principal currency of the country. On the other hand, if it be meant that Congress have not the power, under this clause of the constitution, to regulate the currency, how can it be said that Congress are thereby authorized to charter a bank for the purpose of regulating commerce, when the only object of a national bank, as we are told, is to regulate and equalize the exchanges and currency of the country? Again: If the power "to regulate commerce" includes the power to incorporate a bank, why may it not also include the power to grant charters of incorporation for other purposes? Why not authorize Congress to incorporate companies for objects of internal improvements—for manufactures—or, what would appear to be rather more congenial, for ordinary commercial purposes? If Congress can, by this clause of the constitution, authorize one set of men, under an act of incorporation, to deal in bank paper, they possess equally the power to authorize another set to deal in silks and satins, calicoes and gingham. Nor can this position be controverted. The stockholders and agents of a bank are as much traffickers and dealers in paper money, which is a species of commercial commodity, as merchants are in broadcloths and cassimeres. If an act of incorporation, therefore, can be claimed in the one case, as a proper and necessary means to "regulate commerce," it unquestionably can in the other. But the clause in question confers no such power. The power to "regulate commerce," and the power to grant charters of incorporation, are separate and distinct. The former is conferred by the constitution, the latter is not. Sir, what was the nature of the power which the framers of the constitution intended to confer on Congress by this clause? Evidently, to authorize Congress to prescribe or establish certain rules by which commerce should be governed. But will it be pretended that the authors of the constitution meant that this power, which they vested in Congress alone, should be transferred by Congress to an incorporated company? That a chartered company should possess the exclusive power of regulating the commercial interests of the nation—of prescribing rules for its Government—of determining the principles on which it should be conducted, and thus place one of the great interests of the country beyond legislative and constitutional control? No one, I presume, will say, in direct terms, that such was the intention of the framers of the constitution; and yet such is the inevitable result to which the doctrine of construction here combated leads. If such rules of construction prevail, it will be impossible to define the limits of the power of the Federal Government under the clause "Congress shall have power to regulate com-

Oct. 13, 1837.]

Sub-Treasury Bill.

[H. OF R.]

merce," &c. I will conclude my remarks on this clause, by reading from Mr. Jefferson's official opinion on the constitutionality of a United States bank, the following extract:

"To erect a bank, and to regulate commerce, are very different acts. He who erects a bank creates a subject of commerce in its bills; so does he who makes a bushel of wheat, or digs a dollar out of the mines. Yet neither of these persons regulate commerce thereby. To make a thing which may be bought and sold, is not to prescribe regulations for buying and selling. Besides, if this were an exercise of the power of regulating commerce, it would be void, as extending as much to the internal commerce of every State, as to its external. For the power given to Congress by the constitution does not extend to the internal regulation of the commerce of a State, (that is to say, of the commerce between citizen and citizen,) which remains exclusively with its own Legislature; but to its external commerce only, that is to say, its commerce with another State, or with foreign nations, or with Indian tribes. Accordingly, the bill does not propose the measure as a 'regulation of trade,' but as 'productive of considerable advantage to trade.'"

Some have attempted to locate the power to incorporate a national bank—Mr. McDuffie, for example, in his report of 1830, as chairman of the Committee of Ways and Means—on the fifth article of the eighth section of the constitution, which gives Congress the power "to coin money, regulate the value thereof, and of foreign coin, and fix the standard of weights and measures."

"The power to 'coin money, and fix the value thereof,' is expressly and exclusively vested in Congress. This grant was evidently intended to invest Congress with the power of regulating the circulating medium. 'Coin' was regarded, at the period of framing the constitution, as synonymous with 'currency,' as it was then generally believed that bank notes could only be maintained in circulation by being the true representative of the precious metals. The word 'coin,' therefore, must be regarded as a particular term, standing as the representative of a general idea."

Now, sir, if "coin and currency are synonymous," signifying the same thing; if coin be currency and currency coin, Congress is vested with the power "to coin money, regulate the value thereof, and of foreign currency." According to this reading, Congress is authorized, not only to regulate the currency of this country, which consists principally of bank notes, but also the currency of other nations, whatever symbols of industry they may select as mediums of exchange. The chairman of the Committee of Ways and Means appears to have been as much at fault in his knowledge of the currency, properly considered, as of the character and powers of the constitution; otherwise he would not have confounded bank notes with coin—the pretended representative with the thing represented. I say the pretended representative, because the amount of paper money afloat, exceeds at least five times the amount of specie wherewith to redeem it. It is not, therefore, strictly speaking, a representative of coin or real money. It has become rather an instrument of speculation, than a measure or representative of value. The currency of a country, in order to be sound, as every political economist knows, ought to be equal to the precious metals, or to consist of the metals themselves. But the paper currency of this country is, and was, even during the existence of the late United States Bank, but the mere supposititious representative of property. That paper money can never become a proper standard of value, is evident from the fact that it is constantly liable to fluctuation, depreciation, expansion, and contraction. And would it be doing justice to the framers of the constitution—to their sagacity and integrity—so to construe that instrument, or any part thereof, as to authorize Congress to make paper credit, of

whatever kind or description, a standard of value? The only standard or measure of value known to the constitution is gold and silver; a standard, by the way, which has been recognised and adopted from the earliest ages, by all civilized nations throughout the world. If Congress are authorized to incorporate a company, which shall possess the independent and sovereign right to coin or manufacture money, and regulate the value thereof, why may they not also invest such corporations with power to control the commerce of the country in all such exchangeable articles or commodities that may properly come under the standard of weights and measures? Why not go still farther—for if Congress can delegate to a corporation this prime attribute of sovereignty, the establishment of a standard of value—why not, I say, extend it to every other specified power of the constitution? For I repeat it, if Congress have the power, under this or any other clause of the constitution, to delegate to a corporation of its own creating any one of the enumerated powers, they may, with equal propriety, delegate to it every other power. Let Congress recognise this construction, and what would be the consequence? Sir, we should no longer be a nation of freemen, living under a free constitution; but the slaves of soulless corporations. An independent and irresponsible power would be established in the land; the restraints and limitations imposed upon Congress by the constitution would be overthrown; and the foundations of your Government not only rocked, but riven.

Sir, let us examine a little further the extraordinary argument urged by Mr. McDuffie in support of his most extraordinary position. "Coin," says he, "was regarded, at the period of framing the constitution, as synonymous with currency, as it was then generally believed that bank notes could only be maintained in circulation by being the true representatives of the precious metals." What, sir! coin and currency—coin and paper money—coin and bank notes regarded as one and the same thing, as synonymous, at the time of framing the constitution! What! "generally believed at that period," that paper money was "the true representative of the precious metals!" Sir, does not the whole history of that period contradict these reckless and unfounded assertions? I appeal to the historical recollections of every gentleman on this floor, if it does not. Is it not notorious that the framers of the constitution were emphatically hard-money men? Is it not notorious that gold and silver are the only currency recognised by the constitution? Is it not known to all, that Congress have no power, under the constitution, to authorize any individual, company, or corporation, to issue federal paper money? Every part of the constitution which relates to the subject of money is clear, explicit, and unequivocal. The intention of the framers of the constitution, on this subject, is not only made manifest by the letter of the constitution itself, but also by a law passed immediately after the meeting of the first Congress under the constitution, which defines the kind of money to be received by the federal Treasury. This law provides, "that the fees and duties payable to the Government, shall be received in gold and silver only." This statute, be it remembered, was passed within one month after Congress had assembled. And, again, the law in reference to that part of the revenue accruing from the sale of the public lands, passed in 1800, declares that specie and evidences of the public debt, shall alone be received in payment of such lands. These two acts relating to the subject of the federal revenue, passed immediately after the adoption of the constitution, ought and must be regarded as unerring interpreters of that instrument, so far as the point immediately under consideration is concerned. If the members of the first Congress regarded paper money and "coin" as synonymous, why did they enact that gold and silver coin only should be received in payment of the federal revenue? If they even

H. of R.]

Sub-Treasury Bill.

[Oct. 13, 1837.]

considered paper money, or bank notes, as synonymous with coin, as contended by Mr. McDuffie, they appeared, at all events, to discriminate between paper coin and gold and silver coin, by making the latter only receivable in payment of the public dues. So that "gold and silver coin," and not paper coin, appear to be the only currency known to the constitution; or to the laws of Congress which define the kind of currency to be received in payment of the federal revenues.

I would now call the attention of the committee, for a few moments, to the last paragraph of the 8th section of the constitution: "To make all laws which shall be necessary and proper to carry into effect the foregoing powers." It will not be pretended, I apprehend, that this clause vests in Congress any new substantive power; or that it in anywise supersedes or invalidates any one of the enumerated powers. This position would be too extravagant—too monstrous, for even modern sophists to take. It will, I trust, be conceded, that the powers comprehended in this clause are subordinate and incidental in their nature, merely conferring on Congress the right to exercise such means as shall be strictly necessary and proper to execute the express powers; or, without which, the powers expressly granted cannot be carried into effect. This point yielded, as yielded it must be, the question arises, whether a national bank be a necessary and proper means to carry into effect any of the specified powers? In order to show that it is necessary, essential, indispensable, it must be made to appear that the enumerated powers cannot be carried into effect independent of a national bank. Experience has demonstrated that they can, one and all. And, in the second place, in order to prove that a national bank is a proper means, it must be shown that the power to create it is an incidental and not a substantive power; which, I apprehend, cannot be done. No, sir, it cannot be shown that the power to grant charters of incorporation, is merely an incidental or subsidiary power. Among all the powers enumerated in the constitution, I defy gentlemen to designate a solitary one that is capable of being wielded with more potent effect; not for good, but for evil. If Congress possess the power to grant a charter of incorporation, in their national capacity, in one case, they do in another. If they possess it at all, they possess it without limit, and can extend it, whenever they think proper, to any and every object whatever; whether it be in derogation of State and individual rights, to a Mississippi land monopoly, to a monopoly of the trade of the Indies, or to the cod and whale fisheries. Sir, what is the distinguishing characteristics of incorporations? They are essentially aristocratic in their nature; being invested with exclusive privileges—privileges withheld from the rest of society. They are allowed to purchase and hold real estate; which the United States themselves cannot do without obtaining the consent of the States. They are allowed to hold property in *mortmain*, and are capable of being so organized or constituted as to change the course of descent in the several States; I mean where their corporate character is concerned. Nor is this all: so sacred are their rights held, and so carefully guarded are they by the legislature and judiciary, that they cannot be reached by law without permission on their parts; nay, more, they are even placed beyond the control of future legislatures—at least, such is the opinion of some. And yet we are told that a power to incorporate—a power of such great and fearful magnitude, and capable of producing so much mischief—is, after all, a mere incident of a power! Think you, sir, that if the members of the convention who framed the constitution had considered a national bank either a proper or necessary means to carry into effect any of the enumerated powers of the constitution, that they would have rejected a direct proposition to establish a bank, or refused to invest Congress with power to grant charters of incorpora-

tion, of whatever description? Is it probable that wise and patriotic men would have acted so inconsistently—so absurdly? "It is known," says Mr. Jefferson, "that the very power now proposed as a means, was rejected as an end, by the convention which framed the constitution." "A proposition," he adds, "was made to them to authorize Congress to open canals, and an amendatory one to empower them to incorporate. But the whole was rejected; and one of the reasons of rejection urged in debate was, that they then would have power to erect a bank." Here, then, sir, is authority not to be questioned, not to be controverted, that the power to erect a bank, "proposed as a means, was rejected as an end," by the very authors of the constitution itself. The fact, therefore, that the framers of the constitution deliberately and designedly withheld from Congress the power to incorporate a bank, utterly excludes the idea that such power was intended to be granted, either expressly or incidentally, specifically or impliedly. To contend that a power, intentionally withheld from Congress by the framers of the constitution, can be rightfully exercised by Congress, is to outrage common sense, and all approved rules of construction. Let the principle be once established, that neither the express letter of an instrument, nor the evident intention of its author or authors, is to be taken as evidence of its meaning, and all written constitutions, contracts, laws, and charters, become a dead letter. I would entreat gentlemen to consider well before they give further countenance to such doctrines. I would respectfully remind them, that, by disregarding the express provisions of the constitution, and the evident intention of its framers, and resorting to construction and implication alone for authority, they will eventually raise up a monument of folly, which, if not as impious, will create as much confusion as that which towered on Shinar's plain. Let it not be supposed, however, that I would deny the existence of all implied powers. I am aware, sir, that the convention, in framing the constitution, marked out and enumerated the principal ends of Government, without particularizing all the means by which these ends were to be secured. A discretionary power, to a certain extent, must necessarily be left with Congress. The constitution, for example, has vested in Congress the power to raise and support armies. But at what time armies are to be raised, to what extent, and for what cause this power is to be exercised, it has necessarily left to be determined by the national legislature. Many other cases might be cited, where the means necessary to carry into effect the enumerated powers are left to the selection of Congress. But the mean, or incidental power, ought, in all cases, to bear a due relationship to the specified power. It was well remarked by a distinguished Senator (Mr. CLAY) in debate, that:

"In all cases where incidental powers are acted upon, the principal and incidental ought to be congenial with each other, and partake of a common nature. The incidental power ought to be strictly subordinate, and limited to the end proposed to be attained by the specified power. In other words, under the name of accomplishing one object which is specified, the power implied ought not to be made to embrace other objects, which are not specified in the constitution. If, then, you could establish a bank to collect and distribute the revenue, it ought to be expressly restricted to the purpose of such collection and distribution.

"I contend that the States have the exclusive power to regulate contracts, to declare the capacities and incapacities to contract, and to provide as to the extent of responsibility of debtors to their creditors. If Congress have the power to erect an artificial body, and say it shall be endowed with the attributes of an individual—if you can bestow on this object of your own creation the ability to contract, may you not, in contravention of State rights, confer upon slaves, infants, and *femés coverts*, the ability to con-

Oct. 13, 1837.]

Sub-Treasury Bill.

[H. OF R.]

tract? And if you have the power to say that an association of individuals shall be responsible for their debts only in a certain limited degree, what is to prevent an extension of a similar exemption to individuals? Where is the limitation upon this power to set up corporations? You establish one in the heart of a State, the basis of whose capital is money. You may erect others, whose capital shall consist of land, slaves, and personal estates, and thus the whole property within the jurisdiction of a State might be absorbed by these political bodies. The existing bank contends, that it is beyond the power of a State to tax it; and if this pretension be well founded, it is in the power of Congress, by chartering companies, to dry up all the sources of State revenue."

Yes, sir, the honorable Senator was right, when he said that the incidental power ought to be strictly subordinate, and limited to the end proposed to be attained by the specified power. He was right in saying, that in all cases where incidental powers are acted upon, the principal and incidental ought to be congenial with each other, and partake of a common nature. And he would have been equally right, had he added, that no means can be proper that are not compatible with the spirit of the constitution and the genius of our Government. But I will no longer detain the committee on this branch of the subject, having already shown, as I believe, beyond all cavil, that the clause which has been last examined does not confer on Congress power to incorporate a moneyed institution of any description.

I will now proceed to examine arguments—not of a constitutional character, nor strictly applicable—but nevertheless frequently appealed to by the advocates of a national bank. I allude to that class of arguments which rest on precedent alone for support. The friends and champions of a United States bank, when no longer able to find legitimate support, when forced to abandon every constitutional position, seek refuge in the misty regions of precedent. The acts of former legislatures, and the opinions of the Supreme Court, and not the constitution, are appealed to for authority: and lo! King Precedent is anointed with the unction of infallibility; becomes the keeper of their consciences, and the object of their idolatry; his behests the laws, his standard the mistletoe, which these political Druids venerate. But to vary the figure—what is there in the character or nature of precedent so sanative and holy that can heal all moral maladies, and justify all political transgressions? Or, wherefore is it, that precedent should fetter the intellect, destroy moral agency, and bear away where reason and conscience should alone preside? Sir, would it not be well for those who have sworn to support the constitution, to pause and reflect before they subscribe to a doctrine so fraught with mischief, and so inimical to reason?

It is alleged, by some of the servile brain-bound slaves of precedent, that Congress would be justified in chartering a bank, (at the present time,) whether authorized by the constitution or not, because similar institutions have hitherto existed. They contend that, inasmuch as those institutions were established by Congress, submitted to by the people, acquiesced in by the States, and sanctioned by the Supreme Court, they were recognised by all the acts which imply the sanction of organic law. Sir, I cannot, for one, yield assent to doctrines so false, so loose, so licentious. I deny that the great body of the American people; the democracy, are, or ever were, in favor of a chartered money monopoly, whether State or national. The insinuation is a rank and insolent libel on their patriotism, their intelligence, and their integrity. No, sir, the frank and honest-hearted democrats of this country utterly reject and abhor the doctrine, that time or precedent can sanctify iniquity, or justify any infraction of the social compact.

It is contended by another, but similar class of moralists, that the constitution ought to be so construed, as to expand with the growth of the country, and conform to its diversified and mutable relations. Against this doctrine, also, I enter my protest. It is too ductile to be either safe or sound; too liable to be drawn out to dangerous lengths, and bent to mischievous purposes. Sir, what is the nature of the obligation under which we act? What is required of us before entering upon our duties as representatives? It is required, by the constitution, that "the Senators and Representatives, and the members of the several State Legislatures, and all Executive and Judicial officers, both of the United States, and of the several States, shall be bound by oath or affirmation to support this constitution." Sir, the requisition is emphatic and positive—couched in language not to be misunderstood. Our duty is palpable; we cannot err ignorantly. We are bound, by all the obligations which an oath imposes, to "support this constitution." We are not required to "support" the forced construction that may be given by a pliant court, or by a careless or venal legislature. We are not called upon to "support" a constitution corrupted by congressional interpolations, or distorted and sophisticated by the legal mummeries of the bar or the bench. Nor are we obligated to support a constitution that may be construed to change with times and circumstances; that may grow with the growth, and decay with the decline of the country: but we are bound by our solemn oaths or affirmations to "support this constitution" in its purity and integrity, unsophisticated and uncontaminated. Sir, there are two classes of men in this world who rely upon precedent, and who seem to believe in its infallibility, with a great deal of spirit and perseverance. The one, the morally lax, who have no objection to transgress, provided they can find a pretext in precedent; the other, the mentally indolent, who find less labor in adopting the opinions of others, than in analyzing and investigating for themselves; while the rigidly honest and intellectually industrious, spurn all mental tyranny, refusing, in all cases, to yield their assent, but as the result of their conviction. Sir, let me not be misunderstood when I say that precedent is dangerous and pernicious; I mean that it is so when regarded as an obligatory rule in matters of legislation, and in the common affairs of life. In courts of justice, in the dispensation of civil and criminal law, it may, to a certain extent, be advantageously referred to as a guide. For so diversified and complicated are the subjects of litigation, that it is impossible for the legislator to anticipate and provide for every case that may occur. It becomes the duty, therefore, of the judge, the organ of the law, not only to proclaim the written law of the land, but also to decide in cases where no statutory provision has been made, as reason and justice may dictate. Nor, as a general rule, ought decisions thus made to be lightly regarded by succeeding judges, especially in cases where the points in litigation are analogous. But, sir, while I willingly admit that precedent may be properly referred to as authority in the administration of the law, I utterly deny that it is necessarily obligatory upon legislative bodies. It matters not, therefore, whether a precedent in favor of a United States bank be found in the acts of former legislatures, or in the decisions of the Supreme Court, it is, in either case, incompetent to control the acts of this body. Congress, I trust, will never be willing to acknowledge the binding force of precedent, in the decision of constitutional questions. But, sir, admitting, for the sake of argument, precedent to be good authority, what does it prove in this case? I apprehend that it would rather make against than in favor of a bank. We find, in 1811, when a renewal of the charter granted in 1791 was applied for, that its constitutionality was discussed, and that the application was rejected. And further, when the bank petitioned Congress for time to wind up its affairs, the petition was referred to

H. OF R.]

Sub-Treasury Bill.

[Oct. 13, 1837.]

a committee who reported against the application, urging that it was unconstitutional, and the report was concurred in. In 1813, when the subject of a bank was again before Congress, and while under discussion in the House of Representatives, a distinguished gentleman from Massachusetts, [Mr. WEBSTER,] then a member of the House, declared in his place, while opposing the bank, that the renewal of the bank charter had been refused, because it was unconstitutional; and Congress again decided against a bank. In 1832, the bill to renew the charter granted in 1816 was vetoed by the late President, and subsequently rejected by Congress, both alleging that it was unconstitutional. So that the precedents, so far as the action of Congress is concerned, are equal. If reference be had to the States, we shall find that a large majority of them have been opposed, on constitutional ground, to a United States bank. Whatever authority, therefore, may attach to precedent, makes against a bank. But the Supreme Court has decided that Congress have power to incorporate a bank; and these decisions are appealed to with as much apparent triumph, by the advocates of a national bank, as if the decrees of that court were binding on Congress, and settled the constitutional question forever. Sir, what are we to understand from this? Is it meant to be insinuated that the three departments of Government are not co-ordinate, and that the judiciary is clothed with the exclusive attributes of supremacy? that neither the Executive nor the Legislative departments are allowed to judge of their own powers, when acting within their appropriate spheres, and in the discharge of their official duties? Is it intended that the understandings, the oaths, and the consciences of the other two departments, are to be silenced and overawed by the despotic fiat of the bench? This heretical, servile, and detestable doctrine is industriously propagated, I am aware; not boldly and openly, but clandestinely and insidiously, by hints, innuendoes, and mysterious givings out. God forbid, patriotism forbid, that it should ever be acknowledged by the Executive or Legislative departments, or received by the American people. For one, I reject it with disdain. I deny, and defy mortal man to prove, that the decision of the Supreme Court can settle a constitutional question in any other than in a judicial sense. It cannot affect legislation—cannot control the decisions of Congress, or of the Executive—cannot control the sovereign and absolute power of the people, nor of their representatives. It is just as much the province of Congress, or of the Executive, to decide upon the constitutionality of any matter that may properly come before them for their action, as it is for the judiciary when it comes before them for decision. Congress is no more bound by the opinions of the Supreme judges than are the judges by the opinions of Congress. The constitution vests “the judicial power in a Supreme Court, and in such inferior courts as Congress may from time to time ordain and establish.” In all instances, therefore, where suits are prosecuted in the courts of the United States, of which the courts have jurisdiction, and decided by the Supreme Court, all such decisions are final. That being the court of the last resort, the parties cannot appeal, but in all cases are bound to abide by such decision. But, as has been before remarked, no decision of the Supreme Court can be obligatory upon either of the other co-ordinate departments. When either is called to the discharge of its appropriate duties, that branch, and not the Supreme Court, is the judge, under the constitution, of its own acts. Nor are the decisions of the Executive or Legislative departments binding upon the judges of the Supreme Court, when acting within their appropriate spheres. So long as each of the several departments acts as a check upon the other, there is less danger of the abuse of power—whether springing from ignorance or unlawful ambition. But it may be asked, how constitutional questions are to be settled in the event of a non-concurrence of opinion in the co-or-

dinate departments. I answer, by the people through the ballot boxes. For let it be borne in mind, that this Government is emphatically a Government of the people: it emanates from the people, its powers are granted by the people, and are to be exercised for their benefit; and, so far at least as the representative department is concerned, in pursuance of their instructions, whenever they may think proper to exercise the right. All the departments of Government, the Executive, the Legislative, and the Judiciary, were established by the people to transact their business, agreeably to the powers bestowed. Consequently, when contradictory opinions are entertained by the several departments, with regard to the extent of their constitutional powers, the people are the only tribunal to which the matter in dispute can be properly referred; and their decision, proclaimed through the ballot box, must be final and conclusive. I am aware, sir, that this doctrine will not be very popular in certain quarters; but I conceive it, nevertheless, to be in accordance with the genius and spirit of our institutions, and maintainable upon strict democratic principles.

It being admitted, then, that the several departments are co-ordinate, and their opinions, therefore, not binding upon each other, it remains to be considered what weight is due to the decisions of the judiciary in favor of the constitutionality of a United States bank. Sir, whatever importance I might be willing to attach to the opinions of such an enlightened tribunal on doubtful and intricate subjects, I am unwilling to concede to them a controlling influence in the decision of a question like the one under discussion, when I am furnished with a written constitution for my guide, and in which every delegated power is distinctly and accurately delineated, both to the natural and the mental eye.

Sir, I have examined this instrument intently, anxiously, and, I trust, honestly; but nowhere do I find in it a power to grant charters of incorporation. Sir, I affirm, and hold that I am able to maintain, in defiance of all the arts of sophistry and mystification, that the convention which framed the constitution did neither grant any express power authorizing Congress to charter a national bank, nor intend that any power whatever, whether incidental or otherwise, should be exercised for such purpose. And further, that the convention positively rejected a direct proposition to empower Congress to incorporate a national bank, and repeatedly rejected written propositions to grant charters of incorporation. But let us first examine for a moment the ground assumed by the judiciary, in arguing the constitutionality of a national bank. By reference to a decision had in the case of *McCulloch* against the State of Maryland, it will be found that the principles upon which the judiciary rely, are substantially the same which prevailed in 1791, and ushered into being the first United States Bank. The main point of the argument of General Hamilton, as well as that of the Supreme Court, in support of the constitutionality of a bank, turns upon the alleged necessity of the measure. The judges, as I understand them, acknowledge the absence of all express constitutional authority, admit that the power can only be derived by implication, and only exercised on the ground of a just necessity. That is, a bank is constitutional, if it be necessary to carry into execution any of the express powers; but, if not necessary to that end, or if that end can be attained by other appropriate means, then it is not constitutional, the power to incorporate not being expressly granted to Congress. Upon this hypothesis Congress have no constitutional power to charter a national bank, if such bank be not absolutely and indispensably necessary to the execution of a specified power. Query: would even the necessity of the measure justify its adoption, without an amendment to the constitution? But, sir, it yet remains to be shown that a national bank is an essential means of execu-

OCT. 13, 1837.]

Sub-Treasury Bill.

[H. OF R.]

ting any of the enumerated powers; and, until this be done, the opinions of the judiciary avail nothing. Whatever may be the general principle affirmed by them, their arguments neither make for nor against the constitutionality of a national bank. It is affirmed by the Supreme Court, in the case already alluded to, that "the government which has a right to do an act, and has imposed on it the duty of performing that act, must be allowed to select the means." Sir, I am constrained to doubt the validity of this doctrine when carried to its full extent. Suppose we put it to the test. It is not only the right but the duty of Congress to "regulate commerce." Does it follow that they have the right to make use of what means they please in order to accomplish that end? If so, they may incorporate a company for that purpose, alleging that an act of incorporation is a necessary mean for the attainment of the end proposed. In other words, that the regulation of commerce could not be so well effected in any other way. And why not? There is no constitutional difficulty in the way that may not be surmounted with the ladder of construction. And if Congress should only happen to think that a chartered company would be the best mean to "regulate commerce," what would there be to prevent such incorporation? According to the position assumed by the Supreme Court, you can first raise this power from an incident, and then consider it a principal—confer on it the power of legislative procreation, and authorize the mother institution to propagate her bastard progeny in every State and Territory in the Union. And why not, I say? You have all the authority in favor of it which precedent can furnish, in the charter of the late bank of the United States Bank. That institution had the power conferred upon it by Congress of multiplying its progeny at pleasure. It had the power, by virtue of its character, to establish branch banks, without the consent of the States, whenever and wheresoever it pleased. It had the legislative power delegated to it by Congress, in defiance of the checks and restraints which the American constitutions interpose, of creating, at its option, other banks and other directors; and this power received the sanction of the judiciary. If Congress possessed the constitutional power to incorporate a moneyed institution, such as the late United States Bank, it may also possess the power to charter a company, and endow it with the faculty of legislative fecundity, to regulate the commerce of the country. Only let Congress adopt the principle that they have the power to select what means they please, in order to carry into execution a specific power, and all the limitations, all the restraints which the grant of delegated powers impose, are broken down and subverted forever. Sir, I must be permitted to say that I consider this doctrine not only false, but dangerous to liberty. The exercise of a discretionary power, in the selection of means, must necessarily be limited to such means as are strictly proper; and no means that are incompatible with the principles upon which our Government is founded, can be proper, however convenient they may be. A chartered monopoly is not, cannot be a proper mean to carry into effect any of the ends of a Government based on the principles of political equality. Would you consider the exercise of exclusive political privileges as an appropriate means to promote the principle of equal political rights? The idea is absurd on the very face of it.

Mr. Chairman, I would not wantonly assail the reputation of the judiciary. I trust that I am capable of fairly and honestly appreciating the character of that enlightened and honorable tribunal. But however highly I may esteem them for purity of purpose and integrity of character, I cannot, with the evidence before me, regard them as unerring in judgment; and I trust that the day is far distant when they will be recognised by Congress, or the American people, as a body of infallibles. Sir, I believe that I am justified in saying that the circumstances which surround

and necessarily operate upon the American judiciary, are unpropitious to liberty; the nature of their office, the tenure by which it is held, and the fact of their non-accountability to the people, must, on the known principles of human nature, have a tendency to render them covetous of power, arbitrary, and despotic. Nor is this all. Indocinated from their youth in the principles and prejudices of English jurists; educated in English books; ever consulting English authorities; constantly familiar with monarchical doctrines; in a word, all the laws of mental association, under which their intellects are reared and fashioned, are inimical to that broad-based and high-toned freedom which the American people delight to cherish. Nor will the truth of this position be doubted or denied by those who are familiar with the history of the past; who have studied the springs of human action; reflected upon the nature of human power; and observed its constant proneness to enlarge or overleap its boundaries. But why appeal to hypotheses, when I can so readily summon facts to my aid? The history of the Supreme Court is rife with testimony directly to the point. By a careful examination and analysis of its decisions, it will be found that they have, in most instances, leaned to the side of federal power; overlooked the rights of the citizen and of the States; and evinced a strong and uniform bias for a consolidated Government. The alien and sedition laws—notoriously unconstitutional, and so pronounced by Mr. Jefferson and the American people—received the sanction of that court. The sedition, or "gag law," made it an offence, punishable by indictment, to publish any thing which even had a tendency to bring into disrepute the officers of the Government; and many worthy and patriotic citizens were, in pursuance of that nefarious law, incarcerated for daring to complain of the oppressions of their rulers. And this law, unconstitutional as it was, and subversive of the rights of the citizens and of the principles of our Government as it was, received the judicial sanction of the Supreme Court. Sir, I will hazard the declaration, and without the fear of contradiction, that, if all the principles which have received the sanction of the judiciary were now in full force and operation, the American people, bereft of all the blessings of a free constitution, would, at this moment, be writhing under the unmitigated oppressions of a heartless, ruthless despotism. And yet, sir, strange as it may appear, there are those among us, notwithstanding their knowledge of this truth, and notwithstanding all the judicial libels upon the constitution, which are plain to their eyes and to their understandings, who still cleave to that tribunal with all the zeal and enthusiasm of infatuation—regard it as the exclusive depository of wisdom, of freedom, of patriotism—and its decrees as infallible, fixed, and immutable, as the fiat of fate.

But, sir, I will bring the decisions of the judiciary to a decisive test, viz: the intentions of the framers of the constitution with regard to such institution. And here, then, I wish it to be borne in mind, that the judiciary have uniformly admitted that the power to incorporate a national bank was not among the enumerated powers of the constitution, and that it could only be derived by implication. In admitting that the power in question was an implied and not an express power, they necessarily assume that the framers of the constitution intended to vest in Congress a power which they omitted to specify; for surely it could not be pretended by an intelligent body of men, such as compose our judiciary, that Congress possessed the constitutional power to do an act which the constitution nowhere expressly authorizes, and which the framers of that instrument evidently intended to interdict. This doctrine of construction, therefore, rests entirely upon the known or supposed intentions of the convention which framed the constitution. It is incumbent, therefore, on those who allege, in the absence of all direct authority, that Congress

H. OF R.]

Sub-Treasury Bill.

[Oct. 13, 1837.]

possess an implied power to incorporate a national bank, to show, at least, that the convention did not intentionally withhold the said power from Congress. Now, sir, if this cannot be done, but, on the contrary, if it can be proved that the subject in question was agitated in the convention which framed the constitution; that propositions were there made to invest Congress with power to charter a bank, and that all propositions having that object in view were rejected by the convention, it necessarily follows that Congress possess no such power, whether expressed or implied, the decision of the Supreme Court to the contrary notwithstanding. I then take this ground: that, inasmuch as there is no express constitutional authority given to Congress to charter a bank, and as the framers of the constitution repeatedly and deliberately rejected all propositions to vest in Congress power to grant acts of incorporation of whatever description, Congress, therefore, are as virtually and morally prohibited from granting a bank charter (in its national capacity) as if the constitution contained an express prohibitory clause with regard to it. I repeat that this is my ground; and if I can show that the framers of the constitution did not intend to vest in Congress power to grant acts of incorporation of any kind, but designedly withheld such power, then the constitutional right to charter a bank does not, and cannot, belong to Congress. In order to show what were the views entertained on the subject of a national bank, as well as of every other species of incorporation, by the framers of the constitution, it will be necessary to consult the journal of the convention, as well as the statements of several of the delegates after the convention rose. But, previous to introducing these authorities, I will state—what is already known to the committee—that there were two parties in the convention, who held opposing views relative to the form and character of the government proposed to be established. The one advocated a supreme national or consolidated, the other a federal form of government. The latter eventually triumphed. The friends of a supreme government, after being defeated in all their direct efforts, endeavored to accomplish their purpose by indirect means, as fully appears by the following extract from "Taylor's New Views of the Constitution":

"August 18. It was proposed to empower the Legislature of the United States, (the word national is now dropt,) 'to grant charters of incorporation in cases where the public good may require them, and the authority of a single State may be incompetent; to establish a university; to encourage, by proper premiums and provisions, the advancement of useful knowledge and discoveries; to establish seminaries for the promotion of literature and the arts and sciences; to grant charters of incorporation; to establish institutions, rewards, and immunities, for the promotion of agriculture, commerce, and manufactures; and to regulate stages on the post-roads,' which, with other propositions, were referred to the committee of July 23d.

"September 14. 'Question. To grant letters of incorporation for canals, et cetera; negatived. To establish a university; negatived.'

"Their rejection was a necessary consequence of substituting a federal for the national Government, zealously contended for, from the 29th of May to the 14th of September. It was obvious that powers to establish corporations, prescribe the mode of education, patronise local improvements, and bestow rewards and immunities for the promotion of agriculture, commerce, and manufactures, would certainly swallow up a federal, and introduce a national government. When, therefore, a federal system obtained the preference, it would have been inconsistent with the high degree of intelligence possessed by the members of the convention, to have permitted their determination to be defeated by these indirect attempts. This intelligence was assailed by the soothing but insidious restriction, that the powers to incorporate, grant exclusive privileges, and exer-

cise every species of patronage, were only to be exercised 'in cases where the public good may require it.' The same soothing but insidious argument is now addressed to the intelligence of the public, to justify an exercise of the very powers which the intelligence of the convention withheld from a federal government; and whether the promise of public good has been fallacious or fulfilled by the monopolies of currency, of manufactures, and the extension of federal patronage, the public can decide. Yet, whatever may have been their temporary effect, it is obvious that the enlightened framers of the constitution considered the condition of public good, as an enlargement and not a restriction of power; and that it would defeat all the limitations of the constitution, by which a federal government could be formed or sustained. It was a pretext which would fit every encroachment or usurpation; and no powers could be more indefinite and sovereign than those of granting exclusive privileges, bestowing rewards and immunities upon the three comprehensive interests of society, agriculture, commerce, and manufactures, and patronising capitalists, paupers, knowledge, and ignorance. Such a nest of powers, though exhibited as sleeping in the bed of public good, bore so strong a resemblance to the old bed of justice in France, which was the repository of evil as well as good, that they were all rejected. It was evident that they would be sufficient to re-hatch the strangled national form of government; and the convention having finally preferred the federal form, thought that no good to the public could result from such powers, which would recompense it for the evils it would sustain from the subversion of that form. The convention saw, that if Congress could exercise such powers for the public good, it might, upon the same ground, usurp any powers whatsoever, and, in rejecting the propositions, decided between investing that body with a general or limited federal authority. Hence the power to regulate commerce was not intended to revive the rejected propositions to empower Congress to bestow rewards upon agriculture, commerce, and manufactures. Hence the rejected proposition, to empower Congress to direct the exercise of the judicial power, cannot enable it to extend the jurisdiction of the Supreme Court. And, for the same reason, a power to make war cannot revive the rejected power to make canals, or to perform any of those et cetera, whatever they were, referred to by the journal. If these sweeping and indefinite sovereign powers, or all powers thought by those who exercise them to be necessary for the public good, with an et cetera besides, though proposed and rejected, do yet pass to Congress under the constitution, then the battle between the national and federal parties in the convention terminated quite contrary to the usual course of things; the vanquished were victorious, and the victorious were vanquished; and if they were now alive, one party would be as much surprised to discover, that it had carried the consolidating propositions which it had lost, as the other, that it had lost the federal principles which it carried. The spectacle of the slain rising up alive, and the living falling down dead, could not have been expected by either.

"No powers can be more sovereign and arbitrary, than those of deciding and doing whatever may administer to the public good, and of pilfering private property by privileges, partialities, premiums, monopolies, rewards, and immunities; nor more capable of reaching any end. Had the rejection of such powers been unnecessary for the security of a federal form of government, the convention might have still been justifiable for the act, as deeming them tyrannical, fraudulent, and oppressive. Did the convention reject them in fact, and replant them in masquerade? I discern no evidence in the journal to excite such a suspicion. Colonel Hamilton, far from discerning the supposed ingenuity of sinking a national form of government in a lake of obscurity, to be fished up by a long line of constructions, when it might be safer to avow the intentions, seems to have quitted the convention

OCT. 13, 1837.]

Sub-Treasury Bill.

[H. OF R.]

in despair, soon after the failure of his project. Mr. Randolph, undoubtedly influenced by having lost his plan also, refused to sign the constitution. And though Mr. Madison and Colonel Hamilton both signed it, and Mr. Randolph supported it in the Virginia convention, they must have been influenced by the patriotic motive of effecting some good, though they could not accomplish all which they attempted. These are strong reasons to prove that the gentlemen who contended for a supreme national government, and of whose propositions for that purpose not one was adopted by the convention, did not imagine they had succeeded."

It appears that the indirect and insidious means (which were intended to be exercised through the medium of incorporations and exclusive privileges) of the consolidationists, to establish a supreme national government, shared the same fate in the convention as did their more open and direct efforts. But, sir, let us proceed to examine the evidence, on the point in question, in the order in which it stands on the journal of the convention: On the 29th of May, the third day after the convention had formed a quorum, Mr. Pinckney, delegate from South Carolina, submitted the plan of a constitution, in which he proposed to bestow on Congress the power, "to borrow money," &c., &c. After various propositions, plans, and resolutions, had been sufficiently debated,

"It was moved and seconded that the proceedings of the convention for the establishment of a national government, except what respects the supreme executive, be referred to a committee for the purpose of reporting a constitution, conformably to the proceedings aforesaid; which passed unanimously in the affirmative."

On the 24th of July, the committee, consisting of five, were chosen, and on the 6th of August, the committee reported the "draught of a constitution," and among other powers proposed to be given to Congress, were the following: "To lay and collect taxes, to borrow money, and emit on the credit of the United States."

On the 16th of August, when this "draught of a constitution" was under discussion, and particularly the power last above mentioned,

"It was moved and seconded to strike out the words 'and emit bills' out of the eighth clause of the first section of the seventh article; which passed in the affirmative."

"YEAS, New Hampshire, Massachusetts, Connecticut, Pennsylvania, Delaware, Virginia, North Carolina, South Carolina, Georgia, 9. NAYS, New Jersey, Maryland, 2."

The convention, after having denied to Congress the power to emit bills of credit—which power had been possessed by the confederation—deemed proper to extend a like prohibition to the State governments; this subject was decided on the 28th day of August, when the 12th article was under consideration:

"It was moved and seconded to insert the words 'nor emit bills of credit,' after the word 'money,' which passed in the affirmative."

On the 18th of August, as has already been shown, two different propositions were made to authorize Congress to grant acts of incorporation, and were both rejected. On the 14th of September, the power to create corporations was again proposed to be vested in Congress, but was again, and for the third and last time rejected. (See journal.) Thus far the journal of the convention. I would now ask the attention of the committee to the statements made by the members of the convention.

Luther Martin, a delegate from the State of Maryland, in his disclosures to the Legislature of that State, makes the following remarks:

"By our original articles of confederation, the Congress have power to borrow money and emit bills of credit on the credit of the United States; agreeable to which was

the report on this system as made by the committee of detail. When we came to this part of the report, a motion was made to strike out the words 'to emit bills of credit;' against the motion we urged, that it would be improper to deprive the Congress of that power; that it would be a novelty unprecedented to establish a government which should not have such authority. That it was impossible to look forward into futurity so far as to decide that events might not happen that should render the exercise of such a power absolutely necessary; and that we doubted, whether if a war should take place it would be possible for this country to defend itself, without having recourse to paper credit, in which case there would be a necessity of becoming a prey to our enemies, or violating the constitution of our Government; and that, considering the administration of the Government would be principally in the hands of the wealthy, there could be little reason to fear an abuse of the power by an unnecessary or injurious exercise of it. But, sir, a majority of the convention, being wise beyond every event, and being willing to risk any political evil rather than admit the idea of a paper emission, in any possible case, refused to trust this authority to a government, to which they were lavishing the most unlimited powers of taxation, and to the mercy of which they were willing blindly to trust the liberty and property of the citizens of every State in the union; and they erased that clause from the system."—*Elliot's Debates*, vol. 1, p. 413.

"By the tenth section every State is prohibited from emitting bills of credit. As it was reported by the committee of detail, the States were only prohibited from emitting them without the consent of Congress: but the convention was so snitten with the paper money dread, that they insisted the prohibition should be absolute. It was my opinion, sir, that the States ought not to be totally deprived of the right to emit bills of credit, and that as we had not given an authority to the General Government for that purpose, it was the more necessary to retain it in the States. I considered that this State, and some others, have formerly received great benefit from paper emissions, and that if public and private credit should once more be restored, such emissions may hereafter be equally advantageous; and further, that it is impossible to foresee that events may not take place which shall render paper money of absolute necessity; and it was my opinion if this power was not to be exercised by a State without the permission of the General Government, it ought to be satisfactory even to those who were the most haunted by the apprehensions of paper money; I therefore thought it my duty to vote against this part of the system.

"The same section also puts it out of the power of the States to make any thing but gold and silver coin a tender in payment of debts, or to pass any law impairing the obligation of contracts."—*Id.* p. 422.

"*March the 11th, 1798.*—When the bank bill was under discussion in the House of Representatives, Judge Wilson came in, and was standing by Baldwin. Baldwin reminded him of the following fact which passed in 'the grand convention.' Among the enumerated powers given to Congress, was one to erect corporations. It was, on debate, struck out. Several particular powers were then proposed. Among others, Robert Morris proposed to give Congress a power to establish a national bank. Gouverneur Morris opposed it, observing that it was extremely doubtful whether the constitution they were framing could ever be passed at all by the people of America; that to give it its best chance, however, they should make it as palatable as possible, and put nothing into it not very essential, which might raise up enemies; that his colleague [Robert Morris] well knew that 'a bank' was in their State (Pennsylvania) the very watch-word of party; that a bank had been the great bone of contention between the

H. of R.]

Sub-Treasury Bill.

[Oct. 13, 1837.]

two parties of the State, from the establishment of their constitution, having been erected, put down, erected again, as either party preponderated; that, therefore, to insert this power, would instantly enlist against the whole instrument, the whole of the anti-bank party in Pennsylvania. Whereupon, it was rejected, as was every other special power, except that of giving copy-rights to authors, and patents to inventors; the general power of incorporating being whittled down to this shred. Wilson agreed to the fact."—*Jefferson's Memoirs*.

Now, sir, let us consider, for a moment, the several statements made by the delegates to the convention, and of Mr. Jefferson, in connexion with the evidence contained in the journal, and see if an array of testimony be not presented in opposition to the unfounded and impudent assumption—that it was the intention of the convention to authorize Congress to "emit bills of credit"—that is decisive and overwhelming. It appears by the disclosures of Luther Martin, as well as by the original journal, that propositions were repeatedly made in the convention, to authorize Congress to emit "bills of credit," and that all propositions to that effect were most signally rejected! It is expressly stated by the attorney general of Maryland, that a majority of the convention "were willing to risk any political evil, rather than admit the idea of a paper emission in any possible case;" and that they (the convention) "erased that clause from the system." And again, when speaking of the extension of the prohibition to the States, he remarks: that "the convention were so smitten with the paper money dread, that they insisted the prohibition should be absolute!" So that both Congress and the States, as we have already seen, are prohibited by the constitution from "emitting bills of credit;" or from issuing paper money, "in any possible case." It is contended by Mr. Gallatin, in his "Considerations on the Currency," &c., that bank bills and bills of credit are one and the same thing. He remarks: "the constitution of the United States prohibits every State from issuing bills of credit: now, the bills emitted by a bank," he adds, "are to all intents and purposes bills of credit." And hence he concludes, that the State which creates such bank, violates the constitution. If the bills issued by State banks, are to all intents and purposes "bills of credit," in the constitutional sense, as Mr. Gallatin contends—and I am not disposed to dispute the point with him at present—then would bills issued by a United States bank, also be bills of credit. If a State, therefore, by issuing bills of credit, or by incorporating a bank for that purpose, violates the constitution, Congress by doing the same thing, equally violates that instrument; because, as has already been shown, the power to "emit bills of credit" was withheld from Congress as well as from the States. The reason why a prohibitory clause was not incorporated into the constitution in relation to the United States, as well as to the State governments, is obvious. By the articles of confederation, Congress were expressly authorized to "emit bills of credit." This power had been exercised by Congress, and the evil effects resulting from it, in the shape of continental money, were in evidence before the members of the convention at the time of framing the constitution. The framers of the constitution, admonished by the history of the past, wisely and patriotically endeavored to guard their country from a similar evil in future, by excluding from the new constitution, the power which had been conferred on Congress by the articles of confederation, as well as by prohibiting the exercise of that power to the State governments.

Congress are, by the constitution, not only deprived of the power of "emitting bills of credit," or of "issuing paper money in any possible case," but expressly limited in the exercise of their power, with regard to the currency, to the coining of gold and silver, and to the regulation of

the value of foreign coin. And when Congress have done this, they have done all that the constitution requires or permits them to do on the subject of the currency.

Having shown that the power to "emit bills of credit" is not delegated to Congress, and that such was the "dread of paper money" entertained by the convention, that they withheld from Congress the power to issue, or cause to be issued, such money "in any possible case," I might dismiss this part of the subject without further remark; but as it is my wish to put an end to all doubt and cavil, I will, even at the hazard of using tedious repetitions, again refer to the important fact, that it was repeatedly proposed in convention to vest Congress with power to grant charters of incorporation, and that all such propositions were rejected in every instance, and under every modification. This position has been fully established by the journal of the convention, as has been already shown, as well as by the statements of able and honorable members of that body. Mr. Madison, in his reply to General Hamilton's arguments in favor of a national bank, informs us that "a power to grant charters of incorporation had been proposed in the convention, and rejected." Messrs. Baldwin and Wilson, both distinguished members of the federal convention, have informed us, through Mr. Jefferson, that among the enumerated powers ("proposed to be") given to Congress, was one to erect corporations, and that "it was, on deliberation, struck out." And further, that "Robert Morris proposed to give Congress power to establish a national bank," and that the proposition was opposed by Gouverneur Morris, on the ground that it would be unpopular with the people. This proposition was also rejected by the convention. Well, sir, we are at length enabled satisfactorily to determine whether a power to grant charters of incorporation be a substantive or incidental power. That it was not regarded as an incidental power by those members of the convention who were the advocates of incorporations, is evident from the fact that they proposed to class it with the enumerated and substantive powers. And that it was not considered as incidental by those members who opposed it, is equally manifest from the reasons urged by them in debate against it. They opposed it, not on the ground that it could be derived by implication, but on the broad democratic principle that it was incompatible with the character of the government which they had been delegated to establish, and because its exercise would be dangerous to the liberties of the people. The position assumed by the judiciary, therefore, that the power to charter a national bank is an incidental power, is condemned and contradicted by the unanimous sense of the convention. The convention, by deliberately withholding from Congress the power to grant charters of incorporation for both general and special purposes, thereby clearly and indisputably discountenanced and condemned the principle. Yes, sir, it was the principle of exclusive privileges and of chartered monopolies to which they were opposed, and which they promptly, sternly rejected, as often as introduced, and in whatsoever shape presented. And will it be pretended that the authors of the constitution, after having thus repeatedly and unqualifiedly disapproved and repudiated the principle, still recognised and approved it in the shape of a bank charter—in its most dangerous, revolting, and malignant aspect? Who is prepared to accuse the authors of the constitution with such palpable inconsistency, or culpable duplicity? Sir, I am compelled to believe that the man who affirms that the framers of the constitution, after having rejected all propositions to grant charters of incorporation, whether for general or special purposes, intended, at the same time, to authorize Congress to charter a national bank, holds in light estimation, either the character of that body, or his own honor.

Mr. Chairman, I will, in a few words, conclude my remarks on this branch of the subject. It is admitted on all

Oct. 13, 1837.]

Sub-Treasury Bill.

[H. OF R.]

hands that ours is a Government of specific and limited powers. In the language of the constitution, "The powers not delegated to the United States by the constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people."

The power to grant charters of incorporation was not delegated to Congress, nor intended to be so, by the convention which formed the constitution, and, consequently, cannot be exercised without violating that instrument. And, with a perfect knowledge of this fact, with a full and perfect understanding that the convention purposely withheld from Congress the power to "emit bills of credit," or paper money, "in any possible case;" that they also prohibited the granting of charters of incorporation of every kind and description; I cannot, I say, with all the information before me, consent to vote in favor of any incorporation, and especially a bank charter, which stands doubly condemned by the framers of the constitution. No, sir: were I to do so, with the evidence before me, I should consider that I had sinned against light and knowledge—sinned past recovering and past forgiveness, and should ever regard myself as a perjured man—perjured both in the eyes of God and of my country.

But, sir, the American people are opposed to a national bank. The knowledge of this fact—and no man can plead ignorance with regard to it—I should suppose would be a sufficient reason why the people's representatives should oppose it. For my own part, sir, were I to support any measure which has been so generally and emphatically condemned by the people, I should consider that I had grossly outraged public opinion, insulted the majesty of the people, disregarded their express wishes, and betrayed their best interests. And, sir, I cannot conceive how any honorable gentleman, who claims to be a republican—who professes to entertain a due regard for public opinion, and a willingness to act in obedience to the expressed will of the majority—can possibly yield his support to a measure that has been so recently, so repeatedly, and so signally condemned by that majority. Shall I be told that the people would take this new institution into favor, provided it were established, and that they would cherish and sustain it hereafter? Let not gentlemen lay the "flattering unction to their souls." No, sir, the history of the late bank is too fresh in their recollections. The people of this country are too prudent and too wise not to be admonished and profited by the teachings of the past. They are too jealous of their rights—too much enamored of liberty, to regard with favor a monster that might, at its pleasure, violate those rights and crush that liberty. And gentlemen who act upon the supposition that the American people will ever become the friends and willing supporters of an institution so hostile to the spirit of freedom, err as widely as would have erred the friends of the infant Bacchus, had they commended him to the arms of Juno for succor and protection.

But, sir, we are told by the board of trade, and others friendly to a national bank, that the general welfare of the country requires at our hands the establishment of such an institution. For once, sir, I am disposed to doubt the correctness of this proposition. I am strongly inclined to the opinion that these modest patriots are not quite so well qualified as they they imagine, to decide what would or what would not promote the public good. I have yet to learn that those gentlemen are more deeply skilled in the science of government and of political economy, and that they cherish a warmer regard for the public weal, than those of other pursuits and of a different political faith. I have yet to learn that they are benevolent and patriotic beyond their generation, or that they have been anointed with the oil of wisdom above their fellows. Sir, whence comes their authority to decide what measures shall or shall not be adopted in reference to the general welfare? When,

and how were they constituted and appointed conservators and guardians of the public interests, that they thus ape the language of supremacy, and assume the tone of oracular wisdom? Have not the great mass of the people had sufficient experience, with regard to a national bank? have they not felt its benefits and its evils, its advantages and disadvantages; and have they not condemned it—I had almost said with the voice of unanimity? And shall they be deemed incompetent to judge of the utility, character, and tendency of such an institution? Sir, by what other criterion than that of public sentiment, clearly expressed and fairly ascertained, shall we judge of a public measure? Shall we adopt the views and opinions of the few to the exclusion of the many? Shall we not allow the great majority to determine what is as well as what is not for their welfare? And have not that majority solemnly decreed, in a voice that is still ringing in our ears, that a national bank is not a national benefit, but a national evil; that it is not a public blessing, but a public curse? If we regard public sentiment, therefore, as a proper test of this measure, we must necessarily decide against it. We are bound to believe that it would not be productive of public good, as represented by the petitioners—but of public mischief, as declared by a majority of the people. It will not be disputed, but that any class of citizens have a right to ask, at the hands of Government, the adoption of such measures, or the enactment of such laws, as may, in their opinion, subserve their interests: provided always, that such measures, or laws, do not conflict with other interests of the State, or revolt the "stomach of the public sense." A national bank does both; and has, consequently, no claims to the favorable regard of Congress.

Sir, let us consider for a moment whether we can look with safety or propriety, for wise, patriotic, disinterested, or salutary counsel from the source whence the petitions and demands for a national bank proceed. Do we find the patriotic, the clear-headed, and honest-hearted yeomanry and mechanics of the country clamoring for a national bank? No, sir. No—the productive and laboring classes appreciate their political welfare too highly to desire such an institution. The great majority of bank advocates are to be found among the non-producers—the traffickers and speculators of the country—"children of lofty hopes and low desires," most of whom are peculiarly affected by the present pressure of the times. And would it be the part of wisdom to give heed to counsel emanating from such sources? Can it be reasonably expected that men relying solely upon bank facilities—men suddenly disappointed in their high expectations of immediate wealth and consequent influence, would be the most competent to direct the action of Government and control the destinies of the nation, at such a conjuncture? No, sir, their habits of life—of thinking—their peculiar situation—the circumstances which influence their judgments and impel them to action—all—can conspire to disqualify them for the task. We know, sir, that it is more natural for men in affliction—whether physical or political—to have recourse to palliatives—to immediate and temporary expedients, than to deliberate on the means necessary to secure permanent relief.

When Mr. MOORE had concluded his speech,

Mr. CUSHING spoke in reply to a part of Mr. PICKEN'S remarks respecting a crusade of an insurrectionary character among the white slaves of the North; a movement which he deprecated—and a natural alliance between the democracy of the North and the aristocracy of the South, which he argued to show was against the principles of both. If such an alliance should exist, it must be as of masters and servants, which the North would never hear of.

Mr. CAMBRELENG said that an apology was certainly due to the members of the committee for throwing himself upon their indulgence at so late an hour, worn out as they all were by daily and nightly sessions. He had

H. of R.]

Sub-Treasury Bill.

[Oct. 13, 1837.]

hitherto abstained from debate, anxiously desiring the early passage of the important measures reported; and he should not now have addressed the committee, but for the strange character of the proceeding of the House during the present session, called, as it was, under extraordinary circumstances. The banks had suspended specie payments; the Government, with a surplus of forty-two millions and a half, found its Treasury embarrassed; and there was every reason to expect that it would soon be without means to meet its current expenditures. Trade was also paralyzed, by a revulsion more violent than any that had hitherto checked the onward course of the prosperity of this country.

Called together, Mr. Chairman, under such circumstances, I had supposed that whatever might be our opinions of past events, or of our mutual errors, we should come here prepared, without regard to party, to provide a common remedy for a common calamity. I had thought that we should be unanimously disposed to relieve our Treasury from its embarrassment, in a mode calculated to aid most extensively in giving renewed activity to our internal circulation, and in reviving trade. Judge, then, of my surprise to see every measure recommended by the President not only opposed, but its passage retarded by every movement that could embarrass the proceedings of this House. So far from aiding us in our measures, the gentleman from Massachusetts [Mr. CUSHING] told us that he would not "raise his finger to relieve the Treasury from its embarrassments." [Mr. CUSHING explained.] I am happy, sir, that the gentleman is penitent. I understood him as the reporters did; [Mr. C. said his remark had not been correctly reported.] But the gentleman from Kentucky, [Mr. MENZIE], a gentleman who, from his debut here promises to be an ornament to this House, indeed he is already so—that gentleman went farther still, and rejoiced at the embarrassments of our Treasury.

The spirit of party must be violent indeed, when it makes war upon the Treasury of our own Government, instituted for the common benefit. Had gentlemen come forward, as the country expected they would do; had they united with us, and passed our bills a month ago, they would have afforded immediate and general relief to every part of the Union. Instead of that, what have we seen? Opposition to every measure of relief. When we proposed to relieve the Treasury from its engagement to deposit nine millions with the States, we were told of the millions due from the merchants and the banks. The bonds were not to be postponed to relieve our debtors from the necessity of purchasing specie at a premium, and to aid the banks in an early resumption of specie payments. Our Southwestern banks were to be called upon to pay their balances, by distressing their debtors, and at a crisis when specie in that part of the Union was at twenty, thirty, and forty per cent. premium. All this was to be done, at a moment when trade was paralyzed, and credit destroyed, for the purpose of depositing nine millions with the States! The issue of ten millions of Treasury notes, too—a measure calculated to give general relief in the present condition of our internal exchanges and circulation—that measure was resisted. The interests of the Treasury, and of the country, were to be set aside, in order to furnish a stock to our capitalists, or to enable the Bank of the United States to purchase its bonds at its own price! And now, when it is proposed to separate the Treasury from the banking institutions of the country, to dissolve that fatal union which has contributed so largely to disturb their operations, and to shatter the fortunes of trade, a proposition is made to re-unite them by stronger bonds, and to perpetuate their mutual embarrassments.

Relief has not been the order of the day with gentlemen. They had no measure to propose to calm the agitations of trade, to revive confidence, and to give a new impulse to

the prosperity of the country. Their movements were of another character. Agitation was the order of the day; and, at the moment when the country anticipated prompt relief, we have found ourselves in the midst of another panic session. The gentleman from Pennsylvania [Mr. SERGEANT] has told us of "the awful winter" approaching, and we have heard from all quarters the old war cry of a national bank or a revolution. The removal of the deposits, the specie circular, and all the stale subjects of debate for five years past, have been revived. Preparation is evidently made for a third campaign for a bank of the United States—that sovereign remedy for all the calamities brought upon the country by the mal-administration of our late President.

Sir, although these subjects are stale, it is useful to consider them at a time when we may justly appreciate them, and in connexion with the inquiry into the causes of the recent revulsion and the general suspension of specie payments. As to the specie circular, I shall soon dismiss that. What was its operation? It increased the specie in the Western deposit banks, in thirteen months, some three millions and a half. And whence was this amount drawn? From the parts of the Atlantic and the Gulf, into which there were at the same time flowing more than ten millions of coin, and bullion beyond the amount exported. Was the deposit in the Western banks special? No; every dollar of it might have been returned. It might have been drawn by the banks on the Atlantic and the Gulf; and would have been drawn, had they not been, at the same time, receiving three times the amount from abroad. Such, sir, is the whole currency operation of the specie circular—that measure which seems, in the estimation of gentlemen, to have been the terrible author of all the calamities of the commercial world. According to their argument, it followed the swift current of the Ohio and Mississippi to New Orleans, and swept away the most eminent houses in that city. It took the course of the Gulf stream, and gave a shock to every city on the Atlantic. It prostrated more than a hundred of the most enterprising merchants of New York; crossed the Atlantic, shook the royal exchange, and continued its disastrous course throughout all Europe. But, sir, the most remarkable performance of this tremendous measure we did not hear of for some months after it was issued. Before it visited the two continents on our side, it actually passed through the globe, and produced an earthquake in the Celestial Empire. In this revulsion, the Hong merchant was the first victim. Mr. Chairman, the question is unworthy of argument—it is fit only for ridicule. I was glad to hear the learned and travelled gentleman from South Carolina [Mr. LEGARE] who addressed the committee this morning do justice to the specie circular, and admit that but for that, Heaven knows "where we should have gone." Sir, if that specie circular, and the London bankers' circular—a measure ill-timed, sudden, and overwhelming—if both of these circulars had been issued twelve months earlier, it would have saved, on both sides of the Atlantic, many a merchant from bankruptcy and thousand of families from poverty and want.

Equally unsubstantial is the charge against the late administration for drawing specie from Europe. If gentlemen would reflect upon the operation of the measures of Congress and of Parliament, adopted upon no party grounds, and upon the effect of a constant influx of capital from the old to the new world, they would find no difficulty in accounting for our heavy importations of specie for some years past. They will find the foundation laid by the act of Parliament of 1833, and our coin law of 1834. The former made Bank of England notes a lawful tender; dispensed, in some measure, with the use for gold, and encouraged its exportation; while the latter raised the price of gold above the European standard, and facilitated its importation into this country. The act of 1834 was the first meas-

Sub-Treasury Bill.

[H. OF R.]

ure ever adopted by us calculated to fortify the basis of our commercial credit, and to secure a just portion of the metallic currency of the world. Had the Bank of England not suspended specie payments for twenty-five years, we should long since have discovered and corrected the error in our coin laws. Had we revised them forty years ago, the trade of this country would have rested on a more stable foundation than it now does. For years we were mere traders in currency. We drew it from the islands and countries south of us, and exported our silver to China and our gold chiefly to Europe, even after the expense of coining. We have latterly exported little to China, less than three millions in five years; and the course of trade, and the operation of the coin laws of England, France, and this country, do not authorize us to anticipate its steady exportation as heretofore. In the last fifteen years we have imported about eighty-seven millions from the countries and islands south of us; and there is always a current of coin and bullion setting in from that direction. There will be no difficulty now in securing a substantial basis for trade if our State Legislatures do not banish specie from the country, and if we separate our revenue from our bank note circulations.

If we would ascertain the causes of the recent revulsion, we should be obliged to go back to a very ancient date. The gentleman from Pennsylvania [Mr. SERGEANT] has truly told us that all countries are liable to revulsions, whatever be the character of their currency. When credit is abused, an explosion must follow; and credit has been sometimes abused excessively, even in countries with a metallic currency. But, sir, the gentleman was obliged to go back a century for the explosion in France; and that explosion was an affair of the King, who, in December, 1718, took Law's bank into his own hands. Wherever Governments permit paper to be substituted for the precious metals, revulsions must become an every day affair, and their violence is also very much increased by mercantile notes and bills, issued in exchange for credit, the whole of which explodes at every revulsion, and steadily increases the amount of bankruptcy. The rapid growth of this country, and the bold and enterprising character of our trade, render us more liable than other countries to frequent and violent revulsions.

But, sir, all these causes combined have never before produced a general suspension of specie payments, in time of peace, in any country. We must seek for other causes for an event so extraordinary. It is possible that the circular of the London bankers, issued, we may say, by order of the Bank of England, and coming suddenly upon the trading and banking interests of this country, might have produced it; but it is by no means certain.

There was, however, a manifest cause of this suspension in the connexion of our Treasury with the banking and trading interests of the country, under which they had to encounter the pressure of the deposit act, and, what was more powerful still, the hostility of the Bank of the United States and its friends. I do not refer to the deposit act with a disposition to criminate gentlemen who supported it. The surplus was an evil. They discharged what they considered a paramount duty in getting rid of it; but they did not foresee the disastrous consequences which would follow the sudden withdrawal of so large an amount from the banks at such a crisis. That was not, however, the only measure. There was a supplementary act which you yourself, Mr. Chairman, (Mr. SMITH, of Maine, being in the chair,) moved out of its order and carried through this House at midnight on the last night of the session. That act authorized the immediate transfer of the public money from bank to bank, and State to State; and it was for executing both these laws together that the Secretary of the Treasury has been so unjustly censured. Let us suppose, sir, that England had a surplus of five hundred millions of

dollars, which, in a ratio to her revenue, would be equivalent to our forty millions. Suppose it to be deposited in the local banks, and that Parliament had ordered it to be withdrawn in nine months and distributed among the counties in England, at a time, too, of a heavy pressure on the money market: would it not have broken all the banks in Great Britain and Ireland? If this five hundred millions had been deposited in the Bank of England and its branches, and had been, as ours was, employed in commercial discounts, the shock to trade and banks would have been still more violent from the convulsive but vain efforts of the Bank of England to meet the demands of the exchequer and to sustain specie payments. Such, sir, must be the condition of trade and banking in every country where they are united with the fluctuating revenues of Government.

The next obvious consequence of this connexion is the five years' war of the Bank of the United States and its friends against the deposit banks, the Treasury, and the country itself. What, sir, is the brief history of this war? The President, in discharging a high public duty, knowing the immense power of such an institution, and foreseeing the mischiefs which would result from perpetuating it, brought the question before the nation for its decision. Without waiting for that decision, the bank memorialized Congress six years before the period for winding up its concerns, and a bill was passed through both Houses, with a knowledge that the President would reject it. The pretext then was, that it was necessary that the bank should at that early period know its fate, and commence winding up its concerns gradually. The election of the President in the same year (1832) ratified his veto. Steps were taken to employ other banks, and towards the close of the next year the deposits were partially removed. The bank, anticipating this order, commenced the first campaign against the deposit banks, the Treasury, and the country, by curtailing rapidly. The pretext for this step was, the necessity of fortifying herself to meet the hostility of the Executive in withdrawing the deposits. And pray what was the enormous amount of these deposits? Not thirty-seven millions, sir, the amount ordered to be removed under the deposit act, but less than seven; nay, only about three millions at that time, for some of it remained more than a year afterwards. Nor was it transferred from city to city, or State to State; but, with little exception, from one bank to another in the same city. Yet, alarmed at this tremendous order, which had been anticipated for months, this great bank, with its capital of thirty-five millions, was afraid of the deposit banks, and was compelled to curtail its discounts more than eighteen millions in nineteen months. The alarm was spread through our cities; the local banks were forced to follow its example; and trade, which had been in a prosperous course, was suddenly brought to a stand, without any commercial cause whatever. The celebrated panic session opened with the cry of ruin and revolution, and our cities were for months agitated by the stormy conflicts of parties. The first campaign for a bank of the United States terminated with that session.

Foiled in this experiment upon the deposit banks and the country, the president of the bank changed his policy. This crippled institution, almost broken down by its efforts to pay over a few millions to other banks, as soon as the session was over, suddenly found itself able to enlarge its discounts to the amount of ten millions! The bank commenced extending facilities in November, 1834, and in eight months increased them more than nineteen millions of dollars. The trading and banking interests of the country, after being so long chained down by this tyrant of trade, were suddenly set free. The banks generally followed the example of the United States Bank, by enlarging their discounts, and every branch of trade was stimulated

H. OF R.]

Sub-Treasury Bill.

[Oct. 13, 1837.]

to engage in the wildest speculations. If all the banks in the country had contracted and expanded in the same ratio, it would have made an aggregate fluctuation in commercial facilities of near three hundred millions. The fluctuation of the Bank of the United States alone from April, 1833, to July, 1835, amounted to about thirty-eight millions. Suppose, sir, the Bank of England had not its capital, its deposits, and circulation invested in public securities; suppose, instead of its mere surplus, it had its forty millions sterling employed in commercial discounts, and that the bank, struggling to compel the country to renew its charter, were to curtail and extend its discounts in two years and three months more than twenty millions sterling—what would have been the condition of the trade and local banks of Great Britain and Ireland at this time? Precisely what ours is. The close of this second campaign has been triumphant—more than triumphant—for the president of the bank and its friends have not only broken all the deposit banks, but almost every other bank, not excepting the Bank of the United States, with its thirty-five millions, although rechartered with additional strength and enlarged powers. The Bank of the United States has contributed its share in increasing the calamities of the day. It has triumphed over the deposit banks and the Treasury; but it has not yet conquered the people of the United States.

Now, in the midst of all this wreck of credit, while the victims in this war lie scattered around them, gentlemen, as if in mockery, invoke the aid of the trading and banking interests to engage in a third campaign; and for what, sir? For a national bank, which they dare not themselves propose; which they admit to be hopeless; which stands condemned by the people; who, after all these struggles, have sent to both Houses the largest majorities ever known, against even the expediency of such an institution. The merchants and bankers of this country are again invited to engage in a third and suicidal war, to keep trade and banking in violent agitation for three years to come, and to terminate the campaign in another scene of bankruptcy and ruin. None but the determined partisans of the Bank of the United States will answer to the call. The intelligent and candid of all parties must be convinced, after five years' bitter experience, that the trading and banking interests of the country have nothing to gain by enlisting in our political wars; and that so long as their fortunes are associated with the fluctuating revenues of this Government, they must be periodically broken down.

In these contests, sir, the credit of our banks has been destroyed. We have made discoveries, too, which warrant the belief that we may anticipate a similar violation of the contracts of this country, and destruction of its currency, at every violent revulsion. The members of our stock exchange have found out that, when stocks are depressed by a pressure, and they are threatened with ruin, they can save themselves, and raise stocks twenty or thirty per cent. by compelling the banks to suspend specie payments. The banks have discovered, too, that they have absolute dominion over our State Legislatures, through the power which they exercise over the currency and the country. Indeed, it is probable that, in a period of alarm, which exists in every revulsion, trade may solicit the banks to suspend their payments. It may not happen that all the banks will suspend; but nothing can prevent many of them from failing in every revulsion, but an entire separation of their concerns from those of the Government.

The State bank deposit system has most unquestionably failed, notwithstanding it is still supported by a few, but a very few, friends of the administration. The present crisis drives us to the necessity of choosing between a Government national bank of vast power, and a simple Treasury agency with no other power than that which this Government has always exercised in collecting and disbursing the public revenue. Although gentlemen have not yet the

courage to unfurl their banner everywhere, yet there can be no doubt there is still to be a struggle for a national bank. The gentleman from Pennsylvania [Mr. SERGEANT] tells us we flourished under the auspices of such an institution for forty years, and that the experiment was fully tried, and was triumphant. It was certainly fully tried, but I deny that it was triumphant. It was at all times a frail foundation for the vast fabric of credit of this country. The suspension of specie payments by the Bank of England in 1797, protected the first bank till its charter expired. I do not know that its solidity was ever tried but once, when an eminent merchant of Salem would have broken the branch at New York, and consequently all the other banks, if it had not yielded to his demands. As to the late Bank of the United States, we have the authority of two of its presidents: one tells us that in 1819 no man believed the bank would continue to pay in specie for one month; and the other, that in 1825, the currency of the Union depended upon his midnight journey from Philadelphia to New York. A very solid foundation this for the trade, currency, and contracts of a nation! As to its conservative power over State banks, we have had innumerable failures of them during the existence of both; and all the money which we have actually lost by local institutions, amounting to more than a million, was lost when the late bank of the United States was in operation.

A national bank, such as we have had, was an experiment indeed, and a fearful one too. It was without a parallel in the history of Governments. I appeal, sir, to the gentleman from South Carolina [Mr. LEGARE] whether France or England ever chartered a national bank to employ the revenues of Government in commercial discounts, to regulate exchange, or to furnish a national currency founded upon the credit of private stockholders? If the banks of England or of France were permitted to use the vast revenues of these countries in extending facilities to trade, and their income, like ours, was constantly vibrating between an enormous surplus, without a public debt to absorb it, and a sudden deficit of revenue, it would be disastrous to the trading and banking interests of all Europe. Nor was such bank ever established to regulate exchange. The gentleman from South Carolina well knows that the exchanges of Great Britain, Ireland, and of all Europe are managed by local banks and private bankers, and that the latter are almost exclusively employed for that purpose on the continent. They are infinitely better managed there than they ever have been here. The laws of trade alone can regulate exchange. But even their operation is defeated by the course pursued by the banks in this country, and especially the Bank of the United States and the deposit banks. They have encouraged a wild spirit of speculation, by discounting millions of exchange not founded upon property, but a mere exchange of credits between distant points, and of notes payable at a hundred places in the interior, counter to the current of remittance to the Atlantic cities. The main cause, however, of the derangement of our internal exchanges is one which is unavoidable; that is, the periodical and sudden decline in the great staple of remittance required to discharge the debt annually due from the Southwestern to the Northeastern States. There is more elasticity in our foreign exchanges; and with a judicious reform of our currency we have little to fear. Our commercial tables may alarm us, but they afford no satisfactory evidence of the amount of debt due and actually payable abroad at any one period. We know not what portions of our importations of specie and merchandise represent the proceeds of our exports to foreign countries, and what part of them arise from the sale of our stocks and bonds; from the transfer of the emigrants' property to this country, and from the steady current of capital which is uniformly flowing from the reservoirs of Great Britain, France, and Holland into this country, seeking permanent

Oct. 13, 1837.]

Sub-Treasury Bill.

[H. OF R.]

investment. When we see some thirty, forty, or fifty millions against us, we forget that we see but a part of the account. Our imports must necessarily exceed our exports permanently, while we perpetually receive, through these sources from abroad, an increasing amount of capital far beyond any remittance of dividends. We have more to fear from our vitiated currency than we have from our foreign exchanges.

Neither, sir, is a national bank required to furnish us with a currency. The Bank of France issues no note under five hundred francs. The issues of the Bank of England are, essentially, exchequer bills, or what we should denominate Treasury notes without interest. They are founded upon the credit of Government. The whole capital, deposits, and circulation of the bank are invested in loans, in various forms, to Government. The people of England are taxed to pay the interest on their own money and their own credit, to be divided among the stockholders of the Bank of England! However unjust this financial system may be, it would be more disastrous to Great Britain and Ireland were the deposits and circulation invested in commercial securities. The private discounts of the bank form but a small proportion of its transactions. It is a Government bank, and as its circulation is founded on public securities, the profit on it should be a public concern. If such issues, which are essentially the credit of the State, were not made a source of profit to banks, the power would never be abused.

Happily for this country, sir, this experiment of a national bank has not been tried, and has not been triumphant. Had we made perpetual a bank authorized to control the commercial credit, the banking institutions, the revenue, and the currency of this country, we should have conferred on one man a greater power than the people and the States surrendered by the constitution to all the departments of this Government combined. In his hands would have been the power to regulate the price of labor and the value of property; to elevate trade to the highest point of speculation, and to prostrate it in a moment; to draw into one vast circle the incorporated wealth of the nation; to concentrate and direct its power; and so to regulate the movements of his institution, by its expansions and contractions, as powerfully to influence our elections. Whether governed by his fears or his ambition, the destiny of the nation would have been in his hands. He might, as we saw some years ago, by his imbecility, ruin trade, break the banks, and endanger, if not destroy the currency; or, as we now see, his ambition might tempt him to consider his institution as a political engine; he might attempt to regulate the succession to the Presidency. This was the experiment, sir—this was the design in 1791. Fortunately for the country it has failed—the people, not the bank, have triumphed; and as it regards the President who accomplished it, the wreath of Orleans may perish, but the gratitude of his country can only expire with its liberty.

Mr. Chairman, we have but one alternative left. We must collect, keep, and disburse our own revenues. This proposition was made in 1835, by a gentleman from Virginia, [Mr. GUNNOR,] then a member of this House. He proposed to employ our own officers for these purposes, to appoint receivers general at certain points, and that "the whole revenue of the United States, derived from customs, lands, or other sources, shall be paid in the current coins of the United States." In replying on that occasion to the gentleman from Virginia, [Mr. ROBERTSON,] who is now near me, I stated that "I concurred entirely in his principles;" that I considered it my duty, at that time, to regulate, "in the best practicable manner under [then] existing circumstances, the deposit of the public money;" that we could manage our finances "if there was not an incorporated bank in the Union;" and that I hoped "the time could come when we should be able to dispense with the

agency of all banks, especially those of circulation." That time has arrived, sir, much sooner than I expected. It is forced upon us by the banks themselves. In 1835, they had been selected by the Secretary of the Treasury, and I had two motives for continuing them as our agents, which I then stated. One was, that I thought them the "safest places of deposit;" but I now see that safety—ultimate safety is of little importance, if the Treasury is to be periodically deprived of the use of its funds. The other reason was that now given by the gentleman from Virginia, [Mr. MASON,] that the deposit banks might aid in reforming our currency, by withdrawing their small notes. Between that gentleman and myself I am sure there cannot be any difference of principle, for his course has been democratic and constitutional. But, sir, I submit it to his judgment, whether experience has not proved that such an experiment upon the currency has been, and must be, wholly abortive. Suppose our agents withdraw their small notes from circulation conformably to our law, have we not seven hundred and fifty other banks employed in issuing them as fast as they are withdrawn? You might effect some reform if you employed the whole eight hundred, but not otherwise. But, if you were to propose that, is it probable that the banks in the interior, half of whose profits arise from circulation, would accept your agency? All the reform we can effect, is by confining our Treasury to specie and evidences of public debt. The small notes and the banks must be left to the authority that created them—the State Governments, with whose duties it is not our province to interfere, directly or indirectly.

But how has this simple proposition to collect our revenue in coin or evidences of debt, and to disburse it through our own officers—a proposition almost as old as the world—how has it been received? Why, sir, it is denounced as an experiment never before attempted—as a dangerous innovation—as something monstrous. One would suppose, from the language of gentlemen, that we were about "to subvert the whole social fabric," to revolutionize the age, and, through a rapid dissolution of morals, intelligence, and liberty, go back, as the gentleman from South Carolina [Mr. LEGARE] says, to the age of "iron money and black broth!" Why, sir, we have been, happily without being conscious of it, in a very lamentable condition for five months past; we have been, ever since the 10th of May last, actually circulating iron money, and drinking black broth! Luckily, however, the trade of the country, and the country itself, have very much improved since then, notwithstanding this Spartan discipline.

But what are the objections to the measure proposed? The unsafety of the public money. This is certainly an age more distinguished for discovery than experiment. After having trusted our public officers with the public money for near half a century, we have suddenly discovered that it is now to be "plundered" by these "faithless agents." Prior to 1800, every bond was collected at your custom-houses; and, throughout the whole history of our revenue, every dollar, whether from lands or customs, has been placed to the credit of our officers before it was transferred to the credit of the Treasurer. The cashier of the New York custom-house collected five millions last year; one of your land receivers had, in the course of the year, two millions to his credit, and the collector of New York some sixteen or seventeen millions. Since 1789 we have had about eight hundred millions to the credit of our public officers, and gentlemen have just found out that we are for the first time about to confide in them, because we propose they should keep, under the direct supervision of other officers, that which they now have passed to their own credit, without any check or guard whatsoever. Your disbursing officers are also entrusted with the public money. Your receivers, collectors, and disbursing officers may apply the public money to what purpose they please,

H. OF R.]

Sub-Treasury Bill.

[Oct. 13, 1837.]

and, under existing laws, we have no security whatever but their bonds. We propose to enlarge this security; to place guards over them on the spot, and to have visiting officers, besides, to see that the keeper of the public money and his supervisors all discharge their duty with fidelity to the Government. We propose to secure the revenue by stronger regulations than any that have hitherto existed. France has tried this experiment with an annual revenue of about two hundred millions of dollars, and we dare not try it with a revenue of twenty. Defalcations have occurred, and would occur, under any system. But ours has been a loose one, and, unfortunately for the argument of the gentleman from Virginia, [Mr. GARLAND,] all the defalcations he refers to have occurred under our laws as they now are, and during the very time when the United States Bank or the State banks were employed as depositories of the public money. Sir, if gentlemen can contrive any plan of special deposit, which will not be abused by permitting the public revenue to be used by the banks, or which will not aid in the circulation of their notes, it might be adopted. But they will find it very difficult to devise any special deposit system which will not be evaded by the banks.

Another objection is the prodigious increase or Executive patronage. One gentleman, not of this body, has stated (as I have seen it reported) that we are about to enlist an army of a hundred thousand public officers. Why, sir, if we did not add one officer to the number now in the public service, there would be, as there actually is at this time, no difficulty whatever in collecting, keeping, and disbursing our revenues. Convenience may require the addition of a dozen clerks; greater security might be effected by employing half a dozen receivers general at points where the revenue exceeds the amount of the officers' bonds; and, to perfect that security, you may appoint two visiting agents. Were we to go further than the bill proposes, and appoint all these, is that patronage to be compared with the political influence exercised over your eighty-eight deposit banks, with their two thousand officers and directors, and some fifty thousand stockholders? Sir, the argument is unworthy of refutation.

The gentleman from Virginia [Mr. MASON] proposes, if I understood him correctly, to collect our revenue in specie, or its equivalent, and to make our disbursements in local bank paper. This is an extraordinary proposition, especially from one so devoted to the constitution. What, sir, collect our revenues in coin, or its equivalent; extort the last fraction from the public debtors, and then turn to our creditors, and avail ourselves of this general act of bankruptcy, which the banks have established for the country, by their joint resolution to suspend specie payments! Are we to receive coin, or its equivalent, all over the Union, and pay our debts in depreciated paper, varying from five to forty-five per cent.? I think the gentleman from Virginia will, upon reflection, abandon a proposition so unjust to the public creditors, and founded upon so palpable a violation of the public faith.

That, however, which seems most to alarm gentlemen, and especially the gentleman from Pennsylvania, [Mr. SERGEANT,] is, that we are to have two currencies, as the gentleman tells us, "one for the Government—another for the people;" "the people do not sit at the same table." Is this intended for argument, sir? I hope not. But, as the gentleman from Pennsylvania has prepared his table, and appears to be so solicitous to provide something for the people, I would advise him to take his seat, and to place before him his favorite dish, that "spurious progeny of local paper;" and then to invite a distinguished gentleman from the other wing of the capitol to take his seat at the other end of the table, and spread before him his "mortified mass of the body politic," though, by the way, no favorite of his. Then, sir, let these two distin-

guished gentlemen issue their proclamation to "the people," and invite them to participate. Will they come to the feast prepared for them by the gentlemen from Pennsylvania and Massachusetts?

Mr. Chairman, arguments not addressed to the understanding have no permanent effect. If gentlemen mean any thing by their two currencies; if they mean that this Government shall collect its revenues in depreciated local paper; if they propose to collect our taxes from the States, and to receive payment for our public lands in eight and twenty different currencies, let them boldly take their ground, and not evade the question by popular appeals. Let them set the constitution at defiance, and offer a premium to every State and Territory in the Union to depreciate its bank paper, for the purpose of diminishing its taxes and the price of the public lands; let them forever postpone the resumption of specie payments, and disorganize the Union. Gentlemen dare not, as a party, take that ground: they know that the revenue must, and will, be collected in specie, or its equivalent, in a medium common to all the States, or there is an end of our present constitutional Union. Sir, as to this question of two currencies, what is it? If bank notes are equivalent to specie, the people have two currencies, and the Government but one.

One would suppose, too, we were about to monopolize all the coin in the country. Why, sir, of the whole metallic circulation, assumed at eighty millions, the Treasury would require but a sixteenth part: the banks would have five-and-twenty, and "the people" fifty millions for general circulation. Even of the five or six millions of coin which might be abstracted from the general mass, one half at least would be represented by Treasury warrants in circulation, founded upon the specie in deposit. There would be at no time more than two or three millions of specie in your depositories in every part of the Union not represented by these warrants. As to an excess or surplus beyond six millions, that will never occur; because Congress will now be compelled to do what ought to have been done when the public debt was extinguished: they must make permanent provision for guarding against a surplus, by investing the excess, whenever it is beyond six millions, and throwing the specie at once into circulation, and then to exhaust such surplus by a graduated reduction of our taxes. This accumulation of specie, which excites so much apprehension, is, in my view, the strongest recommendation of the proposed measure. It will keep our revenue down, and avoid the recurrence of a surplus to distract our councils, and make the States dependent upon our federal Treasury. It will be a regulator of trade far better than the foreign exchanges. It will indicate the approach of overtrading, and not, like the latter, rise after the mischief is done. To the banks it would be a steady and salutary check, in preventing the excessive and unwarrantable issues of their credit, by bank notes or otherwise, in periods of speculation—not for the purpose of circulation, but to furnish fictitious capital, by a mere exchange of credit for credit, to stimulate excited enterprise, to abuse credit, and to terminate in revulsions, ruinous to trade and calamitous to the laboring classes.

The gentleman from South Carolina [Mr. LEGARE] objects to the measure, because it would make "New York the grand market for specie, and all the rest of the States tributary." I was happy to hear that he was not the author of this suggestion. I hope, sir, the honorable Senator [Mr. PRESTON] to whom he referred, is also not responsible for its origin, for it is utterly without foundation. I had seen it before in an essay ascribed to a gentleman of South Carolina, of great experience as a statesman, financier, and banker, who has suddenly and zealously enlisted against us. Whether this objection rests upon the authority of either or all these gentlemen, the author of it evinces

Oct. 13, 1837.]

Sub-Treasury Bill.

[H. of R.]

a very limited knowledge of the financial operations of our Government. What would be thought of a Secretary of the Treasury, who would discharge the duties of his office so absurdly as to transmit the public money from other States to New York, where two-thirds of the whole revenue from customs is collected, and where a large surplus (except now when the revenue is everywhere suspended) uniformly exists, beyond the amount required for expenses in that vicinity? His duty is directly the reverse. The excess of revenue at New York must be placed in other States, where it is to be expended. But, sir, how is it transferred—does a dollar in specie go for these purposes, or for Treasury remittances, between different parts of the Union? Not one. We may require small amounts, as we always have done, in specie, for complying with Indian treaties, and for some of our expenditures abroad; but in all the great operations of the Treasury, no balance is transferred from city to city or State to State in specie. The warrant is issued upon the place where an excess exists beyond what is wanted there; it is sent to the point of expenditure, and travels through the medium of trade, or the banks, to the place where the money is deposited, and the specie is drawn by the bank from the depository. So far as the Government is concerned, the coin remains where it is collected, and merely circulates between the bank and the depository. Such is the extent of these specie transfers which are so alarming to distinguished gentlemen from South Carolina.

We have now to notice a formidable objection. It is said we propose to establish a universal and exclusive metallic currency, and, in the language of the gentleman from South Carolina, [Mr. LEGARE], to effect "an absolute subversion of all credit and all commerce—an utter destruction of the whole fabric of society." This is indeed, sir, an age distinguished for discoveries. We have been for years endeavoring to secure, through our federal legislation, a broader basis for the vast fabric of credit in this country. Gentlemen have cordially co-operated with us in accomplishing a purpose almost universally acknowledged to be necessary to give stability to trade, and solidity to our tottering banking system. But when we propose a measure calculated to forward effectually an object so essential to the morals and prosperity of the Union, they suddenly discover that our design is to break up the very foundations of civilized society, to return to "iron-money and black both"—to absolute barbarism. Gentlemen well know that, whatever may be our abstract opinions as to the effect of paper money on the morals and condition of society, no man in this "bank note age" can expect more than to reform the abuses of the system. But before they so roughly denounce the principles of those with whom they are politically associated, I would admonish gentlemen to consult together, and come to some understanding as to what they mean by "an exclusive metallic currency," and the "destruction of the credit system." The gentleman from South Carolina, [Mr. LEGARE], and the gentleman from Virginia, [Mr. GARLAND], considering how harmoniously they act together, have placed themselves in an awkward attitude before the country. The former gentleman denounces the currency of France as the author of her poverty; the latter eulogises it as the soundest in the world, and recommends it to us as a model for our imitation! And now, sir, what becomes of all the violent denunciations of the gentleman from Virginia about this monstrous attempt to introduce an exclusive metallic currency? Who had gone beyond the gentleman from Virginia? No bank note circulates in France of a less denomination than five hundred francs, and the whole amount is but about twenty millions of dollars in paper to four hundred and fifty millions of gold and silver. Is that a metallic currency? Is the credit system destroyed in France? Sir, the gentleman from Virginia will find, upon an examination of his

own doctrines, that it will embarrass him to explain in what essential principle relating to currency he is opposed to the present administration.

The gentleman from South Carolina may also discover that his principles are not so hostile as he imagines to the separation of bank and State. Why, sir, he admires the Scotch banking system, the very essence of which is its freedom from all legislative interference. The union between Parliament and this branch of trade has been long since effectually dissolved. Trade, and not Government, regulates the quantity of banking capital in Scotland. He seems struck with admiration at the splendid results of "the credit system" in that country, and ascribes them to the substitution of paper for a metallic circulation. The gentleman mistakes the shadow for the substance. The astonishing industry and wealth of Scotland, and the moral condition of her people, are owing, among other causes, to the absolute freedom she has enjoyed in banking, the best regulator of all trades when free. The act of 1708 did not extend to Scotland; she was not under the dominion of the Bank of England. She had no gigantic institution to break her local banks periodically, and to throw thousands, nay, millions, of laborers out of employment. Beyond the Tweed, capital, free from all restrictions, flowed into this channel, and kept pace with labor, population, trade, and wealth, and sustained the vast increase of her commercial credits. The banks of Scotland are an improvement upon the plan of our savings institutions. They have in that country not only a large amount of banking capital, but more than a hundred millions of dollars, drawn from all classes of society, in deposit upon interest, yielding a profit to the community as well as to the banks; thus mutually benefiting the capitalists and the country, and encouraging frugality and enterprise. Her "credit system" rests upon a foundation almost as broad as the whole property of Scotland. Her stockholders are not, like ours, exempt from responsibility. The public interest and security are not, as with us, sacrificed to encourage the growth of corporations—of partners not individually liable for their debts, and not responsible to the country for their management. Her banks are essentially the guardians of the poor, as well as the regulators of trade. It is to these circumstances we may chiefly ascribe the rapid growth of Scotland, notwithstanding her disadvantages of soil and climate, and without the appendage of an impoverished laboring population, as in England and Ireland. It is wholly immaterial to Scotland what may be the character of her circulation. She is an interior province; exchanges do not press upon her; England intervenes and sustains the shock. Like our country banks, theirs have little use for specie; and, like them, they have their "specie fund" in the centre of circulation. Had she been on the borders of the British channel, where her local circulations would come in contact with the metallic currency of the continent, she would have long since discovered that, however convenient small notes may be, the imaginary convertibility of bank notes into coin is but a frail protection to labor, and a weak foundation for the credit and contracts of a nation. Protected by her interior position, as well as by skillful management, her population has escaped some of the consequences of this abuse of credit.

But the chief object of the admiration of the gentleman from South Carolina was the triumphant result of the credit system in England. Why, sir, nothing can be more unlike than the credit systems of England and Scotland, as they were prior to 1826, both in their characters and their results. The one was a system of despotism, the other of liberty. The one filled the country with pauperism, the other kept labor steadily employed, and, with parental guardianship, hoarded the small accumulations of the poor. But it was in England that the gentleman saw "the grandest work of civilized life in any part of the world"—the

H. of R.]

Sub-Treasury Bill.

[Oct. 13, 1837.]

splendid result of her credit and banking system. Sir, while the classical and intellectual gentleman from South Carolina was admiring the Corinthian grandeur of this proud fabric of the credit system, in the ecstasy of his admiration, he forgot that he was standing on a vast ruin of violated rights; lost in his sublime contemplations, he heard not "the accents of despair," nor the wailings of poverty, uttered by millions who had fallen victims to the credit system of England. He had not probably examined the poor man's record. He could not persuade himself to believe that, amidst all this bustle, life, and splendor, all this wealth and grandeur, he was in a nation of paupers. He could see it all in his travels through impoverished France with her metallic currency, but not in England with her credit and banking system. Well, sir, here is that record of its results, which escaped the gentleman's observation. Two millions four hundred and ninety-three thousand four hundred and twenty three families "receiving relief not included in the returns for this year." But it is added in this work, published by the London Statistical Society, "judging from the results here exhibited, the paupers form the greatest portion of the whole population." Such, Mr. Chairman, is the foundation upon which rests this "grandest work of civilized life," this triumphant evidence of the blessings of the English banking and credit system.

[Mr. LEGARE inquired the date of the work.]

The work was published in 1827; the statistical table of pauperism is for the year 1821-'22. [Mr. L. added that there was a change since then.] The poor laws are reformed, it is true; but was not capital emancipated from the dominion of the Bank of England in 1826? was not banking, for the first time, set free in the great commercial and manufacturing districts? Sir, I have travelled a little, too. I have contemplated with delight the rich treasures of the Louvre and of the Vatican; the sublime Doric and the proud Corinthian; but it was in the beautiful valleys of France and Germany—on the Rhine and on the Elbe—it was amidst the mountains of Switzerland and Wales that I saw, without regard to questions of currency, or even forms of government, sound morality and personal comfort; it was these scenes that reminded me of our western paradise. And, sir, I could but regret that the tenants of those mountains and valleys were governed by that concentrated power of associated wealth which rules Governments, controls monarchs, and regulates the destiny of every nation in Europe.

Mr. Chairman, we have a great constitutional duty to discharge. We have to regulate the coinage, and by requiring the collection of our revenue in a common medium, to secure equal taxation to the States of this confederacy, and to preserve for the whole people a measure of value of ancient origin, for labor, property, and contracts. In discharging this duty, we have not only to encounter the vices of our complicated banking systems, but also a revolution which has been going on more than a century, and one which threatens in the end to substitute a mere exchange of credits for the ancient standard of nations. It commenced with the charter of the Bank of England, in 1694. This substitute first appeared in the form of notes of twenty pounds; in 1759 it was reduced to ten pounds; in 1793 to five pounds; and in 1797 the bank suspended specie payments, and commenced issuing one and two pound notes. After a fatal experiment of five and twenty years—fatal to the morals and welfare of the people, however necessary it may have been to Government—the bank resumed specie payments in 1822. The currency was reformed, and all notes under five pounds (about equal to twenty five dollars) were prohibited in England and Wales. This was not, however, the most material reform.

The restriction on banking, which had been imposed in 1708 to protect the monopoly of the Bank of England,

was repealed in 1826. For one hundred and eighteen years no association could be formed for banking purposes with more than six partners. Under this system, the trade and currency of England were periodically convulsed. The great regulator of banking in that country, by its own alarms and powerful efforts to save itself, brought down country banks by the hundred in every revulsion, prostrated trade, and threw millions of the laboring population out of employment. The violent revulsion of 1825 brought about the reform of 1826; and "with the consent" of the Bank of England, her monopoly was partially relinquished, and the great commercial and manufacturing districts were permitted, like Scotland, to form as many banks as they pleased. England has escaped some of the violence of the recent revulsion. Her banks have not suspended specie payments. The Bank of England was not saved, as in 1825, by an accidental discovery of one pound notes! It was not because there had not been overtrading in England; far otherwise. There never was a period when there was more extensive speculation in every branch of trade, and when her capital and credit were more widely extended in every quarter of the globe. How has it happened, then, that she did not suffer as in 1825? Because the revulsion in that year broke down the monopoly of the Bank of England; because capital, freed from its dominion, flowed with astonishing rapidity into that branch of trade, and was ready to meet the sudden and large addition which speculation had made to the mass of commercial credits. Some of these associations, it is true, were embarrassed by the revulsion; the wonder is that more were not brought down by it. They were all of recent origin; and this trade had been effectually prohibited for more than a century. These were not the only reforms. That remnant of barbarism, the usury law, was also in effect repealed, by exempting all bills having not more than ninety days to run from their operation; and this has been subsequently extended. The rate of interest, sir, is the safety-valve of credit. It should be permitted to rise and fall with the pressure upon the money market. In this country we have locked it down, and doubly prohibited the free use of capital. The inevitable consequence is periodical explosions. But with all these reforms, it is still the policy of England to substitute credit for a metallic measure of value. That credit, it is true, is not so vitiated as it was; but by making Bank of England notes a lawful tender, and by authorizing the joint-stock associations to issue their notes, redeemable in these notes, they have laid the foundation for revulsions in trade, which are not yet developed. These associations had not been long enough in existence to show to what amount they could increase their circulations, though long enough to prove how rapidly they could increase them. While the use of credit founded upon property should enjoy absolute freedom, the abuse of credit, by issuing that which is founded upon credit, should never be encouraged by Government.

The most powerful antagonist, however, of a uniform measure of value is our own banking system, unquestionably the worst in the world. If we had no other motive, we should be compelled to collect our revenue in a metallic currency, in order to preserve something in the country as a standard of value. We have six and twenty Legislatures and two Territorial councils steadily at work enacting laws to banish specie from circulation. The present crisis, no doubt, must produce reform; but it cannot be expected to be immediate or general, so long as our laws are made by those who entertain hostile principles of Government, especially on this question of currency. It is true, there is a common conviction that our banking system is bad, and that our local circulations require reform; but when will that ever be effected, if we surrender up our constitutional standard? If we do not lay the foundation her,

Oct. 13, 1837.]

Sub-Treasury Bill.

[H. OF R.]

our banking system will never be reformed. It is impossible to imagine a system more discordant, and more embarrassing to trade, than the system of the United States as a whole. Capital is not at liberty to flow into this branch of trade as in England and Scotland. Government must regulate the quantity in each State. Our State Governments might with equal propriety and wisdom regulate the quantity of capital in every other branch of trade. And what is the consequence of this legislative interference with banking? Why, sir, two of our cities have each more banking capital than the State of New York, with her hundred cities and towns, and with more than two millions of population. The commercial emporium of the Union, the centre of circulation, the point upon which the whole fabric of commercial credit, internal and external, presses at every revulsion, is permitted to employ, in this branch of trade, some twenty millions—about one-third the banking capital of a neighboring city. Such legislation is as absurd as it is unequal. It is calculated to unregulate trade and embarrass the banks.

Banking, legitimate banking, is a trade, and should be as free as all other trades. Let it regulate the quantity of capital, and this branch will keep pace with all others; it will increase with the increase of commercial credits, and with the growth of trade. As the demand increases so will the supply; and no portion of the capital of the country will be unemployed. This is the secret of the success of the Scotch banking system, which is weakened, and not strengthened, by her small note circulation.

Currency, sir, is not a trade. Governments will be called upon to decide whether an attribute of sovereignty shall be exercised by trading companies, and, if so, to what extent. They must determine whether such companies are to be permitted to furnish the world with their credit as a substitute for a metallic standard, with liberty to increase and diminish it at pleasure; for that is the result which seems approaching. The great question to be determined is, are trading associations to be authorized to issue a species of State credit, and to collect a revenue, now amounting to six or seven millions annually, and constantly increasing, and to indemnify an abused community by producing periodical bankruptcy, poverty, and want? The gentleman from South Carolina knows that almost all the distinguished authorities are against his "credit system."

It is a conceded point, that the regulation of the quantity of currency which is the measure of value ought not to be entrusted to those whose profits are increased by abusing the trust. You might as well at once surrender to these corporations the power to regulate the value of our coin, and let them adulterate it, or arbitrarily raise its nominal value at their pleasure, as monarchs formerly did, to the ruin of their people. Upon what ground is it that Governments have been induced to give their aid in substituting the paper of trading companies for the current coin of the world? An increasing demand for a medium of circulation and a deficiency of the precious metals. The former is admitted, the latter I deny; and on neither ground can these issues be defended. Sir, there has been no age of the world when it was so abundantly supplied with circulation, independent of all the small notes (I mean under fifty or one hundred dollars) in Europe and America. How is it with the precious metals? In the work referred to by the gentleman from South Carolina, the quantity of money in the Augustan age is estimated at less than two thousand millions. Why, sir, since 1492, we have drawn from the American mines alone, more than six thousand millions of dollars, and the aggregate of coin, bullion, and plate in the world, is estimated at from seven to ten thousand millions. The quantity of specie might have been an object of solicitude in earlier ages; but of what consequence is it now, when, for all its great offices, we have discovered other substitutes? We have discovered a mine

richer than all the mines of Mexico or Peru—the human mind. We have drawn from that inexhaustible mine, countless millions of substitutes for specie, in the form of public debts, bank stocks, and stocks of every kind; of bills of exchange, notes of hand, bank drafts, and bank checks. These are our circulations which give velocity to trade. It is these, amounting to thousands of millions, which have accelerated the growth of wealth among nations, and not the contemptible amount of your small note circulations in Great Britain, Ireland, and America. In the present age, trade provides its own substitutes for specie, in adjusting balances not only between States and nations, but between individuals, and without the agency of bank notes. Specie is only wanted to adjust balances between nations when credit is suddenly destroyed. It is, however, wanted in every country as a standard for local circulation, and to sustain the increasing amount of commercial credit. The value of property is sufficiently affected by credit founded upon credit, in the form of bills of exchange, without extending this abuse of credit in the form of currency. The former we cannot reach by legislation, and we have no right to do so if we could, however injurious its operation is upon trade. The latter interferes with the currency established by the constitution, and we should adopt every measure that we can to prevent it from destroying our standard altogether.

This revolution may be accomplished. The precious metals may eventually be banished from the circulations of the world, and we may have no other standard than bank notes. I admit, sir, that, as a mere question of trade, it would accelerate the accumulation of wealth, and the growth of our cities. But what are the sacrifices attending such a system? Do you not lay the foundation of your cities on the ruin of your population? Sir, while we sacrifice the poor, we transfer political power from the agricultural and laboring classes of society to those thousand corporations which seem to have been, from the beginning of our free Governments, the only interests worthy, in the estimation of our American legislators, to be exclusively cherished, protected, and patronised. Sir, go on with your credit and banking systems; banish the precious metals; establish your paper standard, and let the value of property and the price of labor float upon its agitated surface; let them rise with its expansions and fall with its contractions; and then, sir, gentlemen may anticipate every five years the return of the "awful winters" referred to by the gentleman from Pennsylvania. One of them is now approaching—an awful winter indeed for the poor; thousands will be struck down by poverty and want. Sir, I do not ask gentlemen for their charity. I make no appeals to their humanity, but in the name of Him who made us all, I entreat them to spare them their taunts—do not stigmatize them—let these poor laborers die in peace and of famine, in a land overflowing with the richest abundance. Pardon these victims of your policy, should they in their last hour pray that their country might be delivered from your calamitous "credit system."

Mr. Chairman, upon the firmness and integrity of the people of this country, at the present crisis, depend the condition of our society and the character of our Government. It is evidently a struggle for power by some of the corporations of this country, but I trust not all of them. It is a great issue; for every thing moral, social, and political is at stake. On such an occasion, gentlemen may well discard their prejudices—republicans have been separated on party grounds, but not on principle—they may readily unite when a question arises involving the welfare of the people, and the very existence of free Government. In a cause so just we have little to fear, and every thing to hope. I cannot believe that in the approaching contest we shall lose one sincere friend of this administration. Some have, I think, prematurely decided upon the measure now pro-

H. OF R.]

Sub-Treasury Bill.

[Oct. 13, 1837.]

posed; they have denounced it without proper examination. I am sure no sound republican can, upon deliberation, be ultimately found against it; while, sir, on the other hand, the proposition to separate bank and State must rally and unite the democracy of this country, by whatever questions they may have been hitherto divided. They will never consent that the Treasury of the United States shall be controlled by the stock exchange of Wall street, or of the Royal Exchange; that the public revenue shall be again made instrumental in augmenting the disasters of the country; and that the Government shall be periodically embarrassed for want of means, by entrusting its funds to institutions whose fate depends upon the slightest counter movement in any part of the commercial system of the world. Nor, sir, can I believe that any sound republican is prepared to substitute the credit of our corporations for the common medium and common standard of the world. No, sir; on these questions the democracy will be found united, as they always have been whenever the honor or the interests of their country were involved, as they are at the present crisis. Let not gentlemen deceive themselves; their victories always come with our calamities, and disappear with returning prosperity. The concentrated power upon which they depend cannot yet regulate the succession to the Presidency.

Sir, I have detained the committee too long. We challenge gentlemen to the vote. Let the gentleman from South Carolina declaim over his "iron money and black broth;" let gentlemen denounce the measure as an expedient or an experiment; let them call it a sub-Treasury scheme, or by what name they please; but let them afford us an opportunity to test its advantages to trade, to banks, the Treasury and the country. We fear not the results of the experiment.

[After Mr. CAMBRELENG had concluded, Mr. WISE obtained the floor, but yielded it to Mr. HOFFMAN, who replied to some personal reflections of his colleague in such a manner as to excite universal attention and admiration.]

Mr. WISE having again obtained the floor, at about half past 7 o'clock p. m., he said: After the rich treat which we have just enjoyed, I can hardly hope to be listened to. I have much to say, far too much to be said at once. Did I not know that it was the wish on all sides for the committee to rise this night and report the bill, I would not proceed now; and had I not at the last session reviewed the last message of the "Greatest and Best," and did I not feel it to be a more imperative duty to review the first message of his protégé and successor, I would not proceed at all. But, sir, a duty rests upon my shoulders which most gentlemen seem to shun, and I shall discharge it, though the debate has exhausted this subject, and exhausted still more our time and our patience. I mean the duty of complaining: I rise to murmur and to complain.

The gentleman from South Carolina [Mr. LEGARE] exhorted us not to disturb our tempers by tracing the causes of the ills we endure to their authors—it could lead to nothing but crimination and recrimination; he begged us rather to study out the remedy and to apply it to our maladies. I shall not follow the gentleman's recommendation. It may well suit the powers that be, who have always heretofore been claiming for their administration the highest praise of prosperity and infallibility, now that they have reduced the country to distress, and the Government to bankruptcy, to cry for a spirit of conciliation and charity; but, as for me, I compromise not, I conciliate not with public plunderers, and I spare not those who have wilfully and deliberately misgoverned my country, and who have basely and corruptly rioted in her distresses and her wrongs. Whom have they spared? Let them answer me. Have they spared any thing worth preserving? Sir, I believe

that the only true remedy is to trace the evils of the present times to their real authors, and to hold these authors responsible to a just, though it be a severe judgment. No virtue should be so severe, so austere as patriotism; it should be no respecter of persons; excuse no man or set of men, for bringing ruin on a country rich in every element of wealth; and it should visit, with the most condign punishment, that man or set of men who has usurped and perverted power for the basest and worst purposes of reducing that country, once the freest in the world, to slavery as well as beggary. There is no remedy so wholesome as that of convicting these spoilers, and taking from them the power to do further mischief.

Sir, whilst the gentleman from South Carolina [Mr. LEGARE] was abroad in Europe studying the condition and the policy of foreign countries, it was my lot to remain at home, and for the last four years to mark the policy, to study the motives, and watch the march of our own federal Government. Let me tell that gentleman that our federal Executive has, almost within that period of time, changed the form of our Government from a representative federal republic, to that of an elective monarchy—an elective monarchy, with the power of absolute control over legislation, and of perpetuating a succession! I congratulate this House and the nation that the gentleman has returned to his country in time to strike for her a blow with his strong arm against this nefarious measure, calculated for no other design than that of strengthening the cords of Executive power, and of riveting forever the chains which have been forged for us for the last four years; and I only regret that he was not here before to war side by side with me and others who have been laboring in vain to ward off the catastrophe which has befallen, and the crisis which now threatens the country and its institutions. If he had been here to watch the conduct and motives of our rulers, as I have been, he would be as ready as I am to arraign the conduct and impugn the motives of the real authors of this monstrous change in the form of our Government and in the condition of our affairs. Sir, I repeat that I rise for no other object than to criminate the conduct and the motives of the preceding and the present administrations. They have deliberately and wickedly, with malice aforethought, wrought this mischief, and a bill of indictment should be laid against them before the grand jury of the nation—the people! I appeal to them, and, sir, I propose to show the guilt of the culprits out of their own mouths.

Sir, contrast "the last annual message" with the first semi-annual message to this extraordinary distress session!

"Alas, from what high hope, to what relapse
"Unlook'd for are we fallen!"

In the very first paragraph of this extraordinary message we have the precious confession that—the experiment has failed! failed! Ay, failed! Is it possible? Can this thing be so? Ay, failed! The great chief, the Greatest and Best—he under whom it was glory enough to have served—was altogether such as we are, a man! He was not, as it was thought, a god! He was but a poor weak mortal; his wisdom was fallible! This our Cæsar did feed on meat as other men! Sir, this one truth is every thing—that Jackson was a fallible man; that he was not endowed with all virtue, all wisdom, and not entitled to all confidence and trust; this dissolves the charm; and from this one truth admitted alone, I augur better times to come. I breathe, I hope! Now, sir, will the people heed a warning, reason for themselves, act for themselves? Sir, I do not mean to declaim, I came here this night to reason with the people. I mean, God willing, to bring in review before them the collected wisdom of General Jackson's administration upon this same experiment; the messages, the reports, the essays, the speeches, documents, arguments, proofs, which were written, adduced, made, read, and reiterated, to es-

Oct. 13, 1837.]

Sub-Treasury Bill.

[H. OF R.]

tablish the length and the breadth, the height and the depth of this same grand, safe, and sure experiment which now lies like love bleeding! Could any system, any wise plan of finance and currency be more strongly, more earnestly, more confidently recommended and urged than was this same experiment! Let us see; to the proofs. [Here Mr. WISE raised many large volumes of Executive documents and reports of committees, &c.] Here! here they are, pile upon pile—mountain high, if you choose; if these are not enough, I can touch that dome with Pelion upon Ossa, and Ossa upon Olympus, of multiplied proofs against you, (turning to Mr. CAMBRELENG.) Shall I read them? [Here Mr. CAMBRELENG begged for God's sake that he would not.] I know they are gall and wormwood to you now, but you must take a portion of the bitter draught, though I do not intend to minister to you the dregs. You must endure a portion. Sir, I omit the President's celebrated cabinet paper read in 1833, upon the removal of the deposits. I omit the reports and papers of honest Iago, Amos, the agent, to the President in 1833, upon the expediency and policy, the wisdom and virtue, of removing the deposits from the monster, and placing them in certain local banks. I cite only the Congressional documents. (See Executive documents, 1833-'34, p. 12.)

In the President's message of December, 1833, he (Jackson) told us: "I entirely concur in the view he" (the Secretary of the Treasury) "has taken of the subject;" (the removal of the deposits.) What was the view he took? The report of the Secretary of the Treasury, (Mr. Taney,) in 1833, says:

"The State banks can, I have no doubt, furnish a general circulating medium, quite as uniform in value as that which has been afforded by the Bank of the United States. Probably more so." * * "But a currency founded on the notes of State banks could not be suddenly substituted for that heretofore furnished by the Bank of the United States, and take the place of it, at the same moment, in every part of the Union. It is essential that the change should be gradual, and sufficient time should be allowed to suffer it to make its way by the ordinary operations of commerce, without requiring a hasty and violent effort."

This view was supported by the Committee of Ways and Means in the House of Representatives, the chairman then [Mr. POLK] the present Speaker. The report of that committee in 1833-'34 upon the removal of the deposits, says:

"The question then arises whether the State banks should be continued as the fiscal agents of the Government. The committee are satisfied that the State banks are fully competent to perform all the services which the general Government ought to require, in the collection and disbursement of the revenue, and to afford all the facilities to the internal commerce and exchanges of the country which have been derived from the Bank of the United States.

"The opinion has already been expressed that the State banks are competent to perform all the duties which the Government or the public convenience may require; and there are many circumstances which strongly recommend them to a preference over a bank of the United States. No one of them can exercise a general control over all the others, and expand or contract the whole currency of the country at its pleasure, to favor the private speculations of individuals, or to increase its own profits. And they can never combine together for political objects, nor hope to gain possession of the Government and control its operations."

"The State banks are now firmly interwoven with the institutions of our country, and it would be unjust, and contrary to the spirit of our institutions, for Congress to sustain a great moneyed power to overawe and oppress them, and bring ruin upon multitudes of our citizens,

whenever cupidity or ambition shall tempt them to exercise their power."

"If it should be urged, as an objection to the State banks, that they cannot afford a general currency, the answer is obvious. If it were deemed necessary to create a paper currency, possessing equal credit with that of the present Bank of the United States, the object can as well be accomplished with the State banks as with the Bank of the United States." * * *

"With these views, the committee are of opinion that the State banks ought to be continued as the depositories of the money of the United States." &c.

The same committee, on the 22d of April, 1834, reported a letter, dated April 15th, 1834, from Mr. Taney, upon the mode of selecting the deposit banks, in which he says:

"It will be seen, from this statement, that it is no part of the proposed plan to dispense with the State banks. It is obviously not in the power of Congress (if it desired to do so) to take measures for that purpose without an amendment to the constitution. And the States would not and ought not to surrender the power of chartering banking companies. The State banks are now so numerous, and are so intimately connected with our habits and pursuits, that it is impossible to suppose that the system can ever be entirely abandoned. Nor is it desirable that it should be. They are often abused, like all other human institutions; yet their advantages are many, and under proper regulations, and with the metallic basis now proposed for their paper issues, they will be found of much public advantage."

President Jackson, in his message to Congress, December, 1834, speaking of the United States Bank, says:

"Happily it is already illustrated that the agency of such an institution is not necessary to the fiscal operations of the Government. The State banks are found fully adequate to the performance of all services which were required of the Bank of the United States, quite as promptly, and with the same cheapness. They have maintained themselves and discharged all these duties, while the Bank of the United States was still powerful, and in the field as an open enemy; and it is not possible to conceive that they will find greater difficulties in their operations when that enemy shall cease to exist."

President Jackson, in his message to Congress, December, 1835, says:

"We are now to see whether, in the present favorable condition of the country, we cannot take an effectual stand against this spirit of monopoly, and practically prove, in respect to the currency as well as other important interests, that there is no necessity for so extensive a resort to it as that which has been heretofore practised. The experience of another year has confirmed the utter fallacy of the idea that the Bank of the United States was necessary as a fiscal agent for the Government. Without its aid as such, indeed in despite of all the embarrassment it was in its power to create, the revenue has been paid with punctuality by our citizens; the business of exchange, both foreign and domestic, has been conducted with convenience; and the circulating medium has been greatly improved. By the use of the State banks, it is ascertained that the moneys of the United States can be collected and disbursed without loss or inconvenience, and that all the wants of the community, in relation to exchange and currency, are supplied as well as they have ever been before. If, under circumstances the most unfavorable to the steadiness of the money market, it has been found that the considerations on which the Bank of the United States rested its claims to the public favor were imaginary and groundless, it cannot be doubted that the experience of the future will be more decisive against them. It has been seen that, without the agency of a great moneyed monopoly, the revenue can be collected, and conveniently and safely applied to all the purposes of the public expenditure. It is also ascertained

H. of R.]

Sub-Treasury Bill.

[Oct. 13, 1837.]

that, instead of being necessarily made to promote the evils of an unchecked paper system, the management of the revenue can be made auxiliary to the reform which the Legislatures of several of the States have already commenced in regard to the suppression of small bills; and which has only to be fostered by proper regulations, on the part of Congress, to secure a practical return, to the extent required for the security of the currency, to the constitutional medium. Severed from the Government as political engines, and not susceptible of dangerous extension and combination, the State banks will not be tempted, nor will they have the power which we have seen exercised, to divert the public funds from the legitimate purposes of the Government. The collection and custody of the revenue being, on the contrary, a source of credit to them, will increase the security which the States provide for a faithful execution of their trusts, by multiplying the scrutinies to which their operations and accounts will be subjected. Thus disposed, as well from interest as the obligations of their charters, it cannot be doubted that such conditions as Congress may see fit to adopt respecting the deposits in those institutions, with a view to the gradual disuse of the small bills, will be cheerfully complied with; and we soon shall gain, in place of the Bank of the United States, a practical reform in the whole paper system of the country. If, by this policy, we can ultimately witness the suppression of all bank bills below twenty dollars, it is apparent that gold and silver will take their place, and become the principal circulating medium in the common business of the farmers and mechanics of the country. The attainment of such a result will form an era in the history of our country, which will be dwelt upon with delight by every true friend of its liberty and independence. It will lighten the great tax which our paper system has so long collected from the earnings of labor, and do more to revive and perpetuate those habits of economy and simplicity which are so congenial to the character of republicans, than all the legislation which has yet been attempted."

Mr. Woodbury's report, of the same date, tells us—

"This Department takes pleasure in stating that the public money continues to be collected and deposited, under the present system of selected banks, with great ease and economy in all cases, and with greater in some than at any former period. The transfers of it to every quarter of the country where it is needed for disbursement, have never been effected with more promptitude, and have been entirely free of expense to the Treasury. The payments to creditors, officers, and pensioners, have been punctual and convenient; and the whole fiscal operations through the State banks have, as yet, proved highly satisfactory. Incidental to this, the facilities that have been furnished to the commercial community in domestic exchanges were probably never greater, or at so moderate rates."

Again, he says:

"It will be seen that the situation of the selected banks, as a whole, bears an enviable comparison with the rest. In all cases deemed proper, they have given collateral security, and all are believed to be entirely safe, to the extent they have been confided in. Their discounts have been in general somewhat increased, but, though tempted by the enterprising spirit of the times, not usually increased in a degree disproportioned to all their available means. They have also, in some cases, been able to aid, and have liberally aided, other banking institutions in their neighborhood, by as large and long balances and other indulgences as would generally appear to have been sanctioned by correct principles."

Now, sir, "the enterprising spirit of the times" is called by the hard name of "improvident speculation"—"overaction!"

In "the last annual message," December, 1836, the Greatest and Best still continued to say:

"Experience continues to realize the expectations entertained as to the capacity of the State banks to perform the duties of fiscal agents for the Government, at the time of the removal of the deposits. It was alleged by the advocates of the Bank of the United States that the State banks, whatever might be the regulations of the Treasury Department, could not make the transfers required by the Government, or negotiate the domestic exchanges of the country. It is now well ascertained that the real domestic exchanges, performed through discounts, by the United States Bank and its twenty-five branches, were at least one-third less than those of the deposit banks for an equal period of time; and if a comparison be instituted between the amounts of service rendered by these institutions, on the broader basis which has been used by the advocates of the United States Bank, in estimating what they consider the domestic exchanges transacted by it, the result will be still more favorable to the deposit banks."

After instituting this comparison, the message proceeds:

"In the same manner have nearly all the predictions turned out in respect to the effect of the removal of the deposits—a step unquestionably necessary to prevent the evils which it was foreseen the bank itself would endeavor to create in a final struggle to procure a renewal of its charter. It may be thus too, in some degree, with the further steps which may be taken to prevent the excessive issue of other bank paper," &c.

Sir, it is unnecessary to quote further. I will not quote from Mr. Woodbury's testimony before the investigating committee of which my colleague [Mr. GARLAND] was chairman. I will not cite passages from the valedictory—the miserable imitation of Washington's farewell address. I will not stop to show a continuous recommendation, incessant, labored, from the removal of the public deposits, in 1833, up to the 4th of March, 1837, the very day when this system of deposit in the local banks sunk never more to rise; but I only ask of you and all men to contrast what I have quoted, to compare all this with the letter of the immortal, infallible ex-President, during this summer, denouncing the pet bank system as the most base and perfidious, and with the successor's present message, confessing that the experiment has failed! And then tell me whether these men of Gotham are again to be trusted in their recommendation of another experiment! Did not the failure touch their very noses before they discovered it? If so, they were—I will not mince terms—fools! Did they foresee the failure? Where is the warning they gave? Where is the measure they took for safety? If they did foresee it, and, foreseeing it, gave no alarm, took no measures of safety, they are—knaves! They are, undoubtedly, both knaves and fools!

But the experiment has failed. Why? is the next question. Sir, why should this experiment have failed? It was wholly and solely in the control of the Executive. If it has failed, the Executive wholly and solely is to blame. They can offer no excuse; they have no pretext that their favorite bantling has expired under the unkind nursing of its enemies. The administration assumed the entire responsibility, took upon itself the sole care, and wielded the whole power of originating, maturing, regulating, and carrying out its own experiment. No minority can be blamed. We were in a minority, and too weak even to throw a stumbling-block in the way of its success; all that we could do was to predict its failure, and wofully has the prediction been fulfilled! The President alone removed the deposits; he placed them wherever he pleased, on his own terms, and under his own rules. For more than three years did the public money remain in the custody and control of the Executive hands, without authority of or regulation by law. Congress was so yielding and obedient that it left its legitimate powers derelict to Executive assumption. The President, without restraint or limit, ordered

Oct. 13, 1837.]

Sub-Treasury Bill.

[H. OF R.]

the receipts, safe-keeping, and disbursements of the public funds at will; he took upon himself to organize a confederation of local banks, obliged his pets to raise the minimum denomination of their notes, endeavored to force them to constitute among themselves a system of internal exchange, backed them with Government credit to accommodate trade, regulated their receipts of local bank paper; he issued the Treasury circular to remove the specie basis of circulation; in short, was master of his own system. Why did it fail?

Sir, there is one remarkable fact in the history of this failure, which should not escape our attention, and which should be especially noted for our warning and our instruction. The deposit act was passed by Congress in June, 1836, and the very first report of the Secretary of the Treasury thereafter for the first time gave notice of difficulties in our finances. From the removal in 1833 up to that time, the time when Congress had again asserted its power to regulate and control the deposit and safe-keeping of the public money, the note of the night watch was, all is well! the system works well, efficiently and safely, even more so than did the Bank of the United States. But the moment that Congress again assumed its powers, the note was changed, though darkly and dubiously. No one would have apprehended, or did apprehend, certain passages of the Secretary's report, in December, 1836, as they must be understood now. The report of Mr. Woodbury, December, 1836, says:

"The money in the Treasury has been safely kept during the year 1836. Until July last, as during the two previous years, it was placed in the State banks, selected according to the discretion of this Department, on account of their high standing and favorable position for fiscal purposes, and regulated in a manner considered most secure to the Treasury and convenient to the community, as well as useful to all concerned. It is a source of high gratification to be able to add, that, while so selected and employed, not a single dollar was lost," &c. "Nor is it believed that the domestic exchanges of the country were ever lower or more regular than during that period," &c. "But since the passage of the act of Congress, of June 23d, 1836, 'to regulate the deposits of the public money,' most of the discretionary power before exercised by this Department on this subject, under previous laws and long usages, has been considered as no longer possessed; and various solicitations to use it, though some of them were in cases of extreme hardship, could not, therefore, be complied with. Relieved from great responsibility, and in many cases from much delicacy, in the exercise of it, by the passage of that act, a new system, in conformity with its provisions, and in place of the former one, was at once commenced by this Department, and has since been pursued with all the strictness and regularity which the nature of business, so extensive and complicated, would permit," &c.

How did the law create any embarrassment to the Secretary? There was a majority in both Houses of Congress; the Senate had been prostrated by the expunging blow, to make it pliant to the wishes of the Executive in the framing of this law as well as others; and the law of June, 1836, did no more than sanction the then existing state of finance, except to deposit the surplus with the States. Sir, the complaint, in plain English, was, that Congress was an incubus upon the Executive will. Moreover, an excuse was wanting for foreseen disasters; here is proof, plain and positive, that the Secretary knew that the deposits were not to be safely kept for the year 1837! The law should not be the scape-goat. The Secretary was put under the law, but the law put every thing under him. The administration carried out its experiment in its own way, had all the precautionary means of safety, and every opportunity of foreseeing embarrassments in its own power, and yet the pet banks were the first to suspend specie

payments! The first bank selected after the passage of the act of June, 1836, was the first to fail, with more than a million of Government deposits on hand—the Agricultural Bank of Mississippi protested a Government draft of \$130,000. The second was the Planters' Bank of Mississippi: the third was a Government bank in New York: the fourth also. In Philadelphia, the pets were the first to fail, and they were the first also in Virginia. The States favorable to the administration were the first and only States to legalize the suspension of specie payments, and to sanction by law an irredeemable paper currency. Alabama was the first State, and New York, Connecticut, Virginia, Michigan, Illinois, and Mississippi, followed suit. Such, sir, was the end of "the better currency," the swarm of yellow jackets, the flow of humbug metallic currency, in suspension of specie payments, and in the inability of the Government to pay its just debts, in less than four years from the day the experiment began!

[Here Mr. CLAIRBORNE, of Mississippi, interposed with these remarks:

Mr. C. said, with the permission of the gentleman from Virginia, he would set him right as to an error into which he had no doubt been led by the current reports and newspapers of the day. No stay laws had been passed by the Legislature of Mississippi, nor had that body, by any act, sanctioned the suspension of specie payments by the banks. The Legislature was in special session when the suspension took place, but, as far as Mr. C. was informed, it expressed no opinion on the subject. Great distress and embarrassment prevailed in Mississippi; at that period, particularly, when the first shock was felt, property suddenly depreciated to less than half the value at which it had been quoted; but this distress and depreciation had been greatly exaggerated abroad, and every press at the North seemed to take it for granted that relief laws would be passed. No such proposition was made in the Legislature; the public mind revolted from the idea; men whose property was under execution, whose horses were levied on in the plough, and whose negroes were absolutely starving, were the first to insist on the supremacy of the law, and the inviolability of contracts. This was emphatically the case in the section of country from which he came. The prospects in Mississippi were now brightening. Some of our banks were adopting the most liberal and judicious measures to relieve the people and sustain themselves. The growing crop is very heavy, and will almost extinguish our foreign debt. An abundance of provisions for domestic consumption had been raised; and our creditors every where may be assured that their dues will be paid to the last dollar. We beg not for indulgence, but it is to their interest to grant it to us.]

Sir, as to Mississippi, I derived my information from the newspapers of the day. It may be wrong; I hope it is so; but, if wrong, it affects not the general conclusion from all the facts in the case, independent of the course of Mississippi. The question still remains to be answered by the administration, why has the experiment failed in its hands?

This question, sir, brings us to the causes assigned by the President. The message says: "The operations of credit are so diversified, and the influences which affect them so numerous, and often so subtle, that even impartial and well-informed persons are seldom found to agree in respect to them." And yet, sir, though this subject of credit and the causes which affect it are so delicate and subtle, though a measure touching trade, and finance, and currency, and the main support of all, credit tends nobody knows where, or to what; and though every safe and sagacious statesman will ever be ruled and guided on this subject by the light of experience, and the history of what has been tried in the past, the late and the present Executive have laid upon credit, finance, and currency, the rudest

H. OF R.]

Sub-Treasury Bill.

[Oct. 13, 1837.]

hands of barbarism itself—have knocked down every fly-wheel and regulator of either—have destroyed all the balances of trade, and have set the machine in motion at an unprecedented rate of velocity towards self-destruction—just to try experiments! If this subject be so delicate, why has it been so harshly tampered with by experimenters? The message continues:

"It was hardly to be expected that those who disapproved of the policy of the Government in relation to the currency, would fail to attribute to that policy any extensive embarrassment in the monetary affairs of the country. The matter thus became connected with the passions and conflicts of party, &c. It is, however, a cheering reflection that circumstances of this nature cannot prevent a community so intelligent as ours, from ultimately arriving at correct conclusions."

No, sir, party itself, with all its blindness of partiality and prejudice and passion, cannot so dupe any as to make them differ about the causes of the failure of this experiment. I venture to say that there is no difference of opinion among all men of this country on this subject. The President may, with much policy, assume this difference to exist, but it is unnatural to suppose for a moment that the "impartial and well-informed" can doubt or differ, or that the ignorant and the bribed themselves do not distrust the real causes. No flattery of its intelligence can now cajole the community into the theory or belief of other cause than one, and that one cause, in one word, is—misgovernment or mal-administration! The primary cause of all this mischief, the message tells us, is—overaction! What is that? The message says, 1st. Increase of bank capital, circulation, loans, and discounts. 2d. Foreign loans and debts. 3d. Domestic debts. 4th. Speculations in public lands, &c. 5th. Expenditures in improvident improvements. 6th. The diversion of labor from agriculture. 7th. Luxurious habits of the people. The message says:

"However unwilling any of our citizens may heretofore have been to assign to these causes the chief instrumentality in producing the present state of things, the developments subsequently made, and the actual condition of other commercial countries, must dispel all remaining doubts upon the subject."

Now, sir, I affirm that there are no "impartial and well-informed persons" who are unwilling "to assign to these very causes the chief instrumentality in producing the" evils of the present times. These are the causes, say I, say all. These, united with other, and impelled by other causes, have produced the mischief. The President admits that this overaction derived its first impulses from antecedent causes. What were these antecedent causes? Here he leaves us in the dark. Sir, I will tell you. These antecedent causes were the acts of the Government. "Solitary and alone," "the Government," amidst the warnings of the wise, and the cheers of the wicked, who batten on the spoils, "put all these balls in motion!" How did the Government impel these causes? Sir, a virtue ascribed to the Bank of the United States by its worst enemies was its salutary influence in checking the increase of bank capital, and the constant tendency of local banks to over-issue. In the year 1833 the war was openly commenced and declared against that institution. It was as certain to be destroyed by the President as Carthage by Rome. It was counted already as dead, as soon as the removal of the deposits was justified by Congress. As long as it existed, there was no necessity for more banking capital; it supplied the wants of trade amply, and did the business of the Government and of the people efficiently. What was the consequence of its defeat? Sir, listen to what the President himself says on that subject:

"At the commencement of the year 1834, the banking capital of the United States, including that of the national

bank then existing, amounted to about two hundred millions; the bank notes then in circulation to about ninety-five millions; and the loans and discounts of the banks to three hundred and twenty-four millions. Between that time and the 1st of January, 1836, our banking capital was increased to more than two hundred and fifty-one millions; our paper circulation to more than one hundred and forty millions, and the loans and discounts to more than four hundred and fifty-seven millions."

Thus was the banking capital, in two years, increased more than fifty-one millions, paper circulation more than forty five millions, loans and discounts more than one hundred and thirty-three millions!—according to the President's statement of the effect of destroying the only safety-valve we had to secure us from this fearful overaction. This summary of the President does not vary essentially from others which I have seen. In the National Gazette of April 8th, 1837, you will find the 2d number of the essays under the signature of An Examiner: numbers which I fail not to quote, because they are truly able and philosophical commentaries upon the political economy of the times. There it is stated that General Jackson's war against the Bank of the United States, and his removal of the deposits, had, in the seven years which elapsed between the 1st of January, 1830, and the 1st of January, 1837, produced the following results:

1st. An augmentation in the number of banks from 320 to 677—an increase of 357, besides 146 branches.

2d. An augmentation in banking capital of the United States from \$145,192,268 to \$324,240,292—an increase of \$179,000,000.

3d. An expansion in the circulation of bank notes from \$61,323,898 to \$185,762,506—an increase of paper money of upwards of \$124,000,000.

4th. An augmentation of amount of deposits, public and private, from \$55,559,928 to \$154,541,894—an increase of near \$91,000,000.

5th. An extension of the amount of bank loans and discounts from \$200,451,214 to \$590,892,661—an increase of upwards of \$390,000,000; a sum only \$12,000,000 less than the aggregate of the increased capitals, circulation and deposits.

To test the question, whether the Bank of the United States tended to prevent an increase of banking capital, you have only to compare the increase of banking capital in the periods when the bank did not exist with the periods during which it did exist.

"The aggregate capital of the banks in the United States was—

In 1811,	-	-	-	-	\$52,600,000
1815,	-	-	-	-	82,200,000
1816,	-	-	-	-	89,800,000
1820,	-	-	-	-	102,100,000
1830,	-	-	-	-	110,000,000
1835,	-	-	-	-	196,250,000
1836, (to the month of August,)	-	-	-	-	291,250,000

"Thus, in ten years, from 1820 to 1830, the increase of bank capital in the United States was only eight millions of dollars; whereas, in the six following years—no, not six, but only five and a half—the increase amounted to the prodigious sum of one hundred and eighty-one millions!"

Sir, this very increase of banking capital, issues, loans, and discounts, of which the President now complains so much, was caused by "the Government"—the Executive itself—in warring upon and destroying the United States Bank; and was encouraged by the Executive in stimulating the local banks with the public deposits. It was a part of the experiment itself to increase the local bank capital in order to supply the vacuum produced by the fall of the United States Bank. As soon as that institution expired, competition in banking at once commenced. The question among the States was, who shall now furnish

Oct. 13, 1837.]

Sub-Treasury Bill.

[H. of R.]

the circulating medium? And the question among the banks was, who shall acquire the Government patronage? It had been urged vehemently, by the friends of the United States Bank, that if the Government destroyed that institution it would destroy the circulating medium, currency, and exchange. Every effort was made by the Government to meet and answer that objection, by stimulating its pet banks with Government credit to perform all the functions and offices, commercial and financial, of the United States Bank. In proof of this, sir, I adduce the numerous and various circulars issued by the Treasury Department from 1833 up to the moment when the bubble burst in the spring of 1837. [Here Mr. Wise read the two circulars—of July 7th, 1834, and of February 22d, 1836.]

The deposit banks were expressly told that while they had the “use, without interest, of unusually large sums of the public money, they should make some further temporary sacrifices to obtain and circulate gold, and in other respects to enlarge the specie basis of our circulating medium;” and all this was with the view of the Department to improve the currency! The banks were appealed to to establish a credit, mutual, if they chose, to redeem and re-issue a certain amount of each other’s bills, as they might be needed for circulation in travelling and the transmission of funds at a distance. They were regularly notified, through their agent, Whitney, how long Government deposits might remain in their vaults for them to trade, issue, loan, and discount upon. Sir, I adduce, as further and conclusive evidence, this message itself. (See page 11.)

“The use by the banks, for their own benefit, of the money deposited with them, has received the sanction of the Government from the commencement of this connexion. The money received from the people, instead of being kept till it is needed for their use, is, in consequence of this authority, a fund on which discounts are made for the profit of those who happen to be owners of stock in the banks selected as depositories. The supposed, and often exaggerated advantages of such a boon will always cause it to be sought for with avidity. I will not stop to consider on whom the patronage incident to it is to be conferred; whether the selection and control be trusted to Congress or to the Executive, either will be subjected to appeals made in every form which the sagacity of interest can suggest. The banks, under such a system, are stimulated to make the most of their fortunate acquisition; the deposits are treated as an increase of capital; loans and circulations are rashly augmented; and, when the public exigencies require a return, it is attended with embarrassments not provided for nor foreseen. Thus, banks that thought themselves most fortunate when the public funds were received, find themselves most embarrassed when the season of payment suddenly arrives.

“Unfortunately, too, the evils of the system are not limited to the banks. It stimulates a general rashness of enterprise, and aggravates the fluctuations of commerce and the currency. This result was strikingly exhibited during the operations of the late deposit system, and especially in the purchases of public lands. The order which ultimately directed the payment of gold and silver in such purchases, greatly checked, but could not altogether prevent, the evil. Specie was, indeed, more difficult to be procured than the notes which the banks could themselves create at pleasure; but still, being obtained from them as a loan, and returned as a deposit, which they were again at liberty to use, it only passed round the circle with diminished speed. This operation could not have been performed, had the funds of the Government gone into the Treasury to be regularly disbursed, and not into banks to be loaned out for their own profit, while they were permitted to substitute for it a credit in account.”

In page 12 he further goes on to say:

“Since, therefore, experience has shown that to lend

the public money to the local banks is hazardous to the operations of the Government, at least of doubtful benefit to the institutions themselves, and productive of disastrous derangement in the business and currency of the country, is it the part of wisdom to renew the connexion?”

Sir, who gave the use of the public money to the local banks, for their own benefit? Who made the money received from the people a fund on which discounts were made for the profits of those who happened to be owners of stock in the banks selected as depositories? Who caused this boon to be sought for with avidity? Who stimulated the banks to make the most of their fortunate acquisition? Who encouraged them to treat the deposits as an increase of capital? Who caused loans and circulation to be rashly augmented? Sir, the message itself answers—“the Government, from the commencement of this connexion!” He needed not to stop to consider on whom the patronage was conferred; the Government sanction was given to all this monstrous abuse of public trust, for reasons best known to him who now sits in the Presidential chair,—reasons which he will never mention, if nobody else does! How profligate though, and insolent, must that man be, who first stimulates another to the height of intoxication and madness, for purposes of base profit, and then turns upon his victim and tool, and derides and denounces him to the world!! Such is the conduct of “the Government”—the Ex and the In-President of the United States, towards the deposit banks! The increase of circulation, loans, and discounts was rather an effect than a cause. Money was made plenty by the action of the Government. Money plenty—there was a domestic demand for credit, which caused domestic debt; and the same cause produced our foreign debt, and large importations—our speculations in public lands, and in every species of property. The Government officers especially were interested and engaged, deeply and fraudulently, in these very land speculations; and the improvident extravagance of the Government, in appropriating immense sums to public works, drew off more labor from agriculture than all the private speculations of the nation could have done. The whole system tended and operated to hallucinate the public mind, and to corrupt the public morals. Cruel, indeed, is it, no less to the people than to the pet banks, to blame them with effects proceeding directly from the mal-administration of the Government. In no other point of view are they to be blamed for their participation in the wrong than for having trusted their great interests and their liberties to such abandoned and insolent rulers! The system of the Government was not limited to the banks; it did stimulate “a general rashness of enterprise, and aggravated the fluctuations of commerce and currency.”

But the President takes comfort in his misfortunes from companionship in grief—from alleged distresses in other countries. He says:

“It has since appeared that evils, similar to those suffered by ourselves, have been experienced in Great Britain, on the continent, and, indeed, throughout the commercial world; and that in other countries, as well as in our own, they have been uniformly preceded by an undue enlargement of the boundaries of trade, prompted, as with us, by unprecedented expansions of the systems of credit.”

Now, sir, we happen to have an authority upon this point, which does most conclusively show the fallacy of this position assumed by the administration; an authority, too, which beautifully illustrates the value and importance of a national bank in times of commercial and financial embarrassment and distress. Sir, I call the attention of the committee to a “statement rendered in the name of the Council General of the Bank of France, by the Count D’Argout, Governor,” to a “general meeting of the stockholders, on the 26th of January, 1837.” (See “The Fi-

H. of R.]

Sub-Treasury Bill.

[Oct. 13, 1837.]

nancial Register of the United States," September 13th, 1837, No. 6, vol. 1.)

In this important document we find a full and satisfactory answer to this part of the message, contradicting it expressly, and showing where the commercial crisis and pressure commenced. The statement says:

"The consolidation of public order has favored the extension of commerce, and has augmented the revenues of the State. Commerce has demanded of the bank the most ample means of credit; the increasing wealth of the Treasury has rendered the assistance of the bank less necessary and less useful to it. Far from regretting the diminution of our relations with it, we ought to congratulate ourselves; we therein find a certain proof of the prosperity of the country. We are happily very far from those critical periods, during which the bank had at the same time to assist commerce and to aid the Treasury. If at the latest of these epochs the bank was enabled to furnish, in a single year, 617 millions to commerce, and 253 to the Treasury, she feels honored by the recollection of it; but she felicitates herself at not being at this day called upon to employ her resources otherwise than in seconding the progress of commerce, or in protecting it against a return of those distressing vicissitudes which occasionally happen.

"It is to this last result that she has just devoted all her efforts. During the second half of the year 1836, the security of commerce appeared shaken, confidence was for a moment weakened. From the month of July, some symptoms of a partial distress had begun to manifest themselves. The march of our manufactures had been so rapid, that there could not have failed to arrive a period of reaction. Some exportations of coin, the importance of which was exaggerated, and which are now insensibly reduced, excited a certain degree of anxiety, when a crisis rather severe overtook the United States. The scarcity of specie raised the interest of money there to an exorbitant rate. It was at London that the reaction of this crisis was first felt. The Bank of England, notwithstanding the power of her means of action and her well-known skill, found herself obliged to raise the rate of discount from 4 to 4½ per cent., and subsequently to 5. The Bank of Amsterdam imitated this example. France could not withdraw herself entirely from the influence of these events, for the commerce of the whole world is more or less responsible for all its parts.

"Although this commercial reaction only reached us second-hand, and consequently enfeebled, it could not fail to develop the seeds of embarrassment which I have just now alluded to. Thus, in many towns of the kingdom, the interest of money rose to 5 and 5½, and even for a moment to 6 per cent. Money became scarce; demands for specie were addressed to Paris from different points of France, and from neighboring countries. The coffers of the bank could alone furnish it. She had then to administer simultaneously to the wants of the capital and to those of the departments, as well as to those of the adjoining States. If the bank had shown the least hesitation, fears would probably have become general. The public funds, which had already declined, would perhaps have experienced a much heavier depression; this momentary pressure might have been converted into a real crisis.

"The bank, in this situation, restricted neither the length of time which paper had to run, nor diminished the amount of her discounts. She delivered up to the circulation 108 millions of specie, and discounted 450 millions in six months. She maintained at 4 per cent. the rate of her interest, when this limit had been exceeded by a great part of Europe. It is thus that she was able to arrest or to check a movement which seemed to be assuming a serious aspect.

"But, in order to accomplish this, she was obliged to have recourse to extraordinary precaution. The specie on hand decreased rapidly; it was necessary to replace this

reduction. The bank purchased eight millions of gold at Paris; she drew from abroad 10,800,000 francs in silver bullion. The premium expended in procuring the gold will sooner or later be made up. The operation on the bullion occasioned a loss of 105,000 francs. This loss has in some measure been recompensed by more abundant discounts; but, even had it been impossible to obtain any compensation, this consideration would not have prevented the Council from taking that course; it would equally have adopted it without hesitation, inasmuch as it was imperiously called for by the interests of commerce; a fact which it now frankly declares to you through my instrumentality.

"The interests of commerce, gentlemen, are therefore intimately allied to yours. The aggregate of the dividends of 1836 have given you a proof of it. You received in 1834 but 80 francs, and in 1835, 98; the year 1836 gives you 112 francs. This is the highest annual dividend that has been declared since the creation of the bank."

So much for the pressure in Britain and on the continent of Europe. Indeed, sir, I believe the fact was, though I am not confident in stating it to be so, that cotton actually fell in New Orleans before advices were received of a fall in Liverpool! This is an unexampled fact, if it were so, that produce should fall at the place of exportation before it was known that prices had diminished at the market of sale! The fact might well be so, owing to the failures of our own merchants, and the total want of exchanges at home. I have endeavored to obtain accurate information as to this fact. I have only the information, however, contained in Mr. Raguett's communication in the National Gazette of the 14th of September last, under the signature of "An Examiner;" and a letter from an intelligent gentleman of Philadelphia to a friend assures me that "the heavy failures in New Orleans [Herman, Briggs, & Co., &c.] took place about the end of February, or the 1st or 2d of March. This was shortly before the bad news was received from Liverpool."

But, sir, there were other causes of this catastrophe, proceeding from the action of the Government, besides the increase of banking capital, circulation, loans and discounts, besides foreign and domestic debts, and the other causes enumerated in the message. Besides the importation of some ten millions of silver dollars from abroad, which commenced with the removal of the deposits in October, 1833, and continued until July, 1834, and "which would not have been imported in the ordinary course of trade," and which, in part, increased the issues, loans, and discounts of banks, and the debts consequently of individuals, I proceed to enumerate the "gold bill" as one of the most prominent acts of "the Government" which caused pressure abroad as well as at home. I voted for that bill, and therefore owe an apology for my vote. The best apology I can make is the only one which the friends of the administration can make for it—I ask forgiveness, for I knew not what I did! The party and the President were bent on the glory of gold; to increase its amount in the country was "a part of the system." I could not, at the time, see how the exchange in part of a silver for a gold basis would injure us, though I confess I did not understand how it was to benefit the country, and I was anxious that the administration should have no excuse left for the failure of the experiment if it should fail, as it has. It is singular enough that more than one means which were selected to make the experiment successful and permanently efficient, have contributed most signally to its failure. So did the gold bill. The manner in which it has done so is clearly demonstrated in the 2d No. of "An Examiner." (See National Gazette of April 8, 1837.)

"Suffice it to say, that a more unfortunate measure for the country could scarcely have been devised, as I will now endeavor to make apparent.

"By the mint regulations of 1791, the relative value

Oct. 13, 1837.]

Sub-Treasury Bill.

[H. OF R.]

between pure gold and pure silver was assumed to be 1 to 15; that is, one ounce of pure gold was assumed to be the equivalent of fifteen ounces of pure silver, and according to this proportion were the gold eagles and silver dollars, and their fractions regulated. For some years our currency was composed partly of gold and partly of silver; but it so happened that, prior to the year 1818, the relative value of these two metals had undergone a change in the general market of Europe, so that one ounce of gold could readily be exchanged for more than fifteen ounces of silver. The consequence of this was, that whenever coin was required to be exported to Europe, gold was sent in preference to silver; and this exportation continuing until the year 1822, scarcely a gold coin was, at that period, left in circulation. Even the gold which was subsequently produced in the Southern States went abroad in search of its equivalent.

"By this disappearance of gold, the currency of the United States became virtually a currency of silver. Silver dollars and their fractional parts were the coins universally employed. As the basis of a banking system, they had all the value of gold; and, if their portability was not as great, they were far more convenient than gold to the great mass of the people in the ordinary transactions of life. But this was not all. The currency of the United States was placed in a state of independence as regards the currency of Great Britain, which was of gold; so that each country, in the management of its banking system, had only to look to itself. An expansion or contraction of the paper currency of either country had but a trifling influence upon the currency of the other, and the commercial prosperity of neither was placed at the mercy of the other.

"One remarkable proof of the truth of this position is to be found in the well-known fact that the great panic and pressure for money which, in the year 1825, brought the Bank of England to the verge of stopping specie payments, and absolutely compelled eighty private banks to suspend, was not felt in the United States as a general pressure for money, although many commercial disasters resulted from a fall in the price of cotton, in which article heavy speculations had been entered into. Another proof is to be found in the condition of Great Britain during the period of General Jackson's panic above referred to. Whilst we drew from her near four millions of silver dollars in the course of a year, it produced no pressure for money in the London market. The writer remembers noticing that fact at the time of its occurrence, and he is fortunate in being able to sustain it by evidence which will not be disputed. In the report of the Secretary of the Treasury, which has been heretofore assumed as authority for most of his calculations, there is a table giving 'the aggregate amount of notes circulated in England and Wales, by the Bank of England, by private banks, and by joint-stock banks and their branches,' at the following dates:

December 23, 1833,	when the amount was	£27,621,104
March 29, 1834,	do do	28,735,827
June 28, 1834,	do do	29,207,682

"The importations of dollars from England to the United States commenced in November, 1833, one month after the removal of the deposits, and continued until July, 1834, when the news of the passage of the gold bill reached that country; and yet we find that, between the 28th of December, 1833, and the 28th of June, 1834, the currency of England, so far from having been contracted in consequence of that importation, was positively increased more than seven millions and a half of dollars, estimating the pound sterling at \$4 80. This arose from the circumstance that silver dollars were, in England, mere articles of merchandise; and the abstraction of a few millions of them could produce no more effect upon the currency of Great Britain than the exportation of an equal value in iron or lead, dry goods or hardware.

"But this was not all. The steadiness of the English currency prevented a fall from taking place in the prices of cotton and other American produce, which would have occasioned great loss to the American shippers,* whilst, at the same time, it enabled British capitalists to extend relief to our merchants, by the acceptance of bills of exchange, or by shipments of specie.

"By the gold bill, enacted on the 28th of June, 1834, the relative value of gold and silver was changed so as to render an ounce of gold the equivalent of about sixteen ounces of silver. Another law was passed on the same day, declaring certain foreign coins a legal tender, one of the effects of which was to make the British sovereign, or gold pound sterling, equal in value to about \$4 87½ of American currency; and the joint effect of the two was to render gold the preferred metal on all occasions where importations of specie from Europe were called for by the operations of commerce. From the date of the passage of these laws, the shipments from Europe were ordered to be made in gold instead of silver,† and the consequence was, that this demand reaching the coffers of the Bank of England, the great repository of gold in Europe, produced an immediate effect upon the currency of Great Britain, by compelling the banks to contract their issues. Hence we find, by the Secretary's table, above referred to, that a contraction took place in the circulation of bank notes in England and Wales, so that, on the 27th of September, 1834, the amount was reduced to £28,591,112, and on the 28th of December to £27,729,828, being a diminution of upwards of seven millions of dollars.

"From these facts, supported by the documentary evidence of the Treasury Department, as well as by sound reason, it is manifest that the passage of the gold bills identified the British and American currencies, and rendered each forever thereafter liable to be influenced by the other. Expansions and contractions can now hardly fail to be simultaneous, and henceforth, more than at the period when the sentence was first pronounced by Mr. Gorham, in Congress, must it be true, that 'the barometer of the American money market hangs up at the Stock Exchange in London.' Overissues by the English banks cannot fail to excite overissues by the American banks; for, as Great Britain is the country in which almost all our exchange transactions with the world are concentrated, if the British standard of currency be depreciated below the metallic standard of the continent, we shall feel its effects in our currency, without being able to detect it. 'Shall feel,' did I say? We do already feel it; and there cannot be a question that our present pecuniary embarrassments have been greatly augmented by the operation of this cause, resulting from one of Gen. Jackson's 'humble efforts' to restore the constitutional currency.

"With these evidences before him of the practical oper-

* In support of this position, the writer is able to state that, having examined the prices of cotton quoted in commercial letters from Liverpool houses of the greatest respectability, he has found the highest quotations to have been as follows, at the dates respectively mentioned, for uplands of the best quality:

1833.	d.	1834.	d.
October 30	9	March 22	9
November 23	8½	April 23	9½
December 7	8½	May 16	9½
December 31	9½	June 7	9½
1834.		July 8	9½
January 4	9½	August 23	9½
February 24	9	September 30	9½

† The aggregate amount of gold coin and bullion imported during the year ending on the 30th September, 1834, was \$3,766,172, of which \$1,922,960 came from England, and \$824,673 from France.

"The aggregate amount of gold imported during the year ending on 30th September, 1835, was \$2,235,196, of which \$1,066,105 came from England, and \$1,169,091 from France.

"It is probable that nearly the whole of this gold was imported within the last six months of the year 1834, under orders given after the passage of the gold bill, and before the country had recovered from the shock which led to the importation of coin. There was exported during this same year, in gold, \$255,679, probably during the last six months of the financial year.

H. OF R.]

Sub-Treasury Bill.

[OCT. 13, 1837.]

ation of a law which was capable of producing the most disastrous results, General Jackson, had he understood the subject, would have abstained from any active participation in rendering it more mischievous and fatal than the ordinary operations of commerce would have rendered it. But not so. Carried away, in the pursuit of his *ignis fatuus*—his 'constitutional currency'—he arrogated to himself the right, by the arbitrary exercise of his executive authority, of imposing a tax upon the owners of the French indemnity. Those citizens were entitled by treaty to the full amount of the sum stipulated to be paid by France, without any deduction whatever, either for the purpose of glorifying General Jackson, or for the purpose of enabling him to pursue his favorite *Jack o' Lantern*. They were also entitled to their money without a moment's unnecessary delay, and the manifestly plain course which justice demanded to be pursued was, to have given each claimant a bill upon France for the amount of his claim, to be negotiated or collected in the mode which best might suit him. This course was urged upon the Secretary of the Treasury by some of the claimants, who proved it to be the cheapest and most prompt mode by which they could be placed in possession of their property; and it is evident that, had any of the claimants wished gold for his share, he could have imported it upon quite as favorable terms as the Government.* But no. The demands of justice weighed nothing in the scale, when opposed to the glory of 'the constitutional currency.' Orders were sent to France to transmit the amount of the four instalments of the indemnity paid in February, 1836, amounting to near four millions of dollars, in gold. To procure this quantity of gold, a draft was made upon the London market, which, if it did not create, at least assisted to augment, that pressure upon the British currency which commenced in April, and which every one knows has been continued, with occasional fluctuations, up to the 11th March, 1837, the date of the last advices, and which has been latterly augmented by the additional demand for nearly another million of dollars, the amount of the fifth instalment of the indemnity paid by France in February last. It is not pretended that the whole pressure on the English money market within the last year has been occa-

sioned by the last mentioned 'humble efforts' to restore 'the constitutional currency.' Other demands for gold have existed, amongst them one by the Bank of America, the principal deposit bank in New York, and one by the Bank of the United States, rendered expedient by the rapid return of her notes for payment in the early part of 1836, owing to the substitution in their place, throughout the Western and Southwestern country, of the notes of some of Gen. Jackson's three hundred and fifty-seven new banks. "Of the practical operations of these two 'humble efforts' upon the immediate interests of the citizens of the United States, it behooves us now to speak.

"The contraction of the British currency, as every intelligent observer knows, has been to create a pressure for money in England, which has produced the following results:

"1. The market rate of interest has been advanced from $2\frac{1}{2}$ to 5 per cent. per annum on first rate commercial paper, which has had a tendency to keep money in England which would otherwise have sought investment in the United States.

"2. British merchants are prevented from accepting, with their accustomed freedom, the bills of exchange drawn upon shipments of American produce.

"3. British capitalists are less able than before to make advances, or loans on the security of American stocks, which cuts off a large source from which capital has been heretofore supplied for our various internal improvements.

"4. British manufacturers are less able than heretofore to give credit to such of our importing merchants as require it.

"5. The price of cotton has fallen, since the first of January last, four or five cents a pound, in England, by which American shippers will lose twenty or twenty-five per cent. upon the stocks gone forward, and by which our cotton planters will be deprived of a corresponding or a greater amount, as the fall of prices at the South has already made evident.

"And now it only remains for us to inquire how have these 'humble efforts' tended to restore 'the constitutional currency?' Has the importation of thirty millions of gold and silver pushed any paper out of circulation? So far from it, the amount of paper has augmented, as we have shown, to an incredible amount. The banks all seem to have acted upon the principle that their power to emit and keep their notes in profitable circulation was just in proportion to the specie they had on hand, and accordingly we have seen that, just in the measure that General Jackson supplied them with one million of dollars in coin, they supplied the public with three millions of dollars in paper. So much for the soundness of this 'constitutional currency;' and now for its uniformity.

"On the 2d of January, 1830, when General Jackson, in his message to Congress, in reference to the Bank of the United States, said that 'it must be admitted by all that it has failed in the great end of establishing a uniform and sound currency,' the rates of domestic exchange were as follows, as appears from the New York shipping and commercial list:

Richmond,	1 per cent. discount.
North Carolina,	2 to $2\frac{1}{2}$ do.
Charleston,	$1\frac{1}{2}$ to 2 do.
Savannah,	$1\frac{1}{2}$ to 2 do.
New Orleans,	1 to $1\frac{1}{2}$ do.

"The rates on the 4th of March, 1837, the day after General Jackson wrote his farewell address, as quoted by the same authority, are as follows:

Richmond,	1 to $1\frac{1}{2}$ per cent. discount.
North Carolina,	$2\frac{1}{2}$ do.
Charleston,	$2\frac{1}{2}$ to 3 do.
Savannah,	$2\frac{1}{2}$ to 3 do.
New Orleans	3 to 4 do.

*"Exchange on Paris at New York, for a bill at 60 days' sight, between the 2d of March, and the 15th of June, 1836, fluctuated from what is called 5.25 to 5.40, making an average of 5.324. The par exchange on Paris is about 5.35; that is, one dollar of American currency is equivalent to 5 francs and 35 centimes, or one-hundredth parts of a franc. The exchange then was, at the period mentioned, half per cent. above par; which, added to one per cent. which a bill at sight, such as the Government had a right to draw, and perhaps half per cent. for the superior security of a Government bill over a private bill, would make about two per cent. that the claimants would have received beyond the amount of their claims. It is true that the exchange upon France might have fallen something in consequence of the increased supply of bills, but this could not have equalled the loss which the claimants sustained by the delay to receive their money, which was not paid until July, and which was then subject to a deduction for the expenses of freight, insurance, and commissions incident to the importation of the gold.

"The best commentary, however, upon the folly of these importations is to be found in the following article, which is copied from the Washington Gl be of the 1st of April:

"NEAPOLITAN INDEMNITY.—The last New York American contained the following:

"The Bank of America will also draw their bills on the Rothschilds, of Paris, for upwards of a million of francs."

"The above sum, which the Bank of America proposes to draw for, is, we presume, on account of the next instalment falling due under the Neapolitan treaty.

"The bank having, as we learn, an open credit to a large amount upon the Rothschilds, but being unwilling to avail of it, under existing circumstances, suggested that the next instalment, to be paid in May or June, might be anticipated under that credit.

"The Secretary of the Treasury, we are informed, finding that the interest of the claimants, in the present state of things, would be promoted by availing of the present high rate of exchange, over any other mode of bringing home the funds, and that, to the extent of the same, they might be used to relieve the community, unhesitatingly assented to the suggestion, and directed the Messrs. Welles, the agents for receiving the indemnity, to pay it over to the Messrs Rothschilds as soon as received, to reimburse them for the bills drawn in anticipation of its receipt.

"It is for this sum, and upon this arrangement, we presume, the Bank of America proposed to pass the bills on Paris."

Oct. 13, 1837.]

Sub-Treasury Bill.

[H. OF R.]

"Let these two tables speak for themselves.

"And now, reader, with all these proofs before you, of the total failure of all General Jackson's schemes of finance can you read the following passage in his farewell address, without asking yourself whether he was really in earnest?

"My humble efforts have not been spared during my administration of the Government to restore the constitutional currency of gold and silver, and something, I trust, has been done towards the accomplishment of this most desirable object."

AN EXAMINER."

In addition to these causes, set in operation by the Government, came the celebrated Treasury order or circular of July 11, 1836. This circular enacted, by Executive order, that after the 15th day of August, 1836, the receivers of public money and the deposit banks should receive in payment of the public lands nothing but gold and silver, and in the proper places Virginia land scrip. Frauds, speculations, and monopolies, in the purchase of the public lands, and excessive bank credits, were made the pretext of this extraordinary measure, when these frauds, speculations, monopolies, and excesses of every description, had been known for a long time to the administration, and participated in particularly by "the party," from the removal of the deposits to the moment when General Jackson was aroused vindictively to prevent the deposits with the States, directed by the deposit act of June, 1836. Whatever other difference of opinion there may be as to the effects of this order, all will agree that it removed the specie of the country from the large importing cities and the most important places of trade, and placed it in the "far West," where it was locked up in the land offices or Western deposit banks, and rendered unavailable to commerce and to the wants of trade in an anomalous period of unexampled plenty and pressure! The gentleman from South Carolina, [Mr. LEGARE,] as I understand, admits this effect of the circular, and that it accelerated a revulsion, the scarcity of which the President says none had correctly anticipated. Had the specie of the country been permitted by the Government to remain where trade required it to be, none can say that the same extent of ruin would have been felt, or that it would have been felt so soon.

Such sir, are some of the "antecedent causes" whence "overaction" derived "its first," and I may add, its last "impulses!" Forsyth, I had nearly omitted one cause, enumerated by Mr. Secretary Woodbury, which the President, in his wisdom, entirely overlooked—the over-production of cotton! The over-production of cotton!—there is an example of a financier for you! Oh! rare Levi! Much more wisely had he spoken, if he had, in ascribing the causes of our disasters, enumerated the potent reason that we had at the head of the Treasury Department a financier who regards the products of labor and industry as causes of national poverty and bankruptcy! A head that has not been wool-gathering, but picking cotton!

In the comparison of our condition with that of other countries, the President admits that "the most material difference between the results in the two countries (United States and Great Britain) has only been, that, with us, there has also occurred an extensive derangement in the fiscal affairs of the Federal and State Governments." Ay, sir, there is the rub! Why has there not been in England and in France the same extensive derangement in fiscal affairs as in the United States, whilst there has been, according to the message, "the same redundancy of paper money and other facilities of credit; the same spirit of speculation; the same partial successes; the same difficulties and reverses; and, at length, nearly the same overwhelming catastrophe?" Is it because our finances have not been managed so well, that we have had Levi at the helm, or that we had not, as France and England had, the great conservator, the life-preserver, a national bank? Sir, this "material difference" is owing to both reasons. We deprived our-

selves of the means of preserving credit, disabled the ship before the storm came on, shipped an incompetent crew, and a worse pilot; and when the hurricane came—as hurricanes in trade will come as certainly as storms on the ocean—it swept over us at mercy—struck the ship of State down on her beam ends—dismasted, and leaking—and there she will lie, with hope only to aid her until the despairing mariners, now standing on her sides with spy-glass in hand, shall discover far out upon the "dim distant sea" a speck of sail sent by Providence alone to right ship, and save all hands from a watery grave! Strong canvass, new rigging, ballast and compass, and skilful crew and pilot, will not prevent the storm, but they alone can save the ship from the tempest when it blows. So with a national bank and other means of regulating finance and currency—they cannot prevent the vicissitudes of trade and commerce, or wholly arrest their ravages and disasters, but they can save us from despair and death! The report of the Bank of France proves this at this moment. That nation was not only guarded from death and despair, but restored to health, and sustained in actual prosperity, by sustaining a national bank, whilst we have been nearly destroyed by destroying one.

But, why trace the causes of this revulsion in our affairs? Sir, the administration knew from the first that the State banks were unsound. In proof of this I refer you to the letter of Mr. Taney, of the 15th of April, 1834, pages 4 and 5. He says:

"If the estimate I have made of the proportion between the paper circulation and the specie in possession of the banks be correct, or nearly so, the condition of the currency is obviously such that the nation should not be content with it, nor desire to continue it in its present state. It is an immense superstructure of paper, resting on a metallic foundation too narrow to support it. It has never been sustained by its own inherent strength, but by public confidence. When every one firmly believes that the notes of the banks will, on demand, be paid in coin, they will readily circulate, and answer all the purposes of money. But the moment that confidence is impaired, they lose their value as a part of the circulating medium, and are returned upon the banks for a redemption in specie, and the disproportion between the paper circulation and the coin prepared to redeem it is so great, that it is constantly liable to have its chief support, public confidence, withdrawn from it."

I refer, also, to a statement of the condition of the local banks, furnished about the same time by the Hon. R. H. Wilde, of Georgia, and printed by order of the House of Representatives in the session of 1833-'34. Thus, sir, the administration knew from the beginning that these agents, the local banks, could not stand the shocks of trade. The President himself says, "that the prospect of revulsion was present to the minds of considerate men before it actually came." Why was no warning given, no preparation made? Were our rulers not "considerate men?" Is it not true, as I have shown, that up to the fourth day of March last they were still crying in the night-watch, "all is well?" Sir, they knew of these causes, and they intended their effects! No matter what are the causes, the ruin is here! and the administration designed to bring it upon the country for the diabolical purpose of establishing upon this ruin a Treasury bank!

Yes, sir, the very result of all these causes of mischief, whatever they may be, is now proposed as the second system—another experiment! This result is what has been aimed at all the time—the final triumph of Executive power—the total ruin of the liberties of the country—the complete union of the "purse and sword!" In the very midst of our calamities and misfortune, we are told to take up the very condition of distress into which we have been thrown by mismanagement and corruption, and to organize it into a permanent system of finance—ay, sir, from

H. of R.]

Sub-Treasury Bill.

[Oct. 13, 1837.]

one quarter, not the most inconsiderable and uninfluential source of these mischiefs, we have heard boasting and exultation at the calamities of the country. A letter written from St. Louis, August 11, 1837, signed by Big Bully Bottom, Tom Benton, "congratulates" the party in Ohio "on the success of General Jackson's endeavors to improve the condition of the currency!" Sir, that man is misunderstood—that letter does not embody impudence and effrontery so much as it sets forth the real feelings, and shadows the designs of those in power—he knows their secrets—to force upon us now the execrable end of policy which they have always aimed at—to make the Government a bank, and the President of the United States and "the party" its "President, Directors, and Co.!" This is not the desperate courage or bravado of a ruffian, who is forced to brave every danger in the last extremity, but it is the chuckling of a fiend who has really reached the diabolical end he aimed at over the distresses and sufferings and ruin of a whole people! He knows that the danger now is not the re-establishment of a national bank, but that a revolution in the Government is already effected by forcing a "scourged country" and an "humbled democracy" into a system of sub-treasuries which will subvert all our ancient institutions, and laugh this republic to scorn! Above all the passages in the message—except one, which I shall presently notice—the most pharisaical and insincere, is that in which the President says he is "sensible that adequate provisions for these unexpected exigencies could only be made by Congress; convinced that some of them would be indispensably necessary to the public service, before the regular period of your meeting; and desirous, also, to enable you to exercise, at the earliest moment, your full constitutional powers for the relief of the country, I could not, with propriety, avoid subjecting you to the inconvenience of assembling at as early a day as the state of the popular representation would permit. I am sure that I have done but justice to your feelings in believing that this inconvenience will be cheerfully encountered, in the hope of rendering your meeting conducive to the good of the country."

Sir, why was Congress called at all? Does it matter whether we act at all? Has the President not put the system in operation, and is it not in full blast? Yes, sir, by the fiat of the Executive, by a single "circular" from the Secretary's pen, is the sub-Treasury system called into being, full formed and perfect. See, sir, see with what despatch, with what unity and simplicity of action, one will controls already the destiny of this nation. See this circular, and know the will of your master:

"Circular to receivers of public moneys.

"TREASURY DEPARTMENT, May 12, 1837.

"If the bank where you deposit should suspend specie payments, you will keep in your own hands safely the public money you have in possession, or may hereafter receive, till further directions are given to you by this Department how to deposit, transfer, or pay it, or any portion of it.

"You will report to this Department weekly the amount on hand.

LEVI WOODBURY,

"Secretary of the Treasury."

By this simple instrument—a circular!—have magic changes been wrought in the form and policy of our Government; it has, by such means, been truly made a "simple machine!" After having done the deed, and put the system into full operation, then Congress is called, not to deliberate, not for consultation, but to register Executive edicts, or to adjourn! He proceeds:

"For the deposit, transfer, and disbursement of the revenue, national and State banks have always, with temporary and limited exceptions, been heretofore employed; but, although advocates of each system are still to be found, it is apparent that the events of the last few months have greatly augmented the desire, long existing among the peo-

ple of the United States, to separate the fiscal operations of the Government from those of individuals or corporations."

How long, I would inquire, sir, has this desire "to separate the fiscal operations of the Government from those of individuals or corporations" existed? Not longer, surely, than since the 4th day of March last. Sir, what said Mr. Taney, on the 15th of April, 1834? (See his letter to the Committee of Ways and Means, pp. 9, 10.) After saying "the State banks are now so numerous, and are so intimately connected with our habits and pursuits, that it is impossible to suppose that the system can ever be entirely abandoned—nor is it desirable that it should be"—he proceeds:

"If there were no State banks, the profitable business of banking and exchange would be monopolized by the great capitalists. Operations of this sort require capital and credit to a large extent, and a private individual, in moderate circumstances, would be unable to conduct them with any advantage. Yet there is, perhaps, no business which yields a profit so certain and liberal as the business of banking and exchanges; and it is proper that it should be open as far as practicable to the most free competition, and its advantages shared by all classes of society. Individuals of moderate means cannot participate in them, unless they combine together, and by the union of many small sums create a large capital, and establish an extensive credit. It is impossible to accomplish this object without the aid of acts of incorporation, so as to give to the company the security of unity of action, and save it from the disadvantages in the frequent changes in the partnership, by the death or retirement of some one of the numerous partners. The incorporated banks, moreover, under proper regulations, will offer a safe and convenient investment of small sums to persons whose situations and pursuits disable them from employing the money profitably in any other mode. It is not more liable to be lost when vested in the stock of a bank, than when it is loaned to individuals. The interest on it is paid with more punctuality, and it can be sold and converted into cash, whenever the owner desires to employ it in some other way. And if a larger portion of the metal is infused into the circulation, the business of banking will become more sound and wholesome, and less liable to the disasters from which it has suffered, under our extravagant and ill-organized system of paper issues. It will render investments in banking companies entirely safe and secure to the holders, and afford them the almost absolute certainty of a reasonable profit, without endangering the capital invested in it.

"For these reasons, it is neither practicable nor desirable to discountenance the continuance of the State banks. They are convenient and useful also for the purposes of commerce. No commercial or manufacturing community could conduct its business to any advantage without a liberal system of credits, and a facility of obtaining money on loan when the exigencies of their business may require it. This cannot be obtained without the aid of a paper circulation founded on credit. It is, therefore, not the interest of this country to put down the paper currency altogether. The great object should be to give it a foundation on which it will safely stand. A circulating medium composed of paper, and gold and silver, in just proportions, would not be liable to be constantly disordered by the accidental embarrassments or imprudences of trade, nor by a combination of the moneyed interest for political purposes. The value of the metals in circulation would remain the same whether there was a panic or not, and the proportion of paper being less, the credit of the banks could not be so readily impaired or endangered."

What said Mr. Woodbury in December of the same year? (See the report of the Secretary of the Treasury "On the present system of keeping and disbursing the public money." December 12, 1834.)

OCT. 13, 1837.]

Sub-Treasury Bill.

[H. OF R.]

"With the causes of these last and most important failures happening from time to time, as the table shows, to the very last year, this branch of our inquiry has no particular concern except to discriminate them from others, and from any special connexion with the system that prevailed from 1811 to 1816. Whether they arose from an unsound policy pursued by the United States Bank, or from circumstances which, under the paper system, neither legislation nor caution can always avert, or from less justifiable reasons, and in spite of all the salutary influence the national bank could exercise, it is a singular fact, in praise of this description of public debtors, the selected banks, that there is not now due on deposits, from the whole of them which have ever stopped payment, from the establishment of the constitution to the present moment, a sum much beyond what is now due to the United States from one mercantile firm that stopped payment in 1825 or 1826, and of whom ample security was required and supposed to be taken under the responsibility of an oath."

"If we include the whole present dues to the Government from discredited banks, at all times and of all kinds, whether as depositories or not, and embrace even counterfeit bills, and every other species of unavailable funds in the Treasury, they will not exceed what is due from two such firms. Of almost one hundred banks, not depositories, which, during all our wars and commercial embarrassments, have heretofore failed in any part of the Union, in debt to the Government, on their bills or otherwise, it will be seen, by the above table, that the whole of them, except seventeen, have adjusted every thing which they owed, and that the balance due from those, without interest, is less than \$82,000. Justice to the State banking institutions, as a body, whose conduct in particular cases has certainly been objectionable, but whose injuries to the Government have been almost incredibly exaggerated, and whose great benefits to it, both during the existence of our two national banks, and while neither of them existed, have been almost entirely overlooked, has led me to make this scrutiny, and submit its results, under a hope that it will, in some degree, not only vindicate them from much unmerited censure, but justify this Department for the confidence it formerly, and, in the great improvement of their condition and of the financial affairs of the Government, has recently reposed in them. Under these circumstances, so very favorable, with the new security and examinations provided for, if our former small losses by them, in keeping and paying over the public revenue, under circumstances so very adverse, are compared with our large losses, either in collecting or disbursing that revenue, their present safety seems to be as great as is consistent with the usual operations of the paper system, or with the credit which must always be intrusted by Government, in some way or other, to agents of some kind in keeping the public money. In considering their safety, it should be constantly recollected that the owners and managers of banks, when properly regulated by legislative provisions in their charters, are, like other individuals, interested to transact business securely; are desirous of making, and not losing, money; and that these circumstances, with the preference in case of failure belonging to depositors and holders of their bills over the stockholders, united with the security, if not priority, given to the Government, render them, in point of safety, generally much superior to individual agents of the United States. It is to be further remembered that many of the former losses occurred indirectly and remotely from war and embarrassments, affecting deeply the whole community as well as banking institutions, and from the injurious influence of which calamities, banks, whether of State or United States origin, can never claim a full exemption; that the correct principles of banking were at that time less generally understood and practised than at the present time; that the selected banks, by the course of our expenditures

and collections, were then exposed to more onerous duties and hazards; and that less full information of their true condition was then possessed by this Department."

Such were the views of both Secretaries, and the only heads of the Treasury Department since the removal of the public deposits in 1833. In 1835, General Gordon, of Virginia, made his celebrated proposition in the House of Representatives, to receive nothing but gold and silver in payment of the public dues, and to make the receivers of public money its depositories. Sir, it becomes me to give the history of that proposition. At the time it was made, the bill to regulate the deposit and safe-keeping of the public money was before the House, and then, too, the din of jingling promises to give us a hard-money Government, a metallic currency, and a circulation of gold, was almost deafening. I knew the promises were false and the professions were hollow then. I knew that the administration could not, if it would, do what it professed, and I was anxious only that its inability and weakness and "humbugery" might be made manifest before its measures brought upon the country this present crisis which I then foresaw. With my colleague, General Gordon, the proposition was sincerely made. He was opposed to the constitutionality of the Bank of the United States, and distrusted the system of employing the local banks as depositories. He came to me with his scheme, and asked if I would vote for it. I told him, at first, that I would not; that it was as objectionable to me, even more so, than the other measure; that I had no scruples about the constitutionality of a national bank: and I thought then, as I think now, that it alone could insure the safety of the public money, and restore our finances and currency to a healthy and sound condition. But there was no prospect of a recharter of a United States bank, and I was forced to vote for or against the only other two measures to be adopted. He asked me, as an act of courtesy to him, to vote to let his proposition in. I consented to vote for its introduction into the House, warning him that I should finally vote against its passage if it was likely to succeed. I voted afterwards for it, on the main proposition, as many of the opposition members did, simply to show that the administration did not desire what they then professed, as now, to separate the fiscal operations of the Government from those of individuals or corporations! I knew that "the party" and that the then powers would not sustain the proposition, or I should have voted against it. It then required but few administration votes to carry the measure; but behold! as I calculated, they voted against it to a man! The vote on the proposition of General Gordon then proves, if it proves any thing, that there was no such desire, as the President says, has existed for a long time on the part of the Government, in the spring of 1835! It would be as easy to show, sir, that there was no such desire expressed as late as the 4th of March, 1837. The gentleman from South Carolina, [Mr. PICKENS,] however, is right; the proposition to separate the Government from the banks, and to destroy all banking institutions, is not new; it originated with Fanny Wright; but the desire which the President describes has continued for a long time only with that part of "the Government" ycleped Thomas Hart Benton. The great expunger and humbugger was the first to introduce the locofoco doctrines into Congress, and to give them character before the nation; and let me tell my friend from South Carolina, [Mr. PICKENS,] that he will be deceived who thinks to deprive Benton of his hobby—that if these destructive doctrines are to come into vogue and in favor with a majority of the people, Benton is as much identified with them as Thomas Jefferson was with the doctrines of '98, and he, (Benton,) and no other man under the sun, will ride into power on their popularity!

But, sir, however old this proposition to divorce the Government from all banking corporations may be, there is a

H. OF R.]

Sub-Treasury Bill.

[Oct. 13, 1837.]

doctrine new under the sun contained in this notable message. The President expressly refrains from suggesting to Congress "any specific plan for regulating the exchanges of the country, relieving mercantile embarrassments, or interfering with the ordinary operations of foreign or domestic commerce, from a conviction that such measures are not within the constitutional province of the General Government, and that their adoption would not promote the real and permanent welfare of those they might be designed to aid." He says the accommodation to domestic exchanges "is now, indeed, after the lapse of not many years, demanded from it (the Government) as among its first duties," &c. When was this accommodation not demanded of the Government as among its first duties? Certainly, to afford this very accommodation was among the most oft-repeated, though oftener violated promises of General Jackson's administration, from the removal of the public deposits, in 1833, up to the 4th day of March last. Every message of President Jackson, from the one period to the other, and every report of his respective Secretaries, as well as the numerous circulars of the Treasury Department, the reports of the Committees of Ways and Means in this House, and other documents, will show that the currency of the country at large, its domestic exchanges, its commerce, and all its monetary interests, were taken especially under the guardian care and protection of this same most beneficent Government, which then promised us a better currency, and now tells us we must not look to the Government "for too much!" Surely, sir, the present incumbent is not about to falsify his promise to "follow generally in the footsteps of his illustrious predecessor;" or does he mean to follow them as my young friend from Tennessee [Mr. CROCKETT] felicitously expresses it, "by taking the back tracks?" Sir, it is profitable now to recur to the wholesome doctrines of the preceding administration respecting the duties and powers of this Government in relation to a sound and uniform currency. (See Executive documents, 1833-'34, No. 2, pages 5, 6, 10, 11.) In this report of Mr. Taney, after insisting "that the interests of the country would not be promoted by permitting the deposits of the public money to continue in the bank until its charter expired," he says:

"Besides, the principal circulating medium now in the hands of the people, and the one most commonly used in the exchange between distant places, consists of the notes of the United States Bank and its numerous branches. The sudden withdrawal of its present amount of circulation, or its sudden depreciation before any other sound and convenient currency was substituted for it, would certainly produce extensive evils, and be sensibly felt among all classes of society. It is well understood that the superior credit heretofore enjoyed by the notes of the Bank of the United States was not founded on any particular confidence in its management or solidity. It was occasioned altogether by the agreement on behalf of the public, in the act of incorporation, to receive them in all payments to the United States; and it was this pledge on the part of the Government which gave general currency to the notes payable at remote branches. The same engagement in favor of any other moneyed institution would give its notes equal credit, and make them equally convenient for the purposes of commerce. But this obligation on the part of the United States will cease on the 3d of March, 1836, when the charter expires; and, as soon as this happens, all the outstanding notes of the bank will lose the peculiar value they now possess; and the notes payable at distant places become as much depreciated as the notes of local banks. And if, in the mean time, no other currency is substituted in its place by common consent, it is easy to foresee the extent of the embarrassment which would be caused by the sudden derangement of the circulating medium."

He then promises that "the State banks can furnish a

circulating medium quite as uniform in value" as that of the United States Bank—"probably more so;" and afterwards states "the condition of the mercantile classes at the time of the removal, to explain why it was impossible to postpone it even for a short period." These views of the Secretary were confirmed and supported, of course, by the report of the Committee of Ways and Means, made to the House of Representatives, March 4, 1834, precisely as the opposite views entertained by the present Executive are in like manner echoed by the same committee now. By-the-by, the question was asked in 1834, why the then Committee of Ways and Means was like a tadpole? It was little at both ends (two certain gentlemen being at the two ends, the one at the head, the other at the tail) and big in the middle, (Binney and Wilde being there.) The report of that date says:

"There appears also to be much force in the considerations urged by the Secretary, connected with the currency of the country and the domestic exchanges. The notes of the Bank of the United States must necessarily, in a short time, be withdrawn from circulation. That the principal currency of the country, for many years to come, will be bank notes, there is no reason to doubt; and it is certainly good policy to foster the State banks which furnish them, in measures tending to give them as general credit as has heretofore attached to the notes of the United States Bank and branches. That the natural and ascertained course of trade, circulation, and exchange, connected with the interests of banking institutions, will ultimately produce this result in relation to the notes of the principal State banks, there is every reason to anticipate; but their employment in the business of the Government, by awakening them to their capacities and interests, is calculated to hasten the consummation of so desirable an event. It was a matter of no small moment to encourage and hasten the State banks in maturing their system of circulation and exchange, so that at the termination of the charter of the Bank of the United States, the trade of the country might not encounter, at the same time the loss of a general currency, and the entire breaking up of the domestic exchanges, a partial interruption of which by that bank is now producing such serious inconvenience. By the latest returns of the banks employed by the Government, it appears that they are already rapidly taking the place of the Bank of the United States in the exchange operations."

See, also, Mr. Taney's letter of the 15th of April, 1834, already in part quoted, *passim*.

Mr. Secretary Woodbury, in his report to Congress, December, 1834, says: "The wealthy and commercial, for whose benefit chiefly banks were instituted, will then chiefly use their bills, and suffer by them if forged or depreciated; while the laboring classes and men of small means will, by the justice and paternal care of the Government, generally be provided with a currency of hard money, not exposed to any risk of failures, and to be used for all dealings of such an amount as their daily or weekly wants may in most cases require."

See, also, the message of President Jackson to Congress, December, 1835, and the report of Mr. Secretary Woodbury, of the same date, (already quoted.) See, also, the message of the President and the report of the Secretary of the Treasury, December, 1836, (already quoted.) In addition to these documents, I refer, sir, for conclusive proof that General Jackson took the currency, domestic exchanges, and the circulating medium, wholly under the "paternal care of the Government," to the report of the investigating committee, of which my colleague [Mr. GARLAND] was chairman, made to the House of Representatives, March 1, 1837. See the letter of the six deposit banks of Philadelphia, New York, and Boston, to Mr. Taney, dated in October, 1833, Whitney's letter accompanying the same, and Mr. Woodbury's answer, Novem-

Oct. 13, 1837.]

Sub-Treasury Bill.

[H. or R.]

ber 4, 1834. Therein are to be found similar expressions to this:

"In proportion as this system shall be well digested and executed, will be the soundness and equality of value throughout the Union of the circulating medium; and upon it will depend the degree of convenience or inconvenience which will be felt by the public in consequence of the recent change."

I refer, sir, also, to an anonymous letter in the correspondence of Whitney with the deposit banks, dated November 8, 1834. I refer to the circulars of Whitney to the deposit banks, franked by Levi Woodbury, dated May 30, 1836, September 7, 1836, and December 7, 1836. And, sir, I appeal to my colleague [Mr. GARLAND] if it does not appear throughout the whole investigation that one of the principal purposes of Whitney's agency was to confederate and knit the banks together in one grand system of exchange? As a specimen, sir, of the whole business of the agency of Whitney and of the deposit banks, I will read a letter from him to John Bass, president of the Union Bank, Tennessee, Nashville, dated Washington, March 16, 1835:

"Sir: I am in receipt of your favor of the 23d ultimo. In reply to your request, I have to say, that the letter written by a person here high in the confidence of the Government, a copy of which I sent you with the other papers, gave you, in part, what it was expected the agent appointed by the deposit banks would attend to. I will, however, state, as fully as I can, the duties the agent feels as devolving upon him. He expects to perform precisely the same duty that he would if appointed by the Treasury to superintend the deposit banks generally. He will carefully watch the operations of each; endeavor to produce concert of action; make suggestions in relation to the operations of any which are calculated to lead to an improvement of the currency, or any which are necessary to preserve it from being affected by the operations or issues of any of the selected banks; aid and advise in establishing a system of domestic exchanges throughout the country, through the agency of the deposit banks, whereby the country shall reap all the advantages through such agencies that it ever did through the operations of the branches of the Bank of the United States.

"The agent will also feel bound to inform each deposit bank which employs him, at different periods, as nearly as he can from the estimates of the various Departments, of the probable amounts each one will be called upon to disburse within a given period; the amounts and times when they will be called upon to pay it over; and where transfers will be required to be made from one bank to another, for the purpose of meeting such calls; the banks from which, and the times when, such transfers will be made.

"Such a table is now being prepared, to embrace the next six months ending the 30th of September next. This will embrace the estimated expenditures of the War and Navy Departments, as well as the civil list; the States in which the same is to be disbursed; the probable time wanted, and the banks which will have warrants passed upon them.

"In fine, the agent will communicate to each selected bank that wishes it, any information which he may at any time think will be serviceable individually; as well as give that general superintendence to the operations of the whole, which is so necessary for the security of each, as well as for the promotion of the interest of the public generally.

"I am, with great respect, your most obedient servant.

"R. M. WHITNEY.

"JOHN M. BASS, Esq.

"President Union Bank, Tennessee, Nashville."

In addition to the documents on file here, I cite the circulars of the Treasury Department, published from time to

time during the last four years, and directed to the receivers of public money and the deposit banks. As specimens, I quote, first, a circular dated the 7th of July, 1834.

"TREASURY DEPARTMENT, July 7, 1834.

"SIR: As the public confidence in the banks selected by this Department for the public deposits has, on trial, increased, and the notes of most of them might become a very convenient medium for circulation in travelling, and the transmission of funds at a distance, if mutual arrangements were made between some of them for the redemption of each other's bills, I take the liberty to submit the following suggestions for your consideration:

"1st. Would it not be profitable to your corporation, as well as useful to the public, to make arrangements and issue bills to a limited amount, payable on their face either at your own bank or the bank with which you make the arrangement? This has already been done by some institutions, and, it is believed, with beneficial effects.

"2d. But, if this is not considered expedient, would it not be prudent to establish with certain banks a credit, mutual if you choose, to redeem and reissue a certain amount of each other's bills as they may be needed for the purposes before mentioned? This might be so arranged as to expose you to little expense or risk; and, the fact being known, would extend your circulation at a distance, and often furnish, it is trusted, a currency for travelling and transmission of funds, very safe, convenient, and advantageous.

"Any aid that this Department could lend to you in perfecting such arrangement, by transfer drafts or otherwise, consistently with its powers and the public interests, will at any time be cheerfully granted.

"I remain, very respectfully, your obedient servant,

"—— Secretary of the Treasury.

"The PRESIDENT of the ——."

On the 27th of January, 1835, the following circular was issued:

"TREASURY DEPARTMENT,

"Washington, January 27, 1835.

"SIR: Finding that my circular of the 13th December last has not, in all instances, been fully understood, I beg leave to state, that it is the wish of the Department to be enabled to present a correct statement of all the domestic exchange operations of the selected banks. For this purpose, I have to request that your statements, semi-monthly, hereafter, give the whole of your operations, whether in drafts on other places purchased, notes payable in other places discounted, or either, collected. The latter to be brought into the statement after they are carried to the credit of the individuals for whom collected, together with the rates in all cases, &c. Some of the banks have supposed that the request of the 13th ultimo was not intended to embrace paper collected, payable out of the city. Where that has been the case, I have to request that all omissions of this description, since the 1st instant, may be added to the next return made to this Department.

"As before requested, I wish a statement of all drafts or checks drawn by the bank, payable any where out of the place in which the bank drawing is located, together with the rate, &c.

"As early as convenient, after the receipt of this, I will thank you to forward to this Department a statement of the places upon which your bank collects or purchases domestic exchanges, together with a tariff of the rates charged, exclusive of interest. I will also thank you to state the extent, geographically, to which it receives, on deposit, the notes of State banks, and particularly those of the selected banks; also, such as have made arrangements with you to redeem their notes, where any such arrangement has been made, as well as where arrangements may

H. OF R.]

Sub-Treasury Bill.

[Oct. 13, 1837.]

have been made with other banks for the redemption of your notes.

"I am, very respectfully, your most obedient servant,

"LEVI WOODBURY,

"Secretary of the Treasury.

"The CASHIER of the ——— Bank."

On the 6th of April, 1835, the following was issued:

"TREASURY DEPARTMENT, April 6, 1835.

"It is understood that the instructions from this Department to receive for the public dues only such State bank notes as the deposit banks are willing to credit at par, have been construed to authorize the receipt of such notes of any denomination. The undersigned considers it highly beneficial to the currency of the country and the safety of the banking agents employed in keeping the public revenue, that the more general use of specie for the small and ordinary transactions of society should be encouraged; and as the disuse of bank notes of a low denomination is believed to be the surest method to effect that object, and as the acts of Congress do not expressly require the receipt of any such notes, if less in amount than five dollars, you are hereby directed, after the 30th day of September next, not to receive in payment of any public dues bank notes of any denomination less than five dollars.

"You are also apprized that it is in contemplation by this Department, after the 3d of March, 1836, [should Congress in the meantime make no new provision on the subject,] to exercise the discretionary powers, which it is supposed will then belong to it, over the receipt of paper money of any denomination for the public revenue, and to extend the restriction on the receipt of bank notes for it, to all of a less denomination than ten dollars. For the greater security of the banking institutions employed by the Treasury, and for the improvement of the currency by the fuller restoration of that specie circulation for common purposes, which seems to have been contemplated by the constitution, it is intended then to make arrangements, if practicable, to discontinue the use of any bank as a fiscal agent which shall thereafter continue to issue notes of a less denomination than five dollars, and which shall, after some subsequent period, to be then designated, continue to issue notes of a less denomination than ten dollars.

"The course proposed to be pursued hereafter on this subject by the Treasury, is now indicated with a view to insure suitable notice of the changes contemplated."

On the 22d of February, 1836, the following was issued:

"To receivers of public moneys, collectors, disbursing officers, and the deposit banks of the United States.

"TREASURY DEPARTMENT,

"February 22, 1836.

"The established policy of the Treasury Department, so far as may be practicable, under its present powers over the collection, keeping, and disbursement of the public money, is to diminish the circulation of small bank notes, and to substitute specie, and especially gold, for such notes, with the view of rendering the currency of the country, through which its fiscal operations are performed, more safe, sound, and uniform. In pursuance of that policy, a circular was issued last April, which prohibited, after the 30th September, 1835, the receipt, on account of the Government, of any bank notes of a less denomination than five dollars; and which intimated that other steps to promote the desirable objects before named, would, in due time, be taken.

"Consequently, in further pursuance of the same policy, you are hereby required, after the 1st of May next, not to pay the demands of any public officer or creditor in bank notes of a less denomination than five dollars, and, except when it may be otherwise prescribed by law, after the 4th of July next, not to receive or pay on account of the Government any bank notes of a less denomination than ten dollars.

"All the deposit banks are requested to supply themselves with such a quantity of American gold coin as to be able to pay, and, when a public officer or creditor prefers it, and his demand does not exceed five hundred dollars, to pay at least one-fifth of such demand in that coin. It is also requested that the deposit banks will not, after the 4th of July next, issue any notes of a less denomination than five dollars; and that after the 3d of March, 1837, they will not, unless the subject be otherwise regulated by Congress, issue any notes of a less denomination than ten dollars. It is believed that the amount of gold, which by that time shall be coined at the mint, will be sufficient to admit of the convenient substitution of it for small notes in a much greater extent than at present; and it is deemed reasonable, that while the deposit banks have the use, without interest, of unusually large sums of the public money, they should make some further temporary sacrifices to obtain and circulate gold, and in other respects to enlarge the specie basis of our circulating medium. From these considerations, and from the liberal spirit evinced by most of the public depositories, in a late correspondence with them on this subject, it is confidently expected that, in this state of things, they will cheerfully comply with the above requests, and with all others which have been made by the Department, with a view of improving the currency; nor will it, I trust, be considered unjust or impolitic, while the deposit banks shall continue to enjoy great privileges from the Treasury, to regard a neglect or refusal by any of them to comply with those requests as sufficient cause for discontinuing the employment of such banks as fiscal agents.

"At a proper time it will be decided, under what circumstances, and at what periods, these restrictions on the agents and officers of the Treasury shall be extended to notes of any denomination under twenty dollars.

"This communication is made with the sanction of the President of the United States, and it is hoped that, till otherwise prescribed by Congress, or by this Department, these requirements and requests will be faithfully complied with by all the fiscal agents of this Department, and all the collecting and disbursing officers of the Government.

"LEVI WOODBURY,

"Secretary of the Treasury."

And, sir, on the 11th of July, 1836, the celebrated specie circular went forth, like a bull from the Vatican.

"To receivers of public money, and the deposit banks.

"TREASURY DEPARTMENT, July 11, 1836.

"In consequence of complaints which have been made of frauds, speculations, and monopolies, in the purchase of the public lands, and the aid which is said to be given to effect these objects by excessive bank credits, and dangerous, if not partial, facilities through bank drafts and bank deposits, and the general evil influence likely to result to the public interests, and especially the safety of the great amount of money in the Treasury, and the sound condition of the currency of the country from the further exchange of the national domain in this manner, and chiefly for bank credits and paper money, the President of the United States has given directions, and you are hereby instructed, after the 15th day of August next, to receive in payment of the public lands nothing except what is directed by the existing laws, viz: gold and silver, and, in the proper cases, Virginia land scrip.

"The principal objects of the President in adopting this measure being to repress alleged frauds, and to withhold any countenance or facilities in the power of the Government from the monopoly of the public lands, in the hands of speculators and capitalists, to the injury of the actual settlers in the new States, and of emigrants in search of new homes, as well as to discourage the ruinous extension of bank issues and bank credits, by which those results are

OCT. 13, 1837.]

Sub-Treasury Bill.

[H. OF R.]

generally supposed to be promoted, your utmost vigilance is required, and relied on, to carry this order into complete execution."

Such are some of the footsteps of General Jackson in taking care of the currency! Here we see a series of Treasury circulars, which were issued during the period of the last three years, coming up to the present fiscal year almost, all issued by the present Secretary of the Treasury, with the objects avowed on their faces, to make the notes of deposit banks "a convenient medium for circulation in travelling"—to extend circulation at a distance—to constitute a safe and convenient and advantageous mode of transmitting funds—to take accounts of exchange operations—to ascertain the geography even of notes received on deposit—to promote measures "highly beneficial to the currency of the country"—to raise the denomination of small notes to be issued, in order to circulate specie—to render the currency safe, sound, and uniform, as contemplated by the constitution—to require the banks to make sacrifices to this policy—to discourage the overissues of banks—taking trade, commerce, circulation, currency, bank notes, specie, the country, and all that is in it, under the full and complete jurisdiction of the Executive alone. And now, sir, are we coolly told that these measures are not within the constitutional province of the entire Federal Government! This is new! this is false! this is flagrant insult added to outrage! this is a total departure, I affirm, from the principles and policy of General Jackson; and that, I suppose, is capping the climax of enormities with his blind followers! The Federal Government cannot regulate currency and exchange, but it may prevent the overproduction of cotton! It cannot regulate currency and exchange, but it may take into its keeping the consciences and morals of the people! It cannot regulate currency and exchange, but it may pass bankrupt laws to put in durance vile every State corporation of the Union! Such are President Van Buren's first steps in the policy of the administration.

Sir, this doctrine is so new that the President, throughout this very message, except in those parts where he is expressly asserting this strange doctrine that the Federal Government has nothing to do with the currency of the country, forgets himself, and contradicts the position from the mere habit of his own mind to conceive the contrary. He speaks of "the embarrassments in the pecuniary affairs of the country diminishing the public revenue so much that the accruing receipts, with the reserved five millions, would not be sufficient to defray the unavoidable expenses of Government, until the usual session of Congress." And is it so, that the embarrassments of the country do thus embarrass the Government, stop its wheels, and yet the Government has not power to do the only thing on earth which can relieve itself from these embarrassments, and permanently prevent their recurrence—regulate the currency? Did "the difficulties experienced by the mercantile interests force them to apply for indulgence on duty bonds before the suspension of specie payments?" And yet has the Government, the collection of whose revenue is thus suspended or stopped, no power to afford facilities for the payment of its dues, or no power to secure their payment at all by some system, to strengthen commercial confidence, and enlarge the capacities of trade? Sir, the President himself, I repeat, speaks constantly in this message, of the policy of Government in relation to the currency of the country, as if there was, and should be, some policy of the kind. No one can read his message, and not see that he contradicts himself, and does not in reality entertain any such novel and absurd opinion as that a Government possessing the powers and duties which this does cannot take care that there shall always be a safe and sound circulating medium, and a sound condition of commerce, and abundant means of

trade, foreign and domestic, without which Government debtors cannot be sound or able, and without which the resources of revenue must always be meager, unstable, or exhausted. What, sir, are the duties of this Government and its powers? Congress shall lay and collect taxes, duties, imposts, and excises; it shall pay debts; it shall make all duties, imposts, and excises uniform; it shall regulate commerce with foreign nations, and among the several States, and with the Indian tribes; it shall establish uniform laws on the subject of bankruptcies; coin money and regulate the value thereof; provide for the punishment of counterfeiting the securities and current coin of the United States; declare war! raise and support armies! provide and maintain a navy! make all laws which shall be necessary and proper for carrying into execution the foregoing powers. And yet, sir, the President says it shall not, it cannot, provide the only means of executing any or all of these powers—the sinews of war, the security of peace—a sound currency for the country! Ay, but he says it may demand the "constitutional currency" for the Government! How can the Government demand specie, whilst the people have not specie to pay? Specie is no more a constitutional currency than good convertible paper. The provision in the constitution which makes nothing else but gold and silver a legal tender in payment of debts, does not require the Government to exact specie. It is only another provision of that wise instrument which guards the mode by which Congress shall regulate the currency, make it sound by basing it on specie, and make it safe and efficient by being easily convertible. Sir, the fact is, that the Executive has tinkered and cobbled the currency, until it is past mending. The Ex and the President have practised upon its health until the patient has died upon their hands, of their wretched quackery. Now they wish to give up its cure, or its resuscitation, as a bad job. Now their only refuge from political or professional disgrace is in saying it was ever immedicable by Government. After exerting all their power and their skill to make the currency better, now that it has become worse than was ever predicted by the regular practitioners, they insist that they never exerted, and never can exert, any power or skill in the case; for they never had either! Sir, as to power, they had too much to destroy; as to skill, they never had any to reanimate or to restore! God help a patient in such hands! Their want of skill and want of honesty in this case would constitute murder, if the patient were a human being whom they had destroyed, instead of the country and its private and public interests. Sir, it is impossible for Government not to interfere with the currency of the country. When it ceases to perform the functions of Government—when it ceases to raise, receive, keep, transfer, disburse revenue—when it ceases to use custom-houses and land offices, tax-gatherers and collectors—when it disbands its one hundred thousand styled officeholders—when it dismantles its navy, and disbands its standing army—when Congress ceases to sit, and the President no longer draws his salary—then, and not till then, may he say to the people, Pay what you owe the Government in specie; take what you can get from the Government, and get the specie as best you may; Government has nothing to do with the pockets of the people! Sir, you are not willing to bargain with the people to hold hands off; to agree that you will go to them for nothing if they will come to you for nothing. No, sir, if you will not collect yearly from the people some twenty or thirty millions of dollars, and expend more than you collect, they will not ask you to regulate the currency. They ask nothing more; when, where have they claimed of Government to "aid individuals in the transfer of their funds," or in the transportation of their merchandise? When or where have they asked Government "to make men rich, or to repair, by direct grants of money, or legislation in

H. of R.]

Sub-Treasury Bill.

[Oct. 13, 1837.]

favor of particular pursuits, losses not incurred in the public service!" Sir, though the Executive has reduced our people to beggary, by interfering with "individual concerns," most oppressively and cruelly and unconstitutionally, yet have they not come as "beggars" to their own Government—their own servants! All they demand is, in the language of this message, "a system of general laws commensurate with, but not exceeding, the objects of the establishment of good government; leaving every citizen and every interest to reap, under its benign protection, the rewards of virtue, industry, and prudence." But, what virtue can now withstand the corruption of "the Government!" What industry can now live under the present system of Government pillage? What prudence can now foresee or calculate the ruinous results of wild experiments! Virtue is cast to the dogs! Industry is rifled and picked! Prudence is baffled, and stands dismayed!

In the next place, sir, the President again attacks the Bank of the United States. Again is the dead monster pierced, and without doubt in time. This is now the fifth Executive missile, in four years, hurled against it! The United States Bank will be like a man hung by the neck until he is dead—dead—dead! But, sir, I am beginning to hope that, like Lazarus, though it stinketh, it will yet "come forth," with the grave clothes on. I see signs of its coming, and therefore I wish to prepare the minds of the people to see no spectre—no hobgoblin—no monster. In respect to that institution, sir, I join issue with the President and all its enemies in advance. And I do this, though unnecessary now, because on this subject I have no fears and no concealments. I am willing to trust the intelligence and the virtue of the people who send me here. I maintain, then: 1st. That a national bank is constitutional. 2d. It is expedient. 3d. It is the best friend, financial and commercial, especially of the South. 4th. And lastly, it is the best bulwark which can now, by law, be established in defence of the civil liberty of the country. All these propositions I am now ready to maintain to the uttermost.

A national bank is constitutional. Congress has the power to charter a bank corporation. Sir, let me here observe, that it is remarkable the President does not say in his message it is unconstitutional. His principal reason for not co-operating in the re-establishment of a national bank is, because "it would be to disregard the popular will,"—because he believes "a majority of the people to be irreconcilably opposed to that measure." Now, sir, this is ominous of what I have more than once predicted—if a majority of the people shall clearly and unequivocally express their will in favor of the establishment of such an institution, he will give it his sanction. Will he, who has lived and moved and had his political being in the breath of another man's popularity, and who is now vulgarly reiterating that man's disgusting demagoguism, ever dare to disregard the popular will when it shall come up, as it will, like the rushing of the mighty waters—"terrible as an army with banners?" No, sir, he will quail into his own utter helplessness! He is no hero to ride upon the whirlwind and direct the storm; and, sir, if Jackson himself were here again, the people would tell him—"Sir, your experiment has failed, we have been gulled and ruined!"

Sir, Congress has certain powers conferred upon it to be exercised, and certain duties imposed upon it to be discharged and performed:

Its powers, in connexion with this subject, are:

"To lay and collect taxes, duties imposts, and excises; to pay the debts and provide for the common defence and general welfare of the United States."

"To borrow money on the credit of the United States."

"To regulate commerce with foreign nations and among the several States," &c.

"To coin money, regulate the value thereof, and of foreign coin," &c.

"To dispose of, and make all needful rules and regulations respecting the territory, or other property belonging to the United States."

Such are the powers *quoad hoc*. Among the duties most important to be enumerated is that of making "all duties, imposts, and excises uniform throughout the United States."

Now, sir, how are these powers and duties imperatively required of Congress to be exercised and performed, to be executed? Are not the means granted? Expressly. The constitution says: "The Congress shall have power—

"To make all laws which shall be necessary and proper for carrying into execution the foregoing powers, and all other powers vested by this constitution in the Government of the United States, or in any department or officer thereof."

Here is a striking feature in this great instrument. Every power is specific, every duty is specific; but the means are not specified, and the Government is left unlimited and unrestricted as to means, save by the terms "necessary" and "proper;" that is, it is confined only to such means as are "necessary" to the ends of some one, or all, of the granted, specified powers or duties; and to such as are "proper," that is, consistent with, or fit, or congenial to the form of our Government and the nature of its powers and duties. And, sir, this distinction between the powers and duties of the Federal Government and the means of executing these powers and duties is a full and complete answer to the oft-repeated objection drawn from the imperfectly understood fact that the convention of 1787 rejected a proposition to grant the power of incorporation. To have granted a general power of creating corporations would have granted too much; it would have included certain corporations, ecclesiastical or others it might have been, uncongential and inconsistent with our institutions. And to grant the power of creating specific corporations would have been to enumerate one means of executing granted powers to the exclusion of all others, upon the principle of "*expressio unius est exclusio alterius*." The framers of the constitution preferred rather in their wisdom to confine the Government only in the selection of means to such as were necessary and proper. If a particular corporation should be found to be necessary and proper to execute some one or all of the granted and enumerated powers or duties, they left it to the law to create such a corporation under the general and comprehensive grant "to pass all laws necessary and proper for carrying into execution such powers or duties." And they left it to the sound discretion of Congress to select, of course, the best means thereby; inasmuch as the particular corporations they might have chosen to grant might in time have proved to be the worst means of executing the granted powers. It would have been unwise and impossible for them or for us, were we now making the constitution anew, to attempt to enumerate the granted means. They should have been omniscient to provide such as would, throughout all time and under all circumstances, have been the best. Not knowing what would always be the best to be used, they left, wisely left, in Congress an option of means, according to the wants and condition of the country, requiring the exercise of powers and the discharge of duties.

Again, sir, not only is Congress unrestricted and unlimited in the employment of means to execute its granted powers, except, as I have said, by the terms necessary and proper; but Congress is independent also as to these means. To Congress are these means given. The existence of State banks is urged, or has been—not now, I suppose—as a reason against the necessity of creating a national bank. It was not necessary, because the means of other Governments—the State Governments—might be employed. As

Oct. 13, 1837.]

Sub-Treasury Bill.

[H. OF R.]

to its granted powers, and the means of executing them, this Federal Government is as independent of the State Governments as it is of France or Italy, and as the States are of it in respect to their reserved rights. To no foreign power under the sun is this Government bound to look, or obliged to depend on none, for means to execute its constitutional powers.

The question then, sir, is reduced simply to this: Is a national bank necessary and proper to collect the taxes, to pay the debts, to negotiate the loans, to regulate the foreign commerce and the internal trade, to dispose of the public lands of the United States, and to regulate the value of money in the country, and to enable Congress to fulfil the duty of making all duties, imposts, and excises uniform throughout the United States? Sir, I will leave it to forty years' experience to answer the question on all these points; the wayfaring man, though a fool, cannot err in recounting to you what the Bank of the United States did in collecting, and keeping, and transferring the public revenue, without costs or charges, and without loss: what it was bound to do in case the Government needed to borrow money; what it did in equalizing and facilitating exchanges of foreign and domestic commerce; what it did in paying pensioners, and in accommodating Government in selling, and the people in purchasing, public lands; what were its salutary and steady influences in regulating the money market and the value of money, and its uses in rendering duties, imposts, and excises uniform! Its notes were better than fine gold everywhere—at land offices, custom-houses, to the Indian and the traveller, to the Government and the people, at home, in the North and South, East and West; and abroad, in the East Indies, they commanded a premium!

Twice has a national bank been chartered, and again and again has its constitutional validity been sanctioned by every department of the Government, Executive, Legislative and Judicial, and by all parties, democratic and federal, and admitted by every President of the United States, from Washington to Van Buren, Jackson not excepted, and acquiesced in by the people. The first bank charter was proposed within two years from the period of framing the constitution. It was formed in 1787, and a bank of the United States created in 1789! In the Congress of 1789, many members of the convention which framed the constitution sat, and more than two-thirds of them voted to charter a national bank. Mr. Madison, who then was one of those members of the convention who opposed the bank charter, afterwards, when President of the United States, gave it his sanction upon the principle of "*stare decisis*." The question of the constitutional power of Congress was submitted in 1789 to General Washington, who was president of the convention, and he referred it for solemn advice to the heads of the departments—two of whom were also members of the federal convention. Hamilton, the then Secretary of the Treasury, the author, in part, of the Federalist, who understood the history of the constitution as well as, if not better than, any man, maintained that the power was constitutional, and Randolph, Attorney General, dissented. The latter and Mr. Jefferson, who was not a member of the federal convention, and who alone, by-the-by, made the point that the proposition to grant incorporations was rejected, gave in their written opinions on one side, and Hamilton submitted his on the other. General Washington, who knew all the facts of the history of the constitution, necessarily, from his presiding in the convention, sided with Hamilton, and, after months of anxious and careful deliberation and inquiry, sanctioned the bill to incorporate a national bank! History, authority of decisions in every form, and the practice of the Government from its foundation, all concur in establishing the validity of a national bank charter. Shall these be overruled by one man

in the nation? Shall nothing be decided under our system?

The word "necessary" was given in an absolute sense by Mr. Jefferson. It is plain the term is not so meant in the constitution, because, if so, it would exclude the use of all means whatever, and totally destroy all option or selection of means. One could not be employed, because another might. One is not absolutely necessary because the other exists. The employment of State banks is not absolutely necessary, because sub-treasuries may be used, and sub-treasuries are not absolutely necessary, because State banks may be employed. Their unconstitutionality may be demonstrated precisely in the same manner as that of a national bank. There are no means absolutely necessary in all life; there is no one tool or agent in mechanics, or power in natural philosophy, absolutely necessary; bread itself is not absolutely necessary to sustain human life, because some other article as a substitute may be used as food. The very existence of more means than one, destroys the absoluteness of the necessity of any; and to say that one shall not be used because the others exist, is to destroy the power of choosing the best means altogether. The constitution could never have intended that Congress might employ the worst, and should not have the power of selecting the best means to execute its delegated powers and duties! Such a conclusion is the absurd one to which those who oppose the constitutionality of a bank charter are reduced.

The next question, then, is—is a United States Bank expedient—is it the best means? Sir, it is vain to argue this. I will not appeal to the chaos and confusion out of which the last national bank brought order and credit and confidence. I will not appeal to a comparison of the rates of exchange. I will not appeal to the premiums on silver and gold. I will not appeal to the traveller, to the laborer. I will not appeal to the restraint upon an increase of local bank capital, issues, loans, and discounts. I will not appeal to Siam for the uniformity of the circulation of its notes and their value. I will not appeal to the manner in which it conducted all its business relations with the Government—to the uniformity of taxes, or to the exact equality, under its influence, of Government officers and the people, and of Government creditors and debtors; but, sir, I remind my friend from South Carolina, [Mr. PICKENS,] of the report, able, clear, and unanswerable, of George McDuffie, his illustrious predecessor, in 1828, to the House of Representatives; and I appeal to the fact that it was the height of the last administration's wishes but to attain to the perfection of a national bank in organizing its system of local deposit-banks! Sir, it is too late in the day now for any man to presume to say, against all experience, delightful and rueful, of all times, in peace and in war, with and without a bank of the United States, that such an institution is not expedient. Sir, I have said that Mr. Van Buren reiterates the miserable demagoguism of his predecessor—he exceeds it in the passage which says:

"The Bank of the United States, with the vast powers conferred on it by Congress, did not, or could not, prevent former and similar embarrassments; nor has the still greater strength it has been said to possess under its present charter enabled it, in the existing emergency, to check other institutions, or even to save itself."

Here we see a President of the United States, the highest officer on earth, resorting to falsehood itself to catch vulgarity and ignorance! In the first place, it is not true that the Bank of the United States did not or could not prevent former and similar embarrassments: there never was embarrassment similar to the present—embarrassment so extensive, deeply pervading, and universally following, a long-continued prosperity in trade, and a rich harvest of profound peace. It is true that in 1819 the last national

H. OF R.]

Sub-Treasury Bill.

[Oct. 13, 1837.]

bank did, though like a strong man under an immense burden, stagger under the weight of embarrassments which followed war and the many years' want of a great regulator of currency; but as a strong man—omnipotent to save—it did clear away the wreck—it wrestled with derangements and embarrassments unprecedented, and subdued the task of restoring us to a state of commercial health and prosperity unexampled in the annals of finance and trade. It took a giant to rescue the country from its oppressive difficulties, and a giant that bank proved itself for much good and no mischief! But, sir, the falsehood which I mean here to expose is the base subterfuge of the President in treating a local bank of Pennsylvania as a national—a United States Bank. Had he no other resort than this ever weak and immoral subterfuge of the vanquished wicked—to take up a mere name for a defence, or a shield and buckler? Did Congress charter the State bank of Pennsylvania, called only by the name of a United States Bank? Had that institution the credit of this federal Government at its back—has it not all the opposition and hatred of the federal Executive? Would not any other local or State bank—any one of them which that same Executive has been petting and stimulating to ruin the country—with the same name, “smell as sweet?” Have they done any more to check other institutions or to save themselves? Does the virtue of a national bank consist in a mere “cognomen?” Fie! fie! sir, upon such ad captandum demagoguism in a President of the United States!

Sir, the gentleman from South Carolina, [Mr. PICKENS,] in like manner, says that the Bank of the United States never restored the currency; and, sir, permit me to tell the gentlemen that, like the President of the United States, he contradicts himself. In one breath they tell us that the Government credit did every thing and does every thing to insure the soundness and efficiency of banking institutions, and in the next breath they boast that the Pennsylvania bank, without the Government credit, and with the Government opposition, did not, and could not save itself! In one breath they tell us that the Government may “take a beggar from off the streets,” [Mr. CALHOUN in the Senate,] and attribute him with commercial and financial power and credit, may make him a safe and sound banker; and in the next breath they call out to us for help, for postponement of the fourth instalment, for Treasury notes, for indulgence on duty bonds, for the means of assisting a bankrupt Treasury, for the reason that some eighty or ninety local State banks, which Government has been backing with its credit for four years, have suspended specie payments! In one breath they tell us that the Bank of the United States never restored the currency; and in the next they admit that if we continue to take local bank paper, we must have a national bank, to check the local institutions and purify the currency! Sir, it is true that the Government credit does much, it does every thing when it fortifies and guarantees a national bank. Its credit, organized in that form, is all that is now wanting; but it does nothing but mischief when afforded to individuals or to local corporations. It stimulates to excesses, and is itself weak to restore an equilibrium—in fact, is the first to suffer from a state of intoxication and debauchery. It requires more help, for its protection, from a national bank, than it can possibly confer upon any other form of fiscal and commercial agency. If a bank of the United States does not tend to restore the currency, why did Mr. Calhoun propose, in 1834, to un-bank the banks with such an institution? The Government was then fully divorced from all banks; all that had to be done was to withhold the deposits from them. Now, sir, the Government is married to the banks—has been in Co. with them for years; and now, when a severance cannot be had without violence and disaster, now is the connexion to be dissolved! We are told that a United States bank has never yet encountered a period of war. Certain

it is that in no period of war have we ever had such a help in time of need, unless the old Bank of North America, which was a powerful friend during the Revolution, could be so considered. It is said a national bank could not have survived the scenes of 1813-14. True, those scenes were awful enough without such an institution; *non constat* that they would not have been better with one, knowing that such scenes have never occurred whilst a bank of the United States was in operation. Well may the gentleman safely appeal to all the intervals when there was no such bank, to find scenes which, perhaps, no bank could have encountered; but it is sufficient for us to say, in reply, that it ever encountered all the difficulties it met during its existence; that its existence occupied more than ten times the space of time which its absence filled; and hence the fair inference might be drawn that no such scenes could occur during its existence as those which have occurred in the intervals when it was not in existence, to control causes and effects.

In the third place, sir, I join issue with the gentleman from South Carolina, [Mr. PICKENS,] and maintain the proposition that the bank was ever and would be now the best friend of the South.

Sir, no interests in the country are more dependent upon a sound, safe, and uniform currency, than the interests of agriculture, and, consequently, the interests of the South. The great regulator, fly-wheel, and safety-valve of currency is, as I have shown, a bank of the United States. It afforded and is the only means which has ever yet been devised, which has furnished that great amount of circulating medium called “bills of exchange.” Many suppose that the most of the circulating medium consists of bank notes intermixed with a small amount of specie. Not so, sir. What proportion consisted of inland bills of exchange, I have not been able accurately to ascertain; but certain it is that all the heavier operations of trade are and must be carried on by them. At certain seasons of the year large amounts are wanted by the South, to be transferred to the northeastern cities, with which to purchase importations for consumption; and at other seasons similar amounts are needed by the North, in the South, to purchase the raw materials, for manufacture or exportation. The transfer of these heavy amounts must be made by bills of exchange. It cannot be conducted by transmitting specie or local bank notes; the cost and insurance and delay of transporting the one, and the discount and risk upon the other, forbid their use for the purposes of transferring funds. The great and leading arteries of trade, then, between the North and the South were supplied by bills of exchange as the circulating medium, whilst the Bank of the United States was in operation. It had funds in Boston, New York, Philadelphia, and Baltimore, upon which to draw from New Orleans, Mobile, Charleston, Nashville, Cincinnati; and funds in the latter places upon which to draw from the former. Funds were drawn without transmitting a dollar; the operation was effected simply by changing the pen from one side to the other of the books of the mother bank and its branches. No money was withdrawn from trade in New York; none from trade in New Orleans. The oblong bits of paper called bills of exchange caused convertible bank notes or specie to be paid at either place at sight, and at the rate of one half of one per cent. This was the simple and beautiful operation; and these bills were the pabulum of trade when the United States Bank was stricken down at a blow by the mace of despotism. What was the consequence? The life-blood was dried up; the arteries were drained; a large proportion of the circulating medium was destroyed. The consequence to the South was ruinous, upon a principle, a favorite principle of Mr. Calhoun. He calculates that the circulating medium is, to real estate or property, generally in the country about as one to thirty. If so, whenever the circulating medium is reduced one mil-
